for Adminiſtration of Juſtice. He purſued the War againſt the *Swiſſers* in Execution of the Buckler of St. *George*; but being worſted in 8 Battles, made Peace with 'em at *Baſle* in 1499. He inſtituted at *Augsburg* in 1500 the Council called the *Regency*, to govern the Empire with him. He divided *Germany* that ſame Year into 10 Circles, and made a ſort of perpetual Alliance with the *Swiſſers*, call'd the *Hereditary Agreement*, with relation to the Dominions that came to him from the Arch-Duke *Sigiſmund*, his Couſin. The *Venetians* refuſing him Paſſage through their Territories to be crown'd at *Rome*, he engaged the Pope and the King of *France* againſt them by the League of *Cambray*, that had well nigh ruin'd the Republick, which muſt have happened by their loſing all they had in *Terra-firma* after the Battle of *Agnadello*, had it not been for the Difference that fell out betwixt the Heads of the League. The *Imperialiſts* took *Padua*, but loſt it again by Neglect in 1509; and the *Venetians* having prevailed with *Lewis* XII. of *France* to break off from the League, began to reſume Courage. The Emperor defeated the *French* Troops near *Novara*, by the Help of the *Swiſſers*, in 1513, and thoſe of the *Venetians* near *Vicenza*; but loſt the Advantage of thoſe Victories by the Revolt of the *Swiſſers* for want of Pay. He could not recover *Milan*, and the *Venetians* retook *Breſcia* and *Verona*, which put an End to that War. The Count of *Goritz* dying, he incorporated that County with his other Dominions in 1515. He received with great Magnificence *Sigiſmund* King of *Poland*, and *Uladiſlaus* King of *Hungary*, at *Vienna*, and renewed with the latter the Contract of mutual Succeſſion on the Failure of either of their Iſſue. He promiſed the Great Duke of *Muſcovy*, for the Sake of the common Peace, not to protect the Great Maſter of *Pruſſia*. He died at *Wells* in *Auſtria* the 12th of *January*, 1519. in the 25th Year of his Reign. Dr. *Nicholſon* ſays, he never paſſed a Gibbet without making a reverend Salute, in theſe Words, *Salve ſanctæ Juſtitiæ*, in Honour of Juſtice; and that 5 Years before his Death, he had his Coffin always carried about with him. He was reckon'd one of the moſt Eloquent and Learned Emperors that ever *Germany* had. His only Child *Philip* married *Joan*, Daughter to *Ferdinand* King of *Arragon*, and *Iſabel* Queen of *Caſtile*, which brought him the Succeſſion of *Spain*. He died at *Bruges* in 1506, leaving two Sons and four Daughters; *Charles*, born the 24th of *Febr.* 1500; *Ferdinand*, the 10th of *March*, 1503; *Eleanor*, who firſt married *Emanuel* King of *Portugal*, and then *Francis* I. of *France*; *Iſabel*, who married *Chriſtian* II. of *Denmark*; *Mary*, who eſpouſed *Lewis* King of *Bohemia* and *Hungary*; and *Catherine*, promis'd to *John Frederick* Duke of *Saxony*, but married to *John* III. of *Portugal*. The Arch-Duke *Philip* contracted with *Lewis* XII. of *France* the Treaty of *Blois*, for dividing the Kingdom of *Naples*; and being dangerouſly ill, recommended to him by his Will his eldeſt Son, praying him to place ſuch an one about him, as he ſhould think moſt capable of giving him good Education; and accordingly *Lewis* choſe *William* of *Croi*, of the Branch of *Chievres*, one of the wiſeſt and ableſt Men of his Time.

Charles V. eldeſt Son to Arch-Duke *Philip*, and Grandſon to *Maximilian*, who could not get him choſen King of the *Romans* during his Life, was choſen Emperor after his Death, and crown'd with great Pomp at *Aix la Chapelle*. He was at the ſame Time King of *Spain*, and Sovereign of the *Netherlands*; and Pope *Paul* III. gave him the Title of *Great*. He was choſen chiefly by the Intereſt of the Electors of *Ments* and *Saxony*. He quitted to Arch-Duke *Ferdinand* his Brother all his Dominions in *Germany*, reſerving only thoſe which came to him by the King of *Spain* and Duke of *Burgundy*. He added to the *Netherlands* the Lordſhips of *Utrecht* and *Overiſſel*, which *Henry* Biſhop of *Utrecht* had given him. He afterwards acquir'd the Dutchy of *Gelderland*, the Country of *Groningen*, and the Towns of *Cambray* and *Lingen*; and to aſſure the *Netherlands* of a ſpeedy Relief againſt any who ſhould attack them, he incorporated them with the Empire by the Name of the Circle of *Burgundy*. He had ſeveral Wars, and was for moſt part ſucceſsful. He made a League with Pope *Leo* X. in 1521, and ſpeedily took *Parma*, *Placentia*, and *Milan*, and reſtor'd the latter to Duke *Francis Sforza*. He advanced *Adrian* IV. his Præceptor, to the Papacy; and the Conſtable *de Bourbon* having left the Service of *France* in Diſcontent, and join'd him,

Digitized by Google

him, he enter'd *Provence* with a great Army, took *Aix* and *Toulon*, and beſieg'd *Marſeilles*; but was obliged to raiſe it by the Valour of the Inhabitants, and repaſſed the *Alps* in haſt, before the Army of *Francis* I. of *France*, who thereupon enter'd the *Milaneſe*, and beſieg'd *Pavia*, which gave the *Germans* Time to augment their Army, and march to its Relief. *Francis* thought it would be diſgraceful not to fight them, engaged contrary to the Mind of his Generals, was defeated, and taken. This Advantage made the Princes of *Italy* jealous of the Emperor, and particularly Pope *Clement* VIII. *Francis* was carried to *Spain*, and ſtrictly kept in a Caſtle, and was ſet at Liberty after three Years on hard Conditions, that he could not fulfil, becauſe againſt the Fundamental Laws of *France*. He left his Sons for Hoſtages, but in Revenge join'd with the Pope and *Venetians*. Upon this *Charles* enter'd *Italy*, and the Conſtable *de Bourbon* took *Rome*, and beſieg'd the Pope in the Caſtle of St. *Angelo*, where he was reduc'd to great Want, while in the mean time Proceſſions were made in *Spain* for his Deliverance. He was made Priſoner however, and obliged to ranſom himſelf after 7 Months Confinement.

In 1529, *Charles* concluded a Peace with *France* at *Cambray*, which did not laſt long; for *Sforza* Duke of *Milan* having cauſed the *French* Ambaſſador *Mirabeau* to be murther'd (going through *Italy* to the *Turks*) by Order of the Court of *Spain* as 'twas ſuppos'd, the *French* King, to revenge it, deſign'd to march into *Italy*; but being deny'd Paſſage by the Duke of *Savoy*, he made War upon him, and chas'd him out of his Dominions. *Sforza* dying without Iſſue, *Charles* ſeiz'd *Milan* as a Fief of the Empire, which rekindled the War in *Italy* and the *Netherlands*, till a Truce of 10 Months was agreed on in 1537, which was afterwards prolong'd for 10 Years. During this Truce, *Charles* paſſed through *France* from *Spain*, to ſuppreſs thoſe of *Ghent*, who had revolted. The *French* King receiv'd him with extraordinary Honour, and *Charles* pretended to deſire a good Correſpondence with him; but fearing to be detained, promis'd to reſtore *Milan*; which failing to perform, the War was again renewed: The *Engliſh* join'd with *Charles*; but that League came to nothing. The *French* defeated the *Imperialiſts* at *Carignan* in *Italy*; and the Emperor being then embroil'd with the Proteſtants, made Peace with *France* in 1544. The Emperor being crown'd by the Pope, advis'd him to call a General Council, to ſettle the Affairs of Religion; but the Pope being unwilling to that, leſt it ſhould have turn'd to the Advantage of the Proteſtants, he put the Emperor upon reducing them by Force; but 'tis needleſs to repeat what we ſaid of that War, in the Chapter of *The Religion of the Modern Germans*. The Proteſtants being in ſome meaſure ſupported by *France*, and having obliged the Emperor to Peace by the Treaty of *Paſſau*, and narrowly miſs'd taking him at *Inſpruck*, he reſolved to revenge it on *France*, and beſieg'd *Metz* with 100000 Men; but the Duke of *Guiſe* defended it ſo well, that he was obliged to retire from before it in 1553; at which he was ſo mortified, ſays the *Atlas Hiſtorique*, that 'twas probable he would then have retir'd to a private Way of Living, but for the Differences that happen'd betwixt the Electors of *Brandenburg* and *Saxony*, which gave him an Advantage over the Proteſtants. He afterwards came to the *Netherlands* againſt the *French*, took *Terouanne* and *Heſdin*, and deſign'd to have attack'd *Dourlans*, but the Deſert of his Cavalry prevented it, and made him retire to cover *Cambray*, which the Conſtable of *France*, *Montmorency*, threatned to beſiege. He join'd with the Duke of *Tuſcany* to drive the *French* from *Sienna*, prevail'd with *Mary* Queen of *England* to marry his Son *Philip* Prince of *Spain*, and ſtopp'd Cardinal *Pool*, her Kinſman, in the Palatinate, leſt he ſhould have hinder'd it. The War betwixt him and *France* being renew'd in the *Netherlands*, the *French* took ſome Towns; and his Army having ſuffer'd much in a Battle there the 13th of *Auguſt*, 1554. the Queen of *England* mediated a Peace; but becauſe the Emperor would not reſtore *Milan*, the Treaty broke off in 1556.

Guicciardin and *Thuanus* ſay, That in *October*, 1529, he drove *Soliman* the Grand Signior from before *Vienna*, which he beſieg'd; and carried 50000 Men into *Africa*, where he took the Fort of *Goulette*, and re-eſtabliſh'd *Muley-Haſſen* in *Tunis*, after he ſubdued that Kingdom. In 1541, he went into *Africa* againſt

againſt *Barberouſſe*; but return'd with great Loſs into *Spain*.

After breaking off the Treaty with *France* in 1556, he grew weary of the Government, reſign'd the Empire to his Brother *Ferdinand* King of the *Romans*; and the very Night he reſign'd it, was ſo entirely abandon'd by his Court, that to ſhew the Inſtability of Humane Affairs, having no Servant near him, he would needs light a Perſon of Quality that was with him out of his own Chamber himſelf. He afterwards retir'd to the Monaſtery of *St. Juſt*, of the Order of St. *Jerome* in *Spain*, where he ſpent his Time in Devotion, and died *Sept.* 21. 1558. His Son *Philip* II. was ſo weak a Bigot, that he ſuffered the Inquiſition to ſeize the Archbiſhop of *Toledo* his Confeſſor, and his Preacher, and to condemn his Will to be burnt, on Suſpicion of his dying a Proteſtant; but it was afterwards pretended, that the Suſpicion was groundleſs, and that ſecret Ways were taken to prevent the Effect of the Sentence, in order to ſave the Honour of the Inquiſition: But ſome alledge, it was rather to prevent a dangerous Objection by the bigotted *Spaniards* againſt himſelf, as being the Son of a Heretick.

Charles V. ſay *Thuanus* and *Guicciardin*, was a Prince of great Parts and Courage, but a Diſſembler, and one that ſacrific'd all to his Ambition. He had the Pope and the King of *France* his Priſoners at one time, made 40 different Voyages and Journies, 9 into *Germany*, 6 into *Spain*, 7 into *Italy*, 4 into *France*, 2 into *England*, 2 into *Africa*, 8 Voyages upon the *Mediterranean*, and two on the Ocean. Other Hiſtorians ſay, That he obtain'd 40 great Victories, came off Conqueror in 70 Battles, and was once 40 Hours altogether on Horſeback. He left 3 Children by *Iſabel* of *Portugal*, *viz.* *Philip* II. of *Spain*; *Mary*, Wife to the Emperor *Maximilian* II. and *Jean*, Wife to the Prince of *Portugal*. Before his Marriage, he had by a Concubine, *Margaret*, firſt married to *Alexander de Medicis* of *Florence*, and afterwards to *Octavian Farneſe* of *Parma*; and after the Empreſs's Death, he had Don *John* of *Auſtria* by a young Woman of *Ratiſbon*, whoſe Name was never publick.

Puffendorf blames him for following the *Spaniſh* Maxims too far; for ſeeking to make himſelf abſolute, and neglecting to free the Empire from the Tyranny of the Popes, who had trampled upon it; and that he did not aggrandize his Family by the ſuperfluous Church-Lands, which he might eaſily have done, by countenancing the Reformation, and ſuffering the Biſhops to marry without quitting their Benefices; which, by the way, ſeems to contradict his having been a Proteſtant; or if he were, that he had not Courage enough to own it, or was not throughly convinc'd of the Falſhood of Popery till after his Retirement.

Ferdinand I. youngeſt Son to *Philip*, was elected King of the *Romans* at *Cologne* in 1531, tho' the Elector of *Saxony* oppos'd him. *John* Count of *Scepus*, his Rival for the Kingdom of *Hungary*, dying in 1540; his Widow, that ſhe might advance her Son, put her ſelf and him under Protection of *Soliman* II. who entring *Hungary* with a great Army, took *Buda*, and moſt of the Kingdom, on Pretence of defending it againſt *Ferdinand*, and was ſucceſsful in his War for ſome Years. *Ferdinand* invaded the Elector of *Saxony*, who had the chief Hand in the League of *Smalcald*. The *Bohemians* revolted; but he pardon'd them, and took away their Privileges; ſo that the Proteſtants went into *Poland* and *Pruſſia*, where they built new Churches. The Dukes of *Saxony* yielded him the Dutchy of *Sagan* in *Sileſia*, which they had bought. *Charles* V. would have obliged *Ferdinand* in 1550 to quit the Dignity of the King of the *Romans* to *Philip* II. his Son, which he procured him with that View; but he would not, nor yet create that Prince, Perpetual Vicar of the Empire in *Italy* and the *Netherlands*. The War began again in *Hungary* in 1551; and after the concluding of the Peace at *Paſſau* in 1552, *Maurice* Elector of *Saxony* marched thither with an Army; and the Need that *Ferdinand* had of the Proteſtants, made him agree to a Peace about Religion at *Augſburg* in 1555. That ſame Year he ſucceeded to the Empire, by the Abdication of *Charles* V. and was crown'd; but the Pope refus'd to own him a long time, becauſe 'twas done without his Conſent; and that *Ferdinand* had granted a Toleration to the *Lutherans*. He was mild and temperate, was Maſter of the Latin, and heard the Complaints of his meaneſt Subjects,

jects, saying, *That he could not expect Favour at the Throne of God, if even Beggars were denied Access to his.* He died in 1564, in the 62d Year of his Age, and the 9th of his Reign.

Maximilian II. was Viceroy of *Spain*, when he heard that *Charles* V. endeavour'd to have his Son *Philip* II. chose King of the *Romans*. Upon this, *Maximilian* went to *Germany* with the Infanta *Mary* his Wife; and tho' mightily urg'd to agree to *Philip*'s being chosen, he got himself elected in 1562, and that same Year was crown'd King of the *Romans*, *Bohemia*, and *Hungary*. He was made Emperor in 1564, and govern'd with much Wisdom and Equity. He deprived the Elector of *Saxony* for protecting the Rebels, and invaded the Province of *Transilvania*, which brought the *Turks* upon him, who took *Zigeth*, after a brave Defence by Count *Nich. Serini*. *Maximilian* retook several other Towns, made a Truce with the *Turks*, and refus'd to join the *Venetians* against 'em in 1570 and 1571. He had a Difference with Pope *Pius* for conferring the Title of Grand Duke on the Count *de Medicis*, alledging, that it belong'd only to himself to confer Titles of Honour. He demanded of the Pope to allow Communion in both Kinds, and Priests Marriage; and allow'd the Nobility of *Austria* the free Exercise of the Protestant Religion. He was chosen King of *Poland*; but *Stephen Battori* prevented him. He demanded Assistance of several Princes to recover that Crown, but in vain. He died at *Ratubon* in 1576, in the 50th Year of his Age, and the 13th of his Reign. His natural Goodness, and his Favour to his Protestant Subjects, made several Protestant Authors say, he was of their Religion; and the Papists call'd him the *Lutheran* Emperor.

Rodolph II. his Son, succeeded, being chosen King of the *Romans* before. He was crown'd King of *Hungary* in 1572, and of *Bohemia* in 1575. He came to the Empire in a very difficult Time, because of the Differences about Religion. He forc'd *Gebhard Trusches*, Archbishop of *Cologne*, who turn'd Protestant, and married *Agnes* Countess of *Mansfield*, to quit his Dignity. By a Truce of 15 Years, he prevented the Consequences of the Quarrel betwixt the Cardinal of *Lorrain* and *John George* Marquis of *Brandenburg*, who were both chosen Bishops of *Strasburg*, the former by the Popish Canons, and the latter by the Protestants, after the Death of Count *John Manderscheid*. To prevent the War that might have been occasion'd by the Succession of *Juliers*, he would have sequestred that Dutchy; but the Pretenders oppos'd it. The Protestants made a League, which they call'd the *Union*, in 1609, of which *Frederick* V. Elector *Palatine*, was Chief. The Papists made an Alliance of 9 Years among themselves at *Wurtzburg*, which they call'd the *League*. The *Imperialists* had War with the *Turks* from 1594 to 1606, when they took several Towns, and committed great Ravages. *Rodolph* demanded Assistance of the Princes, and made a League with the Prince of *Transilvania*, which had bad Consequences. This Army fought the *Turks*, who had taken *Agria*, and defeated them; but being too intent upon the Plunder, the *Turks* rallied, and cut many of them off. During this War, *Philip Emanuel* of *Lorrain*, Duke of *Mercœur*, General of the *Imperial* Army, made the famous Retreat of *Canisa*. Arch-Duke *Matthias* took from *Rodolph*, *Hungary*, *Bohemia*, and *Austria*, which he was obliged to quit to him in 1611, after having demanded from the Electors wherewith to maintain his Imperial Dignity. He died in 1612, without Issue. He was a Learned Prince, much given to Mathematicks, Painting, Chymistry, and Astrology; so that his Court was full of Men who profess'd those Sciences. He brought the *Gregorian* Account first into *Germany*.

In 1612, *Matthias* King of *Hungary* and *Bohemia* succeeded, but not without much Opposition. Cardinal *Klesel* was his chief Minister and Favourite. He disputed the Right of naming the Prince of *Transilvania* with *Amurat* the Great *Turk*; but at last made a 20 Years Peace with him. He prefer'd Arch-Duke *Ferdinand* his Cousin to *Philip* III. of *Spain*, his Nephew, to be his Heir, out of his natural Aversion to the *Spaniards*. He regulated the Succession at *Prague* in 1617, by the Advice of Arch-Duke *Maximilian* his Brother: And at the same Time a secret Treaty was made betwixt *Philip* III. of *Spain* and the Arch-Duke *Ferdinand*, by which *Philip* quitted to *Ferdinand*, and his Heirs-Male, the Heredi-

tary

tary Countries that ſhould fall to him by the Emperor's Death, on Condition, That the Daughters of the Branch of *Spain* ſhould be prefer'd to thoſe of the Branch of *Germany*. At this Time happen'd the Revolt of *Bohemia*, becauſe the Emperor's Miniſters invaded their Laws and Priviledges, granted them by *Rodolphus* the Second, for their Religion and Liberty. The Emperor aſſembled the States at *Prague*, where his Miniſters did ſo provoke the People, that they threw them out at the Windows of the Caſtle, by which they receiv'd no great Hurt. After which, they choſe new Magiſtrates, took Arms, and publiſh'd a Manifeſto to juſtifie their Proceedings. The Emperor publiſh'd another; and his Council, in order to accommodate Matters, were for turning out his Favourite *Klefel*, who was hated by the *Bohemians*; but the Emperor being againſt it, the Archdukes *Maximilian* and *Ferdinand* ſent him Priſoner to *Tirol* of their own accord. The Emperor however went on with the War; but the *Bohemians* being more diligent, rais'd 30000 Men under Count *Manſfeld*, took ſeveral Towns. Upon which the Emperor's Troops enter'd the Country, and committed ſuch Cruelties, as mov'd ſeveral neighbouring Princes and States to pity the *Bohemians*, and intercede for them in the Name of all the Proteſtants of the Empire; who alſo laid their Grievances before him, and complain'd, That he gave the Command of his Armies to Strangers, ſworn Enemies to their Religion; which ſhew'd there was a Deſign rather to deſtroy them, than to redreſs their Complaints. They made Application to ſeveral of the Electors to endeavour an Accommodation; but the Duke of *Bavaria*, who lov'd to fiſh in troubled Waters, prevented it. The Emperor begun at laſt to grow weary of the War and Fatigue, and reſign'd the Kingdoms of *Hungary* and *Bohemia* to his Brother *Ferdinand*: And by his Grief for the Death of Archduke *Maximilian* and the Empreſs, he fell into a Diſtemper, and died the 20th of *March* 1619. leaving his Succeſſor embroil'd in a War of 30 Years continuance, which ſome thought was foretold by a terrible Comet, with a long Tail, in form of a crooked Sword, which appear'd in the End of 1618. to moſt Nations of *Europe*.

In 1619. *Ferdinand* II. King of *Bohemia*, ſucceeded, and was hated for his Severity by all his Subjects, eſpecially the Proteſtants. The reſolved Nobility of *Auſtria* proteſted againſt his Perſecution, and threatned, if he did not forbear, to call in the *Turks* to their Aſſiſtance; yet he would not deſiſt. He made War with the *Venetians* on account of the *Croats*, who invaded their Dominions, and was ſucceſsful againſt them. The *Bohemians* perceiving him to be irreconcileable to their Religion, depos'd him, and offer'd their Crown to the King of *Denmark*, the Duke of *Savoy*, and the Elector of *Saxey*, one after another, who all refus'd it; but the Elector *Palatine* accepted it; the Iſſue of which, we gave an Account of in the Chapter of Religion. After that Prince was defeated, the Proteſtants made a League with the Kings of *France* and *Denmark*, the Duke of *Savoy*, the *Venetians* and *Dutch*; and afterwards another with the King of *Denmark*, and ſeveral Princes and States of the Empire, they forc'd Count *Tilly* the Imperial General, &c. to retire; but having alſo given an Account of the Iſſue of this War in the Chapter above-mention'd, we ſhall not repeat it. *Ferdinand* died the 5th of *February* 1637. in the 59th Year of his Age, and the 18th of his Reign.

Ferdinand III. his Son ſucceeded, being choſen King of the *Romans* 3 Years before. His Troops under *Gallas* had ſome Advantage over the *Swedes* at firſt, but were defeated near *Rhinfeld* by the Duke of *Saxe Weimar*; and another of his Armies was defeated in *Miſnia* by General *Bannier* and the *Swedes*, who laid Siege to *Ratiſbon*, where the Emperor had called a Diet. After this, *Tortenſon* the *Swediſh* General defeated Archduke *Leopold* near *Leipſick*, and invaded the Hereditary Countries; while on the other hand the Duke of *Anguien* took *Philipſburg*, defeated the Imperialiſts near *Friburg*, and obtain'd a famous Victory at *Norlingen* over the *Bavarians*; which would have ruin'd the Emperor intirely, had not the King of *Denmark* declar'd War againſt the *Swedes*, whoſe Power he dreaded, which gave their Arms a Diverſion, and the Emperor a time to breath: Yet *Tortenſon* chas'd *Gallas* into *Bavaria*, and defeated *Hatfeld* in *Bohemia*. General *Wrangel*, who ſucceeded *Tortenſon* in

the

Digitized by Google

the Command of the *Swedish* Army, defeated the Imperialists in the bloody Battle of *Sigmerſhuſen* in 1634. And both Branches of the Houſe of *Auſtria* being worſted in *Germany*, *Spain*, and the *Netherlands*, it brought on the Treaty of *Munſter*, which was concluded in 1648, as above-mention'd. *Ferdinand* got his Son of the ſame Name choſen King of the *Romans* in 1653; but he died the next Year, to the great Grief of his Father, for he was a Prince of mighty Expectation. The Emperor, after this, ſent Aſſiſtance to *Caſimir* King of *Poland* againſt the *Swedes*, who had ſeis'd moſt of his Country; He likewiſe procur'd the *Danes* to give the *Swedes* a Diverſion on that ſide, and died the ſecond of *April* 1657, of the Grief he conceiv'd for the Loſs of his Eldeſt Son.

Leopold his Second Son, ſucceeded, after 8 Months, and was crown'd at *Francfort*. In the beginning of his Reign, the War betwixt the *Swedes* and *Brandenburgers* was concluded by the Treaty of *Oliva* in 1660. A War broke out betwixt the Emperor and the *Hungarians*, who complain'd that their Privileges were invaded; that the *German* Troops maintain'd there on Pretence of defending them, which they were able to do themſelves, committed all Sorts of Violence and Cruelty; that the *Hungarians* in Offices were not ſuffered to diſcharge them; that the Liberty of Religion allow'd them by ſeveral Diets was denied, their Churches taken from them, and their Miniſters baniſh'd, becauſe they were not of the Religion of their Prince: That the Nobility, who ought to be tried by their own Judges, were tried by *Germans*; that tho' the Revenue was more than ſufficient to maintain the Troops, yet they were not paid, but liv'd by Extortion, or invading the *Turks*, who made ſevere Reprifals on the Country. The Grand Seignior improv'd this Difference, and the Emperor's taking part with the Prince of *Tranſilvania*, ſet up without his Conſent; therefore he gave that Title to Prince *Abaffi*. The *Turks* defeated the Imperialiſts at *Clauſenburg*, and took *Newheuſel* in 1663; but were routed at *Levents*, where they loſt 6000 Men, 4000 Wagons of Ammunition, 1000 Horſe, and 140 Camels: And afterwards at St. *Gothard*, where they loſt above 6000 Men, and many General Officers, by the Aſſiſtance of the *French*; which brought on a Peace. The *Hungarians*, finding that their Privileges were not reſtor'd according to Promiſe, being oppreſs'd by *German* Troops, and the Office of their Palatine being aboliſh'd, which had continued ſome hundreds of Years, they join'd with the *Tranſilvanians* to obtain help from the *Turks*; the very Monks preach'd, That their Yoke was eaſier than that of the *Germans*; for which the Counts of *Serini*, *Frangipani* and *Nadaſti*, were put to Death, which hinder'd Prince *Ragotski*'s taking Arms: And Count *Teckely* dying in his Caſtle, juſt as the Imperialiſts had inveſted it, they were left without a Head, till young Count *Teckely*, who was then but 15 Years of Age, and eſcap'd to *Tranſilvania*, came to eſpouſe their Cauſe. In 1672, the *French* invaded *Lower Germany*, and over-ran great Part of the *United Provinces*. The Elector of *Treves* having no Force to oppoſe the *French*, was obliged to allow them a Paſſage through his Dominions; and the Archbiſhop of *Cologne*, and the Biſhop of *Munſter*, join'd with them againſt their Country. The Elector of *Brandenburg* demanded Aſſiſtance of the Emperor to protect his Dutchy of *Cleves*, but the *French* over-ran it before he could have any. The *French*, in 1673, entred *Alſace*, where they took ſeveral Towns, and laid Part of the *Palatinate* under Contribution. The Duke of *Lorrain*, who commanded the Emperor's Army, would have join'd *Caprara*, but was prevented by M. *Turenne*, which occaſion'd the Battle of *Sintſheim*. The Elector *Palatine* was ſo much provok'd at the ravaging of his Country, that he ſent M. *de Turenne* a Challenge; which he would not accept, without Allowance from the *French* King. Theſe Things, with the taking of *Treves*, oblig'd the Empire to declare War, and aſſemble more Troops; upon which, M. *Turenne* repaſs'd the *Rhine*, and entrench'd near *Philipſburg*. In 1674, the *Germans* fought *Turenne* near *Mulſheim*, where both Sides claim'd the Victory. In 1675, the *French* defeated the *Germans* near *Colmar*; but *Montecuculi* ſucceeding the Duke of *Bournonville* in the Command of the *Germans*, he was a more equal Match for *Turenne*; who being encamp'd near him, and going to a Height to view his Army, was kill'd by a Cannon

Digitized by Google

Ball, which put an End to his Glory, that was tarniſh'd before by his turning Papiſt. After the Battle of *Altenheim*, the *French* repaſs'd the *Rhine*, where the Duke *de Duras*, Nephew to *Turenne*, acquir'd much Reputation by retiring ſo bravely from a diſadvantageous Camp. The Emperor about this time eſtabliſh'd in *Hungary* a Viceroy and Sovereign Council, in order to extirpate the Proteſtant Religion, and the *Hungarian* Liberties: They forfeited the Proteſtants, and ſent their Miniſters, and others, to the Gallies, upon every frivolous Pretext. The *Hungarians* rais'd 12000 Men to defend themſelves, and took ſome Towns. The Barbarity of the Imperial General *Kop* exaſperated them ſo far, that Priſoners on both Sides were put to the moſt cruel Deaths. In 1675, the Imperialiſts propos'd an Amneſty and Redreſs of Grievances; but their Promiſes not being credited by the *Hungarians*, it did not take. Prince *Abaffi* took Part with the Malecontents; and the *Turks*, who had aſſiſted them underhand before, did then invade the Emperor's Dominions. Young *Teckely* began about this time to ſignalize his Courage and Conduct, which indear'd him to Prince *Abaffi*. In 1677, the Emperor's Affairs being on the Declenſion, a new Accommodation was propos'd to the Malecontents, to which ſome ſubmitted, and others did not. In 1678, a Diet was held at *Odemburg*, where the Proteſtants were promis'd their Churches, the Papiſts complain'd of Abuſes in the Civil Government, and demanded their Liberties to be reſtor'd; but the Court would not. Count *Weſſelini*, Brother to the Palatine of *Hungary* who commanded the Malecontents, died; and *Teckely*, tho' but 22 Years of Age, had acquir'd ſo much Reputation, that he carried the Poſt from *Weſſelini*'s Brother. Having reviewed his Troops, he approach'd the Caſtle of *Mongatz*, in order to confer with Count *Serini*'s Widow, Daughter to Prince *Ragotzki*; but her Mother-in-Law hinder'd it, and ſent ſome Troops to beat up Count *Teckely*'s Quarters; where a Son of Count *Serini* being taken, he carried on a Correſpondence betwixt Count *Teckely* and his Siſter. The Count afterwards defeated the Imperialiſts under Count *Liſſy*, took moſt of the Towns of *Hungary*, and thoſe of the Mountains in *Tranſilvania*: The Emperor's Army being in no Condition to reſiſt him, the Court of *Vienna* propos'd an Accommodation; but the Malecontents, tho' they wanted both Diſcipline and Money, inſiſting on a full Redreſs of all Grievances, it came to nothing.

In 1679, the War betwixt the Empire, the *French*, and the *Dutch*, was concluded by the Treaty of *Nimeguen*, where the King of *Sweden* was Mediator; by which *France* got *Friburg* and *Briſgau* in lieu of *Philipſburg*, and the *Swedes* recover'd the Provinces they had loſt in the War. That Year the Plague hindred the Proceedings of the Armies in *Hungary*. *Teckely* being in *Tranſilvania*, *Weſſelini*, who had got the Command of the *Hungarians* in his Abſence, would not reſtore it upon his Return; ſo that they fought, wherein *Weſſelini* was worſted, and taken. The Emperor offer'd an Accommodation again; but *Teckely* would do nothing without Conſent of the *Turks*, who had promiſed to make him Sovereign of *Tranſilvania*. Princeſs *Ragotzki*'s Mother-in-Law dying, the Princeſs married *Teckely*, by which he got all the Places which depended on that Family.

After the Peace of *Nimeguen*, the *French* began to erect Chambers of Reunion at *Metz* and *Briſack*; where, by the Sentence of his own Judges, ſeveral Princes were ſummoned to ſurrender thoſe Provinces and Cities that were alledged to be Dependant on his new Acquiſitions; and ſuch as would not comply, were compell'd by force, particularly the Elector *Palatine*, and the Elector of *Treves*: The *French* ſtill kept Poſſeſſion of thoſe Places they were obliged to ſurrender to the Empire by the Peace. The Emperor's Miniſter gave in a Memorial to the Diet at *Ratiſbon* of thoſe Proceedings; and the States unanimouſly reſolved, That they were contrary to the Treaties; but *Holland* and *Brandenburg* were not enclin'd to a Rupture with *France*. In 1680, the *French* ſurpriſed *Strasburg*, by the Treachery of ſome of their new Magiſtrates: The King of *France* did likewiſe Project to get the Dauphin elected King of the *Romans*, but miſcarried in it. In 1681, he made a Treaty with Count *Teckely*, who had a ſtrong Army of the Malecontents in *Hungary*; was in great Eſteem with the Grand Sighior, and engag'd the *Turks* to invade

Hun-

Digitized by Google

Hungary before the Emperor was aware of it. In 1683, the Duke of *Lorrain* beſieg'd *Neuheuſel*; but was obliged to break up on the Grand Viſier's marching againſt him. At the ſame Time 3000 *Tartars* harraſs'd the Country, and the *Germans* with great Difficulty retired towards *Vienna*; for 3000 *Turks* and *Tartars* fell upon their Baggage, took it, and kill'd moſt of the Convoy; but Prince *Lewis* of *Baden* reſcued Part of the Baggage. The News of this occaſion'd an incredible Conſternation at *Vienna*; the Emperor removed to *Lintz*, and moſt of the Citizens were for leaving the City; but the Approach of the Duke of *Lorrain* next Day encourag'd them, ſo that they began to repair the Fortifications, and the Gariſon was reinforc'd, there not being above 200 regular Troops in the City before. The *Turks* open'd their Trenches the 15th of *July*: The Gariſon, under Count *Staremberg*, diſputed every Inch of Ground, and by frequent Sallies cut off great Numbers of 'em. In the mean time the Duke of *Lorrain* defeated *Tockely*, took his Baggage, and relieved *Presburg*, that was ready to have fallen into his Hands. The Duke engaged him a ſecond time on the Borders of *Moravia*, and forc'd him to retire. The Siege continued to the 12th of *September*, with all the Fury imaginable, and the Beſieged behav'd themſelves to Admiration, till they were reliev'd by the Chriſtian Army of 80000 Men, conſiſting of *Imperialiſts* and *Poles*: The Right Wing was commanded by *John Sobieski*, King of *Poland*; the Left by the Elector of *Bavaria* and the Duke of *Lorrain*; and the Main by the Elector of *Saxony* and Prince *Waldeck*. They forc'd the Enemy's Intrenchments; and during the Engagement, the Duke of *Lorrain* detached Prince *Lewis* of *Baden* with a Body of Horſe, Foot and Dragoons, to relieve the City, which he did, and killed all the *Turks* that were employ'd in the Aſſault. Upon this, the *Turkiſh* Horſe fled, and left their Camp and Foot to the Mercy of the Chriſtians, who gain'd a ſignal Victory, with the Loſs only of 1000 Men. The *Turks* loſt about 75000, with their Baggage, and 120 Cannon; and the Gariſon loſt about 6000 Men during the Siege.

The Elector of *Saxony* return'd home with his Troops after the Relief of the Town, becauſe the Emperor diſoblig'd him; but the *Imperial* and *Poliſh* Army march'd after the *Turks*, fell in with 14000 of them, routed them, took the Fort of *Barkan* by Storm, and ſoon after the Duke of *Lorrain* took *Gran*, after a Siege of 3 Days. 'Tis probable their whole Army muſt have been diſpers'd, had not the King of *Poland* been likewiſe diſguſted, which made him not ſo eager in the Purſuit as otherwiſe he would have been. He was not pleaſed with the Emperor's Coldneſs to him upon the Interview, after the conſiderable Service he had done him by raiſing the Siege. The *Atlas Hiſtorique* ſays, the Malecontents prevail'd twice with that King to mediate for a Redreſs of their Grievances; which being refus'd, he declar'd he would aſſiſt the Emperor no more. The Progreſs of the Emperor's Arms however made the *Turks* abandon *Eſſec*; and the Grand Viſier being charged to have occaſioned all thoſe Misfortunes by his Imprudence, he was ſtrangled at *Belgrade* by the Grand Signior's Orders.

In 1684, the *Imperialiſts* took *Vicegrade*, a ſtrong Fortreſs on a Mountain near the *Danube*. The Duke of *Lorrain* defeated the *Turkiſh* Army near *Weiſſen*, took that Town, and worſted the *Turks* alſo near *Buda*. On the 18th of *July*, the Duke of *Lorrain* ſat down before that Town. Twenty Thouſand *Turks* came and encamped within 4 Miles of it: Upon which the Duke marched and routed them, took their General's rich Tent, and killed 4000 on the Spot, beſides thoſe ſlain in the Purſuit; yet the Beſieged held out, and concerted with the Seraſquier, that on the 25th of *September* they ſhould make a great Sally, and that he ſhould ſend a ſtrong Detachment to enter the Place, which he did; and tho' they met with great Oppoſition, yet 600 of 'em got in. The *Imperial* Army being much weakened, could not puſh on the Siege with Vigour; and on the 20th the *Turks* made three great Sallies, kill'd many of the *Imperialiſts*, and ruin'd moſt of their Works, which, together with the Approach of the Seraſquier with a great Army to the Relief of the Town, and the Badneſs of the Weather, obliged the Duke to raiſe the Siege.

Count *Lefty* beſieged *Verovitza*, the Capital of *Sclavonia*; and having ſent a Detachment who defeated 2500 *Turks* near *Flatina*,

Digitized by Google

Verovitza ſurrender'd. He had like to have been ſurpris'd afterwards by 20000 *Turks*, commanded by the Seraſquier; but he fortified his Camp, and obliged the *Turks* to retire with conſiderable Loſs. In *Upper Hungary*, the *Imperialiſts* defeated *Tekely*, killed 4000 of his Men, and took two Towns.

In 1685, the Duke of *Lorrain* beſieged *Newhauſel*: The *Turks*, to give him a Diverſion, beſieged *Gran*; upon which he left Troops to carry on the Siege, marched againſt them with the Main of his Army, killed above 6000 of them, beſides 3000 they loſt in the Siege, took their Camp and Baggage, with the Loſs only of 1000 Men, and relieved *Gran*, while his Troops before *Newhauſel* took that Place by Storm.

Count *Leſly* took *Michalowitz* in *Croatia*, defeated 10000 *Turkiſh* Horſe and Foot near *Eſſec*, ſcal'd the Town, put the Gariſon to the Sword, and burnt Part of the famous Bridge of that Place. About that ſame Time, General *Schultz* took *Eſperies* in *Upper Hungary*; upon which ſeveral other Places there ſurrender'd; and General *Caprara* took *Caſhaw*.

About this Time, Count *Tekely* was ſeiz'd by Order of the Grand Signior, which was a Blunder in Politicks, and diſheartened the Malecontents; ſo that the Port being ſenſible of their Error, ſet him at Liberty; upon which the *Imperialiſts* removed from before *Mongatz*, where they had block'd up his Lady Princeſs *Ragotzki*.

In 1686, the Duke of *Lorrain* laid Siege again to *Buda*, and open'd his Trenches the 21ſt of *June*. The Beſieged made furious Sallies; in one they killed 1000 Men, and in another nail'd up a Battery of Cannon, and two Mortars; but their Magazine near the Caſtle was blown up, which demoliſh'd a great Part of the Wall. On the 12th of *Auguſt*, the Grand Viſier came with 10000 choſen Men to force the *Imperial* Lines on the Right, and throw Supplies into the Town, and deſign'd with his whole Army of 70000 to attack the Main of the *Imperialiſts*; but the Duke of *Lorrain* ſent 7 Regiments of Horſe, and ſome *Hungarians*, who attacked the 10000 *Turks*, killed above 3000 Janizaries, took 8 Pieces of Cannon, and rejoin'd the Duke, who return'd to the Siege, and puſh'd it on with great Vigour. Three Thouſand Janizaries forc'd the Out-Guards, and threw 150 Men into the Town; but the reſt were repulſed. The *Imperialiſts* took the Caſtle by Storm on the 29th of *Auguſt*, and 3000 Janizaries, who deſign'd to get into the Town, were repulſed, and 400 of them killed.

In the beginning of *September*, the Duke was reinforced by 10000 Men, under General *Scherffemberg*; the Aſſault was made, and the Town taken by Storm. The *Turks* fought with incredible Bravery, the Baſha was killed in the Breach, 4000 *Turks* ſlain in the Aſſault, and the Chriſtians got an incredible Booty. When the Grand Viſier heard the Town was taken, he burnt his Camp, and retired to *Alba Regalis*.

Prince *Lewis* of *Baden* being join'd by a Body of *Croats*, beſieg'd *Five Churches*, a ſtrong Place, of difficult Acceſs, where there were 2000 *Turks* in Gariſon. He made a Breach in three Days, and began to work on his Mines; upon which the Gariſon, who wanted Ammunition, ſurrender'd at Diſcretion; and *Syclos* did the like. Prince *Lewis* deſtroy'd the Bridge of *Eſſec* from *Darda* to the *Drave*, and likewiſe the Bridge of Boats which the *Turks* had laid over that River. Count *Caraffa* attack'd *Segedin*, and the Grand Viſier ſent 2000 *Turks* and 4000 *Tartars* to relieve it; but General *Veterani*, with 5000 Men, ſurpris'd the *Tartars*, and forc'd them to abandon their Camp with great Slaughter; but the Remainders of that Detachment joining with others, made up a Body of 10000 Men, and deſign'd to ſurpriſe *Veterani* in his March; but he forc'd them to retire with the Loſs of 2000 Men, and their Baggage; upon which *Segedin* ſurrendes'd the 23d of *October*.

In 1687, the Duke of *Lorrain* made a feign'd Retreat near *Mohatz*; upon which the Grand Viſier order'd 15000 Men to attack his Left, commanded by the Elector of *Bavaria* and Prince *Lewis* of *Baden*; but they ſtood their Ground till the Duke came up, when the *Turks* were put to flight, and many of them kill'd on the Spot, beſides great Numbers drown'd in Moraſſes and in the River as they fled. General *Dunewa'd* paſſed the *Drave*, and took the Caſtle of *Butjhew*, and deſign'd to attack the Caſtle of *Eſſec*; but the *Turks* abandon'd it, with *Poſega* in *Sclavonia*, and other Places.

About

Digitized by Google

About this Time, the *Hungarians* finding themſelves treated like a Conquer'd People, many of their Towns deſign'd a Revolt; but not being able to effect it, their Miſery was heighten'd, abundance of Perſons of Note executed on that Account, and multitudes of innocent People taken up, that were forced to redeem their Liberty.

After the taking of *Buda*, Prince *Abaffi* began to Temporize with the Emperor: But the Duke of *Lorrain* enter'd *Tranſylvania*, as Count *Teckely* foretold him would happen, and oblig'd that Prince and the States to a Submiſſion, to ſurrender their Strengths, and conclude a Treaty very advantageous to the Emperor; upon which the Prince retired to *Forgatz*. About this Time, the ſtrong Fortreſs of *Agria* ſurrender'd to the *Imperialiſts*, and *Mahomet* IV. Emperor of the *Turks*, was depos'd, and his Brother ſet up in his ſtead.

The Emperor's good Succeſs put him upon getting his Son the Arch-Duke *Joſeph* crown'd King of *Hungary*. He went himſelf to *Preſburg*, where he aſſembled the States, and told 'em, He would have the Crown made Hereditary. The States took it into Conſideration, repreſented their Grievances, as uſual, and ſaid, They were willing to elect the Arch-Duke; but deſir'd their Freedom of Election might be continued, and that the Crown ſhould not be Hereditary; That the *German* Troops might be recalled when Peace was made with the *Turks*; and all their Grievances redreſſed before the Coronation. The Emperor allow'd them 14 Days to deliberate and draw up their Grievances; but told 'em, He had been at more Charge to defend that Kingdom againſt the *Turks*, than it was worth, and therefore had Right to look upon it as one of his Hereditary Countries. There were great Debates about this in the Diet; and the Count *de Draſcowitz*, the Chief Judge of the Kingdom, having repreſented the Conſequences of it, they pray'd the Emperor not to make ſuch an Alteration in their Conſtitution; but the Count being found dead a-Bed (ſays the *Atlas Hiſtorique*) ſome Days after, no body knows how, thoſe of his Sentiments durſt not after that talk any more of it. Some deſir'd that they might be at Liberty to chuſe any ſuch Prince of the Houſe of *Auſtria* as they thought fit; but this was alſo rejected. There were Two other Things which retarded the Coronation; the Firſt was, That according to an Article of King *Andrew*'s Declaration, any of the three Eſtates had a Right to oppoſe the King, when he acted againſt the Laws of the Kingdom, without being guilty of Treaſon; but the Emperor would not allow of that. The Second was, That the Proteſtants, who had join'd with the Court to get the Crown made Hereditary, thought it a proper Seaſon to demand, That they ſhould be maintain'd in their ancient Privileges; That the Churches and Eſtates which had been taken from 'em ſince 1667, ſhould be reſtored; That they ſhould have Deputies in every Diet; That the Jeſuits ſhould not meddle in Affairs of State, or what related to the Proteſtant Religion; That they ſhould not be allow'd to ſettle in any other Place than where they then were; And that Count *Caraffa*, who had got many innocent People cut off on Pretence of Plots, ſhould be turn'd out: But the States did not think it a ſeaſonable Time for the Proteſtants to inſiſt on thoſe Things; and thus, on the 29th of *December*, the Kingdom was made Hereditary, and the Power of the Prince in a manner abſolute; ſo that the People could do nothing but groan and ſigh for the Loſs of their Liberty; for Count *Teckely*, who had acquir'd ſo much Glory, had fail'd of late in moſt of his Attempts, and was not able to keep up their Spirits.

In 1688, Princeſs *Ragotski*, who had been block'd up in *Mungatz* a long Time, being in want of Neceſſaries, and hearing that her Husband Count *Teckely* was ſent for to *Conſtantinople*, where ſhe was afraid he might be ſtrangled, as he was every where given out to be, was forc'd to ſurrender. The Count being informed of this, as he was on his Journey to *Conſtantinople*, thought fit to return, leſt his Friends ſhould be quite diſpirited. Some accus'd him for this to the Grand Signior; but it made no Impreſſion to the Count's Prejudice.

Three thouſand Five hundred Infidels attempted to ſurpriſe *Czernick*; but the Garriſon ſallied, killed 700 of them, and took moſt of the reſt. The 27th of *May*, the *Imperialiſts* obliged *Alba Regalis*, where the Kings of *Hungary* were formerly crown'd, to ſurrender, and found 84 Pieces of Cannon

Digitized by Google

non in it: They also took *Lippa* by Storm; and the *Turks* abandoned *Illock* and *Peter Waradin*.

In *August*, the Elector of *Bavaria* invested *Belgrade*, where the *Turks* made a brave Defence; yet he took it by Storm on the 6th of *September*, enter'd the Castle after the *Turks*, who fled thither, and kill'd 500 of them, with the Governor: The Christians lost 1250 Men, of whom there were 12 great Lords; but the *Turks* lost above 4000 Men in this Action.

Prince *Lewis* of *Baden*, with a flying Camp in *Bosnia*, was surrounded by 15000 *Turks*, but routed them, and took 1200 Prisoners, near *Brodt*.

In 1689, the Grand Signior finding a Way open'd to *Constantinople* by the taking of *Belgrade*, offer'd Peace upon very advantageous Terms, which were rejected. The Elector of *Bavaria* and Duke of *Lorrain* went to Command the Army on the *Rhine* against *France*; and the Prince of *Baden* commanded in *Hungary*. The *Imperialists* block'd up *Canissa*, *Themiswar* and *Waradin*; but having too few Troops, they could not hinder Convoys to enter those Places, which with some Losses by Sallies, oblig'd them to rise from before 'em. Prince *Lewis* of *Baden* having Advice, That the *Turkish* Army was above 50000; he reinforced his Army from the Garisons, and march'd towards the *Turks*, who were intrench'd before *Nissa*; but the badness of the Way, and want of Provisions, oblig'd him to march back to *Passarovitz*, to secure the Bridges over the *Morave*, and prevent the *Turks* from invading *Selavonia*. The *Turks* hearing of his Retreat, sent a strong Detachment to harrass him in his March, and to take the Imperial Magazine at *Semendria*; but he defeated this Detachment, and another that was sent to cut off his Retreat: After which, he marched against their Army near *Patoschin*, defeated 'em, obliged 'em to retire to *Nissa*, took their Camp and Baggage, and 100 Pieces of Cannon. Some Days after he march'd to *Nissa*, forced their Camp, routed them, and took the Town. *Teckely* was on his Way to relieve it; but coming too late, he join'd the Grand Signior at *Sophia*, who entertain'd him with all possible Marks of Honour and Affection. The Prince of *Baden* marched from *Nissa* to *Widdin*, a Place of Importance on the *Danube*; defeated two Bassa's who lay near that Place, and took it in four Days; *Piccolomini* defeated the *Turks* also in several Skirmishes: But these continued Victories made the *Imperialists* too bold, which cost 'em some Regiments that attacked four times their Number of *Turks*. Upon this, *Veterani* was obliged to draw out his Troops from *Nissa*, and other Places, and march towards *Belgrade*. The Prince of *Baden* quartered part of his Army in *Wallachia* and *Transilvania*, fortified several Posts to secure them from the *Turks* and *Tartars*, and return'd to *Vienna*.

In 1689, the *French* invaded the *Palatinate*, committed great Barbarities there, took *Philipsburg* and other Places, having formerly burnt the Cities of *Spires*, *Oppenheim*, *Worms* and *Frankendale*. This Year they laid waste the Country about *Montroyal* and *Luxemburg*, to prevent the Confederates sitting down before these Places. The *Imperialists* under the Duke of *Lorrain* took *Kerserwaert* and *Ments*, after a brave Defence by the *French*; wherein the *Germans* lost above 6000 Men: And the Elector of *Brandenburg* being reinforced by Troops from the Duke of *Lorrain*, oblig'd *Bonne* to Surrender after a vigorous Resistance.

In 1690, the *Turks* desired a Peace; but the Emperor's Terms appearing too high, the War began again. *Abaffi* Prince of *Transilvania* being dead, the Emperor made his eldest Son Prince of that Country, and the Grand Signior conferr'd that Honour on Count *Tekely*; who defeated and took General *Heusler* in *Transilvania*, which obliged Prince *Lewis* of *Baden* to pass the *Danube* at *Semandria*. The *Turks* also besieg'd *Nissa*: Count *Guido* of *Staremberg* wanting Provisions, was oblig'd to surrender it upon honourable Terms, after a brave Defence, but many of their Garison were perfidiously kill'd by the *Infidels*. The Garison of *Widin* capitulated with the *Turks*, and were convoyed to *Orsiva*. Upon this, the *Turks* march'd towards *Belgrade*, the Breaches of which had not been sufficiently repaired; and General *Aspremont*, and the Duke of *Croy*, who had thrown himself into it, had not time to fortifie it. The Garison made a brave Defence, but a Bomb blew up their great Magazine of Powder; it kill'd 1200 Men, wounded a greater Number, and threw

Digitized by Google

ſhrew down part of the Walls. Several other Magazines were alſo ſet on fire, which occaſion'd the burning down of a great part of the City: The *Turks* taking the Advantage of this Confuſion, after ſeveral Repulſes, carried it by Storm, and killed all thoſe that oppos'd them; ſo that only 600 of the 6000 that were in Gariſon eſcaped with the Duke of *Croy*, and the Counts of *Aſpremont* and *Archinto*, over the *Danube* in Boats. The *Turks* after this march'd towards *Eſſec*, ſat down before it; and would have taken it, if the Duke of *Croy* had not order'd 300 Men to Sally out in the Night, to ſound a great many Trumpets, and beat Drums, firſt more faintly, and then more loud: Upon which, the *Turks* thinking it to be a ſtrong Body of *Germans* come to the Relief of the Place, they broke up in Confuſion, and left their Cannon and heavy Baggage. Count *Teckely* took *Lippa*, and put Gariſons into *Giula*, *Themiſwaer*, and *Great Waradin*, which harraſs'd *Hungary*. Prince *Auguſtus* of *Hanover*, with 1000 Men, raſhly attack'd 1500 *Turks* ſtrongly intrench'd in *Tranſilvania*, was routed, and himſelf kill'd on the Spot. This Year the Emperor and the King of *Spain* made a new Alliance with the Duke of *Savoy*, who was threaten'd by the *French* King; and the Emperor got his Son Archduke *Joſeph* King of *Hungary*, elected King of the *Romans*. *Canizſa*, a ſtrong Fortreſs in *Lower Hungary*, was ſurrendred to the *Imperialiſts*, while the *Turks* were buſie with the Sieges of *Niſſa*, *Widin*, *Eſſec*, and other Places. Prince *Lewis* of *Baden* march'd with ſo great Secrecy, that he ſurrounded *Teckely*'s Army, forc'd him to retire into *Wallachia*, and to leave moſt of his Baggage, with 4 or 500 Men behind, by which *Tranſilvania* was clear'd of the *Turks*.

In the beginning of 1691, died the Duke of *Lorrain*, who had gain'd ſo much glory in the *Turkiſh* War, *&c.* a little time before; and deſign'd to have invaded *France* with 40000 Men, by the Way of *Lorrain*. The Command of the Army on the *Rhine* was given to the Electors of *Bavaria* and *Saxony*, but they did nothing memorable on that ſide. The Prince of *Baden*, about the middle of this Campaign, march'd with 40000 Men along the *Danube* to *Peter Waradin*, to oppoſe 60000 *Turks*, who deſign'd to paſs the *Save*; but their Fleet on the *Danube* being ſtronger than that of the *Imperialiſts*, hinder'd the Proviſions to come any farther than *Salankemen*; and the *Turks* march'd thither to cut off their Communication with *Peter Waradin*, where their Proviſions lay. This alarm'd Prince *Lewis* of *Baden*, who wanted both Proviſions and Ammunition, and made him reſolve to fight, tho' with great Diſadvantage. He attack'd the *Turks* in their Trenches near *Salankemen*: His Right Wing was worſted; but the Left coming up, they routed the *Turks*, and gave Time to the Right to rally, by which they had a compleat Victory, with the Loſs only of 2000 Men; and the *Turks* loſt about 16000, with the Grand Viſier *Cuperli*, the Aga of the Janizaries, and ſeveral great Baſſa's. After this they retook *Lippa*, paſs'd the *Danube*, and took *Great Waradin*; but the Citadel held out, and was block'd up.

In 1692, General *Heuſter* was exchang'd for Count *Teckely*'s Wife. He beſieged *Great Waradin* on the 28th of *April*, and took it the 2d of *June*, together with Store of Ammunition, 77 Pieces of Cannon, and 4 Mortars. This Year the Duke of *Hanover* was made an Elector of the Empire. The Prince of *Baden* having repreſented to the Emperor the Neceſſity of Naval Preparations on the *Danube*, becauſe the *Turks* had a ſtronger Fleet, and frequently ſtop'd their Convoys: By Conſent of the *Dutch*, many Seamen were liſted in their Country for that Service, and ſeveral Veſſels fitted out: This little Fleet was commanded by the Marquis of *Fleuri*. The *French*, under the Mareſchal *de Lorge*, committed ſome Barbarities on the *Rhine*; ſurpriz'd and took the Duke of *Wirtemberg*, and kill'd and took 2000 of the Detachment he commanded. The Landgrave of *Heſſe Caſſel* oblig'd the *French* to riſe from before *Rhinfelds*.

In 1693, my Lord *Paget* Ambaſſador from *England*, and Monſieur *Hemikerque* Ambaſſador from the *States General*, came to *Conſtantinople*, to mediate a Peace betwixt the Emperor and the Grand Signior; but the *French* Ambaſſador diſſwaded the Port from it. The Duke of *Croy* commanded in *Hungary*, and the Prince of *Baden* on the *Upper Rhine*. The *French* under the Mareſchal *de Lorge* attempted twice to force the *German* Camp, but were repuls'd with Loſs. Mareſchal *de Lorge*, who commanded the *French*

Digitized by Google

French under the Dauphin, put the Dutchy of *Wirtemberg* under Contribution, and took *Heidelberg*, by the Treachery or Cowardice of the Governor, where they committed great Barbarities, as in other Places of the *Palatinate*, burning wherever they came. The *Imperialists* beſieg'd *Belgrade*; but the Grand Viſier with an Army of 80000 Men obliged them to raiſe the Siege. General *Heidersheim* routed a ſtrong Body of *Turks* and *Tartars* near *Giula*, and took that Town.

In 1694, the *Turks* beſieg'd *Titul*, without Succeſs: The Gariſon intercepted 20 *Turkiſh* Veſſels with Proviſions, which occaſion'd a great Scarcity in their Camp. They alſo beſieged *Great Waradin*; but in vain. Two Thouſand *Tartars* were detached over the *Danube*; but were cut off. Prince *Lewis* of *Baden* paſſed the *Rhine*, made M. *de Lorge* retire, laid the Country under Contribution, deſtroy'd ſeveral *French* Magazines, and carried off 14000 Head of Cattle.

In 1695, the Elector of *Saxony* commanded in *Hungary*, and the Grand Signior *Muſtapha* headed his own Army, retook *Lippa* and *Titul* from the *Imperialiſts*, defeated a Body commanded by Count *Veterani*, who was killed, and 3000 of his Men, with the Loſs of 6000 *Turks*. The Elector of *Saxony* hinder'd them from making any Advantage of this Victory in *Tranſilvania*.

In 1696, the Elector of *Saxony* beſieg'd *Themiſwaer*, which brought the Grand Signior to a Battle. The *Turks* had the Advantage of Number and Ground, and the Loſs on both Sides was near equal; ſo that both challeng'd the Victory; but the Elector loſt 5 great Cannon, and 16 Field-Pieces; and the *Turks* retook many ſmall Places on the *Save*, which they demoliſhed.

In 1697, Count *Teckely*, who had loſt his former Reputation with the *Turks* ſince the Battle of *Salankemen*, retir'd to *Conſtantinople*. One of his Followers, called *Tekai*, form'd a Conſpiracy in *Hungary*, aſſembled a Body of Troops, ſeiz'd *Kallo* and *Potack*, cut off the *Imperial* Gariſons, and publiſh'd a Manifeſto, inviting the *Hungarians* to ſhake off the *German* Yoke; but this Conſpiracy was ſoon cruſh'd. This Year the Elector of *Saxony* being Competitor for the Crown of *Poland*, after *John Sobieski*'s Death, with the Prince of *Conti*, carried it, which was a great Mortification to the *French*. Prince *Eugene* of *Savoy* commanded in Chief in *Hungary*; and the *Turks*, encourag'd by their former Advantages, reſolv'd to hazard a Battle at *Zanta*, where that Prince obtain'd a compleat Victory: About 25000 *Turks* were kill'd in the Field or drown'd in the *Theiſſe*, 6000 were wounded, and they loſt 83 Pieces of Cannon, 5000 Waggons with Proviſions, 17000 Oxen, 6000 Horſes, as many Camels, a vaſt Number of Sheep, the Grand Signior's Tent, 7 Standards, and 500 Colours. This Year a Peace betwixt the Emperor, the reſt of the Allies, and *France*, was concluded at *Ryſwick*, upon the Baſis of thoſe of *Weſtphalia* and *Nimeguen*. The *French* quitted all their Reunions in *Alſace*; but Popery was to remain where they had ſettled it; The Elector *Palatine* was reſtor'd to his Territories, on paying 200000 Livres *per Annum* to the Dutcheſs of *Orleans*, till her Pretenſions were decided; *Dinant* was reſtor'd to *Liege*; *Strasburg* reſign'd to *France*; and *Fort-Kiel*, *Friburg*, *Star-Fort*, *Old Briſac*, and *Philipſburg*, reſtor'd to the Empire; The *French* were to demoliſh the Fortifications over againſt *Huningen* and *Fort-Lewis*; The Caſtles of *Trarbach*, *Ehrenburg*, *Kirnburg*, and the Fortreſs of *Mont-Royal*, were to be demoliſh'd, and reſtor'd to their right Owners; The Duke of *Lorrain* was reſtor'd to his own Country, and to *Nancy*; and the Caſtles of *Bitſch* and *Homburg* were to be raz'd. The Proteſtant Princes of the Empire gave in a Memorial againſt eſtabliſhing Popery in *Alſatia*, becauſe contrary to the Fundamental Laws of the Empire; *i. e.* to the Peace of Religion made in 1588, and to that of *Weſtphalia* and *Nimeguen*, which were the Baſis of this Treaty; and that this Article was likewiſe contrary to the Capitulations of the Emperor and the King of the *Romans*, by which the ſaid Peace of Religion was ſecured. They declar'd, That this Clauſe would prove a great Hindrance to the Union of the Eſtates of the Empire, which happen'd accordingly; for after the Peace was concluded, many Violences were offer'd to the Proteſtants in the *Palatinate*, and other Places, upon the Account of Religion.

In 1698, the Defeat of the *Turks* at the Battle of *Zanta* terrified them ſo much, that publick Prayers and Acts of Devotion were com-

Digitized by Google

commanded throughout their Empire, in order to obtain a Peace by the Favour of God and their Prophet. The Emperor and the Grand Signior conſented that his Majeſty of *Great Britain* and the States General ſhould be Mediators of the Peace. They were repreſented by my Lord *Paget* and Monſieur *Colliere*, who met at *Carlowitz*, betwixt *Peter Waradin* and *Salankemen*. Prince *Eugene* commanded this Year in *Hungary*; but the Expectation of a Peace made both Sides act only on the Defenſive. The Regiments of *Herbeville* and *Saxe-Gotha* conſpired to revolt from the Emperor; but the Formers of this Deſign being ſeiz'd and puniſh'd, the reſt return'd to their Duty. There happen'd Differences this Year about the *French* King's delaying to reſtore *Rhinfeld*, *Philipſburg*, and *Briſac*, according to the Peace at *Ryſwick*. The Czar of *Muſcovy*, after he had viſited *Holland*, and King *William* in *England*, went to *Vienna*, where he was ſplendidly entertain'd by the Emperor, and from thence return'd home.

January the 26th, 1699. a Treaty was ſign'd for 25 Years betwixt the Emperor and the *Turks* at *Carlowitz*: The chief Articles were, "That *Tranſilvania* ſhould remain entire to the Emperor; but the "Province of *Themiſwar* to the *Turks*: That "the Emperor ſhould demoliſh *Caranſebes*, "*Lippa*, *Zerwock*, *Berſhe*, and *Sabla*, and never re-fortify them. The Iſlands of the "Rivers *Save* and *Marofch* were to belong "to the Emperor; but the Uſe of thoſe "Rivers to both. All Priſoners taken during the War to be exchanged or ranſomed. No Protection on either Side to "be given to Rebels and Malecontents. "The Papiſts were to have the free Exerciſe of their Religion." The Czar, the King of *Poland*, and the Republick of *Venice*, were comprehended in this Treaty; but Count *Tekely* was excluded. The Grand Signior made him, by way of Compenſation, Prince of *Widdin*, *Caranſebes*, and *Lugos*, with their Dependencies. This Year *Joſeph* King of the *Romans* was married to *Wilhelmina Amelia*, youngeſt Daughter of *John Frederick* Duke of *Hanover*.

In 1700, the Emperor disbanded ſome of his Troops, and offer'd his Mediation betwixt the K. of *Sweden* and the K. of *Poland*; but without Effect. M. *Villars*, the *French* Ambaſſador, acquainted his Imperial Majeſty with the Treaty of Partition agreed on betwixt *England*, *Holland*, and *France*, and deſir'd the Emperor to accept it, ſince the Preſervation of the Peace of *Europe* was the ſole End of it; but his Imperial Majeſty refus'd it, becauſe it was contrary to his own Right and Intereſt.

The Death of King *Charles* II. of *Spain*, on *Nov.* 1. 1700. and his ſuppos'd Will, by which he made the Duke of *Anjou* his Succeſſor, contrary to the Treaty of Partition, obliged moſt of the Princes of *Europe* to ſide with the Houſes of *Bourbon* or *Auſtria*, according to their different Intereſts. The Emperor made a new Alliance with *England*, *Holland*, and the Princes of the Empire, and ſent Prince *Eugene* of *Savoy* to *Italy* with 30 or 40000 Men, who, after a ſurprizing and unexpected March over the Rocks and Mountains of the *Alps* with his Artillery, let down from Precipices by Engines, publiſh'd a Manifeſto there, aſſerting the Rights of the Houſe of *Auſtria* to the *Milaneſe*, and the Monarchy of *Spain*. About this Time a new Conſpiracy was form'd againſt the Emperor in *Hungary*; upon which Prince *Ragotski* and Count *Schirmei* were impriſon'd: *Ragotski* eſcap'd, and the Emperor impriſon'd his Lady. This Year the Elector of *Brandenburg* erected the Dutchy of *Pruſſia* into a Kingdom, with the Emperor's Conſent; and he and his Wife were crown'd at *Koningsberg*, the Metropolis of that Country. On this Occaſion he was congratulated by the Emperor, and moſt Princes of the Empire. The Duke of *Mantua* declar'd for the *French* King, and received a *French* Gariſon into that City. Prince *Eugene* began his glorious Actions in *Italy*, by forcing the Paſs at *Carpi*, and paſſing the *Mincio*, notwithſtanding the Vigilance of the *French* Generals, which occaſion'd a Miſunderſtanding among them, and obliged the *French* King to recall M. *Catinat*, and ſend M. *Villeroy* in his ſtead, who being defeated by Prince *Eugene* at *Chiari*, had 4000 Men killed, by which the *French* loſt all the Dutchy of *Mantua*, except the Capital, and *Goito*.

In 1702, the Elector of *Cologne* ſuffer'd *French* Troops to enter his Territories; but the Chapter declar'd for the Emperor, and received a *Dutch* Gariſon into *Cologne*. Prince

Eugene ſurpris'd *Cremona*, where M. *de Villeroy* had his Head Quarters, with 12 Battalions of Foot, and 5 Regiments of Horſe. He made *Villeroy* Priſoner; but the Badneſs of the Ways having hinder'd Prince *Vaudemont* to come up in Time to his Aſſiſtance, he was oblig'd to retire, being out-number'd by the Gariſon; but carried off M. *Villeroy*. He block'd up *Mantua*; but the Place being naturally ſtrong, and his Army not large, he was obliged to riſe from before it. The Duke of *Anjou* commanding his own Army in *Italy*, marched to ſurpriſe an Imperial Magazine at *Luzara*, which occaſion'd a Battle, where the Loſs was great, and almoſt equal on both Sides: Yet Prince *Eugene*, thô inferior in Number, made a further Progreſs in *Italy*. About this Time, the King of the *Romans* and Prince *Lewis* of *Baden* took *Landau*, after a vigorous Defence; and the Elector of *Bavaria* declar'd for *France*, and ſurpris'd *Ulm* by Treachery.

The Emperor and the States of *Swabia* and *Franconia* aſſembled Forces againſt the Elector of *Bavaria*, and took many Towns. M. *Villars* paſſed the *Rhine*, and attempted to force the Lines of *Stolhoffen*, and open a Paſſage that Way to join the Elector of *Bavaria*; but being repuls'd, he join'd him by Way of the *Black Forreſt*; and they took *Ratisbon*, while the Imperial Diet was ſitting there. After this, M. *Villars* marched to *Tirol*, took many Places there, and deſign'd to force his Way from thence into *Italy*; but fail'd in the Attempt, and was forced to abandon all his Conqueſts there. The Confederates took *Bonn* on the *Lower Rhine*, and *Traerbach*; but were obliged to quit the latter on the Approach of Count *Tallard*, who took *Landau*, after he had defeated the Confederate Army that came to relieve it, under Count *Naſſau-Weilbourg* and the Prince of *Heſſe-Caſſel*. On the *Upper Rhine*, the Duke of *Burgundy* took *Briſac*. The Duke of *Vendoſme* miſtruſting the Duke of *Savoy*, diſarm'd all the *Savoyard* Auxiliaries in his Army, made them Priſoners of War, and ſent a ſtrong Detachment to the Frontiers of *Piedmont*, to force the Duke to a Neutrality, upon diſhonourable Terms; which the Duke reſented ſo much, that notwithſtanding his two Daughters were married to the Duke of *Burgundy* and to the Duke of *Anjou*, he declar'd for the Allies. The Arch Duke *Charles* being acknowledg'd as King of *Spain* by the Allies, came from *Vienna* to *Holland*, and from thence into *England*, where he embarked for *Portugal*, the King of that Country having enter'd into the Grand Confederacy, and arrived ſafely there.

This Year Prince *Ragotski* was condemn'd by the *Aulick* Council at *Vienna*, and all his Poſſeſſions confiſcated, (except an Yearly Allowance of 6000 Livres to his Wife, and 15000 to each of his two Daughters) for Rebellion and Treaſon againſt his Imperial Majeſty and the King of the *Romans*, by endeavouring to ſubject *Hungary* to a Foreign Power, by alienating the Affections of the *Hungarians*, and by writing ſeveral Letters to *France*, to put *Hungary* under the Protection of that Crown; for which, and other Crimes, he was ſentenc'd to loſe his Head whenever he could be ſeized.

In 1704, the Malecontents invaded the Emperor's Hereditary Dominions. Prince *Eugene* was ſent to *Pretburg*, to endeavour an Accommodation; to which they would not agree, except on the Terms contain'd in their Manifeſto, which was in Subſtance as follows: That they have no Deſign to throw off the Emperor their Sovereign; but ſhall always be ready to ſacrifice their Fortunes for his Glory, if he treat them as a good Prince ought to do; and ſince they believ'd him to be naturally bountiful and merciful, they demanded, 1. To be allow'd their ancient Privileges, which they enjoy'd when they became his Subjects. 2. That the Blood of their Martyrs, whoſe Conſciences had been oppreſſed, cry'd ſo loud, that they could not but inſiſt on demanding the Reſtitution of their Churches for Divine Worſhip. 3. That the Revenues of their Churches, poſſeſſed by the Jeſuits, ſhould be reſtored. 4. That their Records ſhould likewiſe be returned. 5. That they be reſtor'd to their Offices and Dignities, as formerly. 6. That the Jeſuits ſhould be baniſh'd *Hungary* and *Tranſilvania*. 7. That their Colleges and Revenues ſhould be likewiſe reſtored. 8. That thoſe who had been forced to change their Religion, ſhould be left at Liberty to return to it. 9. That the Books and other Papers concerning their Grievances, which were taken from them, ſhould

Digitized by Google

ſhould be reſtor'd. 10. That ſuch Eſtates as Proteſtants had been forc'd by Perſecution to grant to the Popiſh Clergy, ſhould be reſtor'd to the Proteſtant Clergy for the Relief of their Poor. 11. That all the Popiſh Clergy, except Natives, be oblig'd to depart *Hungary* and *Tranſilvania*. 12. That if the Emperor will name Commiſſioners, to Treat of a firm and durable Peace, and agree to a Suſpenſion of Arms, and Time and Place for a Treaty, they will do the like. 13. That ſome Potentates be made Gurantees of the Treaty. 14. That without Derogation to the Emperor's Sovereignty, they may have Leave to ſend Deputies to the Diet of the Empire, meerly to take Care that they be not incroach'd upon in Matters of Religion. 15. That as a Compenſation for the Cruelties committed upon their Families, and other Loſſes, they may be exempted from all Taxes for 15 Years. 16. That they may have Liberty to Trade every where but with the Emperor's Enemies. 17. That Princeſs *Ragotzki*, and her Family, be ſet at Liberty, and her Jewels reſtor'd, without any Defalcation. 18. That the Caſtle of *Mongatz*, with all its Dependencies and Privileges belonging to it, be reſtor'd to her and her Heirs. 19. That the Sentence againſt Prince *Ragotzki* be ras'd out and annull'd, his Honour reſtor'd, and that he be own'd as a Prince of the Empire, and put in Poſſeſſion of all his Rights, 20. That the Eſtates taken from that Prince, and given to the Jeſuits, be reſtor'd, as at preſent, without any Allowance for Improvements made on them. 21. That there be a general Amneſty for all who have any way aſſiſted that Prince. 22. That they be reſtor'd to their Imployments, Offices and Dignities, and the Confiſcation of their Eſtates and Goods be made void. 23. That Proteſtant Commiſſioners may have liberty to take out of the Nunneries all ſuch Proteſtant Women as have been forc'd into them, whether Married or Unmarried. 24. That the Proteſtants ſhall be allow'd Schools every where as formerly. 25. That thoſe of the *Augſburg* Confeſſion may have Leave to ſettle in *Hungary* and *Tranſilvania*, to repeople the Country that has been laid waſte by War and Perſecution. 26. That half the Courts of Judicature may be compos'd of Proteſtants as formerly. 27. That the like ſhall be allow'd in all Corporations. 28. That the Proteſtants of ſuch Bodies or Corporations be not oblig'd to attend at any Functions contrary to their Conſciences. 29. That they be not oblig'd to put any Ornaments before their Gates, or in their Windows, on that Holiday, call'd the *Feaſt of God*. 30. That when they meet the Hoſt, they ſhall not be oblig'd to kneel or retire, but only to ſalute the Prieſt by taking off their Hat.

Her Majeſty of *Great Britain*, and the *States General*, imployed their Miniſters to mediate a Peace betwixt the Emperor and the *Hungarians*, but in vain; the Imperial Court being ſtiff. Mareſchal *Villars* with the *French* made a great Progreſs upon the *Danube*; and General *Viſconti* and Count *Staremberg* forc'd their Way with admirable Conduct to join the Duke of *Savoy* in *Piedmont*, where he was very much preſs'd by the *French*. Prince *Lewis* of *Baden* not being able to make Head againſt the *French* and *Bavarians* on the *Danube*, the Duke of *Marlborough*, with a great Body of *Britiſh* and *Dutch* Troops, march'd from *Boiſleduc* in *Brabant* the 12th of *May* 1704, and join'd him in *Swabia* the 25th of *June*; when being inform'd, That the Elector of *Bavaria* had order'd his Troops to intrench the Hill of *Schellenburg* near *Donawert*, a very ſtrong Poſt, to hinder the Allies from paſſing the *Danube*; the Duke and the Prince attack'd them on the 2d of *July*, forced their Intrenchments, which reach'd as far as *Donawert*, defeated 18000 *French* and *Bavarians*, commanded by the Count *d'Arco* the *Bavarian* Field-Marſhal, a *Bavarian* Lieutenant General, and two *French* Lieutenant Generals; kill'd about 5000 on the Spot, took 15 Cannon, all their Baggage, Ammunition, and Tents, 13 Colours, and Count *d'Arco's* Plate. The Attack was begun by the *Britiſh* Troops; wherein the Regiments of *Orkney* and *Ingoldsby*, and Lord *John Hay's* Dragoons, did Wonders, and ſuffer'd moſt; ſo that the Loſs on the Confederate Side was almoſt equal to that of the Enemy: But the former gain'd the Paſs and the Town, with the Enemies Stores; entred the Elector's Country, forc'd him to retire under the Cannon of *Augſburg*, took ſeveral Gariſons, and ſent a ſtrong Reinforcement to Prince *Eugene*, who obſerv'd the

French on the *Rhine*; but notwithſtanding all his Precautions, they march'd thro' the *Black Forreſt*, and join'd the Elector near *Augsburg*. Prince *Eugene* followed 'em with his little Army as faſt as was convenient; but the *French* and *Bavarians* having repaſs'd the *Danube*, in order to attack him, the Duke of *Marlborough* made haſte to join him near *Munſter* on the *Danube*. In the mean time the Enemy march'd to a riſing Ground, betwixt *Hochſtet* and *Lutzingen*, where the Duke deſign'd to have encamp'd: Upon which, his Grace and the Prince reſolved to attack the Enemy, tho' ſtrongly encamp'd. Accordingly they march'd towards them on the 2d of *Auguſt* in the morning; the *Imperialiſts* under Prince *Eugene* on the Right, and the *Britains* and *Dutch* on the Left. The Allies, tho' they had the Diſadvantage of the Ground, and ſeveral Brooks to paſs, march'd on boldly till they came within Cannon-ſhot; when the *French* play'd upon them from their Line for about 4 Hours, till the *Imperialiſts* came up, after many Difficulties in their March. The Allies in the mean time cannonaded the *French*, with conſiderable Damage on both Sides. When the *Imperialiſts* came up, the *French* ſent a ſtrong Body of Foot, and Dragoons diſmounted, to the Village of *Blenheim*, which they fortified with a Trench and Barricadoes. The Lord *Cutts* being commanded to attack the Village with 20 Battalions, perform'd it with the utmoſt Bravery; but was beat off with great Loſs, 25 Squadrons of Dragoons, who were order'd to ſuſtain him, being at too great a Diſtance: Upon this, ſome Squadrons of *French* Gens d'Arms attack'd him, and put ſome of his Regiments into Diſorder; but were oblig'd to retire by the coming up of ſome *Heſſians*. The *Britiſh* Horſe were ſent from the firſt Column to ſuſtain my Lord, and Colonel *Palms* with four Squadrons beat off the Gens d'Arms; but advancing too far, ſuffer'd by the fire of a *French* Battalion from the Hedges, which oblig'd 'em to wheel and form themſelves. At the ſame time, the reſt of the *Engliſh* Horſe, with 10 Squadrons of Foreigners, advanced before the Foot, and paſs'd the River, but were forced to repaſs it by the *French*. The Duke of *Marlborough* perceiving this, came up, and rallied them with great Preſence of Mind; upon which they paſs'd the River again, join'd the other 4 Squadrons, and beat the *French* back a conſiderable Way. The reſt of the Confederates Left paſſed the River, the Foot of the Firſt Line under General *Churchill* and Lieutenant General *Ingoldsby*; and the Horſe charg'd the *French* with Advantage, till a Brigade of their Foot oblig'd them to retire. The Earl of *Orkney* coming up with the reſt of the Second Line of Foot, ſuſtain'd the Confederate Horſe, who were puſh'd by the Gens d'Arms, and interlin'd 'em with ſome Battalions; upon which, the Horſe form'd themſelves, charg'd the *French*, and beat them from the high Ground. The Duke of *Holſtein Beck*, with 10 Battalions, attack'd the *French* in a Village, where he ſuffer'd much; and the *French* Fire from that Village galling the Flank of our Horſe, the Duke of *Marlborough* brought three Battalions to cover them. The Earl of *Orkney* ordered ſome Guns, with Cartouch-ſhot, to play on the *French* Battalions, interlin'd with their Horſe, which did great Execution among 'em; and their Horſe advancing, were beat off, by which eight of the Enemies Battalions were expoſed, and cut off almoſt in Rank and File. Upon this, the whole Wing of the *French* Horſe retir'd a little; and Mareſchal *Tallard* form'd them in a Line to bring his Foot and Dragoons out of the Village of *Hochſtet*: Upon which, the Confederate Horſe charg'd them, put 'em in Confuſion, and drove many of 'em into the *Danube*, while the reſt retired towards *Hochſtet*: And in the mean time, Count *Tallard* was taken in a Village, as endeavouring to get to *Blenheim*. Part of the Confederate Horſe purſued the *French*, and the reſt fronted to the Village of *Blenheim*, which was ſurrounded by the Confederate Foot under the Earl of *Orkney* and Lieutenant General *Ingoldsby*; and General *Churchill* having cut off the Communication betwixt two *French* Brigades, and the reſt of their Troops in the Village, the Confederates followed them into the Village, where they ſuffer'd much by the Fire of the *French* from the Houſes, as well as from that in the Streets; and having a great Body of Troops in the Church-yard, they rallied and beat out thoſe commanded by the Earl of *Orkney* twice with conſiderable Loſs.

The

Digitized by Google

The 20 Battallons commanded by the Lord *Cutts*, had alſo ſuſtained great Loſs by their Attacks on the other Side of the Village. While the Earl of *Orkney* was rallying ſome of his Battalions on the Plain, a Body of *French* marched towards him from that Part of the Village which he had order'd to be ſet on Fire; upon which having put his Men in Order to receive them, with great Preſence of Mind, he order'd a Parley to be beat, and ſent his Aid de Camp, Captain *Abercromby*, to offer them Quarter, if they would ſurrender. They proved to be Part of the *French* Brigade Royal commanded by M. *de Denonville*, their Brigadier, who, after ſome Difficulty, accepted the Terms, and ſurrender'd to the Earl. Another *French* Battalion perceiving this, ſurrender'd to Lieutenant-General *Ingoldsby* at his Attack. It being near Night, and the Confederate Troops much fatigued, and not in a Condition to attack without a further Reinforcement, the Earl ſent his Aid de Camp with M. *Dennwille* into the Village, where there were ſtill 20 Battalions of Foot, and 12 Squadrons of Dragoons, to inform 'em, That their Horſe were routed, and Count *Tallard* taken; and to offer them the ſame Terms that had been given to the reſt. M. *Blanzac*, who commanded in Chief, demanded Leave to march out, and join the reſt of their Troops, which the Earl refuſed; ſo that 26 entire Battalions, and 12 Squadrons, ſurrender'd, with the General, and ſeveral other Chief Officers, to the Earl. On the Right, commanded by Prince *Eugene*, the Ways being bad, and the *French* ſuperior in Number, the Confederate Horſe and Foot were ſeveral times beat back, and ſuffered much; but at laſt the *Daniſh* and *Pruſſian* Foot charged the *French* with ſo much Fury, that they retir'd, and the Remainders of their ſcatter'd Army join'd with the *Bavarians* that Night at *Lawingen*. The Duke of *Marlborough* purſued them to *Hochſtet*, where he lay that Night, as Prince *Eugene* did at *Monchelingen*. In this Battle the *French* and *Bavarians* had about 14000 Men killed in the Field, 4000 drown'd in the *Danube*; their Commander in Chief, with 40 General Officers, 1200 Inferior Officers, 12000 Common Soldiers, 49 Cannon, 163 Colours, Standards and Kettle-Drums, taken. The Confederates had 4485 killed, and 7523 wounded. This Victory ſaved the Empire from imminent Ruine, reſtored the Affairs of the Confederates, and way ſuch a Check to the growing Power of *France*, as ſhe is not like to recover. It eſtabliſh'd the Duke of *Marlborough*'s Glory, who was thereupon made a Prince of the Empire, and allow'd a Vote in the Diet as Prince of *Mindelheim*, which was erected into a Principality to him and his Heirs. After this Victory, *Augsburg* and *Memmingen* were abandon'd by the *French* and *Bavarians*, *Ulm* ſurrender'd in *September*, and *Landau* in *November*; the *French* abandon'd *Trier*; and that ſame Month *Traerbach* ſurrender'd to the Hereditary Prince of *Heſſe-Caſſil*.

In 1705, Prince *Eugene* went to command the Imperial Army in *Italy*, where the *French* being Maſters of the Paſſes of the *Mincio*, he embarked his Troops on the Lake *de Garda*, and landed in the *Breſcian*, to ſtop the Progreſs of the *French* againſt the Duke of *Savoy*. This occaſioned the Battle of *Caſſano* in *Auguſt* 1705, where the *French* were defeated, and many of them kill'd, beſides what were drown'd in the *Adda*, and a great Number taken. Prince *Lewis* of *Baden* forc'd the Lines of *Haguenau*, and obliged M. *Villars* to retire under the Cannon of *Strasburg*. The Peaſants of *Bavaria* took Arms; but were ſoon reduced. The Emperor *Leopold* died on the 5th of *September*. He was born the 14th of *September*, 1640, was three times married, but left no Children except by his laſt Empreſs *Magdalena Thereſa*, Daughter to Prince *Philip William* of *Newbourg*, by whom he had the preſent Emperor *Joſeph*, King *Charles* III. of *Spain*, and three Arch-Dutcheſſes, *Mary Elizabeth*, *Mary Anna*, and *Mary Magdalen*. He was a good Prince, zealous in his Religion, regular in his Manners, charitable to the Poor, much addicted to raiſe the Grandeur of his Family, and a good Maſter. He ſpoke *Latin*, *Spaniſh*, *Italian*, and *German*, perfectly well; was well vers'd in Arts and Sciences, and particularly in Muſick. His greateſt Weakneſs was, his being too much influenc'd by the Jeſuits, who rais'd a Perſecution in *Hungary*, which laid the Foundation of the long and ruinous War, which ſtill continues there.

His Son *Joſeph* ſucceeded. This Year died the D. of *Zell*, by which that Dutchy, with

its Dependencies, fell to the Illustrious Family of *Hanover*.

In 1706, the Malecontents made Incursions to the Gates of *Vienna*, and the *Imperialists* reduc'd *Transilvania*. Count *Tekely* died this Year at *Nicomedia* in the *Turkish* Dominions, and made Prince *Ragotski* his Heir. The *Bavarian* Peasants, who had again revolted, were defeated near *Munich*, and that Town was taken by the *Imperialists*. In *Italy*, the Duke of *Vendosme* defeated Part of the *Imperial* Army, from whence he went to command in *Flanders*. Prince *Eugene*, by his admirable Conduct, overcame all Difficulties in his March to join the Duke of *Savoy*, who was reduc'd to such Streights, that he was forc'd to send away his Court to *Genoa*, upon the Approach of a great *French* Army, which laid Siege to his Capital of *Turin*.

They open'd their Trenches before it the 3d of *June*, 1706, and continued the Siege till the 5th of *September*, when they were attacked by the D. of *Savoy* and Pr. *Eugene* with the *Imperialists*, who, after a bloody Battle, defeated the *French*, forc'd them to abandon their Approaches, Cannon, Mortars, and Ammunition; and in their flight, the *French* set Fire to several Magazines of Powder, Bombs, and Grenadoes. The Marshal *de Marsin* was taken, and died of his Wounds; besides whom, there were taken 2 Generals, 2 Marshals de Camp, 2 Brigadier, 8 Colonels, 12 Lieutenant-Colonels, 6 Majors, 98 Captains, 111 Lieutenants, 34 Cornets or Enligns, 13 Engineers and Commissaries of the Artillery, 7640 private Soldiers, including those taken in *Chivas*; which, together with 4706 killed in the Battle, made their Loss 12634, besides those lost in the Siege, and in their Retreat for want of Provisions and Medicines, and such as were killed by the *Vandois*; and there was found in their Works 253 Cannon, 108 Mortars, 7800 Bombs, 32000 Royal Grenadoes, 48000 Cannon-Ball, besides a great Number in the Ditches, 4000 Chests of Musket-shot, and 86 Barrels of Powder, containing 100 Weight each, all their Tents and Baggage, great Numbers of Standards, Colours, and Kettle-Drums, 5000 Horses, Mules, and Oxen, 27 large Boats with Ammunition, all their Pontons, 4 Pictures of the *French* King set with Diamonds, valued at 4000 Pistoles, 3000 Sacks of Corn and Meal, and 2000 of Bisket; and their Commissary-General was also taken with all his Mules, so richly laden, that it was valued at 3 Millions of Livres: To which must be added, 10000 Horse, belonging to 13 Regiments of *French* Dragoons. The Allies had about 4000 Men killed and wounded; among the former, were the Prince of *Beveren*, a Colonel, and a Lieutenant-Colonel; among the latter, 2 Major-Generals, and 3 Colonels, besides many Inferior Officers. The *French*, according to their usual way, diminish'd their own Loss, and magnify'd that of the Confederates; but the Falshood of their Accounts appeared, by the Letters sent from the Duke of *Savoy* and Prince *Eugene* to the States General and others. Much about the same Time, the Prince of *Hesse* took *Goits* upon Terms; but had afterwards some Loss at the Battle of *Castiglione*. After the Battle of *Turin*, the *French* surrender'd *Chivas* in the *Milanese*; the Garison of 1482 Men was made Prisoners of War; and the Allies found in it 12 Battering Cannon, 26000 Barrels of Powder, 3000 Casks of Bullets, *&c.* *Novara*, *Crescentino*, *Milan*, and *Como*, did also surrender; and in short, all *Lombardy* was reduced. The King of *Sweden*'s entring *Saxony* this Year with his Army, alarm'd all *Germany*; and the *French* gave out every where, that he would declare for them; but his Majesty assur'd the Allies, That he had no Intention to disturb the Peace of the Empire, but came only to have Satisfaction of *Augustus* King of *Poland*, Elector of *Saxony*, whom he afterwards obliged by Treaty to resign the Crown of *Poland*. This Year the Electors of *Bavaria* and *Cologne* were put into the Ban of the Empire, and proscribed. A Detachment from M. *de Villars* attacked *Hanenau*, which was surrender'd to the *French*, who made the Garison of 2200 Men Prisoners of War, and found in it 800 Barrels of Powder, 26000 Cannon-Ball, 8000 Sacks of Corn, 15000 of Meal, 60 Waggons with 6 Horses each, 80 Cannon, 4000 Bombs, and 16 Mortars.

In 1707, a Marriage was concluded betwixt King *Charles* III. of *Spain*, and the Princess of *Brunswick Wolfenbuttel*. Count *Thaun*, with a Detachment of *Imperialists*, reduced the Kingdom of *Naples* without much

Digitized by Google

much Difficulty, moſt of the Inhabitants being for the Houſe of *Auſtria*. However, the Abſence of thoſe Troops, with the other Deficiencies, occaſioned the Miſcarriage of the Siege of *Toulon*, which was carried on by the Duke of *Savoy* and Prince *Eugene*, with the Aſſiſtance of a Squadron of the Confederate Fleet.

M. *de Villars* forc'd the Lines of *Stolhoffen*, invaded the Empire, and laid the Dutchy of *Wirtemberg*, &c. under Contribution as far almoſt as *Ulm*. The King of *Sweden* enter'd *Sileſia*, and obliged the Emperor by a Treaty to reſtore to thoſe of the *Augſburg* Confeſſion their Churches, the free Exerciſe of their Religion, and other Privileges, according to the Treaty of *Weſtphalia*, which he reckon'd himſelf oblig'd in Point of Honour to ſee perform'd. He likewiſe inſiſted upon the ſame Liberty to the *Calviniſts* in that Country, as being included in the above mention'd Treaty of *Weſtphalia*, wherein he was ſeconded by *Great Britain* and *Holland*; but that Matter is not yet determin'd. Count *Zobor*, one of the Imperial Court, having ſpoke diſreſpectfully of the King of *Sweden* to his own Ambaſſador, the King reſented it ſo much, that the Emperor was obliged, after paſſing a Sentence of Baniſhment from Court upon the ſaid Count, to ſend him to *Saxony* to beg the King of *Sweden's* Pardon. After this, the King of *Sweden* having ſtay'd a Year in *Saxony*, which he obliged to furniſh him with Money and Proviſions for his Army, marched from thence into *Poland*.

In 1708, Prince *Eugene* went from *Italy* to *Vienna*, to concert Meaſures for the next Campaign. The Elector *Palatine* was inveſted in the *Upper Palatinate*, upon the Proſcription of the Elector of *Bavaria*. Prince *Eugene*, with a Body of *Imperial* Troops, came to *Flanders*, where he join'd the Duke of *Marlborough*, who fought the Battle of *Audenard*, and defeated the *French*, (when, according to the Accounts publiſh'd by Authority, there were taken between 7 and 8000 of the *French*, with 70 or 80 Colours and Standards; and among ſt their Priſoners, there were 2 Lieutenant-Generals, 2 Major-Generals, 5 Brigadiers, 30 Colonels, 100 Field-Officers, and 400 other Officers; and among their Slain, of whoſe Number we never had any certain Account, there were the Prince of *Egmont*, the Count *de Dreux*, and the Chevalier *de Luxemburg*. The Loſs on the Confederate Side was very ſmall in Proportion to the Victory, and they had no General Officer kill'd. In this Action, the Electoral Prince of *Hanover* ſignaliz'd himſelf at the Head of a Squadron of his Father's Dragoons, had a Horſe ſhot under him, and the Colonel of Dragoons ſhot by his Side. We refer the further Particulars till we come to *Flanders*, as we do likewiſe the Battle of *Romellies*, becauſe it does not relate to the Hiſtory of the Empire, the *Imperialiſts* having no Hand in it. After the Battle of *Audenard*, Prince *Eugene* was chiefly employ'd in reducing of *Liſle*, after a long Siege, and aſſiſted afterwards in reducing *Ghent* and *Bruges*: The Particulars of all which, we refer to the Account of *Flanders*. This Year the Princeſs of *Brunſwick Wolfenbuttel* went to *Spain*, where ſhe was married to King *Charles* III. and the Arch-Dutcheſs *Mary Anne* came from *Vienna* to *Holland*, from whence ſhe was ſent on board a Confederate Squadron to *Portugal*, and married to the King of that Country.

Their GOVERNMENT,

IS in General by the Emperor and Diet of the Empire.

The Emperor's TITLES *at preſent.*

Joſeph, by the Grace of God, Emperor of the *Romans*, always *Auguſtus*, &c. King of *Germany*, *Hungary*, *Bohemia*, *Dalmatia*, *Croatia*, *Sclavonia*, *Bulgaria*, *Boſnia*, *Servia*, and *Rexia*, Arch-Duke of *Auſtria*, Duke of *Burgundy*, *Brabant*, *Stiria*, *Carinthia*, *Carniola*, *Luxemburg*, *Wittemberg*, together with the *Higher* and *Lower Sileſia*, Marquis of the *Holy Empire*, *Burgaw*, *Moravia*, with the *Higher* and *Further Luſatia*, Sovereign Count of *Habſburg*, *Tirol*, *Ferrette*, *Kiburg*, *Gortitia*, &c. Landgrave of *Alſace*, Lord of *Windiſhmarck*, *Portenaw*, and *Salins*:

His

His Arms.

HE bears Quarterly for Armorial Enſigns; 1. For *Hungary*, Bar-wiſe *Argent*, and *Gules* of 8 Pieces. 2. For *Bohemia*, *Argent*, a *Lion Gules*, the Tail nov'd, and paſs'd in *Saltier*, Crown'd, Langued, and Arm'd. 3. For *Auſtria*, *Gules*, a *Feſſe-Argent*; and for Ancient *Burgundy*, Party and Bend-wiſe, *Argent* and *Azure*, a Border *Gules*. 4. For *Caſtile*, Quarterly, in the firſt and laſt *Gules*, a Caſtle triple tower'd *Or*, purpled *Sable*; and for *Leon*, in the 2d and 3d *Argent*, a *Lion-Purple*: The Shield creſted with an Imperial Crown, clos'd and rais'd in Shape of a Mitre, having betwixt the two Points two Diadems, ſurmounted with a Globe and Croſs *Or*: The Shield, environ'd with a Collar of the Order of the *Golden Fleece*, is plac'd on the Breaſt of an Eagle, diſplay'd *Sable* in a *Field-Or*, Diadem'd, Member'd, and Beak'd *Gules*, holding a naked Sword in the Right *Talon*, and a Scepter in the Left: The two Heads ſignify the Eaſtern and Weſtern Empire; and for the Motto are theſe Words; *Uno avulſo, non deficit alter*; *i. e.* Thô one be taken away, the other does not ceaſe. But the Emperor's peculiar Device is, *Pax & Salus Europæ*; *i. e.* The Peace and Safety of *Europe*.

Emperor: What it ſignifies.

Imperator, or Emperor, was firſt made uſe of by the *Romans*, as *Selden* in his Titles of Honour proves by unqueſtionable Authority, to denote only the General of their Army. But *Julius Cæſar*, after he had beſet his Country of their Liberty, aſſum'd it, had it allow'd him as a perpetual Title; and it has been ſo continued to his Succeſſors; yet ſo as not to be peculiar to them only, for *Brutus* and *Caſſius*, who attempted the Recovery of the *Roman* Liberties, have it aſcrib'd to them in their Coins. Here *Selden* corrects *Suetonius*'s Miſtake, in ſaying, That in and after *Cæſar*'s Time, it was always us'd as a *Prænomen* or Forename; for 'tis plain, that in his Time, *Cæſar* was oft put before *Imperator*, as may be ſeen by ſome of his Coins; and in *Auguſtus*'s Reign, it is us'd both ways: But *Selden* obſerves, That the uſing of it as a ſubſequent Name, denoted only, or at leaſt chiefly, ſome great Performance by Arms; and where 'tis us'd as a Forename to *Cæſar* and other Emperors, it denotes their Supremacy.

Selden likewiſe obſerves, That ſome Time after, the Title of Emperor was thus ſettled at *Rome*; and thô they had all that's comprehended in Royal Majeſty, yet they abſtained from the Name of *Rex* or King, becauſe that Title was odious to the *Romans*, from the Time that *Brutus* had thrown out their Kings for invading their Liberty: And *Cicero De Divinitate* tells us, That thô *Cæſar* was really a King, yet neither the Gods nor Men would ſuffer that Title in *Rome*; and *Cæſar*, to palliate his Ambition when the People ſaluted him by that Name, finding it diſtaſtful to the State by the Tribune's pulling off the white Fillet from his Laurel, anſwer'd, That he was *Cæſar*, and not a King; but they made uſe of the Name *Princeps*, becauſe *Princeps Senatûs* was a familiar Title in *Rome*, and might be us'd without Envy. It was long after before any of the Emperors us'd the Title of King, thô they wore Diadems, and other *Regalia*; but in their Letters, Commiſſions, and Embaſſies, call'd themſelves Emperors. This appears by *Syneſius*, in his Book *De Regno*, which was writ about 400 Years after Chriſt; when, thô the *Greeks* wrote to them by that Name, yet they ſeemed to diſlike ſo ſwelling a Title; but in Time that Diſlike grew out of Faſhion; ſo that *Regnum* was made uſe of to ſignify the State of *Rome*; and *Sedile Regni*, the Emperor's Throne: And *Ulpian*, a great Lawyer in *Severus*'s Time, calls that *Lex Regia*, which transferr'd the People's Power to the Emperor. The *Conſtantinopolitan* Emperors affected the Title of *Baſileus*, as the loftieſt Name they could take.

But after the Empires were divided, they affected Differences in the Uſe of thoſe Names. The Weſtern Emperors, becauſe thoſe Parts of the Empire which were overrun by the *Goths*, *Lombards*, and *Franks*, were called Kingdoms, and their Heads, Kings, affected the Title of Emperor, as importing a greater Majeſty than that of King, which was not much diſputed by the Eaſtern Emperors, as appears by their Embaſſies: But when *Baſilius Macedo*, Emperor of *Conſtan-*

Digitized by Google

Conſtantinople, received Letters from Pope *Adrian* II. wherein *Lewis*, then Emperor of the Weſt, was called Βασιλεύς, which then imported Emperor, he rais'd it out of the Letters, and challeng'd *Lewis* for uſing that Title, which he alledg'd was proper only to himſelf: To which *Lewis* anſwer'd, That the Title was peculiar to neither of them, but common to both; and in ſacred and prophane Writings, given to the Princes of other Countries He added, That the Empire was tranſlated from the *Greeks* to the *Franks*, becauſe the former were not able to defend the Church.

Tho' in later Times the Emperors of the Eaſt and Weſt contended for this Title as peculiar to themſelves, yet other Kings, and particularly thoſe of *France*, *Spain*, *England*, *Scotland*, &c. made uſe of it.

Selden takes Notice, That the flattering Civilians of *Italy* and *Germany* do alledge, that the Emperor is Lord of the whole Earth, but unjuſtly; and ſhews from good Reaſon, that no ſuch Title is due to them; and that ſeveral other Princes, as the Kings of *England*, *Scotland*, *France*, *Spain*, &c. acknowledge no Superior but God himſelf, and may every way as juſtly as the Emperor of *Rome* be ſtil'd Emperors, or by any other Name which expreſſes the Height of Honour and Dignity. This Pretenſion is alſo confuted by Sir *George Mackenzie*, in his Book of *Precedency*, *Cap.* 1. where he aſſerts, That *Scotland* was never conquer'd by the *Romans*, and by conſequence not ſubject to their Empire.

Dr. *Nicholſon* obſerves juſtly, That the Conſent of Nations has for many Years diſtinguiſh'd between an Emperor and a King, and given the former the Pre-eminence; That all the Monarchs of *Europe* do readily give Place to the Emperor, and his Ambaſſadors are admitted to the firſt Audience in all Courts; and even in that of the Grand Signior, are allow'd the Precedency of the *Perſian* Ambaſſadors. But as to his Precedency of Chriſtian Princes, it ſeems to be allow'd him more out of Civility than Right; for according to Sir *George Mackenzie*, in his Book of *Precedency*, the Kings of *Great Britain* and *France* may debate it with him, and particularly the former, as deſcended of the Kings of *Scotland*; it being (as he ſays) an uncontroverted Maxim in Law, That amongſt thoſe of equal Dignity, he who firſt attain'd to that Dignity, is to be preferr'd. The Curious may ſee more on this Head in his *Cap.* 1. and 2. Beſides, he inſiſts upon this Argument, That the Emperor is but Elective; whereas thoſe Kings are Hereditary. The *German* Emperors, ſays Dr. *Nicholſon*, founded their Claim on *Charlemaign's* being unexpectedly ſaluted in the Year 800, when he came to *Rome*, by Pope *Leo* and the Citizens, by the Title of, *Romanorum Imperator Auguſtus*; but what a ſorry Empire the *Romans* could then pretend to, is well enough known, ſince *Germany*, *France*, and moſt of *Lombardy*, were in his Poſſeſſion before: Whence it will appear, that ſome other Conſiderations, and particularly the vaſt Extent of the *German* Empire, mov'd the Weſtern Monarchs to give Place to the Emperor, rather than any Claim he had to it by Right. To which we may add what Sir *George Mackenzie* ſays in his 2d Chapter of *Precedency*, That the Rule of Precedency in General Councils was according to the Time their Anceſtors received the Chriſtian Faith, as appears by *Gothofred. de Jure Præced. Cap.* 3. N° 23. and *Grotius de Jure Belli*, *Lib.* 2 *Cap.* 5. And if this Rule were obſerv'd, whatever become of the Story of *Lucius*, the Queen of *Great Britain* has an undoubted Claim to it from *Donald* King of *Scots*; but this Rule has not always been obſerv'd even by the Church of *Rome*, which uſually preferr'd them who were moſt capable to do them Service. The *German* Emperors, beſides the Title of *Cæſar*, us'd that of *Auguſtus*, which in their Language is *Mehrer des Reichs*; *i. e.* The Increaſer of Kingdoms, becauſe, as *Paulus Diaconus* informs us, *Octavius* had that Title on the Account of his enlarging the Commonwealth. They are alſo call'd Defenders of the Church, becauſe formerly, when they were crown'd at *Rome*, they took an Oath to defend that Church; and *Charlemaign* was particularly dignified with that Title, becauſe of his Bounty to the Church; and that he deliver'd the Pope and the *Romans* from the Oppreſſion of the *Lombards*.

The POWER *of the Emperor.*

DR. *Nicholſon* ſays it ſurpaſſes that of all other Princes, becauſe he challenges a Power to create Kings, which none elſe pretends to but the Pope, who claims a Power of creating and depoſing the Emperor himſelf; but how unjuſtly, we have heard already in the Hiſtory of the Emperors: For inſtead of that, the Biſhops of *Rome* did Homage to *Pepin* and *Charles the Great*, for the Dominions they gave to the See of *Rome*; and the then Pope made over to *Charles the Great* for ever, the Right of chuſing Popes; and when *Pius* V. attempted to create *Coſmo di Medicis*, Great Duke of *Tuſcany*, the Emp. *Maximilian* II. oppos'd it, made *Coſmo* receive the Title from him, and oblig'd the Pope to confeſs, That he had exceeded his Bounds in pretending to it.

The Emperor at his Coronation is ſworn not to violate the Privileges and Properties of any free Prince or State in the Empire, and cannot meddle with the Taxes they lay upon their own Subjects; nor can he puniſh any Criminal, raiſe Money in their Territories, or advance any of their Subjects to an Honour inconſiſtent with the Allegiance which they owe them. In Time of War, he cannot command any free Prince or State to aſſiſt him with Men or Money, without Conſent of the Diet. If any Prince diſturb the Peace of the Empire, he cannot Degrade or Baniſh him without Conſent of the Electors, who are to judge of the Crime, and give their Opinions to the Imperial Chamber, where the States of the Empire determine it, and order Execution.

Of the ELECTION *of the Emperor.*

'TIS now commonly known, that the Emperors are choſen by the Electors; but 'tis controverted among the Learned, Whether this Dignity was always Elective ſince *Charlemaign*'s Time? A Reſident of *Brandenburgh*, in a Treatiſe bound up with a Book, Intituled, *L'Ambaſſadeur & ſes Fonctions*, writ by *M. de Wicquefort*, Privy Counſellor to the late Duke of *Zell*, ſays, That the Dignity continu'd Hereditary in the Family of *Charlemaign*, who in 813, aſſociated his Son *Lewis* into the Empire with him, by laying down the Imperial Crown upon the Altar, and ordering him to take it up, and put it on his own Head, as a Mark that he held the Empire only of God, and by Hereditary Right, and not by the Choice of the Princes, whoſe Dignities were not Hereditary at that time; and this Way of Succeſſion continued in that Family till *Lewis* III. or as ſome call him the IV. died without Iſſue in 912, when the States were obliged to meet and chuſe a Succeſſor. The Reader may compare this with what has been ſaid before in the Hiſtory of the Emperors, and in the Account of Ancient *Germany*, and make his own Judgment. Our Author inſiſts upon it, That this Election did not make the Empire abſolutely Elective, becauſe there was always great regard had to the Nomination of the deceaſed Emperor, and to Kindred. Upon which he aſſerts, That the Empire was not abſolutely Elective till after the Death of the Emperor *Frederick* II. He quotes *Aimon*, the Annals of *Fulda*, the Annals of the *Franks*, *Lindenbravius*, *Jerden*, and *Spangenberg*, for what he ſays.

The ORIGIN *of the Electors.*

AUthors are not agreed as to the Time when the Electors were firſt inſtituted: Some aſcribe it to *Charlemaign*; but our Author brings many Reaſons to diſprove this. *Baronius*, *Bellarmin*, and others, ſay, they were appointed by *Otto* III. *Sleidan*, *Thuanus*, and the *Centuriators* of *Magdeburg*, think it was Pope *Sylveſter* II. and *Goldaſtus* is of Opinion, That they were agreed on by a Diet at *Francfort* in 1208; but our Author ſays, That *Martinus Polonus*, who wrote above 250 Years after the Death of *Otto* III. is the firſt who mentions any Elector; and that 'tis evident from Hiſtory, that in *Otto* III.'s Time, of all the modern Secular Electors there was none known, but the Duke of *Saxony*; *Bohemia* was not then a Kingdom: Therefore *Dubravius*, who writes the Hiſtory of it, and is of Opinion, That *Otto* III. inſtituted the Electors, ſays, He

Digitized by Google

He only named Six, and that *Rodolph* I. made the King of *Bohemia* an Elector 300 Years after. The Reſident adds, There was at that Time no Count Palatine of the *Rhine*, nor Marquis of *Brandenburg*; and therefore he is of Opinion, That the Election in thoſe Times was made by all the Princes, or rather, that they determin'd and confirm'd the Pretenſions of thoſe who laid Claim to it till after the Death of *Frederic* II. as appears by the Continuator of *Sigibert*, *Otto* of *Friſingen*, *Albert Crantzius*, and other Hiſtorians; and this Dr. *Nicholſon* falls in with. Upon the whole, our Author concludes, That the Inſtitution of Seven Electors was not till above 200 Years after *Gregory* and *Otto*; and that the Number was not fix'd to the Seven till the Reign of *Charles* IV. who eſtabliſh'd them by the Golden Bull the 10th of *January* 1356; but that there were Electors before, is plain from the Bull it ſelf, which was agreed on in a Diet at *Nuremberg*, where all the Electors Eccleſiaſtick and Secular, and many other Princes, Counts, Barons, Lords, Gentlemen, and Deputies of Free-Towns, gave their Conſent, for preventing ſuch Diſorders in the Election as had formerly broke the Peace of the Empire, and order'd all Princes, Counts, free Cities, and other Subjects whatever, to grant them free Paſſage and ſafe Conduct, in going and coming to the Election, on pain of Rebellion; and that they ſhould ſeal their Paſſports, and ſwear to act nothing contrary to them; and they were to furniſh them, and their Retinues, with Proviſions, and other Neceſſaries, at a reaſonable Price; and this was not to be refus'd, tho' any Elector, Prince or State, ſhould have any Quarrel with one another: The Bull likewiſe appoints by whom each of the Seven Electors ſhall be conducted to *Francfort* on the *Maine*, the Place of Election; And the Archbiſhop of *Ments* for the time being, was to ſend Letters to the reſt of the Electors, to acquaint them with the Day, that they might come in Perſon, or ſend their Deputies with full Powers, ſign'd and ſeal'd with their own Hand, for the Election of a King of the *Romans*; And in a Month after Notice of the Death of the Emperor, he ſhould ſend to them in like manner to come to the Election within three Months; and no Elector, or his Ambaſſador, was to enter *Francfort* with above 200 Horſe in his Retinue, 50 of whom, and no more, might be Men at Arms; and thoſe who fail'd to come or ſend, were to loſe their Vote for that Time. It alſo orders the Magiſtrates and Inhabitants to take the Electors, and their Retinues into their Protection, and to prevent the ill Conſequences of any Differences that might happen among them; and in caſe the Archbiſhop of *Ments* fail'd to give Notice, the Electors are to come or ſend notwithſtanding.

Dr. *Nicholſon*, and our Author, obſerves, That after the Death of *Frederick* II. there being a deplorable *Interregnum*, Seven of the chief Princes taking upon them the Adminiſtration, did probably lay the Foundation of the Electoral Dignity; and that they were made 7 in Number, that in caſe Six ſhould be equally divided, the Seventh might have the caſting Vote; and another thing which contributed towards it, was, That many great Families being ruin'd by the Wars, their Eſtates became united to the Families of thoſe who were afterwards Electors; and that the falling off of *Lorrain*, *Gelderland*, *Brabant*, *Luxemburg*, *Poland*, and *Italy*, from the Empire, made thoſe Princes the moſt conſiderable, among ſuch as ſtill adher'd to it. The Seven Electors appointed by this Bull, were; the Elector of *Mentz*, the King of *Bohemia*, the Elector of *Cologne*, the Elector of *Treves*, the Elector Palatine of the *Rhine*, the Elector of *Saxony*, and the Elector of *Brandenburg*.

The ELECTION *of a King of the* Romans.

AS ſoon as the Electors or their Deputies arrive at *Francfort*, they were according to the Bull to go next Morning to St. *Bartholomew*'s Church; and after hearing the Maſs of the Holy Ghoſt, that they might have his Aſſiſtance in chuſing a juſt and good Prince, worthy to be King of the *Romans*, and future Emperor, for the good of all *Chriſtendom*, they were to approach the Altar with their Retinues, but without Arms, and ſwear upon the Goſpel of St. *John*, the Eccleſiaſticks laying their Hands upon their Hearts, and the Seculars

Digitized by Google

touching the Gospel, the following Oath, tender'd by the Archbishop of *Ments*, or his Deputy: "I, *&c.* Prince Elector, swear "upon the Holy Gospels now laid before "me, That by the Faith which I owe to "God, and by the Oath I have taken to "the Holy Empire, that with the Assistance "of God, to the best of my Judgment "and Knowledge, I shall elect for a Tem-"poral Head to *Christendom*, *i. e.* for King "of the *Romans*, and future Emperor, he "whom in my Conscience I shall judge to "be most worthy of it; and promise by "the same Faith, That I shall give my "Suffrage and Vote in the said Election "without any Hope of Profit, Pension, "Promise, or particular Interest. So help "me God, and all his Saints."

Since the Reformation, the Protestant Electors are not oblig'd to comply with what's Popish in this Ceremony. Any of the Secular Electors may set up for themselves, but the Ecclesiasticks are deny'd that Privilege; yet they are thought to be a good Ballance upon any of the Seculars who should pretend to it without Merit. Tho' *Francfort* be the Place appointed, Elections have been made elsewhere; which being objected against, as the want of a legal Formality, they generally made there. The Electors are not to leave the Town till they have made a Choice; and if they do it not in a Month after taking the Oath, they are to have nothing but Bread and Water till they make the Choice. 'Tis carried by the Plurality of the Votes of those present; and if any come after the Election begins, their Vote is not admitted. He that is chosen, is obliged to confirm to the Electors, as the principal Members of the Empire, all the Rights, Privileges, Dignities, *&c.* that they enjoy, and hold of the Empire, before he meddle with the Administration; and he is obliged to confirm the same to each of them by Letters-Patents after he is crown'd Emperor: And if any three of the Electors, or their Deputies, give the Right of Suffrage to one of the Electors present, or his Deputy, if absent, his Vote, with theirs, shall be reckoned a good Plurality.

The Archbishop of *Treves* is to sit over against the Emperor; the Archbishop of *Cologn* in his own Province, and likewise through the whole Bounds of his Chancellorship, shall sit on the Emperor's Right Hand, except in the Province of *Cologne*, where the Archbishop of that Name is to sit on the Emperor's Right Hand; and likewise in *Italy* and *Gaul*, and on all other Occasions where they meet in those Places for the Affairs of the Empire.

The Precedency of the Secular Electors was thus; Whenever the Emperor or King of the *Romans* are present in an Assembly, Council, or at Table, the King of *Bohemia*, as a Crown'd Head, sits next the Archbishop of *Ments*; behind him, on the same Side, is the Elector *Palatine*; on the Emperor's Left is the Elector of *Saxony*; and next to him the Elector of *Brandenburg*.

As the Elector of *Ments* only has Power to summon the rest to the Election when the Empire is vacant, he is also to demand and collect their Votes thus: 1. Of the Archbishop of *Triers*. 2. Of the Archbishop of *Cologne*, who has also the Honour to crown the King of the *Romans*. 3. Of the King of *Bohemia*, who takes Place of all the Secular Electors. 4. Of the Elector *Palatine*. 5. Of the Elector of *Saxony*. 6. Of the Elector of *Brandenburg*: Then the other Electors in their Turns demand the Vote of the Archbishop of *Ments*.

As to the Ceremonies of the Imperial Court, the Elector of *Brandenburg* gives Water to the Emperor or the King of the *Romans* to wash; the King of *Bohemia* gives him the first Cup, with his Royal Crown on if he pleases; the Elector *Palatine* sets the first Dish on the Table; and the Elector of *Saxony* acts as High-Marshal of the Empire.

The Elector *Palatine*, Great Master of the Empire, during the Vacancy of the Imperial Throne, is Vicar of the Empire: In *Swabia*, *Franconia*, and on the *Rhine*, may administer Justice, grant Benefices, receive the Revenues of the Empire, confer Fiefs, and receive Fealty and Homage in the Name of the Empire, except such as the Investiture of 'em is given with a Standard, which are reserv'd to the Emperor or King of the *Romans*, to whom the Fealty and Homage paid to the Vicar during the Vacancy must be renew'd. The Elector *Palatine* is not to alienate or mortgage any Thing belonging to the Empire while he is Vicar. The

Elector

Digitized by Google

Elector of *Saxony* has the ſame Privileges in all Places where the *Saxon* Law is obſerv'd, on the like Conditions. And ſince by a very ancient Cuſtom of the Empire, the Emperor or King of the *Romans* may be ſued at Law, and are obliged to anſwer before the Count *Palatine*, 'tis only when the Emperor or King of the *Romans* are preſent in a Diet or Imperial Court.

The Succeſſion of the Secular Electors is thus; The Lawful Sons, and their Heirs Male, if Laics, are to ſucceed according to Seniority; and if the Heir be Minor, during his Minority the eldeſt Brother of the deceas'd Father is to adminiſter for him till he be of Age, and then to ſurrender to the Heir; but if any Electorate become vacant by want of Heirs, or otherwiſe, the Electorate is at the Diſpoſal of the Emperor, as devolving to him and the Empire, without Prejudice to the Rights of the Subjects of *Bohemia*, who then had a Right to elect their own Kings. The Privileges of the Kings of *Bohemia*, and their Subjects, granted them by former Emperors, were alſo reſerv'd, by which no Subject of *Bohemia* could be cited to be tried out of his own Country, or otherwiſe, than according to their own Laws, without any Appeal but to their own Government.

All Electors, Secular and Eccleſiaſtical, were to poſſeſs all Salt-Springs and Mines of whatever Sort, diſcover'd or to be diſcover'd in their Electorates, without paying any Tax for them; and had Power to receive *Jews* into their Dominions, and raiſe Taxes and Cuſtoms, as in Times paſt. They had alſo Power to coin Gold and Silver, to purchaſe Lands, Caſtles, and take Mortgages, *&c.* on Condition that the Tenure of thoſe Lands be not alter'd, and pay the uſual Duties to the Empire.

The Subjects of none of the other Electors were to be cited to any Court without the ſaid Electorates; but in caſe of denial of Juſtice, the Subjects of any of the Electors, except the King of *Bohemia*, might appeal to the Imperial Court, and the Judge who preſided in it; but no where elſe.

For the better Government of the Empire, all the Electors may meet once a Year in one of the Imperial Cities, about 30 Days after *Eaſter*, to reform Abuſes and Diſorders in their Dominions, or in their Neighbourhood, by common Conſent, and appoint the Place for their next Year's Meeting. During the Time of their Deliberations, they were under the Emperor's Protection; but they were to make no publick Feaſts, ſo as to hinder the Diſpatch of Affairs: And all Privileges granted to any other Perſon or Community, inconſiſtent with theſe of the Electors, were revoked.

All Verbal Reſignations by Vaſſals or Feudatories, made maliciouſly and unſeaſonably to deprive their Superiors of their Rights, or make War upon them, and poſſeſs their Fiefs, were to be void, and no Reſignation to be good, except with the free Conſent of their Superiors, on Pain of being put in the Ban of the Empire; and thoſe who attack'd their Superiors, or maliciouſly deny'd them their Service, without a regular Defiance and Renunciation, were to incur the like Penalty.

All Leagues betwixt Towns, or betwixt Towns and private Perſons, on Pretext of Kindred, or Protection of Burghers and Inhabitants, *&c.* or betwixt the Subjects of particular Princes or Lords, Town or Community, without the Conſent of the Lords, were declared void, except ſuch as were made betwixt Princes and Towns for preſerving the publick Peace, on Pain of Infamy, and 23 Marks of Gold to every particular Perſon; and the Loſs of Liberty, and 200 Marks of Gold to every Town, half to the Emperor, and half to the Lord.

The 17th Article of the *Golden Bull* orders, That no Man ſhall ſend a Defiance or Challenge to any Lord or other Perſon with whom he has liv'd in Amity, on any Pretence whatever, except to the Place of his Reſidence, and ſhall not commence Hoſtilities againſt him till 3 Days after the ſaid Challenge or Defiance, on Pain of Infamy and Treaſon; and forbids all unjuſt Quarrels, Wars and Violence. The 18th contains the Form of ſummoning Electors to attend at Elections. The 19th contains the Form of the Proxy of any Elector who does not attend in Perſon. The 20th annexes the Right of Election to the ſeveral Electorates, and the peaceable Poſſeſſion of them.

The

The 21st settles the Order and Rank the Archbishops are to observe in all publick Occasions, whenever the Emperor, as King of the *Romans*, walks in State, at Diets, &c. The Archbishop of *Triers* walks immediately before the Emperor, or the King of the *Romans*, none walking betwixt them but the Princes, who carry the Imperial Regalia; but when the Emperor walks without those Regalia, then the said Archbishop shall go immediately before the Emperor, or King of the *Romans*; and the other two Ecclesiastical Electors shall take Place as formerly, according to the Provinces in which they are at the Time.

The Secular Electors are to walk thus: The Duke of *Saxony*, carrying the Imperial Sword, walks immediately before the Emperor, or the King, betwixt him and the Archbishop of *Triers*; and on his Right Hand the Elector *Palatine* bearing the Globe; and on his Left the Elector of *Brandenburg* bearing the Scepter; all three in Front: The King of *Bohemia* walks immediately after the Emperor.

The 23d orders, That when the Archbishops of *Ments*, *Triers*, or *Cologne*, say Mass, or Grace, before the Emperor, or King of the *Romans*; he that was first Consecrated shall do it the first Day, the second the second Day, and the third the third Day; but whoever does it, must first make offer to the other Two.

The following Laws were publish'd in the Diet of *Ments* on *Christmas*-Day 1536, as an Appendix to the Golden Bull, by the Emperor *Charles* IV. with the Consent of the Electors and Princes of the Empire.

Those who conspire with Prince or People, against the Life of any of the Electors, shall be put to Death; and all his Goods forfeited, as being guilty of Treason: The Sons of such Traytor shall also lose their Maternal Inheritance, and what ever they may expect from other Relations, that being thus impoverish'd, they may always think on the Infamy of their Father; and such as intercede for them shall be infamous; And the Daughters of such Traitors are only to have a bare Maintenance out of their Mother's Estate; and all fraudulent Conveyances to prevent this are made void, only Wives may enjoy their Dowries: The Accomplices of such Traytor, and their Sons, shall be liable to the same Punishment; but if they make a timely Discovery, they shall be rewarded, and tho late, shall be pardon'd. Enquiry shall be made if the Criminal die before the Discovery, and the Servants and Domesticks of such Traytors, alive or dead, may be examin'd by Torture. The Memory of the Deceas'd shall be condemn'd, and his Estate forfeited; and from the Time any one is found Guilty, he shall be incapable to buy, sell, or assign any Estate, or to demand any Debts.

The 25th forbids the dividing or dismembring the Principalities and Estates of any Elector; the Possession and Honour are to descend intire to the Eldest Son; but if he be a Fool, or uncapable to Govern, the Second shall succeed, or the next Heir Male if there be no Sons.

The 26th is, That when the Emperor, or King of the *Romans*, designs to hold an Imperial Court, all the Electors must attend at the Palace: whence the Emperor and King ride on Horseback to the Court, in Order as above-mentioned: The Arch-Chancellor is to carry the Imperial Seals on the Top of his Silver Battoon; And the other Electors are to carry the Imperial Regalia in the same Order. The Emperor, according to Pleasure, names the Princes who shall carry the Crowns of *Aix la Chapelle* and *Milan*; and they must go immediately before the Archbishop of *Triers*. This Ceremony is only to be performed before the Emperor when he wears the Imperial Crown, and not to the King of the *Romans*. The Empress, attended by her Officers, and Maids of Honour, is to go after the Emperor, the King of the *Romans*, and the King of *Bohemia*.

The 27th appoints the Offices of the Electors, during their Attendance at the Imperial Court. When the Emperor holds a Solemn Court, and is upon his Throne, the Elect. of *Saxony* comes on Horseback before the Palace-Gate, where a Heap of Oats shall be made as high as his Horses Breast, and the Elector, having a Silver Battoon, and a Measure of Silver, each weighing 12 Marks, shall fill the Measure with Oats, and give it to the next Groom of the Stables; and then planting his Staff in the Oats, retires; and Count *Pappenheim*, the Vice-Marshal, or the Marshal of the Court, approaching, they

Digitized by Google

they leave the Oats to any that can take them.

When the Emperor or King of the *Romans* ſit at Table, the Eccleſiaſtical Electors, and other Prelates ſtanding before it, ſhall ſay Grace, as above. One of the Archbiſhops bearing the Seals at the top of his Silver Staff, ſhall lay them on the Table before the Emperor, who gives them to the Archbiſhop in whoſe Dioceſe the Court is held, who hangs the broadeſt about his Neck during the Time of Dinner.

The Elector of *Brandenburg*, on Horſeback, is to carry a Silver Baſon and Ewer with Water, and a Napkin, muſt alight, and pour out Water to the Emperor. The Elector *Palatine*, on Horſeback, brings in 4 Silver Diſhes of Meat, and alighting, ſets them on the Table. After them, the King of *Bohemia*, on Horſeback, with a Silver Cup of Wine and Water cover'd, is to alight and kneel, and preſent it to the Emperor or King of the *Romans*.

The 28th Chapter orders, That the Imperial Table ſhall be 6 Foot higher than thoſe of the Electors, and none to ſit with him at any Solemnity but the King of the *Romans*. The Empreſs's Table is to be on one Side, and 3 Foot lower than that of the Emperor. The Tables of the Electors are to be of the ſame Height, 3 of them on the Right, and as many on the Left of the Emperor; and the 7th is to be over againſt the Emperor. No Elector is to ſit down till they have all perform'd their Office, and then ſit down all together. After the Ceremonies are over, the Scaffolding and Tables belong to the Maſter of the Houſhold.

The Election is to be made at *Francfort*, the Coronation at *Aix la Chapelle*, and the firſt Court at *Nuremberg*. If any Elector ſend a Deputy, he is not to ſit at the Elector's Table.

The laſt Article orders, That the Succeſſors of the Electors ſhall, at 7 Years of Age, learn the *Latin*, *Italian*, and *Sclavonian* Tongues; all which are us'd in the Empire.

The PRIVILEGES *of the Electors.*

THE Electoral College is the moſt Powerful and Honourable Court of the Empire. They have Power to chuſe and dethrone Emperors, when they judge it neceſſary for the Good of the Empire; ſo that 'tis the only Body in *Europe* that can be compar'd with the old *Roman* Senate. Their Precedency before any other Prince at all publick Aſſemblies of the Empire, is ſecur'd by the *Golden Bull*; and the Electors have maintain'd it on ſeveral Occaſions. On this Account *Joachim* II. Elector of *Brandenburg*, refuſed to give Place to *Rodolphus* of *Auſtria*, thô he was the Emperor's Son, and crown'd King of *Hungary*. The Elector of *Cologne* would not give the Precedency to Cardinal *Moron*, the Pope's Legate at the Diet of *Ratiſbon* in 1556. The *Engliſh* Ambaſſador and the Pope's Nuncio knowing that the Electors would not give Place to them at the Coronation of the Emperor, refuſ'd to be preſent at it; but it was provided by the Capitulations of *Ferdinand* II. that the Ambaſſadors of Electors ſhould give Place to thoſe of Crown'd Heads. Duke *Charles Emanuel* of *Savoy*, thô that Family has the Title of Kings of *Cyprus*, reſpected the Electors as his Maſters and Superiors.

The Electors have Power, 1. To make and annul Laws for the Empire without the Emperor's Conſent; ſo that the Chamber of *Spires* is obliged to ſubmit to their Deciſions, thô againſt Common Law. 2. Their Subjects ſwear Allegiance to them, and are obliged more ſtrictly to them than to the Emperor, to whom the Electors pay only the Acknowledgment of Vaſſals, as the firſt Perſon of the Empire. 3. They have all the Officers of State that other Sovereigns have. 4. They make War and Leagues with Foreign Powers without the Emperor. They treat with the Emperor as their Equal, and never ask Pardon of him for Acts of Hoſtility; but in ſuch Caſes, an Amneſty is agreed on by both. 5. They judge deciſively in all Caſes without Appeal. 6. They proteſt *Jews*. 7. They grant Pardons. 8. They appoint Fairs and Markets. 9. They lay on Taxes, *&c.* 10. They coin Money. 11. They have the Tenth of all Mines diſcovered in their Territories. 12. They ſend Ambaſſadors to Kings and States. 13. They give Diſpenſations for Marriage within the Degrees prohibited by Canon-Law. 14. They make what

Digitized by Google

what Change in Religion they pleaſe within their Territories.

By the Capitulation of *Ferdinand* III. the Emperor cannot aſſemble a Diet of the Empire without Conſent of the Electors, under Hand and Seal. He cannot make Leagues or War, make a Prince of the Empire, put any Perſon into the Ban of the Empire, or declare 'em Infamous, without Conſent of the Electors. They have alſo this Privilege, That they pay nothing for Inveſtitures; whereas other Princes are obliged to pay Fees to the Officers of the Court, and the Horſe they ride on to the Grand Marſhal of the Empire, or his Vicar.

The Electors uſe the Words, *By the Grace of God*, in their Titles, which is only us'd by Sovereigns; and Foreign Princes give them the ſame Honour they do to Crown'd Heads.

Preliminaries to the Election of the Emperor.

WHen Arch-Duke *Charles*, afterwards *Charles* V. was choſen, the Electors found it neceſſary, in regard of the great Power of *Spain*, and the Time he muſt ſpend in his Hereditary Dominions, to limit his Power, which they have practis'd at all Elections ſince; and thoſe Limitations are call'd by the Name of *Capitulation*, which, together with the *Golden Bull*, is the Fundamental Law of the Empire; and the Electors make ſuch Additions and Explanations to the Bull as they think fit, becauſe they repreſent the States and Sovereignty of the Empire. Of this ſort, the Capitulation made with *Ferdinand* III. was one of the moſt Remarkable, and conſiſted of 51 Articles, which the Emperor ſwore to, and that he himſelf and his Imperial Council would govern themſelves by it. The Firſt Article was, "That as Advocate of the "Chriſtian Church, he ſhould take the "Church and See of *Rome*, and the Perſon "of the Pope, into his Protection." But by the Capitulation of *Maximilian* II. the Proteſtant Electors were not obliged to ſtand to that Article, nor to demand it of the Emperor: And in that ſame Capitulation 'tis own'd, that the Emperor was called to that Dignity by the Providence of God, and the Choice of the Election; and that he took it upon him for the Glory of God, the univerſal Good of *Chriſtendom*, and the particular Good of *Germany*, with whom he enter'd into a Contract, and Reciprocal Obligation.

The Way of Electing the Emperor.

TO avoid the Penalty of being reduced to Bread and Water, if they don't finiſh the Election in a Month after taking the Oath, the Electors have found out a Way to diſtinguiſh betwixt their Deliberations about it and the Election it ſelf; and therefore never pretend to meet about the Election till they have agreed on the Perſon, and then they appoint a Day, which is rather to publiſh whom they have elected, than to elect. In the Morning they come to the Town-Houſe, without any Order, with their ordinary Habits and Retinues, where each of them enter a Chamber, and put on their Electoral Habits. The Eccleſiaſticks have Scarlet Robes, and Caps lin'd with Ermine; and the Seculars have theirs of Crimſon Velvet, lin'd alſo with Ermine. There they take Horſe, and go to St. *Bartholomew*'s Church, but without any fix'd Order in the Cavalcade. They are all attended by their Hereditary Marſhals, who carry the Swords before them, the Scabbards of the Eccleſiaſticks being adorned with Silver-gilt, and thoſe of the Seculars in Scabbards of Crimſon Velvet, adorn'd with Silver. The Deputies of Electors are allowed none of thoſe Ceremonies; but the Adminiſtrators of young Electors are. The Elector of *Saxony* has this Pre-eminence, That the Count *de Papenheim*, and not his own Marſhal, carries the Sword before him. When the Electors come to the Church, they alight at the Gate, and go each to their own Seat in the Quire; and ſeveral other Princes and Counts, with the Counſellors of the Electors, being called in, Count *Papenheim* ſhuts the Door, and takes the Keys; and the Sword-Bearers ſtand before the Electors with their Swords drawn, and laid over their Shoulders. When the Hymn of *Veni Creator* is ſung, the Proteſtant Electors retire till Maſs be over, when they return, and take the Oath before-mentioned, with the

Digitized by Google

the reſt, at the Altar, which is marked down by two Notaries, or the Archbiſhop of *Ments*'s Secretaries, and atteſted by the other Princes and Lords that are preſent. The Hymn being again ſung, they go to the Conclave for the Election, being a ſmall Vaulted Gallery that goes out of the Quire, and perform every thing according to the Order of the *Golden Bull*. Count *Papenheim* ſhuts them up; but lays the Keys ſo as they may find them. The Election is carried by Plurality of Votes; and if the Perſon choſen be an Elector, he may give his own Vote. They ſend for their Chancellors and Chief Counſellors a little, meerly for Form, to conſult them on Difficulties that may happen; after which they retire. The Election is uſually diſpatched in an Hour; and when 'tis over, they ſend again for their Principal Counſellors, the Chancellor of the Elector of *Ments*, and the Chancellor of a Secular Elector, who caſt up the Suffrages, mark them down, and draw up the Form, which the Electors ſign and ſeal with their Great Seals: Then they come out of the Conclave to the great Altar, upon which they place the Emperor Elect. The Archbiſhop of *Ments* recommends to him the Intereſts of the Empire, makes him ſign the Conditions on which he is choſen, and confirm the Electors in all their Privileges: After which, the Election is publiſh'd, and the Emperor proclaim'd by a Herald at Arms. Without this Confirmation given to each of the Electors under the Great Seal, he cannot meddle with the Adminiſtration.

When the Electors have agreed upon the Place of Coronation, the Elector of *Ments* orders the Magiſtrates of *Nuremberg*, who keep the *Regalia*, to ſend them to the Place. The Electors, or their Ambaſſadors, attend the Emperor from his Palace to the Church, in their Electoral Robes: The Elector *Palatine* carries the Crown, the Elector of *Bavaria* the Globe, the Elector of *Brandenburg* the Scepter, and march in a-Breaſt; the Elector of *Saxony* carries the Sword, and the Elector of *Hanover* the Standard. After them comes the Emperor alone, with his Retinue following. At the Door of the Church he is received by the Eccleſiaſtical Electors alſo in their Robes, who conduct him to the Altar; and the Archbiſhop that officiates being in his Pontificals, anoints his Head, betwixt his Shoulders, his Neck, Breaſt, and right Arm, and the middle of his right Hand. This they call his Conſecration. Then he is carried to another Altar to be crown'd, where he is cloath'd with the ancient Imperial Robes; and after the ordinary Ceremonies, he is plac'd on the Throne, where the Archbiſhop bids him take and keep the Pledge that was deſign'd for him by Providence, and the Choice of the Electors. After which, *Te Deum* is ſung, Trumpets and Kettle-Drums playing the mean while. The Archbiſhops of *Ments* and *Cologne* contend for the Privilege of putting the Crown on his Head. After the Coronation, the Emperor creates Knights and Gentlemen.

Of the King of the Romans.

THis Title is now given to thoſe who are to ſucceed to the Empire, and are choſen in the ſame Manner as the Emperors, as appears by the *Golden Bull*. After the Weſtern Empire was tranſlated from the *Greeks* to the *French* in *Charlemaign*'s Time, the Succeſſor was firſt called King of *Italy*, as *Selden* in his Titles of Honour proves from unqueſtionable Authority; but when *Italy* became tumultuous, and to break off from the Empire, he was called King of *Germany*, and ſometimes had both Titles. Lawyers diſpute whether he be ſubject to the Emperor. 'Tis plain, that at firſt he was; for *Bernard* King of the *Romans* was condemned to Death for Treaſon againſt the Emperor *Ludovicus Pius*: Yet ſome great *German* Lawyers affirm, That if he be choſen in the Emperor's Life-time, he is not ſubject to his Juriſdiction, but conſider'd as the ſecond Head of the Empire: This ſeems however to depend upon the Nature of his Election, and the Deſign of the Electors when they chuſe him. Thus *Ferdinand* King of the *Romans*, in the Time of *Charles V.* made Edicts as well as he: Yet thoſe who carry his Power higheſt, ſay, he is obliged to reverence the Emperor, tho' he be not ſubject to his Juriſdiction: For ſome of thoſe who were choſen by that Name after the Emperor's Death, they had the ſame Power with an Emperor: But in the Times

Digitized by Google

of Superſtition, or when the Pope's Power was formidable, they abſtain'd from the Title of Emperor, till they were crown'd at *Rome*; but ſince the Coronation at *Rome* has not been thought neceſſary, they take the Title of Emperor as ſoon as choſen. At preſent, the Kings of the *Romans* have for their Arms, an Eagle with one Head only; whereas the Emperor's Eagle has two, ſince the Houſe of *Auſtria* ſucceeded to *Spain*. The King is only call'd *Auguſtus*, but the Emperor *Semper Auguſtus*. The Emperor in his Letters Patents calls the King *Our Beloved*, but the King gives him the Title of *Majeſty*. In the Abſence of the Emperor, the King has the Adminiſtration of the Government. The Emperors have now for many Years procur'd their Eldeſt Sons to be choſen King of the *Romans*. The Duke of *Saxony*, and others, at the League of *Smalkald* proteſted againſt this, as contrary to the Golden Bull, and their Freedom of Election: And afterwards it was agreed, That no King of the *Romans* ſhould be choſen during the Emperor's Life, except the Electors agreed on it beforehand as Neceſſary; and they may alſo chuſe a King of the *Romans* without the Emperor's Conſent.

Their Nobility, and Titles of Honour, from Selden, &c.

WHence Feuds had their Original, is not certain; ſome derive them from the *Roman* Empire, as *Lampridius*, who ſays, That *Alexander Severus* gave ſuch Territories as were gain'd on the Frontiers, to his Soldiers and their Children to defend their own Lands, and the Empire from Incurſions; ſo that they were held by a Military Tenure: Some of thoſe Men had the Title of *Dux*, but not Hereditary, in which they differ'd from the Feudal Titles of Honour now in uſe. Some aſcribe the Origine of 'em to thoſe Northern Nations that overran *Europe*, thoſe Titles being only Officiary before; but thoſe Nations continued the *Roman* Names, as they us'd their Language in their Charters, Laws, *&c.* The *Lombards* finding that the Title of *Comes* and *Dux* were of equal Honour, and that *Comes*, as it had a relation to the Court, was frequently preferr'd, tho' the *Dux* did more Service to the State; they gave the greater Honour to the Title of *Dux*, in which they have been imitated by moſt Nations of *Europe*. *Sigonius* ſays, The firſt Hereditary Duke was *Giſulphus*, Nephew to *Alboinus* the firſt King of the *Lombards*, who erected *Friuli*, and the Province about it, into a Dutchy, and gave it him. Some Counts had then a Duke over them, and others were only ſubject to that King or Emperor who created them. Sir *Thomas Craig*, *De Feudis*, *Lib.* 1. *Dieges.* 4. aſcribes the Origine of the Feudal Law to the *Goths*, *Vandals*, *Huns*, and *Lombards*, who having over-run the Empire, divided the Lands among 'em in a Military manner, according to the Number of their Followers; to whom the Great Officers ſubdivided them for a certain quantity of the Product, to maintain themſelves, and the braveſt of their Followers, whom they called *Comites* or Companions. This he reckons to have been the Infancy of the Feudal Law; for thoſe Poſſeſſions were not Hereditary, but conferr'd and taken away at the Pleaſure of the Lord or Superior. The Feudal Law, he ſays, was in its Childhood, when the Proprietors ſuffer'd thoſe Lands to be enjoy'd by ſuch of the Sons of the preſent Poſſeſſors as they thought fireſt for that Service. This Law came to a State of Youth in the Time of the Emperor *Conrad* II. who allow'd Grand-Children, and likewiſe Collaterals, as Fathers Brothers, to ſucceed, in order to incourage his great Army he had then levied againſt *Italy*, becauſe the Popes then began to contend with the Emperor for Prehemi-nence. In *Charlemaign's* Time, Feudal Titles began to be Hereditary, whereas before they were only for Life, except the Lords thought fit it ſhould be otherwiſe; but in the Time of the *Capets*, that Line, in order to oblige the Nobility, allow'd the Succeſſion to be Hereditary; and then Sir *Thomas* ſays, the Feudal Law arriv'd to the State of a Man. In the 5th *Digeſt*, he anſwers thoſe who derive the Feudal Law from that of the *Roman*; and confutes the Pretenſions of the *Germans*, *Gauls*, *Spaniards*, and *Greeks*, as to the Antiquity of that Law in their reſpective Countries.

As to the *German* Titles of Archduke, Dukes, Counts Palatine, and others, Margraves, Landgraves, Burgraves, Barons, *&c.* the

the Curious may find an Account of them, with their Origine, Inveſtiture and Power, in *Selden's* Titles of Honour, *Part II.* and we ſhall give a brief Deſcription of the moſt remarkable of 'em when we come to the particular Governments in the Geographical Account of the Countries to which they belong.

Their KNIGHTS.

THE only remarkable Order of Knighthood in the Empire, and which properly belongs to it, is that of the *Teutonick* Order, of whom we gave an Account in *Pruſſia*. Their preſent Great Maſter is *Francis Lewis*, Palatine of the *Rhine*: His Reſidence is at *Mergentheim* in *Francomia*. They have Eleven Bailiwicks or Commanderies in the Empire, under ſo many Companions of the Order, call'd Commanders: The Firſt in *Alſace*, which the *French* King was oblig'd to reſtore by the Peace of *Ryſwick*; the Second in *Auſtria*; the Third in *Cleintz*; the Fourth in *Tirol*; the Fifth in *Franconia*; the Sixth in *Heſſe*, a Proteſtant; the Seventh in *Broſſen*; the Eighth in *Thuringia*, now a Papiſt, but to revert to a Proteſtant; the Ninth in *Weſtphalia*; the Tenth in *Lorrain*; the Eleventh in *Saxony*, a Proteſtant.

There's a Branch of the Knights of *Malta* in the Emperor's Hereditary Dominions, who have Poſſeſſions in *Bohemia*, *Auſtria*, *Sileſia*, and *Tyrol*. Their preſent Grand Prior is the Count of *Potting*.

The common Order of Knights in *Germany*, are called *Ritter Geſchlagen*, or Dubb'd Knights, who are created by the Emperor with the Stroke of a Sword, kneeling before him, but the Title deſcends not to their Heirs. The Curious may ſee the Ancient Ceremonies in creating thoſe Knights, with their Qualifications and Privileges, in *Selden's* Titles of Honour.

There are ſome particular Orders made by Princes of the Empire, which we ſhall treat of in their Place.

The Empreſs-Dowager *Eleonora*, in 1662, founded two Orders of Ladies, who are a ſort of Knights. The Firſt is called, the Order of the Slaves of Virtue, becauſe they profeſs a more ſevere Virtue than others. They are Thirty in Number, part Proteſtants and part Papiſts. Their Badge is a golden Medal, repreſenting a Sun encompaſs'd with a Lawrel Garland, and their Motto, *Sola ubique triumphat*. The Empreſs is Great Miſtreſs of the Order. The Second is, That of the United Croſs-Bearers, founded by the ſame Empreſs in 1668, becauſe, when the Palace was burnt, a Golden Crucifix, in which they pretend there's a Piece of the Croſs, was found in the Ruins untouch'd by the Flames. They are all Papiſts, and wear on their Left Side a four-corner'd Croſs faſten'd to a black Ribbon, at the End of which there's a ſparkling Star; in the Middle, there are two Wood-colour'd Lines; there are four Eagles about it, and the Motto round it is, *Salus & Gloria*. Their Patrons are the Mother of God and St. *Joſeph*. It was confirm'd by Pope *Clement*; the Biſhop of *Vienna* is their Spiritual Inſpector, and the Empreſs their Proteſtreſs. She made Seventeen Ladies of the Order, in *May* 1698.

The Diet, Colleges, Councils, and Courts of the Empire.

FOR the Diet, the Manner of their Sitting is eaſily underſtood by the Cut of it; but the Deſcription of the ſeveral Colleges that compoſe it, we refer to the Account of *Ratiſbon*, their uſual Place of Meeting. For the Chief Councils of the Empire; as the Aulic Council, the Council of State, the Council of War, and the Council of Finances; we refer them to the Deſcription of *Vienna*, where they Sit, as we do the Chamber of *Spires* to *Spires*, and the College of the Hans Towns to *Lubec*.

Their LAWS

ARE, 1. The *Golden Bull*, which we have accounted for already. 'Tis called *Golden*, becauſe of the Gold Seal affix'd to

Digitized by Google

it, to denote its Importance, as the Fundamental Law of the Empire; and *Bull*, from the *Bulla*, or little gilt Picture, which the young *Romans* during their Commonwealth hung about their Necks till they were 14 Years of Age, and then conſecrated them to their *Lares*; ſo that it's now become a common Name for the Seals of Emperors and Popes, ſays Dr. *Nicholſon*. It has on the Face the Picture of the Emperor *Charles* IV. on his Throne, with the Imperial Crown on his Head, the Scepter in one Hand, and Globe in t'other; the Arms of the Empire on the Right, and thoſe of *Bohemia* on the Left. The Inſcription is, *Carolus Quartus, Divina Favente Clementia Romanorum Imperator, ſemper Auguſtus & Bohemiæ Rex.* On the Reverſe it has a Caſtle, with two Figures, and the Words *Aurea Roma* under them; and in the Circumference this Inſcription, *Roma Caput Mundi, Regit Orbis frena Rotundi.* This *Bull* is writ on 24 Leaves of Parchment, and contains 30 Chapters. 2. The *Capitulatio Cæſarea*, or Imperial Capitulation, which we have alſo mention'd already, that the Emperor is ſworn to obſerve at his Election. Dr. *Nicholſon* ſays, it conſiſts only of 41 Articles; but that ſworn by *Ferdinand* III. conſiſted of 51; ſo that the Electors add or alter as they ſee Occaſion. 3. The *Receſſus Imperii*, or Acts of the Diets. 4. The *Pragmatic Sanction*, or Laws made in the Diets for preſerving the Publick Peace. 5. *Juſtinian*'s Collection of the *Roman* Laws; for *Maximilian* I. order'd the Civil Law to be us'd in the Chamber of *Spire* in 1495, and it has ſince been taught in their Univerſities; but the General Laws made by the Diet, and thoſe of the particular Princes and States, who have Power to make their own Laws, provided they be not prejudicial to the other States, take Place of the Civil Law; but where there is no Proviſion otherwiſe, Cauſes are determin'd according to that. They alſo make uſe of the Canon Law. M. *Raphel*, Plenipotentiary for the Duke of *Holſtein-Gottorp* at *Nimeguen*, publiſh'd an Account of the Common Law through the whole Empire, Entituled, *Introductio ad Jus Publicum Germanicum.*

Their MILITARY *Government.*

THis is beſt to be underſtood by the following *Matricula*, which regulates the Quota of Men and Money that each Prince and State is to furniſh for Defence of the Empire, for what they call a *Roman* Month.

By which it appears, That the Emperor and Empire make the most potent Government of *Europe*, when they have a good Understanding with one another.

Besides the Tax before-mentioned, there is another that each State is obliged to pay to the Chamber of the Officers of *Wetzlar*, amounting to 48925 Florins.

'Twas *Maximilian* I. who began to divide the Empire into Circles in 1500, and appointed those of *Francovia, Bavaria, Swabia,* the *Upper Rhine, Westphalia,* and *Lower Saxony*; Twelve Years after, he added those of *Austria, Burgundy,* of the *Lower Rhine,* and *Upper Saxony*. *Charles* V. confirmed this in the Diet at *Nuremberg* in 1522, and appointed the *Matricula* as above, which is kept in the Archbishop of *Mentz*'s Chancery. It was order'd, instead of 2000 Foot and 4000 Horse that the Empire was obliged to furnish to attend the Emperor when he went to *Rome* to be crown'd, That those that could not raise Troops, were to pay 12 Florins for each Horseman, and 4 for a Footman; but the Prices of Things increasing, they were to pay 60 for a Horseman, and 12 for a Footman, which made one of the new *Roman* Months equal to five of the old ones. The Tax not being alter'd since, the States augment the Number of *Roman* Months as Occasion requires, and appoint the Time of Payment.

Every Circle has one or two Directors, who summon the States of the Circle to meet, acquaint them with the Cause, and give the necessary Orders for the Publick Welfare, and good Administration. They chuse a General for the Troops they raise, either of their own Number, or otherwise, as they think meet; but if he be one of themselves, he has no Salary. He is to take Care, that all Things relating to War be managed for the Good of the Circle. He lists their Men, regulates their Quarters and March, and puts the Ban of the Empire in Execution. They chuse 5 Assistants at least, who are as his Lieutenants, and perform his Office, if either he neglect it, or be necessarily absent; and they may either be of their own Circle, or any other; for this Dignity is not annex'd to any particular Family or State; nor are they oblig'd always to serve in that Station. Every Circle has three Publick Ministers or Counsellors, *viz.* a Treasurer, who superintends the Money; another who receives what the States pay towards the Imperial Chamber, and gives Quittances for it; and a Secretary, who attends the Directors. Sometimes all the Circles meet together, which they call a General Assembly. The Circles that lie nearest one another meet every Year, to regulate the Affairs of Money, Correspondence and Commerce; whence they are call'd the Corresponding Circles. There are three Classes of them: The first are, the *Upper Rhine, Lower Rhine,* and *Westphalia*: The 2d, *Upper* and

Digitized by Google

and *Lower Saxony*: And the 3d, *Franconia*, *Bavaria*, *Swabia*, and *Austria*. Some of the Circles are fix'd, and always aſſembled: Others meet only once a Year; and ſome are only call'd to meet when Neceſſity requires. The General Aſſemblies of a Circle appoint the Particular Aſſemblies; and the Directors give Notice of the Time and Place 6 Weeks before. That of *Upper Saxony* uſually meets at *Leipſick*; *Franconia* at *Nuremberg* or *Bamberg*; and *Swabia* at *Ulm*. They treat about the Goodneſs or Badneſs of the Coin, about the Preſervation of their Peace, their Publick Defence, about rectifying the *Matricula*, putting the Emperor's Orders in Execution, and appointing Counſellors for the Chamber of *Wetzlar*. They alſo make Laws; but muſt take Care they be conſiſtent with the Conſtitution of the Empire. They take Order about their Records, their Treaſury, Arſenals, Magazines, Fortifications, and Frontiers.

CHAP. XXVII.

The GEOGRAPHY *of Modern* GERMANY.

GERMANY is bounded on the N. by *Denmark* and the *Baltick*, on the N. E. by *Prussia*, on the E. by *Poland*, on the S. E. by *Hungary*, on the S. by the Dominions of the State of *Venice*, on the S. W. by the *Alps*, which divides it from *Italy*; on the W. by *Switzerland*, *France*, and the *Spanish Netherlands*; and on the N. W. by the *German* Ocean, and the United Provinces.

The Extent of *Germany*, according to *Bristau*, is 562 *English* Miles from W. to E. *viz.* from *Lorrain* to the Frontiers of *Poland*; and the Breadth from the Borders of *Switzerland* in Lat. 45. 12 Min. to the moſt Northerly Places of the Iſle of *Rugen* in Lat. 54. 50 Min. is 588 *Engliſh* Miles. *La Forreſt* makes its Breadth from Lat. 45. to Lat. 55. but *Moll* places the moſt Southerly Places of *Germany* in Lat. 46½. *La Forreſt* joins *Tranſilvania* to *Germany*, and makes the Length of it, from the Frontiers of *French Flanders* to the utmoſt Parts of *Tranſilvania*, 900 *Engliſh* Miles.

We begin with *Saxony*, according to the Method of *Pitt's* Atlas.

SAXONY *in General.*

THE Learned have great Debates about the Origine of the Name *Saxon*, which, ſince they were Anceſtors to a great Part of the People of this Iſland, we may be allow'd a little to inſiſt upon. Some derive it, with *Iſidore Hiſpalenſis*, from the Latin Word *Saxum*, becauſe they were a hardy and valiant People, and bolder Pirates than any of their Neighbours: But ſince they were poſſeſſed of their Country long before *Rome* was built, we cannot think them obliged to the *Romans* for their Name. Others derive them from the *Saſones* or *Saca*, a People of *Aſia*; but this is rejected by *Cluverius*, as wanting Authority. He himſelf thinks they were the *Foſi*, mentioned by *Tacitus*, which was writ by Miſtake inſtead of *Saxoni*; but this ſeems to be much ſtrain'd, as well as the Opinion of thoſe who would derive their Name from *Aikenaz*, the great Leader of the *Aſiatick* Colony into *Germany*. Therefore moſt Writers think they take their Name from a ſhort Sword or Dagger, which was peculiar to them, and in their Language called *Seax*. This they ſupport by the ancient Arms of *Saxony*, which were two Croſs Hangers or Daggers. But the *Brandenburg* Reſident, formerly mentioned, ſays, the Elector of *Saxony* bears thoſe Arms meerly becauſe he is Hereditary Marſhal of the Empire; and therefore no other Prince of his Family bears them: So that upon the whole, the Name ſeems to be ſo ancient, that there is but little Hopes of coming at the true Knowledge of the Original.

Their ancient Government, as Dr. *Nicholſon* informs us, was like that of moſt of the other *Germans*, *viz.* by 12 of the chief Nobles, choſen by the People during a War, and one of them was appointed to be King; but return'd to a Level with the reſt when the War was over; and ſome will have our Juries to derive their Beginning from this Form of Government.

How far the ancient *Saxons* extended their Limits, we have heard before in the

Digitized by Google

Description of Ancient *Germany*; and for what Countries are contained in the Circles of *Upper* and *Lower Saxony*, we refer to the *Matricula* of the Empire, and *Sanson*'s Division of *Germany*.

Lower Saxony,

IS bounded on the N. by the *German* Ocean, *Denmark*, and the *Baltick*; on the S. by *Hessia*, and *Upper Saxony*; on the E. by *Pomerania*, and the Marquilate of *Brandenburg*; and on the W. by *Westphalia*. It reaches from N. to S. about 200 Miles, and from E. to W. about 220.

The Air of this Country in general is very cold in the Winter; but the Soil is very fruitful in Corn.

The chief Rivers are, the *Elb*, the *Weser*, the *Aller*, the *Hamma*, the *Ilmenow*, the *Leine*, the *Ocker*, and the *Eldt*.

The People in general are tall, well built, strong, Lovers of good Cheer, and pretty much addicted to Drink.

The first considerable Town in this Part, is

Hamburg.

HIstorians differ about the Rise of its Name; some derive it from its being a Mart for Hams; others from the Statue of *Jupiter Ammon*, which was worship'd there till destroyed by *Charles the Great*. *Crantzius* derives it from *Hama*, a *Saxon* Champion, slain there by a *Danish* Giant; but it is most probably, says Dr. *Nicholson*, derived from *Ham*, *i. e.* a Forrest, that formerly lay between the *Bille* and the *Alster*, and gave Title to the Lords of *Ham*, who first built a Castle there, which they called *Hamburg*. They differ likewise about its Situation: Some will have it to be in the Province of *Stormar*; but the *Germans* say, it is in the uttermost Bounds of *Saxony*, and that the greatest Part of it is still divided from *Stormar* by Branches of the *Elb*. Some Antiquaries say, it was a considerable Village in the Days of *Albion*, the great Captain of the *Albingi*; after whose Death, it was enlarged in 789 by *Otho*, to whom *Charles the Great* gave the adjacent Country; but the *Vandals* ruin'd it soon after. In 811, the Emperor recover'd the Country, and rebuilt the Town. It was afterwards enlarged by *Ludovicus Pius*, who made it an Archbishoprick, under *Ansgar*, about 833; but the Archbishoprick was translated afterwards to *Bremen*. In 1227, *Waldemar* II. of *Denmark*, took that City, and gave it to *Albert* Count of *Orlamund*, and his Heirs; but he sold his Pretensions to the Citizens 7 Years after for 150000 Marks of Silver. In 1240, *Adolph* IV. Count of *Holstein*, confirm'd their Liberties, as did his Successors, till 1459, that *Holstein* was annex'd to the Kingdom of *Denmark*, upon the Death of the last Earl of that Family. At this Time *Hamburg* promis'd their Friendship to the Crown of *Denmark*, as long as those Kings continued their Privileges; to which *Christian* agreed, without desiring any Homage or Mark of Subjection; but his Successors frequently attempted to subdue it. From 1570, to 1621, the Dukes of *Holstein* pretended to be Masters of this City; but this Controversy was ended, by their paying Homage and swearing Fealty to the King of *Denmark*, and the Duke of *Holstein Gottorp*, with a Salvo for the Rights of the Emperor and Empire, and of their own Liberties and Privileges. This hinder'd them at that Time from having a Vote in the College of the Free Towns; but in 1510, the Emperor, in a Diet at *Augsburg*, declar'd 'em a Free City; and the Duke of *Holstein* was summon'd to make good or renounce his Pretensions: Since which they have been made a Member of the Empire, and invested with a Sovereign Power in their own Jurisdiction, like other Imperial Cities, by a Grant of *Frederick* I. which was confirmed by *Ferdinand* II. They are exempted from all Tolls upon the *Elb* betwixt their own City and the Ocean; but the King of *Denmark* has compell'd them several Times since to pay at his Castle of *Gluckstadt*, which commands the *Elb*; particularly in 1645, they paid 120000 Crowns to be free of his Demands: In 1679, they paid 210000 to take them again into his Favour, as the Treaty words it; and in 1686, the *Danes* besieg'd it, but were bought off. The continual Jealousies betwixt *Sweden* and *Denmark* is their chief Security; for when the *Danes* attack

their

their Ships from *Gluckſtadt*, the *Swedes* protect them from *Stade* on the other Side the River.

This City is one of the richeſt in the Empire, and has for a long Time been the greateſt Mart of *Germany*, the Haven being crowded with Ships, and their Exchange with Merchants. It lies in a Plain on the N. of the *Elb*, Long. 30. Lat. 53½. according to *Moll* and *Oxnam*, 50 *Engliſh* Miles N. E. from *Bremen*, 30 S. W. from *Lubeck*, 30 S. from *Gluckſtadt*, 140 N.E. from *Munſter*, and about 330 W. from *Dantzick*. 'Tis naturally ſtrong, great Part of it lying in an Iſland. The Tide runs in Canals through moſt of the chief Streets, and runs four Leagues higher, *viz.* 22 Leagues from the Mouth of the River, wherein it exceeds all the Rivers of *Europe*. The *Thames* comes next to it. The City is well fortified after the modern Way; but their Works are not fac'd with Stone. It conſiſts of two Parts, called the *Old* and *New Town*, ſeparated by a Wall well fortified. From the Tops of the Towers and Walls, there's a pleaſant Proſpect every way. It has only 4 great Gates, *viz.* 1. That which leads to *Altena*, on the W. of the *Old Town*, commonly called the *Millers Gate*. 2. One which leads to the great Trenches, N. of the Town. 3. The Stone Gate, which leads to the E. 4. The South Gate, which leads to the Iſlands on the *Elb*. The Streets are generally crooked, but otherwiſe out-ſtrip any in *Germany*. The *Alſter* on the N. Side drives all the Mills, which ſupply them with Meal. They have ſtrong Ramparts and Outworks, which were caſt up for fear of the *Danes*, and finiſh'd in 4 Years, which is a ſufficient Teſtimony of the Riches of the Inhabitants.

The Town is exceeding populous, conſiſts of a great many little Iſlands in the *Elb* and the *Alſter*, join'd almoſt by as many Bridges as there are at *Amſterdam*. About the Change of the Moon, the Spring Tides, or in Tempeſtuous Weather the Sea flows up the ſmall Channels, and ſometimes ruins many Houſes and Families. The Town ſuffer'd much this way in 1651. Their Houſes are moſt of Brick, exceeding high and ſtately. Many of them have fine Frontiſpieces, and large Halls. The Senate-Houſe is a noble Structure, beautified with the Statues of the 9 Worthies. They have a fine Exchange, but much ſhort of ours in *London*. Their chief Church is that of St. *Peter*, formerly a Cathedral, while they had an Archbiſhop. They have ſtill a ſort of Dean and Chapter, from whoſe Court there lies no Appeal but to the Imperial Chamber. It was built, ſome ſay, in 801, and others in 830. Many of the Earls of *Schawenburg* and *Holſtein* are buried here, whoſe Names, after thoſe of *Charles the Great*, and his Son *Lewis the Pious*, are writ in a fair Catalogue with their other Benefactors, and hung up in the Body of the Church, which ſome take as an Argument, thô the Citizens deny it, that thoſe Princes had more than a Titular Power over this City. The Town is noted in general for its fair Churches, and noble Steeples cover'd with Copper. That of St. *Catherine's* has a ſtately Front, and on the Top of the Steeple a Crown richly gilt: The Pulpit is of white Marble, curiouſly carv'd, and adorn'd with Figures of Alabaſter, and Ornaments of Gold. The Organ is reckon'd one of the beſt in *Europe*, and plays, as ſome ſay, above 6000 Notes. The Church of St. *Nicholas* has a Steeple ſupported by large gilded Globes. The other Churches of Note are, St. *Jacob's*, St. *Catherine's the Leſs*, St. *Michael's*, whoſe Steeple is 400 Foot high; St. *Gertrude's*, St. *John's*, St. *Mary Magdalen's*, that of the *Holy Ghoſt*, the *Bluecoat-Hoſpital* Church, St. *George's*, and the New Church in the *New Town*. In each of theſe they keep a Regiſter of the Poor and Diſtreſſed, who have a Weekly Allowance of Money, and an Annual Allowance for Clothes and Fuel. Their Hoſpitals are, 1. That call'd the *Oldeſt*, near the Church of the *Holy Ghoſt*, where 114 poor, old, blind, dumb, *&c.* are maintain'd. 2. The Hoſpital of St. *George*, which was built about 150, and endow'd with a Maintenance for a great Number of Poor, with Servants, and a Miniſter, and is made uſe of by ſuch as dwell in the Suburbs, and adjacent Villages. 3. St. *Job's* Hoſpital, built in 1509, for thoſe who had the Plague, and is now made uſe of for the Maintenance and Cure of ſuch Poor as have the *French* Diſeaſe. 4. The Orphans Hoſpital, where abundance of poor Citizens Children are bred up, with Nurſes to look after Infants, and a School with 5 Maſters for keeping

Digitized by Google

those who are capable, to Prayer, Reading, Writing, and Accounts. Its Annual Revenue is 210000 Crowns. Sometimes they have near 310 Infants abroad at Nurse, who are taken into the House as soon as able to dress themselves. Such of the Boys as have Parts, are fitted for the University, and maintain'd there at the Charge of the House, till they be able to maintain themselves. The rest are put out to Trades; and the Girls, after they can read, spin, knit, &c. are sent to Service. 5. They have a common Pest-House, where such as have the Plague, or other Infectious Distempers, are taken Care of; and the Attendance and Skill of those belonging to that Hospital is such, that People of the best Rank come thither for Cure of such Distempers. 6. They have a large and sumptuous Hospital, which was built in 1632, where there is a Physician and Surgeon, with necessary Medicines, for poor Strangers and Travellers that fall sick. In 1556, they built a large Hospital, which has been much augmented since both in Revenues and Buildings, for maim'd, ancient, and decay'd Mariners, and the poor Widows and Orphans of such as have lost their Parents or Husbands at Sea. Besides these, they have many lesser Hospitals for certain Numbers of poor Widows, Widowers, Orphans, &c. with a great Number of Free Schools, where the Children of poor Burghers have their Education, Books, and Clothes, till they be fit for the University, or Trades. They have likewise a Work-house for such as want Employment, and are willing to work, and for obliging sturdy Vagrants, or loose Persons of both Sexes, to labour, or give them Correction. The Motto writ over the Door of the Work-house is, *Labore nutrior*; *i. e.* I am maintain'd by my Labour. And that over the House of Correction is, *Labore plector*; *i. e.* I am punish'd by Labour.

Their Government is by 4 Burgomasters, and 20 *Schepini* or Aldermen. They us'd formerly to be Civilians, or other Men of Learning; but now they are chosen out of the Merchants or Tradesmen. They have also 12 Common-Council Men, whom they call *Oberalten*, *i. e.* Chief Elders, who consult about, and take Care of their Publick Affairs; but in extraordinary Cases, they join with 60 more grave Citizens, called *Burgeralten*, or the Elders of the City; and if they cannot determine the Matter, 'tis refer'd to a general Meeting of the Freemen: But in case of intestine Broils, which they are not able to compose themselves, the Emperor and Empire take Care of their Peace, by sending Troops of the neighbouring Circle to suppress the Seditious, as they did lately.

For speedy Reparation of Loss by Fire, they have a Custom of entring into Societies to repair one another's Losses; and any Man being at Liberty to enter into all the Societies if he pleases, they frequently get more than their Damages.

Their Territories is a small Part of *Stormar*, which has several considerable Villages, and Noblemen's fine Seats. They have likewise many little Islands in the *Elb*, which were formerly subject to neighbouring Princes. They have also the strong Castle of *Ritzenbuttel*, betwixt the Mouths of the *Elb* and *Weser*. Below this to the N. W. they have a considerable Fortress, call'd the *New-Work*, which is a convenient Harbour for Merchant-men. They have also the Custom-House of *Tollenspicker*, where all Passengers pay a certain Toll for themselves and their Carriages. There are other Places of less Note equally subject to this City and *Lubeck*. Their Harbour is so commodious, and the River up to the Wall so deep, that large Merchant-men come up to the Town; but those of an extraordinary Size anchor at the *New Mills*, 4 *English* Miles below the Town, and unload in smaller Vessels.

Their chief Home-Commodity is Beer, which is the best in *Germany*, and employs vast Numbers of their People in brewing it. 'Tis exported to many Places in *Germany*, particularly to *Lubeck*, where 'tis much valued; and to *Francfort* on the *Main*, where it sells dearer than the best Rhenish.

They have Plenty of Sea and Fresh-Water Fish, which, with the Fruit and Herbs from their Gardens without the Walls, furnishes good Entertainment. The Trade they have with *English* Merchants, is more considerable than that with any other Nation: Therefore they allow our *Hamburg* Company greater Privileges than they do any others; for all Suits wherein they are more im-

Digitized by Google

immediately concern'd, are try'd before the *English* Resident, who judges them in a ſtately Hall built by the Company. They have alſo the Freedom of Religion in the City; whereas others that are not *Lutherans* muſt go to *Altena*.

By means of the *Elb*, this City has a great Trade with a great Part of the Empire. Dr. *Brown* ſays, they vend Annually 100000 Pounds worth of *Engliſh* Woollen Manufactury. The *General Courſe of Commerce* ſays, they have a great Trade with *Holland*, *France*, *Spain*, *Italy*, *Denmark*, *Sweden*, and moſt other Parts of *Europe*; and Merchant-Ships come hither from moſt conſiderable Parts of the known World, ſo that they furniſh the Empire with the richeſt Merchandize of other Nations.

Their Current Money is that of the Empire, *Sweden* and *Denmark*; and the Coin of moſt Trading Nations in *Europe* goes here at a good Value. They coin ſome ſmall Pieces of their own. Their Mark is worth 16 Stivers, 10 ½ *d.* of *Amſterdam*, and their Rix-Dollar worth 54 Stivers. Their *Guilelmus* Ducats, old Value, 7 *s.* 2 *d.* new Value, 8 *s.* 9 *d.* Their Shilling, 9 *d.* ½. The *Map of Commerce* ſays, they meaſure their Corn by the *Scheppel*, 83 of which are equal to 10 Quarters *Engliſh*. 160 of their Ells make 48 ½ in *London*.

In Conſideration that they pay no Tolls to the Emperor on the *Elb*, they are obliged to preſerve that River from Pirates, of whom they have taken abundance at ſeveral Times. *Monconys*, in his Travels, ſays, the Senators and Burgomaſters are during Life. That when a Citizen dies, he muſt leave the 10th Part of his Eſtate to the City; and that Foreigners not naturaliz'd, muſt pay Annually a certain Sum for Liberty to trade there.

This City is by ſome reckon'd as large as *Rotterdam*, is able to arm 15000 Men, and has a conſtant Gariſon of 1800.

Albertus Krantzius, the famous Hiſtorian, and *Petrus Lambecius*, who wrote their Antiquities, were born here.

The Dutchy and City of BREMEN.

THE Dutchy has that of *Lunenburg* on the E. the *Weſer* on the S. the *German* Ocean on the W. and the *Elb* on the N. It is divided as follows; 1. Into the Biſhoprick of *Verden*, on the Borders of *Lunenburg*. 2. The *Land of Bremen*, properly ſo call'd, which lies ſome Miles round the City. 3. *Wurſterland*, on the Coaſt from the *Weſer* to the Mouth of the *Elb*. 4 *Hadeland*, upon the Mouth of the *Elb*. Part of it is now ſubject to *Hamburg*, and Part of it under the Duke of *Saxe-Lawenburg*, whoſe Caſtle of *Atterndorf* commands moſt of the Province, in which thoſe of *Bremen* have little but the Village and Caſtle of *Nyen-huſſe*, on the Mouth of the *Oſte*. 5. *Kedingerland*; in which lies the City of *Stade*. 6. *Alt-Land*, a pleaſant and fruitful Country, about 14 *Engliſh* Miles long. The People in general are as good Soldiers as any in the Empire; and it is ſaid of the *Wurſterlanders* in particular, That they will fight and drink with any in *Germany*. They formerly relied ſo much on their own Valour, that they deſpis'd building Cities and Forts. They frequently rebell'd againſt the Archbiſhops, and have ever ſince delighted in War. Thoſe of *Hadeland* are reckon'd ignorant and proud, and delight ſo much in gay Clothes, that their Neighbours, by way of Jeſt, ſay, there are no Peaſants in *Hadeland*. Betwixt *Bremen* and *Stade*, the Country is deſart and Sandy; but the other Parts towards the Rivers are as pleaſant as any of the Empire, and abound with Fields, Meadows, and fruitful Orchards. This Country was ſubject to its Archbiſhop till 1644, that being conquer'd by the *Swedes*, 'twas by the Treaty of *Weſtphalia*, with the Biſhoprick of *Verden*, annex'd to that Crown, and made a Dutchy, to ſatisfy the King of *Sweden*, as it is worded in the ſaid Treaty, for the Places taken in the War, which he reſtor'd, together with the Publick Peace of the Empire.

Dr. *Nicholſon* ſays, they were converted by *Willehadus*, an *Engliſh* Man, ſent over by the Archbiſhop of *York*, upon the Diſire of *Charles the Great*, was made Biſhop of *Bremen*, and died there in 790, where they pretend to ſhew his Tomb, and, as ſome ſay, was ſucceeded by *Willeric*, another *Engliſh* Man, who left it to *Lendvic*, a *German*, that was depos'd for his Pride and Inſolence by *Ludovicus Pius*, who gave it to *Anſgarius*, the firſt Archbiſhop of *Bremen* and *Hamburg*, and died in 865. During his Life, he

Digitized by Google

he enjoy'd both Titles; but was oppos'd by the Archbiſhop of *Cologne*, who alledg'd the Archbiſhoprick of *Bremen* depended on his See; but the Emperor, without regarding that, order'd all the Biſhops of *Denmark*, *Sweden*, *Norway*, *Groneland*, *Helſingland*, *Iſland*, and the other Northern Countries, to be ſubject to the Archbiſhop of *Bremen* and *Hamburg*. Afterwards, at the Deſire of *Erick* King of *Denmark*, the Pope erected an Archbiſhop's See at *Lunden*; to which, ſince that Time, the Biſhops of *Denmark* and *Sweden* were ſubject. The Hiſtory of their Archbiſhops is full of Legends; yet the Commons revere their Memory, and value St. *Anſgar*'s Day as much as *Chriſtmas*. Their 48th and laſt Archbiſhop was *Frederick* Duke of *Holſtein*, Son to *Chriſtian* IV. of *Denmark*; but he loſt it by the *Swediſh* War, as above mentioned.

The City of BREMEN.

SOme think its Name comes from the Flat-bottom'd Veſſels call'd *Pramen*, they us'd as a Ferry, where now their Bridge ſtands. Others derive it from *Brame*, *i. e.* Broom, which abounds in this Country. *Martinius* derives it from *Brame*, a Border, as being the utmoſt Bounds of the *German* Empire on that Side. *Cluverius* and others think it was the Φαβιανον of *Ptolomy*, to which the preſent Name has ſtill ſome Analogy. 'Tis not certain when 'twas built; but 'tis plain, that a great Part of it, call'd St. *Stephen*'s-*Stadt*, was built long ſince the main Body of the Town. That called the *New-Stadt*, was built within theſe 100 Years; and the Suburbs of St. *Nicholas*, which make ſo conſiderable Part of the City, and the *New-Stadt* on the other Side the *Weſer*, were not Wall'd till 1623. The *Old Town* was probably Wall'd in the Time of *Henry the Fouler*, about 1000, when he order'd other Towns to be fortified againſt the *Vandals*. Their firſt great Privileges were granted by *Henry* V. in 1111, for their brave Atchievements in the Holy War by Sea and Land, as appears by their Charter; but before his Time it was reckon'd to have been a Free City, as is evident from the *Statua Rolandina* in the Market-place, with an old *Saxon* Inſcription in Rhime to this Effect; *I am a Teſtimony of the Liberty which* Charles the Great, *and many other Emperors, have granted this City; for which I adviſe you to return God Thanks.* Dr. *Nicholſon* gives an Account of the Tradition among the *Saxons* for erecting thoſe monſtrous Statues. They ſay, That this *Roland* was a Man of Gigantick Stature, Nephew to *Charles the Great*, and one of his Generals, thrô whoſe Aſſiſtance he conquer'd much of that Country, and therefore order'd his Statue to be ſet up in many of thoſe noted Towns he ſubdued, and granted them larger Privileges than others, ſo long as they kept up thoſe Statues: But among other Arguments, the Doctor brings againſt this the Opinion of *Goldaſtus*, who thinks that *Ruland* or *Rugenland* is not a Proper Name, but an Appellative, denoting Cities or great Towns on the Borders of the Empire, where Courts of Juſtice were eſtabliſhed; and that this Authority given to their Magiſtrates was repreſented, as now in *Bremen*, *Magdeburg*, &c. by a Gigantick Statue, repreſenting the Emperor, and bearing the Arms of the Empire. He adds, That the People of Towns, when they were deprived of that Privilege, did uſually pull down thoſe Statues, as the *Hamburgers* did when *Charles* IV. obliged them to ſubmit to the Duke of *Holſtein*.

Bremen is now a Free Imperial City, and the Third in Order of the Hans-Towns: It is divided by the *Weſer* into two Parts; that on the N. is called the *Old Town*, and that on the S. the *New*. They are join'd by Wooden Bridges, and on the largeſt there is an Engine that raiſes Water, and diſtributes it all over the City. The Streets of the *Old Town* are large, and center in the Market-place, where that called *Roland*'s Statue ſtands. In this Town ſtands alſo the Town-Houſe, a fine late Building, with ſpacious Rooms; in the firſt is the Picture of *Willibaldus*, their Apoſtle, with an old *Saxon* Inſcription above it, not underſtood now by the Inhabitants; but ſome will have him to have been a *Holſteiner*. The Front of this Houſe is very handſome, and faces the Market-place. The Senate or Council Chamber is very ſtately, and has the Picture of 12 Emperors, in which that of the laſt is included. Here alſo ſtands the ancient Cathedral, dedicated to St. *John*, in which they pretend to ſhew *Willibald*'s Tomb.

Digitized by Google

Tomb. In the *New Town* are the Arſenal, and the Univerſity, which was firſt a Free-School, built ſoon after the Reformation in 1552; afterwards advanced to a *Schola Illuſtris*, where Divinity, Law and Phyſick, were taught; but has been ſince ſo much endow'd by the Citizens, that it is become one of the moſt noted Univerſities in *Germany*, and produc'd ſeveral Great Men, among whom were *Chytreus*, *Pezelius*, *Pierius*, *Martinius*, *Lampadius*, *Crocius*, *Combachius*, and the famous *Cocceius*. They had formerly many Struggles with their Archbiſhops for their Liberties, and bravely defended the Reformation againſt one of them, for which *Charles* V. order'd the Duke of *Brunſwick* to lay Siege to it, which he was obliged to raiſe after a Year's continuance. They have ſince had a Controverſy with the *Swedes*, and denied that, by the Treaty of *Weſtphalia*, the Crown of *Sweden* had any more Power over them, than their former Archbiſhops, in whoſe Time they were own'd to be a Free Imperial City; and that by the 10th Article of *Oſnabrug* it was provided, They ſhould enjoy their preſent and ancient Liberties; one of which was, That if any of the Citizens appeal'd from their Magiſtrates to the Imperial Chamber, the Appealer ſhould pay 50 Gilders; but in 1666, the *Swedes* beſieg'd it, and, by the Mediation of neighbouring Princes, the City was obliged to agree to a Treaty, by which their Privileges were leſſen'd, and they were not to enjoy their Freedom as an Imperial City till 1700, when they ſhould be reſtored to them, as *De Ville* informs us.

Their Magiſtracy conſiſts of 4 Burgomaſters, and 24 Common-Council Men, divided into a Burgomaſter, and 6 Common-Council Men for each Quarter of the City. If any of thoſe die, or grow unable to perform, they are oblig'd to chuſe another within 24 Hours after, thus; out of each Claſs, one Elector is choſen by Lot, and obliged to ſwear to chuſe one of the moſt conſiderable Freemen, whom they think fitteſt for the Place; then they are ſhut up in a Chamber, and not ſuffer'd to ſpeak to any Man till the Election is over. This City is ſtrong by Nature and Art; and thô it had no Walls, it would be hard to take it, if well defended; for they can drown the neighbouring Plain with the *Weſer*, which once a Year overflows its Banks, and much improves the adjacent Fields. Their Ramparts are of Earth, the Ditch large and deep, and the Counterſcarp in good Repair. They have a Gariſon of 600 Men, Detachments of which lie without the City, and 200 of the Citizens keep Guard Day and Night. There are abundance of Gardens and Pleaſure-Houſes about this City. Their Territory extends 8 or 10 Miles round, and abounds with good Paſture, well ſtock'd with Cattle; which, with their Trade by Shipping, makes the City rich and populous. Great Floods do many times ſo fill the River with Sand Banks, as puts the City to great Expence to clear it. Ships of great Burden can ſcarcely come within 6 Miles of their Bridge, and there they unload at the Cuſtom-Houſe, whence Foreign Commodities are brought up in ſmall or Flat-bottom'd Veſſels. By this River they tranſport Commodities to ſeveral Parts of the Empire, as well as import them. They are excellent at dreſſing Leather and Cloth, which are frequently brought for that End from other Parts. They abound alſo with Fiſh taken in the Sea and *Weſer*, have every Month ſeveral Sorts of Fiſh in Seaſon, and many Thouſands of Salmons and Lampries are taken Annually within the Town; which being pickl'd or dry'd, are exported with other Commodities.

All the Magiſtrates, and moſt of the Inhabitants, are *Calviniſts*; but out of Complaiſance to the King of *Sweden*, the *Lutherans* are allow'd the Cathedral, under which there is a Vault, where dead Bodies keep uncorrupted 60 or 70 Years.

Their chief Commodities are Corn, Minerals, Wool, Timber, Leather, and Linen, brought hither from *Oſnabrug*: 163 of their Yards make 100 of *Engliſh*. The Cuſtom of ſwearing New-comers by Bread and Salt, and of making them free on paying a Fine of good Liquor to the Company, is ſaid firſt to have begun here, and is ſince become general in the other Hans-Towns. Their Current Money is that of the Empire and *Sweden*. They have a little Coin of their own, worth about a Halfpenny, which they call a *Grot*. They have a Rix-Dollar of 48 Stivers, 120 of which are equal to 100 Rix-Dollars of *Amſterdam*.

Their

Their Arms are in a *Field-Gules*, a *Key-Argent*, to denote that they can open or ſhut the Paſſage of the *Weſer*. This City lies in Long. 29. Lat. 53. 27 *Engliſh* Miles N. W. from *Verden*, and 5 from the Sea.

Other Places of Note in the Dutchy of *Bremen* are,

1. *Verden*, formerly a diſtinct Biſhoprick, but united to this Dutchy, and given to the *Swedes* by the Treaty of *Weſtphalia*. *Bruſchius*, in his Hiſtory of *Germ. Biſh.* ſays, *Charles the Great* eſtabliſhed a Biſhoprick at *Koneude* on the *Weſer*, or, as others ſay, at *Bardewick*, about 776, when ſoon after it was removed to *Verden*, then a ſtrong and populous City. *Crantius* ſays, the firſt Biſhop was *Swibert*, an *Engliſh-man*, who died in 708, and was ſucceeded by *Patto*, a *Scotſman*; but *Bruſchius* and *Emmius* contradict this, and ſay, *Swibert* was a *Friſelander*. This City, which gives Name to the Principality, lies on the *Aller*, by which Goods are brought to it from *Bremen*. 'Tis a pretty large Town, was formerly an Imperial City, but afterwards ſubject to its own Biſhop. Count *Tilly*, the Imperial General, took it in 1626 by Storm. The Imperialiſts took it again in 1631; ſince which, it has never recover'd its ancient State. The *Swedes* took it in 1634, and kept it till 1678, that the Duke of *Brunſwick* ſeiz'd it; but reſtor'd it again to the *Swedes* in 1679, for which he had the Bayliwick of *Teddinghouſe*, betwixt the *Aller* and *Weſer*. It lies 40 *Engliſh* Miles S. from *Stade*, and about 40 N. from *Zell*.

2. *Ottersberg*, a ſmall fortified Town, 16 Miles E. from *Bremen*, with a ſtrong Caſtle, formerly the Archbiſhop's Reſidence. *Chytræus* ſays, it join'd with *Bremen* for many Years againſt their Archbiſhop; but ſubmitted on Conditions in 1547. 'Twas taken twice by the Imperialiſts, and once by the *Swedes*, in the *German* Civil Wars.

3 *Rottenberg* or *Rötterberg*, a ſmall Town on the *Wein*, 4 Miles from *Ottersberg*, 20 E. from *Bremen*, and 15 N. from *Verden*, at firſt a Biſhop's Palace, which was fortified, and the Village Walled in by *Bertold*, their 49th Biſhop, about 1500. It has become pretty populous, and a Place of Trade.

4. *Buxtehude* on the *Eſſa*, near the *Elb*, in as pleaſant and fruitful a Country as any in *Germany*; ſo that 'tis one of the Granaries of *Hamburg*. The Town is pretty large, with broad Streets: 'Tis ſurrounded with a Ditch, defended with old Towers, now ruinous, and has a Company of Foot in Gariſon. The Duke of *Brunſwick* ſeiz'd it in 1676; but reſtor'd it to the *Swedes* in 1679. It lies 15 Miles W. from *Stade*, and 15 E. from *Hamburg*.

5. *Stade*, the ſecond City of Note in the Dutchy. It lies on the Mouth of the *Zwinga*, and Banks of the *Elb*, in a fruitful Country, and wholeſome Air, 50 Miles N. from *Bremen*, and 25 W. from *Hamburg*. In the Time of the *Romans*, 'twas called *Statio*, becauſe part of their Fleet was poſted there to guard the *Elb*. *Bertius* and others will have it to be the Σταθμὸς τῶν Φρισίων of *Ptolomy*, in Long. 29. and Lat. 51. Deg. 20 Min. which Dr. *Nicholſon* obſerves does not agree to its Situation. It was formerly ſubject to its own Earls and Marquiſſes, and the People of the Town and neighbouring Country were called by the Latins *Stadenſes*, *Stadingi*, or *Stedingi*. In 1234, they revolted, by the Influence of their Clergy, from their Archbiſhop, and after a long and bloody War, in which they engaged ſeveral of their Neighbours, they were forc'd to ſubmit by the Pope's Excommunication, without much Advantage to the Archbiſhop's Title; for *Philip* Duke of *Swabia*, their Earl, thô he annex'd the County to the Archbiſhoprick about 1240, kept the City, and allow'd them their Privileges as an Imperial City, it having been one of the firſt that enter'd into the League of the Hans-Towns. And thus it continued till 1645, that it was taken, thô very ſtrong, by the *Swedes* in one Day, and ſince continued in their Hands till 1676, that it was ſurpris'd by the Duke of *Brunſwick*; but reſtor'd to the *Swedes* in 1679, and that ſame Year was moſt of it burnt down. It was endowed by former Emperors with large Privileges, and particularly to be an *Aſylum* for Malefactors who could eſcape thither. They pretend to a Right of Toll from every Merchant-Ship that goes up to *Hamburg*, which occaſioned a Quarrel betwixt the two Cities, that was afterwards compoſed; ſince which, both enjoy their own Privileges. The great Trade of *Hamburg* did ſo much drein it, that they were forc'd to ſell their Publick Stock,

Digitized by Google

Stock, and ſubmit to the Archbiſhop of *Bremen*: But the *Hamburghers* having affronted the *Engliſh* Merchants, they removed their Trade hither, by which of a ſudden it recover'd its Riches and Grandeur; and thô the *Engliſh* did again ſettle at *Hamburg*, continues in a flouriſhing Condition. The Burgers are accounted the moſt courteous of this Part of the Empire, have good Orchards and Gardens without the Walls, and a large and commodious Haven, capable of larger Ships than go to *Hamburg*. They have a ſtrong Fort at the Mouth of the *Zwinga*, and the Town it ſelf is well fortified. Their Market-place, Town-houſe, and Churches, are well built, and worth a Traveller's View.

6. *Bremen-Verden*, a Wall'd Town betwixt *Bremen* and *Stade*, 12 *Engliſh* Miles from the latter, and 28 from the former. It was built by *Luder* Duke of *Saxony*, and had a Palace, where the Archbiſhop of *Bremen* did frequently reſide. The *Swedes* have a ſtrong Gariſon in the Caſtle, which commands the Plain, and was the uſual Reſidence of the Governor of the Dutchy. Their chief Trade is by Paſſengers betwixt *Bremen* and *Stade*. 'Twas ſeiz'd by the *Danes*, but reſtor'd to the *Swedes* by the Treaty of *Roſchild*.

In this Country lies alſo *Rutzenbuttel*, a ſtrong Fort on the Mouth of the *Elb*, 32 Miles N. W. from *Stade*, belonging to the *Hamburgers*, who have alſo another called *Newwerck* near it.

The Dutchy of LUNENBURG.

BUno, in his Notes on *Cluverius*, ſays, it has the Dutchy of *Mecklenburg*, the Marquiſate of *Brandenburg*, and Part of the Archbiſhoprick of *Magdeburg*, on the E. the Dutchy of *Brunſwick*, the Biſhoprick of *Hildeſheim*, and the Dutchy of *Callenberg*, on the S. the County of *Hoy*, and the Dutchies of *Bremen* and *Verden*, on the W. the County of *Pemyberg*, the Territories of *Lubeck* and *Hamburg*, and the Dutchy of *Sax-Lawenburg*, on the N. Its Rivers are, the *Elb*, the *Aller*, *Elmenow*, formerly called *Linaw*, now the *Aw*, and *Jetze*.

The chief Town, called *Lunenburg*, is thought by ſome to derive its Name from *Luna*, the Moon, worſhip'd there by the Inhabitants; by others from the River *Linaw*, on which it ſtands; and this they ſay, was formerly called *Luna*, from *Iſis* the *Egyptian* Goddeſs, who was worſhip'd here when ſhe came to ſee her Kinſman that was Lord of *Hamburg*, and the neighbouring Country. But to paſs over this Fable, 'tis certain the Inhabitants did formerly worſhip the Image of the Moon; and ſeveral Rivers and Towns in this and the neighbouring Countries derive their Name from *Luna*. The Annals of the Cathedral of *Verden* ſay, this Idol ſtood on the Top of Mount *Calkberg*, and was deſtroy'd by *Ægiſtus*, one of the 70 Diſciples, whom they alledge to have been one of the *German* Apoſtles; but was ſet up again by the Inhabitants when they relaps'd, and at laſt removed by *Swibert*, the firſt Biſhop of *Verden*, who built St. *Mary*'s Monaſtery in its Place about 780.

This Country abounds with Woods and Forreſts, with all ſorts of Deer, Wild Swine, and other Veniſon; and a great Part of it is vaſt Heaths and Waſtes, the largeſt of which lies W. of the City, and is deſart for ſeveral Leagues.

The Inhabitants are reckon'd by the other *Germans* to be the moſt ruſtical both in Habit and Language of any in the Empire; but whatever they were before, it will not appear to be ſo now, eſpecially as to their Cloathing. The *Cheruſci*, part of whom inhabited this Country, contributed much to the Defeat of *Varus*, and the *Roman* Legions. The preſent Inhabitants are accounted good Soldiers, being bred in a cold Climate, and with a ſpare Diet.

Hiſtorians differ as to the Origine of the preſent Form of Government here. Dr. *Nicholſon* is of Opinion, That after the Country was converted in the Reign of *Charlemagne*, they had no other Governors but their Biſhops. *Wittikind*, an Author of Credit, ſays, the Emperor *Otho* I. when he went to *Italy*, left one *Herman*, of Noble Deſcent, to govern *North Saxony*, which contained *Lunenburg*, and the adjacent Countries; and being well ſatisfied with his Government, did upon his Return make him Duke of *North Saxony*. By this means the Great Dutchy of *Saxony* was divided; but the Princes of *North Saxony* ſtill aſſum'd

Digitized by Google

the Title of the whole. *Herman* is ſaid to have had 4 Succeſſors; but *Magnus*, the laſt of them, dying without Heirs-Male about 1106, the Emperor *Henry* V. gave the Dutchy of *Lower Saxony* to *Lotharius*, Baron of *Querfurt*. After his Death, *Henry the Proud*, Duke of *Bavaria*, got the Dutchy, having married *Lotharius*'s Daughter; and being likewiſe Son to the Daughter of *Magnus* above mention'd. His Title was oppoſed by *Albert*, ſirnam'd the *Bear*, Marquis of *Brandenburg*; but *Lotharius* prevail'd, and left the Dutchy to his Son *Henry*, ſirnam'd the *Lion*, famous in the *German* Hiſtory, who enlarged his Dominions from the *Rhine* to a great Part of *Denmark*; and ſome ſay, from the *Adriatick* to the *Baltick*; but he was afterwards reduc'd by the Emperor to *Brunſwick* and *Lunenburg*. *Henry* died in 1195, when his Dominions were divided betwixt his three Sons, *Henry*, afterwards Prince Palatine of the *Rhine*; *Otho*, afterwards Emperor; and *William*, who ſucceeded to *Luneburg* only by the Name of *Lord*; for *Otho* had the City and County of *Brunſwick*, and *Henry* had *Zell*, *Bremen*, and *Stade*.

William died in 1213, and was ſucceeded by his only Son *Otho*, who in 1235 was made Duke of *Brunſwick* by the Emperor *Frederick* II. whoſe *Diploma* is ſtill in the Archives of *Zell*.

William died in 1252, and left two Sons, *Albert* and *John*. *Albert* reſign'd *Lunenburg* to his Brother; after which they were reckon'd diſtinct Principalities, and were for moſt part ſubject to two Princes.

John died in 1276, and was ſucceeded by his Son *Otho*. Here Dr. *Nicholſon* obſerves a Miſtake in Dr. *Hylin*, who reckoning only the 8 Years of *John*'s Government, without taking Notice that *Albert* kept both Dutchies 15 Years, brings *Otho* II. to the Government 15 Years before his Father's Death.

Otho reign'd 53 Years, and dying in 1330, left two Sons, who govern'd jointly 24 Years. *Otho* the eldeſt dying without Heirs-Male, *William* the youngeſt govern'd alone for ſome Years: After which, he reſign'd the Dutchy to *Ludowick* Duke of *Brunſwick*, who married his eldeſt Daughter.

Ludowick died without Iſſue in 1358, and was ſucceeded by his Brother *Magnus*, ſirnam'd *Torquatus*, as the *Atlas Hiſtorique* ſays, in 1368, on Condition that he ſhould proteſt the *Lunenburgers* againſt the Emperor *Charles* IV. and the Duke of *Saxony*: Upon which *Brunſwick* and *Lunenburg* were again united; but *Albert* Duke of *Saxony*, aſſiſted by the Emperor, and claiming the Title as deſcended from the eldeſt Brother's Daughter, recover'd *Lunenburg* by Force in 1372, and held it 14 Years. After his Death, the War continued betwixt the Houſes of *Saxony* and *Brunſwick* for the Dutchy: But in 1388, *Bernard*, Duke *Magnus*'s Son, prevail'd. Soon after this, *Frederick* Duke of *Brunſwick* being ſlain in his Return from *Francfort*, where he was choſen Emperor, *Bernard* ſucceeded to *Brunſwick*, and gave *Lunenburg* to his Nephew *Henry*, who ſhar'd the Government with him before. *Henry* reign'd 16 Years, died in 1416, and was ſucceeded by his Son *William*, who made War on his Kinſman *Otho* of *Brunſwick*, Duke *Bernard*'s Son, and took ſeveral Places in that Dutchy; but a Peace was afterwards concluded, on Condition that they ſhould change Dominions, in 1428.

Otho's Brother *Frederick*, whom *Heylin* makes his Predeceſſor, ſucceeded him in *Lunenburg*; but retir'd to a Monaſtery at *Zell* in 1459, 14 Years after.

Upon this, his two Sons *Bernard* and *Otho* had the Government. The former died within 5 Years; and the latter ſurviving 7 after, left his Son *Henry*, then but three Years old. Upon this, old Duke *Frederick* came out of his Monaſtery in his advanc'd Age, govern'd for his Grandſon 7 Years, and died in 1476. the *Atlas* ſays 1478.

Duke *Henry* being then but 10 Years of Age, was aſſiſted by his Mother for ſome Time; and 10 Years before his Death, which was in 1532, he ſettled the Dutchy on his three Sons, *Otho*, *Erneſt*, and *Francis*. The firſt loving Retirement, reſign'd to the ſecond during his Father's Life for an Annual Maintenance *Erneſt* ſhar'd the Government with *Francis* till 1539, when the latter accepted the Lordſhip of *Gifhorn*, and the Monaſtery of *Iſenhagen*. *Erneſt* brought in the Proteſtant Religion in 1530, died in 1546, and was ſucceeded by his Son *Francis Otho*, who died 13 Years after without Iſſue-Male, and left the Dutchy to his Brothers *Henry* and *William*, who rul'd together for 10 Years; but afterwards ſeparated, and agreed,

Digitized by Google

agreed, That *William* ſhould have *Lunenburg*, and *Henry* the Lordſhips of *Dannenberg*, *Hitzaker*, *Luchaw*, and *Warbke*, and the Monaſtery of *Scharnbeck*.

In 1592, *William* died, and was ſucceeded by his Son *Erneſt*, who in 1611 left it to his Brother *Chriſtian*, Elected Biſhop of *Minden*, who had a proſperous Reign of 22 Years, and added the Principality of *Grubenhagen* to his Dominions. He died in 1633, and was ſucceeded by his Brother *Auguſtus*, Elected Biſhop of *Ratzeburg*, who ſucceeded afterwards to *Brunſwick*, upon the Death of *Frederick Ulrick*. We ſhall ſpeak more of him when we come to *Brunſwick*.

Upon this, *Lunenburg* was given to *George*, Lieutenant-General of the Forces of *Saxony*, and Son to *William* above-mentioned, in 1636. He had 4 Sons. *Chriſtian Ludowick*, the eldeſt, govern'd alone, allowing Penſions to his Brothers. He died in 1665.

George William, his ſecond Brother, ſucceeded, and died without Heirs-Male in 1705.

By the Treaty of *Hildeſheim*, the Dutchies of *Calenberg* and *Grubbenhage* were made over to the third Brother *John Frederick*, who kept his Court at *Hanover*, and died in 1679 without Iſſue-Male. His Daughter *Wilhelma Amelie*, born in 1673, is married to the preſent Emperor *Joſeph*.

Erneſt Auguſtus, the youngeſt Brother, ſucceeded his Brother *John Frederick* Biſhop of *Oſnabrug*, and in 1692 was created Elector. He married one of the moſt accompliſh'd Princeſſes in *Europe*, *Sophia*, Daughter to *Frederick* V. Elector *Palatine*, King of *Bohemia*, by Princeſs *Elizabeth*, Daughter to King *James* I. of *Great Britain*.

This Prince was a great General, a good Patriot of the Empire againſt the Deſigns of *France*, made a great Figure in the Confederate Army on the *Upper Rhine*, and gave likewiſe a powerful Aſſiſtance to the Allies in the *Netherlands*. In Conſideration of which, the late King *William*, by the Influence and Aſſiſtance of moſt of the Proteſtant Princes of the Empire, got him created a Ninth Elector, which the Emperor agreed to, becauſe of his own great Merit, and upon the Solliciation of thoſe Proteſtant Princes and States of the Empire; who conſidering the Danger that might ariſe to their Intereſt by the extinguiſhing of the Proteſtant Branch of the *Palatine* Family, after which the Duke of *Neuburg*, a Papiſt, ſucceeded to that Electorate, they preſs'd it with the more Vigour. Upon this Prince *Erneſt* was declared Elector, and Standard-bearer of the Empire, thô ſeveral Princes, both Proteſtants and Papiſts, oppos'd it.

He was ſucceeded by his Son *George Lewis*, the preſent Elector, born in 1660. He married *Sophia Dorothy*, the only Daughter of his Uncle *George William* D. of *Lunenburg-Zell*; by whoſe Death, in 1705, the Dutchy of *Zell* fell to him. This Prince is likewiſe a great General; and in Conſideration of the Service he has done the Empire, has commanded their Army in Chief for moſt part ſince the Death of Prince *Lewis* of *Baden*, and has been introduc'd into the Electoral College, which his Father could never obtain: His Mother the Electreſs Dowager, being the next of the Royal *Britiſh* Proteſtant Line, has the Reverſion of the Crowns of *Great Britain* and *Ireland* ſettled upon her and her Heirs, if her preſent Majeſty Queen *Anne* die without Iſſue.

The Curious, who have a mind to know more of the Genealogy of this Illuſtrious Family, may find a Tree of it in the *Atlas Hiſtorique*. Some derive it from *Attius*, King of *Alba* in *Italy*, from whom the Emperor *Auguſtus* deſcended by the Mother's Side; but this being uncertain, others derive it from *Hugo* Marquis of *Ferrara*, Father to *Azo* Count of *Eſte*, who was Vicar of the Empire in *Italy* in 970; and another *Azo* the 4th from him, came with the Emperor *Conrad* II. into *Germany*, and married *Cunigunda*, the only Daughter to *Guelph* Duke of *Bavaria*. He was ſucceeded by his Nephew *Guelph the Valiant*; he by another *Guelph*; he by *Henry the Proud*, Duke of *Bavaria*; and he by *Henry the Lion*, who married *Maud*, Daughter to King *Richard* II. of *England*, as we mentioned before, from whom the preſent Family is deſcended. It had ſeveral other Branches, which are now extinguiſh'd: The remaining Branches are, that of *Brunſwick Wolfenbuttel*, the preſent Prince of which is *Anthony Ulrick*; and the Branch of *Bevern*, the preſent Prince of which is *Ferdinand Albert*.

Digitized by Google

The chief Places of Note in this Dutchy are,

1. *Lunenburg*, the Metropolis. Some aſcribe the Foundation of it to *Julius Cæſar*; but this is rejected as fabulous. It is mentioned in the Reign of the Emperor *Henry* II. and afterwards as the greateſt City belonging to *Otho* Duke of *Saxony* about 1073. It was ſaid to have been firſt fortified by *Henry the Lion* in 1189; but had a Caſtle on the Mountain of *Calkberg*, which lies near it, ſince 1076. It was formerly an Imperial City, but is now ſubject to its own Prince, and allowed great Privileges. 'Tis about two *Engliſh* Miles in Compaſs, of an oblong Form, the Streets broad, and moſt of the Houſes well built. The Town-Houſe is a neat Structure, and over againſt it ſtands the Duke's Palace. It has alſo a fine Univerſity, formerly a Monaſtery, and a ſtately Bridge over the River *Elminow*, which here is navigable. Their chief Trade is in Salt, which is made from Salt-Springs that riſe within the Walls. Their Salt-Houſes are fenc'd, and conſtantly guarded, as being the main Support of the City, a conſiderable Branch of the Duke's Revenue, and a conſtant Employment for a great many Poor. It lies in Long. 30 ¼. and Lat. 53. 28 Miles S. E. of *Hamburg*, 46 N. of *Zell*, 14 S. W. of *Lawenburg*, and 65 N. of *Brunſwick*.

2. *Bardowick*, a Mile from *Lunenburg*, now a Village, but formerly a ſtrong and populous City. Some reckon it to have been the firſt City in *Saxony*, and built 990 Years before Chriſt. It had 9 Churches, of which the Cathedral only is left. Over the Gate, there are ſome barbarous Latin Verſes, in an old *Gothick* Character, which alledge it was built 235 Years before *Rome*, and that it was deſtroyed by *Henry the Lion* in 1189. Some derive the Name from *Bardo*, an ancient Knight-Errant; but *Meibomius* derives it from an ancient People in that Country called *Bardi*: But 'tis more probable, that it was a College of the ancient Poets called *Bardi*. In the Cathedral, there are 8 Reſidentiary Canons, and a few Vicars.

3. *Ultzen*, a neat little Town, mid-way betwixt *Lunenburg* and *Zell*. It was formerly called *Lawenwald*, i. e. *Lion-Foreſt*, as appears by their Records, and an Inſcription on the Town-Hall. It had its preſent Name from the neighbouring Monaſtery of *Oldenſtadt*, formerly called *Old-Ulſen*. In 1646, moſt of the City was burnt down, and never ſince wholly rebuilt; but the Streets are larger, and the Houſes more ſplendid and regular, than before. They pretend, that the firſt *Engliſh Saxons* went from hence to *Britain*; and thoſe who returned, hung up a gilt Tin Ship in the Market-place, as a Memorial of their Succeſs, which continued there till the above-mentioned Fire.

4. *Zell*, on a Sandy Plain, near the Conflux of the *Aller* and *Fukſe*, which fall into the *Weſer* below *Verden*. It lies in Long. 30. and Lat. 52 ½. 30 Miles S. from *Lunenburg*, 60 S. W. from *Hamburg*, 28 N. from *Hanover*, and 29 N. E. from *Brunſwick*. Some derive the Name from its having been a Cellar, which is the Signification of the *German* Word; but in a Charter of 1203, in the Duke's Archives, 'tis called *Tſelle*. It conſiſts of three Streets, which lie parallel, and is well fortified; the Ramparts large, and well mounted with Cannon. The D. has a Palace here, which ſtands near the Gate of *Hanover*: 'Tis a ſquare Building, moated round, and has 4 Platforms. In the lower Court, beyond the Ditch, there is a very fine Riding-Houſe; and there are many fine Gardens, Orchards, and Grotto's, near the Palace. It was built in 1485 by Duke *Henry*. The chief Courts of Judicature are held here.

5. *Walſtrad*, i. e. *Walo's-Croſs*, formerly a Monaſtery, built by *Walo*, a Prince of *Anhalt*, in 986, as appears by an Inſcription on his Statue in the Church. It is now a conſiderable Town, ſeated in a pleaſant Valley, encompaſſed with Woods and Mountains. Their chief Trade conſiſts in Honey, Wax, Wool, and Beer.

6. *Harburg*, on the *Elb*, over againſt *Hamburg*, with a ſtrong Caſtle. The Town is fortified, and is the ſtrongeſt Frontier of the Country on this Side, thô the Fortifications be not very good. 'Tis populous however, becauſe the Inhabitants have great Privileges.

7. *Dannberg*, on the *Jetze*, a League above where it falls into the *Elb*, is the chief Town of the County of that Name, which was given to *Otho* D. of *Brunſwick* in 1462, by *Nicholas* Count of *Dannberg*.

B. Snack.

Digitized by Google

8. *Snackenburg*, belonging to this County, a large Trading Town, on the Confluence of the *Elb* and the *Wecks*.

The Counties of *Heya*, *Diepholt*, and *Schawenburg*, in *Weſtphalia*, belong alſo to the Duke of *Lunenburg*: But we refer the Deſcription of them to our Account of *Weſtphalia*.

The Dutchy of MECKLENBURG.

BUno on *Cluverius* ſays, it has *Pomerania*, and Part of the Marquiſate of *Brandenburg*, on the E. the Dutchies of *Lawenburg* and *Holſtein* on the W. the Marquiſate of *Brandenburg* on the S. and the *Baltick* on the N. Its Rivers are, the *Elb* and the *Warnow*.

Geographers can ſcarce tell where the Place lies which gave Name to this Dutchy; but Hiſtorians ſay, there's a ſmall Village ſo called near *Wiſmar*, and was formerly a large and populous City. *Cluverius* and *Bertius* reprove thoſe who render the Name of *Mecklenburg* by *Megalopolis* or *Megapolis*, as if it had taken its Name from its Largeneſs, ſince in *German* it ſignifies only a Town of Factors or Brokers, being a Place of great Trade while the *Vandal* Princes reſided there; and *Lindeburgius* alledges, but without good Authority, that it was 8 *Engliſh* Miles long, and 20 in Circumference.

This Country is divided betwixt the two Dukes of *Guſtrow* and *Swerin*. It has more of Profit than Pleaſure, abounds with Corn, Fruit, Fiſh, and Fowl; but the Air is unwholeſome in Summer, and very cold in Winter. It has the Advantage of the *Baltick*, many Rivers and large Lakes, which abound with Fiſh: One Inſtance of which is, That at the Marriage of *Helen*, Daughter to the Elector *Palatine*, with the Duke of *Mecklenburg Swerin*, 5000 freſh Breams, newly taken out of the great Lake near *Swerin*, were ſerv'd up at Table.

Some derive the Dukes of *Mecklenburg* from *Anthyrius*, one of *Alexander the Great's* Generals, becauſe they bear a Horſe's Head in their Arms, which they will have to be that of *Bucephalus*. They ſay, he was the firſt Duke of the *Heruli* who inhabited this Country, and founded the City of *Mecklenburg* 300 Years before Chriſt, from whom, after ſeveral Generations, deſcended *Bilingus*, a Potent King of the *Vandals*, whoſe Mother, they ſay, was Siſter to *Charlemain*. They add, That he brought in Chriſtianity; but afterwards he and his Subjects apoſtatiz'd. Their next famous Prince was *Godeſchalk the Pious*, who preach'd to his People, and was murder'd by them in 1066. From him, among others, deſcended *Henry* II. who died in 1228, and left two Sons, *Nicholas* and *John*: From *Nicholas* came the ſucceeding Princes of the *Vandals*, till *William*, the laſt of the Line, died in 1430. From the latter, called *John*, are deſcended the preſent Dukes of *Mecklenburg*. His Son *Henry*, who was 26 Years Priſoner among the *Turks*, was Father to *Henry the Lion*, whoſe Sons *Albert* and *John* were made Princes of the Empire by *Charles* IV. in 1349, on Condition of ſubmitting to its Laws, and aſſiſting him. *Albert*'s eldeſt Son, *Albert* II. was choſen King of *Sweden*, and afterwards taken by *Margaret* of *Denmark*; but releas'd, on paying a great Ranſom. His Brother *Magnus*, whom *Chytræus* calls a great Prince, in Deed as well as Name, was advanced to the Government, and ſucceeded by his Son *John*, who founded the Univerſity of *Roſtock* in 1469. His Succeſſors, *Henry the Fat*, and *Magnus* II. after the Death of *William*, the laſt Prince of the *Vandals*, ſeiz'd the whole Dutchy. *John Albert*, Grandſon to this *Magnus*, brought in *Lutheraniſm* in 1547, and gave the Revenues of the Abbies to the Univerſity of *Roſtock*. His Son *John* III. ſucceeded, and left two Sons; the eldeſt, *Adolph Frederick*, married *Anne Mary* Counteſs of *Eaſt-Frieſland*, by whom he had *Chriſtian Ludowick*, the Duke of *Mecklenburg Swerin*; and the youngeſt, *Guſtavus Adolphus*, ſeated himſelf at *Guſtrow*.

The *Atlas Hiſtorique* has a Tree of this Family; but reckons nothing of the Genealogy certain till the Time of *Udo* K. of the *Heruli*, who inhabited Part of this Dutchy, from whom the preſent Line is deſcended. They enjoyed the Title of Kings of the *Heruli* or *Obotrites* till about 1150, that the Duke of *Saxony* and Marquis of *Brandenburg* forc'd *Pribiſlas* to renounce the Title of *King*, and take that of *Duke*. The Branch of the Princes of the *Vandals*, and of the Branch of *Stargard*, were united in the Branch of *Mecklenburg* about 1429. The Branch

Digitized by Google

Branch of *Guſtrow* iſſued about 1558, and was extinguiſh'd laſt Year. The Branch of *Swerin* iſſued about the ſame Time, of whom *Frederick William*, born in 1655, is the preſent Prince. The Branch of *Strelitz* iſſued about 1658, and the preſent Prince is *Adolph Frederick*, born in 1686.

The ſame Author ſays, this Dutchy was anciently inhabited partly by the *Varini*, and partly by the *Angli*, who were chas'd thence by the *Heruli*. The Country he ſays is about 45 *German* Leagues in Length, and 30 in Breadth. The Dukes, who formerly govern'd independently, have had a Seat in the Diet of the Empire ſince 1349. It makes Part of the Circle of *Lower Saxony*, where they have a double Suffrage; and *Strelitz* has alſo a Voice. Their Titles are, Duke of *Mecklenburg*, Prince of *Wenden*, *Schwerin*, and *Ratzilburg*, Count of *Swerin*, Lord of *Roſtock* and *Stargard*. The Principality of *Guſtrow*, and the Dominion of *Strelitz*, do alſo depend upon it.

Dr. *Nicholſon* obſerves, That theſe Princes had Strength enough to ſecure themſelves, and over-awe their Neighbours, had they kept a good Correſpondence. *Chriſtian Lewis* turn'd Papiſt in 1663, which heighten'd the Difference with the Houſe of *Guſtrow*. He died without Iſſue in 1695, as *Guſtavus Adolphus*, the Chief of the Houſe of *Guſtrow*, did in 1696, which has occaſioned the preſent Differences about the Succeſſion betwixt the Sons of *Frederick* late Duke of *Mecklenburg Krabro*, and *Adolphus Auguſtus* Duke of *Strelitz*, of the ſame Line.

The chief Places in this Dutchy are,

1. *Lubeck*, an Imperial City, and Chief of the Hans-Towns. Some derive the Name from *Luba*, a Fiſherman, who firſt ſettled here; but the moſt probable Opinion is, that 'tis ſo called from *Lob-eck*, which in *High-Dutch* ſignifies a Point of Land, which agrees with its Situation. The *Poliſh* Hiſtorians ſay, their Princes having conquer'd this Part of *Germany*, firſt built a Fort, and then a Wall'd Town here; but the *Germans* ſay, That *Godeſchalk*, a K. of the *Vandals*, founded it in 1040; but was a conſiderable City when taken by *Crito*, a Pr. of *Rugen*, ſome ſay in the 11th, and others in the beginning of the 12th Century: But Dr. *Nicholſon* ſays, it never had a Charter till after it was ruin'd by *Ratzo*, a Prince of *Rugen*, in 1134, and rebuilt by *Adolph* II. of *Holſtein* in 1140; but was afterwards obliged to ſurrender to *Henry* of *Saxony* and *Bavaria*, ſirnam'd the *Lion*, who being ſwelled with Succeſs, join'd with the Pope againſt the Emperor *Frederick Barbaroſſa*: Upon which he was proſcrib'd, and deſpoil'd of moſt of his Dominions; and the Emperor took *Lubeck*, which was reſtored to *Henry* after the Emperor's Death It was afterwards taken by *Waldemar* of *Sleſwick*, Brother to *Canutus* of *Denmark*; but not being able to bear the Severity of the *Danes*, they ſubmitted to the Emperor *Frederick* II. who reſtor'd their Privileges, which it has enjoy'd ever ſince. The Biſhoprick of *Oudenburg* in *Wagerland* was removed hither in 1163; and ſince 1596, has for moſt part been poſſeſſed by a Son of *Holſtein*. There is no City in the N. of *Germany* equal to this for Beauty, Uniformity of Buildings, and pleaſant Gardens and Groves: The Streets are ſtraight and even, the Houſes of Brick, cover'd with Tiles, are generally high, and adorn'd with Sculpture. Moſt of it was burnt in 1238: Since which, the Senate made an Order, That no Houſes ſhould be built of Timber, or cover'd with Thatch. They have a publick Conduit, from whence Water is convey'd by Pipes into every private Houſe; which Example has ſince been followed by *London*, and other great Cities of *Europe*. Several of the Streets are adorn'd with Rows of Tile-Trees on each Side. They have about 20 Churches well built, and adorn'd with high Steeples or Spires. The Cathedral, dedicated to St. *Mary*, is of as good Architecture as moſt in *Germany*. The City is large, but more long than broad; the Fortifications are ſtrong, and conſiſt of good Baſtions and Fauſſebrays, with a deep and large Ditch. They have no Counterſcarp or Half-Moon, but one at the Gate of *Hamburg*. The Haven is defended by Ramparts, and capable of great Merchant-Ships, which come up to *Trave*, 8 or 10 *Engliſh* Miles from the Sea, which occaſions a great Trade here; ſo that with *Hamburg*, they continually employ almoſt 600 Veſſels of their own. The Reformation was brought hither in 1561: Since which, their Biſhops have been Proteſtants. The Chapter has only a Shadow of Election; for,

Digitized by Google

for, as we have heard before, the See is devolved as an Appennage upon a Son of *Holſtein*, who is called Duke of *Eutin*, from the Place of his Reſidence, about 16 Miles from the City: But the Chapter reſides in the Town. His Revenue is about 10000 Crowns *per Annum*; but he is the only Proteſtant Biſhop in *Germany* who has the Power of a Dioceſan, and Eccleſiaſtical Juriſdiction. This City defended it ſelf bravely againſt the *Danes* in 1500, and 1519. Before the Time of *Guſtavus Ericſon* of *Sweden*, it held the Ballance betwixt the two N. Crowns; but ſince that Time, the Cities of *Hamburg* and *Wiſmar* have got much of its Trade. Their Beer is extream good, tranſported to other Parts, and is us'd medicinally for Wounds and Bruiſes: 'Tis ſold by the Barrel, which contains about 44 *Engliſh* Gallons: 160 of their Ells make 100 of ours. Their Corn is meaſur'd by the Laſt, which makes 10½ *Engliſh* Quarters. Their Government is by 12 Burgomaſters, and 16 Senators, whoſe Office is for Life. The former are either Doctors of the Law, or grave Gentlemen of the City. The latter are half Lawyers, half Gentlemen. Their Territory is about 60 *Engliſh* Miles, in which there are ſome ſmall Towns. They have a Gariſon of 7 or 800 Men, and take Place in the Diet alternately with *Worms*. A remarkable Treaty of Peace was concluded here in 1629 betwixt the Emperor and King of *Denmark*.

The College of the Hans-Towns is kept here. The League betwixt them began in 1164, for mutual Defence, and carrying on their Commerce, and was made up of 70 or 80 in ſeveral Countries. The 4 Towns in which they firſt eſtabliſh'd their Factories, were, *London*, *Bruges*, *Norwerge*, and *Novogorod*. In 1428, they ſet out 250 Ships of War againſt *Erick* X. of *Denmark*; but *France*, *Spain*, *Denmark*, *Sweden*, and *England*, having broke off the Towns of their Dependance from the League, thoſe of the Empire continued in it; ſince which, *Lubeck* has been the chief, keeps their common Stock rais'd by Contribution, with their Records and Alliances: *Lubeck*, *Cologne*, *Brunſwick*, and *Dantzick*, are the chief; and when they think fit to call an Aſſembly, they give Notice to the reſt. They meet once in three Years. The Towns of the firſt League were, *Antwerp*, *Dort*, *Amſterdam*, *Rotterdam*, *Bruges*, *Oſtend*, *Dunkirk*, *Calais*, *Rouen*, *St. Malo*, *Bourdeaux*, *Bayonne*, *Marſeilles*, *Barcelona*, *Sevil*, *Cadix*, *Lisbon*, *Leghorn*, *Meſſina*, *Naples*, *London*, and others of leſs Note. The chief Towns of the preſent League are, *Lubeck*, *Cologne*, *Brunſwick*, *Dantzick*, *Hamburg*, *Roſtock*, *Weimar*, *Lunenburg*, *Stettin*, *Gripſwalde*, *Wiſel*, *Oſnabrug*, *Dortmund*, *Paderborn*, *Northauſen*, *Ruremond*, *Bremen*, *Magdeburg*, *Hildeſheim*, *Goſlar*, *Minden*, *Emmerick*, *Coln*, *Thorn*, *Coningsberg*, *Riga*, and ſeveral others.

2. *Wiſmar*, betwixt *Lubeck* and *Roſtock*, about 21 *Engliſh* Miles from each. Some derive the Name, according to *Saxo Grammaticus* and *Crantzius*, from *Wiſſimir*, a *Poliſh* or *Vandal* Prince, who, after defeating the *Danes*, built this Town: But this is contrary both to Hiſtory and Chronology; ſo that the Name comes probably from *Wiſmeer*, which ſignifies a ſecure Part of the Sea, ſuch as this Town is built on, as Dr. *Nicholſon* obſerves; and adds, That it was probably built about 1238, or 1250, by *Gunceline* II. of *Swerin*, out of the Ruins of *Mecklenburg*. Afterwards *Henry* of *Mecklenburg*, called *Hieroſolymitanus*, becauſe of his Exploits in the *Holy Land*, modelled this City about 1266, after the Government of *Lubeck*; ſo that in a little Time it became one of the chief Hans-Towns, was the Harbour for their Men of War, and fortified at their Expence, which made it almoſt impregnable. It was taken in 1629 by *Wallenſtein*, the Imperial General, but retaken in 1632 by the Duke of *Mecklenburg*, with the Aſſiſtance of the *Swedes*, to whom, by the Treaty of *Munſter*, it was given up, with other Places; but was ſince taken by *Chriſtian* V of *Denmark*, and agreed to be re-deliver'd to the *Swedes* by the Treaty of *Fountainbleau* in 1679; and by a poſterior Treaty that ſame Year in *Denmark*, it was left in the Hands of the *Danes* for Arrears due by the *Swedes*, and continues ſtill in their Hands. It is a Hans-Town, and its Harbour reckon'd the beſt in *Germany*. It lies among Fens, in Long. 32¾. Lat. 54. 40 *Engliſh* Miles S. W. from *Roſtock*, 12 N. from *Swerin*, and 60 N. E. from *Hamburg*. 'Tis well fortified, and has a ſtrong Citadel, with 5 regular Baſtions.

3. *Roſtock*,

Digitized by Google

3. *Roſtock*, which the *German* Antiquaries ſay is the *Lacinium*, *Lacilburgium*, and *Rhodopolis* of the *Romans*; but with little probability. Some derive it from *Roſtzogz*, which in the *Wendiſh* Language ſignifies the Conflux of two Rivers; but *Lindeburgius*, which is more probable, derives it from *Rotzſtock*, a red Pillar, worſhip'd by the Pagan Inhabitants. Dr. *Nicholſon* ſays, That in 329, it was only a ſmall Village of Fiſhermen on the Banks of the *Warna*, and advanced to a City by *Godeſchalk* King of the *Heruli*, and enlarged by his Succeſſors about 1160. *Burewinus*, one of his Succeſſors, wall'd and modell'd it by the Laws of *Lubeck*, as appears by his Charter, dated 1218. 'Tis a Hans-Town, and divided into 3 Parts, called the *Old*, *New*, and *Middle* City, conſiſting of 14 Streets, and many Thouſands of ſtately Houſes. The Citizens value themſelves on 7 times 7 remarkable Things, *viz.* 7 Doors in St. *Mary*'s Church, 7 large Streets which center in the great Market-place, 7 Gates out to the Country, 7 Bridges over the *Warna*, 7 Towers on the Town-Hall, 7 great Bells belonging to the Town-Clock, which chime at certain Hours, and 7 vaſt Tile-Trees in the common Garden.

Their chief Commodity is Beer, which they export in great Quantities. They have 250 Privileg'd Brewers, who they ſay brew as many Thouſand Tuns every Year, beſides what particular Perſons brew for their own Uſe.

Their Univerſity, now one of the largeſt and beſt in *Germany*, was founded in 1419. The City was at half the Charge, and have the Choice of half the Profeſſors, who are 18 in all; and their Rector *Magnificus*, or Chief Magiſtrate of the Univerſity, is choſen every Half-Year by Turns out of thoſe Profeſſors. He appoints their Meetings, takes Care of collecting and diſburſing their Money; and in great Matters, is aſſiſted by a Promotor, choſen from among the eldeſt of the Profeſſors. They had their Charter from Pope *Martin* V. The Biſhop of *Swerin* is their perpetual Chancellor, and deputes a Vice-Chancellor from among the elder Profeſſors. Among other Learned Men bred here, were the famous Hiſtorians, *Crantzius*, *Poſſelius*, and *Chytraus*. The Government of the City is by 24 Aldermen, choſen out of the Nobility, Scholars, or Merchants: 4 of theſe are Burgomaſters, 2 Chamberlains, 2 Stewards for the River, and 2 Judges. The Chamberlain collects and pays the Money for repairing the Publick Buildings. The Stewards over-ſee the Haven at *Warnemund*, and take Care of cleaning the River; and the Judges determine all Cauſes Civil and Criminal. Theſe 24, call'd the Upper Houſe, determine all Controverſies, coin Money, and chuſe Officers; but there is beſides a Lower Houſe of 100 Common-Council Men, choſen out of the inferior Tradeſmen, who are ſummon'd, and give their Opinions in extraordinary Matters of common Concernment. The River is navigable to the Walls; but their large Ships come no further than *Warnemund*, a little Town 7 Miles diſtant, at the Mouth of the River. The *Swedes* built a Fort here after the Treaty of *Munſter*, and by their Garriſon demanded a Toll of all Ships, which very much leſſen'd the Trade of the Town. The *Mecklenburg* Miniſters endeavour'd to have this redreſs'd at the Treaty of *Nimeguen*; but without Effect. This City and Dutchy was ſeiz'd by the Imperialiſts in 1649; but retaken by the *Swedes* in 1631. Moſt of the Town was burnt in 1677, but is ſince rebuilt.

4. *Swerin*, on a great Lake, which takes its Name from the Town, about 50 *Engliſh* Miles S. W. from *Roſtock*, 28 W. from *Guſtrow*, and 12 S. from *Wiſmar*, in Long. 31 ½. Lat. 53 ¾. and is the Capital of the Principality of that Name. It was fortified by *Henry the Lion*, Duke of *Saxony*, ſoon after its firſt Foundation, in 1163, and beſtow'd, with its Territories, on *Guncelinus*, one of his Generals, whom he made Earl of *Swerin*. He was ſucceeded by his Son *Henry*, Favourite to the Emperor *Otho* IV. He took *Waldemar* King of *Denmark* in his own Kingdom, brought him bound to *Saxony*, and kept him in the Caſtle of *Danneburg*, till his Subjects had almoſt beggar'd themſelves by paying his Ranſom. *Otho*, the laſt Earl of this Family, died in 1355, and his only Child being married to *Albert* Duke of *Mecklenburg*, brought the Earldom to that Duke. The Biſhoprick was removed from *Mecklenburg* to this City about 1062; and *Joannes Scotus*, their firſt Biſhop, was murder'd by the *Wendiſh* Apoſtates in 1066, who cut off his Hands and Feet, and left him in that Miſery;

Misery; so that he died some Days after. The See was vacant for 84 Years, till the Emperor *Conrad* III. sent *Eberhard* thither. He was succeeded by one *Benno* or *Bruno*, when *Henry the Lion* built and endowed a new Cathedral, and drove the Pagan *Mecklenburgers* by Thousands into a Place of the Lake of *Swerin*, where they were baptiz'd by *Benno*, from whence that Part of the Lake is still called the *Font*. The following Bishops had their Residence at *Butzow*, a Fort and considerable Town near *Gustrow*, till by the Treaty of *Munster* it was secularizi'd, and given to the Duke of *Mecklenburg*. It is the usual Residence of the Duke of *Mecklenburg Swerin*. The Religion of this Country is *Lutheranism*.

Other Towns here are, 1. *Domitz*, in an Island made by the Conflux of the *Elb* and *Elde*, with a strong Castle on the *Elb*, where the Duke of *Mecklenburg Swerin* obliges Ships to pay Toll. 2. *Rutzow*, near *Gustrow*, where the Bishop of *Swerin* ordinarily resided. 3. *Travemund*, on the Mouth of the *Trave*, which is broader than the *Sein* at *Paris*, 8 *English* Miles from *Lubeck*, on which it depends. The Town is small, but fortified with 4 good Bastions. 4. *Mecklenburg*, formerly mentioned, once a great Town, that gave Name to the whole Dutchy.

5. *Gustrow*, a well fortified Town, with a Castle, about 20 *English* Miles S. from *Rostock*, and is remarkable for little but being the Residence of the Duke of *Mecklenburg Gustrow*, whose Line was extinguish'd in 1688. The Prince *Gustavus Adolphus*, who was born in 1633, and died in 1695, was a Prince of great Learning and Bravery. His Son *Charles* died in 1688, without Issue. His Sister *Louisa*, born in 1667, married *Frederick* IV. the present King of *Denmark*, in 1695.

Other Towns of less Note in this Division are, 1. *Ribnitz*, on the bottom of a Gulph, form'd by the *Baltick*, N. E. from *Rostock*. 2. *Storgarde*, a small Fisher-Town on the same Gulph. 3. *Worew*, an ancient Town on a Lake towards the Frontiers of *Brandenburg*. 4. *Plawen*, on a Lake of the same Name, from whence the River *Elda* rises.

The Arms of *Mecklenburg* are, *Or*, a *Buffalo's Head*, the Front *Sable*, the Curls and Horns *Argent*, for *Mecklenburg*. *Azure*, a *Griphin Or*, for *Rostock*. Cut in the first *Azure*, a *Griphin Or*, in the 2d *Argent*, fill'd up with Sinople or Green, for *Swerin*. *Gules*, a-cross *Parre*, for *Ratzenburg*. *Gules*, a naked Arm Carnation, clad above the Elbow with a Sleeve of Silver, ty'd with a Ribbon of the same, issuing from a Cloud, moving from the sinister superior Point of the Chief, holding in the Hand a Black Ring, for *Swerin*. *Or*, a Buffle of *Sable*, *Langued-Gules*, Horn'd and Crown'd the same, for *Vandalie*. Over the whole, cut *Gules* on *Or*, for the Lordship of *Stargard*.

The Dutchy of BRUNSWICK.

THE Country, properly so called, comprehends only the Territories subject to the Dukes of *Brunswick* and *Hanover*, or *Calenberg*; but the Principality of *Grubenhagen*, and the Counties of *Blankenburg* and *Reinstein*, are compris'd under the Name, because subject to the Dukes of *Zell* and *Wolfembuttel*, who have both the Title of Dukes of *Brunswick*. This Country has *Hesse* on the S. *Lunenburg* on the N. *Magdeburg* on the E. and the River *Weser* on the W.

The Dutchies of *Brunswick* and *Hanover* are populous and fruitful. Wheat and Rye grow sometimes to such a Height here, as to exceed the tallest Man on Horseback. A great Part of the *Hercynian* Forrest did formerly run through this Country, and is now divided into smaller Woods and Parks, which afford Timber, Fewel, store of Deer, Wild Swine, Hares, *&c.* and Fowl of all sorts. They have also rich Mines of Iron, Salt and Coal. Their chief Rivers are, the *Weser*, by which Goods are brought from *Bremen* to *Brunswick*, with the *Leine*, *Innerste*, *Oker*, and some of less Note, all abounding with Fish. The Ruins of many old Castles and Forts are found on the Tops of Hills and ragged Mountains in this Country, which some take to have been built by the *Romans*, and others by the *Saxons*, during their Wars with *Charles the Great*. The Inhabitants are now, as of old, a stout and warlike People, and of a larger Size than most other *Germans*. They are us'd to cold Lodgings, and coarse Diet, which is usually dry'd Swine's-Flesh, and Sausages, whence

Digitized by Google

their Neighbours call them Bacon-Guts. Their Bread is black, and made of coarse Rye and Wheat. They have no Wine of their own, but abundance of good Beer. They are not so complaisant as many other *Germans*, but hospitable and sincere.

In the Description of *Lunenburg*, we gave an Account of the Origine of the Princes of this Family, and how the Families came to be united. They are said to be the only Remains of the Family of the *Guelphs*, formerly Dukes of *Bavaria* and *Saxony*; of which some Historians give this Romantick Account, *viz.* That *Germentrudis*, Countess of *Altorf* in *Swabia*, having accus'd a poor Woman of Adultery, and caus'd her to be punish'd for having 12 Children at a Birth, was soon after deliver'd of 12 Sons her self: Her Husband, Count *Isenbert*, being absent at the Time, she, to avoid the same Scandal, order'd the Midwife to carry out 11 of them, in order to kill them. The Count coming home at the same Time, and asking the Midwife, What she carried in her Apron? She answer'd him, *Welpen*, *i. e.* Whelps; but he insisting upon it to see them, she confessed the Matter; upon which he enjoyn'd her Secrecy, and put them out to Nurse. Six Years after, he invited most of his own and his Lady's Relations to a Feast, and in the midst of their Jollity brought out his 11 Sons, all cloath'd alike. Upon this the Countess own'd her Fault, and was pardon'd. The Count order'd them, in Remembrance of this, to be called *Guelphs* or Whelps. From the eldest of these descended *Henry Guelph* Count of *Altorf*, whom the Emperor *Conrad* II. made afterwards Duke of *Bavaria*.

The Reformation, according to *Luther's* Doctrine, was brought into this Country by *D. Julius*, who died in 1599. Since which Time, they have been zealous *Lutherans*; but those named *Calixti* about *Helmstad*, who are moderate, and have a better Opinion of the *Calvinists*, are much increas'd of late.

The chief Towns are,

1. *Brunswick*. In the Cathedral, among other Monuments, there is an old Parchment Writing, with a brief Account of the most considerable Persons buried here: The first of which is *Dankwarth* Duke of *Saxony*, who is said first to have Wall'd this Town, and call'd it *Dankwarth's-Crost*; but that was properly the Name of the Castle, for the Town derives its Name from *Brune*, his Brother. It was augmented by succeeding Princes, and became one of the most considerable Hans-Towns. The Emperor *Frederick* II. erected the Country into a Dutchy; and *Otho* of *Brunswick*, surnam'd the *Courageous*, granted Liberty to the City to chuse their own Magistrates, and to govern according to their own Laws. After which, they pretended to be independent, which occasioned it to be besieged by the Dukes in 1492, 1550, 1553, 1605, 1606, 1616, &c. and at last it was taken by Duke *Rudolphus Augustus* in 1671. After which, he frequently resided in the Town, and kept a strong Guard in it. It lies on the *Ocker*, in Long. 32. Lat. 52 ½. 8 *English* Miles N. from *Wolfenbuttel*, 85 S. from *Hamburg*, 85 S. E. from *Bremen*, 55 N. W. from *Magdeburg*, 32 S. E. from *Hanover*, and 56 from *Lunenburg*. The *Ocker* runs through it, and the Town is divided into 5 distinct Corporations, govern'd by several Magistrates of their own, and 5 different Courts of Judicature; but sometimes they unite on extraordinary Occasions. The City is rich and populous, and their Houses well built. The Town-House is very magnificent, and the Palace a stately ancient Building. It has many fine Churches; and glories in having been the first Town of Note which embrac'd the Doctrine of *Luther*. 'Tis well fortified, and surrounded with two Walls, and two Ditches.

Their chief Trade is Hides and Mum: The former they have from other Nations, and return them dress'd, being extraordinary good Tanners. Their Mum is of two Sorts; one thin and weak, which is their ordinary Drink; the other they call Ship-Mum, which is very thick, transported into other Nations, and scarce drinkable till purified at Sea. It is brewed with Barley and Hops, and a small Mixture of Wheat. There's a set Number of Brewers, that have the only Power to make it from the beginning of *October* to the end of *March*. They have also another sort of sweet Malt-Liquor in this Country, which they call *Brew-hane*. The City lies in Long. 30. 34. Lat. 52. 36.

Wol-

2. *Wolfembuttel*, the ancient Seat of the Dukes of *Brunſwick*, famous for its ſtrong Fortifications, being accounted one of the moſt impregnable Towns in *Germany*: It conſiſts of two Parts; the firſt called *Arx-Guelphica*, which is the Duke's Palace, and had its Name from Duke *Ethert*, of the Family of the *Guelphs*: The ſecond is called *Henrick-Stadt*, from Duke *Henry* the younger, who founded it. The new Church in this Part of the Town is reckon'd an admirable Piece of Architecture. In a Vault under the Quire, there lie buried 21 Dukes and Dutcheſſes of *Brunſwick* in Coffins of Lead, with Inſcriptions. In the Palace, which is the ſtrongeſt and moſt ſtately that belongs to the Family, the Apartments have rich Furniture, and coſtly Paintings: The Library, founded by their late learned and brave *D. Auguſtus*, is admir'd by all Strangers, and reckon'd one of the beſt in *Europe*. In 1604, Mr. *Hamiſius*, the Library-Keeper, gave an Account, That it contain'd 124000 Volumes, which Dr. *Nicholſon* queſtions, ſince by an Account of it publiſh'd in 1660, as is ſuppos'd by *Conringius*, it contain'd only 27666 Volumes, and 115504 Treatiſes by 56393 Authors. Among the Manuſcripts, which are about 2000, thoſe of the greateſt Rarity are, 1. 438 Folio's of *French* Embaſſies, tranſcrib'd out of the *French* King's Library at the Charge of the Founder. 2. A Latin Pſalter, *In Notis Ciceronianis*. 3. The Four Evangeliſts in *Syriac*, given by *A Kircher* in 1666. 4. An ancient Copy of the *Edda Iſlandorum*, with the *Skialdi* annex'd, much better than that publiſh'd by *Reſenius* in 1665. Beſides theſe, and the like Works of others, there are 41 Volumes writ by the Duke himſelf, whereof 12 are Muſick-Books. He gave alſo a ſhort Account of the moſt conſiderable Authors in his Library, in 4 large Volumes; and in a 5th, an Alphabetical Catalogue of the Authors. He wrote alſo a Commentary on *Trithemius*'s Cryptography, with other Works upon the like Subject, under the covert Name of *Guſtavus Selenus*; and writ another call'd *Schachſpiel*, with a Learned Account of the Antiquity and Myſtery of the *Chefs*; which altogether ſhew how well he deſerved the Character that a Learned Gentleman gave of him in the following Diſtich, writ under his Picture in the Library:

Tota tuos Europa Duces regeſque recenſe:
Hic Senio Cunctos vicit & Ingenio.

He died in 1666, aged 88. Duke *Rudolphus Auguſtus*, his Son, ſucceeded, who is a Mild, Learned, and Religious Prince.

3. *Helmſtadt*, reckon'd the oldeſt Town in *Saxony* next to *Bardewick*. It was built by *Charles the Great* in 782, and had its Name from the abundance of Elms about it. St. *Ludger* was ſent by the Emperor to convert this Country, and the Citizens pretend to ſhow the Church where he firſt preached. Their chief Ornament is the *Academia Julia*, or Univerſity, founded by *D. Julius* in 1566. Among other Privileges granted to it by the Emperor *Maximilian* II. one was, That he ſhould have the Title and Dignity of a Count *Palatine*: Upon which his eldeſt Son, *Henry Julius*, then Biſhop of *Halberſtadt*, was made the firſt Rector, and founded the fair College called *Julium Novum*. Theſe two Dukes furniſhed the Univerſity with a conſiderable Library. Among ſome Hundreds of other Manuſcripts, they have two old Volumes in Vellum, containing the *Pentateuch* in Hebrew, in a very fair Character, for which ſome *Jewiſh* Rabbies, well vers'd in Antiquity, offer'd ſome Hundreds of Rix-Dollars. After the Death of Duke *Frederick Ulrick*, the laſt Prince of the ancient Houſe of *Wolfembuttel*, the Dukes of *Lunenburg* agreed, That each of the Dukes Regent ſhould be Rector in their Turns Year about, and ſo it has continued ſince. No Univerſity in the Empire has bred more Learned Men in one Century than this, nor had more famous Profeſſors; witneſs, *Caſelius*, *Horſtius*, *Forſterus*, *Reinecius*, *Meibomius*, *Stukius*, *Lampadius*, *Horneius*, *Calixti*, *Conringius*, *Cellarius*, &c. This Town lies 24 Miles E. of *Brunſwick* and *Wolfembuttel*, in Long. 31. 16. Lat. 52. 32.

4 *Hanover*, the Metropolis of the Dutchy of *Calenberg*, whence the Duke's Palace was removed hither by *George* Duke of *Brunſwick Calenberg*, upon the Death of the ſaid *Frederick Ulrick*. The ancient Name of the Town was *Lawenrode*, from a neigh-

Digitized by Google

bouring Caſtle, ſubject to the Counts of that Name. About *Henry the Lion*'s Time, it was called *Hanover*, being at that Time a Ferry over the *Lina*, and the Word ſignifying *Have over*. The River divides it into two Parts: The City is handſome, and well built, and is the ordinary Reſidence of the Elector. Moſt of the Houſes are of Timber, interlay'd with Brick or Plaiſter; but they have many that are likewiſe of Brick and Stone. The Streets are regular and broad, and well furniſh'd with Lanterns every where, to give Light in the Winter. The Fortifications are in good Order, and Ravelins before the Gate well mounted with Cannon. The Elector's Palace or Caſtle is at one End of the City, near the Ramparts is a large Building of Free-Stone, with ſeveral ſquare Courts, and fine Stair-Caſes. The Furniture within is very rich, and his Court is one of the moſt ſplendid in the Empire. His Troop of Horſe-Guards conſiſts of 150 proper Men, with good Horſes, and fine Equipage. He has two Regiments of Foot-Guards, of one Battalion each, cloath'd in Red lin'd with Blue; and in Time of Peace he uſually kept 6000 Foot and 6000 Horſe in Pay, before the Dutchy of *Zell* fell to him. The moſt remarkable Churches are, 1. That dedicated to St. *James*, in which there are two Crucifixes with the Pictures of the Apoſtles, and many Saints. 2. That dedicated to the *Holy Croſs*, built of Stone, and much finer and neater than the other: It has a double Row of Galleries round from the Altar, and before the firſt the Hiſtory of the Goſpel, divided into 53 Parts, and painted by the beſt Maſters. This City is enrich'd by the Elector's Court, and 4 Fairs Annually kept here, to which abundance of Foreigners, as well as others, reſort; and they have alſo a conſiderable Trade from *Brewhane*, of which they export conſiderable Quantities. This Town lies about Long. 29. Lat. 52. 20.

5. *Hamelen*, an ancient City on the Mouth of the *Hamel*, and the Banks of the *Weſer*, on the Borders of the Dutchy of *Calenberg*. 'Tis the Key of the Country, and therefore the beſt fortified and gariſon'd of any in the Dutchy. The Records of this City give an Account of a ſtrange Accident which befel them the 26th of *June*, 1284. Being at that Time much peſter'd with Rats, which they could by no means deſtroy, a Stranger at laſt undertook it, on Promiſe of Reward; and immediately taking a Tabrel and Pipe, the Rats follow'd his Muſick to the River, where they were all drown'd; but being deny'd his Reward, he left the Town in a Rage, and threaten'd Revenge: Accordingly he return'd next Year, and by the ſame Muſick entic'd moſt of the Children of the Town after him to the Mouth of a great Cave on the Top of a neighbouring Hill called *Koppelberg*, where he and they enter'd; but were never more heard of. In Remembrance of this ſad Accident, the Citizens for many Years after dated all their publick Writings from the Day they loſt their Children, as appears by many old Deeds and Records. They ſtill call the Street through which the Children paſs'd, *Tabret Street*; and at the Mouth of the Cave there is a Monument of Stone, with an Inſcription in barbarous Latin Verſe, giving an Account of this Tragical Story, by which the Citizens loſt 130 Boys. In 1633, the *Swedes* gain'd a great Victory over the Imperialiſts near this Town; and that ſame Year *George* Duke of *Brunſwick* retook it. It lies 35 Miles N. from *Gottingen*, and 28 S. from *Hanover*, in Long. 28. 10. Lat. 52.

Other Towns here are, 1. *Northeim*, on the *Lein*, a pretty ſmall Town. 2. *Gottingen*, on the ſame River, ſuppos'd to be the *Munitium* of the Ancients. The Imperialiſts beſieg'd it in vain in 1641. 3. *Munden*, on the Confluence of the *Fulda* and *Weſer*. It was almoſt entirely deſtroy'd by the Imperialiſts under Count *Tilly* in 1625. 4. *Lavenſtein*, where there are Salt-Pits. 5. *Calenberg*, with a ſtrong Caſtle, 12 Miles S. from *Hanover*.

The Principality of Grubbenhagen.

IT ſignifies a Wood or Forreſt belonging to the Family of the *Gruhes*, who built a Caſtle there, that gave Name to the Country. 'Tis moſt overgrown with Woods of Fir and Pine, formerly Part of the *Hercynian* Forreſt, now called *Hartz*, becauſe of the great Quantity of Roſin and Pitch diſtill'd from the Trees. In this Country are moſt

Digitized by Google

most of the Mines of Silver, Copper, and Lead, belonging to the Elector. The chief of 'em are, *Rammelsberg*, *Wildman*, and *Zellerfeld*. *Rammelsberg* is a high Mountain near the City of *Goslar*. The Mines here were discover'd by one *Ramme*, a Hunter, whose Horse's Foot struck up a Piece of Ore in 972. Upon which the Emperor *Otho* I. got a Company of *Franks*, who understood Minerals, to refine the Metal, from whom the Town of *Frankenburg*, near this Place, had its Name. The Miners increasing, they found out that of *Wildman* in 1045; and that of *Zellerfeld*, which is the chief, in 1070. The Overseer of the Mines keeps his Court here, and pays the Workmen every *Saturday*. The chief Minerals in those Mines are Silver, Litharge, Lead, and two Sorts of Copper, one melted from the Ore, and the other made by Vitriol-Water, in which they steep great Plates of Iron in Troughs made on purpose. They find many other Minerals here, which yield much Money; but frequently kill the Workmen by their nauseous Smells. The chief of these are, 1. Grey Vitriol. 2. The Ink-Stone, of many Colours; from which two, bray'd and boil'd together, is made Green Vitriol. 3. Another Vitriol, which grows like Icecicles, and is us'd without any further cleansing. 4. Blue Vitriol, from Copper-Ore. 5. White Vitriol, from Lead-Ore. 6. Misy, of the Nature and Colour of Brimstone. 7. Brimstone, from a peculiar Sort of Ore, from whence the *Flores Sulphuris* drop like Icecicles. The chief Town is *Eymbecke*, so called from the Confluence of a great many Rivulets. 'Tis pretty well fortified, and the neighbouring Country abounds with Corn. 'Twas formerly an Imperial Town, but submitted to the Duke of *Brunswick*, to be freed from the Oppression of the Counts of *Welen*. It had formerly a considerable Trade in *Bruhon*. 2. *Grubbenhagen*; the Castle, formerly mentioned, on the *Line*. 3. *Lutterberg*, with the Title of a County towards the Head of that River. 4. *Andreasberg*, a little Town, with rich Iron Mines. 5. *Clausthal*. 6 *Altenaw*. 7. *Osterod*; all inhabited by Miners, who live so much under Ground, that they do not much affect good Houses above it.

The County of Blankemburg *and* Reinstein.

ITS ancient Name was *Hartsgow*, *i. e.* the *Hercynian* County; but the present Name is derived from the Forts of *Blankemburg* and *Reinstein*, and is much contracted in its Boundaries. It lies S. from *Brunswick*, S W. from *Magdeburg*, W. from *Halberstade*, N. from *Thuringia*, and E. from *Hildesheim*.

The Air is very sharp, especially in the Winter, being much exposed to the North Winds; so that the Snow lies on the Mountains till Midsummer. The Inhabitants are strong and vigorous, and many of them live to 100 or 110 Years of Age. The highest Mountain in this Country, and perhaps in *Germany*, is the *Brustertus* of the *Latini*, now called *Broxberg*; concerning which, the common People tell many fabulous Things.

They have little Corn; but the Vallies abound with Cattle, and their Forrests with Venisons of all sorts, and have abundance of Iron Mines.

The greatest Curiosity of Nature here, is a huge Cave betwixt *Blankemburg* and *Elbingerode*, called *Bumanshole*, from *Buman*, the Discoverer. The Mouth is so narrow, that one must creep in, where soon after they come to a dark high Gallery, the End of which was never yet found; tho' some of the Miners have confidently asserted, they have gone as far as *Goslar* under Ground, which is 20 Miles. They say, That a young ventrous Fellow going into it alone, his Light went out, and he wander'd 8 Days before he found his Way back. At his Return, his Hair was perfectly grey, and he told many frightful Stories of Spirits, some of whom condemn'd him to be hang'd, and put a Rope about his Neck; but let him go. Others pretend also to have met with Spirits there, but more civil ones. In this Cave are frequently found large Bones of strange Creatures, which the neighbouring Gentry keep for Rarities; and among others, they found the Skeleton of a Man of a monstrous Size.

Near the Monastery of *Michaelstein*, not far from *Blankemburg*, there are two high Rocks

Rocks fronting one another, which repreſent Monks in their proper Habits, as if they had been form'd by Art, and therefore are call'd the *Monks Craigs*. The Country abounds with high and inacceſſible Rocks, on the Tops of which there are old Forts and Caſtles; but the only habitable one almoſt remaining is that of *Blaikenburg*, where the Duke of *Wolfembuttel* reſides when he hunts. Many of them have been hewn out of entire Rocks. The moſt remarkable of thoſe ruinous Caſtles is that of *Hartſburg*, near the *Brockberg*, which they ſay was built by the *Chauci*, a Branch of the *Saxons*, 300 Years before Chriſt. Here they had alſo a Temple for *Saturn*, repreſented like an old Man, ſtanding bare-foot on the prickled Back of a Ruff, to denote the Security of his Adorers (ſays *Pomarius*) in their hardeſt Undertakings. In his Right Hand he had a Bucket of Water, ſtrowed over with Flowers and Fruits, to ſignify that he would ſend them Rain and Plenty. In his Left he had a Wheel, to ſignify that his Worſhippers ought to live in Unity. *Mechtilde*, Daughter to the Emperor *Henry the Fowler*, writ the Hiſtory of this Idol in a rich Silk Coat of Needle-work, which the *Swedes* took out of the Cathedral of *Goſlar* during the *German* Civil Wars, and carried to *Sweden*. This Idol and his Temple were deſtroyed by Command of *Charlemagne*, and the Name of the Place called *Hartſburg*. In the Time of *D. Julius*, a Salt Fountain was found at the bottom of this Hill: Upon which a ſmall Town was built for the Workmen, called *Julius-Hall*, now grown rich and large by their Trade in Salt, Copper-Kettles, Pots, Wire, *&c.*

Goſlar, an Imperial Town, is ſituate in this Country, on the River *Goſe*, but independent on the Dutchy of *Brunſwick*, and has the ſame Privilege with other Imperial Cities, beſides an Exemption from Tolls in all the Markets of the Empire but three. In all Imperial Writs, 'tis called, *Nobile Membrum Imperii*, and is ſuppoſed to have been built by the Emperor *Henry* I. who had a Palace here. The Houſes are cover'd with a glittering Slate, very ornamental, which in a clear Day dazzles one's Eyes. Moſt of the Inhabitants are Miners, and their Trade conſiſts in digging and cleanſing, and tempering Minerals. It lies 25 Miles S. of *Brunſwick*, in Long 29 ½. Lat. 51. 47 ½.

The Arms of the Elector of *Hanover* and the Duke of *Wolfembuttel*; *Gules*, two *Leopards* Or, *Langued*, for *Brunſwick*. *Gules*, a *Horſe. Argent*, for *Lower Saxony*. Or, a *Lion-Azure*, ſtrow'd with *Harts-Gules*, for *Luneneburg*. *Azure*, a *Lion-Argent* Crown'd, for *Eberſtein*. *Gules*, a *Lion*-Or, with a Border Campone, *Argent* and *Azure*, for *Hamburg*. *Azure*, a *Lion-Argent*, for *Diep-Holtz*: *Argent*, an *Eagle-Gules*, for *Diep-Holtz*. A *Scutcheon-Argent* for the Electoral Dignity. *Gules*, a *Lion-Argent*, for *Lauterburg*: Or, 3 *Eſſets-Gules*, for *Lauterburg*. *Argent*, a *Hart-Sable*, for *Clettenburg*. Quarter'd in the 1ſt and 4th Or, two Bears Feet in *Pale*, in the 2d cut in the upper Part Or and *Gules*, and in the lower Part *Gironne*, *Argent* and *Azure*, for *Huye* and *Bruckhauſen*. *Checkee*, *Argent* and *Gules*, for *Honſtein*. *Argent*, a Branch of Deers-Horns *Gules*, for *Reinſtein*. The like *Sable* for *Blankenberg*. The Helmets Or, a Peacock's Tail, with Branches of Deers-Horns on the Sides, for *Honſtein-Lauterburg* Or, two Bears-Feet, for *Huye*. Or, a *Beam-Argent*, with a Horſe a-croſs it *Argent*, for *Brunſwick*. Or, two *Horns-Argent*, charg'd with 6 Red Enſigns, for *Bruckhauſen*. Or, two Buffle's-Horns, with two Branches of Deers-Horns on the Sides, for *Reinſtein-Blankenſtein*.

MAGDEBURG.

HIſtorians ſay, this is as ancient a City as moſt in *Germany*. Some think, it was founded by *Druſus*, and his Son *Germanicus*, in the Time of *Auguſtus*; but *Pyrckeimer* thinks it older, and to be *Ptolemy's Veſocium*. They who aſcribe its Original to *Druſus*, ſay, it was called *Magdeburg*; in *German*, the Maids Town, the ſame with the Greek *Parthenopolis*, becauſe the Image of *Venus* was there worſhip'd; which, together with its Temple, was deſtroyed by Order of *Charlemagne*, who built St. *Stephen's* Church there, with its Treaſure. An ancient Chronicle of *Brunſwick* deſcribes this Image thus: She was repreſented by a naked Woman, with bright ſhining Eyes, and long yellow Hair, in a gilt Chariot drawn by two white Swans and two white Turtles, a Garland of Mirtle on her Head, a flaming

Digitized by Google

flaming Torch on her Breaſt, a Globe in her Right Hand, and three Golden Apples in her Left. She was attended by three *Graces*, who cover'd one another's Faces with a Veil. The Dutchy of *Magdeburg* takes its Name from this City, and is 60 Miles long from E. to W. and in ſome Parts 30 from N. to S. It has *Brunſwick* on the W. Part of *Brandenburg* and *Saxony* on the E. Part of *Mecklenburg* and *Brandenburg* on the N. *Anhalt* and *Halberſtade* on the S. and the *Elb* runs through the Country.

The Town lies about Long. 31. 25. Lat. 52. 70 *Engliſh* Miles W. from *Berlin*, 45 N.W. of *Wittenberg*, 6 E. from *Brunſwick*, and 60 N from *Leipſick*. It was firſt Wall'd about 940, and enlarged by *Edgitha*, Daughter to the *Engliſh Saxon* King *Edmund*, (Wife to the Emperor *Otho* I.) who ſome ſay founded it. This is confirmed as to the Cathedral Church at leaſt, by Dr. *Brown*'s Obſervations, who ſays, 'tis a very fair Structure, built after the *Engliſh* Model, which has the Effigies of that Empreſs in Stone, with a Repreſentation of 18 Casks of Gold by her, which ſhe gave to it. That Emperor prevail'd with the Pope to make *Magdeburg* an Archbiſhoprick, who ſhould be ſubject to none in Spirituals but the See of *Rome*; ſo that he was called Primate of *Germany*; but *Cranzius* ſays, the three Spiritual Electors, and the Archbiſhop of *Saltzburg*, refuſed to own him as ſuch. In 1566, the Chapter embrac'd *Luther*'s Reformation, and choſe *Joachim Frederick*, Son to *John George* Elector of *Brandenburg*, their Adminiſtrator, on certain Conditions; for which, and refuſing the *Interim*, it loſt the Title of Archbiſhoprick. *Joachim* ſucceeding to the Electorate after his Father's Death, the Chapter choſe his Brother *Chriſtian William*, who continued till 1631, that Count *Tilly* and the Imperialiſts took the Town after a long Siege, put about 36000 Perſons to the Sword, and carried *Chriſtian William* to *Auſtria*, where he turn'd Papiſt. After this the Chapter elected *Auguſtus* II. Son to *John George* I. Elector of *Saxony*, to be Coadjutor: After whoſe Death, it was agreed by the Treaty of *Weſtphalia*, That the Archbiſhoprick of *Magdeburg* ſhould be annexed for ever to the Electorate of *Brandenburg*, by the Name of a Durchy; and *Auguſtus* dying in 1680, it was accordingly annex'd, and adds to the Revenues of that Family 600000 Crowns *per Annum*. Dr. *Nicholſon* gives this Account of the above-mention'd Siege in 1631: After a long and brave Defence, and rejecting of all Propoſals, without Security for their Religion and Liberties, Count *Tilly* ſtorm'd the Town the 10th of *May*, order'd his Men to ſpare neither Age nor Sex, to burn all the Churches and private Houſes, and extirpate their Name. Accordingly they ripp'd up Women with Child, murder'd ſucking Infants before their Mothers Eyes, raviſh'd the Virgins in the open Street; to prevent which, ſome of them drown'd themſelves, and others went into the Fire before *Tilly*'s Face; 16 Churches and Chapels, many of them cover'd with Lead, and one with Copper, were burnt down; and all the Houſes deſtroy'd, except a few Fiſhermen's Cottages, which the Imperialiſts did not think worth while. So that of 40000 Citizens, ſcarce 400 eſcaped, and thoſe deſtitute of all Support. The brutiſh General us'd afterwards to boaſt of this Cruelty in his Cups, and call'd it the Marriage-Feaſt of *Magdeburg*. He ſpar'd the Cathedral, which is very magnificent: It has 49 Altars, and the high Altar in the Quire is of one Stone, of divers Colours, curiouſly wrought, 9 *Hamburg* Ells long, 4 broad, and one thick, and is valued at two Tun of Gold. Tho' the Elector of *Brandenburg* has been very liberal to this City, yet it never recover'd its ancient Glory. They have rebuilt one ſtately Church; and Dr. *Brown* ſays, that of the Jeſuits is very fine. In the Cathedral of St. *Maurice*, he ſaw the Statue of the 5 wiſe Virgins ſmiling, and of the 5 fooliſh ones lamenting, both very well done. They pretend, among other Relicks, to ſhow the Baſon in which *Pilate* waſhed his Hands, and the Ladder on which the Cock crow'd after St. *Peter* denied his Maſter. In the Ruins of the Cloyſter of the *Auſtin* Fryars, there's *Luther*'s Chamber, Bedſtead and Table, with *German* Verſes over the Door, expreſſing ſo much. Dr. *Brown* obſerves, That the firſt Tournaments in *Germany* were appointed here by the Emperor *Henry the Fowler* in 638, where none were admitted but the ancient Nobility. All Baſtards, Uſurpers, Traitors, Oppreſſors of Widows and Orphans, Hereticks, Murderers, Cowards,

Digitized by Google

ards, such as were of ignoble Extraction by one Side, or had offended Ladies in Word or Deed, were excluded. None but one of a Family were admitted at a time. Princes were allow'd four Squires, Counts and Barons three, Knights two, and Gentlemen one. Such as enter'd the Lists, gave in their Names and Quality at the President's Lodging, in Presence of three Heralds, to whom he gave his Helmet and Sword, and, after Confession, enter'd the List. Their Horses were to be without Defect, their Furniture according to Rule, their Saddles without rising before or behind; and after Performance, the Judges gave Sentence, and the Conqueror had the Prize given him by some Lady, or the Prince who furnish'd it; but these Pastimes were abolish'd afterwards, because of the Emulation they occasion'd among the Nobility; for at the 23d Tournament held at *Darmstadt* in 1473, the Animosity arose so high, that 17 *Franconian* Gentlemen, and 9 *Hessians*, were kill'd on the Spot. This Town had formerly the supreme Jurisdiction in Spirituals and Temporals over all *Saxony*. The Emperor *Otho* I. made it an Imperial Town; but now 'tis subject to the Elector of *Brandenburg*, who is Conditector, with the King of *Sweden*, of the Circle of *Lower Saxony*. Their Archbishop was formerly a Count *Palatine*, and determin'd all Causes; but now they have no other Court but what is kept by their Burgomasters and Magistrates. That Part of the Dutchy on the W. of the *Elb* abounds in Corn, but has no Wood; and that on the E. has Plenty of Wood, but no Corn. There are 28 other Towns in the Dutchy, but merit no particular Description. The City is still of considerable Extent, has a good Trade, and is well fortified.

The Principality of Halberstat,

HAS Part of the Dutchy of *Brunswick* and *Magdeburg* on the N. and *Anhalt* on the S. the Bishoprick of *Hildesheim* on the W. and the Electorate of *Saxony* on the E. is about 36 *English* Miles long from E. to W. and 25 broad. The Name comes from the principal Town, which some will have to be the *Elegesi* of *Ptolemy*; but without Reason. Authors are not agreed as to the Reason of the Name; but the most probable is *Halbestat*, because the first Foundations seem'd to have been twice as large as the Town now is; so that the Word signifies half a City. The Country is fruitful in Corn, and exceeds its Neighbours in pleasant Forrests, and Plenty of Venison. Their largest Park is the *Hackel*, in the middle of the Country, which gives Name to the ancient Barony of *Hackelborn*. On the N. W. there is nothing but Fens and Marshes, through which there are Ways cast up to *Helmstat*, *Brunswick*, *&c.* It was made a Bishoprick by *Charlemagne* about 780. We have still some Commentaries on the Scripture by *Heyme*, their 3d Bishop, who died in 827. Their 15th Bishop, *Rainhard*, routed the Emperor *Henry* V. in the Woods of *Welfo*. Their 18th, *Ulrick*, was routed by *Henry the Lion*, Duke of *Brunswick*, who took and burnt the Town, with the Citizens and Clergy, who fled to the Cathedral. Their 29th was *Albert* Duke of *Brunswick*, who, as the History of *Brunswick* says, fought about 20 Battles, and was in most of them a Conqueror. Their 31st was *Albert*, a great Philosopher, who was routed by *Gerard the Eloquent*, Bishop of *Hildesheim*; in Remembrance of which, those of *Halberstat* have a Saying, *That Rhetorick was too hard for Logick*. Their 44th was *Henry Julius*, Son to *Julius* Duke of *Brunswick*, chosen when he was two Years old, on Condition that the Dean and Chapter should have the Government for 12 Years, and pay an Annual Maintenance to their Infant Bishop. In 1591, he established *Luther*'s Reformation here. He was succeeded by his Son *Henry Charles*, who died at 6 Years of Age: He by his Brother *Rudolph*, who died the next Year, and was succeeded by his Brother *Christian*, a great, but unfortunate Warrior, in the Civil Wars of *Germany*. Their 48th and last Bishop was *Leopold William* of *Austria*, who restor'd Popery; but the *Swedes* afterwards retaking the Town, did again settle *Lutheranism* there, and kept the City and Diocese till it was secularized, and given to the Elector of *Brandenburg* by the Treaty of *Westphalia*.

The Town is well built, the Streets straight and uniform, and many of the Buildings fair and stately. The most remarka-

Digitized by Google

markable Thing here is an Inn, called the *Commiſs*, reckon'd the largeſt in *Europe*, and has the beſt and moſt Accommodation of the Sort for Strangers; ſo that in the Time of the Civil War, *Wallenſtein*, the Emperor's General, kept his Court in it for ſome Months, and found Lodgings in it for all his Attendants and Guards. It lies about Long. 30 ½. Lat. 52. upon the little River *Hoteim*, about 30 Miles S. W. from *Magdeburg*, and 30 S. from *Brunſwick*.

Other Towns of Note here are, 1. *Gruningen*, formerly the Reſidence of their Biſhops, with an ancient Caſtle, built by *Bruno*, and rebuilt by *Henry Julius* above-mention'd: It has a curious gilt Chapel, with a fine large gilt Organ, built by the ſaid *Henry Julius*, and a great Tun, in Imitation of that at *Heidelberg*, but much leſs; yet it contains 966 Hogſheads of Wine. 2. *Oſcherſleben*, a ſmall Town on the Borders of *Magdeburg*. 3. *Oſterwick*, a ſtrong little Town on the W. of this Country, from whence the Biſhoprick was removed to *Halberſtat* about 819. 4. *Quedlimburg*, lies alſo in this Principality; but ſince 'tis reckoned to belong to *Saxony*, we refer the Deſcription to that Country.

The Biſhoprick of Hildeſheim.

WE return now towards the N. E. to this Biſhoprick, which has *Halberſtat* on the N. W. the Dutchy of *Lunenburg* on the N. and is encompaſſed with the Dominions of *Brunſwick*. The Biſhoprick was founded by the Emperor *Lewis the Pious*, and, as ſome think, had its Name from his Mother *Hilda*, the Abbreviation of *Hildegard*. *Gunther*, a poor Prieſt of *Elz*, was their firſt Biſhop, about 822, when the Dioceſe was of ſmall Extent; but afterwards had ſeveral Counties added, which were taken away by the Duke of *Brunſwick* in 1553, during his War with their Biſhop; and what he took, was confirmed to him by the Emperor *Charles* V. ſo that 'tis not now above 40 *Engliſh* Miles from E. to W. It was formerly in the Poſſeſſion of the Duke of *Brunſwick* for many Years; but by the Treaty of *Brunſwick* in 1653, it was reſtor'd to the Elector of *Cologne*, as Adminiſtrator, who has a Suffragan that is the immediate Governor of it, and is the only Popiſh Biſhop in *Lower Saxony*; but the greateſt Part of the Dioceſe are *Lutherans*. The Reformation was introduc'd in 1552 by the Citizens, in Oppoſition to the Canons, and made a great Progreſs. By the Treaty of *Brunſwick*, *Lutheraniſm* was confin'd only to ſome Places; but by the Treaty of *Weſtphalia*, they were left at Liberty. The Buildings of the Town are old faſhion'd, but neat. In their Cathedral, there are the Relicks of the old *Saxon* Idol *Irmenſewl*, formerly mention'd. The Jeſuits have a fine College here. Their chief Trade is in Corn; and being a Hans-Town, they are govern'd by their own Laws. The Imperialiſts took and ſack'd it in 1632, and *George* Duke of *Brunſwick* retook it next Year. The Biſhop is a Prince of the Empire. The Town lies in Long. 28 ¾. Lat. 52 ½. 15 Miles S. E. from *Hanover*, and 25 S. W. from *Brunſwick*.

They have had 56 Biſhops, of which the preſent Elector of *Cologne* is the laſt. There is little remarkable ſaid of them by Dr. *Nicholſon*, only that *Gerard*, Baron of *Berge*, their 38th Biſhop, is ſaid to have cover'd the Tower of the Cathedral with Gold inſtead of Lead, as *Buntingius* reports. *John*, their 46th, loſt moſt of the Dioceſe in his War with the Duke of *Brunſwick*; and *Valentin*, their 49th, recover'd moſt of it by Law in the Emperor's Court.

Other Places of Note here are, 1. *Peyna*, a Biſhoprick, 15 Miles W. from *Brunſwick*, the *Caſtrum Peyxum* of the Latins, a little Town with a ſtrong Caſtle, on a Hill, the chief Strength of the Biſhoprick. In 1553, a Battle was fought here between *Maurice* Elector of *Saxony* and *Albert* Marquis of *Brandenburg*, wherein the latter gain'd the Battle, and the former loſt his Life. 2. *Marienburg*, a Fort near *Hildeſheim*, built by Biſhop *Henry* III. when he was preſſed by the Dukes of *Brunſwick*. 3. *Poppenburg*. 4. *Daſſel*. 5. *Bokenem*. 6. *Woldenburg*, with others; all of them chief Towns of Counties of the ſame Names, but of little Note otherwiſe, except 1. *Elz*, on the Borders of the Dutchy of *Calenburg*, called *Aulica*, becauſe *Charlemagne* ſojourn'd here during his War with the *Saxons*, and founded a Biſhoprick, which was afterwards transferred to *Hildeſheim*. 2. *Sarſtede*, on

Digitized by Google

the Conflux of the *Innerste* and the *Peyne*, famous for a Battle gain'd there by the Duke of *Brunſwick-Lunenburg* over the Imperialiſts, as *La Foreſt* informs us.

The Abbey of *Gondersheim* lies on the Borders of this Biſhoprick: It was founded in the 9th Century for Ladies of a Noble Family, and embrac'd the Reformation in the 16th Century.

The Dutchy of Sax-Lawenburg.

WE come further N. to this Dutchy, which lies on the N. and S. Banks of the *Elb*, between *Holſtein* on the W. and N. *Mecklenburg* on the E. and *Lunenburg* on the S. 'Tis divided by the *Elb*, and is ſubject to its own Duke, of the ancient Family of the Dukes of *Saxony*: It was comprehended within that Dutchy till about 1260, when *John*, the youngeſt Son of *Albert* Duke of *Saxony*, had it for his Share; and his Succeſſors call'd themſelves Dukes of *Angria* and *Weſtphalia*; but Duke *Erick* V. miſſing of his Pretenſions to the Electorate after the Death of *Albert*, added the Name of *Sax*, to keep up his Pretenſions. *Julius Francis*, their laſt Duke, dying without Heirs-Male in 1689, the Claims of the Elector of *Saxony*, the Prince of *Anhalt*, and the Duke of *Lunenburg-Zell*, to it, are not yet determin'd; but the latter ſeiz'd it, and kept Poſſeſſion; ſo that 'tis now in the Houſe of *Hanover*.

The chief Town, *Lawenburg*, lies in Long. 29. 47. Lat. 53. 28. on the Conflux of the *Steckenitz* and *Elb*, with a ſtrong Caſtle, built on a Hill, over againſt the Fortreſs of *Artemberg* on the other Side the River. 'Tis a ſmall Town, but populous, and has a good Trade. 'Tis ſaid to have been built by *Henry the Lion*, Duke of *Saxony*, and from him called *Leoburgum*; but being much damaged by War, it was rebuilt and enlarged by *Bernard* of *Anhalt*. It lies about 35 Miles S. E. from *Hamburg*, and about 20 N. E. from *Lunenburg*.

Other Places of Note here are, 1. *Mollen*, famous for the Quarrels it has occaſion'd betwixt the Dukes of *Sax-Lawenburg* and the Town of *Lubeck*. 2. *Wittenberg*, a pretty little Town, with a Caſtle, on the *Elb*. 3. *Ratzeburg*, on a Lake of that Name, 15 Miles N. of *Lawenburg*, and about 10 N. of *Lubeck*, made a Biſhop's See under the Archbiſhop of *Bremen*, by *Henry the Lion*, and continued ſubject to its Biſhop till by the Treaty of *Munſter* it was ſeculariz'd, and given to the Duke of *Mecklenburg*; but the Caſtle and Town to the Duke of *Lawenburg*. The Duke of *Lunenburg* ſeiz'd and fortified it in 1689, and the King of *Denmark* took it in 1693, and demoliſhed the Fortifications before he reſtor'd it. 'Tis the chief Town of a ſmall Principality of the ſame Name, and embrac'd *Lutheraniſm* in 1566. The Dukes of *Lawenburg* were anciently buried here. Part of the Dutchy of *Bremen* is ſubject to this Country, as has been formerly mention'd, with the Towns of *Frankenhauſen*, *Saxenhauſen*, and ſome others on the *Elb*.

HOLSTEIN.

THis Country was anciently Part of the *Cherſoneſus Cimbrica*, and now lies in that which was the S. Part of it, where it joins to *Germany*. It has the Dutchy of *Sleſwick* and the River *Eyder* on the N. the *German* Ocean on the W. the Dutchy of *Bremen* on the S. W. the Territory of *Hamburg* and *Lawenburg* on the S. *Mecklenburg* on the S. E. and the *Baltick* on the E. 'Tis divided into *Holſtein Proper*, *Wagria*, *Stormar*, and *Dithmarſh*.

Holſtein Proper is again divided into the E. and W. Parts; the firſt belongs to the Duke, and the ſecond to the King of *Denmark*.

Some think the Country derives its Name from the *German* Word *Holt*, which ſignifies a Forreſt.

The *Atlas Hiſtorique* has a large Tree of the Family of *Holſtein*, and its different Branches. Moſt Authors derive it from *Wittikind the Great*, from whom deſcended *Adolph* I. Earl of *Schawenburg*, to whom *Lotharius* the Emperor gave *Holſtein Proper*, and *Stormar*, for his Service in the Wars, with the Title of Earl of *Holſtein*, about 1133 according to the *Atlas*, but 1114 according to *Heylin*. He was ſucceeded by *Adolph* II. who having made a full Conqueſt of the Country, planted it with other Colonies of *Germans*, that in Time wore out the ancient Inhabitants, call'd the *Slavi*. His Succeſſor

Adolph

Digitized by Google

Adolph III. was expell'd his Dominions by *Canute* K. of *Denmark*. *Adolph* IV. his Succeſſor, recover'd the Country; after which he retir'd into a Monaſtery, and died in 1260. He was ſucceeded by *Gerard* I. who died in 1281. His Son, *Henry* I. ſhared *Holſtein* with his Brother, and died in 1310. His Son *Gerard* II. ſirnam'd *The Great*, was ſlain in his Bed by a *Dane* in 1340. His Son *Henry* II. chas'd the King of *Sweden* out of his Country, and died in 1381. His Son *Gerard* III. join'd *Kiel* to his Dominions; and this Line fail'd in *Adolph* his Son, who died in 1459, having declared *Chriſtian* I. of *Denmark* his Succeſſor, being Son to *Theodorick the Fortunate*, by *Hedwige* of *Holſtein Schawenburg*. *Chriſtian* I. was choſen King of *Sweden*, and got *Holſtein* erected into a Dutchy by the Emperor *Frederick* III. and died in 1481. He was ſucceeded by his Son *John*, who was alſo King of *Norway* and *Sweden*, and died in 1521. He was ſucceeded by *Chriſtian* II. who was dethron'd, and died in Priſon, as we mentioned in the Hiſtory of *Denmark*. He was ſucceeded by *Frederick* I. Son to *Chriſtian* I. who eſtabliſh'd the *Augſburg* Confeſſion in his Dominions in 1523. From him are deſcended the preſent Branch of *Holſtein Gottorp*, and the Royal Family of *Denmark*, as we mentioned in the Hiſtory of *Denmark*. His ſecond Son *Adolph* ſucceeded to the Dutchy of *Holſtein*, was made Knight of the Garter by Queen *Elizabeth* in 1560, conquer'd *Ditmarſh*, and oblig'd the *Hamburgers* to do him Homage. He died in 1586, and was ſucceeded by his Son *Adolph*, who firſt ſucceeded his Brother *Philip* in the Archbiſhoprick of *Bremen*, and Biſhoprick of *Lubeck*, which he afterwards reſign'd, married the Daughter to *Frederick* II. of *Denmark*, and died in 1616. His Son *Frederick* ſucceeded, and was famous for his Learning, and Embaſſy, through *Muſcovy*, to the King of *Perſia* in 1633, and died in 1659. He was ſucceeded by *Chriſtian Albert*, who was expell'd his Dominions by the K. of *Denmark* in 1641, who demoliſh'd his ſtrong Towns; but was oblig'd to reſtore him to his Dominions by the neighbouring Princes, but chiefly by the Emperor and King *William* of *Great-Britain*'s Mediation in 1689, by a Treaty ſign'd the 30th of *June* that Year, when a General Amneſty was agreed on to the Subjects on both Sides. The other Branches of this Family are, that of *Sonderburg*, deſcended from *Chriſtian* III. the preſent Prince of which is *Erneſt Auguſtus*: From *John*, Son to *Chriſtian* III. deſcended the Branch of *Holſtein-Ploen*, the preſent Prince of which is *John Erneſt Ferdinand*: From *Joachim Erneſt* of this Branch, who died in 1671, deſcended the Branch of *Ploen* and *Nortburg*: From the ſame *John* deſcended the Branch of *Glucksburg*, of which *Philip Erneſt* is Prince: From *John*'s Son *Alexander* came the Branch of *Holſtein-Beck*, whoſe preſent Prince is *Frederick William*: The Branch of *Wiſenburg*, whoſe preſent Prince is *Frederick*: The Branch of *Frantzhagen*, whoſe preſent Prince is *Leopold Chriſtian*; and the Branch of *Silеſia*, whoſe preſent Prince is *Frederick Leopold*. The extinguiſh'd Branches we do not mention.

This Country in general is fruitful, and well ſeated for Trade: It abounds with Corn and Orchards, Black Cattle and Hogs, which are very numerous in their Woods. Its Extent from E. to W. is about 100 Miles, and from N. to S. about 50. The Inhabitants are of a ſtrong Conſtitution, Couragious, and Juſt; ſo that *Holſtein Glaube*, or the *Faithful Holſteiner*, is become a Proverb in theſe Parts.

The Towns in *Holſtein Proper* are, 1. *Kiel*, a Town of good Trade on the *Baltick*, about Long. 29. Lat. 54. 17. It derives its Name from a Neck of Land on which 'tis ſituated, about 45 Miles N. of *Hamburg*, and 40 N. W. from *Lubeck*. It has a good Harbour, well frequented, which, with the Town, is defended by a Caſtle on a neighbouring Hill. 'Tis populous and wealthy, is the Place where the States meet, and adorn'd with a ſtately Palace, and a *Franciſcan* Monaſtery, turn'd to an Hoſpital ſince the Reformation. An Univerſity was eſtabliſh'd here in 1669, which has had many Learned Profeſſors, and particularly *Moravius*. 'Tis divided into the New and Old Town: The New is large, and the Streets planted with Rows of Trees: The Old Town is a *Peninſula*, join'd to the Continent on the N. where 'tis fortified by deep Ditches, and has fine Walks of Trees on the Haven. Its Trade was more conſiderable in the Time of Duke *Frederick*, who ſent the Embaſſy above-mention'd into *Perſia*, in order to ſettle a Trade with that Country. 2. *Renſburg*, the chief Town of

Digitized by Google

West Holstein, a small Place, but well built, and accounted the greatest Strength of the Country. It has good Ramparts, and is defended by Morasses on the Side of *Flensburg*. It has also a neat Castle, built by *Gerard* II. Earl of *Holstein*. It lies 20 Miles W. from *Kiel*. 3. *Wilster*, a neat Town, on a River of that Name, about 27 Miles S. W. from *Rensburg*. 4. *Itzhoe*, on the *Stor*, about 25 Miles S. W. from *Rensburg*. It is a small Town, at the Foot of a Mountain, and has some Trade by the River: 'Tis defended by an old Castle. 5. *New Munster*, about 20 Miles further E. near the Head of the *Stor*.

The Province of Wagria *or* Wagerland,

HAS *Holstein* on the W. and is almost encompassed by the *Baltick*, and the two Rivers *Trave* on the S. and *Swentin* on the W. It extends about 50 Miles from N. to S. and 30 from E. to W. The greatest Part of this Country belongs to the Duke of *Holstein*. It had its Name from the *Wagrii*, said to be *Sclavonians*, who conquer'd it. Within this Province stands *Lubeck*, which we have already describ'd.

The other Places of Note here are, 1. *Oldesloe*, on the *Trave*, formerly the Capital of the Country. It is a fair little Town, about 17 Miles W. from *Lubeck*, and 7 S. from *Segeberg*. *John* Earl of *Wagria* bought it for 10000 Marks in 1338, and it was long a flourishing Town; but it suffered much by the Wars betwixt the Princes of *Pomerania* and *Sweden*; so that 'tis now ruinous, and inhabited mostly by Peasants. 2. *Segeberg*, on the *Trave*, about 20 Miles N. W. from *Lubeck*, and 30 E. from *Gluckstat*. It took its Name from the Castle, built on a neighbouring Hill by the Emperor *Lotharius*, about 1134, to check the *Sclavonians*. 3 *Ploen*, upon the Front of a Hill, and the Banks of the Lake of *Ploen*, encompassed by a Wood. This is a Place of Antiquity, and gives Title of Prince to that Branch of the Family of *Holstein*. The Lake, and a neighbouring Marsh, make it very strong, and 'tis likewise defended by a good Castle, built by *Joachim Ernest* of *Holstein*. It lies about 10 Miles N. from *Segeberg*, and 25 N. W. from *Lubeck*. The valiant Prince who bears that Title has signaliz'd himself in the Confederate Armies. 4. *Oldenburg*, an ancient Town in a *Peninsula* upon the *Baltick*, about 20 Miles N E. from *Ploen*. It gives Name to a Bailiwick, and was formerly the Metropolis of the *Wagrii* and *Venedi*. *Otho the Great*, or, as some say, *Charlemagne*, founded a Bishoprick here in 788, which was transported to *Lubeck* in 1162: It had formerly a great Trade, which is decay'd since *Margaret* of *Denmark* stopt up the Port. It likewise suffer'd much by Fire; so that 'tis now inconsiderable.

The Province of Ditmarsh,

HAS *Holstein Proper* on the E. the *German* Ocean on the W. *Denmark* on the N. and the *Eib* on the S. Some write it *Teutsmarsh*, from the ancient *Teutones*, Part of whom inhabited here, whose Valour they retain'd so much, that they would not submit to the Family of *Holstein*, till they succeeded to the Crown of *Denmark*, and then became too powerful for them. 'Tis divided into N. and S. the former belongs to the King of *Denmark*, and the latter to the Duke of *Holstein*, who shar'd it betwixt them, after having totally subdued it in 1559. This Country is fruitful, well water'd, and populous.

The chief Places are, 1. *Meldorp*, the chief Town of the Province, and a Place of good Trade. It lies on the *German* Ocean, about 20 Miles N. W. from *Gluckstat*. The Courts of Justice sit here. Their Church is large and ancient, being built when Christianity was first established here. They have a neat Altar, adorn'd with Paintings, and a Crucifix. 2. *Heyde*, a large, but poor City, on the Brink of a great barren Sand, which over-spreads the middle of the Country. 3. *Lunden*, near the Mouth of the *Eyder*, about 15 Miles N. of *Meldorp*, in the most Northerly Part of the Province. 'Tis a large Town, and belongs to the Duke of *Holstein*. 'Tis famous for Beer, which is exported to other Places. 4. *Brunsbuttel*, a Sea-Town on the *Elb*, 12 Miles S. from *Meldorp*. 5. *Westingburn*, upon the Coast, mid-way betwixt *Meldorp* and *Lunden*.

Stot-

Digitized by Google

Stormar, *or* Stormarſh.

THis Province is full of Moraſſes, along the Banks of the *Stor*. It has *Holſtein Proper* on the N. and *Hamburg* and *Lunenburg* on the S. The Soil is rich, reſembles *Holland* in its manner of Improvement, and Banks and Dikes to keep out the Sea, which ſometimes however overflows the low Grounds. The People have a good Trade by the Neighbourhood of *Hamburg* and the *Elb*. Moſt of this Province, except *Tritow*, and ſome ſmall Places on the E. is ſubject to the King of *Denmark*.

Places of Note here are, 1. *Altena*, a ſmall City, remarkable for the Treaty betwixt the King of *Denmark* and the Duke of *Holſtein-Gottorp*. It lies on the *Elb*, within a Mile or two of *Hamburg*; the *Calviniſts* of which City have their Worſhip here. 2. *Gluckſtat*, a little City on the *Elb*, about 27 Miles below *Hamburg*, on that ſame Side of the River. It is well fortified, and has fine Walks of Trees on the Ramparts. The King of *Denmark* has 2000 Foot in Gariſon. It was fortified by *Chriſtian* IV. of *Denmark* about 1620, and was made ſo ſtrong, that it held out a Siege of two Years againſt the Emperor *Ferdinand* II. and *Chriſtian* V. has ſince made it one of the moſt conſiderable Towns in *Germany*, by the great Privileges allow'd the Inhabitants. It can't be taken without a Fleet by Sea, which made the Imperialiſts miſcarry before it. There are ſeveral Canals in the Town, one of which divides it into two Parts: 'Tis croſſed by another at the End of the Market-place, which is very magnificent: At one Corner of it ſtands the great Church, where the *German* Calviniſts and Papiſts are each of them allow'd a Chapel. The Harbour is large and deep, and at the End of the Canal, which runs into it from the Town, there is a Tower built on Piles of Wood, round which there are Platforms with Batteries of Cannon, which command the *Elb*, 3. *Grempen*, on a ſmall River of the ſame Name, falls into the *Stor* about 5 or 6 Miles N. from *Gluckſtat*. 'Tis a ſtrong Place, and reckon'd one of the Keys of *Denmark*. The Fortifications were begun by *Chriſtian* IV. and finiſhed in 1628. It held out a Siege of 13 Months againſt Count *Wallenſtein*, and the Imperial Army; but at laſt ſubmitted upon honourable Terms. 4. *Pinnenberg*, about 10 Miles N. W. from *Hamburg*, noted only for giving Name to that County, which fell to the Crown of *Denmark* by the Death of *Otho*, laſt Earl of *Schaumberg* and *Pinnenberg*, in 1640. 5. *Bredenberg*, one of the faireſt little Towns in *Denmark*, the ancient Seat of the Noble Family of *Rentzow*. It made a ſtout Oppoſition againſt Count *Wallenſtein*, who took it at laſt, and put all the Gariſon to the Sword. 6. *Tritow*, a large Town, with a Bailiwick of the ſame Name, E. from *Hamburg*, and belongs to the Duke of *Holſtein*.

All the Difference betwixt the Royal Arms of *Denmark*, and the Ducal of *Holſtein*, is, That the Arms of *Denmark*, *Gothland*, *Slavia*, and *Sweden*, are not in the Ducal Arms; which, inſtead of a Royal Crown, have over them the three Helmets of *Norway*, *Sileſia*, and *Holſtein*. We gave an Account of the Arms of *Denmark* in the Deſcription of that Country; ſo that 'tis needleſs to repeat any thing here but the Difference.

Upper Saxony.

THis Country has on the N. the Principalities of *Magdeburg* and *Halberſtat*, and the Marquiſate of *Brandenburg*; on the S. *Franconia* and *Bohemia*; on the E. *Sileſia*; and on the W. *Heſſe* and *Brunſwick*; and is in Length, according to Mr. *Moll*, 220 Miles; and in Breadth, from N. to S. where broadeſt, 130: But if we include the Electorate of *Brandenburg* and the Dutchy of *Pomerania*, belonging to the King of *Pruſſia*, as the *Matricula* does, 'tis of a much larger Extent, and reaches from Lat. 50. 15. to Lat. 55. the moſt N. Part of *Pomerania*: So that from the Frontiers of *Bohemia* to the *Baltick*, 'tis above 190 Miles in Breadth; and from the Borders of *Franconia* on the S. W. to the further Part of *Pomerania* on the N. E. it extends about 385 Miles. Dr. *Nicholſon* takes Notice, That the Limits of the *Saxons* are differently deſcrib'd by Hiſtorians and Geographers, becauſe the ancient *Saxons* being a Warlike People, other *Germans* were ambitious to call themſelves

Digitized by Google

ſelves by their Name: Thus *Albinus* ſays, the ancient *Saxons* had the *Elb* on the E. the *Ems* on the W. *Bohemia* and *Francenia* on the S. and *Denmark* on the N. But *Ptolomy* confines them within narrower Bounds, and the Dr. ſays, *Henry the Lion*'s Territories reach'd from the *Elb* to the *Rhine*, and from the *Baltick* to the utmoſt Bounds of the *Hercynian* Forreſt; and by the Name of *Upper Saxony*, he underſtands only that ſmall Province, which gives the Elector Title of Duke, and alone only retain'd the Name of *Saxony*, when *Henry the Lion*'s Territories were taken from him by *Frederick Barbaroſſa*; and *Bernard* Prince of *Anhalt* made Duke and Elector of *Saxony* in his ſtead. For the ſeveral Principalities and other Governments contain'd in this Circle, we refer to the *Matricula*.

The Dutchy of SAXONY,

HAS *Nether Luſatia*, and Part of the Marquiſate of *Brandenburg*, on the E. the County of *Manſfeld*, and Landgraviate of *Thuringia*, on the W. the Principality of *Anhalt* on the N. and the Marquiſate of *Miſnia* on the S. The Country is pretty fruitful in Corn, but ſhort of its neighbouring Provinces: Their Hills have Mines of Silver, and other Metals; but ſcarce Wood enough to refine them. The Air is cold, but wholeſome. Their chief Corn is Wheat, and they have ſome Vines. The Inhabitants are ſtrict Obſervers, ſays Dr. *Nicholſon*, of the ancient Municipal Laws of their Pagan Anceſtors, which, ſome ſay, *Charles the Great* ſuffer'd them to retain, becauſe they could not be better'd; but others, that he did it to pleaſe them; and they are ſtill excepted when General Laws are made by the Diet: The beſt of them are collected into two Bodies; 1. Called *Sachſen-Spiegel*, or, *Speculum Saxonicum*. 2. *Sachſen Weichbild*, or, *Statuta Civitatum Saxonicarum*. 'Tis properly an Abridgment of the former. The firſt contains three Books; the firſt of which conſiſts of 71 Articles, the 2d of 72, and the 3d of 91; with a Gloſſary, explaining the antiquated Terms. There have been two Editions of it, the firſt by *Burchard* Lord of *Mangelfeld*, and the laſt printed by *Zobelius* at *Leipſick* in 1569. The *Weichbild* has had ſeveral Editions, and contains 139 of the choiceſt Articles of the former, with Obſervations upon them.

The chief Places are, 1. *Wittenberg*, on the *Elb*, the Capital of the Dutchy. Some derive its Name from *Wittikind*; and others ſay, that it only ſignifies a white Rock, of which there are many in the Neighbourhood; from whence the Students fancying it alſo to be built upon one, call it *Leucoris*. It lies on the *Elb*, near Long. 32. Lat. 52. about 37 Miles N. E. from *Leipſick*, 37 S. from *Brandenburg*, and 70 E. from *Halberſtat*. 'Tis a fair large City, of an oblong Square, with one great Street in the middle. The Elector *Frederick* built a ſtrong Caſtle to defend it in the beginning of the 16th Century, and founded the Univerſity in 1502, which was made famous by *Luther*'s preaching there, and is now, ſays *La Foreſt*, one of the moſt flouriſhing *Lutheran* Univerſities, and has large Privileges. The Town is well Peopled, and fortified by Marſhes on the N. and a Canal to the *Elb*. It has a deep Ditch, a good Rampart, and 5 large Baſtions on the Side where 'tis moſt expoſed. It was the Elector's Seat till the Government came into the Family of *Miſnia*; ſince which, it has been at *Dreſden*. Dr. *Nicholſon* ſays, it has bred few great Scholars of late, thô *Abraham Calovius* has writ much to little Purpoſe; and another Profeſſor, called *Teuchmannus*, has writ much againſt the *Calviniſts*; but ſo weakly, as will rather confirm than confute them. One gave this waggiſh Account of the Town, which the Dr. thinks may be pertinent enough.

Leucoris intranti tibi quæ ſint obvia quæris?
Sus, Miles, Meretrix, aut Studioſus erit.

At Wittenberg *a Man is ſure to meet,*
Hogs, Soldiers, Whores, or Scholars, in each Street.

2. *Halle*, thô depending on the Dutchy of *Magdeburg*, and ſubject to the King of *Pruſſia*, is within the Confines of this Dutchy. It lies on the Banks of the *Sala*, near Long. 31. Lat. 51. 35. about 40 Miles S. W. from *Wittenberg*, and about 35 S. of *Magdeburg*. Some derive the Name from the Greek Word Ἁλὸς or Ἅλς, becauſe of the

Digitized by Google

the many Salt-Pits in this Place; but give no Reaſon why a *German* Town ſhould have a *Greek* Name. Theſe Pits were firſt diſcover'd by the *Hermunduri*, a Branch of the *Suevi*, before our Saviour's Birth, who valued them as much as Mines of Gold. Their Value may be gueſs'd at by the Weekly Toll of 5 or 600 Crowns, which they pay to the Adminiſtrator of *Magdeburg*. The Town is neatly built, on the Side of a pleaſant Hill; the Inhabitants are genteel, and are reckon'd to ſpeak the beſt *German*. 'Tis called *Halla Saxonum*, to diſtinguiſh it from others of that Name elſewhere. *La Foreſt* places it in the Circle of *Leipſick*, thô now 'tis in *Miſnia*. He ſays, it was built by the Emperor *Otho* II. in 981, and made an Imperial Town, as it continued to be till 1308, that it was united to *Miſnia*, and gave Title of *Sax-Halle* to a Branch of the Family of *Saxony*. It has alſo a noted Univerſity, and has been famous of late for an Hoſpital built there by Dr. *Franks*, without any certain Fund either for building or ſupporting it; but has been hitherto maintain'd, and made very conſiderable both for the Buildings, and Number of Scholars, Mechanicks, and Poor, by a wonderful Chain of Providential Charities, as we have an Account in a Book lately tranſlated and printed here, called *Pietas Hallenſis*.

3. *Quedlinburg*, a ſmall City, about 8 Miles S. E. of *Halberſtat*, and about 37 N. W. of *Halle*. It had formerly a Caſtle on the Top of a neighbouring Hill, but now demoliſhed. It was formerly a Hans-Town; but the Citizens rebelling againſt their Abbeſs in 1475, they were made ſubject to the Elector of *Saxony*. Since the Reformation, the Abbeſs has been a *Lutheran*, and, as Dr. *Nicholſon* ſays, either a Princeſs or Counteſs of the Family of *Saxony*, and is ſupreme of the City and Territory. *La Foreſt* ſays, it lies on the River *Bode*; That the Abbey was founded in the 10th Century by the Emperor *Henry the Fowler*, and his Daughter *Maud* was the firſt Abbeſs. The Counteſs of *Stolberg* brought in *Lutheraniſm* in 1539. It depends immediately on the Empire, and the Abbeſs has her Depury in the Diet among the Prelates of the *Rhine*. It receives no Nuns but of Noble Extract, for 8 Deſcents. 'Tis under the Protection of the Elector of *Saxony*.

4. *Sweinitz*, a little Town on the *Elſter*, which falls into the *Elb* a little above *Wittenberg*.

5. *Hertzberg*, a little Town, very ancient, on the ſame River.

6. *Torgaw*, on the *Elb*, about 17 Miles above *Wittenberg*, a large fortified Town, which has a great Trade in Beer. It was taken by the *Swedes* in 1637. It was built by the Elector *John Frederick* in 1535, and beautified with a ſtately Caſtle.

7. *Bitterfeld*, on the *Mulda*, which was taken by the *Swedes* in 1637.

8. *Wieſenburg*, on the Confines of *Anhalt*, then alſo taken by the *Swedes*.

The Principality of ANHALT.

THE greateſt Part of this Country lies betwixt the *Sala* and the *Elb*, has *Magdeburg* on the N. *Thuringia* on the S. *Quedlingburg* on the W. and the Electorate of *Saxony* on the E. It lies from E. to W. about 90 Miles; but is of an unequal Breadth.

Dr. *Nicholſon* ſays, ſome *German* Antiquaries derive the Pedigree of thoſe Princes from *Aſchenaz*, *Noah*'s Grandſon, which Fable was founded upon their Title of *Principes Aſcanii*, but they have a Genealogical Table in their Palace at *Pleskaw*, which affirms, that their Anceſtors were Kings, Dukes, and Generals of the *Saxons*, long before the coming of our Saviour. The *Atlas Hiſtorique*, with whom *La Foreſt* agrees, carries their Origine no higher than *Berentobaldus*, who made War on the *Thuringians* in the 6th Century. Dr. *Nicholſon* ſays, he was a King, and that this War began in 524, when he took ſome Towns, and adjoining Territories. He was ſucceeded by *Berenger*, who, the Atlas ſays, was made a Count by *Charlemagne*. The Doctor obſerves further, That credible Hiſtorians ſay, *Berentobald* II. and III. were above 1000 Years ago Generals of the *Saxons* againſt *Clovis* II. and *Dagobert*, Kings of *France*; and that *Clovis* III. married *Batildis*, a Princeſs of this Family; but the Atlas mentions only one *Berentobald*. *Otho the Great* ſucceeded *Berenger*; and *Albert*, call'd the *Bear*, his Succeſſor, was made Marquis of *Southwold* by the Emperor *Henry* V. and others ſay, he was made Margrave

of

of *Brandenburg* in 1157 by the Emperor *Conrad* III. His Son *Bernard* was made Elector of *Saxony* inſtead of *Henry the Lion*, and likewiſe poſſeſſed *Anhalt*. He and his Brother *Otho*, ſays Dr. *Nicholſon*, divided the *Aſcanian* Family into two Branches, from whence came the great Families of *Saxon* and *Brandenburg*. *Henry the Young* ſucceeded his Father *Bernard*; and notwithſtanding the great Promotion of his Father and Uncle, ſays the Doctor, was the firſt created Prince of *Anhalt* by *Frederick* II. But the Atlas ſays, it was his Son and Succeſſor *Henry the Old*. He was ſucceeded by *Henry the Fat*: He by *Sigfried*. The next Succeſſors were, *Albert the Old*, *Albert the Young*, *John*, *Albert the Lame*, *Adolphus Sigiſmund*, *George the Old*, *Waldemar John*, a very brave Prince, who died in 1551; *Joachim Erneſt*, who died in 1586; *John George*, the firſt of *Deſſaw*, who died in 1628; *John Caſimir*, who died in 1660; *John George* II. who married *Henrietta Catharine* of *Orange*, and was Statholder of the Marquiſate of *Brandenburg* for the Elector. He died in 1693. The preſent Prince *Leopold* of *Deſſaw* was born in 1676, and is Lieutenant-General to the King of *Pruſſia*. From *Joachim Erneſt*, came the Branch of *Anhalt-Zerbſt*, whoſe preſent Prince is *Charles William*. From *John* II. of this Branch, came that of *Barnburg*, whoſe preſent Prince is *John Lewis*. From the ſame *Joachim*, proceeded the Branch of *Cothen*, which was extinguiſhed in 1665; and the Branch of *Plotzkaw*, which came from the ſame *Joachim*, ſucceeded to their Dominions. The preſent Prince is *Auguſtus Lebrecht*. From *Joachim*, alſo proceeded the Branch of *Anhalt-Bernburg*, whoſe preſent Prince is *Victor Amedeus*, who has a numerous Iſſue. The Branch of *Hatzgerode* came from *Chriſtian* I. of *Bernburg*. The preſent Prince is *William*. Dr. *Nicholſon* obſerves, That *Joachim*, from whom all theſe Branches are come, was the only Perſon left of the Family; but when he died in 1566, he left 5 Sons, and 11 Daughters. The Sons divided the Principality into 4 equal Shares, becauſe the eldeſt, *Auguſtus*, reſolv'd not to marry, and to be content with a Penſion during Life; but marrying afterwards, they allow'd him the 5th of the Dominions; whereupon *John George* had *Deſſaw*, *Chriſtian* reſided at *Barnburg*, *Auguſtus* at *Pleskaw*, *Rhodolph* at *Zerbſt*, and *Lewis* at *Cothen*. Having all Children, and being of equal Authority, they agreed unanimouſly to ſubmit to the eldeſt of the Family, who has the ſupreme Government, and the only Power to aſſemble the reſt upon Matters of Conſequence. They have but one Vote in the Diet, and generally depute one of their own Number to repreſent them.

Prince *Lewis* of *Cothen* founded that called the *Fructifying Society*, on this Occaſion: Having travelled over *Europe*, and obſerving the Advantages which the Nobility had elſewhere by excellent Books in their own Language, he perſwaded his Countrymen to tranſlate the beſt Latin and Greek Authors into a good *German* Stile. In purſuance of which, he founded the Society, and was their firſt Preſident. In a little Time, above 26 Princes and 600 Noblemen enter'd into the Society, which has very much advanced Learning in *Germany*, and improved their own Language.

The Titles of the Princes of *Anhalt Deſſaw* are, Prince of *Anhalt*, Count of *Aſcania*, Lord of *Zerbſt*, *Bernburg*, &c. Thoſe of *Zerbſt* add *Jevern*, *Knipbauſen*, &c. Their Dominions are thus: The Branch of *Deſſaw*, has the Principality of *Deſſaw*: That of *Bernbourg*, the Lordſhips of *Bernbourg* and *Ballenſted*, *Old-nhalt*, and the Provoſtſhip of *Gorenrode*: The Branch of *Hatzgerode*, the Bailiwick of that Name: The Branch of *Cothen*, *Cothen* and its Diſtrict, *Plotzkaw*, the upper County of *Warrenſdorf*, *Nienbourg*, *Wulfen*, and *Guſten*. The Branch of *Zerbſt*, *Zerbſt* and its Diſtrict, the Bailiwicks of *Lindaw*, *Roſwick*, *Roſta*, the Lordſhips of *Jevern*, *Knipbauſen*, and *Walternenburg*.

Their Arms are, *Argent*, a *Demi-Eagle*, *Gules*, Part of *Saxony* for *Anhalt*. *Argent*, a *Bear-Sable* Collar'd and Crown'd *Or*, *Paſſant*, on a Wall *Gules*, in which there's a Gate *Or*, for *Berengen*. *Or*, 5 *Feſſes-Sable*, for *Ballenſted*. *Checkee*, *Argent* and *Sable*, for *Aſcania*. Quarter'd *Or* and *Gules* for *Waldirſee*. *Azure*, two *Bars Or*, for *Wanſdorf*. *Azure*, an *Eagle-Argent*, for *Mullingen*. *Argent*, a *Bear Sable*, Crown'd *Or*, *Paſſant*, on a Wall *Gules*, in which there is a *Pert-Or*, for *Bernburg*. *Gules* plain for the *Regalia*. The Helmets are thoſe of *Anhalt*, *Berengen*, and *Aſcania*. Thoſe of *Zerbſt* add 3 Quarters and a Helmet as follows; *Azure*, a *Lion Or*, for *Jevern*.

Digitized by Google

vern. Or, a *Lion-Sable*, with a fork'd Tail, *Azure*, a Dog's-Head *Argent*, supported with an Angle of two Wings, turn'd up-side down, for *Walter-Neuburg*. The Helmet of *Jevern*.

The chief Places of this Principality are,

1. *Zerbſt*, on a ſmall River about a Mile from the E. Side of the *Elb*, about 20 Miles S. W. from *Magdeburg*, and 40 N. of *Leipſick*. *Dreſſerus* thinks, 'tis a Town of great Antiquity, and that it had its Name from the *Servetii*; but others ſay, it ſignified a Fort in the old *Wendiſh* Dialect. 'Tis remarkable for little but being the Reſidence of the Prince, and brewing ſtrong Beer, which is ſent about into the neighbouring Countries.

2. *Bernburg*, a fortified Town, on the Banks of the *Sa'a*, about 8 Miles from the *Elb*. The Prince has another Palace here, ſeparated from the Town by the River. It was taken by the Elector of *Saxony*'s Troops in 1636, when they put all the Gariſon and Inhabitants to the Sword, except a few that belong'd to the Prince's Court.

3. *Deſſaw*, a well fortified Town on the *Elb*, about 30 Miles N. W. from *Magdeburg*, and 15 W. from *Wittenberg*. It lies in a pleaſant and fruitful Country, and had its Name, as ſome think, from the *Jews*, who in their Dialect call'd it *Deſſe*, from the Fatneſs of the Soil. The Prince has a Palace here, which, by an Inſcription over the Gate, appears to have been built by *Albert* and *Waldemar*, two Princes of this Family, in 1341. In one of the Chapels, there is the Tomb of one *Rebebock*, an old Miller, who having followed *Waldemar* Marquis of *Brandenburg* in the Wars, counterfeited the ſaid Marquis ſo artificially after he was ſlain, that a great many believ'd him to be that Prince, and reſpected him accordingly. He died about 1350.

4. *Aſcherleben*, or *Aſcania*, from whence the Princes of *Anhalt* had that Title. 'Tis an ancient Town, on the Borders of the Biſhoprick of *Halberſtat*, and was ſeiz'd on by the Canons of that Church after the Death of Prince Otho's Widow in 1315; ſince which, the Princes of *Anhalt* could never recover it, and are not like to do it now, ſince that Biſhoprick is fallen to the Houſe of *Pruſſia*.

5. *Worlitz*, or *Goſwick*, a little Town of good Trade on the *Elb*.

6. *Anhalt*, on the S. of *Halberſtat*, remarkable only for an ancient Caſtle, which gives Name to the Principality.

7. *Koten*, within a League of *Multa*, a ſmall Town with a Caſtle. It's the Chief of a County of the ſame Name.

8. *Germode*, an Abbey founded in 965 by *D. Geron*: It depends on the Empire, and has a Deputy in the Diet among the Prelates of *Weſtphalia*. The Reformation was introduc'd here in 1531. The Princes of *Anhalt* have the Advouſon of it.

The Landgraviate of Thuringia.

THis Country took its Name from the *Thuringi*, a Branch of the *Vandals*, mentioned by *Tacitus*. *Muræus* is of Opinion, from the Names of ſeveral Towns here, as *Gotha*, *Gotleben*, *Altengotken*, &c That they were a Branch of the *Goths*, and not of the *Vandals*, as *Cluverius* would have them. But Dr. *Nicholſon* juſtly obſerves, That this Argument will prove no more than that the *Goths* mix'd with them.

This Province has the River *Sala* on the E. the *Werra* on the W. the *Hercynian* Foreſt on the N. and the Woods of *Franconia* on the S. The Country abounds with Corn, and large Vineyards in ſome Places, which afford better Wine than is to be had in other Places of *Saxony*, and the Marquiſate of *Brandenburg*; and in their Fields and Gardens, they have abundance of Wild Saffron, and Woad us'd by Dyers for their beſt Blues and Sky-Colours. In other Places, as about *Sangerhauſen*, they have Mines of Copper and Silver; and about *Frankenhauſen*, rich Salt-Pits. Their chief Rivers are, the *Sala*, *Werra*, *Unſtrut*, *Hiera*, *Ilm*, the *Leina*, *Schwertze*, *Wipper*, *Helbe*, *Rahna*, *Helme*, *Loſſa*, and *Giſſel*. They have alſo many great Lakes, the moſt conſiderable of which are, *Wiſſenſee*, and *Swanſee*.

The Boors here are very rough and clownish, and the only People in *Germany* noted to be uncivil to Strangers. Upon their firſt ſettling here, they choſe themſelves a King, under which Government they continued till they were over-run by the *Franks* about 1122. When *Charlemagne* aboliſh'd Paganiſm

Digitized by Google

niſm here, they were for moſt part govern'd by the Archbiſhop of *Mentz*, or his Deputies, and were divided into many Counties and Lordſhips, *viz. Schartzburg, Kirchberg, Keſernburg, Schoneberg, Gleicken, Sangerhauſen. Frankenſtein, Salitza, Heldrungen, Dreffert, Apolda, Vargila*, &c. as Dr. *Nicholſon* informs us. *Conrad* II. made *Ludowick* Count of *Schomberg* Count of *Thuringia*; and *Lotharius* II. made *Ludowick*'s Grandſon Landgrave. It continued in this Line till the Death of Landgrave *Herman* in 1226, when *Henry* Duke of *Brabant* got *Heſſia*; and *Thuringia* fell to *Henry* Marquis of *Miſnia*: Since which, it has been under the Houſe of *Saxony*.

The chief Places here are, 1. *Erfurt*, the Metropolis, one of the largeſt Cities in *Germany*. Dr. *Nicholſon* thinks, it took its Name from a Ford or Ferry over the *Hiera*, on which it ſtands. There are 3 Baronies and 72 fair Villages ſubject to it, and 'tis about as large and beautiful as *Cologne*. 'Tis not certain when it was firſt built; but it was reckon'd an ancient City in the Days of *Boniface* Archbiſhop of *Mentz*, when Pope *Zeechary*, as appears by his Letter to that Archbiſhop, made it a Biſhoprick. It lies in a pleaſant and fruitful Plain, about 60 Miles S. W. from *Leipſick*, and 60 S. from *Halberſtat*, about Long. 30. 27. Lat. 51. The neighbouring Country abounds with all ſorts of Corn and good Vines; and the Inhabitants get much Money by ſelling their Corn, Wine, and Woad, at their two great Fairs, the one in *Trinity* Week, and the other at *Martinmaſs*. Their publick Edifices, eſpecially their Churches and Abbies, are very beautiful. They have alſo a ſtately Caſtle called *Cirioxberg*, and a famous Univerſity. When they embrac'd the Reformation, they put themſelves under the Elector of *Saxony*, which occaſioned many Conteſts betwixt that Prince and the Elector of *Mentz*. They afterwards attempted to make themſelves an Imperial City; but in 1664, the Archbiſhop reduc'd it by the Aſſiſtance of the *French*: But by the Treaty of *Leipſick*, 17 of the Villages, with their Dependencies, were given to the Elector of *Saxony*. They have the largeſt Bell here in *Germany*, called *Suſanna*.

2. *Weimar*: 'Tis a large, neat, and well built City, mid-way betwixt *Erfurt* and *Jena*, which gives Title to a Prince of the Family of *Saxony*, and is famous for the Birth of Duke *Bernard* of *Saxe-Weimar*, one of the greateſt Captains of the laſt Century. 'Tis ſuppoſed to derive its Name from *Winemarkt*, becauſe it has a great Trade in Wine. 'Tis very ancient; for the Emperor *Otho* II. held a General Diet here in 975. It has a ſtately Palace, where the Landgrave us'd to reſide. It lies about 50 Miles S. W. from *Leipſick*, and about 15 E. from *Erfurt*.

3. *Jena*, on the Banks of the *Sala*, about Long. 30. 55. near Lat. 51. about 23 Miles E. of *Erfurt*. 'Tis famous for an Univerſity, and a great Concourſe of Learned Men. It was founded by *John Frederick* Elector of *Saxony*, and had many Privileges from the Emperors *Charles* V. and *Ferdinand*. The great Philologer *J. Lipſius* was bred here. Some derive the Name from the Hebrew Word *Jain*, Wine, and think that the *Jews* founded the Town. Others bring it from the Heathen God *Janus*; but neither of the Conjectures ſeem to be well founded. The Town is well fortified with Walls and Turrets, and ſtands in a pleaſant Vale, which abounds with Vines. The Dukes of *Saxony* gave the Univerſity a Library, which increaſes every Day.

4. *Gotha*, on the *Leina*, about 18 Miles S. W. from *Erfurt*. Some derive the Name from the *Gothick* Troops, who founded it in their March to *Italy*. It was only a mean Village, till fortified by *William* Archbiſhop of *Mentz* in 964. Their chief Trade is in Woad, of which they have three Sorts: The firſt they ſow about *Chriſtmas*; the next in the Spring, Summer, and Harveſt, of which they have three Crops: The third grows wild. This Herb is a ſovereign Balſamick, and cures Wounds almoſt with a Touch, if taken in time. It reſembles *Plantein*, but has a longer Leaf. The Roots fatten and improve barren Ground exceedingly; and being brought over to *England* with Clover, Cinquefoil, *&c.* grows with good Succeſs in *Northamptonſhire*, and other Places of *England*. This Town is Capital of a Dutchy, and gives Title to a Prince of the Family of *Saxony*, where they have a good Caſtle, that was demoliſhed by the Emperor *Maximilian* II. in 1567; but ſince rebuilt by *Erneſt* Duke of *Saxe-Gotha*.

5. *Orla-*

Digitized by Google

5. *Orlamund*, or *Erlamund*, on the ſame River, a ſmall Town, which gives Title to a County, 8 Miles E. from *Jena*.

6. *Temmenberg*, a little Town, about 15 Miles W. from *Gotha*. It was ſack'd by the Imperialiſts in 1567.

7. *Eiſenach*, about 20 Miles W. from *Gotha*, on the River *Noſa*, the Capital of a Dutchy of the ſame Name, which gives Title to a Prince of *Saxony*. The Univerſity here was founded in 1555. The Inhabitants have a conſiderable Trade in Iron.

8. *Mulhauſen*, an Imperial Town, under the Protection of the Elector of *Saxony*, at the Foot of a Mountain, about 20 Miles N. W. from *Gotha*, and 30 from *Erfurt*.

9. *Marchſul*, ſome Leagues from *Eiſenach*, noted only for a fine Caſtle, the uſual Reſidence of the Dukes of *Saxe-Gotha*.

The County of Schwartzburg,

IS about 40 Miles long, and 25 broad, has *Thuringia* on the S. *Naumburg*, *Merſburg*, and *Halle*, on the W. It takes its Name from the Caſtle of *Schwartzburg*, on the River *Schwartza*, which gives Title to an ancient Family, divided into the two Branches of *Arnſtadt* and *Rudolſtadt*. This Caſtle lies in the upper Part of the Country. The chief Town is *Sunderhauſen*, a large open Town in the lower Part of the County. The other Towns are, *Frankenhauſen*, *Herſingen*, *Kirderbruch*, and *Keula*; but have nothing of Note.

To this Country belongs *Gleichen*, on the River *On*, an ancient Caſtle, which gives Name to a County, and formerly Title to a Branch of the Family of *Schwartzburg*, extinguiſh'd in 1639. The Elector of *Mentz* inveſted the Counts of *Haiſeld*, who poſſeſſed Part of this County, with the Caſtle of *Gleichen*, as a Fief depending on his Church. The other Part conſiſting of ſome Bailiwicks, was given to the Counts of *Hohenlo* by the Dukes of *Saxony*, upon the Failure of the Family of *Gleichen*, as *La Foreſt* informs us.

The County of Hohenſtein,

LIes N. of *Schwartzburg*, is about 25 Miles in Length, and 10 in Breadth. The chief Town is *Northauſen*, an Imperial City, about 40 Miles N. W. of *Erfurt*. It ſaid to to have been built by the Emp. *Theodoſius* II. or *Merovius* King of *France*, about 447. 'Tis noted for ſome Diets of the Empire that have been held here, but otherwiſe not remarkable. 'Tis under the Protection of the Elector of *Saxony*.

The County of Stolberg,

LIes N. of *Schwartzburg*, is about 20 Miles long, and 10 broad. The chief Town is of the ſame Name, and has a large Caſtle, ſaid to be built by a *Roman*, the Founder of the Family of *Stolberg*, divided into the two chief Branches of *Iſenburg* and *Gudern*, and the latter into thoſe of *Stolberg* and *Ortenberg*. They are Sovereign Counts, and have alſo the County of *Vernigerode* in the Principality of *Halberſtat*. The Caſtle of *Stolberg* lies near the Borders of *Halberſtat*.

The County of Mansfeld.

SOme derive the Name from *Mannus*, Son to *Twiſco*, the Father of the *Germans*; but this ſeems to be fabulous. Others ſay, That *Heger* Count of *Mansfeld* was one of the Commoners at the *Britiſh* King *Arthur*'s round Table, and built *Mansfeld* in *Nottinghamſhire*; which is as improbable as the former. Dr. *Nicholſon* ſays, 'tis one of the four *Hercynean* Counties, the other three being *Stolberg*, *Hohenſtein*, and *Ragenſtein*. It has the River *Sala* on the E. *Schwartzburg* on the W. Part of *Anhalt* on the N. and *Thuringia* on the S. 'Tis about 30 Miles long from E. to W. and about 18 where broadeſt from S. to N. It abounds with Mines of ſeveral ſorts, which bring great Profit to the Inhabitants. Among the reſt, there is that called the *Scheifferſtein*, peculiar to this and the neighbouring Provinces. 'Tis a blackiſh gliſtering kind of Salt, which melted and bray'd, yields a vaſt Quantity of Copper, and much Silver. *Hubenſak*, who comments on Part of *Munſter's* Geography, ſays, there is ſcarce the like of it in the World. Out of this Stone, ſays he, the Inhabitants melt Copper, each Hundred of which contains 10 or 12 Ounces of

Digitized by Google

pure Silver; and this Stone abounds so much in the Country, that 'tis dug up every where. He adds, That in these Stones, there are the lively Representations, by fair Copper Strokes, of Fishes of several Sorts, Frogs, Water-Rats, and other Animals, that abound in a neighbouring Lake; and the like is asserted by others.

Dr. *Nicholson* says, the more sober Genealogies derive the Pedigree of the Counts of *Mansfeld* from *Burchard* V. Count of *Querfort*, on whom *Frederick Barbaroſſa* bestowed this County, for his great Service in the *Holy Land*. His Great Grandchild *Burchard* was the first who took the Title of Count about 1250, and his Successors have enjoy'd that Honour ever since; but do some sort of Homage to the Elector of *Saxony*. The most remarkable among them have been, 1. *Walerad*. Privy-Counsellor to the Emperor *Sigismund*, to whom he did great Service, and improv'd his own Estate. 2. *John George*, who was Deputy-Governor of *Saxony* under Duke *Auguſtus*. 3. *Peter Erneſt*, Governor of *Luxemburg* under *Charles* V. and *Philip* II. who employ'd him in their Wars againſt *France* and the *Netherlands*. 4. *Albert*, a great Friend to *Luther*, and to *John Frederick*, the depos'd Elector of *Saxony*, in whose Quarrel he loſt his Country, and afterwards defended *Magdeburg* bravely againſt the Imperialists. 5. *Erneſt*, who perform'd great Things in the Wars of *Germany* againſt *Ferdinand* II. in behalf of the Elector *Palatine*, who was chosen King of *Bohemia*. He was observ'd to be very happy in raising Armies, but unfortunate in Battle. This Family is now divided into 4 or 5 Branches, which has made them less considerable than formerly. The two chief Branches are those of *Bornſtet* and *Eyſt ben*. The latter stays in the County, where they have nothing but the Hunting, Fishery, and Patronage, the rest being sequestred into the Hands of the Elector of *Saxony*. *La Foreſt* says, That some of the young Counts in the 16th Century opposed several Points of the *Lutheran* Doctrine, which gave Rise to a Sect called *Manſeldians*.

The Metropolis of the Country, and the Seat of the Governing Counts, is *Eyſtleben*, which derives its Name from the great Quantity of Iron Ore, by the Natives called *Eyſen*, found in those Parts, and not from the *Egyptian* Goddess *Iſis*, whom some fabulous Historians alledge to have wander'd into these Parts. 'Tis chiefly remarkable for the Birth and Death of *Luther*; the former in 1483, and the latter in 1564. The Citizens set up his Statue of Stone over the Door of the House where he was born, with this Inscription:

Hoſtis eram Papæ, Sectorum peſtis & hujus:
Vox mea, cum Scriptis, nil niſi Chriſtus erat.

'Gainſt Pope, and Popelings, I did War declare:
But Chriſt I preach'd, and wrote, with utmoſt Care.

Forſter, Superintendant of this Church, says, a great Fire in 1601 burnt the Count's Palace, and 250 Houses; but the Church where *Luther* was baptiz'd, the House where he was born, and that where he died, escaped the Flames, tho those about 'em were consumed. The Imperialists, in the late Civil Wars, destroyed his Monument, and defaced the Inscription. The Town is but small, and lies about 8 Miles from *Manſeld* S. E. and 15 N. W. from *Halle*. This Town suffer'd much in the 11th Century, during the Wars betwixt the Emperor *Henry* IV. and the *Saxons*, and likewise during the Civil Wars of *Germany*. 'Tis fortified with a good Citadel, and reaps considerable Profit from its Quarries of black Stone, and two Annual Fairs.

2. *Manſeld*, about 5 Miles N. W. from *Eyſt ben*, an old ruinous City on the River *Vipren*: 'Tis defended by a strong Castle on the top of a Hill, which lay desolate many Years; but was repaired and fortified in 1547.

3. *Wipren*, a Town of good Trade, 8 Miles W. from *Manſeld*.

The other Towns are, *Arnſtein* and *Querfurt*, noted for little, but giving Names to little Counties belonging to the Branches of this Family.

The Prince of this Country being an Hereditary Count of the Empire, we shall here once for all give an Account of that Dignity: The Learned *Camden*, in his Reign of Queen *Elizabeth*, speaking of *Thomas Arundel* of *Wardour*, who was made a Count of the Empire by the Emperor *Rudolph* II. takes Notice of his Patent given to him and his Heirs

Digitized by Google

Heirs of both Sexes for ever; and adds, That those Counts have a Voice in the Imperial Diet, may purchase Estates in any Part of the Emperor's Dominions, may list Voluntiers, and cannot be sued in the Empire, but only in the Imperial Chamber. The Curious may find an Account of the Rise of this Title, and of the several Sorts of Counts, in *Selden*'s Titles of Honour, *Part II.* But that which properly relates to Counts of Territories, such as those of *Mansfeld*, is, That they were anciently created and invested by the Delivery of one or more Banners for Seisin of their Territories, as Dukes were invested, and the Surrender of 'em was made by re-delivering those Banners to the Emperor; but of late, they are sometimes made by Charter, or Word of Mouth, kneeling before the Emperor. They have Caps as the Dukes, and their Coronets are only distinguished by their Richness; those of the Dukes having Precious Stones and Gems in them. There are other Counts who are not invested with any Territory, and yet bear the Titles of some Castles or small Territories they possess, and are conceived to be the Posterity of the Counts of the Old Empire, before Feuds were annexed to this Dignity, as *Selden* informs us.

Sax-Naumburg.

IT gives Title to a Prince of the Family of *Saxony*, and is Capital of the Bishoprick of that Name, founded in 952 by the Emperor *Otho* I. at *Zeitz*, and transferred hither in 982. *Nicholas Amsdorf* brought in *Lutheranism* in the 16th Century, and after his Death the Elector of *Saxony* took the Administration of it, and it was yielded to him by the Treaty of *Passau* in 1552. His Successors did afterwards appropriate it, and it gives Title to a Prince of *Saxony*, of the *Ernestin* Line, who is called Administrator. The Town lies on the *Sala*, 25 Miles S. W. from *Leipsick*, and 15 S. of *Mersburg*. It was formerly under the Archbishop of *Magdeburg*, and has a Territory about 25 Miles long, and 15 broad.

Sax-Mersburg,

WAS formerly a Bishop's See, Suffragan to *Magdeburg*, and likewise an Imperial Town. The Bishoprick was founded here in 952 by the Emperor *Otho* I. The Duke of *Saxony* introduc'd *Lutheranism* about 1562, when he was Administrator; and 'tis now apply'd as a Portion for one of the younger Sons, to whom it gives the Title of Duke. The Town lies upon the River *Sala*, and, as *La Forest* says, pretty large, and well Peopled, about 18 Miles N. W. of *Leipsick*. Dr. *Nicholson* says, That some derive the Name from *Mars*, and that the *Saxon* Idol *Irmensul*, under which Name they worship'd *Mars*, is by some Antiquaries supposed to have stood here. The Cathedral is the only Thing worth Notice in the Town, and near it there's a Library of many ancient Manuscripts, but ill kept; among which there is the Books of *Samuel* and *Kings* in Latin, in a fair ancient *English Saxon* Character.

Sax-Altenburg,

HAS *Thuringia* on the N. Part of *Franconia* on the W. and S. and *Voitland* on the E. The Town of *Altenburg*, from whence it takes its Name, lies on the River *Pleis*, 24 Miles S. of *Leipsick*, and 46 W. of *Dresden*. It was an Imperial City, till *Frederick* Marquis of *Misnia* took it in 1308, and united it to that Country. It has a fine Castle, where the Dukes of *Saxony* sometimes kept their Court. The Town is pretty, and was formerly called *Osterland*. *La Forest* says, That it has been possessed by the Duke of *Sax-Gotha* since 1672. Some reckon it a Part of *Misnia*; but *Mill* places it as a Dutchy by it self.

Misnia, *or* Meissen.

THis Country is so called from a City of the same Name, formerly a Bishop's See, but now inconsiderable. It has the Title of a Marquisate, has *Lusatia* on the E.

Thus

Thuringia on the W. the Dutchy of *Saxony* on the N. and *Bohemia* on the S. 'Tis a large Country, and is uſually divided into 4 Parts: 1. *Miſnia*, properly ſo called, and ſometimes named *Oſterland*, which contains the Cities of *Dreſden*, *Konigſtein*, *Pirna*, the old Fort of *Sonnenſtein*. 2. The *Ertzgebergiſchecreyſs*, a Mountainous Country, comprehending the Mine-Towns, with ſome others. 3. The Circle of *Leipſick*, which, beſides that City and its Dependencies, has the Counties of *Rochlitz*, *Waldheim*, and *Gerirgſwald*, with other Places of Note. 4. *Voitland*, formerly reckon'd a diſtinct Principality. Beſides theſe Provinces, it has the Biſhopricks of *Naumburg* and *Merſburg*, which we have already deſcrib'd, becauſe *Moll's* Map makes them ſeparate, and the Biſhoprick of *Meiſſen*. Part of the Revenues of thoſe Biſhopricks are applied to maintain a Number of Canons in every Cathedral; but the greateſt Share is made uſe of to maintain the younger Sons of the Elector, and give Titles to them, as Dr. *Nicholſon* informs us. According to *Baudrand*, *Sax-Halle*, and the Dutchy of *Sax-Gotha*, which we have already deſcrib'd, were reckon'd Part of this Country.

The Plains of *Miſnia* are very fruitful in all ſorts of Corn, and their Hills abound with rich Minerals. On the Banks of the *Elb*, about *Dreſden* and *Meiſſen*, there are large Vineyards, but the Wine not very good. They have alſo Salt-Pits in the Biſhoprick of *Merſburg*, which were ſo much outdone by thoſe of *Halle*, formerly mentioned, that they came to be neglected. The Country abounds with Forreſts, which have Plenty of Veniſon, and ſome of them Bears. Their chief Rivers are, the *Elb*, *Mulda*, *Pleiſs*, and the *White* and *Black Elſters*. They have alſo ſome leſſer ones, and all of them abound with Fiſh, eſpecially Carps, as large and numerous as any Part of *Europe*.

Hiſtorians derive their Original from the *Miſi*, a People of *Aſia*, who in *Cicero*'s Time, as appears by his Oration for *Flaccus*, was ſo contemptible, that it was reckon'd the greateſt Reproach to call a Man *Miſorum ultimus*; but the preſent *Miſnians* are ſo much improv'd, that they are noted for their Courteſy, Affability, neat Apparel, and good Shape; ſo that it has become a Proverb, *That the Miſnians make the beſt Figure of any Germans*; and *Albinus* commends them for their Chaſtity, to which their ſevere Laws againſt Adultery has probably contributed.

Their chief Cities are, 1. *Dreſden*, the uſual Seat of the Elector. Dr. *Brown* gives the following Deſcription of it: 'Tis one of the moſt remarkable Places in *Germany*: The Fortifications are very ſtrong and modern, the Baſtions fac'd with Stone, and in ſome Places defended by a double Ditch. The *Elb* runs through the Town, and divides it into Old and New by a ſtately Bridge of 17 Arches. The New Town, where ſtands the Elector's Palace, is the moſt beautiful and beſt fortified, and as well worth a Traveller's View as any Place in *Germany*. Dr. *Nicholſon* thinks, it derives its Name from three Lakes near it, which in the Language of the Country they call *Dreyen Seen*. Dr. *Brown* ſays, the Palace is very large and ſpacious, and, beſides the noble and ſplendid Apartments for the Court, is remarkable for a Houſe for Wild Beaſts, the Arſenal, and Stables. The Hall of the Palace is very ſpacious, and remarkable for the many Draughts of Cities, Pictures of Giants, and the Habits of Nations, very well done. But the moſt remarkable, and indeed ſurprizing, Thing, is the Collection of Rarities, divided into ſeveral large Chambers: The firſt contains all ſorts of Mechanical Inſtruments, made with great Art; and in the other Chambers, among many other Things, theſe following are moſt taken Notice of; A Tube-Glaſs 4 Ells long; a large Blue *Turkiſh* Glaſs; many Artificial Works of Coral; Fowls and Cups made out of Mother of Pearl; Drinking-Cups in the Shape of Dragons, Elephants, *&c.* Caſtles of Gold, and of Mother of Pearl; Cups and Fowls made of *Nautili*, and other Shells; a fine Oſtrich made out of its own Shell, with Feathers of Gold; a Cup about a Foot long, richly ſet, made of a Stone or Ball taken out of an Ox's Stomach; a Stone as big as one's Fiſt, reſembling a Bezoar, taken out of a Horſe; a Purſe of *Linum Incombuſtibile*; Silver Ore almoſt pure, in Strings and Shoots, from the Mines of *Freyberg*; a natural Croſs of Silver Ore; 120 Heads carv'd on the outſide of a Cherry-Stone;

Digitized by Google

ry-Stone; a Chryſtal Cabinet ſold by *Oliver Cromwel*, in which is kept a Ring with Stones, in Shape of a Caſtle; K. *Charles* II. of *Great Britain* carved in Iron; the Head of K. *Charles* I. a Glaſs Organ; ſeveral unpoliſh'd Topazes, 10 Inches in Diameter; a Cup of Topaz; Emeralds an Inch in Diameter, as they grow in the Rock, reſembling *Vitriolum Marinum*; Thunder-Stones, which ſmell of Fire; Rocks of all ſorts of Ore, with the Names of the Mines whence they were dug upon them; Figures of Fiſhes in Stones out of *Manſfeld*, formerly mentioned; all Sorts of Stones found in *Saxony* and *Miſnia* poliſh'd; Two large Pieces of pure Virgin-Gold out of the Mine; a Hart with a Cabinet in his Side, containing all Medicines which that Creature affords; a White Hart as big as the Life, made of the Filings and Shavings of Hartſhorn, which reſembles Plaiſter; Figures printed in Trees; a Spur in Part of a Tree; Horns in Trees, *&c.* In another Chamber, there is all ſorts of Mathematical Inſtruments and Books, with Maps, and a Horn, which they alledge to be that of a Land-Unicorn, becauſe 'tis neither wreath'd nor hollow. Among other remarkable Pictures and Draughts, there is the Siege of *Jeruſalem*, done by *Collier*, valued at a high Rate; one of *Luther*, &c. and a rolling Buller, to demonſtrate a perpetual Motion. Of Clock-works, there is vaſt Variety; among others, a Cuckow ſinging, a Horſeman riding, a Ship under Sail, an old Woman walking, a Centaur running and ſhooting, and a Crab crawling on a Table; which at once divert and amaze the Spectators. In the Stables, which are very ſtately and large, there are many fine Horſes, with an Iron Rack and a Copper Manger for each. Near the Stables, there's a curious Fountain and Pond, ſurrounded with Balliſters, for watering and waſhing the Horſes, and a long Arch'd Walk, painted with curious Horſes. Over this Walk, there is a Gallery with the Pictures of all the Dukes and Electors of *Saxony* in their Robes and Military Habits. Among the reſt, there are the Pictures at large of *Hengiſt* and *Horſus*, two *Saxon* Dukes or Generals, under whom the *Saxons* invaded *England*, drawn according to the Deſcriptions given of them by ſome of our *Engliſh* Romantick Hiſtorians. In other Chambers over the Stables, there are two Beds of Marble, a Horſeman of Silver, mov'd by a Spring, carrying a Cup of Wine in his Hand; a Pair of very fine Piſtols, with the Stories of the Old and New Teſtament upon them; a Glaſs Gun; another which diſcharges 40 times at once, *&c.* In another Chamber, there are many rich Sleds, with Accoutrements for Cavalcades on the Ice and Snow in Winter; a white Bear's-Skin ſtuff'd, ſitting in a Chair, from whence, by a Spring, it riſes up when the Spectators come near it, with the Skins of Tigers and Lions; a Caſſower's Skin; very fine Armour for Men and Horſes; a Picture of a *Laplander*, with one of their Magick Drums; and a Chamber full of curious Hunting-Tackle and Arms. The Arſenal is an oblong ſquare Building, containing near 400 Braſs Pieces of Ordnance, with a great Quantity of Muskets, and other Arms, with ſeveral Suits of Armour, and Coats of Mail of Silver, *&c.* Here alſo there is the Repreſentation of *Hungarian* and other Horſe and Foot, drawn up in Parties, with their Commanders at their Heads, made ſo as to turn round.

In the Hunting-Houſe in the Old Town, there are kept 15 Bears, with Fountains and Ponds, in which they waſh, with ragged Poſts ſet up round them, by which the Bears climb to the Scaffolds on the top, where they ſun and dry themſelves after waſhing. The *Horn-Gallery* here does likewiſe deſerve Notice, into which we paſs through three Chambers, painted with all ſorts of hunting of Fowls and Wild-Beaſts. In the Houſe where the Wild-Beaſts are kept, there is a Four-leg'd Beaſt called a *Marian*, which hangs on the Boughs of Trees by the Tail; a Wild Mountain Cat of extraordinary Size; 10 young and old Bears, Black and White; 2 Lions, and 10 Lioneſſes. The *Italian* Garden and Summer-Houſe in the Suburbs has two noble Obelisks, two very fine Fountains, a Theatre, and a good Landskip.

This City lies about Long. 32. 45. Lat. 51. 5. 55 Miles S. E. of *Wittenberg*, about 40 S. E. of *Leipſick*, and 20 N. from the Borders of *Bohemia*.

La Forest ſays, the City is large, and well Peopled, and in the Old Town, beſides the Caſtle,

Digitized by Google

Caſtle, which is very large, is ſtill to be ſeen the Fortifications made by *Charlemagne*. Its Arſenal is one of the beſt furniſh'd in *Germany*. This City was poſſeſſed by the Biſhops of *Miſnia* from 952 till 1274, that one of the Biſhops agreed to yield it to *Henry the Illuſtrious*, Marquis of *Miſnia*. The chief Church of *Dreſden* is a very fair Structure, and the Citizens contend with thoſe of *Halle* for ſpeaking the beſt *High-Dutch*.

The *Atlas Hiſtorique* has a very large Tree of the Family of *Saxony*. Some pretend to derive their Original from *Harterick*, the moſt ancient K. of the *Saxons*, who reign'd before our Saviour, and defeated *Barbiſta* K. of the *Goths*: That he was ſucceeded by *Anſerick* his Son, about the Time of our Saviour, and he by *Wilkin*; but as to theſe, Authors differ. Some of his three next Succeſſors took the Title of Dukes, and others of Kings. *Luder*, the 4th from *Wilkin*, is ſaid to have carried his Armsth rough *France* into *Spain*. His Succeſſor *Wilgiſte* is ſaid to have invaded *Gaul*. *Hengiſt*, who invaded *England*, is ſaid to have been the 4th from *Luder*. *Sigbricht*, the 3d from *Hengiſt*, is ſaid to have founded the Family of *Friezland*. *Sighard*, the 6th from *Sigbricht*, made War on *Gallia Belgica*, and he and his immediate Predeceſſors had great Wars with the *Saxons*. *Witikind*, the 5th from him, was that Prince ſo famous in Hiſtory for making War againſt *Charles the Great*, who, after having conquer'd *Saxony*, made him Duke of *Angria*. *Wighert* his Brother ſucceeded; and from the Sons of his Succeſſor *Ludolph*, proceeded other Branches, particularly *Bruno*'s, from whom came the Imperial Branch. This *Ludolph* is ſaid to have been the firſt Hereditary Duke of *Saxony*. His Son *Otho* was Father to the Emperor *Henry the Fowler*; and *Otho*'s eldeſt Son, *Lutolph* Duke of *Swabia*, founded the Branch of the Marq. of *Saxony*. *Rixa*, the 3d from him, married *Lotharius* of *Supplenburg*, who was choſen Emperor after the Death of *Henry* V. by whom her Daughter *Gertrude* brought *Saxony* to *Henry the Proud*. His Son *Henry the Lion*, formerly mention'd, was diſpoſſeſs'd of his Dominions by *Frederick* I. and ſucceeded, ſome ſay, by Force, and others by Agreement, by *Bernard*, the youngeſt Son of *Albert the Bear* of *Brandenburg*, who was ſucceeded by *Albert* I. from whom, in a direct Line, came the Branch of *Sax-Lawenburg*, which was extinguiſh'd, as formerly mention'd, in 1689, after having produc'd ſeveral great Princes. From *Albert* I. after 8 Deſcents, came *Frederick the Pacifick* in 1411; from whom ſprung the *Albertin* and *Erneſtin* Branches. From him, after 7 Deſcents, came *John George* I. who was born in 1585, and died in 1656. From him, after 4 Deſcents, came *Frederick Auguſtus*, the preſent Elector, who was choſen King of *Poland* in 1700, and renounc'd it by Treaty with the King of *Sweden* in 1706. He was born in 1670, and his Son the Prince Electoral, *Frederick Auguſtus*, was born in 1696. From *John George* I. abovemention'd, came the Branches of *Sax-Merſburg*, and *Sax-Zeitz*. The Prince of the former is *Maurice William*, born in 1688. The Prince of the latter is alſo *Maurice William*, born in 1664; and by a Daughter of *Brandenburg*, has *Frederick Auguſtus*, born in 1700. From *Chriſtian* of *Merſburg* came the Branch of *Zorbich*, the preſent Prince is *Auguſtus*, who was born in 1655. From him alſo proceeded the Branch of *Lauchſtet*, of whom there remains only *Charlotta Auguſtina*, who was born in 1691. From him came likewiſe the Branch of *Spremberg*, whoſe Prince *Henry* was born in 1661. From *Maurice* of *Zeitz* came the Branch of *Pegaw*, whoſe Prince is *Frederick Henry*. From *Maurice* alſo came *Chriſtian Auguſtus*, Biſhop of *Raab*, and Cardinal of *Sax-Zeitz*, who was made uſe of to perſwade the preſent Elector of *Saxony* to turn Papiſt, and has labour'd much to bring the *Hungarians* to an Accommodation. We have mention'd before, that the *Erneſtin* Branch proceeded from *Frederick the Pacifick*; and from *John Frederick*, the firſt of this Line, proceeded that of *Altenburg*, which was extinguiſh'd in 1672. From *John* II. of this Line came the Branch of *Sax-Gotha*, whoſe Prince is *Frederick*, born in 1676, whoſe eldeſt Son *Frederick* was born in 1699. From *Erneſt* I. of this Branch came the Line of *Meinungen* and *Coburg*, whoſe Prince is *Bernard*; and his eldeſt Son *Erneſt Louis*, born in 1672, is one of the Emperor's Generals. From *Erneſt* came likewiſe the Branch of *Eyſenberg*, whoſe Prince *Chriſtian* was born in 1653. From *Erneſt* likewiſe came the Branch of *Saalfeld*, whoſe Prince is *John Erneſt*, whoſe eldeſt Son *Charles Erneſt* was born in 1692. From the

Digitized by Google

the first *Ernest* likewise came the Branch of *Hilburghausen*, whose eldest Son *Ernest Frederick* was born in 1681. From *William* of *Weimar*, the 7th of the *Ernestin* Line, came the Branch of *Sax-Weimar*, whose Prince *William Ernest* was born in 1664. From *John George* I. of the *Albertine* Line, did also proceed the Branch of *Sax-Weissenfels*, or of *Hall*, whose Prince is *John George*, born in 1677. From *Augustus*, the first of this Branch, came also that of *Barby*, whose Prince is *Henry*, born in 1657. His eldest Son is *Frederick Henry*, born in 1692.

The Elector, as Great Marshal of the Empire, commands the Garison where the Diet of the Empire sits: Accordingly the Elector in *Charles* Vth's Time, when the Emperor posted his Guards at the Gates of *Augsburg* in 1530, protested against it, obliged the Emperor to remove them, and to give Security never to invade his Privileges any more. He has also the Right to appoint the Meeting of all Diets, except the Collegial Diets, which are conven'd by the Elector of *Mentz*; but he is obliged to give Notice of it to the Elector of *Saxony*, who orders Count *Pappenheim* to acquaint the Members with it; and if the Elector of *Saxony* be not present, the Archbishop gives Notice to the Count. The Elector of *Saxony* is also Vicar of the Empire during an *Interregnum*, in all Places not subject to the Vicariate of the Count *Palatine* of the *Rhine*, as the Resident of *Brandenburg*, formerly mentioned, informs us.

The Titles of the Elector of *Saxony* are; By the Grace of God, Duke of *Saxony*, *Juliers*, *Cleve*, *Berg*, *Engers*, *Westphalia*, Arch-Marshal, Elector of the Empire, Landgrave of *Thuringia*, Margrave of *Misnia*, of the *Upper* and *Lower Lusatia*, Count and Prince of *Henneberg*, Count of *La Marck*, *Ravensberg*, and *Barby*, Lord of *Ravenstein*, &c.

The Pretensions of the Elector of *Saxony* are, 1. To the Dutchies of *Juliers*, *Cleve*, and *Berg*, the Counties of *Marck* and *Ravensberg*, and the Lordship of *Ravenstein*, because *Maximilian* invested the Elector of *Saxony* with it, which was confirmed by the Marriage of the Elector *John Frederick* with *Sibylla*, Daughter to *John* Duke of *Cleve*, in 1526. But after *John William*, the last Duke, died in 1573, *John Sigismund*, the Elector of *Brandenburg*, took Possession of it, and that Family has still kept it. 2. To *Erfurt*, because 'tis the Capital of *Thuringia*, and is under their Protection; but this is always disputed with him by the Elector of *Mentz*. 3. To the Dutchy of *Engers* and *Westphalia*, especially *Sax-Lawenburg*, which *John*, the first Duke of *Sax-Lawenburg*, inherited from *Bernard*, Son to *Albert the Bear*, whose Successors possess'd it till the Line was extinguish'd, as above-mention'd, which has occasion'd Debates betwixt several Princes, but chiefly betwixt the Elector of *Saxony* and the Duke of *Brunswick-Lunenburg*; and it was left to the Emperor's Arbitration, thô the Elector has quitted his Pretensions to the House of *Brunswick* for 11 Tun of Gold.

The Pretensions of the Dukes of *Saxony* are the same with those of the Electors; but the latter pretend also to the Counties of *Eysenburg* and *Budingen*, in case that Branch fail.

The Dominions of the Elector of *Saxony* are, 1. The Electoral Circle. 2. That of *Misnia*. 3. That of *Lipsick*. 4. That of the Mountains. 5. The Bishopricks of *Misnia* and *Wurtzen*. 6, and 7. The Marquisates of *Upper* and *Nether Lusatia*. 8. The Towns of *Temnitz* and *Torfurt*. 9. The Bailiwick of *Plotn*. 10. Of *Vorgtsberg*. 11. Of *Newstat* on the *Orla*. 12. Of *Arnshaug*. 13. Of *Ziegenruck*. 14. The Burgraviate of *Magdeburg*, the Countries of *Weissenfels*, *Merseburg*, and *Naumburg*, the Lordship of *Schomburg*, the Abbey of *Quedlinburg*, the Towns of *Mulhausen*, and *Northausen*; but all those under Number 14, belong at present to the Family of *Brandenburg*.

The Titles of the Dukes of *Sax-Eysenach* are, Dukes of *Saxony*, *Juliers*, *Cleves*, *Engers*, and *Westphalia*, Landgraves of *Thuringia*, Margraves of *Misnia*, Counts and Princes of *Henneberg*, Counts of *La Marck* and *Ravensberg*, Lords of *Ravenstein*, &c.

Their Dominions are, the 8 Bailiwicks of *Eysenach*, *Lichtemberg*, *Gerstingen*, *Ringolsthen*, *Kalten*, *Nordheim*, *Kreinburg*, *Alsted*, and *Zilbach*. 9. The Town of *Ostheim*. 10. The Bailiwick and Town of *Creutzberg*. 11. Of *Jena*.

The Titles of the Dukes of *Sax-Gotha* are the same with the former, only they add the Lordship of *Tonna*; and the other

Digitized by Google

Branches of this Family have the ſame Titles, but without *Tonna*.

Their Dominions are thoſe of *Gotha*, the three Lordſhips of *Tonna*, *Wachſenburg*, and *Ichterſhauſen*. 4. The Bailiwick and Town of *Kranichfeld*. 5. The Biſhoprick of *Valckenrad*, and ſeveral Towns.

The Titles of the Prince of *Weiſſenfels* are the ſame with thoſe of *Gotha*, only they add Count of *Barby*, and leave out *Tonna*.

Their Dominions are, 1. *Weiſſenfels*. 2. The Principality of *Querfurt*. 3. The Counties of *Barby*, *Bybra*, *Thomasbruck*, *Roblingen*, *Lauchа*, and *Michelu*. 4. The Bailiwicks of *Langenſalſa*, *Sangerſhauſen*, *Eckersburg*, and *Sachſenburg*.

The Title of the Prince of *Merſburg* is, Adminiſtrator of that Biſhoprick, with the reſt of the Titles of *Gotha*, except *Tonna*.

Their Dominions are, 1. The Biſhoprick of *Merſburg*. 2. The Bailiwicks of *Lutzen*, *Lauchſtet*, *Bitterfeld*, *Zorbig*, *Brene*, and ſome Towns in *Nether Luſatia*.

The Titles of the Prince of *Sax-Zeitz* are, Adminiſtrator of the Biſhoprick of *Naumburg*, with all thoſe of *Gotha*, except *Tonna*.

Their Dominions are, 1. *Zeitz*, *Naumburg*, and *Pegau*. 2. *Sula*, with its Diſtrict. 3. *Schleuſigen*, and its Diſtrict. 4. *Plawen*, *Voigtsberg*, *Oelſnitz*, *Weida*, *Newkirchen*, *Schaeck*, *Adorff*, and *Pauſa*.

The Dominions of the Branch of *Coburg* are. 1. The Town of *Coburg*. 2. *Sonneberg*. 3. *Neuhaus*, and ſeveral Cloiſters.

The Dominions of *Meinungen* are, 1. The County of *Henneberg* and *Meinungen*. 2. Of *Maſfeld*, and *Weſſung*. 3. of *Saltzungen*, and *Sond*.

The Dominions of *Romhild* are, 1. *Romhild* and *Konigsberg*. 2. The Bailiwicks of *Theimar* and *Beringen*.

The Dominions of *Eiſſenberg* are, 1. The Bailiwick and Town of *Rheda*. 2. Of *Chamberg* and *Remneburg*. 3. The Town of *Eiſſenberg*.

The Dominions of *Helburſhauſen* are, 1. The Bailiwick and Town of *Eiſfeld*. 2. Of *Veldorf*, and ſome Towns.

The Dominions of *Saalfeld* are, 1. *Saalfeld*, and its Territory. 2. The Bailiwicks of *Graffenthall* and *Zell*.

The Arms of the Elector and Dukes of *Saxony*; *Azure*, a *Lion* Crown'd, fac'd *Argent* and *Gules*, for *Thuringia*. Fac'd *Or* and *Sable*, with *Vert* through the whole, for *Saxony*. *Or*, a *Lion-Sable*, for *Miſnia*. *Or*, a *Lion-Sable*, encompaſs'd and langued *Gules*, for *Juliers*. *Gules*, a *Scutcheon-Argent*, flower'd *Or*, for *Cleves*. *Argent*, a *Lion-Gules*, Crown'd *Azure*, for *Berg*. *Azure*, an *Eagle* Crown'd *Or*, for *Engers*: *Argent*, 3 Chapes of a Hanger, for *Engers*. *Coupee-Sable* on *Argent*, two *Swords-Gules*, for the Dignity of Elector, and Arch-Marſhal of the Empire. *Azure*, an *Eagle Or*, for the County Palatine of *Saxony*. *Sable*, an *Eagle Or*, for the County Palatine of *Thuringia*. *Argent*, a Beeve *Gules*, and a Wall *Or*, for *Luſatia*. *Or*, two *Pales Azure*, for *Lanſburg*. *Azure*, a *Lion Coupe* or *Argent*, for *Pleiſt*. *Or*, ſtrow'd with *Herts*, a *Lion Sable*, for *Orlamund*. *Parti*, the firſt *Gules*, one half on the Dexter of an *Eagle-Argent*; the 2d, 4 *Feſſes-Gules*, for *Magdeburg*. *Argent*, 3 Chapes of Hangers *Azure*, for *Brene*. *Argent*, a *Roſe Azure*, for *Eiſſenberg*. *Argent*, 3 *Cheverons Gules*, for *Ravensburg*. *Or*, the Front *Cheekes Argent* and *Gules* of 3 Lines, for *March*. *Gules* plain for the Rights of *Regalia*. *Or*, a *Chicken Sable*, barb'd *Gules*, upon a green Hill, for *Henneberg*. *Azure*, two Bars endors'd *Or*, encompaſſed with Roſes, for *Barby* and *Roſemberg*. The Helmets are *Or*, ſurmounted with two blue Wings, for *Luſatia*. *Or*, ſurmounted with an *Eagle* Crown'd, for the Palatinate of *Saxony*. *Or*, ſurmounted with a *Beeve's-Head*, *Gules*, Crown'd *Or*, for *Cleves* and *March*. *Or*, ſurmounted with two *Horns Argent*, for *Thuringia*. *Or*, two Crowns *Azure* and *Argent*, for *Saxony*. *Or*, ſurmounted with a *Demi-Man Azure* and *Argent*, for *Miſnia*. *Or*, ſurmounted with an *Eagle Or*, for *Juliers*. *Or*, ſurmounted with a Peacock's-Tail, for *Berg*, *Or*, ſurmounted with two Peacocks-Feathers, for *Engers*. *Or*, ſurmounted with an *Eagle Argent*, for *Nether Luſatia*.

Dr. *Nicholſon* obſerves, That upon the Failure of the Line of *Bernard* of *Anhalt* in *Albert* III. and the Neglect of the Princes of *Lawenburg* to lay Claim to the Electorate, *Frederick* Landgrave of *Thuringia*, and Marquis of *Miſnia*, was created Duke and Elector of *Saxony* by the Emperor *Sigiſmund*; by which the Title return'd again to the Family of *Wittikind*, K. of the ancient *Saxons*, after it had been out of it 200 Years; and from this *Frederick*, the preſent Elector is deſcended. The Elector *John Frederick*, the

the 6th of that Line, protested against that Decree of the Diet of *Spires*, was the Author of the League at *Smalcald*, and was a great Promoter of the Reformation. His Cousin and Successor *John* drove the Emperor *Charles* V. out of *Germany*, and was slain in the Battle of *Siffridhuse* against *Albert* Marquis of *Brandenburg*. *John George*, one of his Successors, first join'd with the Emperor *Ferdinand* against the Elector *Palatine*, and afterwards with the King of *Sweden* against the Emperor.

The Doctor says, The Revenues of this Elector are thought to be as great as those of any Prince of the Empire, except the Arch-Duke of *Austria*, and are modestly computed at 400000 *l.* Sterling *per Annum*. The Doctor adds, That what he has from his Imposts upon Beer and other Commodities, his Taxes, Mines, *&c.* will amount to a much greater Sum; for his Revenues from the Silver Mines at *Freydberg*, and other Places, was computed at 130000 *l. per Annum*: And the Impost on Beer at *Laipsick* at 20000 *l. per Annum*. Besides which, and other like Customs, he has the Tenths of all Corn, Fruit, Wine, *&c.* in his Country, besides a great standing Tax granted at first against the *Turks* in a Time of War, but since continued. Answerable to his Revenues, is the Pomp and Splendour of his Court, wherein it exceeds those of his Neighbours. *Christian* II. is said to have had 3 Foreign Dukes, 3 Earls, and 5 Barons, besides a multitude of his own Nobility, that were Pensioners to him all at once: And at the Funeral of *John George* I. in 1657, there were 24 Horses of State cover'd with Black, with the Electoral Arms embroider'd upon them, led by two Gentlemen each: After which followed 3500 Persons in Mourning. This Court has always been reckon'd the greatest Drinkers in *Germany*; and some of their own Historians say, That a red Nose is an inseparable Badge from the Princes of that Family.

The 2d remarkable City in this Country is *Leipsick*, supposed to have been built by the *Vandals* about the Year 700, and to have derived its Name from *Lipzk*, which in their Language signifies a Tile-Tree, which sort of Wood did then abound in those Parts; and hence some Latin Authors call it *Philurea*, from Φίλυρεα, a Tile-Tree. It stands on the Confluence of 3 small Rivers, the *Elster*, *Pleisa*, and *Parda*, about Long. 31. 57. Lat. 51. 22. about 42 Miles N. W. of *Dresden*, and 38 S. W. from *Wittemberg*, in a pleasant and fruitful Plain, abounding with all Necessaries and Pleasures, particularly large and rich Meadows, mow'd constantly twice, and sometimes thrice a Year, besides pleasant Woods, and many fine Orchards with all sorts of Fruit. Within the Walls they have no Orchards or Gardens. The City is large and populous, and the Houses stately, especially about the Market-place, where they are commonly 7 and 9 Stories high. St. *Nicholas*'s Church is very fine, and the best adorn'd within of any *Lutheran* Church in *Germany*. The Town is famous, 1. For the Purity of the *German* Tongue. 2. For the Concourse of Merchants from most noted Places in *Europe* to their three Annual Fairs at *Christmas*, *Easter*, and *Michaelmas*. 3. For their High Court of Judicature, to which the Elector himself is oblig'd to answer when summon'd. Their Way of Proceeding is describ'd by *Zobelius*, in his Book called, *Differentiæ Juris Civilis & Saxonici*, and by the Author of the *Chronicon Lipsiense*. 4. For their University, founded in 1408, upon a Quarrel betwixt the *Hussites* and Papists at *Prague*, whence 2000 Students are said to have come hither in one Day. It has 4 Colleges, and 24 Professors. Their Chief Professor of Divinity some Time ago, called *Adam Schertzer*, publish'd a Learned Book, called, *Collegium Anti Socinianum*, wherein he confuted the Socinian *Carpzovius*, Son to the famous Lawyer of that Name, was much admir'd for his Learning in the Eastern Languages, and explaining the Mysteries of the *Jewish* Rabbies. *Thomasius*, a Schoolmaster there, was also noted for his Skill in Philology. In their Library, they have abundance of Manuscripts taken out of the demolish'd Monasteries, but of no great Value. Dr. *Nicholson* says, the only Rarity in it, is *Tzetzes*'s Greek Commentary on *Homer*'s *Iliads*, (perhaps not to be met with elsewhere) in a fair and legible Character. Near this Place was the chief Seat of the *German* War; for that in two Years, it was taken 5 several times, and at last by the Imperialists in 1633, but restor'd by the Treaty of *Prague*

in 1635. 'Tis also noted for 3 Victories obtained near it by the *Swedes* over the Imperialists in 1631, 1641, and 1642. 'Tis defended by the Castle of *Pleissenburg*, on the River *Pleiss*, which is very strong, and has a good Garison. In 1520, *Luther* disputed in this City with *Eckius* against the Pope's Supremacy; and soon after, it embrac'd the Reformation.

3. *Freiberg*, or *Freidberg*, a famous and pleasant Town near the Banks of the *Mulda*, about Lat. 51. Long. 32. 43. about 8 Miles S. W. from *Dresden*. Dr *Nicholson* thinks, it derives its Name from the rich Hills, on which it stands. The Town is fortified with strong Walls, and held out against the *Swedes* in the Civil War. St. *Peter*'s Church here is the usual Burial-place of the Electors, where many of them lie entomb'd in fair Monuments, particularly the Elector *Maurice*, whose Monument is reckon'd one of the noblest in *Germany*. When this City was surrender'd to the Imperialists in 1632, the Elector of *Saxony* gave 80000 Rix-Dollars to save those Monuments from being rifled, because it being the Fashion to bury the *German* Princes in their Robes, with their Ensigns of Honour, Rings, Jewels, *&c.* the Soldiers would otherwise have ransack'd the Sepulchres. This City is chiefly noted for the rich Mines in and about it, which were discover'd accidentally in 1180, by a Fellow who was carrying Salt, and found in a Cart-Road a Piece of rich Ore. Since that Time, those Mines have been so much dug, that the greatest Part of the Town is undermin'd, and stands upon Vaults and Caverns. Besides those Mines in the Town, there are a great many more within a Mile or two of it; of which, Dr. *Brown* in his Travels gives the following Account:

The Chief of them is that upon the high Hill, which, he says, is deeper than any of those, he saw in *Hungary*, being 77 of their Fathoms, which is 208 of ours.

The 2d Mine is that called the *Prince of Heaven*, which not many Years ago produc'd an Ore so rich, that 100 Pound Weight afforded 130 Marks of Silver, or 65 Pounds in the Hundred: But it is a constant Observation among the Miners, That where the Veins are richest and purest, they are thinnest, and generally not above one Breadth of two Inches. The Ore, as it generally runs, affords not one Ounce and a half of Silver in the Pound, and they work it, thô it holds not above half an Ounce; which may seem strange to those who know not, that even in the Silver Mines of *Peru* and *Chili*, they work the Silver Ore which affords not above 4 or 5 Ounces; and the rich Ore in the celebrated Mines of *Potosi*, don't commonly produce above 10 or 12 Ounces of Silver; thô this Hill alone, if we may credit *Alberto Alonso*, has produc'd in Silver since it was dug, betwixt 4 and 500 Millions of Pieces of Eight.

They have here several Ways of opening the Ore to prepare it for melting, as by Lead, and a kind of Silver Ore which holds Lead.

The Sulphur Ore, which is found here, does, after Calcination, prove no small Addition towards the melting of Metals; as likewise the *Schlich*, or Pounded and Wash'd Ore; and the *Slacken*, being the Dross, Sediment, or Scum, taken out of the Vortiegel (Pan) which received the melted Minerals, let out into it at the bottom of the melting Furnace.

Their *Treibsheath*, or Furnace for separating where the Litharge is driven, is more like that described in *Agricola*, than those in *Hungary*. Some of the Litharge is green. They wash the purest Ore, and such as is mix'd with Stones or Spars; and they have this peculiar here, that before they melt the Ore in the melting Furnace, they burn the Pounded and Wash'd Ore on the *Roasting Hearth*, as they term it.

The 3d Mine was called the *Neckbreaker*, about 80 *English* Fathoms deep. The Ore it produces is either Copper and Silver, or Silver and Lead, and sometimes all three; but they work only for Silver. The Mines are cold as far as the Air can penetrate, but otherwise warm enough. Where they are at the deepest, they are full of Damps, that sometimes kill the Workmen; but that which troubles them most, is the Dust which settles upon the Lungs and Stomachs of the Miners, and throws them into Consumptions. They have excellent Engines to prevent the Inconveniencies arising from the Water, and sometimes use large Vizards with Glass Eyes, under which they have room enough to breath a considerable while.

Here

Digitized by Google

Here is alſo a rich Sulphur Ore, hard and ſtony, that with red Spots being deemed the beſt. This is melted in a peculiar Furnace, to ſeparate it from the Ore, ſome of which yields 3 Pound of Sulphur from 100 Weight of Ore, which, as it melts, runs out of the Furnace into Water, or the Exhalations of the Ore are condenſed into Brimſtone by the Coldneſs of the Surface of the Water, placed to receive it. It is purified again, by melting it once more. Some of this Brimſtone Ore holds Silver, and ſome Copper, but in ſmall Quantities.

The Remnant, after the Sulphur is ſeparated from the Ore, is reſerved for a double Uſe, either for the melting of Silver, or making of Vitriol. In the firſt Caſe, a certain Proportion of it is caſt into the melting Furnace of the Silver, which, as the Miners term it, renders it more fluid.

In the making of Vitriol or Copperoſe, they take the Ore from which the Brimſtone has been ſeparated, and burn it over again, or let it continue to burn in the open Air; then putting it into a large Veſſel, pour as much Water upon it as is requiſite to imbibe the Vitriol; which Water being afterwards boil'd to a certain Conſiſtency, is let out into Coolers, where the pureſt Part of the Vitriol cleaves to Sticks ſet in on purpoſe, and the reſt ſticks to the Sides and Bottom. It is obſervable, That the Ore, after it is deprived of its Vitriol, has not the leaſt Vertue left to open the Metals, and make them fluid.

Dr. *Nicholſon* gives this Account of their diſcovering Mines by what they call the *Virgula Divina*, which ſome reckon to be Conjuration. The Diſcoverer takes a forked Piece of Hazel, holds the two Horns of it in his Hands, with the Forks upright, and traverſes the Ground, muttering a Form of unintelligible Words; and when the forked Stick turns in his Hand, (which they aſcribe to an occult Impulſe) and points to the Ground, he takes it for an infallible Sign of a rich Silver Mine in the Place pointed at; upon which they fall a digging, and ſeldom fail of Succeſs.

At *Freyberg*, there's a Yearly Coinage of Rix-Dollars, and other Money, which is commonly true Sterling, and reckon'd the beſt in *Germany*.

The Reſident of *Brandenburg* gives this Account of the Mines, That the richeſt are thoſe of *Sneberg*, diſcovered in 1471; from which Time to 1501, which was 30 Years, the Elector had for his Tenths 510 Millions of Gold, and 900000 Crowns; and from thence to 1537, 393 Millions of Gold, and 800000 Crowns; but they have not yielded in the ſame Proportion ſince that, (thô they be ſtill very rich) being in Part ruin'd by the War.

4. *Meiſſen*, formerly the Metropolis of *Miſnia*, but now inconſiderable. It takes its Name from the River *Meiſſen*, on which it ſtands. It had formerly the beſt Wooden Bridge in *Germany*; but was deſtroy'd by the Civil War, and a worſe built in its ſtead. The moſt remarkable Thing in it now is, a Palace belonging to the Elector, in Form of a Caſtle, which defends the Town. 'Twas formerly a Biſhoprick, founded by the Emperor *Otho* about the middle of the 10th Century; but ſince 1581, has been in Poſſeſſion of the Electors. It lies about 10 Miles N. W. of *Dreſden*.

5. *Pirn*, on the *Elb*, about 4 Miles S. E. from *Dreſden*, a ſmall Town, noted for the Treaty of Peace made there betwixt the Emperor *Ferdinand* II. the Elector of *Saxony*, and other Princes of the Empire, in 1636, which by others is called the Peace of *Prague*. This Town was taken and pillaged by the *Swedes* in 1640.

6. *Mulberg*, on the *Elb*, ſomewhat above two *German* Leagues S. from *Torgaw*, and about 7 N. W. from *Dreſden*. a Village, famous for the Victory of *Charles* V. over the Proteſtants there in 1547, where *Frederick* of *Saxony* was taken, the *Spaniards* under the Duke of *Alva* having ſwum over the River, and brought the Boats from the other Side to paſs the ſame, and attack the Proteſtants, ſays *Le Forest*.

7. *Chemnitz*, on a ſmall River of that Name, the Capital of the Circle of the Mountains, or *Ertzgebergiſche-Creyſs*. It is defended by a good Caſtle, called *Auguſtburg*. 'Twas an Imperial Town till 1308, that *Frederick* Marquis of *Miſnia* united it to his Dominions. 'Tis famous for Mines of Lead and Tin in the Neighbourhood. It lies 30 *Engliſh* Miles S. W. of *Dreſden*.

8. *Frawenſtein*, a little Town among the Mountains, noted for 3 Lead Mine.

9. *Eden-*

Digitized by Google

9. *Konigſtein*, on the *Elb*, 15 Miles S. from *Dreſden*, a Fortreſs with an Arſenal, where the Electors keep their Treaſure.

10. *Marienberg*, on the Frontiers of *Bohemia*, a ſmall Town, built in the 16th Century, for working on the Mines then diſcover'd there.

11. *Annaberg*, a League from thence, on the Mountain of *Schmeberg*, built in the end of the 15th Century.

12. *Zuickow*, on the *Mulda*, 15 Miles S.W. from *Chemnitz*, the chief Town of *Voigtland*, ſo called from the *Voigts* or Provoſts the Emperor ſent to govern the Country. It was formerly one of the Theatres of the War betwixt *Charlemagne* and the *Saxons*, and an Imperial Town till 1308, that *Frederick* Marquis of *Miſnia* redue'd it.

13. *Sneberg*, on the ſame River, 7 Miles further N. noted for its Silver Mines diſcover'd in 1471, as mention'd before.

14 *Plauen*, a pretty little City on the River *Elſter*.

15. *Werda*, a little City, on a River of that Name, which formerly had its own Lords.

Other Towns reckon'd by *La Foreſt* in this Country are, 1. *Weiſſefels*, on the *Sale*, anciently called *Leucopetra*, which gives Title to a Prince of the Family of *Saxony*. 2. *Colditz*, a little City of good Trade, on the Conflux of the *Mulda* and *Multa*. 3. *Leiſſnick*, on the latter, noted for the Birth of *Appian* the Geographer. 4. *Lutzen*, on the *Elſter*, famous for the great Victory of the *Swedes* over the Imperialiſts in 1632, where the Great *Guſtavus* triumph'd over his Enemies in the Arms of Death, which hinder'd his reaping the Fruits of that Victory, chiefly owing to his Valour and Conduct. 5. *Zeitz*, anciently call'd *Mamida*, a little City on the *Multa*, ſack'd in 982 by the *Vandals*. It gives Title to a Prince of the *Saxon* Family.

The Marquiſate of Luſatia, *or* Lauſnitz,

HAS *Bohemia* on the S. *Brandenburg* on the N. *Miſnia* and *Saxony* on the W. and *Lower Luſatia* on the E. 'Twas formerly Part of *Bohemia*, and deſcribed as ſuch by Geographers; but having rebelled againſt the Emperor in 1620, *John George* of *Saxony* redue'd them, had it mortgag'd to him for his Service, and at laſt 'twas ſettled upon him and his Heirs by the Treaty of *Prague* in 1635; and ſo it continues, except ſome Parts of *Lower Luſatia*, which belong to the Elector of *Brandenburg*.

'Tis divided into *Upper* and *Lower*: The former is by ſome Geographers called *Hexapolis*, becauſe of the 6 Confederate Cities in it, *Lobau*, *Budiſſen*, *Caminta*, *Gorlitz*, *Lauben*, and *Zittau*. In the *Lower*, the Towns ſubject to the Elector of *Saxony* are, *Lubben* on the *Spree*, *Guben*, *Lucken*, and *Calow*; but *Cothus*, *Peytze*, *Sommerfeld*, and others of leſs Note, are ſubject to *Brandenburg*. The Length of this Country from E. to W. is about 65 Miles, and the Breadth from S. to N. is 90.

The Country is for moſt part ſandy or boggy, ſo that it has ſcarce Corn enough for the Inhabitants; but they have ſuch Plenty of Wood, Veniſon, and Fiſh, as might enrich them, had they any Commerce. Their chief Rivers are, the *Spree* and the *Neiſſe*. By their Mixture of *Wendiſh* with *German*, they would ſeem to be of *Slovonick* Extract; but the Citizens ſpeak good *German*. Some derive them from the ancient *Luſci* or *Lutitii*; others from the *Ilingi*, *Elyſii*, or *Ligii*. The People are of as quick Parts as their Neighbours, but Penurious. They breed no Horſe; but *Boter* ſays, they can raiſe 20000 hardy Footmen. They obſerve the *Saxon* Laws better than ever they did the *Bohemian*. *La Foreſt* ſays, it was anciently called the *Eaſtern Mark*, and had its own Princes, till the End of the 9th Century. *Chriſtian*, deſcended from *Wittikind the Young*, was their firſt. The Emperor *Henry* IV. made it a Marquiſate for *Otho*, the laſt of that Line, who died Childleſs about 1060. *Henry* IV. gave *Upper Luſatia* to *Ladiſlaus* Duke of *Bohemia*, and left the *Lower* to *Dedon*, *Otho*'s Couſin, whoſe Iſſue failing in 1125, the Emperor *Lotharius* II. gave it to *Conrad the Picus*, Marquis of *Miſnia*, whoſe Succeſſors held it till 1317, that *Waldemar* of *Brandenburg* ſeiz'd it. Two Years after, the Emperor *Louis* of *Bavaria* gave it to King *John* of *Bohemia*. It fell to the Houſe of *Auſtria* by *Anne*, Daughter of *Louis* King of *Hungary* and *Bohemia*, who married the Emperor *Ferdinand*; and who

Digitized by Google

how it came to the House of *Saxony*, we have heard already.

The chief Towns are, 1. *Bautzen*, or *Budissina*, their Metropolis, on the *Spree*, about 30 Miles E. from *Dresden*. 'Twas built by a *Bohemian* Duke of the same Name about 800, and was an Imperial City; but lost its Privileges in the 13th Century, when reduced by the K. of *Bohemia*. The Elector of *Saxony* besieg'd it in 1634, and the Imperialists set Fire to the Suburbs, to dissodge the *Saxons*; which being driven into the Town by a strong Wind, consumed all but the Walls and Castle, which obliged it to surrender. The Remainder was afterwards demolish'd by the *Swedes*; since which, this large Town has never recover'd its Lustre. They have a Church, where both Papists and Lutherans have their Worship.

2. *Gorlitz*, on the W. Side of the *Neisse*, about 25 Miles E. of *Bautzen*. Some say, it was founded by *Sobiesslaus* of *Poland* about 1131; others, by *Boleslaus* III. in 1139; but soon after it was burnt, and called *Gorlitz*, which in the *Slavonick* signifies a burnt Town. It has several neat Churches, and many stately Houses. Their chief Trade is in Beer, and dressing and dying Linen and Woollen. It is well fortified, and the Approach difficult, because it stands in a Morass. 'Tis the Seat of Justice, and the Residence of the Governor.

3. *Zittaw*, on the *Neisse*, 20 Miles S E. from *Gorlitz*, so called from a Lady that founded it, in the beginning of the 11th Century, as some say; thô others think it was by *Wencesslaus* King of *Bohemia*, in the middle of the 13th. They have a good Trade in Beer, and an old *Franciscan* Monastery, turn'd into an Hospital since the Reformation.

4. *Leiba* or *Lobau*, *Liben*, *Lobet*, or *Lubben*, one of the oldest Towns in those Parts. The other Confederate Towns send their Deputies hither, to consult in Cases of Importance. It lies on a small Rivulet, midway betwixt *Gorlitz* and *Bautzen*, surrounded with pleasant Meadows. In 1639, the *Swedes* found 70000 Crowns of Cash, besides other Booty, here.

5. *Luben*, on the *Spree*, the Capital of *Nether Lusatia*, 55 Miles N. from *Bautzen*. The Elector has a Palace here, where he sometimes resides. It has the chief Place in the Diets.

6. *Guben*, a well fortified little Town in *Nether Lusatia*, about 24 Miles E. from *Luben*, on the *Neisse*, which contributes much to its Strength. In 1631, the Imperialists took it after the Battle of *Leipsick*; but 'twas not long after taken again by the Marquis of *Hamilton*, afterwards Duke, then a General in the *Swedish* Army, who put most of the Garison to the Sword. In 1642, it held out 3 Weeks against the *Swedes*; but was obliged to surrender on Discretion for want of Necessaries.

7. *Soraw*, on the Borders of *Silesia*, 20 Miles S. E. from *Guben*, by some reckon'd the Capital of *Nether Lusatia*. 'Twas often taken and retaken during the Civil Wars of *Germany*.

8. *Cotbus*, or *Cotuitz*, on the *Spree*, 20 Miles S. from *Luben*. 'Tis a fair Town, subject to the Elector of *Brandenburg*.

9. *Camitz*, or *Camens*, a little City, well built and fortified, on the Frontiers of *Misnia*, about 15 Miles N. W. from *Baudissen*.

Other Towns here are, 1. *Friedland*, a small City, on a Canal that falls into the *Spree*. 2. *Sprehenberg*, on a Mountain, upon the *Spree*. 3. *Koniguart*, a pretty little City, on the *Weiss-Elster*. 4. *Zobelitz* on the *Schops*, in the best Part of *Lusatia*.

The Marquisate of Brandenburg.

HAS *Mecklenburg* and *Pomerania* on the N. *Anhalt*, *Upper Saxony*, *Lusatia*, and *Silesia*, on the S. the Dominions of the House of *Brunswick* and *Magdeburg* on the W. *Prussia* and *Poland* on the E. *Dresser* says, it is 7 great Days Journey in Breadth, and 7 in Length. According to *Moll*, 'tis but 190 Miles from E. to W. and about 90 where broadest from S. to N. *Sanson* makes it about 225 long, and scarce 90 where broadest; so that *Dresser* must be mistaken, or else mean it of all the Elector's Dominions, which may be true.

The Country in general is sandy and woody, abounds with Corn, but is not plentiful in other Provisions. They have great Flocks of Sheep, but not of Black Cattle; and thô in some Parts they boast of their Wine, the *Saxons* despise it to a Proverb.

They

Digitized by Google

They have few Silver Mines, but some of Braſs, Iron and Copper; ſo that their Money is generally worſe than in *Saxony* and the Dominions of *Brunſwick*. They have many Forreſts, which abound with Veniſon. The ancient Inhabitants were the *Varini* and *Naithones*, Branches of the *Swevi*, ſucceeded by the *Helvoldi*, *Wilini*, *Beirami*, and other *Slavonians*. *Henry* I. conquer'd this Country about 620, expelled moſt of thoſe People, and gave the Country to *Siegefrid* Earl of *Rengelheim*, who, with his Succeſſors, new Planted and Peopled it from the *Netherlands*, *Weſtphalia*, *Francovia*, and *Saxony*, which occaſioned that Confuſion which is ſtill obſervable in their Dialect. Dr. *Nicholſon* ſays, the Country People are generally ſo poor, that a Bed of clean Straw is a Character of one of the better Sort. Their Northerly Situation makes the Winter cold, and 7 or 8 Months long; but they have Plenty of Wood for Fuel, and might make great Profit of their Cattle, were they as much given to Trade, as to Drinking and good Cheer, ſays *La Forteſ*. Their principal Rivers are, the *Elb*, the *Oder*, the *Hawell*, the *Spree*, and the *Warte*. The two firſt have a Communication by means of a Canal, which ſaves their paying the Tolls in the *Sound*, and facilitates the Exportation of their own Commodities. There are abundance of Lakes in this Country, the chief of which is *Ukerzee*. The Elector's Dominions in general are called *Mark*, and he himſelf *Mark-Graf*, for which we uſe the *French* Word Marquis.

Selden, in his Titles of Honour, gives this Account of that Dignity, *viz.* That they had the Name from being Governors of Frontier Provinces at firſt; but it was afterwards given to thoſe who had the Government of Inland Countries, as *Miſnia*, *Luſatia*, *Brandenburg*, &c. In the Time of the *French* Empire, they were alſo called *Duces* and *Comites Limitanei*; but the Title of *Marchio*, he ſays, was not found in the Empire till the Time of *Charles the Great*, but 'twas only Officiary, and not Hereditary, till the Time of *Henry* I. who made one in *Sleſwick* againſt the *Danes*, and another in *Brandenburg* againſt the *Vandals*. In later Times, there were 4 more eminent than the reſt, called the High Margraves, *viz.* *Brandenburg*, *Moravia*, and *Baden*; and beſides Robes of State, had a Cap of State, ſuch as Dukes.

The *Atlas Hiſtorique* has a very large Tree of this Family, which he derives from the Family of *Aſcania*, mention'd formerly in the Families of *Saxony* and *Anhalt*. The firſt is *Bernthoboldus* I. Son to a Lord of *Aſcania* and *Ballenſtad*, who liv'd about 524. Others derive them from *Adalgerius*, choſen King of *Bavaria* in 456, whoſe Succeſſors contented themſelves with the Title of Dukes. His Succeſſor *Theodo* I. conquer'd *Lower Bavaria* from the *Romans*. *Theodo* II. carried on the War againſt them with much Glory. From him came the Branch of the *Lombard* Kings; and from *Thaſſilo* II. the 6th in Deſcent from *Theodo* II. came the Branches of *Brandenburg* and *Bavaria*, and likewiſe the Branch of *Charlemagne*, and the Branch of *Zollern*. The Atlas gives the Origine of the Margraves of *Brandenburg*, who have poſſeſſed this Country, thus: *Sigfrid*, youngeſt Grandſon to *Wittikind* Earl of *Rengelheim*, was firſt created Marquis of *Brandenburg* by *Henry* I. in 927, being Brother to the Empreſs, and famous for his Wars againſt the *Slavonians*. He was ſucceeded by *Gero*, who built the Monaſtery of *Gernrod*; but our Room allowing us only to make mention of ſuch as were remarkable by their Actions, we proceed to *Hugh*, the 4th Marquis, who built 7 ſtately Monaſteries in *Italy*, and died in 1001. The 6th, *Theodorick*, was a great Enemy to the *Veneti*, and others of the neighbouring *Slavi* and *Vandals*, two of whoſe Princes he perſwaded the Emperor *Henry* II. to hang up. He was at laſt overpower'd by them, beat out of his Dominions by *Miſtivoius* Prince of the *Obotriti*, and ended his Days miſerably in a Monaſtery at *Magdeburg*. The 7th, *Udo* Earl of *Saltwedel*, aſſiſted by *Conrad* II. defeated the *Slavi*, drove them out of the Country, and was made Marquis himſelf. His Son *Udo* II. rebelling againſt the Emperor *Henry* IV. was proſcribed, and ſucceeded by *Primiſlaus* King of the *Obotriti*, Anceſtor to the Family of *Mecklenburg*; after whoſe Death, *Frederick* I. gave the Country to *Albert the Bear*, Prince of *Anhalt*, and Marquis of *Saltwedel*; after whom came the ſecond Catalogue of the Marquiſſes: The firſt of whom, *Albert*, Elector and Duke of *Saxony*, *Brunſwick*, &c. ſucceeded *Henry the Lion*.

Digitized by Google

Lien. The 6th of this Line, *Otho* III. built *Brandenburg* and *Pruſſia*; and during the 15 Years of his Reign, had a conſtant War with the Archbiſhop of *Magdeburg* and the Biſhop of *Halberſtat*. The 10th, *Waldemar*, annexed great Part of *Luſatia*, which he won from the Marquis of *Miſnia*. The 12th was *John* IV. the laſt of the Houſe of *Anhalt*, who dying without Heirs, the Emperor gave the Marquiſate to the 12th, who was *Louis* of *Bavaria*, Son to *Louis* the Emperor. He reſign'd it to his Brother *Louis* II. who was ſucceeded by the Emperor's 3d Son, *Otho* Count Palatine of the *Rhine*. He ſold it to the Emperor *Charles* IV. who gave it to his own Son *Winceſlaus*, who being elected Emperor, gave the Marquiſate to his Brother *Sigiſmund*, King of *Hungary* and *Bohemia*, who was the 17th Marquis of this Catalogue; and ſucceeding to the Empire, gave the Marquiſate to *Frederick* Burgrave of *Nuremberg* in 1417, who was the firſt of the preſent Line and Catalogue.

The *Atlas Hiſtorique*, before he comes to the Hiſtory of the Princes of this Line, makes the following Remarks; That the Electorate was poſſeſſed 170 Years by the Poſterity of *Albert* of *Anhalt*; which failing, the Marquiſate return'd as a Fief of the Empire to the Emperor *Louis* of *Bavaria* above-mention'd, who, without any Regard to the Pretenſions of the Family of *Anhalt*, from whom the extinguiſh'd Branch deſcended, gave it to his own Son *Louis*, who for 26 Years was engaged in War with an Impoſtor, who, ſome ſay, was Son to a Miller; and others, of a Baker, and pretended to be *Waldemar* Marquis of *Brandenburg*, who died in Wars abroad. This Impoſtor was ſupported by the King of *Bohemia*, the Dukes of *Saxony*, *Brunſwick*, *Pomerania*, *Mecklenburg*, and the Princes of *Anhalt*, who were Enemies to *Louis* on the Account above-mentioned. But the Impoſture being diſcovered, the Emperor *Charles* IV. confirmed *Louis* above-mentioned: After whom it came to *Wenceſlaus* and *Sigiſmund*, as above, who not being able to reſtore the Peace of the Electorate, it was given to *Frederick* V. Burgrave of *Nuremberg*, as has been ſaid already, who undertook to pacify the Troubles, for which he was to have 100000 Gold Crowns of *Hungary*, and to reſtore the Electorate to *Sigiſmund* and *Wenceſlaus*; but *Frederick* having reduc'd the Country, was by *Sigiſmund* and the Diet made Elector, on Condition, That if the Emperor paid him 400000 Crowns, the Country ſhould again return to *Sigiſmund* and his Heirs; and if they fail'd, to *Winceſlaus* and his: And after this Treaty, the *Atlas* ſays, That by Letters Patents in 1415, the Electorate was diſcharged from their Oath to *Sigiſmund* and *Wenceſlaus*; and two Years after, *Frederick* was ſolemnly proclaim'd Elector in the Council of *Conſtance*, with the following Ceremonies, which ſhew the Form of creating an Elector.

Some Barons and Gentlemen rode three times thrô the Streets, with two Standards, and Trumpets playing: After which all the Princes came to the Burgrave's Houſe with little Colours, bearing the Elector's Arms, and conducted him to the Market-place, where a Scaffold was erected. Upon which the Emperor mounted with his Crown on his Head, and ſitting down on his Throne, with the Electors in their Robes on both Sides, the Burgrave came up, attended by two Officers with the Standards of the Marquiſate, and of the Burgraviate; the Burgrave kneeling, deſir'd the Emperor to create him Margrave, and to inveſt him with the Marquiſate, which, after the Burgrave took the Oath, was done accordingly, by putting into his Hands the Standard of the Marquiſate, the Gold Apple or Globe, and the Scepter, and by girding a Sword to his Side: After which he was proclaim'd Elector of *Brandenburg*, and Arch-Chamberlain of the Empire. And thus the Family of *Anhalt*, which had acquir'd two Electorates, *viz.* that of *Brandenburg* in 1142, and that of *Saxony* in 1180, had the Misfortune to loſe both in leſs than one Age. *Frederick*, after his Inveſtiture, reduc'd ſeveral Towns belonging to the Electorate; and while he was thus engaged, *Louis* of *Bavaria* invaded his ancient Dominions of *Nuremberg*, which he reveng'd by a War upon him, in which he acquir'd great Reputation. During this Expedition, the Emperor made *Frederick* Marquis of *Miſnia* Elector of *Saxony*, to whom *Frederick* quitted *Wirtemberg*, and all the Electoral Territory of *Saxony*, on Condition that he ſhould pay him a certain Sum for having defended it. In 1416, the War with the

Digitized by Google

Huſſites began, wherein *Frederick* was declared General. This War proved ruinous to *Bohemia*, and to Part of the Elector's Dominions, which they invaded. The Duke of *Saxony* taking this Opportunity, did alſo make War upon *Frederick*, but was worſted. Thoſe of *Magdeburg* and *Halle* having rebelled againſt their Biſhops, and being proſcribed by the Emperor, were afterwards reconciled by *Frederick* in 1435. The Elector being advanced in Years, reſolved to ſettle his Affairs by his Will, and calling for his Sons, ſpoke to *John* his eldeſt thus: *I have obſerved that you love Peace and Eaſe, which you cannot enjoy if you poſſeſs the Electorate; therefore, if you agree to it, I will leave the Electorate to* Frederick, *your ſecond Brother, who is more active and ſtrong than you. I will leave you* Voitland, Albert *ſhall have what belongs to me in* Franconia, *and young* Frederick *a Part of the Marquiſate. John* willingly agreed to it, thank'd his Father for taking Care that he ſhould enjoy Peace and Quiet, and for laying the Weight and Burden of the Government on his Brother *Frederick*.

The Elector dying in 1440, *Frederick* II. ſucceeded, and was ſome Time after choſen King of *Poland*, upon the Death of *Ladiſlaus* their King at the Battle of *Warna* without Iſſue; but *Frederick* refus'd it, becauſe *Ladiſlaus* had a Brother, who was Duke of *Lithuania*. After this the *Poles* beſieged *Franefort* on the *Oder*, where *Frederick* defeated them, and killed 3000 on the Spot. Soon after, *Podiebrat* King of *Bohemia*, and *Louis* Duke of *Bavaria*, made War upon him for *Luſatia*, which he poſſeſſed as a Fief of *Poland*; but this War was concluded by dividing the Country betwixt them. *Otho* III. Duke of *Stettin*, dying, *Frederick*, by Vertue of a former Agreement betwixt their Anceſtors, demanded the Inveſtiture of the Dutchy of *Pomerania* from the Emperor *Frederick* III. but his Title was controverted by the Dukes of *Wolgaſt* as nearer of Kin. *Frederick* however took Poſſeſſion by the Emperor's Conſent: This occaſion'd a troubleſome War, which laid waſte that Part of his Dominions called the *New Marq*. But a Peace was concluded at laſt by the Mediation of *Caſimir* King of *Poland*. *Podiebrat* King of *Bohemia* being accus'd of Hereſy, the Pope offer'd his Crown to *Frederick*, who refus'd it. Being advanc'd in Years, and not able to bear the Fatigues of Government, he reſign'd the Electorate, with the Emperor's Conſent, to his Brother *Albert* and his Heirs, whom the Emperor did alſo inveſt with the Dutchies of *Pomerania* and *Stettin*, the Burgraviate of *Nuremberg*, the Principality of *Rugen*, and the Right to the Succeſſion of *Mecklenburg*. *Frederick*, after his Reſignation, went to *Franconia*, where he died, in the 58th Year of his Age, and was ſucceeded by his Brother. *Albert* I. Dr. *Nicholſon* ſays, That *Frederick* II. was, becauſe of his peeviſh and cruel Temper, called the Marquis with Iron Teeth; but this does not agree with the Character given him by the *Atlas*, and ſeems rather to have proceeded from his Succeſs in War.

Albert ſucceeded him in 1442, and was made General of the Empire at 24 Years of Age againſt the *Bohemians* and *Poles*, with whom he made a ſucceſsful War. He gain'd alſo great Honour in a Tournament at *Augsburg*, being the only Man who was not diſmounted. *Louis the Hump-back*, Son to *Louis* of *Bavaria*, being diſinherited by his Father, courted *Frederick*'s Alliance, by which he fought and took his Father, and would not releaſe him till he paid him a conſiderable Ranſom. In 1448, *Albert* had War with thoſe of *Nuremberg*. Moſt of the Princes of the Empire took Part with him, and all the Imperial Towns ſided with *Nuremberg*. In two Years, they fought 9 Battles, of which *Albert* gain'd 8; but both Parties were forc'd to give over for want of Money and Proviſions. One of the *Nuremberg* Party being ask'd, Why ſo many made War upon one Man? He anſwer'd, That *Albert* alone poſſeſſed all the Riches and Strength of the Empire. He acquir'd ſuch Reputation in this War, that he was afterwards made Arbitrator of all the Differences of the Empire. In 1461, he had War with *Louis the Rich*, D of *Lower Bavaria*, for two Years, to ſupport *Adolph* Count of *Naſſau*, whom Pope *Pius* II. had made Archbiſhop of *Mentz*, and deprived *Theodorick* of *Iſenburg* of that Dignity; but the Cardinal of *Augsburg* did afterwards make up the Difference. He did all this, while his Brother was Elector. When he came to the Electorate, he apply'd himſelf to aggrandiſe his Family, and would

Digitized by Google

would have annex'd the Dutchy of *Stettin* to his Dominions; but by the Mediation of the Duke of *Mecklenburg*, he contented himſelf with what he had taken by Arms, and with the Dukes of *Pomerania* doing him Homage for the Dutchy of *Stettin*. For the better Support of his Family, he perſwaded the Houſes of *Heſſe* and *Saxony* to enter into a Contract of mutual Succeſſion betwixt the three Families, in caſe any of their Poſterities happen'd to fail. After the Death of *Erick* Duke of *Wolgaſt*, his Son *Bogiſlaus* refus'd Homage to *Albert*, and took Arms; but the Difference was made up, on Condition, That if the Male-Iſſue of the Dukes of *Pomerania* fail'd, *Albert*'s ſhould ſucceed. Soon after this he was made General by *Frederick* III. againſt *Charles* Duke of *Burgundy*, who beſieg'd *Nuis*; but could not oblige him to raiſe the Siege. During this Expedition, he left the Government to his eldeſt Son, and afterwards confirmed him in it; and being advanc'd in Age, reſerving only the Title of Elector, he retir'd to his Dominions in *Franconia*. The Emperor *Frederick* III. dying in 1486, *Albert*, notwithſtanding his great Age, went to aſſiſt at the Election of a new Emperor; but died ſuddenly in a Bath. The Pope call'd him the *Achilles* of *Germany*, and others the *German Ulyſſes*. He had all the Qualities of a great General, and was admir'd by every body for his noble Mien, and great Eloquence, as well as for his Wiſdom and Valour, having fought more Battles than any General of his Time. Dr. *Nicholſon* ſays, he died at *Franckfort* in 1494; which is more like to be true, ſince the Emperor *Frederick* III. died, according to the *Atlas*, in 1493; and the Tree of the Houſe of *Auſtria* ſays the ſame.

John I. ſucceeded his Father *Albert*. He was bred at the Court of his Uncle the Elector *Frederick* II. where there was great Care taken to teach him the Art of Government and War. His Uncle took him with him to the Wars of *Pomerania*; and when he was but 15 Years of Age, he was entruſted with the Adminiſtration of the Marquiſate. A War happening betwixt *Caſimir* King of *Poland*, his Son *Ladiſlaus*, and *Matthias* King of *Hungary*, *John*, by his Eloquence, brought them to an Accommodation. He was ſo remarkable for this Quality, that he was called the *German Cicero*. He likewiſe obliged the Duke of *Sagan* and the King of *Hungary* to raiſe the Siege of *Croſſen*, and to leave the Dutchy of *Croſſen*, and other Countries, as a Mortgage for the Dowry of his Siſter, Widow to the Duke of *Glogau* in *Sileſia*. After this, *John* contributed much to the Election of the Emperor *Maximilian*. His Money being exhauſted by War, he laid an Exciſe upon Beer in his Dominions. This made the People of the *Old Marq* rebel, and kill ſome of his Officers, for which he depriv'd them of their Privileges. He became ſo extraordinary fat, that he was not able to bear it, and endanger'd his Life by attempting to make himſelf lean. He deſign'd to eſtabliſh an Univerſity at *Francfort*; but not being able to accompliſh it, order'd his Succeſſor *Joachim* to do it; and finding Death to approach, he ſent for him, gave him pious Advice, recommended to him to take Care of his People, to do them Juſtice, and not to ſuffer his great Men to oppreſs them. He died in 1499. His Son *Joachim* ſucceeded, being ſcarce 16 Years of Age; and ſince, according to the *Golden Bull*, he could not take the Government upon him, he conſulted the Elector of *Mentz*, who adviſed him to aſſume the Electoral Dignity notwithſtanding. His Father took great Care of his Education, ſo that he was well inſtructed in all the Liberal Arts, and very well vers'd in the Art of Government. He eſtabliſh'd the Univerſity of *Francfort* according to his Father's Order in 1506. *Conrad Wimpin* was their firſt Rector, and form'd their Statutes. Above 1000 Scholars enter'd to it the firſt half Year. *Joachim*'s Wiſdom and Probity gain'd him the Eſteem and Affection of all his Neighbours; and the *Hamburgers* truſted him with the Defence of their City. He ſeverely puniſh'd ſome *Jews* for prophaning a Conſecrated Hoſt. *Louis* of *Erlikhauſen*, Great Maſter of the *Teutonick* Order, ſold to the Elector *Frederick* II. the *New Marq*; and *Albert the Great*, his Brother, when Maſter of that Order, made that Province Hereditary to *Joachim* and his Succeſſors, becauſe of the great Sums the Margraves of *Brandenburg* had laid out in Defence of the Order. In his Time, *Luther* began to preach in *Germany*; and the Emperor *Maximilian* dy-

Digitized by Google

ing, *Joachim*, and his Brother *Albert* Archbishop of *Mentz*, contributed much to the Election of *Charles* V. He likewise made Peace betwixt the Bishop of *Hildesheim* and the Dukes of *Brunswick*. At the Diet of *Worms*, he and the Elector of *Treves* endeavour'd to perswade *Luther* to retract what he had writ against the Pope, Cardinals, and the rest of the Clergy; which *Luther* refusing, he ask'd him, If he could advise him to any better Method for restoring the Peace of the Church? To which *Luther* answer'd, That he must go and consult at the Feet of *Gamaliel*, which very much disoblig'd the Elector. *Joachim* was so great a Justiciary, that a Merchant being robb'd near *Berlin*, ty'd and thrown into a Pit, whence the Robber thought he could never escape, got out however, and hearing much of the Elector's Justice, complain'd to him, and charg'd it on one of the Courtiers: Upon which, *Joachim* order'd 'em all to be brought before the Merchant, who discovering the Criminal, demanded Justice, and the Courtier confessing it, was put to Death. He had some Difference with the Duke of *Pomerania*, which was accommodated by renewing the Treaty, That his Heirs should succeed, if the Male-Issue of *Pomerania* fail'd. At the Diet of *Augsburg* in 1530, he was chose to speak to the Emperor in the Name both of the Papists and Protestants, because of his Eloquence and Learning; which, with the Solidity of his Advice, was very much admir'd on that Occasion: And Dr. *Nicholson* says, he was the first who authoriz'd the Reformation in his Dominions. At his return from the Diet, he punish'd the Citizens of *Stendal*, who had abus'd the Deputies which the Princes his Sons had sent to accommodate some Differences, which had happen'd among them about Religion; but being stir'd up by a Monk, they assaulted the Deputies and Magistrates, who narrowly escap'd: For this, the Elector depriv'd the City of their Tolls, fin'd them in 10000 Crowns, and oblig'd them to repair the Damage they had done to Houses, *&c.* in the Tumult, abolish'd the Annual Feast of *Panthaleon*, which the Tradesmen had made use of to raise this Tumult, and condemned the Ringleaders to die; but at the Request of his Sons, he contented himself to banish them and their Families. After which, he had no more Troubles during his Reign: To prevent any Difference among his Sons, he divided his Dominions betwixt them before his Death. *John* had the *New-Marq*, and his eldest Son *Joachim* succeeded to the Electorate, and his other Dominions, after his Death, which happen'd in the 51st Year of his Age, and the 36th of his Reign.

Joachim II. succeeded in 1536. His Father took great Care to breed him up in Learning and Virtue. He acquir'd great Knowledge in the Languages and in the Scriptures, and surpassed all the young Princes of the Empire in civil and pleasant Behaviour. Having thus accomplish'd himself, he went to the Court of the Emperor *Maximilian* I. who being the perfect Model of a good Sovereign, *Joachim* profited much by his Example. The Emperor, charm'd with his good Qualities, which were so like his own, betroth'd to him the *Infanta* of *Spain*, his Grand-Daughter, and promis'd himself a happy Posterity by this Match; but the Death of the Princess before the Consummation of the Marriage prevented it. This young Prince having always attended his Father at the Diets, and frequently acted as his Deputy, was a perfect Master of Government, and of all the Affairs of the Empire, which procur'd him universal Respect. *Soliman* I. Emperor of the *Turks*, having invaded and over-run most of *Austria*, *Joachim*, with 1000 of his own Horse, join'd the Army of *Philip* Prince *Palatine*, and charged the *Turks* with so much Courage at the Battle of *Leopold*, that he kill'd one of their Basha's, and put them to flight. This did so much advance him in the Esteem of *Charles* V. that he made him a Knight of the *Golden Fleece*, an Honour in those Days conferred upon none but such as had distinguish'd themselves in Battle. He married first *Magdalen* of *Saxony*, who dying in 1534, 2 Years after he married *Hedwige*, Daughter to *Sigismund* King of *Poland*; but the Death of his Father happening at the same Time, prevented the Solemnities of the Marriage. As soon as he came to the Government, he join'd with those of the *Augsburg* Confession, *Elizabeth* of *Denmark*, his Mother, being a *Lutheran*. *Sigismund* King of *Poland*, and the Elector of *Saxony*, his Fathers-in-Law, and his

his Uncle *Albert* the Elector of *Mentz*, did all they could to hinder his doing so, but in vain. He enrich'd the University of *Francfort* with the Possessions of the Monks and Popish Clergy, and took Care, that those who were bred for the Church or State Employments, should be taught good Principles. His own Example polish'd his Subjects, and inspir'd them with Virtue. He reform'd the Corruptions of the Courts of Justice, and his Subjects liv'd in perfect Peace during his Reign. He preserv'd the Empire from the Invasion of the *Turks*; but was hinder'd by those who envy'd his Glory from doing any thing considerable against them, being kept short of Money and Provisions. He prevented the Execution of the Elector of *Saxony*, who was taken Prisoner, and condemn'd by *Charles* V. and interceded for the Landgrave of *Hesse*, who was made Prisoner by the Duke of *Alva*, contrary to Promise. He bravely oppos'd the *Interim* that was agreed upon at the Diet of *Augsburg* to be the Religion of the Empire, till a General Council should determine the Religious Differences. He and his Electress saw'd by a special Providence, when the Floor of a Chamber fell under them at *Grimnitz* in 1549, when the Elector went thither to hunt. He hung by a Plank till his Officers rescued him; and the Electress catch'd hold of the Horns of a Deer that hung against the Wall, till she was also rescued. The Emperor refusing to set the Landgrave of *Hesse* at Liberty, *Joachim* join'd with *Maurice* of *Saxony*, and defeated the Emperor's Army commanded by *Albert* of *Brandenburg*, so famous in History, which obliged the Emperor to set the Landgrave at Liberty. He renewed the Treaty of mutual Succession betwixt his own Family and those of *Saxony* and *Hesse*. *Ferdinand* I. having assembled the Electors at *Francfort*, to have his Son *Maximilian* II. chosen King of the *Romans*, he honour'd *Joachim* so far, as to go out of the City with the rest of the Princes to meet him. *Ferdinand* dying in 1564, *Joachim* wept for Grief at the Troubles he foresaw would attend the Death of that peaceable Prince. He was reckon'd to have something of a Spirit of Prophecy, and his Predictions are observ'd by Historians to have come justly to pass. He procur'd the Title of Duke of *Crossen* in *Silesia*, and the Right of Succession to the Dutchy of *Prussia*. He was a very Religious Prince, and a little before his Death did meditate much on our Saviour's Passion, and form'd a Draught of it with his own Hand. He died suddenly of Poison given by a *Jew* in a Glass of Sack, in the 66th Year of his Age, and 36th of his Reign. The Emperor *Frederick* esteemed him so highly, that at his Death, he order'd his Sons to take his Advice as that of a Father.

His Son *John George* I. succeeded in 1561. He had a very good Education, and made his first Campaign in the Army of *Charles* V. against the Protestant Princes, who enter'd into the League of *Smalcald*. He signaliz'd himself on several Occasions, particularly at the Siege of *Wirtemberg* in 1546. He had a numerous Family, which made him look carefully after his private Affairs, but without neglecting those of the Publick. *Philip* II. of *Spain* made him one of his Privy-Council, and General of his Army, both which Posts he enjoyed under *Maximilian* II. till he came to the Electorate upon the Death of his Father, when he banish'd the *Jews* out of his Dominions, and order'd him that poison'd his Father to be put to a cruel Death. Finding himself in great Debt, he obtain'd Money to pay them from a Meeting of his States. He renewed all the Constitutions that were for the Good of his Subjects, of whom he took great Care, and preserved their Religious and Civil Liberties. He was so much esteem'd for his Probity, that the Duke of *Mecklenburg*, the Duke of *Anhalt*, and the Elector of *Saxony*, appointed him by their Wills to be Tutors to their Sons, which he executed with great Justice. He endeavour'd to obtain Freedom for the Protestants in the Electorate of *Cologne*, after the Pope had excommunicated their Elector for turning Protestant. He took great Care to have Religion and Justice flourish in his own Dominions, and supported his Grandson *John George*, who was chosen Administrator of the Bishoprick of *Strasburg*, and died piously in 1598, in the 72d Year of his Age, and the 27th of his Reign. He was a Mild, Industrious, Eloquent, Judicious, and Bountiful Prince, had excellent Parts, a noble Mien, and good Face.

He

He was ſucceeded by his Son *Joachim Frederick*, whoſe Præceptor was the Learned *Hubner*, whom he afterwards made one of his Counſellors. During his Minority, he was choſen Biſhop of *Havelberg* and *Lubeck*; but his Father took Care of the Adminiſtration. At 19 Years of Age, he went to the Court of the Emperor *Maximilian* II. follow'd him in his Wars in *Hungary*; and upon the Death of the Archbiſhop of *Magdeburg*, was made Adminiſtrator of that Archbiſhoprick, and brought in the Reformation there, where his Government was pleaſing to all his Subjects. He liv'd in perfect Amity with his neighbouring Princes, and frequently reconcil'd their Differences. He aſſiſted *Henry* IV. of *France* againſt thoſe of the League. After his Father's Death, his Subjects receiv'd him with as great Joy as thoſe of *Magdeburg*, whom he had govern'd ſo happily for 30 Years, had Grief at his Departure, and out of Love to him, choſe his youngeſt Son in his ſtead. The Emperor *Rodolphus*, who eſteem'd him highly, readily inveſted him, and granted his other Demands. He govern'd his Subjects with great Mildneſs and Juſtice; and being taken ill as he was ſinging Pſalms in his Coach, he died ſuddenly, recommending himſelf devoutly to God, in the 62d Year of his Age, and 11th of his Reign, in 1609; and was ſucceeded by

John Sigiſmund, who was bred up in Learning at *Strasburg*; and in the 19th Year of his Age, was married to *Ann* Dutcheſs of *Pruſſia*, Preſumptive Heireſs of the Dutchy of *Juliers*. He was confirm'd in the Dutchy of *Pruſſia* by the King and Diet of *Poland*; but not without Oppoſition by ſome of the *Poliſh* Grandees: And the Duke of *Juliers* and *Cleves*, Uncle to his Electreſs, dying, he took Poſſeſſion of theſe Dutchies in her Right; but was oppoſed by the Duke of *Neuburg*, and at length came to an Agreement to govern jointly. He enter'd into the Union of the Proteſtant Princes, againſt the League made by the Poiſh Princes in the Empire, and died in 1619, in the 48th Year of his Age, and 12th of his Reign; and was ſucceeded by his Son

George William, who was born in 1595, and bred in the Univerſity of *Francfort*. During his Father's Life, he had the Adminiſtration of *Juliers* and *Cleves*. He was very zealous for the Proteſtant Religion; and in an Aſſembly held at *Leipſick*, endeavour'd an Union betwixt the *Lutherans* and *Calviniſts*, which came to nothing, becauſe of the Peeviſhneſs and Stubbornneſs of ſome Churchmen. After the Battle of *Prague*, where *Frederick* IV. Elector *Palatine*, was defeated, *George William*, and the Elector of *Saxony*, procur'd Peace in the Empire for ſome Time: But the Succeſs of the Houſe of *Auſtria* having made them attempt the Liberties of the Empire, and the Ruin of the Proteſtants, it brought on the War betwixt *Guſtavus Adolphus* and the Emperor; during which, the Dominions of *Brandenburg* ſuffer'd very much; and all the Elector could do, was to defend his beſt Places. He dy'd in 1640, and was ſucceeded by his Son

Frederick William, who provided for the Eaſe of his Subjects by a Treaty of Neutrality with the *Swedes*, who by the Peace of *Munſter* were obliged forthwith to evacuate *Pomerania*, and the Marquiſate of *Brandenburg*; but the *Swediſh* Deputies delayed it by Tricks till 1653; nor could it then be procured but by the Elector's quitting that now called *Swediſh Pomerania*, and ſeveral Bailiwicks, with the Iſle of *Rugen*, to the *Swedes*; for which he had, but much ſhort of an Equivalent, the Arbiſhoprick of *Magdeburg*, the Biſhopricks of *Halberſtat* and *Camin*, and the Principality of *Minden*, with their Dependencies. He offer'd 2000000 Crowns, and all thoſe Dominions, for that Part of *Pomerania* he was obliged to yield; but in vain. He bravely maintain'd the Prerogatives of the Electors as to the Ceremonial in the Diet of *Francfort*, and was very zealous in ſupporting the Intereſt of Religion, and particularly of the *Calviniſts*. In 1656, he was oblig'd, for the Preſervation of *Pruſſia*, to join with the *Swedes* againſt the *Poles*. But the King of *Denmark* having declared War againſt *Charles Guſtavus* of *Sweden*, he was forced to leave *Poland* to defend his own Country; ſo that the Burden of the *Poliſh* War falling upon the Elector, he made it up by a Treaty with the *Poles*, by which they acquitted him from the Homage due to their Crown for *Pruſſia*, and quitted him the Fiefs of *Lawenburg*, *Botow*, and the Town of *Elbing*, on Condition that he ſhould reſtore the latter on their paying him 400000 Crowns. After

Digitized by Google

tet the Death of *Ferdinand* III. in 1657, the *French* were for advancing the Elector of *Bavaria* to the Imperial Throne; but the Elector of *Brandenburg* adhering to the Houſe of *Auſtria*, the laſt Emperor *Leopold* was choſen, thô the Elector of *Bavaria* had before-hand gained 3 Votes. He afterwards took Part with the *Poles*, the H. of *Auſtria*, and the *Danes*, againſt *Sweden*, after having firſt endeavour'd to accommodate Matters betwixt the *Swedes* and *Poles*; but not being ſeconded by the *Dutch*, as he expected, a Treaty was concluded at *Oliva* in 1660. After this he apply'd himſelf to the Affairs of Peace, to reconcile himſelf with the Princes at variance with him, and made an Alliance with *France* and *England* for his own Security. The *French* King having ſeiz'd the Principality of *Orange*, the Elector being Tutor of the young Prince, ſent an Embaſſy to plead for its Reſtoration. In 1666, he made a perpetual Treaty with the Prince of *Neuburg* about the Succeſſion of *Juliers* and *Cleves*, and afterwards got the latter perpetually annexed to his own Family. He aſſiſted the Emperor againſt the *Turks*, made Peace betwixt the Dukes of *Lunenburg*, who had fallen out amongſt themſelves, and likewiſe betwixt the *Engliſh*, the *Dutch*, and the Biſhop of *Munſter*. In 1672, the *French* having declared War againſt the *Dutch*, he ſent Aſſiſtance to the latter, and his Troops join'd thoſe of the Emperor under General *Montecuculi*, who diſagreeing from the Elector's Meaſures, they did little more than give a bare Diverſion to the *French*. On ſome Diſcontents by the Emperor and States, he made a Treaty with *France* in 1673; but in 1674, renewed his Alliance with the States againſt *France*, and went into *Alſace* with 20000 Men; but the Imperial General *Bournonville* thwarting his Meaſures, little was done that Campaign. In the mean time the *Swedes*, at the Sollicitation of *France*, invaded *Pomerania* and the *Marq.* Upon which the Elector return'd from *Alſace* againſt the *Swedes*, over whom he gain'd a compleat Victory at *Fehrbellin*, and took from them the Iſle of *Wollin*, *Wolgaſt*, and *Anclam*, one of the ſtrongeſt Forts of *Pomerania*. He alſo took *Stettin*, after a famous Siege; of which, in its Place. In 1678, he made himſelf Maſter of the Iſle of *Rugen*, took *Stralſund* and *Gripwald*, and chas'd the *Swedes* out of all *Pomerania*. They, to divert him, invaded *Pruſſia*; but the Elector, in the middle of the Winter, paſſed the Lake or Bay of *Courland*, which falls into the *Baltick*, with his Army and Artillery upon the Ice, where it was 3 Miles broad, ſurpris'd and defeated them; ſo that of 16000, ſcarce 5000 eſcaped to *Livonia*. After the War of 1672, he was left out of the Treaty of *Nimeguen*; and Peace being concluded among the other Princes, and the *French* joining with the *Swedes*, he was obliged by the Treaty of *St. Germains* to quit all his Conqueſts to them, for which the *French* King, by a ſecret Article, paid him 300000 Crowns towards his Charge of the War. The King of *Spain* refuſing to pay him his Arrears, he put our 8 Veſſels, that took a rich Merchant-Ship on the Coaſt of *Spain*, by which he did himſelf Juſtice. In order to enlarge the Trade of his Subjects, he built a Fortreſs in *Guinea*, called *Grand Friedrichsburg*, and made a Canal betwixt the *Spree* and the *Oder*, by which he facilitated the Commerce of the Merchants of *Sileſia* with thoſe of *Hamburg* and his own Dominions. He imbelliſh'd the Town of *Berlin* with fine Buildings, erected an Arſenal there, built a new Town, put his Dominions in a better Condition than ever they had been, aboliſh'd the Subſidies on Eſtates; and in lieu of it, laid a Tax on Conſumption, which had a very good Effect. He acquir'd greater Authority than any of his Predeceſſors, was lov'd by his Subjects, and dreaded by his Enemies, by keeping always a good Army on foot. He likewiſe diſtinguiſh'd himſelf by his Piety, and endeavour'd a Reconciliation betwixt the *Lutherans* and *Calviniſts*; but in vain. He was very charitable and bountiful to the *French* Refugees, employ'd their Nobility and Officers in his Court, and eſtabliſh'd great Numbers of 'em in his Dominions; and had ſo much Compaſſion on thoſe Sufferers, that he ſaid, He would rather ſell his Plate, than they ſhould want Subſiſtence. He was ſo affable, that all People had ready Acceſs to him to demand Juſtice; for his chief Care was to prevent his Subjects being oppreſſed. He applied himſelf ſo much to the Affairs of Government, that he would

Digitized by Google

would ſpend Hours together in reading Letters from all Parts of his Dominions. His Courage was ſignaliz'd on many Occaſions at the Head of his Armies; and thô he liv'd in great Splendour, was an Enemy to Luxury and Superfluity; but was very generous in rewarding Services done him. He was very exemplary in his Life, and died *April* 29, 1688. in the 68th Year of his Age, and 48th of his Reign.

His Son *Frederick* ſucceeded, and ſoon after had an Interview with the Elector of *Saxony*, the Duke of *Hanover*, and the Landgrave of *Heſſe-Caſſel*, about their own Intereſts, and the Prince of *Orange*'s Expedition to *England*, which had been concerted with his Father before. At the ſame Time the *French* King, to traverſe that Deſign, made War upon the Empire, contrary to his Truce, wherein the Dauphin took *Philipſburg*, and other Places of the *Palatinate*. Next Year the Elector form'd the Siege of *Bonn*, and took it, having narrowly eſcap'd being ſurpris'd by a *French* Detachment, wherein he gave great Proofs of his Valour. In 1690, King *William* having ſucceeded in his Expedition, ſent him the Order of the *Garter* by *James Johnſton* Eſq; afterwards Secretary of State for *Scotland*. In 1693, his Troops diſtinguiſh'd themſelves at the Battle of *Landen*, under the Conduct of his Brother Prince *Charles*, of which King *William* ſent him an Account under his own Hand. In 1694, he ſent Aſſiſtance to the Duke of *Savoy*, under his two Brothers Prince *Charles* and Prince *Albert*. In 1695, his Troops contributed much to the taking of *Namure*, of which King *William* gave him an Account again with his own Hand: Upon which the Elector came to the *Hague* to congratulate his Majeſty, whom, with the Duke of *Zell*, he entertain'd ſplendidly at *Cleves*. After King *Auguſtus* was choſen King of *Poland*, the Elector ſeiz'd the Town of *Elbing* for the Security of the Money due to his Father, as above-mentioned. In 1700, the Elector conſidering the Antiquity and Dignity of his Houſe, from whence many Crown'd Heads in ſeveral Parts of *Europe* had proceeded, and being himſelf able to ſupport his Splendour of a Crown, took upon him the Royal Dignity the 17th of *December* that Year, with extraordinary Ceremony. The *Swedes* having enter'd *Poland*, his Majeſty found himſelf obliged to increaſe his Army to 40000 Men. King *William* dying in 1702, his *Pruſſian* Majeſty, as deſcended from *Rene* of *Naſſau*, Prince of *Orange*, claim'd Part of his Inheritance; as to which, the Controverſy betwixt his *Pruſſian* Majeſty, and the Prince of *Naſſau* of *Friſeland*, whom King *William* left his Heir, is not yet determin'd. This occaſioned the King of *Pruſſia* to take a Journey to the Dutchy of *Cleves*, to keep the States of *Holland* from being too much diſcouraged by the Death of King *William*; and he encouraged the Allies to beliege *Keyſerſwaert*. The *French* King having ſeiz'd *Orange* after King *William*'s Death, his *Pruſſian* Majeſty kindly received the Proteſtants who fled from thence into his Dominions. In 1704, his Troops having contributed much to the glorious Victory of *Hochſtet* under the Prince of *Anhalt*, Prince *Eugene* gave his Majeſty an Account of it by a Letter. In 1705, his Majeſty erected an Academy at *Berlin* for the Education of his Youth of Quality, in ſuitable Exerciſes, and Learning. That ſame Year he loſt his Queen, Siſter to the Elector of *Hanover*. In 1706, he had an Account of the Victory of *Turin*, where his Troops, under the Prince of *Anhalt*, diſtinguiſh'd themſelves with great Bravery. In 1707, he ſucceeded the Dutcheſs of *Nemours* in the Principality of *Neufchattel*, and County of *Vallengin*, by the Interpoſition of the Queen of *Great Britain* and the Allies, notwithſtanding the *French* King's Oppoſition. That ſame Year, the Prince Royal his Son married the Princeſs of *Hanover*; and in *November* following, he had a Son by her, whom his Grandfather created Knight and Prince of *Orange*.

His Titles are, *Frederick*, by the Grace of God, King of *Pruſſia*, Margrave of *Brandenburg*, Arch-Chamberlain and Elector of the Empire; Prince of *Orange*, of *Magdeburg*, *Cleves*, *Juliers*, *Bergen*, *Stettin*, *Pomerania*, *Caſſubia*, of the *Vandals* and *Croſſen* in *Sileſia*, Burgrave of *Nuremberg*, Prince of *Halberſtat*, *Minden*, and *Camin*, Count of *Hohenzollern*, *Marc*, *Ravensberg*, *Lawenburg*, *Botow*, *Arley* and *Breda*, and Count of *Neufchattel*.

His

Digitized by Google

His Pretensions are, 1. To all *Pomerania*, of which he has only the lower Part. 2. To the Succession of the late King *William*, as Prince of *Orange*. 3. To the Succession of the last Duke of *Juliers*, *Cleves*, and *Mons*. 4. To the Dutchy of *Gelderland*, and County of *Zutphen*, which belong'd to the Dukes of *Juliers*. 5. To the Burgraviate of *Nuremberg*. 6. To the Town and Territory of *Kizingen* in *Franconia*, seiz'd by the Bishop of *Wurtzburg* in 1626. 7. To the Principality of *Lignitz* in *Silesia*, by a Contract of Succession made with Prince *Frederick* in 1549. 8. Some Rights to the Abbies of *Quedlinburg* and *Erfurt*.

The principal Branches of this Family are those of *Bareith-Cullembach*, and *Anspach*. They both came from the Elector *John George*, who died in 1598. The present Prince of *Cullembach* is *Christian Henry*, born in 1661. From *Christian* I. of this Family, came the Branch of *Bareith*, the Prince of which is *Christian Ernest*.

The Branch of *Anspach* came from the same *John George*; the present Prince is *William Frederick*, born in 1703.

There were several other Branches; but they are extinguished.

The present Branches have the same Titles and Pretensions with the Royal Family, except that of King; and there is a Right of Succession among them.

Another of the Branches is that of *Hohenzollern*, which is as old as *Charlemagne*'s Time; the present Prince is *Frederick William*, born in 1663. From this Branch came the Burgraves of *Nuremberg*, from whence the Royal Family is descended; and from it proceeded also that of *Sigmaringen*, whose present Prince is *Francis Anthony*.

The Arms of the Royal Family are, *Argent*, an *Eagle* spread *Sable*, Crown'd with a Royal Crown, for *Prussia*. *Gules*, 1. 4. fac'd *Or*; *Or*, 2, 3. with a *Cornet Azure*, the whole surmounted with an *Escutcheon Checkee*, *Or* and *Azure*, for *Orange*. *Azure*, a *Scepter Or*, for the Dignity of Elector. *Argent*, an *Eagle Gules*, for *Brandenburg*. *Or*, a *Lion Sable*, for *Juliers*. *Argent*, a *Lion Gules*, Crown'd *Or*, for *Berg*. *Coupe*, *Argent* and *Gules*, for *Magdeburg*. *Gules*, an *Escutcheon Argent*, in Form of a Heart, with Rays of a Carbuncle knotted and flower'd *Or*, illuminated with *Vert*, for *Cleves*. *Or*, a *Lion Sable*, within a Border *Compone*, *Gules* and *Argent*, for *Nuremberg*. *Azure*, a *Griphin Gules*, for *Stettin*. *Or*, a *Griphin Gules*, for *Cassubia*. *Argent*, a *Griphin Gules*, for *Pomerania*. *Argent*, a *Griphin Gules*, for *Wenden*. *Argent*, a *Griphin Azure*, for *Stargard*. *Argent*, an *Eagle Sable*, for *Crossen*. Part *Argent* and *Gules*, for *Halberstat*. *Or*, *Pale-Checkee*, *Argent* and *Gules*, for *Mark*. *Argent*, a *Griphin Sable*, for *Schwibussen*. *Gules*, two *Crosi-Keys Argent*, for *Minden*. *Argent*, 3 *Cheverons Gules*, for *Ravensberg*. *Gules*, a *Croft Argent*, for *Camin*. *Gules*, a *Griphin Argent*, for *Wolgast*. *Couppe*, in the first *Gules*, a *Griphin Argent*, and in the 2d *Checkee*, *Or* and *Gules*, for *Usedom*. Quarter'd *Argent* and *Sable*, for *Hohenzollern*. *Or*, a *Griphin Azure*, for *Bareith*. *Or*, two Trunks of Branches of Trees, Saltyre-wise, for *Gatzkow*. *Azure*, an *Eagle Argent*, for *Rupin*. *Azure*, an Anchor *Or*, for *Lingen*. *Or*, a Front *Sable*, for *Meurs*. *Gules*, a Front indented *Argent*, for *Buren*. *Gules* plain for the *Regalia*.

The Arms of the Branches of *Bareith-Cullembach* and *Anspach*, are the same for *Brandenburg*, *Magdeburg*, *Prussia*, *Stettin*, *Pomeranin*, *Cassubia*, *Wenden*, *Crossen*, *Schwibussen*, *Nuremberg*, *Halberstat*, *Minden*, *Zollern*, *Camin*, and for the *Regalia*.

The Arms of *Hohenzollern* are, *Gules*, two *Scepters Or*, Saltyre-wise, for the Dignity of Arch Chamberlain of the Empire Quarter'd *Argent* and *Sable*, for *Hohenzollern*. *Azure*, a *Hart Or Passant*, upon 3 Clods of Earth *Vert*, for *Stemaringen*.

The Religion of the Country is *Lutheran*; but since the present King of *Prussia*'s Grandfather turn'd *Calvinist*, those of that Persuasion have increas'd in the Country, to which they are encourag'd by the Court; and many of their Chief Men are bred that Way in the Universities of *Francfort* and *Coningsberg*. The Elector *George William* having married a *Calvinist* Lady of the *Palatine* Family, Daughter to *Frederick* V. Dr. *Nicholson* says, he publish'd an Edict to suppress *Lutheranism*; but was obliged to revoke it, for fear of a Rebellion, and content to have his own Worship in the Chapel of his Family; but now the *Calvinists* have many Churches in his Dominions. The Country is divided into the *Old*, *Middle*, and *New Marches*, or Marquisates.

The Alt-Marck,

HAS *Mecklenburg* on the N. *Magdeburg* on the S. *Saxe-Lawenburg*, and Part of *Lunenburg*, on the W. and the *Middle-Marck* on the E. being about 30 *English* Miles in Length and Breadth. Some Authors call it the *Galilee* of *Germany*, becauſe it abounds in Herbs and Fruit. 'Tis divided into 4 Petty Provinces; that on the E. called *Oſtland*; that on the S. called *Angerland*, from the River *Anger*; that on the W. *Zermundland*; and that on the N. *Zenland*.

The chief Towns in this *Marck* are, 1. *Stendal*, the Metropolis, on the River *Ucht*, by a large Forreſt, in a pleaſant Plain. It was built by the Emperor *Henry* I. in 920, and fortified by *Albert the Bear* in 1150. 'Tis a Hans-Town, neat and well built. Their Trade is in Corn and Linen; and being on the Road from *Hamburg* and *Lubeck* to *Magdeburg* and *Erfurt*, the Inhabitants receive a great Advantage by Travellers, and likewiſe from the Court of Judicature for the whole Country, which is kept here. It lies about 37 Miles N. W. of *Brandenburg*, and about 20 S. W. of *Havelberg*.

2. *Seltwedel*, a great Town on the Banks of the *Jetze*, half-way betwixt *Lunenburg* and *Stendal*. Some derive its Name from a Temple dedicated to the Sun in the Times of Paganiſm. This City, with the neighbouring Territory, had formerly Princes of their own, who, as Hiſtorians ſay, did great Things againſt the *Huns*; but it has been long annexed to *Brandenburg*. The Town is divided into *Old* and *New*; the former is ſaid to have been built by *Claudius Druſus*, and the latter by the Emperor *Henry* I. Their chief Trade is in Beer, which they tranſport to the neighbouring Country.

3. *Gardleben* Dr. *Nicholſon* thinks, it derives its Name from the many pleaſant Gardens near it. Their chief Trade is Beer and Hops, both reckon'd as good as any in *Germany*, and are bought up by *Dutch* and other Merchants. The City has 3 Hop-Poles laden with Hops for its Arms. It lies about 20 Miles S. W. of *Stendal*, and has an old Fort in the Neighbourhood, called in their Language *Iron Jawr*.

4. *Angermund*, or *Tangermund*, on the Mouth of the *Anger*, about 22 *Engliſh* Miles E. from *Gardleben*. The Emperor *Charles* IV. built the Caſtle here when he bought the *Marck* in 1376, and reſided in it ſome Years after. They have a conſiderable Trade for Corn, &c. by the *Elb* with *Hamburg*, and other Places.

5. *Oſterburg*, on the *Vecht*, a ſmall Town, which ſuffered much by Fire in 1491. 'Tis noted for a great Corn-Market.

Other Places of leſs Note are, 1. *Stehuſen*, on the River *Alant*. 2. *Werben*, on the Conflux of the *Elb* and *Havel*, built by *Henry the Fowler*, from the Ruins of the old *Caſtellum Vari*. *Guſtavus Adolphus* fancied it might be made the ſtrongeſt Fortreſs in *Germany*, and order'd that Caſtle to be built, which now commands the Town. 3. *Havelburg*, upon the *Havel*, about 8 Miles from the *Elb*, formerly a Biſhop's See, Suffragan to *Magdeburg*; but ſince 1555, they have been *Lutherans*. 4. *Perleberg*, the chief Town of the County of *Prignitz*, in a fruitful and pleaſant Plain. *Arneburg*, *Wittenberg*, *Biſmarcht*, *Slmakenburg*, and others, which are rather Villages than Towns.

Middle-Marck,

LIes in the middle of the *Marck*, and is the largeſt of the 3 Diviſions, being about 100 *Engliſh* Miles from the Banks of the *Elb* to the *Oder*.

The chief Towns are, 1. *Brandenburg*, which gives Name to the Marquiſate, and was formerly the Metropolis. Some *German* Hiſtorians alledge it to have been built by one *Bremo*, 416 Years before our Saviour. Others ſay, 'twas built by one *Brando*, *A. C.* 230. 'Tis now conſiderable for little but its Antiquity. It ſtands in the middle of Marſhes on the River *Havel*, which divides it into the Old and New Town. They are well ſupplied with Fiſh by a neighbouring Lake, 10 Miles long. It was made a Biſhoprick by the Emperor *Otho* I. in 946; but has been Proteſtant ſince 1563. The Elector *George William* appropriated it to himſelf in 1628. The Streets of the upper Town are built croſs-wiſe, and center in a fine Market-place, where there is a *Statua Rolandina*. In their great Church, there are many

Digitized by Google

many Monuments and Sepulchres of Princes and Bishops. It lies about 28 Miles W. from *Berlin*, and about 45 N. E. of *Magdeburg*.

2. *Berlin*. *Angelius a Werdenhagen*, a good Author, who has given us the Description of the Hans-Towns, derives its Name, as he does those of *Bernau*, *Beerwald*, *Bernstein*, and other Places of the *Marq*, from *Albert the Bear*. 'Tis pleasantly seated on the Banks of the *Spree*, which several Geographers have mistaken for *Ptolemy*'s *Suevus*. On the other Side the River stands *Coln*, on the *Spree*, so called to distinguish it from *Berlin*. Here the Elector has his Palace in the Castle built by *Joachim* II. but much enlarged and beautified by his Successors, so that 'tis now very stately, and, with the Grandeur of the Court, the Largeness of the Streets, and the regular Architecture of the Houses, makes the City very magnificent. The Elector *Frederick William* enlarged it one Third, by building the Town called *Dorothystat*, from the Name of his second Wife *Dorothy* of *Holstein-Glucksburg*. The Canals from this Town to the *Oder* and the *Elb*, make it one of the best Trading Towns in *Germany*, as 'tis one of the finest. It was built by *Albert the Bear* in 1152, and fortified by *John the Prudent* in 1222. The Works are very regular, and 'tis capable of holding out a long Siege. It lies about Lat. 52. 33. Long. 31. 58. about 73 Miles N. E. of *Magdeburg*, and 28 E. of *Brandenburg*, in a fruitful Country, with Vineyards on one Side, Marshes on another, and Woods full of Game on the third. The most remarkable Things in and about the Elector's Palace are, the Armory, Chambers of Rarities, Galleries with Multitudes of rare Pictures, many of them by the famous *Luke Kranach*, Gardens, and Water-Works. The present State of *Germany* says, the Palace is built of Free-Stone, and wash'd on one Side by the River *Spree*; and on the other, there's a great Gate into a large Piece of Ground where the Stables are. On the Front, there's the great Street which comes from *Frederickstat*; and behind it lie the Gardens, which are in good Order, and spacious. The Palace contains two great Courts, the first square, where the Officers of the Guard lodge: From thence there are great Stairs, by which one may ride on Horseback up to the Court, which is oval; and there are 4 other Stairs which lead to the several Parts of the Court. In the Palace, there are 10 great Apartments for the Royal Family, with great Numbers of Chambers for the Courtiers, all magnificently furnish'd, besides many Halls, Chambers, Closets, and Galleries, with whatever can be wish'd for Conveniency or Grandeur. In the Elector's Apartment, there's extraordinary rich Furniture of massy Plate, Pictures, and other great Curiosities, especially a large Cabinet, full of ancient, rare, and valuable Medals, with abundance of other curious Pieces. The Electress's Apartment abounds with Pictures of the best Masters. There is one great Chamber full of Pictures, done by *Van Dyke*; among which, that of the Holy Supper is reckon'd to be the best ever he did; and the unnailing our Saviour from the Cross, done so to the Life, as to move Compassion in all that see it. There's another of the Wise Men that came to worship our Saviour, and a Picture of all the Royal Family of *England*. The Gallery, which is above Fifty Paces long, is full of Pictures by the best *Italian* Masters, one of them the Head of our Lord by the famous *Raphel de Urbino*, valued at Fifty Thousand Crowns. Joining to the Palace on the Side of the Garden, is the Elector's Library, dispos'd in excellent Order, and said to be equal to the best in *Europe*. The great Stables have room for 400 Horses, of which the Elector has above 3000 of his own, having Querries in all his Dominions to breed and take care of them. His Arsenal here is reckon'd one of the best furnish'd in *Europe*, besides what he has elsewhere. In short, his Court is reckon'd one of the most magnificent in *Christendom*, and Strangers are entertain'd there with great Civility, according to their Quality. He is reckon'd to have 2500 Gentlemen belonging to his Court, fit for Command in the Field; and the Troops of his Houshold are above 8000. He has 6 or 7 supreme Courts of Judicature for trying all Causes in his Dominions, well supplied with Judges; and his Countries are well furnish'd with an able and learned Clergy. He presides in Council himself, and in his Absence the Electoral Prince; next to whom sits the Prince of *Anhalt*. His Father's Annual Revenues

Digitized by Google

were computed at 15000000 of Livres; and he left his Succeſſors in a Way of augmenting 'em. His Dominions are reckon'd 300 *French* Leagues in Length; and his Father, in 4 Months time, arm'd 20000 Foot, and 4000 Horſe, in his own Dominions, without dreining his Gariſons: So that upon the whole, it may be reaſonably concluded, That, next to the Houſe of *Auſtria*, he is the moſt powerful Prince of the Empire.

3. *Francfort* on the *Oder*. 'Tis ſaid to have been built about 146, by *Sunno*, a Prince of the *Franks*, who purſued the *Vandals* hither, and planted a Colony of his own People here. In 1253, the Elector *John* I. and his Brother *Otho*, rebuilt and enlarged the Town above a Third. In 1379, the Elector *Sigiſmund* granted them large Privileges, upon their entring into the Society of the Hans-Towns. We have mention'd already, That *Joachim* I. founded their Univerſity, and ſupplied them with Profeſſors from *Leipſick*; ſince which, they have had ſeveral Learned Men. 'Tis divided into two by the *Oder*, over which they have a large Wooden Bridge. The Streets are large and well built; The Market-place ſpacious and ſtately; and they have three Annual great Fairs. The Proteſtant Religion was eſtabliſh'd here in 1538. It lies about 45 Miles S. of *Berlin*, about Long. 34. Lat. 52. 37. Without the Gates, there's the Ruins of an ancient *Carthuſian* Monaſtery, of which *Joannes ab Indagine*, reckon'd to be Author of 300 Treatiſes on different Subjects, was Prior.

4. *Spandaw*, on the Conflux of the *Havel* and *Spree*, which makes it very ſtrong; but of no great Note otherwiſe.

5. *Oranienburg*, about 20 Miles N. E. from *Berlin*, where the Elector has a Country-Houſe. This Place affords the greateſt Variety of Pleaſures of any in his Dominions, being encompaſſed on every Side with pleaſant Parks and Forreſts, well ſtock'd with all manner of Game.

6. *Ruppin*, on the little River called *Rhine*, which divides it into the Old and New Towns. 'Tis the Chief of the County of that Name, and had formerly Lords of its own, who dying without Iſſue in 1524, *Joachim* I. purchas'd it.

7. *Potzdam*, about 12 Miles S. W. of *Berlin*, where the Elector has a Country-Houſe, that he makes uſe of in Summer.

8. *Lebus*, on the *Oder*, formerly a Biſhoprick, founded by *Miceſlaus*, the firſt Chriſtian Prince of *Poland*, about 965. It embrac'd the Reformation in 1555, and the Elector of *Brandenburg* united it to his Dominions in 1628, and, as Biſhop of *Lebus*, is Chancellor of the Univerſity of *Francfort*.

9. *Furſtenwalt*, a little pleaſant City on the *Spree*.

10. *Prenſlow*. 11. *Strasburg*. 12. *Templin*. Three well fortified Towns in that called the *Ucker Marck*. The firſt is well ſupplied with Fiſh from that called the *Ucker Sea*. They belong'd formerly to the Dukes of *Pomerania*; but were ſeiz'd by the Elector *Frederick* I. in 1424.

The New-Marck,

Lies betwixt the River *Warta* and *Pomerania*, and is divided from the *Middle-Marck* by the *Oder*. 'Tis about 100 Miles in Circuit, and belong'd formerly to the *Teutonick* Knights, from whom it was purchas'd by the Family of *Brandenburg* in the 13th Century; but they had not peaceable Poſſeſſion of it till the 16th. The Country abounds with Corn and Paſture, more than any other Place of the Marq. On the Banks of the *Oder* they have Vineyards, but of no great Account; and the Boors find now and then Quantities of Corn and Precious Stones, which they ſell for little.

The chief Towns of this Country are, 1. *Cuſtrin*, on the *Oder*, 18 Miles N. of *Francfort*. It was only a Fiſhing-Village till the Elector *John*, after returning from the Wars under *Charles* V. fortified it in 1537; ſo that 'tis now the Key of the *New-Marck*. *Guſtavus Adolphus* beſieg'd it in vain in 1631, being the firſt Deſign of that ſort on which he miſcarried. 'Tis ſtrong by Nature as well as Art, being ſituated in a Marſh on the Conflux of the *Oder* and *Warta*. It has an Arſenal well furniſh'd, and a Citadel, the ſtrongeſt of the Country; ſo that 'tis reckon'd impregnable. The Burghers have neat and well furniſh'd Houſes, and the Market-place is the beſt in the Marq.

2. *Falkinburg*, a Town with a ſtrong Caſtle, on the Frontiers of *Pomerania*.

3. *Dreyſen*,

Digitized by Google

3. *Dreſſen*, a Town on the Conflux of the *Notez* and the *Trage*, near the Frontiers of *Poland*.

4. *Lanſperg*, on the *Warta*, above 30 Miles N. E. from *Francfort*. 'Tis conveniently ſituated for Trade, which conſiſts much in caſting of Iron Ordnance. It was twice taken by the *Swedes* during the *German* War.

5. *Sunneberg*, on the ſame River, formerly the Reſidence of the Bailiffs of the Order of *Malta*, till the Electors ſeiz'd it in the 16th Century, and aſſum'd the Power to preſent the Bailiffs, and diſpoſe of their Commanderies.

6. *Sternberg*, Capital of a County on the Frontiers of *Poland*, about 25 Miles E. of *Francfort*.

Buno, in his Notes on *Cluverius*, ſays from *Aventinus*, That moſt of this Marq was ſold to the Emperor *Charles* IV. by *Otho* of *Bavaria*, for 200000 Pieces of Gold, which *Otho* afterwards ſpent in the Caſtle of *Wolfſtein* on a Baker's Wife, whom he debauch'd.

POMERANIA.

DR. *Nicholſon* ſays, the Name comes from its Situation on the Sea-ſhore, both in the *Sclavonick* and *High-Dutch* Tongues; the firſt calling it *Pomer*, and the latter *Pomercze*. The common Name is *Pomeren*. Hiſtorians ſay, it was formerly ſubject to *Poland*, but annexed to the Empire by *Frederick Barbaroſſa*. It was anciently of a much larger Extent, including *Pomerellia* and *Caſſubia*; called *Back Pomerland*, which has been for a long Time in Poſſeſſion of the *Poles*; and the preſent Dutchy is that which was then called *Fore Pomerland*. The Dukes of *Pomeren* did likewiſe poſſeſs that Part of *Brandenburg* now called *Uckermarck*, and the greateſt Share of the *New Marck*. Their Dominions reach'd further alſo into the *Baltick*, which, with Part of the Iſle of *Rugen*, has been ſwallow'd up by the Sea.

This Country, according to *Moll's* Map, is about 192 Miles from E. to W. and about 70, where broadeſt, from N. to S. *Sanſon* makes it 210, and much about the ſame Breadth as the former. *Buno* on *Cluverius* ſays, it has *P.land* on the E. the Dutchy of *Mecklenburg* on the W. the *Baltick* on the N. and the Marq of *Brandenburg* on the S. The principal Rivers are, the *Oder*, which falls by three Mouths into the *Baltick*, the *Pen*, *Rega*, *Perſant*, *Wiper*, and the *Stolp*. *Cluverius* divides it into 7 Parts or Dutchies, *viz. Wenden*, *Stettin*, *Gutſchkow*, *Wolgaſt*, *Uſedom*, *Rugen*, and *Bart*.

Their Air is reckon'd the coldeſt in *Germany*. Their Soil in moſt Parts is ſandy and barren, and their Corn-Fields near the Shore are frequently overwhelm'd with Sand: Yet the Valley near the City *Peritz* abounds ſo much in Corn, that it not only ſupplies the Country, but in fruitful Years furniſhes great Quantities for Export. They have few high Mountains, but many large Woods and Forreſts, well ſtock'd with Game, as Deer, Wild-Boars, Hares, Foxes, Wolves, Wild-Horſes, Bulls, and Beavers. Their Woods and Lakes furniſh them with Plenty of Land and Water Fowl, ſo that they reckon 20 Sorts of Wild-Ducks; and their Towns of *Stettin*, *Stralſund*, and other Ports, bring them all Sorts of Foreign Commodities. They have ſuch Plenty of Freſh and Salt-Water Fiſh, that ſome of their Hiſtorians ſay, the Duke of *Pomeren* had 5000 Rix-Dollars in one Year from Cuſtoms on Fiſh caught in the great *Haff* or Bay below *Stettin*, and the Lake of *Laſſan*; and that 30000 Crowns worth are taken Annually at thoſe two Places. The Fiſh in the *Haff* are Salmon and Lampries; ſome of 'em of an incredible Bulk. About *Gripſwald* and *Rugen*, they have a good Herring-fiſhing, but in no other Place of the Country; and in the Lake *Madduje* near *Colbatz*, they have a large broad Fiſh, called *Muſenen*, that's found no where elſe in the Empire.

Dr. *Nicholſon* mentions ſeveral other Rivers, and abundance of Lakes; the chief of which are, *Rekenitz*, that ſeparates this Country from *Mecklenburg*, forms a kind of Sea near *Damgarten*, and falls into the *Baltick* at *Dars*. He adds, That there are many large and fair Meadows betwixt the Branches of the *Oder*, which, after it paſſes by *Zegenorth* and *Shwantwitz*, forms a vaſt Freſh-Water Ocean, 16 Miles broad, and 16 long, called by the Natives the *Great Freſh Haff*, from whence it falls into the Sea in 3 Currents, which make as many ſafe Harbours: The *Divenow*, *Swine*, and *Penemunde*. He adds,

Digitized by Google

adds, That *Pomeren* affords as great Quantities of Fruit, and as many Sorts, as any Province in *Germany*. They have no Wine of their own Growth, but excellent Beer of several Sorts, as the Bitter Beer of *Stettin*, the Mum of *Gripswald*, and the Stout of *Wollin*, which Mariners transport to other Nations. They have no Mines, but some of Iron in *Upper Pomeren*. The Sea casts up Amber in some Places, that every one is allow'd to gather and sell as they please, which the Nobility of *Prussia* do not allow to the common People of that Country.

The People are reckon'd as quick and stout as any in *Germany*; but are charg'd on the other hand with being credulous, prodigal, and intemperate in Drink, says Dr. *Nicholson*. *Cromer* gives this Character of the ancient Inhabitants, That they were Strangers to Deceit, Theft, or Robbery, lock'd up nothing, were hospitable to all Strangers according to their Ability, and so kind to one another, that there were no Beggars among them: But during the Times of Paganism, they allow'd Fathers to kill their Daughters, if they had more Children than they could maintain; but would by no means do so by their Males. This seems inconsistent however with the other Part of their Character of being so charitable to one another.

The ancient Inhabitants, among whom were the *Rugii*, *Rendigni*, and *Longideduni*, had for many Centuries their own Princes; but we have little of their History. The first we meet with upon any good Record is *Barnimus*, of the ancient Family of the *Gryphones*, frequently mention'd in their Annals, and the Country bears still a Gryphin for their Arms; but whether they had their Name from that Coat, or they assum'd it because of the Resemblance it had to their Name, is not certain. He is said to have govern'd about 933. His Grandson *Suantibor* is mention'd to have divided his Principality betwixt his Sons *Bogislaus* and *Wartislaus*: The former had *Pomerellia*, and retain'd the Language and Customs of his Countrymen the *Sclavomians*: The latter had *Lower Pomerania*, and soon after conform'd himself to the Laws and Customs of the *Saxons*: Upon which it was reckon'd a Part of the Empire, and his Sons *Casimir* and *Wartislaus* were made Dukes of *Pomeren*, and Princes of the Empire, by *Frederick Barbaroſſa*. *La Forest* says, they received Christianity in the 12th Century, and *Luther's* Reformation in the 16th. The two Dutchies were united in 1470, says that same Author, in *Bogislaus* X. surnam'd the *Great*, who had long Wars with *Albert* of *Brandenburg*, which were concluded by the Treaty of *Wolgast*. Dr. *Nicholson* says, That *Lower Pomerania* was divided in 1217 betwixt *Bugislaus* and *Otho*, two Brothers, from whom came the Houses of *Wolgast* and *Stettin*, which lasted about 200 Years; but that of *Stettin* failing in 1464, his Dominions were given by the Emperor *Frederick* III. to *Frederick* II. of *Brandenburg*, which occasioned a Difference betwixt the Elector and the House of *Wolgast*, that was compos'd by the Treaty above-mention'd, on Condition that both should retain the Arms and Title, but the Possession should be given to the Duke of *Wolgast*; and upon the Failure of his Issue-Male, it should come to the Family of *Brandenburg*. Accordingly *Bogislaus* XIV. dying in 1637 without Issue, *George William* of *Brandenburg* put in his Claim; but the *Swedes* having assisted *Bogislaus* against the Imperialists during the Civil Wars of *Germany*, *La Forest* says, That by his Will he left the King of *Sweden* his Heir; and the *Swedes* being possessed of the Country, would not part with it; and at the Treaty of *Munster* it was agreed, That *Lower Pomerania*, with the Isles of *Rugen* and *Wollin*, should be annexed to the Crown of *Sweden*; and that *Upper Pomerania* should be added likewise, upon Failure of the Male-Issue of the House of *Brandenburg*. In the mean time both Princes were to enjoy the Title and Arms. In Consideration of which, the Family of *Brandenburg* had *Halberstat*, *Minden*, &c. as formerly mention'd; which, tho the Revenues may be as large, yet the Elector would rather have had *Lower Pomerania*, by which he might have been considerable at Sea, and deliver'd from the Jealousies of such a potent Neighbour as the King of *Sweden*: Tho the Empire allow'd the Elector 4 more Voices in the Diet for his new Principalities.

The chief Towns are, 1. *Stettin*, always reckon'd the Metropolis of the whole Country. 'Tis so ancient, that its Origine is

is not known; but about 400 Years ago, it appears to have had a quite different Situation; for the Church of St. *Peter*, now without the Walls, was then in the middle of the Town. The *Saxons* were allow'd to come hither by the Dukes of *Stettin*, to reform the Language and Manners of their *Wendiſh* Subjects, and contributed much to its Order, Beauty, Strength, and Trade. It's a Hans-Town, ſtands on the Riſing of a ſmall Hill, and is one of the moſt Trading Places in *Germany*; thô *La Foreſt* ſays, their Trade is decreas'd ſince the Settlement of the Republick of *Holland*. The Town is ſtill ſo populous, that, according to ſome modern Writers, abundance of the Inhabitants are forc'd to live in Cellars and Vaults. The Caſtle, formerly the Palace of the Dukes, and now the Reſidence of the *Swediſh* Governor, is one of the beſt Pieces of Architecture in that Part of *Europe*, and may vie with moſt of its kind in *Italy*. They have a great Trade in all kind of Merchandize, particularly all ſorts of Salt and Freſh Fiſh, Wood for Fuel and Building, Corn, *&c.* and 'tis a proper Center for exchanging the Commodities of *Poland*, *Germany*, and the *Baltick*, by the Conveniency of the River *Oder*. It falls into the Sea 40 Miles below it, and is navigable a great way above it by leſſer Veſſels. The Citizens are noted for their Civility to Strangers, and their Courage in defending themſelves when attack'd. The Imperialiſts beſieg'd it in vain 4 Months in 1659; and in 1677, it held out a long Siege againſt *Frederick William the Great*, the late Elector of *Brandenburg*; which being one of the moſt remarkable Sieges that has happen'd in *Europe*, we ſhall give ſome of the chief Particulars, from an Account of it printed at *London* in 1678.

The Elector had the Year before attempted this City; but finding his Forces too weak, he withdrew them, and provided for a ſecond Attack the following Summer. Accordingly he ſet out from *Berlin* the 5th of *July*, 1677, with 9 Regiments of Horſe, 10 of Foot, 5 of Dragoons, and his Foot-Guards: 4000 *Lunenburgers* did alſo come to his Aſſiſtance, with ſome Men of War from the King of *Denmark*. On the 7th of *July*, he came before it with 20000 Men, took ſome Poſts, and rais'd Batteries on the *Oder*, which galled their Shipping in the River. The Town, who had long expected a Siege, ſent out all their uſeleſs People, and gave a reſolute Defiance to the Elector's Summons. Upon this the Elector puſh'd on, and took ſeveral Forts, wherein the Troops on both Sides ſhew'd wonderful Courage. The ſlow March of the *Lunenburgers* retarded the Siege for ſome time; but upon their Arrival, it was carried on with more Vigour. The *Daniſh* and *Swediſh* Ships engaged one another in the River; but the Elector's Forts did ſo gall the latter, that when they obtained an Advantage over the *Danes*, they could not purſue it. In the mean time the Elector's Artillery did great Execution in the City; yet the Gariſon made a brave Defence, ſallied out, and attacked his Intrenchments with wonderful Gallantry; but were always over-power'd and repuls'd. The 14th of *Auguſt*, the Elector's Cannon ſunk, and ſhatter'd moſt of the Ships in the River; and on the 15th, his Granado's ſet Fire to the Town in ſeveral Places, and burnt down the great Church. The Elector being griev'd at this, ſent and offer'd them honourable Terms, which they ſtill refuſed. The Town having ſuffer'd much, the Elector ſent a new Summons on the 22d, expreſſing his Pity for them; but they continued obſtinate, made it Death for any one to talk of a Surrender, and ſecur'd ſuch of their Wives and Children as remained in the Town in Places prepared on purpoſe under Ground. The Gariſon continued to make vigorous Sallies, with various Succeſs; but were always repulſed at laſt. On the 6th of *September*, the Elector ſent a Trumpet to forewarn them of their Danger, and to offer them larger Privileges than before; but ſtill they refuſed. The Winter approaching, the Elector puſh'd on the Siege with more Vigour; and to encourage his Soldiers, who ſuffer'd much by the Rains, promis'd them the Plunder of the Town if he took it by Aſſault. The 22d of *September*, 8000 *Danes* landed on the Iſle of *Rugen* to aſſiſt the Elector, of which he gave the City Notice, and ſummon'd them again to ſurrender, which they ſtill refuſed. The 27th, the *Lunenburgers* took a Half-Moon; and the Elector perceiving that there was no likelihood of the Town's being

Digitized by Google

being relieved, he forbore pushing on the Siege with Vigour, both to spare his own Men, and the City. The 3d of *October*, he took the Counterscarp; upon which the Burgers writ to Count *Coningsberg*, the *Swedish* General, expressing their Resolution to hold out to the last, and desiring Relief: To which he return'd an Answer in the King's Name, and his own, assuring them they should have it. The Garison in the mean time made vigorous Sallies, drove the *Lunenburgers* out of their Trenches, and took one of their Generals, with two Cannon, and about 40 Officers. The Elector undermin'd the Wall of the Town, fill'd up the Ditch, took a Half-Bastion, and sent them them new Proffers the first of *November*, threat'ning them with Ruin if they refus'd. They return'd a softer Answer than before; but said, They would defend the Town till the end of the Year, and hop'd he would grant them the same Terms then. The 7th, the Elector review'd his Army, and found he had lost near 7000 Men, besides his Sick and Wounded; and thô the Town was in Ruins, and that they had lost 1400 Citizens, besides Soldiers, they continued resolute, and made vigorous Sallies, with great Loss on both Sides, the Townsmen being in Hopes that the cold Weather would oblige him to raise the Siege. On the 20th, a Quarrel happen'd betwixt the Garison and the Burgers, wherein several fell on both Sides, the former being for a Capitulation, but the latter against it; and one of 'em being a Chief Officer, and at his Post on the Walls, when News was brought him that his Wife and Children were killed in his House by the Enemy's Fire, he order'd his Servant to bury them; but would not quit his Post, and said, He could meet his own Death with as little Concern as he had heard of theirs. The 30th, the Garison made a Sally, and carried off a small Man of War in the River; so that every one thought the Elector would be obliged to raise the Siege, his Foot being reduced to 10000, and his Horse in a bad Condition, by the Rigour of the Season. On the 30th, the Garison despairing of Relief, a new Mutiny began betwixt them and the Citizens, which the Governor appeased, by promising to capitulate before it came to Extremity. *December* the 4th, the Elector took several Posts, and the Citizens prepared against a general Assault, by casting up Intrenchments within, having received a new Charter from the King of *Sweden*, enlarging their Privileges, and exempting them from Taxes for many Years to come. They made several furious Sallies, retook part of the Bastion, and ruin'd some of the Works; but were repuls'd by the *Danes* with great Loss. The 16th, the Elector attacked a Post near that called the *Holy Ghost* Gate, which the Garison defended with great Bravery, and charged their Cannon with small Shot, which did great Execution; but the Elector took the Post at last, after several Repulses, and rais'd a Battery upon it; but very much admir'd the Constancy and Bravery of the Inhabitants. On the 18th, he sprung two Mines, which made a Breach in both their Walls; yet they repulsed his Men who attacked the Breaches, and fill'd them up by Night. Next Day the Elector made a new Attack, summon'd them again to surrender, and offer'd to confirm all the Terms granted them by the King of *Sweden*, and to add more, which they rejected. Next Day the Garison took two Galliots with Guns and Powder, of which they were in want. They continued obstinate, thô the Garison was reduced to 400 serviceable Men, and distrusted by the Citizens, because they had frequently declared for a Surrender. But on the 20th, finding there was no Hopes of Relief, they proposed a Capitulation upon honourable Terms, and said, That if they could not obtain them, they would die with their Swords in their Hands, and be buried in the Ruins of the City. The Elector return'd an Answer, That tho' their Obstinacy had been enough to harden him, yet his Willingness to spare their Lives, and those of his own Men, which must be lost in a general Assault, he would capitulate with them, if they intreated for it, and sent out Hostages quickly; otherwise they must expect nothing but Fire and Sword.

Upon the Receipt of this Letter, they sent out Hostages, and the Elector, out of Generosity and Pity, granted them an honourable Capitulation, tho' he had lost about 8000 Men, and that it had cost him 6000 Crowns every Day and Night in Powder and Shot. He not only ratified all the

King

King of *Sweden* had promis'd, but granted them more Privileges, and ſent the Articles that Night to the Governor; who inſiſting that the Gariſon ſhould be conducted to *Stralſund*, and that Major-General *Ludeque* ſhould continue Priſoner till Colonel *Wangelin* was ſet at Liberty, the Elector refus'd it, which broke off the Treaty, and the Hoſtilities were renewed on both Sides with great Vigour till the 26th of *December*, when they ſent out again to renew the Treaty. The Capitulation, according to the former Articles, was ratified, and one of the Gates deliver'd to the Elector. All the Churches, and vaſt Numbers of Houſes, were laid in Ruins; their Gariſon of 3000 Men reduced to 700, and not 400 of them ſerviceable. They had a fine Train of Artillery in the Place; but they wanted Powder, Salt and Wood. They were allow'd the uſual Terms of Honour; but the *German* Officers and Soldiers were to quit the *Swediſh* Service. Deſerters were pardon'd on both Sides, and the Gariſon had their Choice of two Pieces of Cannon. The *Swediſh* Officers were pardon'd, and receiv'd into the Elector's Protection, on taking an Oath of Fidelity. There was no Change to be made in their Religion, Univerſity, or Schools. The Magiſtrates, and Privileges of the City, were confirm'd, and they were freed from Plunder, Contributions, or ranſoming their Bells. He exempted their Fiſhery for 10 Years from all Taxes of his own Accord, on Condition they would rebuild their Churches; and he promis'd to rebuild their great Church at his own Charge. On the 6th of *January*, he made a ſolemn Entrance, when he was received with loud Acclamations. When he enter'd the New Gate, two Boys in Mourning preſented him, the one with a Silver Key, with theſe Words engraven on it in Golden Letters, *Accipe, ſerva, & conſerva*; *i. e.* Receive, keep, and preſerve: The other with a Ducal Hat, with theſe Words, *Quod Deus dat*, Which God gives. Then 6 Virgins met him in Mourning, who, after Homage, the firſt preſented him with a Cypreſs Wreath, and this Motto wrought in Threads of Gold, *Victori Cruentatam Virginitatem*; *i. e.* A Bloody Virginity to the Conqueror. The 2d preſented 3 Garlands in a gilt Scale, with this Motto, *Preces pro Benevolentia*, Prayers for your good Will. The 3d preſented a Hat of Orange-Leaves, with this Motto, *Paterna Virtute auctam augendam*; *i. e.* Your Valour, increas'd by that of your Father, ſhall ſtill increaſe more. The 4th preſented his Son Prince *Lodowick* with an Apple, in which was writ with gilded Cloves, *Natura Ætatem*; *i. e.* Nature brings Age. The 5th preſented his other Son Prince *Philip* with a Griphin's Claw, and this Motto, *Perge ſine mora, & habes*; *i. e.* Purſue without Delay, and you have it. The 6th preſented the Duke of *Lunenburg* with a Noſegay, and this Motto, *Deo Gratiæ*, Thanks to God. Then all of them repeated theſe Words, *Happineſs and long Life to the Elector, and to all the Princes and Princeſſes of* Stettin. After this, he was conducted by the Magiſtrates and Chief Burgers in Mourning to the ancient Palace of their Dukes, where, wiſhing him Happineſs and long Life, they deliver'd him up the *Regalia*, and ſwore Fealty. Then he was conducted to the great Church. He was attended by the Judges and Miniſters, who ſwore Fealty to him; and as he went back to the Court, 12 of the chief young Women of the Town ſtrew'd green Herbs before him, till he came to the Banqueting-Houſe, where he had a ſplendid Entertainment at the Charge of the City. Then the Elector having ſettled all Things, and given Orders to repair the Fortifications, he return'd to *Berlin* the 10th of *January*. Doctor *Nicholſon* ſays, he ſpent in this Siege 30000 Granado's, 24000 Hand-Granado's, 150000 Cannon-ſhot, and 98000 Pound of Powder. By the Treaty of *Nimeguen*, the Town was reſtor'd to the *Swedes*.

The other Towns in *Swediſh Pomerania* are, 1. *Stralſund*, the largeſt and wealthieſt in the Country. Its Origine is uncertain; but Hiſtorians ſay 'twas founded about 145, by *Sunno* II. King of the *Franks*; but it derives its Name more probably from the narrow Sea on which it ſtands, betwixt it and the Iſle of *Rugen*. It lies about 75 Miles N. W. of *Stettin*, and 35 N. W. of *Roſtock*, in Long. 32. 30. Lat. 54 31. 'Tis an Imperial City, and enjoys great Privileges, which they have maintain'd againſt ſeveral Princes that deſign'd to ſubdue them, and at once are ſaid to have oppoſed the united Force of *Denmark* and *Sweden*, and 10 other

Digitized by Google

Princes, when they took *Erick* D. of *Saxony* Priſoner. After which it became terrible, as it had formerly been accounted impregnable. The firſt certain Account we have of it, is, That after it had been ſpoil'd or utterly deſtroy'd, it was magnificently rebuilt, enlarged, and re-peopled with *Germans*, by *Jaromar* Prince of *Rugen*, about 1209. His Son alter'd the Situation a little, and fortified it about 1230, becauſe the *Danes* and *Pomeranians* had burnt moſt of that which his Father built; ſo that the Citizens reckon the Age of the Town from that Time, as appears by a Latin Diſtich in barbarous Rhyming Verſe, engraven in ſeveral Places of the Town in Golden Letters. The chief of their Privileges are, 1. That they have a Power to determine all Cauſes among themſelves, without an Appeal. 2. To coin Money, and raiſe Troops for Sea and Land Service. 3. In caſe of a Naval War by the Empire, they are not obliged to venture further abroad than is convenient for the Defence of their City. 4. They have a Power to make Leagues and Confederacies for advancing their Trade, and to chuſe their Protectors among all the Princes of the Empire. In the Civil Wars of *Germany*, Count *Wallenſtein*, the Imperial General, beſieg'd it in vain, and was forc'd to a ſhameful Retreat. A little after, they put themſelves under the Protection of *Guſtavus Adolphus*. In 1678, the late Elector of *Brandenburg* took it, after having deſtroy'd above 1500 Houſes with his Bombs, and was the only Prince that could juſtly boaſt of ever having taken it by Force; but he was obliged to reſtore it to the *Swedes* by the Treaty of St. *Germains en Laye* in 1679. 'Tis now a flouriſhing City, but ſuffer'd much by Fire in 1680. The Sea betwixt it and *Rugen* is about a Mile broad, and there are 6 Gates, with as many Bridges, leading to it from the City, to which the Merchant-Ships that ride in the Harbour are faſten'd. Towards the Land, 'tis fortified with regular Bulwarks, and Fiſh-Ponds, two Muſket-ſhots in Breadth, over which there are 4 Dams and Bridges, leading from 4 Gates; which Dams and Bridges are fortified, and make the Approaches very difficult. Their chief Trade is in Corn, which they tranſport in great Quantities to other Countries.

2. *Bardt*, formerly reckon'd the Metropolis of *Upper Pomerania*, and gave Name to the adjacent Country. It lies about 15 M. W. from *Stralſund*, upon a Bay of the Sea, but ſo ſhallow, that 'tis not capable of being made a good Harbour. Some derive its Name from the *Longobardi*; but it has it more probably from the Mouth of the River *Bardt*, on which it ſtands; tho' the Arms of the Town be a Man's Head with a long Beard. The Fields about it are exceeding Fruitful in all Sorts of Corn, and the Town is well Peopled, and defended by a good Caſtle. The late Elector of *Brandenburg* took it in 1677; but reſtor'd it to the *Swedes* by the afore-mentioned Treaty in 1679.

3. *Gripſwald*, about 30 *Engliſh* Miles S. E. of *Stralſund*. 'Tis a Hans-Town, within half a League of the *Baltick*, on a ſmall Gulph, with a good Harbour. It was Walled in 1233, and is well fortified. *Wartiſlaus* IX. Duke of *Pomerania*, founded an Univerſity here about 1456, which has bred many Learned Men. It was taken by the *Swedes* in 1631, and left to them by the Treaty of *Weſtphalia*. The late Elector of *Brandenburg* took it in 1678, but reſtor'd it by Treaty in 1679. It had a great Trade by the excellent Salt which they formerly made; but for want of Wood to ſupply their Furnaces, 'tis decay'd. The adjacent Fields and Meadows abound ſo much with wild Garlick, which the Natives call *Rammes*, that when it flowers about *Whitſuntide*, Strangers are hardly able to bear the Smell of it, and all their Butter and Fleſh taſte of it.

4. *Treplow*, a pretty Town on the *Telkin* Sea, defended by a ſtrong Caſtle.

5. *Anclam*, on the *Pene*, well fortified. It was taken by the late Elector of *Brandenburg* in 1676, together with *Demmin*, on the ſame River; but both reſtored by the Treaty of St. *Germains*.

6. *Damgarten*, and *Tribſees*, two Towns on the Frontiers of *Mecklenburg*, where the *Swediſh* Officers exact Toll from Travellers. The Dukes of *Mecklenburg* claim'd thoſe Towns at the Treaty of *Nimeguen*, but did not obtain them. The firſt is very ſtrong, and ſituated on a Gulph.

7. *Wolgaſt*, on that Branch of the *Oder* called the *Fin*, about 15 Miles S. E. of *Gripſwald*,

Digitized by Google

wald, formerly Capital of a Dutchy, and gave Title of Duke to a Branch of the Houſe of *Pomerania*. It has the beſt Harbour in the Country, except *Stralſund*; and the Caſtle, built here by Duke *Barnimus* IV. in 1352, makes it one of the ſtrongeſt Towns of the Province. *Guſtavus Adolphus* took it in 1630, and the late Elector of *Brandenburg* took it in 1679; but reſtor'd it that ſame Year to the *Swedes* by Treaty.

Brandenburg Pomerania,

IS about 132 Miles long, and 50 where broadeſt.

The chief Towns are, 1. *Camin*, formerly a Biſhop's See, whoſe Prelates were inveſted and confirmed by the Pope himſelf; but by the Treaty of *Munſter*, it was, after the Death of the then Canons, decreed to be converted into a ſmall Principality, to deſcend on the Family of *Brandenburg*. It lies on the E. Side of the Mouth of the *Oder*, called *Divenow*, about 28 Miles N. of *Stettin*, and about 8 from the Coaſt of the *Baltick*. *La Foreſt* ſays, it was built from the Ruins of a Town called *Julin*, within two Miles of it, and was made a Biſhoprick by *Bogiſlaus* II. of *Pomerania* in 1178. Their Biſhop embrac'd *Lutheraniſm* in 1534. The Biſhoprick was given to the Elector of *Brandenburg* by the Treaty of *Munſter* in 1648.

2. *Griffemberg*, a pretty Town on the River *Rege*.

3. *Polberg*, a ſtrong Town on the Mouth of the River *Perſant*, about 18 Miles E. from *Camin*. 'Tis the Capital of a little Country called *Caſſubia*, has a good Harbour, defended by a ſtrong Citadel, and has a great Trade in good Salt, made here, and tranſported to other Countries, which has made the Town rich. The *Swedes* took it in 1631, after 5 Months Siege. It was given to the Elector of *Brandenburg* by the Treaty of *Munſter*, and he has a great Revenue from its Salt-Pits.

4. *Coſlin*, about 10 Miles S. E. from *Colberg*, a City where the Biſhop of *Camin* uſually reſides, becauſe of its good Air.

5. *Coſlin*, about 12 Miles N. E. from *Coſlin*, on the *Perſant*, a very pleaſant City.

6. *Belgarden*, a little Town of good Trade on the ſame River.

7. *Rugen*, a Wall'd Town, on the Mouth of the *Wiper*, the Capital of the Country called *Vandalia*, about 18 Miles N. E. from *Caſlin*. 'Tis ſuppoſed to take its Name from the *Rugii*, who founded it.

8. *Stolpe*, a Town fortified with an ancient Caſtle, about 22 Miles N. E. from *Rugenwald*.

The Towns of *Slage* and *Polnow* lie alſo in this Country.

La Foreſt does likewiſe mention a Diviſion of this Country, which he names *Pomerania*, properly ſo called; and in this he reckons, 1. *Stargard*, the Capital, about 22 Miles S. E. from *Stettin*. 'Tis but ſmall, and ill Peopled; yet the Courts of Juſtice for the Country are held here, and 'tis one of the Hans-Towns. 2. *Dam*, a ſmall Town on the *Oder*, oppoſite to *Stettin*, and was formerly Part of that Dutchy, but mortgaged to the Elector of *Brandenburg*, together with *Golnow*, about 12 Miles N. of it, for 50000 Crowns, in 1679; but redeemable. That ſame Author calls the moſt Eaſterly Part of *Brandenburg Pomerania*, by the Name of *Pomerellia*, in which are the Towns of *Lawenburg*, on the River *Lobo*, 50 Miles N. E. from *Rugenwald*, the Chief of the Country, and *Butow*, 27 Miles S. E. from *Stolpe*, which gives Name to the Lordſhip of *Butow*.

We come now to the Iſlands of *Pomerania* on the Coaſt of the *Baltick*: The Firſt of which is

RUGEN.

THis is one of the chief Iſlands in the *Baltick*, and famous for the Courage of its ancient Inhabitants the *Rugii*, to whom all Hiſtorians give the Character of a Brave and Warlike People It was formerly much larger than at preſent, and reach'd as far E. as *Ruden*, 3 Leagues from it; but formerly a Part of it. The Separation was occaſion'd by a great Tempeſt in the beginning of the 14th Century, when the Sea drown'd a great Part of the Iſland, and form'd this Channel, which is now paſſable by the greateſt Ships. The Iſland is about 30 *Engliſh*

Digitized by Google

lish Miles in Breadth, and as much in Length; but full of Creeks and Peninſula's. Their chief Forts were *Arcona* and *Camerentz*, both reckon'd impregnable, till *Waldemar* of *Denmark* took them, with the whole Iſland, in 1368. The former was on a high Rock by the Shore, and not to be taken in thoſe Days but by being ſtarv'd. The Iſland has ſo many Inlets, that there is ſcarce any Part of it above 3 *Engliſh* Miles from the Shore; but all the Peninſula's are ſo well guarded by Rocks, that they fear no Inundation. 'Tis ſo rich in Corn, that 'tis called the Granary of *Stralſund*, and is well ſtock'd with Horſes, Black Cattle, Sheep, and the largeſt Geeſe in *Europe*. They ſay, That formerly they had no Wolves or Rats, but are now as much peſter'd with them as their Neighbours. The Forreſt of *Jaſmunt* furniſhes them with Fuel and Timber, and the Sea and Lakes with Plenty of Fiſh for Conſumption and Export. Among other Lakes here, there is one near *Burchwall*, upon which the Inhabitants ſuperſtitiouſly believe no Boat will ſail, nor any Net be ſuffer'd to catch Fiſh, as we mention'd before in the Account of Ancient *Germany*, under the Head of the *Deuringii*, &c. Near this Lake, there's an exceeding high Promontory, which hangs over the Sea, and was formerly a Shelter for the Pirates who haunted thoſe Coaſts. The chief Trade of the Inhabitants is with *Stralſund*, from which 'tis only ſeparated by a narrow Sea, as formerly mention'd; and this City has a ſort of Juriſdiction over the Iſland, for their High Court of Admiralty determines all ſorts of Controverſies that happen in the Port-Towns of *Rugen*, from whence the People in thoſe Caſes come to *Stralſund* for Juſtice. They can erect no Court, nor give any definitive Sentence, nor export any Commodities, without Leave of that City, which is the Key and Fortreſs of the Iſland.

The ancient Language here was the *Sclavonick*, which was aboliſh'd, and the *Saxon* introduc'd, when the Dukes of *Pomerania* made themſelves Maſters of the Iſland. The Inhabitants were the laſt of all the Northern People who embrac'd Chriſtianity, which was about 813, by the Preaching of ſome Monks; but they quickly apoſtatiz'd; and after having idoliz'd St. *Vite*, a poor Monk, their Apoſtle, by the Name of *Swant*, they transferred the Worſhip they paid to him to a monſtrous Idol with 4 Heads, to which they repaired, as to an Oracle; and Merchants who had made a good Voyage, were obliged to pay him a Tribute. They conſtantly kept 300 Horſes for this Idol's Service, one of them white, and never rid but by the Chief Prieſt, who would now and then ſhew him in a Morning beſmear'd all over with Sweat and Dirt, and told the fooliſh People, That *Swant* had brought him into that Condition, by purſuing their Enemies in the Night. This Idol was kept at *Arcona*, then their chief City. He had a Horn in his Hand, which had been filled the Year before with precious Liquor; and the Prieſt looking into it, according to the remaining Quantity of the Liquor, he prognoſticated Dearth or Plenty for the ſucceeding Year; which being done, keeping his Lips ſhut, leſt his Breath ſhould hurt the Idol, he took the Horn, pour'd out the remaining Liquor at the Idol's Foot, fill'd it anew, and put it again with great Reverence into his Right Hand. They continued thus, till by Converſation with the *Pomeranians* they threw off that Heatheniſh Idolatry, above 500 Years ago, and are now zealous *Lutherans*.

They had formerly Princes of their own, who likewiſe rul'd Part of *Pomerania* about *Stralſund*, *Gripſwald*, &c. 11 of them are mention'd in Hiſtory: The firſt is *Wiſtaw*, who liv'd about 938. The 4th is *Raza*, a great Warrior, who took *Lubeck*, and died about 1141. The 5th is *Teſtaw*, who had great Wars with the *Danes*, with various Succeſs; but at laſt was conquer'd by *Waldemar* of *Denmark*. The 6th was *Jarimar*, their firſt Prince who embrac'd Chriſtianity. Their 9th was *Jarimar* II. who, after many Battles, ſhook off the *Daniſh* Yoke in 1259. The 10th was *Witzlaw* III. a great Promoter of Chriſtianity in *Lifland*, where he frequently preach'd in Perſon to the poor Infidels. The 11th was *Witzlaw* IV. from whom thoſe of *Stralſund* revolted: Upon which, with the Aſſiſtance of neighbouring Princes, he beſieg'd them; but being kill'd in a Sally, an End was put to the Controverſy and his Lineage in 1325.

After this, *Rugen* came to the Dukes of *Pomerania*, and by Contract ſhould have been

Digitized by Google

been annexed to the Family of *Brandenburg*, on the Failure of that Line; but by the Treaty of *Weſtphalia*, it was given, with *Lower Pomerania*, to the Crown of *Sweden*. *Frederick* III. of *Denmark* pretended to it; but reſign'd his Title to the *Swedes* by the Treaty of *Roſchild* in 1658. During the War betwixt the late Elector of *Brandenburg* and the *Swedes*, *Chriſtian*, the late King of *Denmark*, with 6000 Men, attempted to reduce it; but was defeated by Count *Konigſmark*, the *Swediſh* General, 600 of his Men killed on the Spot, 2500 taken, with 26 Standards, 16 Cannon, 5 Mortars, and 30000 Rix-Dollars. He attempted it the ſecond time in 1658, and conquer'd the Iſland; but by the Interpoſition of the preſent *French* King, he was obliged to reſign it again to the *Swedes* in 1679, who have ſince put ſtrong Gariſons into it. This Iſland ſuffer'd much during the Civil Wars of *Germany*. They have many Noble Families, who pretend to derive their Pedigree from the ancient *Rugii* or *Runi*, and fancy this to be what was called the *Inſula Runorum*; but *Wormius* thinks, the *Runi* liv'd further E. near the Coaſt of *Lifland*. Doctor *Nicholſon* obſerves, That by little Expence in building Forts and Harbours, it might be made independent of *Stralſund*; but their Intereſt in Commerce keeps them together. The Iſland, he ſays, is capable to raiſe 7000 ſtout Fighting Men.

The only Town of Note is *Bergen*, about the middle of the Iſland: It had formerly the Name of a City; but is now only an open Village of about 400 Houſes. The Ruins of *Arcona*, formerly their Capital, but deſtroy'd by *Waldemar* I. of *Denmark* in 1168, are ſtill to be ſeen in the N. Part of the Iſland. The Ruſticks pay eaſier Rents here than in moſt other Places, which makes them pay all the Reſpect to their Landlords, which they claim as due to their Antiquity. The Iſland is honour'd with the Title of a Dutchy. They have another Village or Town of good Trade, called *Putbus*, which lies S. from *Bergen*.

The 2d Iſland on this Coaſt is *WOLLIN*, in the Mouth of the *Oder*, and has a Town of the ſame Name on that Branch of the *Oder* called *Divenow*. *Adam Bremenſis* ſays, That it was formerly the largeſt City in *Europe*, and anciently called *Julinum*; that it maintain'd War againſt the Kingdom of *Denmark*, and took their King *Suinone* three times Priſoner. It was extraordinary ſtrong and populous, and the greateſt Mart in *Europe* next unto *Conſtantinople*. The *Danes*, *Swedes*, *Ruſſians*, *Jews*, and ſeveral other People, had their ſeparate Streets and Houſes of Exchange here; but by the juſt Judgment of God for their Apoſtacy from Chriſtianity, moſt of it was deſtroy'd by Lightning, and the reſt by *Waldemar* of *Denmark*, who ſurpris'd it in 1170; ſince which it has never been remarkable; for *Lubeck* and *Dantzick* have got all its ancient Trade. The Iſland is about 14 Miles long, and 10 broad.

The 3d Iſland is *USEDOM*, in the Mouth of the ſame River, W. from *Wollin*, and ſeparated from it by that Branch of the *Oder* called the *Swine*. After the Deſtruction of *Wollin*, it had a great Trade; but moſt of it being burnt down in 1473, it never recover'd its ancient Luſtre. It has a good Caſtle, which the Elector of *Brandenburg* took in 1676; but reſtor'd it to the *Swedes* by a ſucceeding Treaty. The Iſland is about 20 Miles long, and 12 broad.

Having finiſhed the Circles of *Upper* and *Lower Saxony*, we ſhall, according to Promiſe, in our Account of the Religion of the *Lutherans*, take Notice of that called the *Saxon* Confeſſion, which was one of thoſe added for explaining that of *Augſburg*.

The Saxon *Confeſſion.*

IT was offer'd to the Council of *Trent* in 1551, and ſign'd by the Superintendants, Doctors of Divinity, and Paſtors of *Saxony*; among whom, thoſe of moſt Note were, *Alexander Aleſius*, a *Scots-man*, Doctor of Divinity, and Deacon of the College of Divines in the Univerſity of *Leipſick*; *Joachimus Camerarius*, Profeſſor of the Liberal Arts at *Leipſick*; *George Major*, Doctor of Divinity, and Profeſſor in the Univerſity of *Wittemberg*; and *Philip Melanction*, Profeſſor in the ſame Univerſity.

It was alſo approved by the Ambaſſadors of *John* and *George Frederick*, Marquiſſes of *Brandenburg*; and of *Gebhard* Count of *Manſfeld*, and the other Counts of that Family, with

Digitized by Google

with the Superintendants and Paſtors of their Countries; by the Miniſters of *Straſburg*, and thoſe of *Lower Pomerania*, by Order of their Duke, in their Provincial Synod at *Gripſwald*.

In Point of Doctrine, they agree with that of *Augsburg*, which in ſome Places they explain more at large.

We ſhall only take Notice, 1. That in the Article of the Church, they deſcribe the viſible Church to be a Society of thoſe who in this Life embrace the Goſpel of Chriſt, and uſe the Sacraments right; in which however there are many who are not Saints, thô they agree to the true Doctrine. Therefore who, what, and where the true Church is, muſt be known from the Scripture, ſince the Church is join'd to the Goſpel, as *Paul* ſays, *If any Man teach another Goſpel, let him be accurſed*, &c. So that thô Sadducees, Phariſees, Popes, and others, who teach another Doctrine different from the Goſpel, and obſtinately eſtabliſh Idolatry, claim the Title and Government of the Church, they are not Members of it.

They add, That thô the Church be a Society which may be ſeen and heard, yet 'tis to be diſtinguiſhed from Political Governments, or ſuch as carry the Sword; for Biſhops have not by Divine Right a Power to puniſh the Diſobedient, or to ſeize Worldly Governments: Yet there is an Order in the Church, according to that Saying, *Eph.* 4. 8. &c. *He hath aſcended up on high, and gave Gifts unto Men.* Verſe 11. *Some Apoſtles, ſome Prophets, ſome Evangeliſts, and ſome Paſtors and Teachers.* Verſe 12. *For the Perfecting of the Saints, for the Work of the Miniſtry, for the Edifying the Body of Chriſt.* The Son of God is the High Prieſt, anointed by his Eternal Father, who, that the Church ſhould not periſh, gave Miniſters of the Goſpel to her; ſome of them call'd immediately by himſelf, as the Prophets and Apoſtles, and ſome of 'em call'd by Humane Election; for he approves her Election. Therefore we retain in our Churches the publick Rite of Ordination, by which the Miniſtry of the Goſpel is recommended to thoſe who are duly choſen, after Trial of their Learning and Manners. Unto this Miniſtry belongs the Preaching of the Goſpel, the Adminiſtration of the Sacraments, the Abſolution of Penitents, the Ordination of Miniſters lawfully call'd, the putting in Execution the Cenſures of the Church in a lawful Manner againſt thoſe who are found guilty in Manners or Doctrine, the Excommunication of the Obſtinate, and the abſolving and receiving again thoſe who repent. And that theſe Things may be done in an orderly Manner, Conſiſtories are ſettled in our Churches.

2. As to the Lord's Supper, they declare againſt External Sacrifices, Chriſt having put an End to them once for all; and ſay, That the ancient Church, by the Words *Sacrifice* and *Oblation*, underſtood the whole Action, *viz.* Prayer, the Receiving of the Sacrament, the Remembrance of our Saviour, Faith, Hope, Confeſſion, and Thankſgiving. This whole Action, as 'tis External and Internal, is in every Convert, and in the whole Church, a true Sacrifice of Praiſe, or εὐχαριστικὸν, and λογικὴ λατρεία, *Rom.* 12. 1.

3. As to Confirmation, they ſay, The ancient Church underſtood nothing by it, but a Trial whether their young Members underſtood their Doctrine, and obliged every one of 'em τῶ repeat a Summary of it, and to profeſs their Diſlike of Paganiſm and Hereſie; that they would continue Members of the true Church, and not depart from the true Doctrine which they themſelves profeſs'd: This they approve as uſeful for inſtructing Men, and retaining them in the true Knowledge of God: And this, they ſay, they did in the Catechiſing of their Youth, and in private Confeſſion, when the Paſtors try'd the Knowledge of their People. But by private Confeſſion, they meant only a private Conference, without requiring a particular Enumeration of the Penitents Faults, which they ſay is neither commanded by God, nor poſſible, as they expreſs themſelves under the Article *de Pœnitentia*. And as to the Method of Confirmation then us'd by the Biſhops, they reject it as a vain Shadow.

4. As to Rites appointed by Humane Authority in the Church, they lay down ſeveral Rules to be obſerved for the Sake of Decency and Order; but take Notice how readily Humane Rites degenerate into Superſtition, and therefore confine all to the general Rules of the Scripture; and confute thoſe who alledge, That Princes, Biſhops,

Digitized by Google

ſhops, Angels, or any Creature, have Power to appoint Rites contrary to the Scripture; and lay down this Concluſion, That ἐθελοθρησκείαι, or Will-Worſhips, invented by Men without God's Command, neither are, nor were, the Worſhip of God; and take Notice, That the Opinion of the Neceſſity of ſuch Rites, had always occaſioned great Diſcords in the Church, as of old; the Controverſy about *Eaſter*, Leaven'd Bread, and many ſuch Things, have done of late, which increaſe Ceremonies, and were Burdens to the Church, and Men's Conſciences; for which they quote *Col.* 2. 16. *Let no Man judge you in Meat or Drink, or in reſpect of an Holy Day, or of the New Moon, or of the Sabbath-Day*, &c. And *Gal* 5. 1. *Stand faſt therefore in the Liberty wherewith Chriſt hath made us free, and be not entangled again with the Yoke of Bondage.*

As to the Power and Office of Superintendants, and their Method of Government and Diſcipline, we ſhall have Occaſion to mention it when we come to the *Bohemian* and *Wirtemberg* Confeſſions, *&c.*

Brandenburg Pruſſia.

WE formerly gave the Deſcription and Hiſtory of *Pruſſia* in General, and of that called *Poliſh Pruſſia* in Particular. We come now to this Country, which was formerly called *Ducal*, to diſtinguiſh it from the other *Pruſſia*.

This Country has *Poliſh Pruſſia* on the W. *Lithuania* on the E. the Dutchy of *Warſaw* on the S. and the Bay of *Courland* and *Samogitia* on the N. 'Tis the larger Part of *Pruſſia*, and is now, as formerly mention'd, call'd the Kingdom of *Pruſſia*, and gives the Title of King to the Elector of *Brandenburg*. According to *Moll's* Map, from *Memel* on the *Baltick*, to the Frontiers of *Poland*, 'tis about 150 Miles from N. to S. and above 120 where broadeſt from E. to W.

The chief Towns are, 1. *Coningsberg*, the Capital, on the Mouth of the *Pregel*, in Long. 39. 38. Lat. 54. 44. about 80 Miles N. E. from *Dantzick*. 'Tis a Hans-Town, and a Place of great Trade, large, well built, and divided into 3 Towns. That properly called the *Old Town* was built about 1260, by the *Teutonick* Knights, and has the Ducal Palace in it, a large and ſplendid Structure, with a famous Library, from whence *Chemnitius* compos'd his Examination of the Council of *Trent*. This Palace was built by *George Frederick* Marquis of *Brandenburg*. The 2d Town ſtands in an Iſland, and is called *Kniphoff*, from an Officer who join'd it to *Coningsberg* in 1380, where ſtands the Cathedral of the Biſhoprick of *Samland*, and an Univerſity, founded by Duke *Albert* of *Brandenburg* in 1544, which has bred many Learned Men. The 3d Town is called *Lobenicht*, and was added to the other by *Berthold* of *Auſtria*. 'Tis fortified by a ſtrong Caſtle, that commands the Harbour, which is convenient, and makes it a Place of good Trade. Their principal Commerce is in yellow Amber, which grows on that Coaſt, Oak, Fir, Honey, and Wax. It has been ſubject to the Elector of *Brandenburg* ſince 1525.

2. *Memel*, 70 Miles N. E. from *Coningsberg*. It lies upon the Bay of *Courland*, and has a good Harbour, defended with a ſtrong Citadel. 'Twas built by the *Teutonick* Knights about 1328. 'Twas afterwards ſubject to the Knights call'd the *Croſs-Bearers*; then to the *Poles*, but now to the *Brandenburgers*. It ſuffered much by War, but more by Fire, being almoſt quite burnt down in 1545, and 1648. 'Tis ſeated among Lakes, which makes it naturally ſtrong, and the Key of this Part of the Country.

3. *Pilaw*, on the ſame Bay, about 20 Miles W. from *Coningsberg*, noted for Sturgeon-Fiſhing, and defended by two Fortreſſes on the Mouth of the *Pregel*, where Criminals of State are impriſon'd. The *Swedes* took them in 1625; but reſtor'd them to the Elector of *Brandenburg* by the Treaty of *Oliva* in 1660.

4. *Brandenburg*, a ſmall Town betwixt *Elbing* and *Coningsberg*, on the Mouth of the *Pregel*, the Capital of the Country of *Natangia*.

5. *Holland*, on the River of *Elbing*, the Capital of *Heckerland*, a barren Country, betwixt *Poliſh Pruſſia* and *Maſſovia*.

Labiau and *Heiligpeil* are alſo in this Country, but of no great Note.

Calviniſm is now the prevailing Religion in *Pruſſia*, by means of the Univerſity of *Coningsberg*. Some Places of this Country

Digitized by Google

try are barren; but others fruitful and well inhabited.

SILESIA.

AUthors differ about the Name. Some derive it from the *Elisii*, part of its ancient Inhabitants: Others from the River *Schlesi*, which falls into the *Oder*, and seems to be supported by the *German* Name *Schlesien*. *Cluverius* mentions the *Semnones*, *Osi*, and *Burii*, to have been part of its ancient Inhabitants. *Adam Bremensis* and *Helmoldus* say, most of this Country was subject to the *Poles* in the Days of their first Prince *Lechus*; but frequently invaded by the ancient *Germans*. *Curcus* proves, that it was subdued by *Charles the Great*; that some Time after they revolted from him and his Sons, but was reduc'd again by *Lewis the Pious*. In 1042, the Emperor *Henry* III. gave *Silesia* to *Bretislaus* Duke of *Bohemia*, who resign'd it to the *Poles*, on their paying a Yearly Tribute to him and his Successors. *Henry* IV. in 1086, by Consent of the Diet, as *Cosmas Pragensis*, who was present at it, informs us, empower'd *Wratislaus* King of *Bohemia* to invade and reduce this Country, *Lusatia*, and *Poland*, which occasion'd Wars betwixt the *Bohemians* and the *Poles*, wherein 'tis probable, says Dr. *Nicholson*, the latter had the Advantage, since *Silesia* continued subject to them. But *Uladislaus* II. Son to *Bolislaus* III. of *Poland*, being banish'd by his Brothers, who were left Coheirs with him by his Father, the Emperor *Frederick* I. forc'd the *Poles* to resign *Silesia* to *Uladislaus* and his Heirs for ever. *Uladislaus* left 3 Sons, who were joint Dukes of *Silesia*; but paid some Homage to the Crown of *Poland*. But the *Poles* were so angry at the coming in of the *Germans* to that Country, that they seldom call'd those Dukes to the Diet, and never admitted them to their Crown; tho before it became Elective, they had frequently the greatest Right to it. *John* King of *Bohemia*, Son to the Emperor *Henry* VII. managed those Differences so well, that he obtained most of *Silesia*, by Agreement from *Casimir the Great* of *Poland*; but Part of it still paid Homage to the *Polish* Crown. Yet *Casimir*, contrary to this Agreement, subdued it again in 1343; and afterwards the *Poles* invaded other Parts of the Country, where they still retain some Tracts of Land, which belong to Abbies, *&c.* in *Poland*; but now most of the Provinces, except the Dutchy of *Crossen*, belong to the Crown of *Bohemia*. Upon which, the Emperor has the Title of Duke of *Silesia*,

Cluverius divides this Dutchy, which *La Foreſt* says is one of the largest in *Europe*, and one of the best Countries in *Germany*, into 16 Principalities, *viz.* *Breslaw*, *Glogaw*, *Sagan*, *Schweinitz*, *Lignitz*, *Briege*, *Neisse*, *Crossen*, *Teschen*, *Oppelen*, *Ratibor*, *Munsterberg*, *Troppe*, *Jaur*, *Olsse*, and *Jagerendorff*. The Length from N. W. to S. E. according to *Moll's* Map, is 235 Miles; and where broadest, 'tis about 76. 'Tis separated from *Bohemia* and *Moravia* on the S. W. and S. by the Mountains called *Riesenbergen*; of which in their Place: From *Poland* on the E. *Lusatia* and Part of *Bohemia* on the W. *Brandenburg* on the N. and *Hungary* on the S. The 4 chief Mountains in this Country are, 1. *Zottenberg*, called by Latin Authors *Mons Zotenſis*, *Zabothus*, and sometimes *Silensis*, or *Silentius*, called the *Silesian* Weather-cock, because, by the Top of it, those of the Neighbourhood pretend to guess what Weather they shall have next Day. On the Summet, there's the Ruins of an old Castle, demolish'd by the Citizens of *Breslaw*, because it was a Shelter for Robbers. From this Hill they dig a fine dark greenish Marble. 2. *Gratzberg*, or *Grodnberg*, on which Duke *Frederick* built a fair Castle, now a Watch Tower. 3 *Spitsberg*, with a Beacon, near the former. 4. *Georgenberg*, in the Dutchy of *Schweidnitz*, famous for the *Terra Sigillata*, first discover'd by *Montanus*, an eminent Chymist and Physician. 'Tis a sort of hard Earth, with white, yellow, and red Veins; was by him made use of as an Antidote against all sorts of Poisons, and a sovereign Remedy for many other Diseases. He kept this Secret for some Years; but at last, for the publick Benefit, wrote a Tract in Latin, with an Account of its Vertues.

The chief Rivers in this Country are, the *Oder*, so called from a Town near which it rises on the Borders of *Moravia*; the *Vistula* or *Weissel*, and the *Elb*, have likewise their Rise in this Country. Their other Rivers are,

Digitized by Google

are, the *Bobr*, *Neiſſe*, *Ohla*, and *Queiſs*. They abound alſo with Ponds and Lakes, that have Plenty of all Freſh-Water Fiſh, eſpecially Lampries, which are taken in vaſt Quantities in the *Neiſſiſh* Lake, *&c.*

The principal Commodities of the Country are, Madder, Flax, Sweet Cane or Galengal, Wine, (eſpecially in the Dutchy of *Sagan* and *Croſſen*) Silver, Copper, Lead, Iron, Chalk, Plenty of Salt-Petre, and ſome good Salt; but not enough for their own Uſe, which makes 'em import it from *Poland*, &c. They have all the Wild and Tame Beaſts found in the Empire, with Plenty of Butter and Cheeſe, ſome of it made of Ewe's Milk; but their chief Trading Commodities are Wool and Flax. They have abundance of Fowl, and Plenty of Game, in their Forreſts.

They have had ſeveral good Scholars, and brisk Wits; but the Boors are accounted dull and weak. Their Neighbours call 'em Aſs-eaters, becauſe they ſay a *Sileſian* Boor, who had never ſeen an Aſs before, ſhot one as travelling in the Country for an overgrown Hare, and he and his Neighbours eat it as ſuch: But to take off this, they frame another Story themſelves, That having diſcover'd a Gold Mine, which they deſign'd no body elſe ſhould ſhare with them; to conceal it while they work'd at it privately, they call'd it by the Name of the *Golden Aſs*. They reckon the Hours of the Day from the Setting of the Sun, as the *Bohemians*, and ſome of the *Italians*, do; but thoſe of Quality follow the uſual Method.

Matthew Corvinus, King of *Hungary*, was for ſome Time Lieutenant of *Sileſia*; but that Poſt was afterwards conferr'd on the Biſhops of *Breſlaw*, till the Emperor *Rodolph* II. order'd that ſome Temporal Prince of the Country, with the Officers under him for determining all Law-Suits, ſhould be appointed by the Council at *Prague*.

Chriſtianity was planted here, as in *Poland*, about the End of the 9th, or the Beginning of the 10th Century; but at firſt, the Chriſtians worſhip'd in private, for fear of their Magiſtrates, till the Court turn'd Chriſtian about 965, when 9 Biſhopricks were erected in the Country. Soon after *Luther*'s Appearance, they embrac'd the *Augsburg* Confeſſion, which was confirmed by the Emperor *Rodolph* II. in 1609. But *Ferdinand* II. repeal'd their Charter, and very much reſtrain'd the Exerciſe of their Religion, which was reſtor'd by the Treaty of *Weſtphalia*; but taken from them ſince, till the preſent King of *Sweden* obliged the Emperor to allow it them again. But the Controverſy, whether the *Calviniſts* there ſhall have the ſame Privilege, is not yet determin'd.

The Dutchy and City of Croſſen.

THE Name in *German* ſignifies a Border, becauſe it lies on the Frontiers of *Brandenburg*. It has had ſeveral Maſters, having been mortaged to the Archbiſhop of *Magdeburg* in 1272.; but redeemed within two Years by the Duke of *Breſlaw*. It was afterwards mortgaged to *John* Marquis of *Brandenburg* for 4000 Crowns towards their Duke's Ranſom, and again redeemed. *John* of *Brandenburg*, called the *German Cicero*, had it again for his Wife's Portion of 50000 Crowns; and it was afterwards deliver'd to *John* III. of *Brandenburg* in 1391, by *Uladiſlaus* King of *Hungary* and *Bohemia*; and the full Poſſeſſion of it was given to the Elector of *Brandenburg* by the Emperor *Frederick* I. King of *Bohemia*: Since which, the Electors have always call'd themſelves Dukes of *Croſſen*.

The City of that Name is ancient, ſtands in a pleaſant Plain, and good Air, upon the *Oder*. The Duke's Palace, the Town-Houſe, and ſome of the Citizens Houſes, are of neat poliſh'd Stone. The neighbouring Hills are cover'd with Fruit-Trees of ſeveral Sorts; and they have likewiſe ſome Wine, but not very good. The City, tho little, has a conſiderable Trade, by reaſon of its Situation on the Conflux of the *Oder* and *Bobr*. It lies about 25 Miles S. E. from *Francfort* on the *Oder*, and about 35 N. W. from *Glogaw*, about Long. 34. 37. Lat. 52. 3.

The City and Dutchy of Glogaw.

THE Name is derived from the *Wendiſh* Word, which ſignifies Copſes or Thickets, amongſt which 'tis ſituated. Duke *Conrad* Will'd it, and built the Cathedral,

Digitized by Google

the only Strength and Ornament of the Town, about 1260, and ſtock'd it with *Germans*, who brought in their own Laws. 'Tis called *Glogaw the Great*, becauſe there is a leſſer of the ſame Name in the Dutchy of *Oppelen*. 'Twas formerly ſubject to its own Princes, but now to the Emperor, as King of *Bohemia*. It lies in Long. 35. 12. Lat. 51. 45. on the *Oder*, 35 Miles S. E. from *Croſſen*, and about 45 N. W. from *Breſlaw*. It was taken by the *Swedes* in 1647, but reſtor'd to the Empire afterwards, is regularly fortified, and has a ſtrong Caſtle. The Paſſe, Gravel and Stone, are Epidemical Diſtempers here, aſcrib'd to their intemperate drinking of bitter, muddy, ſtrong Beer, and eating too much Pork and Cheeſe. There are ſeveral other petty Towns in this Dutchy, but not worth inſiſting on. The People of this Dutchy have a Law, by which a Daughter, upon Failure of Iſſue-Male, inherits her Father's Eſtate before any of his other Male Relations, which is contrary to the Cuſtom of moſt other Places in *Germany*.

The City and Dutchy of Sagan.

THis City is one of the largeſt and moſt populous in *Sileſia*. It was ſeveral times taken and retaken by the *Swedes* and Imperialiſts during the Civil Wars of *Germany*. The Caſtle, St. *Mary*'s Church, and two old Monaſteries, are the Things of moſt Note here. It lies about 20 Miles W. from *Glogaw*, on the River *Bober*. This Dutchy is but of ſmall Extent, was formerly Part of that of *Glogaw*, but afterwards had three or four Princes of its own at a time. There are ſeveral large Corn-Fields in this Province, which is well water'd by Rivers; and there are three other ſmall Cities, called *Prilus*, *Naumburg*, and *Friwald*, belonging to the Dutchy.

The Town and Dutchy of Wolaw.

THis Dutchy was formerly Part of that of *Lignitz*. 'Tis divided into 6 Circles or Hundreds, denominated from their chief Towns, *Wolaw*, *Hernſtat*, *Winzing*, *Ruſom*, *Raude*, and *Stelnaw*. *Wolaw* it ſelf is but a ſmall inconſiderable Town, of little Trade. They are furniſh'd with Fiſh from a neighbouring Lake, otherwiſe they could ſcarcely ſubſiſt. 'Twas however for ſome Time the Seat of War betwixt the *Swedes* and *Germans*, and a *Swediſh* Lieutenant-General kept it with a Gariſon. It lies about two Miles S. E. from *Glogaw*.

The Dukedom and City of Oelſe.

THis City is neat and regularly built, has a fair Church, College, and Town-Hall, and a handſome ſquare Market-place. The Gates, Walls, and Turrets, were handſome and noble before the late *Swediſh* War, when moſt of them were demoliſh'd by the *Swedes* about 1648. 'Tis ſeated in a pleaſant Country, and wholeſome Air, was firſt made a City by the Emperor *Henry* I. about 936, and afterwards had Dukes of their own; but ſince 1492, has been ſubject to the Dukes of *Munſterberg*. There are 7 other ſmall Cities in this Principality. The Town lies about 42 *Engliſh* Miles S. E. from *Glogaw*.

The City and Dutchy of Breſlaw.

THis City is called *Uratiſlavia*, and by ſome Latin Authors *Budorgis*, and *Butrigum*. It has the firſt Name from *Wratiſlaw*, a *Bohemian* Prince, who founded it, and on that Account the Citizens bear a W in their Coat of Arms. It ſtands on the Conflux of the *Oder* and *Ohla*, in a rich and pleaſant Country, in Long. 36. 7. Lat. 51. 7. about 43 Miles S. E. from *Glogaw*. 'Tis the Metropolis of *Sileſia*, very populous, and much reſorted to by *Hungarians*, *Bohemians*, *Poliſh*, and other Foreign Merchants. The Citizens are neat and genteel in their Clothes, and live as handſomely as any others in the Empire; upon which they affect to have been thought to have had an immediate Dependance, and do not love to be reckon'd any Part of the Kingdom of *Bohemia*; tho it be plain from *Goldaſtus*, that they formerly were. To ſupport their Pretenſions, they obtained Leave of the Emperors to bear the Spread-Eagle in their Eſcutcheons; and *Charles* V. confirmed their Privileges.

Their

Digitized by Google

Their Buildings are generally fair and ſtately; and on the Banks of the *Oder*, there are 4 old faſhion'd Piles of Building, with Turrets on the Top, which they ſay were the Palaces of ſo many *Swabian* Princes, formerly Lords of this City. The Town is the See of a Biſhop, who is put in by the King of *Bohemia*. They were anciently called *Golden Biſhops*, becauſe of their large Revenues; and they ſay, he muſt always be a *Sileſian*; yet others have enjoy'd this Poſt. They have alſo an Univerſity, which has bred many learned Men, and ſome eminent Writers. *La Foreſt* ſays, it has been a ſort of an independant City ſince 1348. That the Emperor *Charles* IV. enlarg'd and endow'd it with great Privileges; ſo that their Government is a ſort of Commonwealth. Moſt of the Inhabitants, according to this Author, were *Calviniſts*, and had their Liberty ratified by the Treaty of *Munſter*. He adds, That in the 13th Century, it was burnt by the *Tartars*, and ſuffered much by the Civil Wars of *Germany*. 'Tis one of the largeſt and richeſt Towns of the Empire; and their ſtately Churches, and other Buildings, with their fine Squares, make it one of the fineſt. The Inhabitants have made it very ſtrong, and guard it themſelves. Their Government is by 15 Senators, 11 of which are of the Nobility, and the other 4 are choſen out of the Corporations of Drapers, Mercers, Brewers, and Butchers. *Hekelius* gives a mighty Character of this City, and of the Inhabitants, for their Religion, Civility, Liberality, and mentions many learned Men who have been bred there.

The firſt Duke of this Province was *Boriſlaus*, a *Poliſh* Prince, who had that Dignity conferr'd on him by the Emperor *Frederick* I. in 1163; but the following Princes not being able to defend themſelves againſt the *Tartars* and *Poles*, they were forced to put themſelves under the Protection of the King of *Bohemia*, to whom, *Buno* ſays, the Emperor *Frederick* II. gave it as a Fief of the Empire; but 'tis now ſubject immediately to the Emperor.

The City and Dutchy of Lignitz.

THis is a fair City, on a ſmall River, and is thought to derive its Name from the ancient *Lugii*, about 25 Miles W. from *Breſlaw*, and 30 S. from *Glogaw*. *Boliſlaus*, their firſt Duke, enlarg'd and fortify'd it about 1170; and Duke *Frederick* did ſo much improve it in 1532, that it was the beſt fortified Town in *Sileſia*, except *Breſlaw*. They have a noble and ſtrong Caſtle, and a ſtately Hoſpital and Town-Houſe. 'Tis famous for the Victory which the *Swedes* obtained near it over the *Germans* in 1635.

This Dutchy is the beſt Corn-Country in *Sileſia*, and abounds with the white ſort of *Terra Sigillata*. 'Tis commonly divided into 7 Circles, 4 of which take Name from their principal Towns, *Luben*, *Parchwitz*, *Hayn*, and *Goldberg*, which are not worth inſiſting upon. The other 3 Diviſions are in the barren Part of the Country.

The Dutchies and Cities of Jawer, Schweidnitz, Brieg, Monſterberg, *and* Oppelen.

Jawer ſtands in a pleaſant Valley, near the rocky Mountains which divide *Sileſia* from *Bohemia*. It has no River near it, but is fortified with high Ramparts and deep Ditches. It lies about 10 Miles S. from *Lignitz*. It ſuffered much by the Civil War in 1648, when their Church was burnt down; but is now rebuilt more ſtately. It came to *Charles* IV. King of *Bohemia* by Marriage, and is ſubject to the Emperor as King of that Country. They have a Caſtle, where the Governor of this Dutchy and *Schweidnitz* reſides. There are 11 other Towns in this Dutchy, but of no great Note.

Schweidnitz takes its Name from the great Herds of Swine kept there before the Foreſt was cut down in 1070, and has a Wild-Boar for its Arms. It was enlarged, fortified, and beautified, by *Boleſlaus* I. and is one of the fineſt Towns in *Sileſia*. They have fine Churches, and Publick Buildings; and in their Armory, there is a great Gun which carries a Bullet of 320 Pound Weight. The Town of *Strigaw* in this Dutchy is noted for great Store of the *Terra Sigillata*. There are 9 other Towns in this Dutchy, but not worth deſcribing. This City lies about 20 Miles S. E. from *Lignitz*, near the Conflux of two ſmall Rivers.

Digitized by Google

Brieg, is ſo call'd from the *Poliſh* Word, ſignifying the high Bank upon which it ſtands on the River *Oder*, about 20 Miles S. E. from *Breſlaw*. The Streets are uniform, the Houſes generally are of Stone, and St. *Nicholas*'s Church is a high and ſtately old Fabrick, with two Towers, after the *Frankiſh* Mode. Moſt of it, except the Publick Buildings, was burnt by the *Huſſites* in 1428. There are 9 other Towns in this Dutchy, two of which, *Reichenſtein* and *Silberberg*, are noted for their Mines, and are jointly ſubject to the Dukes of *Brieg* and *Lignitz*, who are both of one Family, deſcended from the ancient Hereditary Kings of *Poland*. This is one of the chief Dutchies of the Country.

Monſterberg ſtands in a fruitful Plain, about 32 Miles S. from *Breſlaw*, and 20 S. E. from *Schweidnitz*, at the Head of a ſmall River which falls into the *Oder* at *Breſlaw*. It takes its Name from a Monaſtery built here by the Emperor *Henry* I. who founded the City. 'Tis but ſmall, and not well fortified, and has nothing of Note but an old Caſtle, which is a ſtrong Fortreſs; the School, and a fair Town-Houſe. There are 5 other Towns in this Dutchy, but of no great Note.

Oppelen ſtands on the N. of the *Oder*, over which it has a Bridge. It lies about 37 Miles S. E. from *Breſlaw*, is fortified with thick Walls, and ſtrong Gates. 'Tis ſubject to the *Poles*, and about 36 M. from the Frontiers of that Country. The Emperor was prevailed with by the K. of *Poland*, to whom 'twas mortgaged, to withdraw his Troops from thence in 1647. There are 12 other Towns in this Country, where moſt of the People ſpeak *Poliſh*.

The Cities and Dutchies of Grotkaw, Jagerndorf, Troppaw, Ratibor, *and* Teſchen.

GRotkaw is ſmall, and moſt of the Houſes of Wood, except the Church, the Biſhop's Palace, and Town-Hall, which are of Stone. There is ſuch Plenty of Wood and Corn in the Neighbourhood, that it is become a Proverb, *'Tis impoſſible for a* Grotkawer *to ſtarve or freeze*. It is ſubject to the King of *Bohemia*, and ſtands about 30 Miles E. from *Monſterberg*. *Neiſſa*, 10 Miles S. from it, is noted for a great Trade in Ticking. There are 11 other Towns in this Dutchy, but not conſiderable.

Jagerndorf takes its Name from the great Number of Huntſmen that formerly liv'd in it, where they had Plenty of Game in the neighbouring Woods. Latin Authors call this Dutchy *Carnovienſis*, or rather *Cornovienſis*, from its Arms, which are a Pair of Horns betwixt two Stones. This City and Dutchy was given by *Lewis* King of *Hungary* and *Bohemia* to *George* Marquis of *Brandenburg*, who built a Caſtle and Fortifications, that defend this little Town. It lies above 30 Miles S. E. from *Monſterberg*.

Troppaw, is ſo call'd from the River *Oppaw*, on which it ſtands, about 12 Miles S. E. from *Jagerndorf*. Latin Writers call the Dutchy, *Oppavienſis*. In 1405, it was ſwallowed up by a Deluge, occaſioned by a ſudden Thaw of Snow from the neighbouring Mountains. This City has Plenty of all Neceſſaries, and is noted for good Beer, but of no great Trade. There are 8 other Towns in this Dutchy, where they obſerve the Cuſtoms of *Moravia*, and on that Account have frequently attempted to join themſelves to that Marquiſate; but have always been hinder'd by thoſe of *Troppaw*. 'Tis a very old Town, and has a Fortreſs built after the Antick Manner.

Ratibor ſtands in a pleaſant Plain, on the W. of the *Oder*, 30 Miles E. from *Oppelen*. 'Tis ſuppos'd to have been built about 1164. Some Latin Authors call it *Ratibonia*. Moſt of the Houſes are of Wood; but the Duke's Palace, the Cathedral, and ſome Publick Buildings, are Stone. It has ſtill one Popiſh Monaſtery; but the Jeſuits were drove from hence at the Reformation. It had formerly Dukes of its own; but their Iſſue failing in 1516, it became ſubject to the King of *Bohemia*. The Dutchy has 5 other Towns, but not conſiderable.

Teſchen is one of the oldeſt Cities of *Sileſia*, and is ſaid to have been built by a *Poliſh* Prince about 810. It ſtands on the *Oder*, about 28 Miles S. E. from *Ratibor*, on the Confines of *Sileſia*, *Moravia*, *Hungary*, and *Poland*; whence it comes, that the Inhabitants have a medly of Language, ſcarce underſtood by any but themſelves. They have

Digitized by Google

have Store of Venison, Wild-Fowl, and Fish, and have a great Trade in Wine and Fruit from *Hungary*. They have two Churches, where their Worship is perform'd in *Bohemian* and *High-Dutch*, most of the Inhabitants being of those Countries. They have two Sorts of Beer, one of Wheat, and the other of Barley-Malt; the latter very pleasant and strong, with which the Country People frequently make themselves drunk. In this Dutchy, there are many high Mountains; but there are two Ridges most remarkable, the first the *Carpathian* Mountains, which separate this Country from *Hungary* and *Poland*, and are by the Natives called *Jablunka*; among them are many Mines of Silver and Lead, which make the chief Riches of *Silesia*. The Miners are by the Natives called *Wallachians*, and are a much rougher sort of People than the other *Silesians*: A vast Number of 'em revolted from the Imperialists to the *Swedes* in 1643. The other Mountains are on the S. and divide this Country from *Moravia*. Latin Authors make them part of the *Sudetes*, and call them *Montes Moravici*. They are well stock'd with Mines, and great Flocks of Sheep; but their Mines do not yield so much Ore as those of the *Carpathian* Mountains. They have 8 or 9 other Towns in this Country, but of no great Note. *La Forrest* mentions a little City called *Bicsina*, memorable for the Defeat of *Maximilian* of *Austria*, who was taken here by *Sigismund* of *Poland* in 1588, and another called *Plesi* near the *Weissel*, a pretty little City, with the Title of a Barony. He mentions also *Sprottaw* in the Dutchy of *Glogaw*, famous for a Salt Mine; and *Freystat* in that same Dutchy, noted for its Iron Mines.

The County and City of Glatz.

THE County lies among the Mountains of *Moravia*, has the Dutchy of *Silesia* on the E. *Bohemia* on the W. *Moravia* on the S. and Part of *Bohemia* on the N. which Dr. *Nicholson* observes has puzzled Geographers to which of those Countries to assign it; but it most probably belongs to *Silesia*. The ancient Inhabitants are thought to have been the *Marsigni*; and after them, the *Hungarians* possess'd it, with some neighbouring Countries, till routed by the Emperor *Henry* I. who hang'd their Chief Commander *Glozar*, from whence this City is said to have taken its Name. The Nobility say, That before this Conquest by *Henry* I. who also planted Christianity here, it was immediately subject to the Emperors, and afterwards subdued by the *Poles* and *Bohemians*, who, by their Records, appear to be Masters of it in the 11th Century. After this, it was some time possessed by the Duke of *Silesia*, till the Reign of *Charles* IV. who subjected it again to *Bohemia*; and thus it continued, till K. *George* of *Bohemia* gave it, with *Munsterberg* and *Frankenstein*, to some of his own Sons, who were called Dukes of *Munsterberg*, and Earls of *Glatz*. It was afterwards sold to several other Princes; but is now subject to the Kingdom of *Bohemia*. Their Commodities are, Iron, Coal, Silver Ore, Timber, Venison of all sorts, Tame Cattel, Butter and Cheese; and the Country is so rich, that it brings some Years 40000 Crowns into the Treasury of *Bohemia*.

The City is neat and compact, stands in a pleasant Plain on the Banks of the *Neissa*, about 22 Miles S. W. from *Munsterberg*. 'Tis defended by a strong Castle on the top of a neighbouring Hill. Their great Church was said to have been formerly the Temple of an Idol, worship'd by the ancient Inhabitants, in which, *Ælurius* says, the young Maids nail'd up their Hair against the Walls; and not long ago, some of these *Tabulæ Votivæ* were to be seen there. The Magistrates have a Power to coin Money in their own Names; but seldom coin any other than Halfpennies and Farthings. There are 9 other large Towns in this County, of which we have no Description, and above 100 fair Villages.

The Marquisate of Moravia.

THE *Bohemians* usually give the Precedency to this Country before *Silesia*, either because 'twas anciently a Kingdom of it self, or was sooner subject to the Kings of *Bohemia*. Some Authors derive the Name from *Mahren*, a Mare, because 'tis noted for breeding of Horses; but it comes more

Digitized by Google

more probably from the great River *March*, which runs through the middle of the Country; was formerly the Border of the *German* Empire on that Side, and gave the Name of *Marchomanni* to the ancient Inhabitants. It has *Silesia* on the N. *Austria* on the S. *Bohemia* on the W. and Part of *Silesia* on the E. is about 110 Miles long, and 80 broad, according to Dr. *Nicholson*. *Moll* makes the Length 120, and the Breadth 80. The greatest Part of the Country towards the N. and W. consists of uninhabitable huge Mountains and Forrests; but towards *Austria* and *Hungary*, it abounds as much with fair Fields, Towns and Villages, as most Parts of the Empire. The Water, especially what's found in Pits, is in many Places poisonous and pestilential, because of a mix'd Mineral made up chiefly of Lime and Nitre in the Soil, which not only infects the Water, but gives a Tincture to their Corn, Vines, Fruit-Trees, and other Vegetables, which occasions the Stone, Gout, Cholick, Falling-Sickness, and Hypochondriack Distempers, to be epidemical in this Country; but Providence has furnish'd them with several rich Medicinal Fountains, which are not only a present Remedy against those Distempers, but against most others with which Mankind is afflicted. *Thomas Jordan*, a Physician, and Native, has given a good Account of 'em, and of their Virtues, in a Book Entituled, *Commentarius de Aquis Medicatis Moraviæ*. Since which, other Medicinal Waters and Baths have been discover'd there, which *Herdot*, another of their Physicians, has describ'd in a Book, call'd, *Tartaro Mastix Moraviæ*. They have likewise other Fountains of a salt and acid Taste, very pleasant and wholesome.

Their two chief Rivers are, 1. *Morow*, which gives Name to the Country. It rises in the County of *Glatz*, runs through the middle of the Marq. and most of their chief Cities stand on its Banks. 2. *Teya*, which springs from two Fountains, one in *Bohemia*, the other in *Austria*; and after receiving several other Rivers, falls into the *Morow* on the Borders of *Austria*. These Rivers have Store of Trouts, Crevisses, Barbels, Eels, Jack, Perch, and many other Sorts of Fresh Fish.

The Country abounds with Corn of all Sorts for their own Consumption and Export, and they have Store of Red and White Wine. They have good Breeds of Horses, Oxen, Sheep, and Goats; but no Asses, Camels, or Mules, which some ascribe to the Sharpness of the Air. They have one kind of Beast peculiar to their Forrests, which they call *Rysowe*, somewhat like a Panther. 'Tis about as high as an ordinary Cur, but much thicker; its Belly and Feet are spotted, and it preys upon Deer and other Beasts, whom it surprises, by leaping suddenly upon them from the top of a Rock or Tree. *Dawbravius*, in his History of *Bohemia*, speaks of Frankincense and Myrrh dug out of the Earth here, which he says resembles the Privities of Men and Women, and on that Account is distinguish'd into Male and Female; and he tells us of his own Knowledge, That one of their Noblemen, when his Servants were digging a Fish-Pond, found a Piece of this Myrrh, perfectly resembling an entire Man; part of which, resembling half of a Man's Arm, that Lord gave to himself, which he made use of for Fumigation. And *Herdot* above-mention'd assures us likewise, That another Piece, resembling an Infant, was found in the Allum Mines near *Cesena*, which the Miners sold for 30 Crowns to some *Carthusian* Monks, who sent it to their great Monastery in *France*, where the Abbot made a Present of it to the *French* King. The Country People, among other Virtues, fancy that it drives away Serpents and ill Spirits. *Æneas Sylvius* says, the Inhabitants, in his Time, were a thievish barbarous People; and that there was no travelling among 'em without Arms. The *Moravians* themselves own, that the Boors on the River *Hanak* are guilty of this Crime; but the Inhabitants in general are of a free Conversation, not easily provoked, and hard to be appeased. They are exemplary for Obedience to their Magistrates, brave in the Field, faithful to their Promises, but credulous of old Prophecies, and addicted to Drink; but not such Drunkards and Bigots as some Geographers represent them.

Their common Language is a Dialect of the *Sclavonick*; but the Nobility and Citizens speak *High-Dutch*.

They are said to have been first converted by St. *Cyril* and *Methodius*, &c. When *John Huss* began to appear in *Bohemia*, many of the

Digitized by Google

the *Moravians* embrac'd his Doctrine, which was much oppoſed by *John de Praga*, Biſhop of *Olmutz*, afterwards a Cardinal; but ſoon after, moſt of their Cities and great Towns threw off Popery. The Synod of *Brin*, in 1608, having given Leave for every Man to believe as God had given him Knowledge, the People abuſing their Liberty, abundance of unlearn'd Men, and Mechanicks, ſet up for Preachers, which divided them into 14 Sects, who all rejected Communion with one another. Theſe unhappy Diviſions made it eaſy for the Emperor *Ferdinand* II. after the Defeat of the Elector *Palatine* near *Prague* in 1620, to re-introduce Popery; ſo that the Proteſtants were diſperſed among the Rocks and Mountains on the Borders of *Sileſia*, and durſt not meet in publick, as Dr. *Nicholſon* informs us.

That ſame Author ſays, *Moravia* was anciently a Kingdom, and their Kings the greateſt Potentates in this Part of *Europe*, having under them *Bohemia*, *Poland*, and *Sileſia*. About 700, *Zuantacop*, King of *Moravia*, refuſing Tribute and Homage to the Emperor, the latter invaded him; but was forc'd to a diſhonourable Retreat: To revenge which, the Emperor call'd in the Infidel *Hungarians*, by whoſe Aſſiſtance he routed *Zuantacop*, who thereupon became an Hermit; and his Country being divided into Provinces, was annexed to the Empire, and now moſt of it is ſubject to *Bohemia*, or broke into a few Petty Baronies. *La Forreſt* ſays, 'twas united to *Bohemia* about 1048 by *Brzetiſlas* Duke of *Bohemia*, called the *Bohemian Achilles*. This Country ſuffer'd much by the Ravages of the *Tartars* during the Siege of *Vienna* in 1683.

Their chief Cities and Towns are,

1. *Olmutz*, their Metropolis, in Latin *Olomutium*, ſuppoſed by ſome to be *Ptolomy's Eburum*. 'Tis a ſmall City, neat, and well built, on the Banks of the *Moraw*, by which it has a Trade with *Bohemia*, *Hungary*, *Poland*, *Sileſia*, and *Auſtria*. It lies about 20 Miles W. from the Borders of *Sileſia*, in Long. 35. 53. Lat. 49. 35. Their Antiquaries fancy the Name to be a Corruption of *Julii Monſium*, and therefore think it to have been built by *Julius Ceſar*; but without any Ground. St. *Cyril*, their Apoſtle, who liv'd about 880, was their firſt Biſhop. *Aventinus* ſays, he was the Author of the old *Wendiſh* or *Croatian* Alphabet, in which he wrote the Bible that he tranſlated into the *Moravian* Tongue; of which, ſome Antiquaries take the *Muſcovian* Bible, printed in 1581, to be a Tranſcript. In 1346, the Biſhop of *Olmutz* was removed from being ſubject to the Elector of *Mentz*, and made Suffragan to the Archbiſhop of *Prague*; yet ſome of their late Biſhops have deny'd Subjection to any but the Pope.

2. *Brin*, in Latin *Brunn*, about 28 Miles S. E. from *Olmutz*. The Courts of Judicature for the Country are held here and at *Olmutz* by Turns. It ſtands on the Conflux of two ſmall Rivers, and is defended by a ſtrong Caſtle on the top of a neighbouring Hill. It held out bravely againſt the *Swedes* in 1645, whereas *Olmutz* ſurrender'd at firſt Summons; on which Account, the Inhabitants diſpute the Precedency with that Town. 'Tis very well fortified, and is noted for the *Unicorns Mineral* found near it, of which Authors give different Accounts; ſome repreſenting it like the Trunk of a Walnut-Tree, and others to the Bones of unknown Animals. Dr. *Nicholſon* ſuppoſes it to be a Petrifaction of Timber, ſuch as is found in many other Places, and particularly in *Oxfordſhire*.

3. *Iglaw*, on the Frontiers of *Bohemia*, about 40 Miles W. from *Brin*. 'Tis ſaid to have been built in 799, and to have taken its Name from *Igle*, the *German* Word for an Hedgehog, becauſe thoſe Creatures abounded in that Place; but *La Forreſt* derives it from the *Igla*, on which it ſtands. 'Tis a large, well built, and ſtrong Town, and a great Thoroughfare betwixt *Bohemia* and *Hungary*, which makes the Inhabitants more civil to Strangers than the reſt of their Countrymen. It held out obſtinately againſt the Doctrine of *Huſs*; but was the firſt Town of *Moravia*, ſubject to the King of *Bohemia*, that embrac'd the *Auſburg* Confeſſion. In 1645, it ſurrender'd to the *Swedes*, who, to make it more tenable, burnt down the large Suburbs, and defended it againſt the Imperialiſts, whom they repulſed after a Twelvemonth's Siege. The Jeſuits College, with the *Gymnaſium* annex'd, one Monaſtery of *Dominicans*, and another of *Franciſcans*, are worth a Traveller's View.

Their

Their greateſt Trade is in Beer, and a coarſe Woollen Cloth, which they make and dreſs themſelves.

4. *Znaim*, in Latin *Zngma*, on the *Teya*, about 25 Miles S. W. from *Brin*, in a pleaſant Soil, and good Air. *Cluverius* thinks it to be *Ptolomy's Medoſtaniam*, which comes pretty near the Longitude, but not his Latitude. The *Moravian* Annals ſay, 'Twas built where it now ſtands about 1142, having been formerly deſtroy'd in 1145 by *Uladiſlaus* of *Bohemia*. 'Tis defended by a ſtrong Caſtle; but is over-look'd by an adjacent Mountain within Cannon-ſhot, which makes it uncapable of holding out a Siege. They have many Vineyards in the Neighbourhood, which afford a palatable Wine. Their chief Trade is by Paſſengers betwixt *Vienna* and *Prague*. 'Tis famous for being frequently taken and retaken during the *German* Civil War, eſpecially when taken by the *Swedes* in 1645. 'Tis alſo noted for the Death of the Emperor *Sigiſmund* in 1437.

5. *Cremſir*, on the River *Morau*, mid-way betwixt *Olmutz* and *Hradiſh*, was lately a poor Village, but now one of the faireſt Cities in *Moravia*, occaſioned by being the Reſidence of the Biſhops of *Olmutz*, who, becauſe of its convenient Situation, bought it from the Marq. of *Moravia*, and built a Palace there, which occaſioning the Inhabitants to increaſe, they wall'd and fortify'd the Town. 'Twas taken by the *Swedes* in 1645.

6. *Ewancziz*, on the Conflux of the *Igla* and *Oſlaw*, which here loſe their Names, and are called *Schwartza*. 'Twas formerly noted for more different Sects in Religion than almoſt any other Town in *Europe*. The *Huſſites* and *Lutherans* had their Worſhip in the Pariſh-Church at one and the ſame time. The *Jews* had one of the Streets, with a Synagogue and School, without the Gates: The *Calviniſts* had two Churches, one for the *Bohemians*, and another for the *Germans*, who, with the *Lutherans* and *Huſſites*, ſhar'd the Government of the City. In another Part of the Suburbs, dwelt thoſe call'd the *Holy Brethren of Switzerland*, who deny'd Baptiſm, thought it damnable to wear a Sword, and had a Communion only at *Whitſun-tide*. The *Photinians*, who deny'd the Reſurrection, and, as Dr. *Nicholſon* thinks, were Atheiſts and Quakers, had their Meeting near a Fountain in a neighbouring Field. At a ſmall Village called *Olchewitz*, about half a Mile from the Town, lived 400 Anabaptiſts. Theſe Differences gave the Papiſts an Opportunity to drive them all from thence; ſo that no Liberty is granted now to any but Papiſts and Jews. *La Forreſt* mentions *Auſterlitz*, a Town almoſt ruin'd by the *Swedes* in the Civil War. Dr. *Nicholſon* takes Notice of the Romantick Account of *Caſpar Lawdiſman*, who, in his Directions for ſpeedy underſtanding Foreign Languages, ſays, there are 100 Cities, 410 Towns, 500 Caſtles, and 30360 Villages, in this Marq. And ſince the learned Annotators on *Cluverius* ſay nothing of this Number, and that thoſe who travel the Country muſt needs know it to be falſe, it muſt be own'd the Doctor's Reflexion is juſt.

BOHEMIA.

Its Extent.

THis Kingdom has *Moravia*, and Part of *Sileſia*, on the E. *Voitland* and the *Upper Palatinate* on the W. *Auſtria*, and Part of *Bavaria*, on the S. Part of *Sileſia*, *Upper Luſatia*, and *Miſnia*, on the N. According to *Moll's* Map, the greateſt Length from E. to W. is 160 Miles, and the greateſt Breadth from S. to N. about 150. *Goldaſtus*, from its Situation, urges very reaſonably, That it muſt needs have anciently been a Branch of the *German* Nation.

Their ancient Inhabitants, *with their* Manners *and* Religion.

GOldaſtus thinks, the *Hermiones* were the ancient Inhabitants, and makes the *Hermundari* a Branch of 'em. They were drove out by the *Boii*, commanded by their General *Sigoveſus*, a *Celtick* Prince. *Micralius*, a learned *Pomeran*, thinks they were not the *Galli Senones*, as moſt late Antiquaries do, but the ancient *Semnones* of *Pomerania*. The Reader may conſult what we have ſaid concerning thoſe People in our Account of Ancient *Germany*. *Micralius* ſuppoſes, the *Boii* ſettled

ſettled here about the Year 600 of *Rome*, when *Tarquinius Priſcus* was King, and gave Name to the Country, from whence they were drove by the *Marcomanni*, and removed to that Place now called *Bavaria*, which from them was anciently, according to ſome Authors, called *Boiouria*. The modern *Bohemians* call their Country *Czechowe*, and themſelves *Czechowsky*. Such of them as allow the Name of *Bohemia*, derive it from *Boy* and *Muz*, which, they ſay, ſignifies a Valiant and Pious Man, which agrees well enough with their Character. They are tax'd with being ſo apt to imitate the Faſhions of other Nations, that a Painter, who drew other People in their proper Habits, painted a *Bohemian* naked, with a Web at his Foot, and all other Neceſſaries for making a Suit, according to the next Mode he ſhould fancy. Some Authors ſay, That *Zechus*, a *Sclavonian* Commander, with a ſmall Number of his Countrymen, from whom the *Bohemians* love to derive their Pedigree, ſettled here; but they cannot tell whether in the 4th, 5th, or 6th Century; That they were a harmleſs People, liv'd in a ſociable Community, and diſtributed what they had according to every one's Neceſſity, (which looks ſomewhat like Sir *Thomas More's Utopia.*) They add, That after *Zechus*'s Death, being diſturb'd by their Neighbours, they choſe one *Crocus*, an ancient Gentleman, to be their Chief Magiſtrate, and appointed a certain Number of Men to aſſiſt him in determining Controverſies. Under this ſort of Government they continued, till *Libuſſa*, *Crocus*'s Grand-Daughter, took one *Primiſlaus*, a Countryman, from the Plough to be her Husband, and he aſſum'd a more abſolute Government, under the Title of a Duke; and they ſay, their Succeſſors kept the Government about 450 Years. *Hoffman* gives this further Account of 'em, That *Charles the Great* fortified *Dreſden* againſt the *Bohemians* about 808, and his Son made them Tributaries to the Empire. *Lewis* King of the *Romans* made War upon them with various Succeſs, and brought 12 of their Dukes to be Chriſtians in 862. Their Duke *Borzivoi* conquer'd *Moravia*, and converted the whole Kingdom. Their Prince *Wenceſlaus* was brought to a Peace by the Emperor *Henry the Fowler* about 930; and their King *Boliſlaus* was ſubdued by *Otho the Great*, and became his Vaſſal in 954. *Otho* II. reduc'd them in 976, and their Biſhop *Adelbert* forſook them, becauſe of their bad Lives, about 999; and going to *Hungary*, converted many of that People. Dr. *Nicholſon* ſays, The Emperor *Henry* IV. in a Diet of the Empire at *Mentz*, created *Wratiſlaus* D. of *Bohemia* a King, and ſet a Crown of Gold on his Head; ſome ſay in 1072, and others about 1082; from which Time the Emperors always claim'd a Right of inveſting their Kings, and perſwaded the People to rebel from Time to Time againſt ſuch as did not receive the Inveſtiture at their Hands. The *Brandenburg* Reſident gives much the ſame Account of the Settlement of the *Slavi* here, who he thinks came from *Scythia*; and becauſe they were originally Strangers, their own Authors and others have from Time to Time pleaded an Exemption from their being ſubject to the Laws or Diets of the Empire. Theſe *Slavi* extended their Boundaries into *Pomerania*, *Mecklenburg*, and *Brandenburg*. It has alſo been debated, whether they be a Circle of the Empire, becauſe when *Maximilian* I. firſt appointed the Circles to be Six, he did not include *Bohemia*; but the ſame Author ſays, That the Emperor *Wenceſlaus* did long before that Time make it the firſt of the Four Circles which he appointed: And he makes it plain from Hiſtory, That ſince the Time of *Charlemagne*, they have done Homage to the Emperor and Empire.

Dr. *Nicholſon* ſays, When the *Slavi* came firſt hither, they brought many Idols with them; their Chief was *Prou*, which in their Language is the ſame with *Jupiter* the Thunderer, and they gave him the ſame Reverence as the *Saxons* did to *Thor*; but at laſt rejected him, and honour'd *Swanto-Wit*, an Idol, whoſe Temple was at *Wollin* in *Pomerania*; and the Doctor ſays, they ſtill retain ſome Remembrance of this Idol; for when they ſhake Hands with one another, they make uſe of this Compellation, *Witeg*, *Witeg*, or *Witamte*. The firſt that converted them to Chriſtianity was *Methodius*, a Greek Prelate; ſo that 'twas long before the *Bohemian* Clergy would own the Pope's Supremacy. The Doctor obſerves, That the Catalogues of their Kings are ſo contradictory, that 'tis hard to reconcile them.

The HISTORY *of their Kings.*

THE *Atlas Hiſtorique* gives us the following Hiſtory of their Dukes and Kings.

1. *Zechus* or *Zecco*, ſaid to be deſcended of a Noble Family, and flying hither with his Brother *Lechus* for killing a Perſon of Quality in their own Country, they took up their Abode on Mount *Chezip*, where finding none but a few People that look'd after their Flocks, and liv'd on their Milk, they taught them Husbandry: Upon which thoſe Peaſants honouring them as their Maſters, the reſt of the Inhabitants follow'd their Example, and choſe *Zechus* for their Governor, becauſe he was the eldeſt: Upon this, *Lechus* went to *Poland*, to which he gave Name, and founded the Government there. This is ſaid to have happen'd about the Year of Chriſt 550. *Zechus* govern'd a long Time; but the Time of his Death is uncertain.

2. *Croco* or *Cracus* ſucceeded: Some call him *Zechus*'s Son, and others make him a *Bohemian*, and ſay, he govern'd with ſo much Prudence, that the *Poles* choſe him alſo to be their Governor after *Lechus*; and ſome ſay, he founded and gave Name to the City *Cracow* in that Country.

3. After his Death, the youngeſt of his three Daughters, called *Libuſſa*, had the Government of *Bohemia* about 619, which ſhe managed well; but many of her Subjects thinking it unreaſonable that a Woman ſhould govern Men, they revolted; but ſhe pacify'd them, by pretending to the Art of Divination, and telling, That the Gods had order'd them to let a Horſe looſe, and that ſhe was to marry the Man to whoſe Houſe the Horſe ſhould firſt betake himſelf, and that he was to be their Prince. A Horſe being let looſe accordingly, he ſtop'd at the Houſe of *Primiſlaus*, a Peaſant, who underſtanding the Matter, threw down his Stick with which he drove his Cattle at Plough, which the fabulous Pagans ſaid became immediately a Nut-Tree; in Remembrance of which, he diſtributed a certain Quantity of Nuts every Year to the People. He govern'd with great Succeſs while *Libuſſa* liv'd; and after her Death, married one *Vaſca*, who form'd a Conſpiracy to baniſh all the Men, and ſet up a Government like that of the Amazons. She and her Women defended themſelves bravely for ſome Time; but being overcome, and put to Death, *Primiſlaus* died ſoon after.

4. *Nimiſlaus* his Son ſucceeded about 676. He cultivated the Country, and wall'd the Town of *Prague*. He is ſaid to have acquir'd great Glory in his War with the *Romans*, and died about 715.

5. *Mnatha* his Son ſucceeded, govern'd the Men himſelf, as they ſay, and left the Government of the Women to his Wife *Treſiſlaw*, had War with the *Alemanni* and *Moravians*, and died about 735.

6. He was ſucceeded by *Vogenius*, whom ſome call *Veritius*. He had War with the *Saxons* and *Miſnians*, and with Rebels of his own Country, whom having ſubdued, he liv'd peaceably ever after, and died in 763.

7. He was ſucceeded by *Wenceſlaus* I. of whom there is nothing remarkable, but that he reign'd 22 Years, and died about 785.

8. He was ſucceeded by his Brother *Czrſzwiſlus*, who being ambitious, got himſelf choſen Prince at *Prague*. He was unſucceſsful in his War with *Charlemagne*, and died in 803.

9. He was ſucceeded by his Son *Belam*, or, as ſome call him, *Necklam*, who being a cowardly Prince, his Uncle *Uladiſlaus* uſurp'd the Government; but was defeated and kill'd by *Belam*'s General, and is ſaid to have been ſo cruel, that he would allow his Soldiers no Proviſions but the dead Bodies of their Enemies, which rais'd all the Country againſt him. *Belam* died in 839, and was ſucceeded by his Son *Noſtivitus*, whom ſome call *Noſtritius*. He ſhar'd the Government with his Brother *Miſtbogen*, and governing happily, it contributed much to the Peopling of the Country. He had War with *Lewis de Debonnaire*; but made Peace with him a little before his Death, which happen'd in 856.

10. His Son *Borſivojus* I. ſucceeded, was their firſt Chriſtian Prince, and converted by *Cyrillus* and *Methodius* in 894. This occaſion'd his Subjects to dethrone him; but he ſubdued the Rebels, eſtabliſh'd Chriſtianity, left the Government to his Son *Spitig-*

Digitized by Google

signeus I. and retir'd with his Queen to a Monaſtery, where he died piouſly.

11. *Spitigneus* began his Reign in 904, govern'd well at firſt; but abandoning himſelf to Ambition, and other Vices, and deſpiſing the Threatnings of his Father and Mother, he was cut off by Heaven 4 Days after their Reproof, in 906.

12. His Brother *Uladiſlaus* or *Wratiſlaus* I. ſucceeded, was an excellent Prince, victorious againſt the *Hungarians*, and married a Pagan Lady, on her Promiſe to turn Chriſtian; but ſoon after ſhe endeavour'd to ſuppreſs Chriſtianity, thô without Succeſs. *Uladiſlaus* died in 916.

13. *Wenciſlaus* I. his Son, ſucceeded; and during his Minority, his Grandmother *Ludmilla* was choſen to govern, becauſe her Husband would not quit his Monaſtery. His own Pagan Mother being incens'd at this, got her murther'd, and uſurp'd the Government, for which, when he came of Age, he took Arms againſt her, which brought her to a feign'd Submiſſion; but ſhe perſwaded his Brother *Boleſlaus* to murther him in 938.

14. *Boleſlaus* ſucceeded; but the Emperor *Otho the Great* made War upon him for murthering his Brother; and after 14 Years Time, brought him to a Peace, to pay Tribute, to do publick Penance for his Crime, and to reſtore Chriſtianity. After which, *Boleſlaus* died in 967.

15. His Son *Boleſlaus* II. ſucceeded, and was an excellent Prince. He founded the Biſhoprick of *Prague*, ſent for ſeveral Clergymen from *Germany* to promote Chriſtianity, made War upon the *Ruſſians* and *Poles*, defeated the Emperor *Otho* II.'s Army, made Peace with his Son *Otho* III. and died, after a good Reign, in 999.

16. His Son *Boleſlaus* III. ſucceeded, was a covetous and negligent Prince, and loſt what his Father had conquer'd from his Neighbours: Upon which, his Uncle *Miſco* ſeiz'd him, put out his Eyes, and baniſh'd him; but by the Help of the *Sclavonians* and *Saxons*, he recover'd Part of his Dominions, and died at *Budowitz* in the 80th Year of his Age.

17. *Jaromir*, his Son, who was made Regent during his Baniſhment, ſucceeded; but being uncapable of Iſſue, the People, with the Aſſiſtance of his Brother *Ulric* or *Udolric*, depos'd him. His Brother, who had been choſen Governor ſome Time before, put out his Eyes.

18. *Ulric* ſucceeded in 1035, govern'd for two Years with great Glory, defeated *Gero* Marquis of *Brandenburg* in *Luſatia*, taught the *Bohemians* the Art of War, and dy'd with the Reputation of a great General in 1037.

19. *Bretiſlaus* I. his Son, ſucceeded; and for his Valour, obtain'd the Sirname of the *Bohemian Achilles*. His taking by Force *Judith*, a Daughter to the Elector *Palatine*, occaſion'd a War betwixt him and the Emperor *Conrad* II. The firſt Campaign was ſucceſsful to neither; but the Emperor coming with a greater Army, that Princeſs, by her Mediation, and throwing her ſelf at the Emperor's Feet, hinder'd the Battle, and brought on a Peace. He was very ſucceſsful againſt the *Poles* and *Hungarians*, and in one Campaign took from the *Poles*, *Breſlaw*, *Cracow*, *Gneſna*, and *Poſen*: After which he made Peace, and died in 1055.

20. *Spitignew* II. ſucceeded, who, thô ſirnam'd *The Juſt*, baniſh'd his Mother-in-Law and ſome of the Grandees, and ſeiz'd thoſe Parts of the Country allotted to his Brothers; upon which one of them, called *Uladiſlaus*, retir'd to *Hungary*, where he married the King's Daughter: After which, he and the reſt of his Brothers re-poſſeſs'd themſelves of their Dominions, and *Spitignew* died in 1061.

21. *Uladiſlaus* II. his Brother, ſucceeded, and was by the Emperor crown'd King of *Bohemia* for his Merit. His Brothers rebelled againſt him; but were ſubdued. After this, his eldeſt Son *Brzetiſlaus*, being provok'd by a witty Raillery of a Courtier, he got him murder'd, and declar'd War againſt his Father; but his Uncle *Conrad* hinder'd their coming to a Battle, and *Brzatiſlaus* retir'd to *Hungary*. *Uladiſlaus* died in 1093. having before-hand declared his Brother *Conrad* Succeſſor.

22. *Conrad* would not take the Title of King, but ſatisfy'd himſelf with that of Duke, did nothing remarkable, and died in leſs than 7 Months after.

23. *Brzetiſlaus*, Son to *Uladiſlaus*, being call'd by the People, ſucceeded. He reduc'd the *Polaques*, who had revolted, obliged their Prince *Uladiſlaus* to pay him

Digitized by Google

Tribute, and was kill'd as a Hunting in 1100.

24. *Borzivoius* II. his Brother, ſucceeded, by the Intereſt of the Emperor *Henry* IV. without Conſent of the Princes; ſo that he was thrice dethron'd; and at laſt, finding that he could not hold the Government, retir'd to *Germany* in 1107.

25. *Suatopluok*, Nephew to *Borzivoius* I. ſucceeded, being choſen Governor before. He procur'd by Money the Confirmation of the Emperor *Henry* V. and pillaged the Churches to pay him. He ravaged *Hungary*, and made War upon the *Poles*, who favour'd his Uncle; during which he was kill'd in 1109.

26. *Otho* ſucceeded; but was dethron'd, becauſe of his Incapacity to govern.

27. *Uladiſlaus* II. Brother to *Borzivoius*, ſucceeded, ſubdued his own Brother *Sobieſlaus*, and others, who rebelled againſt him, and died in 1125.

28 *Sobieſlaus* I. his Brother, ſucceeded. He was ſucceſsful in his War againſt the *Moravians*, kill'd *Otho* their Marquis in Battle, and at the ſame Time defeated the Emperor *Lotharius* II. who aſſiſted him. The Emperor afterwards contracted a Friendſhip with him, and employ'd him as General againſt *Conrad* and *Frederick*, whom he defeated. Some of his own Subjects envying his Glory, conſpir'd againſt him; but were diſcover'd and puniſh'd. He died in 1140.

29. *Uladiſlaus* III. ſucceeded, by the Intereſt of the Emperor *Frederick Barbaroſſa*, who gave him the Title of King in a Diet, becauſe he govern'd the Empire well, while the Emperor himſelf was in *Italy*. He afterwards commanded the Emperor's Armies with Succeſs, and reſtor'd *Stephen Geiſa* to the Dutchy of *Milan*; and, as a Mark of his Valour, had aſſign'd him for his Arms, *Azure*, a *Lion Argent*, which is ſtill the Arms of *Bohemia*. After a glorious Reign, he died in 1174.

30. *Sobieſlaus* II. Son to *Sobieſlaus* I. ſucceeded. He was a wicked tyrannical Prince. During his Time, *Andrew* diſputed the Kingdom of *Hungary* with his Brother *Emerick*, who being worſted, retired to *Bohemia*, in his way to *Germany*; but was deliver'd up to *Andrew* by *Sobieſlaus*. The Emperor being incens'd at it, ſummon'd *Sobieſlaus* to anſwer it, who declining it, a War enſu'd; but the firſt Battle decided the Difference, the King of *Hungary* dying of a Wound he receiv'd in it. *Sobieſlaus* died in 1178.

31. *Frederick*, Son to *Uladiſlaus* III. ſucceeded, by the Aſſiſtance of the Emperor *Frederick*. He did nothing remarkable, and died in 1190.

32. *Conrad* II. Couſin to *Frederick*, ſucceeded, by the Aſſiſtance of the Emperor *Henry*, whom he attended in his Expedition againſt the Pope, wherein he died in 1192.

33. *Wenceſlaus* I. another Son of *Sobieſlaus* I. ſucceeded; but was taken and dethroned by *Albert* Marquis of *Luſatia* in 1193.

34. *Bretiſlaus*, whom ſome call *Henry* Biſhop of *Prague*, Nephew to *Uladiſlaus* III. ſucceeded, govern'd with much Glory for 3 Years, and died in 1196.

35. *Uladiſlaus* IV. Son to *Uladiſlaus* III. ſucceeded; but in 5 Months, ſurrender'd to his Brother.

36. *Premiſlaus*, who took Part with the Emperor *Otho* againſt *Philip*. He govern'd 32 Years, and died in 1231.

37. *Wenceſlaus* II. ſucceeded. He was ſucceſsful in his War before that Time againſt *Frederick* Duke of *Auſtria*, and his Brother *Primiſlaus*. His Subjects revolted, and declared for his Son *Ottocarus*, which occaſion'd much Bloodſhed; but at laſt they agreed. After which *Wenceſlaus*, who had before loſt an Eye as a Hunting, did afterwards loſe his Life in that Exerciſe in 1255.

38. *Ottocarus* II. by ſome called *Primiſlaus* III. ſucceeded. He conquer'd *Auſtria* from the Emperor *Rodolph* I. who at laſt drove him out again. The Pope call'd him the Apoſtle of *Pruſſia*, becauſe he defeated the Pagans, and founded the Biſhoprick of *Sambick* in that Country. He was ſo potent, that he govern'd from the *Adriatick* Sea to the *Baltick*. But in a ſecond War with *Rodolph*, was kill'd at the Battle of *Murkfelt* in 1278.

39. His Son *Wenceſlaus* III. ſucceeded at 8 Years of Age, under the Care of *Otho the Long*, Marquis of *Brandenburg*, during his Minority. His Mother-in-Law gave him the Provinces of *Cracow* and *Sendomir*, of which he never had peaceable Poſſeſſion, till he obtain'd it by War, when the *Poles*, for the Eſteem they had to his Merit, choſe him their King, and crown'd him at *Prague*, where

Digitized by Google

where he founded the Univerſity. The *Hungarians* did alſo offer him their Crown, which he reſign'd to his Son, and died ſoon after in 1305.

40. His Son *Wenceſlaus* IV. ſucceeded, was a wicked and luſtful Prince; and by forcing the Wives of his Subjects, became ſo odious, that he was aſſaſſinated as he paſſed by a Gentleman's Houſe at *Olmutz* in 1306.

41. *Henry* Duke of *Corinthia*, Brother-in-Law to *Wenceſlaus* III. arriving at *Prague*, was choſen King by the Intereſt of the *Hungarians*; but the Emperor *Albert* I. rais'd an Army, dethron'd him, and ſet up his own Son *Rodolph*, who, after a ſhort and prudent Reign, died ſuddenly in 1307. Upon which *Henry* return'd to *Bohemia*, and defeated thoſe who oppos'd him. *Albert* enter'd *Bohemia* againſt him with an Army; but dying in the Expedition, the Emperor *Henry* VII. expelled *Henry*, and ſet up

42. *John* of *Luxemburg*, his own Son, then 14 Years of Age, in 1310. Soon after he was declared Vicar of the Empire, during his Father's Abſence, when he conquer'd *Sileſia* in 1332. Before this time, he was invited to *Poland*, defeated the *Lithuanian* Pagans, and was, as ſome ſay, declared King of *Poland*; but Hiſtorians differ in this Matter. He was made blind of one Eye in this Expedition, and went *incognito* to *Montpellier* for Cure, where a *Jewiſh* Phyſician made him loſe the other. This did not hinder him however to go to War, ſays the *Atlas Hiſtorique*; for he carried Troops to aſſiſt *Philip de Valois* of *France* againſt the *Engliſh*, and was kill'd in the Battle of *Creſſy*, fighting valiantly, in 1346.

43. His Son *Charles* ſucceeded, and was choſen Emperor a Year before the Death of *Lewis* of *Bavaria*, by the Intereſt of Pope *Clement* VI. and *Philip de Valois* of *France*. Some Princes of the Empire rais'd up three Competitors againſt him, whom he vanquiſh'd, and continued in peaceable Poſſeſſion. He was preſent at the Battle where his Father was kill'd. It was he who inſtituted the *Golden Bull*, and purchas'd from *Otho* of *Bavaria* the Marq. of *Brandenburg*, which he gave to his Son *Wenceſlaus*, and died in 1378.

44. His Son *Wenceſlaus* V. ſucceeded, who being a careleſs ambitious Prince, the Electors depos'd him, and choſe another in 1400, when *Wenceſlaus* retir'd to *Prague*, and liv'd there in Debauches for 19 Years.

45. *Sigiſmond* King of *Hungary*, and afterwards Emperor, ſucceeded to the Crown of *Bohemia* in 1418, after the Death of Prince *Robert*, Palatine of the *Rhine*, who ſucceeded his Brother *Wenceſlaus* V. He was oppos'd by the *Huſſites*, and was the Occaſion of burning *John Huſs* and *Jerome* of *Prague* at the Council of *Conſtance*, contrary to his own ſafe Conduct, which ſo provok'd the *Huſſites*, that they offer'd their Crown to *Jagelon* King of *Poland*, who reſign'd it to his Son-in-Law *Coributh* Duke of *Lithuania*; but *Sigiſmond* overcame him. The Reader may find more of this *Sigiſmond* in our former Account of the Emperors. He died in 1436, or, as ſome ſay, in 1438.

46. *Albert* II. ſucceeded; for whoſe Hiſtory, we likewiſe refer to our Account of the Emperors. He died in 1439.

47. His Son *Uladiſlaus* V. ſucceeded to *Hungary* and *Bohemia* at 5 Years of Age. The famous *Huniades* was choſen Governor during his Minority; and after his Death; *George Podebrache*. When *Uladiſlaus* came of Age, he perſecuted the *Huſſites*, and oblig'd the *Turks* to raiſe the Siege of *Belgrade* in 1451; but died in 1457 of Poiſon, which the Enemies of the *Huſſites* charged upon them.

48. *George Podebrache*, who govern'd during his Midority, was choſen after his Death in 1458. He ſubdued the *Moravians*; but being a Favourer of the *Huſſites*, and caſting off the Pope's Yoke, the Court of *Rome* excommunicated him, and rais'd a Rebellion againſt him; but he kept the Government till he died, in 1471, notwithſtanding the Endeavours of *Uladiſlaus*, and *Matthew Corvin* of *Hungary*, againſt him.

49. *Uladiſlaus* VI. Son to *Caſimir*, ſucceeded, and obtain'd alſo the Crown of *Hungary* in 1490. and vanquiſh'd his three Competitors, of whom his Brother *Albert*, ſupported by his Father, was one. He was ſucceſsful againſt the Infidels, who did very much Damage to his Country, and died in 1516.

50. He was ſucceeded by his Son *Louis* who was crown'd King of *Hungary* and *Bohemia* at 12 Years of Age, under the Protection of the Emperor *Maximilian* I. and

Sigiſ-

Digitized by Google

Sigiſmond King of *Poland*. When he came of Age, he govern'd with a great deal of Conduct. *Soliman*, Emperor of the *Turks*, made War upon him, and took *Belgrade* in 1521. In 1526, the *Turks* defeated him at the famous Battle of *Mahatz*, when, in his Retreat, he was unhappily drown'd in a Moraſs.

51. The Emperor *Frederick* I. ſucceeded; for whoſe Hiſtory, we refer to that of the Emperors. Since his Time, the Houſe of *Auſtria* have been poſſeſſed of *Bohemia*, except a ſmall while that the Elector *Palatine* enjoy'd it, till defeated at the Battle of *Prague*; of which, we have already given an Account.

The RELIGION *of the Modern* Bohemians.

WE have formerly given an Account of their Converſion to Chriſtianity; but their early and remarkable Oppoſition to the Errors of Popery, under the Name of *Huſſites*, deſerves to be a little inſiſted on.

Mr. *Fox*, in his Book of Martyrs, *Vol. I.* ſays, That Queen *Anne*, Wife to *Richard* II. of *England*, being a *Bohemian*, ſome of her Countrymen, who came with her, having ſeen ſome of *Wickliff*'s Works, which Dr. *Nicholſon* ſays was at *Oxford*, they carried home ſome Copies of them to *John Huſs* and *Jerome* of *Prague*, who, upon reading them, ſet effectually about reforming the Corruptions of the Church of *Rome*. For ſuch Errors as they objected againſt, and how they were treacherouſly burnt at the Council of *Conſtance*, we refer to the Book of Martyrs, where the Reader may find it at large. The Learned *Spanheim*, in his Epitome of Eccleſiaſtical Hiſtory, gives this brief Account of them: In the 15th Century, King *Wenceſlaus* reign'd in *Bohemia*, being deprived of the Empire, becauſe of his Defence of the *Huſſites*, and refuſing to put the Pope's Bulls in Execution againſt them; for which, the Papiſts load his Memory with Reproaches. After the Murther of *John Huſs* and *Jerome* of *Prague*, againſt which the *Bohemians* proteſted, moſt of 'em embrac'd their Doctrine; ſo that they became formidable to the King, and were perſecuted. But their Diſperſion tended to the Propagation of the Goſpel elſewhere, and one of them, called *Paul Craw*, was burnt in *Scotland* for oppoſing the Errors of Popery in 1432, which laid the Foundation of a Reformation there. The *Bohemians* reveng'd the Death of their two Martyrs, *Huſs* and *Prague*, on the Popiſh Clergy; and the Univerſity of *Prague* aſſerted Communion in both Kinds. After the Death of *Wenceſlaus* in 1319, Pope *Martin* V. excommunicated the *Huſſites*, and ſtir'd up the Emperor, with other Kings and Princes, to rout them out; Upon which the Emperor *Sigiſmond* began a terrible Perſecution againſt them, that iſſued in a 14 Years War, which terribly afflicted *Bohemia*, and moſt of the Empire. The *Huſſites* choſe *Ziſca*, a valiant Lord, for their General, who became terrible to the Emperor and his Papiſts. He rais'd 40000 Proteſtants, as we are told in his Life. His firſt Appearance was in the Reign of *Wenceſlaus*, who purpoſing to diſarm the Citizens of *Prague*, *Ziſca* preſently order'd them to take Arms, and marching to the Caſtle on a ſudden, to the King's great Surpriſe, ſaid to him, *Sir! where are your Enemies that you are ſo much afraid of? for here your loyal Citizens of* Prague *are come to offer their Lives in your Service.* By this Stratagem, he appeaſed the King, and preſerved the Privileges of the City. After the Death of *Huſs* and *Prague*, *Ziſca*, with his Army above-mention'd, deſtroy'd the Popiſh Monaſteries, and Idolatrous Temples, and diſpers'd the Prieſts and Monks, whom he compar'd to Swine that were kept in a Sty to be fatted. He afterwards took the Caſtle of *Wiſgrad*, and the Town of *Pelzina*, which he fortified. The Queen Dowager ſent to the Emperor and neighbouring Princes for Aſſiſtance, and in the mean time retir'd with her Treaſury and beſt Moveables to the Caſtle of *Prague*, and fortified the Bridge, to keep the Proteſtants from entring the upper Town. *Ziſca* won the Bridge, and the nether Part of the City, and fought with the Papiſts for 5 Days and Nights together; during which, Ambaſſadors came from the Emperor *Sigiſmond*, who brought them to a Truce, and afterwards to a Peace, on Promiſe of ſettling the Differences among them; but fraudulently enda-

Digitized by Google

deavour'd afterwards the Subverſion of their Religion and Liberty, and began a Perſecution at *Breſlaw* in *Sileſia*, where he put many *Huſſites* to cruel Deaths. Upon this, *Ziſca* took Arms again, and having gain'd the Governor of the Caſtle of *Prague*, he ſent Letters through the Kingdom, adviſing the People to arm againſt the Emperor, who deſign'd the Deſtruction of their Country, as was plain from his Letters they had intercepted; had ſet aſide the Marq. of *Brandenburg*, whom they had choſen King, and procur'd the Death of their two Martyrs at *Conſtance*, contrary to his own Safe-Conduct. The Emperor advanc'd againſt him with a great Army of Horſe, and *Ziſca*'s Men being all Foot, he encamp'd on a rough Ground, where the Imperial Horſe were forced to alight; and *Ziſca* having order'd the Women that followed his Army to throw their Handkerchiefs, and other looſe Clothes, on the Ground, and his Men to do the like, the Imperial Horſemen being entangled with them by their Spurs when they alighted on the Place, he ſuddenly attack'd them, and obtain'd a great Victory. After this he took a Town by Storm, from whence the Governor had drove out all the Proteſtants, burnt it down, and built another called *Tabor*, on a Mountain of that Name, which was ſtrong by Nature, and encompaſſed by two Rivers, the Entrance to it being ſcarce 30 Foot broad. He fortified it with a deep Trench, and a triple Wall; and from hence his Followers were called *Taborites*. At this Time *Ziſca* had no Horſe, but ſurpris'd by Night 1000 of the Emperor's, who were ſent againſt him, by which, with the Horſemen's Armour, he mounted 1000 of his own Men, that did him great Service afterwards. *Sigiſmund* enter'd *Bohemia*, and laid Siege to the Caſtle of *Prague*, which the Governor baſely deliver'd to him. Upon this, *Ziſca* came to the City, and block'd up the Caſtle; but the Emperor coming again with his Army, reliev'd it, and beſieg'd the Town for 6 Weeks; but after the Defeat of ſeveral ſtrong Detachments by *Ziſca*, the Emperor was forced to raiſe the Siege, and *Ziſca* return'd to *Tabor*. After this, he reveng'd himſelf on the Popiſh Clergy, who excited the Emperor againſt him, and had put great Numbers of Proteſtants to terrible Deaths, by deſtroying 300 of their Monaſteries, and driving out all the Monks. The Caſtle of *Wiſgrad* having been ſurrender'd to the Imperialiſts, *Ziſca* laid Siege to it, defeated the Emperor, who came to relieve it, and forced it to yield. Next he laid Siege to the ſtrong Monaſtery of St. *Clare*, and forc'd the Emperor, who came with a ſtrong Army to relieve it, to a ſhameful Retreat out of *Bohemia*. *Ziſca* afterwards took the ſtrong City of *Commitavia* by Storm, and burnt all the Prieſts, as they had formerly done the Proteſtants. At the Siege of *Raby*, *Ziſca* loſt his Eyes; but when cur'd of his Wounds, continued to command his Army, and took many of the Emperor's Gariſons. Upon this, the Emperor enter'd the Country with an Army of *Hungarians* on the E. and appointed the Electors to enter it on the W. but *Ziſca* defeated them both when join'd, forc'd the Emperor to fly, purſu'd him a whole Day; and 15000 *Hungarian* Horſe, whom the Emperor brought to his Aſſiſtance, fled with ſo much Precipitation, that moſt of 'em were drown'd by venturing to paſs a great River on the Ice. After this Victory, wherein many of the *Hungarian* Nobility were cut off, *Ziſca* order'd all the Popiſh Idols in the Country to be deſtroy'd, and forbad the Prieſts to wear any ſuperſtitious Veſtments. He built another ſtrong Town on a Mountain called *Horeb*, from whence many of his Followers were called *Horebites*. The Papiſts finding there was no other Way of ſubduing the *Huſſites*, they ſow'd Diviſions betwixt them; of which, more anon. In the mean time *Ziſca* laid Siege to the Town of *Aſca* on the *Elb*, where there was a ſtrong Gariſon, and defeated the Marq. of *Miſnia*, who came with a ſtrong Army to relieve it. He ſlew many of the Nobles, and 9000 of the Popiſh Soldiers; upon which *Aſca* ſurrender'd, and was raz'd. After this, the Diviſions being fomented by the Papiſts betwixt *Ziſca* and the Citizens of *Prague*, they rais'd a great Army againſt him, which oblig'd him to retire into a narrow Plain, where they not being able to extend their Front any larger than his, he fought and defeated 'em, kill'd 3000 on the Spot, took and burnt the City of *Cuthna*, which they had fortified, and marched to beſiege *Prague*, when his Army

Digitized by Google

Army began to murmur, and ſaid, It was unreaſonable to deſtroy their Chief City, eſpecially ſince the Citizens were of the ſame Religion, and that the Emperor fomented their Diviſions in order to deſtroy both. Upon this, *Ziſca* made a Speech to his Army, wherein he told them, That he fought for their Sakes, and not for his own; That he never led them on, but where they came off Conquerors; That they were become famous and rich; whereas he had got nothing but Blindneſs, and an empty Name; That he did not fight againſt thoſe of *Prague* for his own Sake, but for theirs, whoſe Blood they fought; That he had no other Deſign but to baniſh the ſeditious Citizens of the Emperor's Faction; but for his Part, he was willing to do what they pleas'd, provided they took Care that they themſelves were not betray'd; and that for his own Part, it ſignify'd little what became of him, a blind old Man. Upon which his Soldiers were ſo much inflam'd, that they prepared to attack the City; but this Difference was happily concluded by *Rokezana*, a famous Miniſter of the City, who reconcil'd *Ziſca* and the Town.

The Emperor being aſtoniſh'd at *Ziſca*'s Succeſs, ſent to promiſe him the Government of the Kingdom, and many other Advantages, if he would come to him, which *Ziſca* agreed to; and ſome ſay, was in Danger of being flatter'd by the Emperor to join with the *Calixtines*, who only demanded the Uſe of the Cup, but in moſt other Things agreed with the Papiſts, againſt his own Followers the *Taborites*, the true Diſciples of *Huſs*, who inſiſted on a full Reformation: But theſe Fears, if there were any Ground for them, *Spanheim* tells us were prevented by *Ziſca*'s dying of the Plague at the Caſtle of *Priſſovia*, in his Way to the Emperor, in 1424. *Æneas Sylvius*, afterwards Pope, makes a heavy Complaint, That the Emperor, who was terrible to all *Chriſtendom*, and to the *Turks*, ſhould have ſo far diſgrac'd himſelf, and the Church of *Rome*, to have truckled ſo to a blind old Man. *Ziſca* was honourably buried by his *Taborites* at *Caſtovia*, where his Tomb continu'd till 1623, that the Popiſh Army under the Emperor *Frederick* broke it in Pieces, dug up his Grave, and barbarouſly threw his Duſt in the Air. When he was on his Death-Bed, he adviſ'd his Followers to make a Drum of his Skin, the Sound of which would terrify their Enemies, which proved ſo in effect for a conſiderable Time, which muſt be aſcribed to the Pannick Fear that God, in his Juſtice, ſpread among thoſe cruel Perſecutors.

Spanheim informs us, That after his Death, a new Diviſion happen'd among the *Huſſites*, when thoſe of *Ziſca*'s Followers, who call'd themſelves *Orphans*, becauſe of his Death, propoſed a middle Way betwixt the *Calixtines* and the *Taborites*. Their chief Leader was *Rokizanus*, whom the Pope flatter'd with Hopes of the Archbiſhoprick of *Prague*; but afterwards refus'd it him, becauſe he would not renounce the Cup. Upon this the Emperor and Pope had recourſe to Fraud, and invited the *Bohemians* to ſend Deputies to the Council of *Baſil* in 1431; when being deceived with falſe Promiſes, and having Hoſtages given for their Safety, they went thither with 300 Horſe. The *Calixtines*, headed by *Rokizanus*, demanded the Reſtitution of the Cup. The *Taborites*, led by the invincible *Procopius*, inſiſted on a Reformation of Manners, and of all Corruptions in the Church. The *Orphans* demanded free Liberty for preaching the Word of God. *Peter Payne*, an *Engliſh Wickliffite*, who join'd the *Huſſites*, demanded that the Clergy ſhould be forbid all Secular Dominion. Theſe were the Articles call'd the *Compactata*, ſo famous in the *Bohemian* Hiſtory, as agreed upon by the *Huſſites* among themſelves before they went to the Council. When they came thither, theſe Things were debated 50 Days, when the *Bohemians*, finding themſelves impos'd upon, prepar'd to depart; but were circumvented by a new Fraud. The Council ſent Meſſengers to *Bohemia*, who deceived the *Huſſites* with School Subtilties; and thus the good *Taborites* were diſappointed of their Hopes, and obtained nothing elſe but the Uſe of the Cup, which *Rokizanus* and his Party alledg'd was ſufficient: And ſo a Peace was concluded with the *Huſſites* for a Time, which proved more fatal to them than the War. *Orthicinus Gratius in faſciculo rerum expetendarum* gives a large Account of all thoſe Tranſactions.

This

This Agreement was oppos'd by *Procopius* and his Party, who maintain'd themſelves bravely by the Sword againſt their Enemies; but *Rokizanus*, puſh'd on with the Hopes of the Archbiſhoprick, perſecuted them ſeverely, and ſtir'd up *Mainard*, a valiant *Bohemian* Lord and General, againſt them, who envying the Honour *Procopius* had obtain'd, attack'd him with the *Taborites* and *Orphans* that join'd him; and being much ſuperior in Force, *Procopius* fell in the Battle, being not ſo much conquer'd, as weary with conquering, ſays *Æneas Sylvius*. Thus the *Taborites* were almoſt extinguiſh'd in a barbarous manner, the Papiſts and *Calixtines*, thô they hated one another, joining together to perſecute them. The Remainders of them continued ſome Time in the City of *Tabor*, and declined the Communion of the other *Bohemians*; but they were betray'd at laſt by *Rokizanus* to ſubmit to a Decree of the States: After which their Town was beſieg'd, and taken by the Viceroy *Podiebrachius*, and the poor People condemn'd to perpetual Impriſonment. *Rokizanus* being wearied at laſt with the juſt Reproaches of the *Taborites*, obtained Leave of the Viceroy that they might retire into the Mountainous Country next to *Sileſia*, where they were join'd by the ſincerer *Calixtines*, and the *Waldenſes*, who were expelled from *Auſtria* about 1467, and form'd, as *Hoffman* ſays, about 200 Congregations in *Bohemia* and *Moravia*. But *Rokizanus* and the Viceroy rais'd a new Perſecution againſt them, loaded 'em with the ſame Reproaches that the Heathens rais'd againſt the Primitive Chriſtians, and forc'd them to retire to Caves and Dens. *Rokizanus* being deny'd the Archbiſhoprick, becauſe he would not part with the Cup, he and his Followers exclaim'd againſt the Pope as Antichriſt, and declar'd they would not ſtand to the Agreement they made at *Baſil*, but have the Word of God for their only Rule. At laſt, falling ſick in 1461, he was ſtruck with Remorſe of Conſcience, and told the Viceroy when he came to ſee him, That both of them muſt anſwer in a little Time at the Tribunal of God for their Cruelty to their Brethren. Accordingly they both died the ſame Year, and *Rokizanus* ended his Days in Deſpair. The *Huſſites* having join'd with the *Waldenſes*, that Name ſwallow'd up the former. In 1500, they were cruelly perſecuted; and in 1536, when *Luther* began to appear, there was found to be a great Harmony betwixt him and them in Doctrine and Diſcipline. The Emperor *Maximilian* gave them their Liberty in 1564; but next Year they were perſecuted again by the Chancellor of *Bohemia*, who was drown'd in the *Danube* on his Return from *Vienna* with bloody Orders againſt them. In 1574, the *Waldenſes* being expell'd from *Pruſſia*, retir'd to *Bohemia*, in which, together with *Moravia*, there were 17 Barons and 146 Knights of their Communion. To confute the Reproaches of their Enemies, they drew up their Confeſſion, and preſented it to the Emperor *Maximilian* in 1575, which had a good Effect, and procur'd 'em Peace. They were afterwards call'd, *The United Brethren of the* Bohemian *Confeſſion*, and their Liberty was confirmed by the Emperor *Rodolph* II. in 1611. During the Reign of *Matthias*, the Perſecution gave Riſe to the *Bohemian* War in 1618. But the Elector *Palatine*, whom they had choſen King, being defeated in 1620, they were brought under, and at laſt baniſh'd the Kingdom in 1639, and diſpers'd into *Sileſia*, *Poland*, &c. Since which, the Proteſtants have been allow'd no Publick Worſhip in *Bohemia*.

Their Confeſſion preſented to the Emperor at *Vienna* in 1535, agrees in Point of Doctrine with thoſe of other Proteſtants. It was afterwards approved by *Vergerius*, *Luther*, *Melanction*, *Bucer*, and *Muſculus*, who highly applauded it. In the Preface to their Confeſſion, they take Notice of their Sufferings and Reproaches, and of their Struggles with the Papiſts from the Time of *John Huſs*; and mention a Prophecy of his, printed in *Matthew Paris*'s Hiſtory, foretelling that a new People ſhould ariſe, fram'd according to the new Man, from whom ſhould proceed a new Clergy and Prieſthood, that hated Avarice and Worldly Glory, and had their Converſation in Heaven. To this there is added a Preface of their Nobility and Gentry, wherein they take Notice, that they were called *Picardi* and *Waldenſes* by way of Deriſion.

In their Article of the Church, they ſay, The true Church is to be known by the Preaching of the Word, and the Adminiſtration of the Sacraments according to

Christ's Prescription. In that concerning the Governors and Ministers of the Church, they declare for Ordination by Imposition of Hands, and the Authority of Ministers; That they allow no Man to take that Office upon him, but such as are duly called, whose Business is to take Care of the People committed to their Charge, faithfully to preach the Word, and administer the Sacraments; That they have no Power to compel any Man to embrace the Faith by Punishment, Violence, or Threats, by themselves or others; That they are not to Lord it over the Church or the People's Faith, and quote the 20th of St. *Matthew*, *Ye know that the Lords of the Gentiles exercise Dominion over them*, &c. *but it shall not be so among you*, &c. They declare against Priests meddling with Secular Affairs, and think it convenient they should be unmarried; but not that 'tis of it self unlawful, since the Apostles approv'd it; and say, the People ought to be subject to them, obey them, and be directed by them in Things relating to Salvation, according to those Scriptures, *Heb.* 13. 17. *Obey them that have the Rule over you, and submit your selves, for they watch for your Souls. And the Elders that rule well, are worthy of double Honour, especially they that labour in the Word and Doctrine.* They add, That the People are oblig'd to provide for them; but that such as are able to work with their own Hands, ought to get their own Livelihood, if it do not hinder their Work of the Ministry, according to the Example of the Apostle; and that such Priests or Ministers as are guilty of Crimes or Errors, or negligent in their Office, are first to have a Fatherly Admonition; but if they despise the Advice of the Brethren, and of the whole Church, they are first to be deprived of their Office, and then to be thrown out of the Church.

In the Article of Baptism, they own, That they formerly re-baptiz'd those who were converted to them from Popery, as the Papists did such as they perverted from them; but upon better Information, they had laid that aside. As to the Sacrament of the Lord's Supper, they taught, That no Man ought to add any Thing to our Saviour's own Words in the Institution, nor detract any Thing from them; but is plainly to believe what our Saviour has said, without going to the Right or Left; for which, they take Notice they had undergone many Reproaches.

In the Article about the Power of the Church, or the Keys, they say, That when Christ gave them to *Peter*, he gave them to the Church and her Ministers, to continue to the End of the World; That this Authority is to be used according to our Saviour's Command, not at our own Will and Pleasure, but as Stewards of the Mysteries of God, and Ministers and Servants of Christ; That this Power is first given to the Governors and Ministers of the Church in general, and to every Christian Congregation in particular, how small soever, according to that of our Saviour; *Wheresoever two or three are gathered together in my Name, there am I in the midst of them.*

They declare themselves for such Rites and Customs as are not contrary to Piety; but are against obtruding such as may prejudice Religion, or make Differences among Christians, who ought to bear charitably with one another, as Members of the same Body.

In the Conclusion, they acquaint the Emperor, That these were the Articles, which all their Elders did unanimously agree to.

In *April*, 1570, they came to an Agreement with their Brethren of the *Augsburg* Confession at the Synods of *Sendomir* and *Posen* in *Poland*, which consisted of 20 Articles: The chief of which were, That the Ministers of both Sides should use their own Methods and Forms of Worship, without Offence, either separately or together; That none should be employed by the Patron to preach or administer the Sacraments in the Congregations of another, without his Consent; That the Ministers of neither Side should withdraw one another's Hearers, but confirm them in their Obedience to their own Pastors; That none of the Ministers or People should speak or write ill of those of either of the Confessions, or condemn their Doctrine and Rites, but think and speak well of one another; That Elders should be appointed on both Sides to promote this Union, and to take Care of other Affairs of the Churches, and to meet for that End twice or thrice a Year at a Place appointed; That no particular Societies or Ministers should meddle to change any Thing

Digitized by Google

Thing in Doctrine, Rites, or Benefices, without the Conſent of the Miniſters of their own Confeſſion; That they ſhould all agree to preach up Piety againſt Idolatry, and all manner of Vice, and that Diſcipline ſhould be exerciſed againſt faulty Miniſters, and others, without reſpect of Perſons; That none of them ſhould admit the Members of other Congregations to the Sacrament, without a Certificate from their own Miniſters, except at Diets, Synods, or on a Journey; That none of them ſhould receive excommunicated Miniſters or People into Communion; That Patrons ſhould not make any Innovation in their Worſhip, without Conſent of the Senior Miniſters; That they ſhould reject all Popiſh Rites, Idolatrous Images, Relicks, Croſſes of Silver and Gold, &c. leſt they ſhould ſeem to ſupport Antichriſt, and prophane the Word of God; That in caſe of any Controverſy about Doctrine or Ceremonies, they were to endeavour peaceably to compromiſe them among themſelves; and if they could not do that, ſhould ſubmit to the General Synods of *Greater* and *Leſſer Poland*.

This was ſign'd by the Superintendants, Miniſters and Elders, of the ſeveral Churches; many of the Elders being Counts, and other Perſons of great Quality.

The *Bohemian* Brethren did afterwards, in their Agreement with the Churches of *Poland*, *Switzerland*, and thoſe of the *Augſburg* Confeſſion, declare themſelves more expreſly againſt Tranſubſtantiation.

The Government of thoſe Churches,

WAS managed by Superintendants, Miniſters, and Elders.

Their Superintendant, as we find in that Part of the Harmony of Confeſſions, Intitled, *Polonia Conſenſus*, was called a Spiritual Elder or Superintendant. He was choſen from among the Miniſters of the Diſtrict by the Miniſters and Elders of that Diſtrict in a Synod; and when they could have it ſo, the Superintendant of the neighbouring Diſtrict was to preſide at his Inauguration

His Office was, to perform the Miniſterial Function in a certain Cure; to breed up a Catechiſt at the publick Expence, to perform the Work of the Miniſtry in his Abſence, when viſiting the Churches, or attending Synods. He was to appoint Miniſters where it was neceſſary in his Diſtrict. He was once a Year at leaſt, with one or two Elders or Deacons, to viſit the Miniſters and People in his Diſtrict, and to take Care that no Falſe or Heretical Doctrine was preached among them. He was to attend when call'd to the Synods of other Diſtricts, at the publick Charge. He was, at ſtated Times, to call Synods in his own Diſtrict for neceſſary Cauſes, and to direct them in their Proceedings. He was to determine Differences among Brethren in the Conſiſtory, and to reconcile them; but with a Salvo to the Laws of the Country. He was to examine and to take Care of Catechiſts, and young Men that were fit for the Miniſtry. He was to receive Letters from other Churches, &c. directed to thoſe of his Dioceſe; and in difficult Caſes, was to return an Anſwer, by the Advice of the Miniſters and Elders, and the reſt of the Brethren. His Office was to la[ſt] ..m Synod to Synod, and to be continu'd, or diſcharg'd, or ſucceeded by another, as they ſhould determine.

The Miniſters were not to enter upon that Office but when ordain'd, and ſent by the Superintendant and Miniſters of the Diſtrict; nor were they to leave their Charge, without the Conſent of the Synod, and their Patrons. No Patron, by his private Authority, was to receive or diſcharge a Miniſter, but was to propoſe it to the Conſiſtory of Elders; and none were to publiſh Books in Writing or Print, without Conſent of the Synod.

The Elders, whom they call'd Secular, were for moſt part Perſons of Quality, and were choſen two or three in a Diſtrict by the free Suffrage of all the Miniſters and Patrons, and afterwards inaugurated by the Superintendant and ſome Miniſters. The Synod and Church charg'd them upon their Conſcience, That they ſhould carefully look after the Miniſters, that they preach'd orthodoxly, faithfully, and diligently; That they liv'd piouſly and modeſtly; That if any of them were guilty of Error or Scandal, they ſhould admoniſh them; and in caſe of enormous Crimes, were to ſuſpend them from the Miniſtry, with the Conſent

Digitized by Google

of the Superintendant, till the next Synod. They were likewise to observe the same Method towards every one of the Brethren that was guilty of any Fault, according to the Rules of their Ecclesiastical Discipline. They were to attend at Synods, and to join with the Superintendant in visiting Churches. They were likewise to take Care, by diligent Admonitions, That the Revenues of the Church should be restored; That the Ministers should have a convenient Maintenance and Dwelling, and to defend him from Injury and Oppression. They were likewise to see the Acts of Synods put in Execution, to accommodate Differences among the Brethren, and to continue in Office from one Synod to another, and be discharged or continued, as the Synod thought fit. The Synods were of two Sorts; one of them, call'd a Particular Synod, was held four times a Year; and that call'd the Synod of the District, once a Year. At several of these Synods, we find many of the great Officers of the Crown, and Senators of the Kingdom, attended as Elders.

The Description of the Country.

THE Soil is generally fat and arable, and in few Places barren or sandy. They have many Woods and Forrests, but none so large as to make any considerable Part of the Country uninhabitable. Their Orchards and Gardens are so well stock'd with Fruit, that they export great Quantities to neighbouring Countries, as they do also Saffron. *La Forrest* says, their Grapes do not come to Maturity, which is a Mistake; for they might have enough of Wine for their own Use, stronger than that of *Moravia*, and equal in Taste to that of *Austria*, were the Inhabitants industrious; but it does not keep so long; therefore they buy much from their Neighbours at a reasonable Price. They have abundance of good Meadows and Pasture, and Cattle, especially Horses, of more than ordinary Courage and Bulk. Their Hop-Gardens produce more plentifully than in many other Countries; and their White and Brown Beer is so much valued, that 'tis exported into other Parts of the Empire. They have some Salt-Pits, but the Product not answering the Charge, they are supplied from *Misnia* and other Places. They have rich Mines of Silver, Copper, Tin, Iron, Lead, Sulphur, Nitre, *&c.* and make great Quantities of Glass and Allum, Carbuncles, Amethysts, Jasper, Sapphire. And other Precious Stones are found in their Mines and other Places; of which *Anselm Boetius* has given an Account, call'd, *Historia Lapidum & Gemmarum Bohemiæ*. *La Forrest* says, tho' the Air of this Country be very cold, yet in some Places 'tis so bad as to occasion contagious Distempers. His Character of the Inhabitants is, That they are large, well made, subtle, and courageous, true to their Word, but much addicted to Gluttony, Drunkenness, and Robbery; which, tho' it may be true of many, must not be charged on them in general, being inconsistent with his former Part of their Character.

Their Language is a Dialect of the ancient *Sclavonick*, which was so copious and sweet, that their old Law-givers commanded its true Orthography and Pronunciation to be kept up; but now most People of Fashion speak the *High-Dutch*, with which the Country People have mix'd their own Language.

Their chief Towns are,

1. *Prague*, their Metropolis, pleasantly situated on the great River *Muldaw*, in a fruitful Country, encompassed with stately Courts, and pleasant Palaces, as if it were in the middle of an Amphitheatre. The ancient Name of it, before the *Bohemians* settled here, is not certainly known; but they call'd it *Boiobeim*, as being their Capital. It had the modern Name from the *Sclavonians*. 'Tis divided into 3 Parts, called the *Old*, *New*, and *Little City*. *Æneas Sylvius* compares it to *Florence* in *Italy*; but Dr. *Brown* says, 'tis more large and populous. The Old Town, on the E. of the *Muldaw*, is very populous, and full of fair, but old-fashion'd Houses. Here stands the University, frequented by vast Numbers of Students, but not comparable to what it was in former Ages; for if we may believe *Lewis de May*, Counsellor to the Duke of *Wirtemberg*, and Author of the Dialogue concerning the State of the *German* Empire, there were above 40000 Students there

Digitized by Google

there in 1409, when *John Huss* was Rector: And when the Emperor *Charles* IV. would have retrench'd their Privileges, 24000 are said to have left it in one Week, and 16000 more soon after. Here are also several Colleges and Monasteries, one belonging to the Jesuits, which is very magnificent and stately. This is the only University in *Bohemia*, and still one of the most famous in *Europe*. Great Numbers of *Jews* inhabit this Part of the City, and give it the Name of the *Jews Town*. They are very rich, and trade in all Sorts of Commodities, especially in Jewels, and other Precious Stones, found in the *Bohemian* Mines. The Doctor says, he bought some *Bohemian* Topazes from them, very well cut, at 7 or 8 Crowns a-piece. He takes Notice, That the *Bohemians* do still keep Silver Medals, in Remembrance of those great Men, *John Huss* and *Jerome* of *Prague*. Others observe, That on one of *Huss*'s Medals, there is engraven his Prophecy at the Stake, in these Words; *Centum revolutis Annis Deo respondebitis & mihi*; *i. e.* 100 Years hence, ye shall answer for this to God and me; which was reckoned to be fulfilled upon the Church of *Rome* by *Luther*'s Reformation. *Æneas Sylvius*, afterwards Pope *Pius* II. says, That *Huss* was elder, and of greater Authority, but *Jerome* more learned and eloquent; That they sac'd Death with unparallel'd Constancy, beyond any of the ancient Philosophers, and sung Hymns in the midst of the Flames.

The New Town was formerly separated from the Old by a Wall, but now only by a Ditch, into which they can let the River at Pleasure. Here are the Ruins of the ancient Palace of their Kings, the Walls of which are so cemented, that they can scarce be demolished by any Engine. The Jesuits have built a College here, which much exceeds what they had in the Old Town. Dr. *Brown* says, this Town is of a very large Extent, and that they were building a Citadel and some Bastions for the Defence of it. *Monconys* says, the Jesuits College and Church is of excellent Architecture; and over the Gate, there are 13 Statues of Men as large as the Life, of a Stone which resembles Brass.

The Lesser Town lies on the W. of the *Muldaw*, and much exceeds the Old in Pleasantness and Building. 'Tis joined to the Old Town by a Bridge of 16 Arches, being in all 1700 Foot long, and 35 broad, with two high Gates, under two large Towers at each End. Part of this Town is built on a rising Ground, at the Top of which stands *Upper Prague*, where the Emperor has a Summer-House, and a very magnificent Palace, where he keeps his Court when he comes to *Prague*. Here stands also the Cathedral of *St. Veit*, which has many ancient Monuments of great Persons. Here are likewise most of the Houses of the Nobility; among which, the Palace of *Colorado* and its Gardens excel for Neatness, but are not very large. The Palace of Count *Wallenstein*, afterwards Duke of *Fridland*, but cut off for his Treason when General of the Emperor's Army, is a very magnificent Structure, above 100 Houses being pulled down to make room for it. The Hall is very lofty and spacious, and the Garden exceeding beautiful; on one Side of which, there's the Place where they us'd to manage his Horses, with a noble Fish Pond: On the other Side, his Aviary, beautified with Trees, and a Garden, after the Model of that of Prince *Doria* at *Genoa*. The most surprising Thing, is his large Stable for 36 Horses, of fine Architecture, with a Marble Pillar betwixt each Horse, a Rack of Steel and a Marble Manger for each of them; and over their Head, the Picture of every Horse, as large as the Life, and his Name under it. In the Town-House, there is a famous Clock with several Motions, like that of St. *John* at *Lyons*; and in the Market-place, there is a great Stone Column, with a Statue of the Virgin on the Top of gilt Brass, and 4 Angels at the Corners, holding 4 Devils in Chains. Near it, there is a great Fountain with 12 Fronts, but ruinous; the Bason is of red Marble, which resembles Porphyry at a distance: The 12 Signs of the Zodiac are engraven round it, and in the middle there's a Figure on a Pedestal. *Monconys* says, *Prague* is about as large as *Lyons*; That the Women of Quality dress much after the *French* Mode: The other Women of the better Sort wear Furr'd Caps, like the *Grecian* Women, long Cloaks with large Necks, some of them of Sattin lin'd with Taffata, and Petticoats of the same, but most,

Digitized by Google

ſhort, becauſe the Streets are dirty. The *Jewiſh* Women have a diſtinct Habit; the Shops are very ill furniſh'd, and the Town looks poor. In the Palace, he ſays, there's a multitude of Apartments, with a large Hall for Comedies, ſupported in the middle by Columns, plaiſter'd in Imitation of Marble, with two long Galleries, and another great Hall, beſides ſeveral Cloſets full of Pictures by the beſt Maſters; and adjoining to it, there's a large Stable, where are 60 fine Led-Horſes, belonging to the Burgrave of the City, who is the Governor of the Kingdom. The Jeſuits College in the Old Town near the Bridge was founded by the Emperor *Ferdinand*, for 100 of that Order; from the Belfrey of which, there is the beſt View of the City.

Bandrand ſays, This Town was taken ſeveral times during the Civil Wars of *Germany*; and Dr. *Brown* ſays, That the Leſſer Town was ſurpris'd by the *Swedes*, who carried off from it an incredible Booty. It was formerly an Imperial Town, but is now ſubject to the Emperor as King of *Bohemia*. The Caſtle on the Hill above it is very ſtrong. The Emperor's Deputies were thrown out of its Windows by the enraged States of the Kingdom, whom they had deprived of their Privileges, and received but little Hurt, tho' they fell very high: In Remembrance of which, there is a Pyramid erected on the Place.

On the white Hill near this City, the 8th of *November*, 1620 was fought the famous Battle betwixt *Maximilian* Duke of *Bavaria*, and *Frederick* V. Elector *Palatine*, formerly mention'd, wherein the Elector being defeated, loſt the Kingdom of *Bohemia*, and his own Electorate: After which, this City ſuffer'd much, and many *Bohemian* Proteſtants of Quality, who took Part with him, were executed, and Thouſands of Families left the Country. This City lies in Long. 33. 17. Lat. 50. 7. about 45 Miles S. E. from the Frontiers of *Saxony*, about 63 N. W. from the Frontiers of *Sileſia*, near 80 N. from the Frontiers of *Auſtria*, and about 130 Miles N. W. from *Vienna*.

2. *Egra*, on a River of the ſame Name, on the Borders of the *Palatinate*, about 77 Miles W. from *Prague*. The *Bohemians* call it *Schebbe*. *Frederick* I. made it an Imperial Town in 1179, for their Faithfulneſs to him againſt the Duke of *Bavaria*. 'Tis fortified with a double, and in ſome Parts with a treble Wall, and a very ſtrong Caſtle. The Market-place is encompaſs'd with fair Buildings, and has fine Churches. Here the Emperor *Frederick* II.'s treacherous General, Count *Wallenſtein*, was kill'd in 1634. This Town is Capital of its Circle, and formerly belong'd to the *Upper Palatinate*. About 2 Miles from the Town, there is a Fountain, whoſe Water is very cool and clear, but ſalt and briniſh, famous for Diſtempers in the Eyes, Ears, or other Parts of the Head, and many other Cures by Purging.

3. *Budweiſs*, or *Budweiſs*, near the *Moldaw*, 62 Miles S. from *Prague*. 'Tis one of the ſtrongeſt Towns in *Bohemia*, Capital of its Circle, a fair large Town, continu'd faithful to the Houſe of *Auſtria* during the *Bohemian* Troubles, and lies about 17 Miles N. from *Auſtria*.

4. *Kuttenberg*, or *Hora*, about 30 Miles E. from *Prague*, according to *Sanſon*, a conſiderable Town, chief of its Circle, and noted for the Silver and Copper Mines in its Neighbourhood. Dr. *Brown* ſays, 'tis but 12 Miles from *Prague*. It lies near the *Elb*, and has 30 ſeveral Mines in the Neighbourhood, which were diſcovered by a Monk, who found a Silver Tree there. The firſt is that call'd the *Cuttenhill*, which is 19 Fathom deep. The chief Vein is about a Foot broad, and contains both Silver and Copper: Of the firſt, 100 Weight yields about an Ounce; and of the latter, 8, 9, 10, or more; and 100 of ſome Ore, he ſays, yields 8 or 9 Ounces of Silver; and when they meet with a blue Earth, they take it for a Sign of good Ore.

5. *Czaſlaw*, the Chief of its Circle, about 37 Miles S. E. from *Prague*. Here the famous *Ziſca* was buried.

6. *Janikaw*, a Town famous for the Defeat of the Imperialiſts by the *Swedes* in 1643. The former had the Advantage at firſt; but loſt it by falling a plundering too ſoon. It lies about 12 Miles S. E. from *Czaſlaw*, and 48 from *Prague*.

7. *Koningratz*, about 45 Miles N. E. from *Prague*, on the *Elb*, a Biſhop's See, Suffragan to *Prague*, erected in 1664. 'Tis the Chief of its Circle, and a pretty large Town. 'Tis called in Latin Authors, *Gradium-Regina*, or *Regina Graditium*.

8. *Glatz*,

8. *Glatz*, about 80 Miles N. E from *Prague*. We have mention'd the Town already in the Deſcription of *Sileſia*, of which ſome Authors make it a Part. We ſhall only add, That 'tis Capital of its Circle, is defended by a good Caſtle; and the Country to which it gives Name, contains 9 great Towns, and 100 Villages.

9. *Elnebogen*, a ſtrong Town on the River *Eger*, 5 Miles N. E. from *Egra*, and 65 W. from *Prague*, near the Frontiers of *Miſnia*, and reckon'd one of the Keys of *Bohemia*, which opens their Paſſage into the Empire. About 5 Miles E. from this Town lies *Carolsbad*, noted for its Baths and Medicinal Waters.

10. *Pilſen*, about 40 Miles S. W. from *Prague*, a large, ſtrong, and well fortified City, on the Conflux of two ſmall Rivers. It is the Chief of its Circle, was beſieged in vain by the *Huſſites* in the 15th Century; but was taken by Count *Mansfeld* in the Civil Wars of *Germany*, and was the laſt that yielded to the Imperialiſts. Some reckon it the ſecond Town of the Kingdom. The Market-place is ſpacious, has 4 or 5 Streets that center in it, the Houſes are well built, and they have two fine Churches. The Country belonging to it is one of the moſt fruitful in *Bohemia*.

11. *Tabor*, on the River *Luſnick*. It was built and fortified by the *Huſſites*, lies 42 Miles E. from *Prague*, is very ſtrong, by its Situation on the Conflux of two Rivers; but is now only a ſmall Town with a Caſtle.

12. *Kaurſin*, or *Kartſtin*, about 14 Miles S W. from *Prague*, and the Chief of its Circle.

13. *Bohimiſchbroda*, a ſmall Town, ruin'd by the Civil Wars of *Germany*, 20 Miles S. E. from *Prague*.

14. *Leitomeritz*, on the *Elb*, about 31 Miles N. W. from *Prague*, a very rich Town, erected into a Biſhoprick, Suffragan of *Prague* in 1655.

15. *Satz*, or *Zinteck*, on the *Eger*, 37 Miles N. W. from *Prague*, a ſtrong and populous Town, and Chief of its Circle.

16. *Colen*, a ſmall City on the ſame River, noted for its excellent Beer.

17. *Carlſtein*, a Fortreſs, ſo call'd from the Emperor *Charles* IV. who founded it. Here the *Regalia* of the Kingdom are kept. It lies about 8 Miles S. W. from *Prague*, and ſeems to be the ſame with *Kaurſin*, formerly mention'd, the Chief of its Circle; ſo that *La Forreſt* is in a Miſtake to make them two.

Other Towns in this Country are, *Eutomiſtel*, a Biſhop's See; *Bechyn*, on the *Lauſnick*, a very ancient Town; *Chrudin*, near the Fountains of the *Elb*; *Boleſlaw* the Ancient, on the *Gizer*; *Schlany*, *Rakonick*, *Berown*, *Sedlezany*, *Piſeck*; all Chief of their Circles, but noted for little elſe.

The Circle of AUSTRIA.

FOR the Countries included in this Circle, we refer to the *Matricula*, and begin with

The Arch-Dutchy of AUSTRIA.

THE *Germans* call it *Oeſtereich*, and Latin Authors *Auſtria* or *Auſtraſia*, ſo called by the *Francenians* and *Bavarians*, becauſe of its Eaſterly Situation from them. It was anciently Part of *Pannonia Superior*, and ſuppoſed to have been inhabited by the *Teuchatyria* and *Rathea* of *Ptolomy*; and hence the *Poles* and *Bohemians* call them ſtill *Rakauſſ*. *Lazius* ſuppoſes the *Boii* liv'd here before they were drove out by the *Marcomanni*. It appears by good Authors to have been Part of the large Dukedom of *Boiaria* or *Bavaria*, and was firſt made a Marquiſate before it came to be a Dutchy. 'Tis divided into *Upper* and *Lower* by the River *Ens*. It has *Hungary* on the E. *Bavaria* on the W. *Bohemia* on the N. and *Stiria* on the S. 'Tis in Length from E. to W. according to *Moll's* Map, 172 Miles; and in Breadth from N. to S. about 65.

The Country abounds with all Neceſſaries for Human Life, as will appear more at large in the Deſcription of its Cities and Towns. The *Danube*, *Erloph*, *Traſen*, *Tys*, *Melck*, *March*, *Teya*, *Kampff*, *Ens*, and other Rivers, afford them Plenty of Fiſh; and their Fields abound with Corn and Saffron They have Plenty of Wine for Conſumption and Export, and are ſupplied with other rich Wines from *Hungary* and *Italy*; ſo that there are 30 ſeveral Sorts ſold at *Vienna*

Hoſtats

Digitized by Google

Halſtadt furniſhes them with Salt, which is made by letting in Water into the hollow Parts of a Mountain, where it drinks in the Salt of the Earth, and is afterwards let out and boil'd. They have not ſuch Plenty of Black Cattle as of others, and therefore are ſupplied with great Part of their Beef from *Hungary*. At *Vienna*, they have a peculiar ſort of Bird, called *Haſenhendal*, or *Gallina Coriloruin*, which they reckon a choice Dainty. The *Danube* and other Rivers have two Sorts of Fiſh, unknown to us, one called *Scheiden*, and, by *Geſner Siluruſ*, larger than a Pike or Salmon; the other called *Hauſont*, much larger than the former, ſome of 'em being 20 Foot long. 'Tis thought to be the *Anacetus* of *Ælian*, who gives an Account of fiſhing for them in the *Iſter*, is a griſly Fiſh, with a hollow Nervous Chord down the Back, which they dry and make into Whips. The Fiſhermen blow a Trumpet or Horn, the Noiſe of which brings great Shoals of 'em about their Boats. The Inhabitants having ſuch Plenty of all Neceſſaries, are more brisk and jovial than their Neighbours, who from hence call them Ranters and Flaggoneers. Their unhealthful Air makes it neceſſary for them to take a larger Glaſs than ordinary; for in *Lower Auſtria* eſpecially, except brisk Winds carry off the Vapours, they are much troubled with Agues. This Country abounds ſo with People of Quality, becauſe of the Emperor's Court at *Vienna*, that ſome have reckon'd in it 100 Families of Counts and Barons, and 180 Knights, who had Votes in their Diet. *Cluverius* obſerves, That this is the only Arch-Dutchy in *Europe*.

The Family of Auſtria.

SOme *German* Heralds derive it in a direct Line from *Julius Cæſar*: Others from one of the *Roman Scipio's*. *Seifrid*, an *Auſtrian* Abbot, publiſh'd a Folio Book in 1613, wherein he pretends to derive them from the *Anici*, *Probi*, *Colybri*, and other *Roman* Families which came from *Troy* with *Æneas*. *Aventinus* derives them from *Oſirus* King of *Egypt*. *Trithemius*, and moſt ancient Authors of Credit, bring them from *Sigebert* King of *France*; and this has been approved by *Lazius* and *Renſnerus*, two learned modern Writers; but *Guillimannus*, in a Book printed in 1605, dedicated to the Emperor *Rudolph* II. derives them from *Vindoniſſa*, an ancient City in *Switzerland*, of which they were Lords, afterwards made Counts of *Altenburg* and *Hapsburg*. This *Vindoniſſa* is mention'd by *Tacitus*; and other Hiſtorians ſay, it was beſieged in the Reigns of *Dioclesian* and *Maximilian*. *Rhenanus* fancies, the true *German* Name of it was *Windiſh*.

The *Atlas Hiſtorique* derives them in like manner from *Kanſelin* Count of *Altenburg*, Son to *Gontram*, ſirnam'd *The Rich*, who liv'd in the latter End of the 9th Century. He was ſucceeded by *Radebotus*; he by *Wernier* Count of *Altenburg* and *Vindoniſſa*, and he by *Otho* Count of *Hapsburg*, from whom *Rudolph* Count of *Hapsburg*, who was elected Emperor in 1273, was the 5th. The Emperor *Albert* I. ſucceeded him. *Albert* II. Duke of *Auſtria*, ſucceeded him, but not as Emperor. *Leopold* I. ſirnam'd *The Honour of War*, and *The Glory of Knights*, was his Son. *Ernest*, the firſt of the Name, Duke of *Auſtria*, ſucceeded him. *Frederick*, ſirnam'd *The Pacifick*, his Son, was the firſt who had the Title of Arch-Duke, which the *Atlas* ſays, ſignifies Duke of the Dukes of *Germany*. He died in 1493, and was ſucceeded by his Son *Maximilian*, who married *Mary* of *Burgundy*, the Heireſs of that Country, by whom it came to the Family of *Auſtria* in 1519. His Son Arch-Duke *Philip* married *Jane* of *Arragon*, Daughter to *Ferdinand* II. and *Iſabel* Queen of *Caſtile*, from whom proceeded the preſent Imperial Family, and the Branch of *Spain*, whoſe Male-Iſſue fail'd in the laſt King *Charles* II. The Founder of the *Spaniſh* Branch was *Charles* V. and the Founder of the Imperial Branch was his Brother *Ferdinand*, who married *Anne* Queen of *Hungary* and *Bohemia*, which brought thoſe Countries to that Family. From *Charles* V. by his Daughter *Margaret*, came the preſent Family of *Parma*. From Arch-Duke *Philip*, came the Arch-Dukes of *Inſpruck*, which was united to the Imperial Family by the Marriage of the Heireſs to the late Emperor *Leopold*. From a Daughter of *Charles* Arch-Duke of *Auſtria*, comes likewiſe the preſent Family of *Tuſcany*; and from *Charles* V.'s Branch, comes alſo *Philip* Duke

Digitized by Google

Duke of *Anjou*, at preſent poſſeſſed of the Crown of *Spain*. The *Atlas* likewiſe derives the Kings of *France*, the ancient Kings of *Arragon* and *Caſtile*, and the Kings of *Portugal*, from the Family of *Hapsburg*; but he is not diſtinct as to the Manner how.

The *Atlas Hiſtorique* has alſo a large Tree, by which he ſhews, That moſt of the Sovereigns of *Europe* are iſſued from the Emperor *Rodolph*, *viz.* the Emperor, the King of *Spain*, the King of *France*, the Queen of *England* by the Family of *Denmark*, a Daughter of which was married to *James* I. the K. of *Denmark*, the K. of *Sweden*, the ancient Kings of *Portugal*, the King of *Pruſſia*, with all the Branches of the Family of *Brandenburg*; the Duke of *Savoy*, the Elector of *Hanover*, with the Branches of the Houſe of *Brunſwick*; the Elector of *Saxony*, with all the Branches of that Family; the Elector *Palatine*, the Elector of *Bavaria*, the Duke of *Lorrain*, the Landgrave of *Heſſe*, with the Branches of that Family; the Duke of *Wirtemberg*, with the Branches of that Family; the Duke of *Holſtein*, and his Branches; the Duke of *Mecklenburg*, the Prince of *Baden*, with the Branches of that Family; the Prince of *Anhalt*, the Counts of *Ottingen* and *Schwartzburg*, and the ancient Kings of *Bohemia* and *Hungary*.

He reckons in all 21 Illuſtrious Families which proceeded from *Rodolph*; among whom, there have been 19 Emperors, 46 Kings, 31 Electors and Electreſſes, and 190 Dukes, Dutcheſſes, Princes, Princeſſes, Counts and Counteſſes, beſides more that might be added.

He has alſo a Tree which ſhews, That there are iſſued from *Ferdinand* I. beſides the Emperor and King of *Spain*, the Queen of *Great Britain*, by *Mary* of *Medicis*, Queen to *Henry* IV. of *France*; the King of *France*, the King of *Portugal*, the King of *Sweden*, the King of *Denmark*, the King of *Poland*, the King of *Pruſſia*, the Electors of *Bavaria*, *Saxony*, and *Palatine*, the Dukes of *Savoy*, *Florence*, and *Lorrain*, the Landgraves of *Heſſe*, the Dukes of *Mantua*, *Parma*, and *Courland*, and the Princes of *Baden*.

He has alſo a Genealogical Tree of the Imperial Families, and Kings of *Spain*, that have iſſued from the Houſe of *Auſtria* ſince *Charlemagne*; among whom, he reckons the Emperors of the Family of *Saxony*, thoſe of the Family of *Franconia*, thoſe of the Family of *Luxemburg*, thoſe of the Family of *Swabia*, and thoſe of the preſent Imperial and *Spaniſh* Families. By all which together it appears, That the Houſe of *Auſtria* is now the moſt Illuſtrious Family in the World.

The Privileges which they have receiv'd from the many Emperors of that Family, are very many and great, as Arch-Dukes of *Auſtria*; for as ſuch they can create Gentlemen, Barons, and Counts, throughout the whole Empire. The Emperor cannot take from them the Lands they are poſſeſſed of. The Arch-Duke is the firſt and moſt intimate Privy-Counſellor of the Empire, and his Principality not ſubject to Contributions. When he receives the Lands he holds in Fee, he pays nothing for the Inveſtiture, wears a Royal Habit, and an Arch-Duke's Cap, and is exempted from the Juriſdiction of the Empire. In Aſſemblies and Diets, they take Place on the Emperor's Right Hand, after the Electors, and before the Eccleſiaſtical Princes; and if they be challeng'd to a Duel, they may ſend a Champion, thô that Privilege be deny'd their Adverſary; and if all their Male-Iſſues ſhould fail, the eldeſt Daughter inherits all their Eſtates, Titles and Privileges, and brings them to her Husband.

The ancient Arms of the Family were in a *Field Azure*, 5 *Larks Or*; but upon *Leopold* of *Auſtria*'s gallant Behaviour at the Siege of *Ptolemais*, where he was cover'd all over with Blood, and nothing appear'd with any White but his Belt, the then Emperor gave him a new Coat, being a *Field-Gules*, with a *Feſs-Argent*, which they bear to this Day. Their other Arms we have accounted for under the Head of, *The Government of Germany*, Page 498.

The chief Cities and Towns of Auſtria.

1. VIenna, anciently called *Vendum*, *Vindomina*, and *Vindobona*; and becauſe of a *Roman* Colony there under their General *Fabianus*, was likewiſe called *Colonia Fabiana*; and here their *Claſſis Iſtrica*, or Navy on the *Danube*, lay, under Protection of the 10th *German* Legion. Some fancy, that 'tis *Ptolomy*'s *Juliobona*. The Curious may

 See

ſee more of this in *Cluverius's Vindelicia & Noricum*, join'd to his *Germania Antiqua*, Page 22. By which it appears, that it was then one of the chief Towns in *Pannonia*. The preſent Name *Wien*, as 'tis call'd by the *Germans*, ſeems moſt probably to come from a ſmall River of that Name, which falls there into the *Danube*. 'Tis ſituate on the S. Side of that great River, and was anciently famous for the Actions of ſeveral *Roman* Emperors againſt the *Marcomanni* and *Quadi*, particularly for the Wars of *Marcus Aurelius Antoninus Philoſophus*, who defeated thoſe Nations, and, according to *Aurelius Victor*, died here. Whether 'twas afterwards totally deſtroy'd, we know not. *Ptolomy* is the firſt who mentions it; but there is no certain Account when 'twas founded. In *Tiberius's* Time, it ſeems not to have been very remarkable, becauſe *Velleius Paterculus* mentions *Carnuntum* or *Carnuntum* to be the next Town of Note in Poſſeſſion of the *Romans* to the Kingdom of *Noricum*; ſo that it ſeems firſt to have been made conſiderable and enlarged by being the Station of the 10th *German* Legion, as *Cellarius* thinks. We hear little more of it till *Henry* I. of *Auſtria* is ſaid to have rebuilt it in 1158; and it was afterwards beautified and wall'd in 1192, by the Ranſom which the Marquis of *Auſtria* obliged *Richard* I. of *England* to pay, when he took him Priſoner in his Return from the *Holy Land*, becauſe he took down the *Auſtrian* Banner at *Joppa*, and threw it into a Houſe of Office. The Ranſom he forc'd from King *Richard*, was 140000 Marks of Silver, in *Cologne* Weight, a prodigious Sum in thoſe Days, for which the *Engliſh* were oblig'd to ſell their Church-Plate; and the Marquis of *Auſtria* not only fortified and enlarged *Vienna* with it, but wall'd the Towns of *Ens*, *Haimburg*, and *Newſtat*. The City lies in Long. 35. 30. Lat. 48. 25. about 130 Miles S. E. from *Prague*, and about 48 W. from *Preſburg*, on a Branch of the *Danube*, which here divides it ſelf into ſeveral Streams; and the River *Wien* ſeparates the Town from ſome of the Suburbs. The City is fortified after the modern Way, with 10 Baſtions towards the Land, and a very deep Ditch, into which they can let the River; but generally keep it dry, for fear of incommoding their Cellars. It has two other Baſtions towards the River. Taking in the Suburbs, 'tis of a very large Circuit; but the City it ſelf is not above 3 *Engliſh* Miles round. 'Tis very populous; and here we may ſee ſome of moſt Nations in *Europe* in their proper Habits, which is very entertaining to Strangers. *Æneas Sylvius*, above 200 Years ago, ſays, This City abounded with Palaces fit for Kings, and had Churches that might vie with thoſe of *Italy*; a Character which it much better deſerves now. Moſt of their Houſes are well built of Stone, 6 Stories high, with flat Roofs, after the *Italian* Mode; and thoſe which are otherwiſe, are cover'd with Pieces of Timber ſhap'd like Tiles. The Streets are of a midling Size, and many of their Houſes have 4 Cellars one under another, with an open Space in the middle of each arch'd Roof for a Communication of Air; and from the lowermoſt, there's a Tube to the top to let in Air from the Streets. The Cathedral of St. *Stephen's* is a fair ſtately Fabrick, but ſomething dark, becauſe of the painted Glaſs in the Windows. It was founded by *Henry* I. of *Auſtria*, and finiſhed by *Henry* II. The Steeple and Spire is one of the fineſt in *Germany*, and much ſtronger than that of *Straſburg*, tho' not ſo ſightly: Under the Croſs on the top, there was a Star and Half-Moon ſet up on this Occaſion. When *Soliman the Magnificent* beſieged the Town, he deſign'd to batter down the Steeple; but was diſſwaded by his Baſſa's, who flatter'd him, that he would ſoon be Maſter of it, and it were Pity to deſtroy ſo noble a Pyramid. Upon this he ſent Word to the Citizens, That if they would ſet a Half-Moon and Star, the *Turkiſh* Arms, on the top of it, he would ſpare it, which was accordingly done; but being repulſed with great Loſs, though he attack'd them with 200000 Men, he was obliged to march off; but his Arms continued there till the *Turks* beſieg'd it again in 1683. After which, becauſe they fir'd at the Steeple, the Arms were taken down. This Steeple is 480 Foot high; and in the Tower, there hangs a Caſe of Wooden Hammers, with which they call the People to Church from *Good-Friday* till *Eaſter-Day*, becauſe they will not ſuffer the Bells to ring out during the Time that our Saviour lay in the Grave. At the Entrance into this Church, there's a Stone plac'd in the

Digitized by Google

the Wall, which they fancy to be one of thoſe with which St. *Stephen* was ſton'd to Death: It looks like a Pebble, and is worn very ſmooth by the ſuperſtitious People, who think they merit by touching it as they go in and out. In this Church, there are many ſumptuous Monuments of Princes, and other great Perſons. Dr. *Brown* ſays, the Spire of this Steeple has the largeſt Crockets that ever he ſaw, being above a Yard long, and adorn'd with Foliage-work. From the Steeple, there is a noble Proſpect of the City, of the adjacent Country, and of the Courſe of the *Danube* through moſt of *Auſtria* to near *Presburg* in *Hungary*. He adds, there are many other noble Churches and rich Convents in this City. The Convent of the *Dominicans* is a very fair Structure. The Church of the *Auſtin* Fryars is very large, and has a Chapel in the middle, reſembling that called the *Virgin's-Houſe* in *Loretto* in *Italy*; upon the top of which, there are many Colours taken from the *Turks* and *Tartars*. The Jeſuits have ſeveral very large and ſpacious Colleges. The Front of that which faces the Piazza, has a Column of Copper in the Center of the Market-place before it, on a Pedeſtal of White Stone, with a Statue of the Virgin on the top, and 4 Angels with Eſcutcheons round her; on which there are Inſcriptions, dedicating *Auſtria* to her Patronage. There is likewiſe a *Scots* Convent here, founded for the Reception of *Scots-men*, in their Pilgrimages to the *Holy Land*. St. *Colman*, one of their Country-men, (of the Blood Royal) was murther'd by the Peaſants near this City, where his Body is ſaid to have remain'd a long time uncorrupted, and to have worked many Miracles: Upon which Account he was reckon'd the Patron of *Auſtria*. It was afterwards carried to *Alba Regalis* in *Hungary*. The Church of St. *Peter* is much eſteemed for its Antiquity, being the oldeſt in the City, and built in the ſame Place where formerly ſtood the *Aula Flaviana*, dedicated to *Domitian*.

The Univerſity of *Vienna* is alſo very noble: It was founded by *Albert* III. of *Auſtria* above 300 Years ago, according to the Statutes of that of *Paris*; or, as ſome ſay, it was founded by the Emperor *Frederick* II. in 1237, long before that, when he endow'd it with great Revenues and Privileges; being afterwards enlarged by *Ottocar* King of *Bohemia*, and compleated by *Albert*, who diſtinguiſh'd the Students into 4 Claſſes or Nations, each of which, beſides the general Conſtitutions, had their peculiar Rules and Privileges. The firſt Claſs is the *Auſtrian*, which takes in the Students of *Auſtria*, *Italy*, and other Provinces beyond the Mountains. The 2d is that of the *Rhine*, which takes in the W. of the Empire, *France*, *Spain*, and the *Netherlands*. The 3d is that of the *Hungarians*, which takes in *Hungary*, *Bohemia*, and all the reſt of the Countries who ſpeak *Sclavonick*, with other Parts of *Germany*. The 4th is that of the *Saxons*, taking in *Saxony*, the Northern Kingdoms, the N. Parts of *Germany*, *Great Britain*, and *Ireland*. Hence it comes, that there are Students of many Nations here, who ſometimes quarrel about their own Diviſions; but are ſure to unite upon any Difference with the Citizens or *Jews*. Dr. *Brown* ſays, they had but little Knowledge when he was there of Natural and Experimental Philoſophy, tho they were enquiring after it; but they were well vers'd in Languages, Hiſtory, Antiquity, and Anatomy, having a Theatre capable of 100 Perſons to ſee the Operations of the latter. The Emperor *Ferdinand* II. in 1622, made an Order, That none ſhould be Profeſſors of Divinity and Philoſophy there but the Jeſuits; yet ſometimes at Diſputations, thoſe of other Orders are allow'd the Chair; but the Civilians and Phyſicians were govern'd by a Rector of their own chuſing, and admit *Lutherans* and *Calviniſts*, which are excluded from the other. The Rector, with the other Maſters of the Univerſity, have Power of Life and Death over their own Members.

No Religion is here publickly tolerated but the *Romiſh*, and therefore the Proteſtants go as far as *Presburg*, about 40 *Engliſh* Miles from hence, to receive the Sacrament. This would be an inſupportable Trouble, had they not the Convenience of the *Danube*, and of Coaches, which daily paſs betwixt *Vienna* and *Presburg*. *Maximilian* II. allow'd the *Lutherans* the Exerciſe of Religion in the Church of the *Holy Croſs*; but that Privilege was afterwards taken from them by *Rodolph* II. The Emperor *Matthias*, not long after, gave them Leave to meet at

Digitized by Google

Hernals, a little more than an *English* Mile from *Vienna*, and allow'd their Miniſters to come into the City, and there to marry, baptize, and viſit the Sick. This Toleration gave them an Opportunity of promoting their Principles, and of gaining daily great Numbers of Proſelytes. But *Ferdinand* II. returning from the Battle of *Prague*, baniſh'd their Teachers out of *Vienna* and *Arnols*, committing Baron *Iwger*, their Grand Patron, cloſe Priſoner at *Lintz*; and not ceaſing, till he had taken away their Privileges of meeting in any Part of the *Lower Auſtria*.

Formerly the *Jews*, who ſwarm more in *Germany* than in any other Part of the Chriſtian World, had Freedom of Trade allow'd them in this City; but for many Years paſt have been exceedingly diſtaſted by the Citizens and Tradeſmen, who look'd upon them as Fellows that robb'd them of their Trafficks and Employments; and upon a Quarrel betwixt them and the Scholars, were wholly baniſh'd the Town. The Students having received an Affront from 'em, aſſaulted the *Judem-Statt*, or *Jews* Town, which is a Part of the Suburbs beyond the River, whither they were always forc'd to retire in the Night-time, thô permitted to traffick within the Walls in the Day, beat and wounded many of them, and threw ſeveral into the River; ſome of themſelves being alſo killed, and divers wounded. Upon this, a good Number of the *Jews*, who firſt occaſion'd the Uproar, were immediately baniſhed the Town; and not long after, the whole Nation of 'em prohibited from living not only at *Vienna*, but in any other Part of *Auſtria*. 'Tis hard to judge whether a Toleration or Excluſion of 'em conduc'd moſt to the publick Good of the Town; for thô they would moſt readily accommodate you with all manner of Neceſſaries, either upon Sale, or Exchange for other Commodities, yet the Magiſtrates of the City, and the Emperor's Miniſters of State, were uſually jealous of their holding a Correſpondence with the *Turks*, and betraying the Secrets they could learn to the *Ottoman* Miniſters.

The Imperial Palace is a noble Structure, but not anſwerable in Bulk to the Grandeur of its Maſter: It conſiſts chiefly of two Courts; in the outer, which is largeſt, the Guards and Courtiers are lodg'd; and in the inner, the Court it ſelf. Over the Gate of the Palace, there are the 5 Vowels, A, E, I, O, U, in Capitals over the Gate; to which ſome have given this Explanation, *Auſtria eſt imperare orbi univerſo*; *i. e.* 'Tis the Part of *Auſtria* to govern the World; but 'tis not certain that this was the Meaning of the Architect.

In the Palace, the Emperor has a Library, which, for the Number and Value of Books, is inferior to none in *Europe*. The worſt is, that the Receptacle is not ſuitable to ſo vaſt a Treaſure; for thô 'tis divided into 8 ſpacious Rooms, in which the Shelves ſtand ſo cloſe, that there is ſcarce an eaſy Paſſage left betwixt them, yet many lie upon the Ground.

The Manuſcripts have their peculiar Places diſtinct from the Printed Books, and are divided into 6 different Claſſes, *viz.* Theological, Juridical, Medicinal, Philoſophical, Hiſtorical, and Philological. The MSS. of *Hebrew*, *Syriac*, *Arabic*, *Turkiſh*, *Armenian*, *Æthiopic*, and *Chineſe* Books, are, without Compariſon, the beſt Collection that is to be found.

The choiceſt Books of which this Library is compoſed, (which has been collecting ever ſince the Time of *Maximilian* I.) are,

The famous Library of *Buda*, of *Matthias Corvinus*, Son to *Hunniades*.

The choice Library of *Wolfgangus Lazius*.

As alſo 3000 Books of *Johannes Sambucus*.

Augerius Busbequius made a conſiderable Addition to the reſt; and in his two *Turky* Embaſſies, bought a great many choice Greek MSS. at *Conſtantinople*, which are mark'd thus with his own Hand, *Aug. de Busbeck. emit. Conſtantinopoli.*

There was alſo a conſiderable Number added out of the Library of the learned *Johannes Cuſpinianus*, the Emperor's Library-Keeper: And the noted Libraries and Mathematical Inſtruments of *Tycho Brache*, *Kepler*, and *Gaſſendus*, were purchas'd for it.

But the greateſt Addition of all, was made by that noble Library of Count *Auger*, which conſiſting of 16000 Volumes, was purchas'd by *Ferdinand* III. Beſides which, the learned *Peter Lambecius*, the preſent Library-Keeper, Hiſtoriographer, and Counſellor of the Emperor, has brought hither the choiceſt Books out of the Library

Digitized by Google

brary of *Inſpruck*; and he himſelf is Maſter of a moſt excellent Library of his own, which will in Time be added to the Imperial Library. Dr. *Brown* ſays, he had it from his own Mouth, That there were then at leaſt 80000 Volumes in this Library, which are increas'd by the Acceſſion of other Books that are purchas'd ſince, eſpecially in the *Turkiſh* Dominions, where the Emperor keeping a conſtant Reſident, no Opportunity is let ſlip to buy up any good Greek MSS. in their Convents. Dr. *Brown* ſays, when he was at *Lariſſa* in *Theſſaly*, the Reſident, Seignior *de Caſa Nova*, was continually enquiring after Greek Books in their Monaſteries, the Emperor ſparing no Coſt to purchaſe them; and were it only for the Number of *German* Books, 'tis certain, that by the Right the Emperor has of having two Books of whatever is printed in *Germany*, this Library might ſoon increaſe to a vaſt Number.

The chief Things taken Notice of in this Library by Dr. *Brown*, are,

A Letter in the *Chineſe* and *Tartarian* Language from the Emperor of *China* to the Emperor *Leopold*, weaved in a very fine Roll.

Another Roll written in an unknown Character, but moſt reſembling the Greek.

A Book in the *Runick* Language.

A very fair MSS. of *Ptolomy*, the Maps colour'd.

A true Copy of *Livy*, the moſt ancient MSS. extant, 1000 Years old, in very large Letters, without Diſtinction of Words or Sentences, brought from the *Inſpruck* Library.

A very fair MSS. in Greek of *Dioſcorides*, 1100 Years old, in large Characters, without Diſtinction of Words or Accents; the Plants finely painted, with the Pictures of *Dioſcorides*, *Galen*, and ſome other noted Phyſicians.

Two Books of Geometrical Propoſitions demonſtrated, in the *Chineſe* Language, whereof one with Pictures.

An old Greek MSS. in great Letters, without Diſtinction of Words or Accents.

A Greek MSS. 1300 Years old, of the Book of *Geneſis*, without Stops or Accents. It contains 48 Draughts in Miniature or Water-Colours, relating to the Habits of the Ancients, to the Manner of their Feaſting, as their Poſtures at Meals, Attendance of Servants, and Muſick. Among other Things, the Execution of *Pharaoh*'s Baker is worth Obſervation, his Head being thruſt thrô a forked Piece of Wood, and his Hands ty'd behind him.

A Book of Painting in Miniature, by *Albert Durer*, and a Sphere with a Globe within it, carved and painted by the ſame Hand.

A Book of *Michael Angelo*, wherein, beſides many Rarities in Architecture, all the Paintings and Deſigns of the *Belvedere* are ſeen in Little.

A very fair Alcoran in *Arabic*, with the *Turkiſh* Explication interlin'd betwixt it.

A Bible in the *Coptic* and *Perſian* Languages.

Luther's Bible, with many Notes, written by his own Hand.

A fair Greek MSS. of the New Teſtament, written with Golden Letters upon Purple 1500 Years ago.

A Magical Glaſs of the Emperor *Rudolphus*, whereby to ſee Apparitions of Spirits.

Sixteen Thouſand Pieces of ancient *Greek*, *Roman*, and *Gothick* Medals and Coins, in Gold, Silver, and Copper. They pretend to have two Copper Coins of the Emperor *Marcus Otho*.

Dr. *Brown* gives the following Account of the Emperor's Repoſitory or Collection of Rarities.

The whole is divided into 24 Caſes or Cupboards.

The firſt contains many curious Veſſels, turn'd out of Ivory, Cups of Amber, Spoons and other Veſſels of Mother of Pearl, divers fine Works of Coral, a Galley of Ivory, and two Cups, one turn'd by the Emperor *Leopold*, and the other by *Ferdinand* III. ſeveral Cups of the Rhinoceros Horn.

In the 2d, an Elephant with a Caſtle, and many other Rarities of Workmanſhip on his Back; two fine Pillars, all of Ivory, with Variety of *Baſſi Relievo*, and other Varieties in Ivory; a Picture in Oil of *Ganymede*, by *Correggio*.

In the 3d, an old Man's Head in Oil, by *Albert. Durer*; vaſt Variety of Watches and

and Clock-work; a fine Centaur in Silver.

The 4th also contains Watches and Clocks; a Triumphant Chariot; a *Turk* of Quality with his Attendance; a Landskip and a Cupid by *Correggio*.

In the 5th, are divers curious Works of Filegrane, brought from *Spain* and the *Indies*; and a Bason of Agate finely wrought.

The 6th contains an excellent Collection of *Intaglia*, and old *Roman* Stones, of inestimable Value, for their Workmanship and Bigness; a large Agate, on which is wrought the Victory of *Augustus Cæsar* over the *Dalmatians* and *Pannonians*: It is 5 Inches long, and 4 broad, of a very high Value; besides several Heads and Figures cut in Onyxes, Shells, and Sardonyxes; and a Chain, with the Heads of the whole *Austrian* Family.

In the 7th, divers Pieces of Mother of Pearl, curiously wrought; the Head of *Maximilian* I. in Plaister-work, with a Lock of his own Hair, and the 12 *Cæsars* Heads; another Head excellently well done in Oil, by *Hans van Ach*.

In the 8th, a Vessel made of one Piece of Chrystal, of a Yard and half high; an Urn; several Hands, with several Chrystal Works.

The 9th has a very noble Ewer of Chrystal, and another noble Vessel; many curious Crosses, and other Varieties.

The 10th contains 5 rich Crowns; the Imperial Crown, adorn'd with Precious Jewels, and a large blue Sapphire on the top; a Model of the Crown wherewith the Emperors are crown'd, much exceeding in Value the Original; a Paragon Diamond, weighing 17¼ Carats; divers very large Rubies; a Scepter made of Unicorn's Horn, set with Precious Stone; a Locket made of very large Diamonds; a most magnificent Scepter, Globe, Cross, and Crown, valued at 200000 Crowns; an Opal as big as a Hand, as it came out of the Mine; with many other very fine Opals, and a very large Emerald.

In the 11th, a Golden Bason, us'd at the Baptism of the *Austrian* Family; divers Golden Scepters, Scimiters, Knives, and other Presents, from the *Ottoman* Court; three rich Dog-Collars, sent from *England*, with this Mark, ꝺC ꝺC; a great Piece of pure Gold, of the Bigness of a Hand, as it came out of the Mine; another Piece of Gold Ore, where you see the pure Gold shooting forth upon a white Stone; besides divers other Basons of Gold, and Vessels of Coral.

In the 12th, great store of Vessels of Jaspis, Agate, *Lapis Lazuli*, Oriental Granates, Cups of Onyx and Sardonyx, one very great, one of an Amethyst, and divers very large ones of *Lapis Nephriticus*.

In the 13th, are divers Flowers made out of Precious Stones; a large high Vessel of *Bohemian* Topaz; a Cup made of an *Hungarian* Diamond; a Piece of Amber-grease of the Bigness of a Man's Hand; a very fine Jaspis Stone; a large Agate Stone on the outside, and a Bed of large Amethysts naturally in it in the middle, which is look'd upon as a great Rarity.

In the 14th, are many noble Chrysolites, Jacinths, Oriental Granates, Beryls or Aquamarines; a very rich Smaragdus or Emerald, or a Cup out of that Stone, three great ones having been already taken out, valued at 300000 Crowns; great store of Gold Vessels, and rare Figures in Coral; *Turkish* Knives, Gauntlets, *&c.* fine Wax-Works, large Bezoar Stones; a Golden Medal of the Emperor's Arms, worth 1000 *l.* Sterling; a Cup said to be taken out of *Solomon's* Temple; a most curious Bason and Ewer of carv'd Ivory; King *Philip* II. of *Spain* in Diamond Armour, set in Gold; a curious Picture of an old Man courting a young Woman, with this Motto;

Aurum Annulum ne gestato.

Don't wear too strait a Ring.

A very fine Crucifix of Pearl; the Buff-Coat of *Gustavus Adolphus*, King of *Sweden*, in which he was kill'd near *Lutzen*; all the Gospel written and painted; the Head of *Charles* I. King of *England*, in Marble; Priests Garments set all over with Priests; an inestimable Agate Dish, betwixt three and four Spans Diameter, in which you see in natural Characters Χρῶτος: Unto which may be subjoin'd, that most magnificent Chain of Pearl taken from Count *Tekely* in the late *Hungarian* War.

Near the Palace, the Emperor has a fine Stable, fill'd with manag'd Horses from most

Digitized by Google

moſt Parts of *Europe*. He has alſo the beſt Arſenal of the Empire; and in one of the Baſtions of the City, there's a great Magazine of Naval Stores for his Gallies, which are made uſe of in the *Danube* againſt the *Turks*. They carry Guns, and have a great Number of Soldiers and Seamen belonging to them. Dr. *Brown* takes Notice, That the City is divided from the Suburbs by an Eſplanade, deſcending in an open Ground for 300 Paces; That the Baſtions are very large and broad, fac'd with Brick, and edg'd with Free-ſtone, beſides the old inward Wall which was built with the Ranſom of our *Richard* I. The Town has 6 Gates: The firſt call'd the *Stuben Gate*, to the E. 2. The *Corinthian-Gate*, to the S. 3. The *Caſtle-Gate*. 4. The *Scots-Gate*. 5. The *New-Gate*. 6. The *Red-Tower Gate*. Beſides which, there's another Gate near the Emperor's Palace towards the River. The 5 firſt Gates are vaulted through the Wall, with Draw-Bridges over the Ditch. The 6th is a Paſſage under a Tower towards the Bridge of the *Danube*, which is here divided into 7 Channels, join'd by as many Bridges, made of many Thouſands of Trees, laid cloſe to one another. There is one very remarkable Bridge here, call'd the *High-Bridge*, made by the croſſing of two Streets by equal Angles; but the Ground in one Street being equal in Height to the Tops of the Houſes of the other, they have built a Bridge or Arch in the lowermoſt Street, to let the upper paſs over it. In one of the Market-places, there's upon a Pedeſtal a very groſs Repreſentation of the Trinity; repreſenting the Father like an old venerable Man, with our Saviour on the Croſs in his Arms, and the Holy Ghoſt like a Dove hovering over both. 'Tis fenc'd in with Iron Rails, and a Centinel always by it; and the ſuperſtitious People bow to it as they paſs. This was ſet up in Remembrance of that City's being deliver'd from the Plague in the laſt Century. The principal Suburb is that call'd *Leopoldſtadt*, divided from the City by a Branch of the *Danube*, and a fair Plain. Before the laſt Siege, it was almoſt as conſiderable as the Town, and abounded with magnificent Houſes of the Nobility and Gentry; but was deſtroy'd during the Siege, and is in part rebuilt ſince. Among the Iſlands form'd by the *Danube* here, there's one call'd *St. Peter's*, which lies before the Town, and is capable of lodging a conſiderable Army for their Defence. This City is a Biſhop's See, and the Biſhop, ſays *La Mirefl*, depends immediately on the Pope. The moſt memorable Sieges which this City has ſuſtain'd, was that by *Matthew Corvin* King of *Hungary*, who took it in 1490, and died here in 1495; that by *Soliman the Magnificent* in 1529, with 300000 Men, when he made 20 Attacks upon it; but it was bravely defended by *Philip* Elector *Palatine*; and the Emperor *Charles* V. coming to relieve it with 90000 Men, the *Turks* were obliged to retire. 'Twas again beſieg'd by the Grand Viſier in 1683 with 100000 Men, from the 14th of *July*, to the beginning of *September*, and reduc'd to great Streights; but bravely defended by Count *Staremberg*, until relieved by the King of *Poland*, and the Electors of *Bavaria* and *Saxony*. *Baudrand* ſays, it was made an Imperial Town by *Frederick* II. in 1236; but 4 Years after, made ſubject to the Houſe of *Auſtria*.

'Tis very rich and populous, and the Inhabitants live plentifully, and are generally well Apparel'd, it being the Reſidence of the Emperor's Court, and the Place of Meeting for the States of the Country.

The Emperor's Court, thô ſome others may exceed it for outward Pomp, yet for real Grandeur exceeds all the Courts in *Chriſtendom*: He has many great Officers of State, and of the Houſhold, who are all Perſons of great Quality. The Lord High Steward, Dr. *Brown* ſays, was a Prince, the Lord Marſhal a Count, the Lord Chamberlain alſo a Count, with 100 Gentlemen of the Bed-Chamber under him, all Counts and Barons, who wear Golden Keys on their Breaſts, as the Grooms of the Bed-Chamber wear one of Steel, and two of each attend every Night. The Maſter of the Horſe, and the Chief Huntſman, were both Counts, as was the Chief Falconer, who had 12 other Falconers under him. The Poſtmaſter-General was a Count; and the Captain of the 100 Horſe-Guards, who lodge without the City, was a Prince: The Captain of the 100 Foot-Guards, who attend the Emperor's Perſon within the City with Lances and Javelins with broad Points, was a Count; and the Emperor had

Digitized by Google

had 60 Pages, moſt of whom were Counts and Barons: And beſides vaſt Numbers of Perſons of Quality of the Hereditary Dominions who are frequently at Court, there are generally 30 Ambaſſadors and Miniſters from Foreign Kings, Princes and States, and from the Princes of the Empire, reſiding at *Vienna*. The Emperor has likewiſe, according to the *Preſent State of Europe*, belonging to himſelf, 36 Colonels of Foot, 18 of Horſe, and 23 of Dragoons and Huſſars, moſt of 'em Perſons of Quality, with an Admiral and Vice-Admiral of his Gallies, and a Colonel of the Troops belonging to them.

The *Preſent State of Europe* ſays, The Emperor himſelf preſides in the Cabinet-Council; next to him ſits the King of the *Romans*, if there be one of Age; and the other Members are about 10 in Number, all Perſons of the Firſt Rank.

The *Atlas Hiſtorique* gives us the following Account of the other Courts and Councils held here. The firſt is the Council of State or Privy-Council, which conſults about Affairs of the greateſt Importance: It conſiſts of a Preſident, who is generally the Emperor's Chief Miniſter, and 24 Counſellors, who are for moſt part Princes, Counts, and the great Officers of the Houſhold. They have 10 Secretaries, the firſt of whom ſigns the Emperor's chief Letters, and the reſt diſpatch the Affairs belonging to the Secretary's Office. But according to the *Preſent State of Europe*, the Number of the Privy-Counſellors is much greater.

The 3d Council is that of War, which conſiſts of 2 Preſidents, who are Generals; 7 Counſellors, who are Marſhals de Camp; and ſeveral Secretaries. They treat of Affairs of Peace and War.

The 4th is that call'd the *Aulick*, or principal Court of the Empire, the Officers of which are nam'd by the Emperor. It conſiſts of 18 Counſellors, half of which are Proteſtants, according to the Treaty of *Munſter*. 'Tis divided into two Benches, one of which conſiſts of Noblemen, and the other of able Lawyers. It is like the Chamber of *Spire*, and is equal to it in Power for adminiſtring Sovereign Juſtice; ſo that there lies no Appeal from the one to the other. The Emperor himſelf cannot ſuſpend or hinder their Deciſions; tho as ſupreme Judge, he is Preſident of both. And tho all thoſe who are immediate Princes of the Empire have a Sovereign Power in Cauſes Civil and Criminal; yet in Civil Affairs of Importance, there lies an Appeal from them to one of thoſe two Chambers. The *Preſent State of Europe* makes this *Aulick* Council, and the Council of War, much more numerous.

He mentions alſo, 1. The Court of *Chancery* of the Empire, of which the Elector of *Mentz* is always Chief Chancellor. The Vice-Chancellor preſides in his Abſence, and has an Aſſiſtant, with an Aſſeſſor, two Secretaries, and a Referendary, for diſpatching *German* Affairs.

2. The Imperial Council or Chamber, which has a Preſident, conſiſts of many Lords and Gentlemen, among whom are the Governors of the *Hungarian* Cities, where the Mines lie, with the Chief Officers for the Civil Affairs of *Hungary*, *Moravia*, *Bohemia*, and *Sileſia*.

He gives the following Account of the moſt conſiderable Poſts of the Emperor's Hereditary Dominions.

1. In *Hungary*, the Palatine of that Kingdom, who takes Place next the King; the Deputy-Palatine, the High-Chancellor of the Kingdom, the Chancellor, the Preſident of the Chamber, Steward of the Crown, the High-Chamberlain of the Crown, the Keeper of the Crown, the Great Judge or Preſident of the Cities, the Ban and Vice-Ban of *Croatia*. The Royal Chanceries of *Hungary* and *Tranſilvania*, with the Officers and Councils belonging to them, are kept at *Vienna*.

2. In *Bohemia*, during the Abſence of the King, their Adminiſtration is in 18 Lieutenants, among whom are the Vice-Chancellor, the High-Steward, High-Marſhal, the High-Chamberlain, two Judges, the Grand Prior of the Order of *Malta*, the Chief Preſident of Appeals, the Preſident of the Royal Chamber, the Chief Secretary, and the Deputy-Chamberlain, *&c.* The Chief Chancery of *Bohemia*, with the Officers, *&c.* belonging to it, always attend the Imperial Court. There are in that Country 3 Sovereign Courts of Juſtice; and the 14 Circles are under the Government

Digitized by Google

ment of two Captains, one Counſellor of State, and one Nobleman each.

3. In the Marq. of *Moravia*, there is a Governor, who preſides in the Court of Juſtice, aſſiſted by three Lawyers and one Secretary. *Moravia* is divided into 5 Circles, under particular Governors, from whom there lies an Appeal. The Governor is aſſiſted by a Chief Chamberlain, the Chief Steward, Deputy Chamberlain, Chief Judge, Chief Secretary, Vice Chamberlain, Under-Secretary, Clerk of Records, and Vice-Chancellor.

4. *Sileſia* is always govern'd by a Prince of the Empire, with a Council, High Chancellor, ſome of the Nobility and Secretaries, with an Imperial Chamber, under the Direction of a Preſident and Council. 'Tis divided into 6 Principalities, and 6 Free States: Some of them are ſubject to their own Dukes, and they are all call'd Hereditary Principalities, over which the Emperor and the reſpective Prince appoint Governors.

5. The Arch-Dutchy of *Auſtria* is divided into 3 Governments: The firſt is *Lower Auſtria*, under the Direction of the Emperor and Privy-Council, the Regent Council, and the Chancery. The 2d is *Inner Auſtria*, which takes in *Styria*, *Carinthia*, and *Carniola*, with ſeveral leſſer Governments. The Tribunals are held at *Gratz*, and the Government is by a Privy-Council, a Regent Council, a Chief Chamber, Council of War, and Martial Court. The 3d Government is that of *Upper Auſtria*, including *Tirol*, the Hereditary Countries in *Swabia*, that Part of *Switzerland* ſubject to the Houſe of *Auſtria*, and ſeveral little Governments. The Privy Council is held at *Inſpruck*. There is beſides a Regent Council, and one called the Chamber Council.

By all this together, with the Courts of the Empreſs, and of the King and Queen of the *Romans*, when there is one, 'tis eaſy to perceive, that the Imperial Court exceeds all thoſe of *Chriſtendom* in real Grandeur.

Dr. *Brown* ſays, That two *Engliſh* Miles E. from *Vienna*, lie the large Gardens of *Rodolphus* II. The inner Garden is 200 Paces ſquare, and has a Cloiſter, ſupported by 40 Pillars of white Stone, on each Side cover'd with Copper, as are alſo the Pavilions. They have Houſes here, where they breed Lions, Tygers, and other Wild-Beaſts. Three Miles from *Vienna* lies *Arnolt*, a Place of Devotion, whither the People go in Pilgrimage, with heavy Croſſes on their Shoulders; and the Emperor and Empreſs, with the Court, perform this Pilgrimage on Foot. Here they have a Model of the Holy Sepulchre at *Jeruſalem*, with a curious Picture of our Saviour and the Virgin at full Length, the firſt exactly 6 Foot high, and the ſecond an Inch or two lower. Nearer the City, there is another Place of Devotion, called *Itzing*, marked out with 12 Stations of the Croſs, like the *Via Doloroſa* at *Jeruſalem*, in Remembrance of our Saviour's going to Moun *Calvary*. The Emperor has a fine Park near *Vienna*, with abundance of Game, and a Houſe of Pleaſure. That called *Luxemburg* is an old Structure, not very large, with a Summer-Houſe in the middle of a Pond, and a neat ſquare Building in the Marſh, from whence they ſhoot at the Wild-Beaſts. They have good Beer, and abundance of Wild-Boars in the Neighbourhood, which are extraordinary good Meat. The Emperor has great Numbers of expert Huntſmen, who always attend the Court when they hunt; for ſince Count *Serini* was kill'd by a Boar, they ſeldom attack them ſingly.

Criminals are uſually executed here by cutting off their Heads, which the Executioner performs with one Blow. The Traitors have for moſt part their Hands firſt cut off. The Climate is healthful; yet they have an Epidemical Diſtemper, called the *Auſtrian Cholick*, which is hard to be cur'd. The Winters are ſharp; therefore they ſleep between two Feather-Beds, make uſe of Stoves, and wear much Fur, with which the Women line and face their Bonnets. In the City, they ſpeak good *German*; but in the Country, the People have a different Tone, odd Words, and ſpeak quick.

Dr. *Brown* ſays, he ſaw a ſurprizing Trick perform'd here, which was, That a middle ſiz'd Man lay down on his Back, with a heavy Anvil on his Breaſt, upon which two luſty Fellows with great Hammers gave at leaſt 200 Blows, till they cut an Iron Horſe-ſhoe, about half an Inch thick, aſunder.

2. *Baden*, about 15 Miles S. W. from *Vienna*, is a neat little Wall'd Town, ſeated on a Plain, but nigh to a Ridge of Hills, which are the Excurſions of Mount *Cetius*. 'Tis much reſorted to, by reaſon of the natural Baths of that Place, wherein the Springs are ſo numerous, as to ſupply two convenient Baths within the Town, 5 without the Wall, and two beyond a Rivulet, called *Swechet*.

The Duke's Bath is the largeſt, about 20 Foot ſquare, in the middle of an Houſe of the ſame Figure built over it. The Vapour paſſes through a Tunnel of Wood at the Top, and the Water is convey'd into the Bottom of the Bath, at one Corner, thrô Wooden Pipes and Trees under the Town-Wall from the Spring-head, which riſes at a little Diſtance Weſtward. The Springs of the reſt of the Baths riſe under them, and are let in through Holes in the *Planther*. The Water, for the moſt part, is clear and tranſparent, yet ſomewhat bluiſh, and makes the Skin appear pale in it. It turns all ſorts of Metals (except Gold, whoſe Colour it alſo heightens) black in a few Minutes.

The Coin of this Country conſiſting of a Mixture of Copper and Silver, is in a Minute's Time turn'd from a white into a dark yellow, and ſoon after becomes black. It gives a fine green Colour to the Moſs and Plants, which it waſhes, and leaves often a Scum upon them of purple mix'd with white. *Oleum Sulphuris per Campanum* dropt into the Water of this Bath, newly taken up at the Spring-head, is received into it quickly; but *Oleum Tartari per Deliquium* cauſes an Ebullition, as in the making of *Tartarum Vitriolatum*. None of the other Baths are very conſiderable, except the *Sowr Bath*, which is ſet about with Stone Ballaſters, and cover'd with an handſome Cupulo and Lantern. The Water of this Bath is very clear, and its Steam colours Silver black, or gilds it at leaſt at a good Diſtance; and yet the Water it ſelf, once cold, will not change the Colour of any Metal, thô boil'd in it. The hotteſt Baths in this Town have not the Heat of the *King*'s or *Queen*'s at *Bath* in *England*. They that bathe uſe no Guides, as with us; but direct themſelves with a ſhort Staff.

The *German* Phyſicians commend theſe Waters for curing moſt Diſtempers incident to the Head, as Head-aches, Dimneſs of Sight, Deafneſs, *&c.* They are alſo good againſt the Gout, (if drunk in Time) the Dropſie, and other Chronical Diſtempers. The beſt Times for Bathing are reckon'd the 4 Months of *June*, *July*, *Auguſt*, and *September*.

3. *Haimburg*, or *Haynburg*, called by Latin Authors, for Diſtinction-ſake, *Hamburgum Auſtriæ*, about 33 Miles from *Vienna*. Some have thought it to be the ſame with *Ptolomy*'s *Carentum*, or *Carnuntum*; tho' that Opinion has ſince been confuted by the learned *Lazius*, who proves from undeniable Teſtimonies of Antiquity, and ſeveral Medals and Coins lately found, That *Petronel* (now a ſmall Village betwixt *Vienna* and *Haimburg*, about two *German* Miles from the latter) is the true *Carentum*. However, the Ruins of ſtrong Walls and Fortifications round this Town, ſufficiently demonſtrate it a Place of great Antiquity; and ſhew, that 'twas heretofore much more conſiderable and large than at this Day.

This was anciently the Metropolis of *Auſtria*, and Seat of the Dukes; during which Time, 'twas one of the greateſt Mart-Towns in this Part of *Europe*, being much frequented and throng'd with the *Schwabians*, and other Nations, who traffick'd this Way into *Hungary* down the *Danube*. But as ſoon as Duke *Leopold* VI. removed his Court from hence to *Vienna*, the Trade began to decay; and the frequent Incurſions of the *Hungarian* Rebels ſince have daily render'd it leſs conſiderable. The greateſt Trade of the Town is in Wine and Corn, of each whereof they have good Plenty. They have alſo a Bath, but not much regarded, becauſe they make uſe of an artificial Heat to warm it. In the Clefts of the Rocks, in a craggy Hill adjoining, are bred the beſt Falcons in the Empire.

4. *Tuln*, an ancient Town, about 16 M. W. from *Vienna*, not far from the Banks of the *Danube*, derives its Name from a ſmall Rivulet whereon 'tis ſeated. From this Town, a good Part of the adjoining Country has got the Name of *Turnelfeldt*, which is reckon'd one of the richeſt and healthieſt Parts of *Auſtria*. Through the middle of this Country runs the River *Traſam*, (whence *Traſamaur*, a Market-Town not far from *Tuln*,

Digitized by Google

Tuln, has its Name) which, ſays *Laxius*, is nothing but a Corruption of the Latin Words *Terraſana*, a Name the ancient *Romans* thought fit to beſtow on this healthy Country. But notwithſtanding the Compliment uſually paſſed upon this Place, as plentifully ſtock'd wieh all manner of Proviſions, a Traveller will hardly meet with worſe Uſage in any Part of the Emperor's Dominions, than at an Inn in *Tuln*. Near this Place, 40000 *Huns* periſh'd in a Battle againſt the *Roman* Lieutenant *Matrinus*, who himſelf was ſlain in the Conflict; which being ended, *Attila* was choſen King of the *Huns*.

5. *Krembs*, *Cremeſia*, about 30 Miles W. from *Vienna*, has its Name from the ſmall River *Crembs*, which (not far from this Town) empties it ſelf into the *Danube*. 'Tis a well built and neat Town, thought to be larger than *Presburg* in *Hungary*. The Citizens have a great Trade, eſpecially at two Fairs, whereof the one begins on St. *James*'s Day, and the other on St. *Simon* and *Jude*'s; each of them laſts 14 Days; during which Time, the Streets are continually crowded with Merchants and Tradeſmen out of all Parts of *Germany*, *Bohemia*, *Moravia*, *Hungary* and *Poland*. It ſuffer'd much during the Civil Wars of *Germany*.

6. *Melck*, a pleaſant Town on the Banks of the *Danube*, above *Crembs*, about 48 Miles W. from *Vienna*. Some think it to have been an ancient *Roman* Colony, formerly named *Claudionum*. But *Laxius* ſays, That *Julius Ceſar* being in Love with the pleaſant Situation of this Town, call'd it *mea Dilecta*, which was afterwards corrupted into *Medelick*. And to make the Story formal, he further tells us, That the ſaid Emperor built 3 Forts in this Country, the firſt whereof was this *Medelick*; the 2d he named *Turris Mirabilis*, or *Wunderburg*; and the 3d, *Caſtrum Ferreum*, *Eyſenburg*. And one main Argument whereby they endeavour to prove this to be a *Roman* Colony, is founded on the Pictures of *Romulus* and *Remus* ſucking a Wolf, cut in the Wall of the great Church.

In the Monaſtery, are preſerved ſeveral Relicks of St. *Colman*, deſcended of the Royal Blood of *Scotland*, who, in his Paſſage through this Country towards *Jeruſalem*, was barbarouſly murder'd by the Boors of *Stockerau*, 4 *German* Miles from *Vienna*, in the Year 1012. His Body was hung on a Tree; but having for the Space of a Year and half endur'd the Weather uncorrupted, was at laſt taken Notice of as attended by an extraordinary Providence, and conceived able to cure Diſeaſes, and work other Miracles. The firſt that try'd the Experiment, was one *Rumaldus*, who having a Son tormented with the Gout, cut a Piece of St. *Colman*'s Fleſh from the Tree, (whereupon a freſh Stream of Blood is ſaid to have iſſued) and applying it to the Place, found preſent Remedy. The Noiſe of this Cure immediately retriev'd the Saint's Reputation, who, ſome ſay, had been executed as a Vagabond and Spy, and procur'd an honourable Interment for his Corps near *Stockerau*. About a Year after this, the *Danube* (they ſay) overflow'd its Banks, and deſtroyed moſt of the Churches in this Country; only this ſmall Church was miraculouſly preſerved in the midſt of the Inundation. Upon this, the Body was tranſlated by *Meginhard* Biſhop of *Eichſtadt* to *Melck*, from whence 'twas afterwards conveyed into *Hungary*, his Head being kept for ſome time at *Stulweiſſenburg* or *Alba Regalis*. Upon a Hill near *Melck* ſtands a *Benedictine* Monaſtery, which challenges the Pre-eminence of all the reſt in *Auſtria*. 'Tis richly endow'd; and beſides that of St. *Colman*, has the Monuments of many other great Perſons.

7. *Neuſtatt*, or *Neapolis Auſtriæ*, is another principal Town of this Country, about 27 *Engliſh* Miles S. from *Vienna*, on the Road to *Styria*, in a Bog near the middle of a large Plain; ſo that it may be ſeen every Way at a good Diſtance. 'Tis encompaſs'd with a Ditch, and two Walls, which render the Place ſo impregnable, that the *Turks* having long beſieg'd it with the main Force of their Army, offer'd to retire, provided the Town would give them ſome falſe Trophy to carry to *Conſtantinople*: Upon which they ſent them a Whipping-Poſt. Over the chief Gate, they have the 5 Capital Vowels, as over the Palace at *Vienna*, which they interpret thus, *Aquila Electa juſte omnia vincit*; *i. e.* The Eagle being choſen juſtly, overcomes all. 'Tis a Biſhop's See, Suffragan to *Saltzburg*, the ordinary

dinary Prison for Criminals of State, and ſuffer'd much by the *Turks* in 1683.

8. St. *Polten*, on the River *Draſam*, about 32 Miles W. from *Vienna*, a pretty compact Town. It has its Name from the Monaſtery and Church of St. *Hippolitus*, which gave Occaſion to building this City. The Monaſtery was built in the Reign of King *Peppin*, and enriched by Pope *Zachary* with the Relicks of St. *Hippolitus* and St. *Quirinus*, for the Aſſiſtance they gave him againſt the *Saracens*. It was firſt wall'd in 1266, by the Biſhop of *Paſſau*. The only Thing remarkable in it, is the Abbey, the Church, and the Town-Hall.

9. *Pechlarn*, the Remains of an ancient Town and Fort on the *Danube*, about 40 Miles W. from *Vienna*. *Cluverius* ſays, 'twas anciently call'd *Arlape*, or *Ara Lapidea*, from whence the little River on which it ſtands retains the Name of *Erlaph*. It appears by old Monuments and Inſcriptions found near it, that it was one of the Harbours of the *Roman* Navy, and once the greateſt Strength in the Country, for which the *Romans* call'd it *Præclara*; and hence comes the modern Name, by the Corruption of the Word. 'Twas formerly the Reſidence of the Princes of *Auſtria*, but now only noted for making Earthen Ware.

Other Places of Note in this Country are, 1. *Bruck*, a neat Town on the Borders of *Hungary*, noted for a Yearly Fair of Cattle. 2. *Horn*, a ſtrong Fort near the Borders of *Moravia*, about 39 Miles N. W. from *Vienna*. 3. *Ips* on the *Danube*, about 52 Miles W. from *Vienna*. *Cluverius* takes it to be the *Pons Iſis* of *Ptolomy*. 4. *Tyrnſtein*, where our *Richard* I. was kept Priſoner.

The Cities and Towns in Upper Auſtria.

1. LINTZ, by the Latins called *Lentia*, *Linzum*, and *Aurelianum*, is the chief Town of *Upper Auſtria*, and lies on the *Danube*, about 95 Miles W. from *Vienna*. 'Tis ſituated in one of the moſt pleaſant Places of the Emperor's Dominions; ſo that many of the Nobility have Country-Houſes near it, where they hunt, hawk, fiſh, &c. in the Summer. The Suburbs on the other Side of the River conſiſt chiefly of the Houſes of the Nobility and Gentry, and are join'd to the Town by a large Wooden Bridge. Moſt of the Suburbs were deſtroyed by the *Swedes* during the Civil War; but the Town had no great Damage. The Emperor *Matthias*, in his Return from the Diet at *Ratisbon* in 1614, was ſo much pleas'd with the Situation of this Place, that he kept his Court here a whole Year: During which Time, all the Branches of the Houſe of *Auſtria* had a Meeting at this Place, in order to make a League Offenſive and Defenſive againſt all Potentates that ſhould offer to oppoſe them, which had no other Effect but the Ruin of a *Lutheran* Church and Univerſity, where, as *Cruſius* ſays, there had in 20 Years Space been educated 3000 Counts, Barons, and other Perſons of Quality. Near this Place the Jeſuits have now a College, plentifully endow'd with a good Library. There are two Fairs Annually held here, at *Eaſter* and *Bartholomewtide*, when 'tis much frequented by Strangers. *La Forreſt* ſays, the States of *Upper Auſtria* aſſemble here, and that the Town is defended by a good Caſtle. The late Emperor retir'd hither during the Siege of *Vienna*, and the Elector of *Bavaria* took this Town in 1703. Dr. *Brown* ſays, this City is not large, but neat, all the Houſes being of a white Free-ſtone, the Market-place ſpacious and handſome, and a Caſtle on a Hill, fortified after the modern Way. The Emperor's Army rendezvous'd here when *Soliman the Magnificent* beſieg'd *Vienna*. It was beſieg'd by 40000 Peaſants in *Ferdinand* II.'s Time; but reliev'd by Count *Pappenheim*. Mr. *Ray* ſays, the City is built after the *Italian* Faſhion, with a large ſquare Piazza, adorn'd with two noble Fountains; and that from the Emperor's Palace, which ſtands on a riſing Ground, there's a noble Proſpect of the *Danube*, and of the neighbouring Country. 'Tis noted for the excellent Gun-Barrels made here.

2. *Ens*, by the Latins called *Anaſum*, *Anaſianum*, and ſometimes *Enſium Civitas*. 'Tis a fair, ſtrong, and well built City, on the River *Ens*, which ſeparates *Upper* and *Lower Auſtria*, and lies 85 Miles W. from *Vienna*, near the Mouth of the *Ens*, where it falls into the *Danube*. 'Tis the Remains of a large and famous City, formerly called *Lauriacum*,

Digitized by Google

riacum, according to *Antonin*, and the *Notitia Imperii*. Some call it *Colonia Aureliana Lauriacenſis*; and *Lazius* thinks it was the Metropolis of *Noricum Ripenſe*, and built by the Emperor *Marcus Aurelius Antoninus* in his Expedition againſt the *Marcomanni*. Part of the ancient Name continues in the Village of *Laurich*, now called *Larch*, a ſmall Village on the Banks of the *Danube*, and formerly Part of this City, which was about 2000 Paces in Length, and reached from the *Danube* as far as St. *Florian*'s Monaſtery; which is now quite without the S. Wall of this City. About 903, it was deſtroyed by the *Huns*, being at that Time the Seat of the *Roman* Emperors. From its Ruins ſprung the preſent City. It was formerly an Archbiſhop's See, and, according to ſome *German* Authors, was founded by St. *Peter* or St. *Mark*; which Conjecture has occaſion'd an old Inſcription on the Market-place, the two laſt Lines of which are as follow;

Hæc de Laurenco reliqua eſt: Vir Marcus in Orbe.
Cum Luca Chriſti dogma profeſſus erat.

Some will have it, that St. *Laurence* was their Apoſtle, and founded their Cathedral, which was dedicated to him. Here they will alſo have our King *Lucius* to have been educated in Chriſtianity, but without any good Authority. 'Twas formerly govern'd by Counts of its own; but was bought from their laſt Count by *Rudolph* I. and, together with St. *Florian*'s Monaſtery, pays Annually a Gold Ring of 5 Ducats Value, as a Token of Homage to the Duke of *Auſtria*, and was added to their Hereditary Dominions. The Elector of *Bavaria* took this City in 1703.

3. *Steyer*, a neat and compact Town, on the Conflux of the *Steyer* and *Ens*, from whence its Suburbs, *Steyerdorff* and *Enſdorff*, have their Names. It lies about 10 Miles S. from *Ens*. 'Tis chiefly inhabited by Cutlers, Smiths, and other Ironmongers, who, by the Conveniency of the *Danube*, have a great Trade with the neighbouring Countries. *Lazius* ſays, the *Geſatæ* were the ancient Inhabitants of this Country, and ſuppoſes the Town to be *Ptolemy*'s *Geſidunum*, whence the pleaſant Valley on which it ſtands is called *Gaſtenthal*; but it ſeems rather to derive its Name from the Monaſtery of *Garſten*, that ſtands near this City, and is well worth a Traveller's Notice.

4. *Wels*, on the *Draun*, about 10 Miles S. from *Lintz*. *Cluverius* ſays, That it was the *Colonia Aureliana Antoniana* Ovil. The *Norici*, the ancient Inhabitants, call'd it *Willabs*, from whence the *Romans* call'd it *Ovilaba*, or *Ovilara*. *La Forreſt* ſays, the Emperor *Aurelius* built it after his Expedition againſt the *Scythians* in *Pannonia*.

5. *Everding* or *Efferding*, about 3 Leagues W. from *Lintz*, near the *Danube*. 'Tis a ſtrong Town, defended by two Caſtles, one within the Walls, and another without, called *Schawnburg*, which gave Title to the Counts of that Name, a Branch of the Family of *Julbach*. In 1367, it was ſold, with its Dependencies, to the Biſhop of *Paſſau*, but fell afterwards to the Counts of *Schawnburg*; by one of whoſe Daughters, married to the Count of *Staremberg* about 1551, it came to that Family.

6. *Gemund*, ſo called, becauſe it lies on the Mouth of the *Draun*, where it falls into the *Gemunder* Lake. It has a conſiderable Trade in Salt, which is made here, and exported as far as *Vienna*. It lies about 22 Miles S. W. from *Ens*.

7. *Freyſtatt*, on the Borders of *Bohemia*, about 22 Miles N. from *Ens*. The Town is well built, but not ſtrong, being taken by a handful of Boors, and ſoon loſt by them during the Civil Wars of *Germany*. 'Tis famous for a palatable Beer, which is exported into the neighbouring Country. They have an Annual Fair, which begins at the Converſion of St. *Paul*, laſts 14 Days, and is very much frequented, which brings them a great Trade. The adjacent Country is called *Machland*, and gave Title to the Counts of *Burckhauſen* and *Machland*, who being extinguiſh'd about 1186, it fell to a Branch of the *Auſtrian* Family, called Counts of *Hardegg*. *La Forreſt* mentions a Town called *Lichtenſtein* in *Lower Auſtria*, near the River *Wien*, which gives Name to a Principality; but we do not find it in any of our Maps.

Stain is alſo a ſmall City on the N. Side of the *Danube*, a little above *Krembs* to the W. with a Bridge over the *Danube*; and *Cloiſter-*

Cloiſternewburg is another ſmall City, about 5 Miles W. from *Vienna*, which has eſcaped the Deſcription of our Geographers.

The Dutchy of Styria.

THO' this Province, with *Croatia*, *Windiſmark*, *Carniola*, and *Carinthia*, are now reckon'd Parts of *Germany*, they were formerly accounted Part of *Pannonia*; but loſt that Denomination by falling to the Houſe of *Auſtria*. *Styria*, in *German Steyrmarck*, is by *Marcellinus* and *Aurelius Victor* thought to be the *Roman* Province called *Valeria*, in Honour of *Dioclesian*'s Daughter; but *Valaterannus* thinks it was *Japidia*, and that *Croatia* was *Valeria*. The ancient Inhabitants were the *Styri*, a Branch of the *Tauriſci* or *Norici*. 'Tis bounded by *Auſtria* on the N. with *Carniola* and *Sclavonia* on the S. *Saltzburg* and *Carinthia* on the W. and *Hungary* on the E. The Length from E. to W. according to *Moll*'s Map, is about 120 Miles; and the greateſt Breadth from N. to S. is about 85. 'Tis commonly divided into *Upper* and *Lower*: In the *Lower*, they have ſtore of Wine, Fruit, Fiſh, Veniſon, Mines, eſpecially of Iron, Salt-Springs, *&c.* They have now and then ſuch Plenty of Corn, that they complain of want of Vent for it; yet one bad Harveſt puts them in Danger of a general Famine. *Upper Styria* is more mountainous: Their principal Trade is in Wool and Sheep. They have alſo Plenty of Black Cattle in their Vallies, and exchange their Butter and Cheeſe for Bread and Wine with their Neighbours; for they have no Wine of their own Growth. The Air is wholeſomer than in *Lower Styria*, where the *Hungarian* Fever and Peſtilence are too common. Their ordinary Drink is ſorry ſmall Beer; but the better Sort have a ſharp thin Wine from *Styria*; yet Travellers are better pleas'd with their Entertainment here, than in moſt other Parts of the Empire. The People of this and the neighbouring Countries are troubled with extraordinary Swellings in their Throat, which frequently make them loſe their Voice and Senſes; ſo that in moſt great Towns, they have Hoſpitals for thoſe who are afflicted with ſuch Diſtempers. *Ortelius* ſays, he ſaw a Man in this Country, who had a Swelling of that ſort of ſuch a Bulk, that from his Ears down to his Breaſt, it was as broad as his Shoulders; and the poor Women are ſo much troubled with thoſe Swellings, that ſome of them are forc'd to throw them over their Shoulders when they ſuckle their Young. This is ſuppoſed to proceed from their drinking of Snow-Water, which falls down from the Mountains; becauſe thoſe who live well, and drink good Wine and Beer, are ſeldom troubled with it. Their common Language is *Sclavonick*; but in Cities and Towns, they ſpeak *High-Dutch*, which is made uſe of in their Courts of Judicature, and Papers of State, and is the common Language in *Upper Styria*, where they ſpeak it better than in the Circle of *Bavaria*. We have given an Account of their Government in the Deſcription of the Emperor's Court. 'Twas formerly a Marquiſate, becauſe a Frontier Country, which divided the Empire from *Sclavonia*. The Emperor *Frederick Barbaroſſa* made it a Dutchy. It came to the Houſe of *Auſtria* by Marriage; but that Branch being extinguiſhed, they choſe a noble *Hungarian* for their Prince; but depos'd him becauſe of his Tyranny, and choſe *Ottacar*, Son to the King of *Hungary*, in his ſtead, who being ſlain in War with the Emperor *Rodolph*, they have ſince been ſubject to the Houſe of *Auſtria*.

The chief Towns in Lower Styria.

1. GRATZ, or *Gracz*, in Latin *Gracium*, the Metropolis of the Dutchy, lies on the River *Mur*, in Long. 35. Lat. 47. 17. 60 Miles towards the S. E. from *Vienna*, and 35 W. from the Borders of *Hungary*. 'Tis a neat City, in a pleaſant and fruitful Country, fortified with a Wall and Ramparts, and almoſt impregnable, by reaſon of a Caſtle on a high Hill, which commands the neighbouring Country. *Cluverius* thinks it to be *Ptolomy*'s *Murcela*; but *Lazius* differs from him, and places *Murcela* above 3 *German* Leagues further E. on the ſame River. In the Duke's Palace, there's a good Library in two Rooms, pretty well ſtock'd with printed Books, and ſome MSS. In the Gallery, among other Rarities, there's a fine

Draught

Digitized by Google

Draught of *Charles the Great*'s Wars, and a Repository of Curiosities, with a good Collection of *American* and *Indian* Idols. The Jesuits have a College here richly endow'd with large Privileges, where they give Degrees in all Faculties, and have abundance of Scholars. This Town is the Residence of the Governor, as it was formerly of some Arch-Dukes, who call'd themselves by its Name; particularly *Ferdinand* II. before he was chosen Emperor.

2. *Marchburg*, a well built Town on the Banks of the *Drave*, about 15 Miles W. from *Tettau*, according to *Sanson*, and 28 S. from *Gratz*. *Lazius* says, There are many old *Roman* Monuments found here, and supposes it to be the ancient *Castra Marcina*, or *Mariana* of *Ammianus Marcellinus*. This Town and its District was formerly a County; but their Counts failing, it came to the Lords of *Scherfenberg*, and afterwards with some other Counties to the House of *Austria*.

3. *Pettau*, an ancient *Roman* Town, on the Banks of the *Drave*, then the Boundaries of their Empire on that side, and by them call'd *Petavium*. The Country People call it *Duii*; 'tis not large or well built, but is noted for having been a Bishoprick above 1300 Years. The Bishop is Suffragan of *Saltzburg*, the Archbishop of which is Lord of the greatest Part of the Town. Some ancient Geographers place it in the Territories of the old *Norici*; but *Ptolomy* places it in *Upper Pannonia*. It lies 30 Miles S. E. of *Gratz*.

4. *Rakersburg* or *Rakelsburg*, a strong Fort on the Banks of the *Muer*, and a great Bulwark against the *Turks*. The *Latins* call it *Raclitanum*, and the *Sclavonians Radelony*. The adjacent Country is stock'd with all kinds of Fruit, especially Grapes. The Burghers have the sole Privilege to buy all the New Wines from *Michaelmass* to St. *Catherine*'s, afterwards the Rusticks are at liberty to sell to whom they please. There's an Office here, where Toll is paid for Goods brought hither from *Hungary*, and exported from hence. It lies according to *Sanson*, about 32 Miles S. E. from *Gratz*.

5. *Windisch-Gratz*, so call'd to distinguish it from *Bavarian Gratz*. It was the ancient Boundary of the *Sclavonians*. *Lazius* thinks it to be *Ptolomy*'s *Vinudsia*, because of the ancient Monuments found here. Others say it was *Vindum*, and built by the *Jappges*, the old Inhabitants of *Carniola*; 'tis only noted for its Antiquity, which is also disputed by some. It lies about 38 Miles S. W. from *Gratz*.

6. *Leibnitz*, a fair Market-Town near the *Muer*, and the usual Residence of the Bishop of *Seccau*, hence call'd Bishop of *Leibnitz*. The Bishoprick was founded by the Archbishop of *Saltzburg* in 1218, and is part of his Province. The Manor of *Seccau*, whence the Bishop has his Title and Revenue, lies in *Upper Styria*, two or three *German* Leagues from *Judenburg*. It lies according to *Lazius* on the Conflux of two Rivers which fall into the *Muer*, about five *German* Leagues S. E. of *Gratz*.

7. *Luetenberg*, a Market-Town on the *Muer* and Borders of *Hungary*, famous for the best Wine in those Parts. There are several good Baths in the Neighbourhood of a temperate Heat, much resorted to by Foreigners. Near this Town lie the Borders of *Hungary* on the E. of the County of *Cilly* on the W. of *Sclavonia* on the S. and of the Dutchy of *Styria* on the N. According to *Lazius*, it lies near 2½ *German* Leagues S. E. from *Rackelsburg*, and 9 from *Gratz*.

Other Market-Towns of less Note are, 1. *Furstenfeld* on the Borders of *Hungary*, supposed to be the *Roman Aqua*, about 42 Miles S. from *Gratz*. 2. *Friburg*, supposed to be the *Roman Cordobianca*, about 37 N. E. from *Gratz*. 3. *Rain*, on the Borders of *Carniola*.

Towns of Note in Upper Styria.

1. *Judenburg*, a fair and well built Town on the Bank of the *Muer*, noted for Two great Annual Fairs for Cattle, and other Marchandise. The Duke of *Styria* has a Palace here, little inferior to that of *Gratz*, where his Deputy resides. The Jesuits have a College here, endow'd with the Revenues of a *Dominican* Monastery. The Country, for two *German* Leagues down the River, is very pleasant and fruitful. It lies near 40 Miles W. from *Gratz*.

2. *Bruck* on the *Muer*, Lat. *Muripons*, or *Bongo ad Murum*, an ancient Town, 25 Miles N. W.

Digitized by Google

N. W. from *Gratz*. The Conveniency of the Situation occasions the Emperor to call here a General Diet of the States of *Styria* and *Carinthia*. There's little of Note in it, except two Monasteries of *Franciscans* and *Capuchins*.

3. *Leuben*, Lat. *Lubenum*, a neat and pleasant City on the *Muer*, about 27 Miles N. W. from *Gratz*. This Town has a large Barony formerly subject to the Counts of *Schrobenhausen*, a *Bavarian* Family, then to the Duke of *Carinthia*, but now to the Arch-Dukes of *Austria*. In 1292, it was taken and plunder'd by the Archbishop of *Saltzburg* and Duke of *Bavaria*, while at War with *Albert* of *Austria*. Within a Mile of this Town lies the rich Nunnery of *Gofs*.

4. *Eisenartz*, so call'd from the Mines and Forges of Iron, with which it supplies the neighbouring Country. They pretend to have Steel enough to furnish the whole Empire. In the Parish Church dedicated to St. *Oswald*, a *British* Saint, they have a *German* Inscription, implying, That the Mines were discover'd in 712, and have continu'd since without any sensible Decay, tho' vast Numbers of Men are constantly employ'd in them, which occasions a yearly Fair for Hemp, Line, Tallow, Leather, and other Necessaries for the Miners, in exchange for Iron and Steel. They have 19 Mills on a small Rivers for their Works, which were formerly manag'd by 19 Officers; but the Emperor *Ferdinand* II. has incorporated these Mines of *Styria*, and those of *Austria*, under a Lieutenant. It lies 40 Miles N. W. from *Gratz*.

5. *Rotenmann*, on the Borders of *Saltzburg*, about 8 *German* M. above *Leuben* to the W. and about 62 Miles N. W. from *Gratz*. *Luzius* thinks it to be *Anthony's Montana Castra*, which is supported by a *Roman* Inscription on a Mountain near this Place. There are abundance of red Hills and Rocks in the Neighbourhood. The *Lutherans* had formerly a Church near this Place, which in 1599 was destroyed in a Quarrel with the *Calvinists*.

6. *Knittelfield*, on the *Muer*, a *German* M. from *Judenburg*. 'Tis a fair and neat Town in a pleasant Country, has a handsome Parish Church and Hospital, and other publick Buildings. It lies about 36 *English* Miles N. W. from *Gratz*. The principal Rivers of *Styria*, are the *Drave* and the *Muer*.

The Town and County of Cilley.

THis being part of *Styria*, according to *Moll* and *Sanson*, we shall describe it here. This noble and ancient City is by *Pliny* call'd *Celeia*, and by other *Latins Celia*, *Celia*, *Zelia* and *Cilia*: It stands on the River *Saan*, about 46 Miles S. from *Gratz*, and 30 W. from the Frontiers of *Sclavonia*, in a pleasant and fruitful Country. The great number of *Roman* Coins, Medals, and other Antiquities daily found in and about this Place, proves it to have been a considerable Town in their Time. They have one remarkable Monument, being the Ruins of a vast Marble Pillar, each Stone of which is above a Waggon Load; there are several fair Monasteries in the Town, the chief of which is that of the *Minorits*, which contains the Monuments of the ancient Counts of *Cilley*. The City is defended by regular Fortifications, an ancient Fort without, and a Castle within the Town. It held out a Siege against the *Turks* in 1492, and repulsed them under the Conduct of *George Baron* of *Herberstein*. The County is large, and reaches as far as the *Trojan* Hill from the Bridge of *Pettau*, and includes several *Sclavonian* Forts. It was formerly subject to Counts of its own, who were also Barons of *Sanneck*. Their First Count was created by the Emperor *Lewis* IV. in 1339, with the Consent of the Arch-Duke of *Austria*; and the Emperor *Sigismond* made them afterwards Independent Princes of the Empire, and call'd them to the Diets without Consent of the House of *Austria*, who before that time were always accounted the Supreme Lords of the Place. Upon which *Frederick*, Duke of *Austria*, declar'd War against Count *Ulrick*, their Second Prince, and being afterwards chosen Emperor, was too strong an Enemy for *Ulrick*, who by the Assistance of *Albert* of *Austria*, *Frederick's* Brother, not only defended his Territories for a time, but over-ran most of *Styria* and *Carinthia*. At last he was kill'd in Battle by *Ladislaus*, Son to *Huniades*, in 1456, when *Frederick* IV. seized the Country; and it has ever since been subject to the House of *Austria*.

Other

Digitized by Google

Other Places of Note here are,

1. *Troia*, now a ſmall Village not far from *Cilley*, but anciently a famous City, built by the *Mœulli*, a Branch of the *Japides*. In the 31ſt Year of our Saviour, this City was taken and deſtroyed by the Emperor *Auguſtus*. In Remembrance of which, ſays *Lazius*, the Country People to this Day call all waſte and deſolate Places *Troia's*. He adds, That abundance of Antiquities are found here and in the neighbouring Towns.

2. *Sachſenfeld*, a Market-Town on the *Saan*, about a *German* League from *Cilley*, on the Road to *Laubach*. Some think it had its Name from a Colony of *Saxons* ſent hither by *Charlemagne*, who diſpers'd that People into ſeveral Colonies of the Empire in order to prevent their Rebellion; but if it were ſo, they have now loſt the *Saxon* Language; for in this Town, and in the neighbouring Country, they ſpeak *Sclavonic*, with a Mixture of the *Auſtrian* Dialect.

3. *Saaneck*, ſo call'd from the *Saan*, on which it ſtands. It was formerly ſo conſiderable as to give Title to Barons and Counts, but now only a ſmall Village.

4. *Rohitſch*, a fair Market-Town on the Borders of *Croatia*: It has a Fort of the ſame Name near it, and is mortgag'd to Counts, but the Barons of *Weltz*.

5. *Waraſſin*, or *Waraſdin*, on the Borders of *Styria*, *Hungary* and *Sclavonia*, ſuppoſed to be *Antonin's Variana Caſtra*, which *Lazius* ſupports by divers Arguments from ſeveral Monuments of Antiquity found about it. Being a Frontier Town, 'tis regularly and well fortified. It lies about 40 *Engliſh* Miles N. E. from *Cilley*, and 35 S. E. from *Gratz*.

6. *Copreinitz*, Lat. *Capronia*; 'tis ſtronger than *Waraſin*, but noted for little elſe. *Globitzer* their Governor got himſelf and the Town great Reputation, by repulſing the *Turkiſh* Army; but was afterwards, in 1581, the chief Inſtrument of its Overthrow.

The Dutchy of Carniola,

BY the *Germans* called *Crain*, has *Carinthia*, and Part of *Styria*, on the N. *Iſtria*, and the Gulph of *Trieſt*, on the S. Part of *Carinthia*, with the *Alps* and Dominions of *Venice*, on the W. and *Sclavonia* and *Croatia* on the E. The greateſt Length from N. W. to S. E. is about 105 *Engliſh* M. and the Breadth from N. to S. according to *Moll*, is about 58, But Dr. *Nicholſon* obſerves, That our Modern Geographers uſually Contract it more than they ought. It takes its Name from the ancient *Carni*, a Branch of the *Scythians*, who had for Neighbours the *Japides*; whence this and other adjacent Provinces were call'd by the general Name of *Japidia*. In the Time of *Auguſtus*, the *Romans* ſubdued this Country; but were expell'd by the Princes of *Bavaria*, who were then Lords of this Country, under the Title of *Oreinburg*. It was afterwards ſubdued by the Dukes of *Carinthia*, who erected it into a Marquiſate depending on the Houſe of *Carnsten*. Thus it continu'd till the Emperor *Frederick* II. made it Independent: Afterwards, the Family of *Engelbrecht*, their Marquiſſes, failing, it came to the Branch of *Auſtria Bamberg*, whoſe Line alſo failing, it came to *Ottocar* King of *Bohemia*, who being ſlain in Battle againſt the Emperor *Rudolph* I. he gave *Carniola* to *Mainhart* Duke of *Carinthia*, and Count of *Tyrol*; after whoſe Death, the Emperor *Ludovic* IV. made it a Dukedom, and gave it to the Dukes of *Auſtria Habſburg*, in whoſe Right the Emperor enjoys it.

The Country is mountainous; but has many large and pleaſant Vallies, which abound with Wine, Oil and Corn. It has many great Rivers; the Chief of which are, the *Save*, *Laubach*, and *Gurck*.

The modern Inhabitants are a mixture of *Germans*, *Italians* and *Sclavonians*. In Cities, they generally ſpeak *High Dutch*, except in *Laubach*, where they ſpeak a broken *Italian*. The Country People ſpeak *Sclavonic*; but in their Courts of Judicature, and Papers of State, they uſe the *German*.

'Tis divided into Higher and Lower.

The Chief Towns in Upper Carniola.

1. LAck, or *Biſhopſtack*, ſo call'd, becauſe 'tis the Reſidence of the Governor, who is Deputy to the Biſhop of *Freyſing* in

Digitized by Google

Bavaria, to whom the Emperor *Henry* III. gave this Town, with its Diſtrict, which reaches 10 *German* Leagues round, and contains 200 Villages. In 1451, this Town was plunder'd and burnt by the Count of *Cilley*'s General, but has ſince been more ſplendidly Rebuilt, and better Fortify'd. *Conrad* Biſhop of *Gurck*, who was ſet up by the Pope in Oppoſition to One whom the Emperor had named Biſhop of *Freyſing*, was murder'd here by his Pages, who robb'd him of 5000 Ducats of Gold, and buried him in his own Garden; where the Corps was found at laſt, and the Murderers put to Death in 1433. The Town lies in Long. 33. 22. Lat. 46. 30. 30 Miles from the Frontiers of *Venice*, and 12 S. of the Frontiers of *Corinthia*.

2. *Crainburg*, on the Banks of the *Save*, 7 Miles N. from *Biſhopſtack*, on the Top of a ſmall Hill fortified with a ſtrong Caſtle: It has Three Churches, and in the Suburbs a fair Monaſtery of *Capuchins*. *Laxius* thinks it to be *Japodum Noviodunum*, becauſe it anſwers *Antonin*'s Latitude, that in their ancient Records 'tis call'd *Noviodunum*, the *Laſ.* for *Newburg*; and becauſe there are *Roman* Coins and Medals dug up every Day in and about the Town, which, with other Monuments, ſhew it to have been a *Roman* Colony. It gave Title to the Marquiſſes of *Crainburg*, formerly mention'd. There is a good Bridge here over the *Save*.

3. *Ratmanſdorff*, on the N. Banks of the *Save*, a little above *Crainburg*. *Laxius* ſays, a great many *Roman* Antiquities are found near this Place; and that the Noble *Styrian* Family of *Ratmanſdorff* have their Title from hence, tho' none of 'em have been Lords of this Place for a great while.

4. *Stain*, on the River *Stretz*, noted for a large and rich Monaſtery of *Franciſcans*.

The Chief Towns of Lower Carniola.

1. LAubach, or *Labach*, which lies on a River of the ſame Name, and is the Metropolis of the Dutchy. It lies about 15 Miles E. from *Biſhopſtack*. *Cluverius*, in his *Italia Antiqua*, contradicts ſome modern Geographers, who fancy this to be the ancient *Nauportus*, where *Jaſon* and his *Argonauts* landed, and alledges this Town roſe from the Ruins of the ancient *Hemona*; but *Laxius*, whoſe Authority prevails with moſt late Writers, endeavours to prove this to be the true *Nauportus*, where *Jaſon* landed; who, as Hiſtorians inform us, ſet out from *Argos Pelaſgicum* in *Theſſaly*, and ſail'd to *Colchos*, on the E. ſide of the *Euxine*: But being purſued by the K. of *Colchos*'s Fleet, they bore Northward, and entring the Mouth of the *Danube* they ſail'd up to the Conflux of the *Danube* and *Save*; and then taking up the latter, they came to the Mouth of the *Laubach*, and landed at this Town; from whence they travell'd by Land to the *Adriatic* Sea, and then return'd to *Greece*. But we leave the Reader to judge, how *Jaſon* and his Companions came to be ſo well acquainted in thoſe Days with Navigation and Geography, as to perform ſuch a Voyage. *Laxius* adds, That the *Latobici*, a Branch of the *Japides*, chang'd the Name of this Port into *Labacum*. Tho' the Air about it be unwholſom, the Town is well built, and very populous. They have a large Caſtle, with a good Gariſon; but being commanded by a neighbouring Hill, is not very ſerviceable; nor is the Town very ſtrong, eſpecially towards the River. It held out a memorable Siege, when *Albert*, Brother to the Emperor *Frederick*, and Count *Ulric*, attack'd it, while he was at *Aix la Chapelle* receiving the Crown of the Empire; from whence he return'd, defeated them, and rais'd the Siege. 'Tis a Biſhops See, formerly Suffragan to the Patriarch of *Aquileia*, but now depends immediately on the Pope.

2. *Zirchnitz*, a Town and a Lake of the ſame Name, call'd in *Latin*, *Lacus Circnitenſis*. It lies 20 Miles S. E. from *Laubach*. The Town is inconſiderable, either for Fortifications or Bulk, as not containing above 300 Houſes; but is chiefly remarkable for this famous Lake, which is about 4 *German* M. in Length, and 2 in Breadth, encompaſs'd with Mountains and Foreſts at ſome diſtance, and on the S. has a Foreſt of Pear-Trees. Every Year in *June* the Water ſinks under Ground, through a great many large Holes in the bottom, and returns in *September* with ſuch violence, that it riſes to the height of a Pike, and covers all the Ground again. When the Water

Digitized by Google

Water retires, it ſpeedily yields Graſs, which affords good Paſturage to the Cattle and Deer from the neighbouring Hills and Foreſts, that retire again before the Water returns. There's great ſtore of Carps, Eels, Tench, and other Fiſh, in the Lake, which none dare Catch without a Licence from the Prince of *Eckenburg*, who is Lord of the Place, till the Water retire; and then every Man has liberty to take what he can; and the Peaſants improving the Opportunity, catch abundance as they retire with the Water. The Neighbours ſay, The Lake conſtantly obſerves this Courſe, but can give no Account of the Reaſon: Some fancy this to be *Strabo's Lugea Palus*. But Dr. *Nicholſon* juſtly obſerves, That if it had been ſo, 'tis ſtrange that the Ancient Philoſophers ſhould take no Notice of this ſtrange Phenomenon in Nature. *Baudrand* ſays, That this Lake produces Corn upon the Receſs of the Waters, and affords good Hunting to the Neighbourhood.

3. *Laas*, which lies near this Lake upon a ſmall River that runs into it, about 20 Miles S. E. from *Zirchnitz*, according to *Sanſon*. 'Tis noted for a Breed of well-ſhap'd Horſes, tho' much inferiour for Service to thoſe bred in *Karſtia*. Count *Cilley* attack'd this Town in 1435, but was ſhamefully repulſed.

4. *Upper Laubach*, alias *Werdick*, about 10 Miles S. W. from the other *Laubach*, on the ſame River. 'Tis a great Mart for *Italian* Goods brought hither over the Mountains from *Goritz*, and ſhip'd off for ſeveral Parts of *Germany*.

The Province of Windiſchmarch;

IN *Latin*, *Vinderum Marchia*. Some reckon it a *Sclavonian* Province, and ſubject to the Emperor as King of *Hungary*, but not as Part of *Carniola* to which it adjoins; yet 'tis made Part of it both by *Moll* and *Sanſon*. Dr. *Nicholſon* obſerves, That the preſent Inhabitants comprehend under this Name all *Dalmatia* and *Liburnia*, and the Country betwixt the *Save* and *Drave*; but moſt Geographers underſtand only that Country which has the County of *Cilley* on the N. *Carniola* on the S. and W. and *Croatia* on the E. And ſo 'tis bounded by *Sanſon*, who makes it from N. W. to S. E. about 55 Miles long, and the greateſt Breadth about 30. The Country is mountainous and barren, inhabited, ſays Dr. *Nicholſon*, by the Offspring of the Antient *Venedi*, the moſt conſiderable Branch of the *Sclavonians*, whoſe Language they retain, with a ſmall mixture of *German*.

The chief Towns.

1. *Gotſche*, which gives Name to the neighbouring Country: The Inhabitants pretend 'tis a diſtinct Province; and that their Anceſtors were a Colony of *Germans* brought hither from *Swabia*, which their Language ſeems to juſtifie. The Town is large, ſtands in the middle of a Wood, but is not ſtrong.

2. *Seiſſenburg*, a Market-Town of Note on the Banks of the *Gurck*, which ſupplies them with Plenty of Fiſh, and is famous for the beſt Creviſes in that Country; 'tis ſubject to the Counts of *Auerſperg*.

3. *Newſtat*, or *Rudolphſwerth*, a little below *Seiſenburg*, on the ſame River, 18 Miles E. from *Cilley*. 'Tis a Place of great Antiquity, and was a *Roman* Colony, but ſubdued by the *Goths* under the Empire of *Decius*. *Dieterich* King of the *Goths* reſided here; and it had large Privileges from *Frederick* IV. for holding out againſt *Albert* of *Auſtria*, and *Ulric* of *Cilley*, in 1438. It has the beſt Wine in thoſe Parts, a large *Franciſcan* Monaſtery, and a good Bath at 4 Miles diſtance, much frequented by Foreigners. The Town is well fortified.

4. *Landſtraſt*, a ſtrong little Town encompaſſed with the *Gurck*; it was formerly deliver'd with another Town by the Houſe of *Auſtria* to the Counts of *Cilley*, as a Security for the Peace betwixt them. Near it there's a long Ridge of Hills, the Vallies among which were formerly a Wilderneſs for ſome *German* Leagues; but within theſe few Ages, they are well inhabited, and improved into good Paſturage and Meadows, by a Company of *Wallachians* who ſettled here; they call themſelves *Uſcoken*, and are of the *Greek* Church; they pay the Emperor no Tribute, but acknowledge him for their Sovereign, and furniſh him with Men on occaſion in Proportion to their Numbers. It lies about 8 Miles N. E. from *Rudolphſwerth*.

5. *Mesting*, on the River *Culp*, about 10 Miles S. E. from *Rudolphſworth*, on the Road from *Laubach* to *Croatia*, the Wood through which this Road lies is Rough and Stony, but the reſt of the Country pleaſant and fruitful. There are two large Foreſts belonging to the Town, one of Cheſnut-Trees, and the other of Oaks, from which the Inhabitants reap much Profit by feeding great Herds of Swine. In 1431, the *Turks* ſurpriz'd this Town, and cut off moſt of the Inhabitants. In 1578, they ſtorm'd and plunder'd it again, but returning with their Booty, were all cut off by an Ambuſcade of *Croats* and *Sclavonians*. Some make it the the chief Town of the Country.

6. *Reifnitz*, a noted Town on the Borders of *Carniola*, near the *Zirnicher* Sea; 'tis the chief Town of a Barony of the ſame Name, and the Place where the Imperial Trained-Bands in this Country muſter. The *Turks* burnt moſt of it down in 1480.

The Province of Friuli.

WAS anciently call'd *Forum Julii*, of which *Friuli* is a Contraction, or rather Corruption. *Julius Cæſar*, when he led his Armies this way, built the Town which gives Name to the Province; and hence alſo the neighbouring Hills were call'd *Alpes Julia*. *Latin* Writers of the middle Centuries call it *Regio Aquilegienſis*, becauſe moſt of it was given by the Emperors, *Otho* and *Conrad*, to the Patriarchate of *Aquileia*. The *Venetians* call it uſually *Patria*, becauſe the Republick had its Original here. D. *Nicholſon* ſays, This Province has *Carſtia* on the E. the *Marchia Trevigiana*, and part of the *Alps*, on the W. the great *Alps* which ſeparate it from *Germany* on the N. and the Gulph of *Venice* on the S. *Sanſon* and *Moll* take no Notice of the Name, nor are their Maps exact in the Diviſion of this Province, though they have the principal Towns. *Moll* reckons it in the Dominions of *Venice*; and both he and *Sanſon* make *Goritz* a diſtinct County, which Dr. *Nicholſon* makes a Part of *Friuli*. The Country is pleaſant and fruitful, and famous of old for a rich Wine, which *Pliny* preferr'd to the beſt in *Italy*. 'Tis water'd with many Rivers, the chief of which is *Tiamento*, which is navigable towards the Mouth, but too rapid for Navigation further up.

The ancient Inhabitants were the *Euganei*, who poſſeſſed alſo Part of *Marchia Trevigiana*, but were expell'd by the *Veneti*, and they by the *Galli-Ciſalpini*; then it fell to the *Romans*, and on the Decay of the Empire became One of the Four Dukedoms founded by the *Lombards*. The *Beringarii* were long Dukes of this Country, but ſubdu'd by the Emperor *Otho*, who gave great Part of it to the Patriarch of *Aquileia*, after which *Conrad* gave moſt of it to the ſame Patriarchate: But there were many Noble Families who retain'd large Eſtates, paying a ſmall Acknowledgment to the Patriarch; yet it ſtill retain'd the Name of a Dutchy, and their Princes pretended to as much Grandeur as ever, which at laſt prov'd their Ruin: For Duke *Lutprandus* being Jealous of the Growth of the Republick of *Venice*, made War upon them about 1020, but was vanquiſh'd, and loſt his Dominions; ſince which, the *Venetians* have poſſeſſed them. In 1420, The Patriarch of *Aquileia* being over-ballanc'd by the Power of the *Venetians*, he ſurrender'd his Intereſt to them as moſt able to defend it, yet ſtill he retains large Poſſeſſions, and good Revenues here, and has full Juriſdiction over all the Prelates in this Country, except thoſe in the Iſles of *Venice*, who are ſubject to the Patriarch of *Grado*. The Reaſon why Dr. *Nicholſon* reckons this Country, &c. Part of the *Auſtrian* Dominions, though ſome of 'em be ſubject to the *Venetians*, is, becauſe the Emperor was once the ſole, and is ſtill the chief Proprietor of them: It appears by *Baudrand*, and others, that a conſiderable Part of it is ſtill ſubject to the Emperor, particularly the County of *Goritz*, *Aquileia* with its Territories, and *Gradiſca*.

The chief Cities and Towns.

1. *Aquileia, or Aquileja*; 'twas made the Metropolis of *Iſtria* and *Venetia*, by *Antoninus*; and afterwards of *Italy*, by the *Weſtern* Emperors. Authors are not agreed as to its Founder; ſome aſcribe it to one *Aquilius*, who came from *Troy* with *Aeneas*, and

and others ſay, that the *Romans* having encamp'd a long time on the Place where it ſtands, were the firſt who built it, and gave it this Name from the *Eagle* which was their Standard. *Livy* ſays, 'twas built in the Year 565 of *Rome*, during the Conſulſhip of *Martius Philippus* and *Sept. Poſthum. Albinus*, or as *Berkelius* ſays in his Notes on *Steph.* of *Byzantium*, becauſe an *Eagle* came flying towards it when they were building. Many Years after the Seat of the *Præfectus Prætorio*, *Auguſtus* kept his Court here, and gave it the Name of *Roma Altera*. *Tiberius* liv'd here with his Wife *Julia Auguſtus*'s Daughter, before he came to the Empire; and thoſe Two Princes did all they could to Imbelliſh it. They acquir'd great Honour by holding out a famous Siege againſt *Maximinus* the Tyrant, in Defence of the Emperors *Maximus* and *Balbinus*, when the Women were ſo reſolute, that they parted with their Hair to make Bow-ſtrings for the Garriſon. In remembrance of which, the Senate dedicated a Temple here to *Venus the Bald*. *Maximinus* was kill'd under the Walls, and all his Children put to the Sword, for which the Soldiers gave this Reaſon, *Peſſimi canis catulus non eſt relinquendus*, *i. e.* That all the Whelps of ſo bad a Litter ought to be deſtroy'd. It was afterwards ruin'd by *Attila* and his *Huns* in 452, after three Years Siege, wherein 37000 Citizens fell, and the reſt narrowly eſcaped to the Mountains. *La Forreſt* ſays, The Seat of the Patriarch was remov'd, upon the Deſtruction of it by the *Lombards* in 590, to *Grado*, whence the Biſhop of that Place has ſtill the Name of Patriarch; and at laſt it was remov'd to *Udine*, the Capital of *Friuli*, in the *Venetian* Dominions. Since which, *Aquileia* is become only a poor Piſher Village. *La Forreſt* ſays, the Town lies on the Conflux of the *Anſa* and *Torre*, near the Shoar of the *Adriatick*, but according to *Mell* and *Sanſon*, it lies in a fort of an Iſland form'd by two Rivers. Long. 32. 34. Lat. 46. about 50 Miles N. E. from *Venice*.

2. *Palma Nova*, a Town built by the *Venetians* in 1594. 'Tis thought to be the largeſt regular Fortification in *Europe*. 'Tis encompaſſed with a Wall, and a Ditch 30 Paces broad and 12 deep, which they keep dry, to hinder the Air from putrifying, to which 'tis very ſubject in this Place; but they can let in the Water at pleaſure. In the Center of the Town, there's fix'd a Standard over a Triple-Well, in the middle of a Sexangular Piazza, whence there's a good Proſpect of the Three Gates, and Six chief Streets of the City. In the middle of the great Bridge, croſs the River which runs by the Town, there's a Drawbridge ſo artfully made, that a Centinel, by a ſingle Touch of a ſmall Piece of Iron with his Foot, can draw it as he ſees occaſion; ſo that this Town is now the great Bulwark of the *Venetian* State, and of all *Italy* on this ſide, it being the Road by which the *Huns* formerly, and the *Turks* ſince, have made their Incurſions as far as *Treviſo*. From this Town to the Sea, the *Venetians* have cut a large Canal, by which Veſſels can ſupply the Town upon occaſion. It lies about 12 Miles N. W. from *Aquileia*.

3. *Udene*, or *Udina*, the largeſt and beſt Peopl'd Town in *Friuli*, being about five Miles in Compaſs, and containing above 15000 Inhabitants. It was formerly the Seat of the *Venetian* Procurator or Lieutenant, but comes ſhort of *Palma Nova* for Strength and Beauty. It lies, according to *Sanſon*, 12 Miles N. W. from *Palma Nova* on the ſame River.

4. *Ciudad de Friuli*, Lat. *Forum Julii*, an ancient Colony belonging to the *Carni*, according to *Ptolomy* and *Tacitus*. *Paulus Diaconus* calls it *Caſtrum Julienſe*. *Sanſon* places it 12 Miles N. from *Palma Nova* on the River *Natiſone*: 'Tis ſubject to the *Venetians*.

5. *Gortz*, or *Göritz*, Lat. *Goritia*, Capital of a County of the ſame Name in *Friuli*; which has ſeveral leſſer Towns and Villages under its Juriſdiction; 'tis ſuppoſed to have been anciently call'd *Noritia*, and is one of thoſe Places from whence the ancient *Tauriſci* are ſuppoſed to have changed their Name into *Norici*, as *Lazius* thinks; who is alſo of Opinion, that the Counts of *Tyrol* had their Origin from the Counts of this Place. 'Tis an ancient Town, and remarkable for the Defeat of *Dieterich*, King of the *Goths*, by *Odoacrus* the King of the *Heruli* near it. 'Tis divided into the Upper and Lower: The former was built for Defence of the latter, in which the Governor, and others of Quality, have their Houſes. Dr. *Nicholſon* obſerves, That the

Digitized by Google

the *Wendiſh* or *Sclavonian* Tongue reaches no further W. than this Place; that the Citizens ſpeak a corrupt *Latin*, which comes nearer the *French* than the *Italian* Dialect, ſo that the other *Italians* can ſcarce underſtand them; but in their Courts of Judicature, and Papers of State, they uſe the *German*, becauſe they are ſubject to the Emperor. The *Venetians* took this Town in 1508, but were forc'd to ſurrender it next Year to the Emperor *Maximilian* I. They attempted it again in vain in 1616. It lies about 12 Miles N. E. from *Palma Nova*.

6. *Gradiſca*, a ſmall Town, about 6 Miles S. W. from *Goritz*, upon a River of the ſame Name. It was built in the Fifteenth Century, to put a ſtop to the Incurſions of the *Turks*, who had ſeveral times landed in the Neghbourhood. *Cluverius* ſuppoſes it to be that which the *Romans* call'd, *Ad Undecimum lapidem*.

7. *Idria*, a famous Town among the Mountains of this County on the Borders of *Carniola*, about 18 Miles N. E. from *Goritz*, on a ſmall River of the ſame Name, which after a great Rain ſwells ſo conſiderably, as to convey great Quantities of Fir-Trees, and other Fuel for the Mines, from the neighbouring Mountains. 'Tis chiefly noted for Mines of Quickſilver; the Entrance to which is in the Town, and their deepeſt Pit is above 120 Fathoms. In thoſe Mines they have Virgin Quickſilver, which diſcovers it ſelf without help of Fire, and is plainly to be ſeen in the Earth and Ore, or falls down in ſmall Drops, and ſometimes Streams out in good Quantities. They have another ſort not ſo fine, which is ſeparated from the Earth by Water in a Sieve, and needs no Extraction by Fire. Their plain Quickſilver is not at firſt perceiv'd by the Eye, but forc'd out of the *Mercury* by the Furnace. This Ore is of a dark Colour mix'd with red, which is beaten to pieces, and ſo refin'd, of which the Curious may find an Account in the Tranſactions of our Royal Society, *Vol. I. Page* 21.

8. *Pontafel*, or *Pont a fel*, ſo call'd from a Bridge over the *Fela* or *Pellach*, on which it ſtands. The Middle of the Bridge is the Boundary betwixt the Duke of *Carinthia*, and the *Venetian* Territories in *Friuli*. The Citizens ſpeak good *Italian* and *High Dutch*. *Lazius* obſerves, that the Banks of the *Fela* are ſubject to Three different Potentates. The Houſe of *Auſtria* has Part as far as the Fort *Cluſius*, another Part belongs to the Dioceſe of *Bamberg*, and the Third belongs to the *Venetians*, of which this Town is Part. The rich Valley in which this Town ſtands, is by the *Latins* call'd, *Beloia Vallis*. In 1661 the *Auſtrians* ſtorm'd this Town, and made a great Slaughter among the *Venetians*, who ſoon after recover'd the Town, took a bloody Revenge, and invaded *Carinthia*. *Sanſon* places it 22 Miles N. W. from *Caidad de Friuli*, and puts another Town of the ſame Name on the N. ſide of the Bridge, which belongs to the Imperialiſts. Dr. *Nicholſon* mentions *Concordia*, another Town in this Country, about 32 Miles W. from *Aquileia*, formerly a noble City that was ruin'd by *Attila*, King of the *Huns*, and is now only a Village: And *Grada*, the Seat of the Patriarch over the neighbouring Iſles, with ſome others of leſs Note on the Coaſts.

Karſtia.

THis is a ſmall Province betwixt *Friuli* and *Iſtria*, and is commonly reckon'd Part of the former. 'Tis little taken Notice of by Geographers or Hiſtorians, being remarkable for little, except a Breed of good Horſes, whence moſt of the Princes and Nobles of *Italy* furniſh their Stables. 'Tis a *Peninſula* almoſt incirel'd with the Rivers *Alben* and *Liſonzo*, and according to *Mercator's* Map, is about 35 Miles in Length, and above 20 in Breadth. *La Forreſt* ſays, 'Twas diſmembred from *Friuli* and *Iſtria* in 1500, and is divided into Upper and Lower, and the County of *Gruitz*. In this Province is the famous River *Timavus*, mention'd by *Virgil* in the Firſt Book of his *Æneids*. It riſes in the *Alps*, as ſome ſay, is call'd by the Name of *Recca* for ſome Space, runs afterwards under Ground for 41 ½ Miles, and where it breaks out again is call'd *Timavus*, and falls into the Gulph of *Trieſte* by 12 ſmall Channels.

The

Digitized by Google

The chief Towns.

1. *Trieſte*, Lat. *Tergeſtum*, whence the adjoining Bay was call'd *Sinus Tergeſtinus*, now the Gulph of *Trieſte*. 'Twas firſt a *Roman* Colony, then fell to the *Venetians*, and at laſt to the Houſe of *Auſtria*, to whom 'tis ſtill ſubject. *La Forreſt* ſays, it was built out of the Ruins of the ancient *Tergeſtum* of the *Carnians*; the Ruins of which are ſtill to be ſeen on a neighbouring Mountain. The chief Trade of the Town is in Salt that is made here, of which they export great Quantities. 'Tis the only Harbour that belongs to the Houſe of *Auſtria*, but neither ſafe nor large, ſays *Baudrand*. 'Tis defended by two Caſtles, and lies upon the Frontiers of the *Venetians*, by whom 'twas taken in 1507; but afterwards reſtor'd to the Emperor. *Moll* places it 20 Miles E. from *Aquileia*. The Town is little, but well fortified and inhabited, and is a Biſhop's See, Suffragan to *Aquileia*. The adjacent Country produces that Wine which the *Germans* call *Reinfal*.

2. *Heydſhena*, on the River *Kobel*, near the Borders of *Carniola*, within the County of *Goritz*, anciently a noted City, but now a ſmall Market-Town.

3. *Proſeg*, or *Proſeck*, 7 Miles N. W. from *Trieſte*, ſubject to the Houſe of *Auſtria*, who have a noble Revenue hence out of the Wine made and ſold here; for which it was ſo famous in the Days of *Auguſtus*, that his Wife *Livia* made uſe of no other Cordial when ſhe was above 70 Years of Age. 'Tis ſo ſtrong, that 'twill keep for a Man's Life-time. *Pliny* deſcribes its excellent Qualities in the 4th Book of his *Nat. Hiſt. Cap. 6.* The *Romans* call'd this Town and the neighbouring Country *Peucinum*.

4. *Wipack*, ſo call'd from a River of the ſame Name, on which it ſtands. 'Tis alſo famous for rich Wine, from which, and the Horſe-Fairs kept there, the H. of *Auſtria* have a great Revenue. The Wine is carried on Horſe-back over the Mountains to *Carniola*, and from thence conveyed into the Empire. The Town lies about 25 Miles E. from *Goritz*.

Iſtria, *or* Hiſtria,

IS a *Peninſula*, having the *Adriatick* on the E. W. and S. and is ſeparated on the N. from *Carniola* by the *German Alps*. The Country is Woody and Mountainous, and the Air ſo unwholeſome, that when the *Venetians* firſt ſubdu'd it, they were forc'd to hire People to dwell here. From that Part which is ſtill ſubject to 'em, they have Timber and Stone for building Houſes and Ships. Some reckon the ancient Inhabitants to have been thoſe of *Colchos*, who being ſent to purſue *Jaſon* and his *Argonauts*, dar'd not to return home, becauſe they miſs'd 'em, and therefore ſettled here; but the *Iſtri*, from whence the Country has its Name, were brought hither long after by *Japis*, an *Etolian*, from the Banks of the *Iſter*; and from this *Japis*, ſome Latin Writers call the Country *Japigia*. While the *Roman* Empire flouriſh'd, *Iſtria* was one of its Provinces; but when it decay'd, recover'd its Liberty, and continued free till about 938, that the *Venetians* being incens'd with their Piracies, took ſeveral of their Towns; and in 1190, laid moſt of the Country under Tribute, and in this State it continues ſtill.

The only City in this Country ſubject to the Houſe of *Auſtria*, Dr. *Nicholſon* ſays is *St. Veit*, on the Shore of the *Adriatick*, at the Mouth of the River *Flaum*, betwixt the Iſlands of *Cherſo* and *Vegia*, about 68 Miles S. E. from *Aquileia*, and 40 from *Trieſte*. On the top of Mount *Terſtat*, near this City, there's a fair *Franciſcan* Monaſtery, from which one goes down to the River by a great Number of Steps. In the Suburbs, there's a *Capuchin* Monaſtery, where a memorable Peace was concluded in 1618, betwixt the Emperor and the *Turks*. Hither the *Auſtrians* of Quality ſend their Children to be taught *Italian*, which is here ſpoke in its Purity. The Town is well fortified, and defended by a Caſtle on a Hill. *Baudrand* ſays, it has a ſmall Harbour, but not very ſafe. For ſuch Towns here as belong to the *Venetians*, we refer them to the Deſcription of that Republick.

The

The Dutchy of Carinthia.

THE *Germans* call it *Karndten*. It lies in *Norico Mediterraneo*, and was formerly called *Lauriana*, and *Patria Sclavorum*; but in *Charlemagne*'s Time, was called *Carinthia*, from the *Carni*, a Branch of the *Venedi*. It has *Saltzburg* and *Styria* on the N. *Carniola* and *Friuli* on the S. the Bishoprick of *Brixen* and Part of *Saltzburg* on the W. and Part of *Styria* on the E.

The Country is somewhat cold and barren, and every where Mountainous. They have enough of Corn, but have their Wine from their Neighbours. Their most remarkable Mountains for Height are, St. *Ulrick*'s, St. *Hailen*'s, and St. *Lawrence*'s. On the latter, the Peasants have Annual Foot-Races, and other Diversions, on the Three Holy-Nails Day, the 3d *Friday* after *Easter*, in Remembrance of the 3 Nails on which they suppose our Saviour to have been nail'd to the Cross. They have large Lakes in this Country, which they call by the Name of Seas: The largest of them is about two *German* M. long, of a considerable Breadth, and best stock'd with Fish. The largest River here is the *Drave*, into which fall abundance of lesser Streams, as it runs through the Country. This Dutchy is subject to the Emperor, and the Clergy own the Archbishop of *Saltzburg* as their Metropolitan. *Moll* makes it 120 Miles from E. to W. and about 32 Miles broad from N. to S. 'Tis divided into *Upper* and *Lower*. *La Forrest* says, it lies in *Upper Pannonia*, was anciently Part of the Dutchy of *Bavaria*, and given by *Charlemagne* to *Ingevon*, whose Succession is hard to determine. *Ottocarus* King of *Bohemia* seiz'd it; but was drove out by the Emperor *Rodolph* I. who gave it in 1282 to *Mainard* Count of *Tyrol*, on Condition, That when his Male-Issue fail'd, it should return to the House of *Austria*, which happen'd in 1381. *Cluverius* says, the ancient Inhabitants were Part of the *Ambisontii*. The Peasants pretend to a Right of investing their Duke, thus; He must be clad like a Countryman, with a Shepherd's Hook in his Hand, and go into a Meadow; a Peasant gets up on a Marble Stone, and presents him with two Beeves, one fat, and the other lean; or, as some say, with a black Cow and a Mare, and asks him, If he be a Judge? If he seeks the Good of the Country? If he be Noble, a Person of Merit, a Christian, and Defender of the Faith? The Prince answering, Yes; the Peasant gives him a gentle Blow on the Cheek, and recommends Justice to him; then the Duke gets upon the Stone, lays aside his Shepherd's Hook, and with a drawn Sword in his Hand, promises Justice to the People, and then goes to our Lady's Church at St. *Veit*, which lies near the Place; and putting on his Princely Habits, he returns to the Meadow, where he receives the Homage of his Subjects. The Peasants had this Privilege, because they embrac'd Christianity long before their Nobles, who were prevail'd with to do the like by *Charlemagne*. *La Forrest* says, That *Lower Carinthia* belongs to the House of *Austria*, and the *Upper* is divided betwixt the Archbishop of *Saltzburg* and the Bishop of *Bamberg*.

Their chief Towns.

1. CLagenfurt, on the *Glan*, their Metropolis, and the Residence of their ancient Dukes, about 10 Miles from the Frontiers of *Carniola*, in Long. 32. 12. Lat. 47. 'Tis the neatest Town in the Country, of a square Figure, and defended by a good Wall. In the middle of the Piazza, there's a noble Fountain, over which there is a prodigious Dragon made of one Stone, and *Hercules* standing before it with his Club. The Country-People fancy it to be the Statue of a Peasant, who kill'd a great Dragon; but Dr. *Nicholson* says, 'tis one of the *Roman* Monuments brought from *Saal*, that were plac'd in the neighbouring Towns. *Æneas Sylvius* relates a very strange old Custom, which he says the Citizens of *Clagenfurt* observ'd in his Time, That if a Man were shrewdly suspected of Theft, they hang'd him, and 3 Days after judg'd of the Fact: If he were found guilty, they let his Body hang till it rotted away; if otherwise, they took down the Corps, bury'd it upon the publick Stock, and said Prayers for his Soul.

2. St. *Veit*,

Digitized by Google

2. St. *Veit*, about 8 Miles N. from *Clagenfurt*: 'Twas ſo call'd from one of that Name, who was their Apoſtle, in the Time of *Diocleſian*. It was formerly their Metropolis, and a Biſhop's See; but now only noted for its Antiquity. The *Latins* call it *Fanum Sancti Viti*. It ſtands on the Conflux of two Rivers, in a fruitful Valley. About a *German* Mile from hence, ſtand the Ruins of the ancient City *Solla* or *Saal*, called by *Laxius*, *Colonia Solvenſis*. 'Twas deſtroy'd by *Attila* the *Hun* in 451, 823 Years after its Foundation. Store of *Roman* Coins, Medals, and other Antiquities, are found in the Field or Meadow near it, where ſtand Four-ſquar'd Stones, reſembling two Elbow-Chairs, Back to Back, in which the Dukes of *Carinthia* were inveſted, as mention'd above; when, Dr. *Nicholſon* ſays, the Duke or his Deputy is obliged to accept the lean Ox, and return the fat one, which are preſented him. Upon theſe Stones there are old *Roman* Inſcriptions, which bear a greater Face of Antiquity than the Stones themſelves. The Church of *Saal* is ſtill ſtanding, and in it the Tomb of *Modeſtus*, St. *Vite*'s Companion.

3. *Frieſach*, on the Borders of *Styria*, 15 Miles N. E. from St. *Veit*. 'Tis reckon'd the oldeſt Town in the Country, ſtands in a fruitful Soil amongſt Hills and Mountains, and is defended by a ſtrong Caſtle on a Rock. Some derive its Name from the ancient *Friſi*. 'Twas called *Verunum* by the *Romans*, from its old Name *Veruan*, which in the Language of the Country ſignified Boars, that abounded in thoſe Parts. There were Gold Mines in the neighbouring Mountains, which were exhauſted long ago. The Town is encompaſſed with good Walls, and a broad Ditch.

4. *Straſburg*, on the River *Gurck*, at the bottom of a high Mountain, the Reſidence of the Biſhop of *Gurck*, who ſwears Fealty to the Emperor for his Temporals, and Canonical Obedience to the Archbiſhop of *Saltzburg* in Spirituals. *Hieronymus Baldus*, the famous *Italian* Poet, was Biſhop of this Place.

5. *Gurck*, 12 Miles N. W. from St. *Veit*, a Market-Town, where the Ruins of an old Monaſtery was turn'd into a Cathedral, and made a Biſhop's See in 1073 by the Archbiſhop of *Saltzburg*, who has a Right to chuſe one Biſhop in three, the Emperor chuſing the other two.

6. *Villack*, on the *Drave*, thought by ſome to be the old *Julium Carnicum*, or *Colonia Julia*; but *Laxius* thinks it to be *Antonini's Beloa*. *Sanſon* places it about 18 Miles W. from *Clagenfurt*, near the Conflux of three Rivers. They have a Bridge over the *Drave*, which brings them a good Trade by Paſſengers betwixt *Italy* and *Germany*. 'Tis noted for its fine Paintings, and belongs to the Biſhop of *Bamberg*, who appoints their Governor once in three Years. The Emperor *Charles* V. fled hither from *Inſpruck*, where he was almoſt ſurpris'd by the Proteſtants in 1552. An *Engliſh* Mile from the Town, there are ſeveral good Baths; two of them are ſulphureous, moderately hot, of an acid, but of no unpleaſant Taſte. They are large, and have Stairs to go down to them, with little Rooms of Wood about them, for the Conveniency of thoſe who bathe.

7. *Gemund*, on the Mouth of the *Malentein*, according to *Sanſon*, 40 Miles W. from *Gurck*; but *Moll* places it about 17 from thence. This Town and its Territory was bought from *Maximilian* I. by the Archbiſhop of *Saltzburg* for 30000 Crowns, who repair'd the Caſtle and Fortifications, and endow'd the Hoſpital; ſo that 'tis under his Juriſdiction.

8. St. *Andrew's*, a neat Town on the Banks of the *Lavant*. *Laxius* takes it to be *Pliny's Colonia Flaviana*, and the Biſhop who reſides here calls himſelf *Flaventinenſis*. This Biſhoprick was founded in 1221 by the Archbiſhop of *Saltzburg*, to whom, with the adjacent Country, 'tis ſubject. *Sanſon* places it 22 Miles S. E. from *Gurck*.

9. *Lavamund*, at the Mouth of the *Lavant*, 13 Miles S. E. from St. *Andrew's*, is a Biſhop's See, Suffragan to *Saltzburg*, and ſtands in the pleaſant Valley of *Lavantal*.

10. *Volkelmark*, on the *Drave*. *Wolfperg*, *Pontafela*, and ſome other Market-Towns in this Country, are not deſcrib'd by Geographers. Dr. *Nicholſon* mentions *Mulſtat* in this Country, formerly called *Ad Mille Statuas*, becauſe, as ſome Hiſtorians ſay, there was a Temple here in the Time of Paganiſm with 1000 Statues. *Mercator* places it in a Lake above two *German* Leagues S. E. from *Gemund*. *La Forreſt* ſays, That *Werd*

and *Folkmark*, in *Lower Carinthia*, are Towns of good Trade; and that *Pontafel* is an important Paſs on the Road from *Vienna* to *Venice*.

The Biſhoprick of Brixen.

IT has *Tirol* on the N. and W. *Saltzburg* and Part of *Carinthia* on the E. Part of *Trent*, and of the Dominions of *Venice*, on the S. Dr. *Nicholſon* makes it Part of the County of *Tirol*; but *Moll* and *Sanſon* make it diſtinct; and the *Matricula* of the Empire makes it Part of the Circle of *Auſtria*.

Brixen, from whence it has its Name, lies in a pleaſant Valley, at the Conflux of the *Eyſach* and *Rientz*, about 12 Miles from the Frontiers of *Venice*, in Long. 30. 45. Lat. 46. 45. 'Tis ſuppoſed to be *Antonin's Sublabione*; but Dr. *Nicholſon* thinks it ought to have been writ *Subſavione*, becauſe there's a Place not far from it called *Seven* or *Savio*, from whence the Biſhoprick was tranſlated to *Brixen*, *Savia*, and ſome of the neighbouring Towns, having been deſtroy'd by the *Huns*. *La Forreſt* ſays, the Town lies at the Foot of Mount *Brener*; that the Biſhoprick was founded in 370, and is Suffragan to *Saltzburg*; yet the Biſhop is Lord of the Place, and a Prince of the Empire. The Houſes are well built, almoſt all of the ſame Size, and curiouſly painted on the outſide. There are Vaults which go from one Side of the Street to the other, and in theſe Vaults their beſt Shops are kept. They have three very fine Churches, which join to one another; over againſt which there's a fine Square, having on one Side the Biſhop's Palace, which is a ſquare Building, encompaſſed with a Ditch, and the Entry is defended by 4 Braſs Cannon. Thô the Biſhop be a Prince of the Empire, Dr. *Nicholſon* ſays, there lies an Appeal from him to the Count of *Tyrol*'s Court. The Mineral Wells in and about this City occaſion a great Concourſe of Strangers. That called the *Virgin-Well* is of the greateſt Note. They have likewiſe a conſiderable Income from the Red Wine which is exported from hence to the neighbouring Countries. *Moll* makes this Biſhoprick about 50 Miles long, and 32 broad. We find no other Place of this Biſhoprick deſcrib'd except *Brauneck*, or *Bruneck*, which *La Forreſt* ſays is a conſiderable Fortreſs belonging to the Biſhoprick. It lies on the River *Adige*, 15 Miles N. E. from *Brixen*. The Lordſhip of *Veldes* in *Carniola* belongs to this Biſhoprick.

The Biſhoprick of Trent,

HAS *Tirol* and Part of *Brixen* on the N. and the Dominions of *Venice* on the S. and E. *Moll* makes it 62 Miles long from E. to W. and about 40 Miles broad from N. to S.

Strabo, *Pliny*, and *Ptolemy*, call the Inhabitants of this Country *Tridentini*, and the Town *Tridentum*, from whence the preſent Name *Trent* is contracted. Some derive the Name *Tridentum* from the Trident of *Neptune*, who, among other Idols, is ſaid to have been worſhip'd here. Others derive it *à tribus Torrentibus*, three ſmall Rivers which fall into the *Adige* at this City; and others derive it, with very much Probability, from three ſharp Peaks or Rocks of the *Alps*, reſembling three Teeth, which hang over this City. *Leander Alberti* ſays, the Town was firſt built by a Prince of *Tuſcany*; but afterwards demoliſh'd, and then rebuilt by the *Cenomani*, and wall'd about with a ſtrong Stone Wall by *Theodorick* King of *Berne*. After the Invaſion of the *Goths*, 'twas ſubject to the Princes of *Lombardy*, then to the Emperors of *Rome*, and afterwards to a Count of its own, who was Vaſſal to the Duke of *Bavaria*. At laſt 'twas made an Imperial Town; but is now ſubject to its own Biſhop, a Vaſſal to the Emperor, who, as Count of *Tirol*, has the Superiority of this Biſhoprick. The City lies in a pleaſant Valley, in Long. 30. 2. Lat. 46. 7½. 17 Miles from the Frontiers of *Venice*, and 50 S. W. from *Brixen*. 'Tis encompaſſed with ſteep and unpaſſable Hills, ſo that there is ſcarce any coming to it but from *Verona* on the S. and from *Tirol* on the N. In Summer, the Rays of the Sun, reflected from the Flinty Rocks which encompaſs it, make the Heat almoſt intollerable, as the Cold reflected from them is in the Winter: But in the Spring and Autumn, their Air is wholeſome and temperate. They have Plenty of Wine, Oil, and Fruit, in their Fields and Vineyards; but little Corn.

Their

Digitized by Google

Their Wine has a good Taſte, is ſtrong, and of a pale red Colour. The Inhabitants, by reaſon of their Situation on the Borders of *Germany* and *Italy*, ſpeak both *High-Dutch* and *Italian* very well. Some Geographers have reproach'd them with the Character of *Germanorum Sentina*, and *Italorum Refugium*, as if it were a Place of Rendezvous of the worſt ſort of People of both Countries. But Dr. *Nicholſon* obſerves, That they are extreme obliging to Strangers, very faithful to their Promiſe, and tender of doing any thing inconſiſtent with Humanity or Friendſhip. The Biſhoprick was founded by St. *Hermagoras*, who made one *Jovinus* their firſt Biſhop. The Dioceſe was afterwards much enlarged by the Emperor *Conrad* II. and confirm'd by ſucceeding Emperors, who made the Count of *Tirol* Protector of the Biſhop, and obliged him to aſſiſt him in caſe of Invaſion. Since the Time of *Frederick* II. the Biſhops have been reckon'd Princes of the Empire. Several Princes of which, and of *Italy*, pay Fealty and Homage to this See, for ſome Part of their Eſtates they hold of it. The chief of 'em are, the Duke of *Mantua*, and the Count of *Tirol*, who pay them Annually a certain Quit-Rent, and many Earls and Barons do the like. In Temporal Matters, the Biſhop acknowledges the Supremacy of the Emperor, as Count of *Tirol*, who, during the Vacancy of the See, ſends a Governor, who preſides there till a new Biſhop be choſen. The Chapter is compos'd of People of the Firſt Quality, who chuſe a Biſhop from among themſelves. Dr. *Nicholſon* and *Baudrand* ſay, the Biſhop is Suffragan to the Patron of *Aquileia*; but *La Ferreſt* ſays, he is Suffragan to the Archbiſhop of *Saltzburg*, which is more probable, ſince by the Treaty of *Munſter* he was made Primate of *Germany*; and that *Trent* is included in the Circle of *Auſtria*. The Town is moſt remarkable for its Antiquity. 'Tis pretty populous, tho' not very large, and is defended by an old Caſtle. There are many ſtately Palaces in it, and ſeveral beautiful Churches. The Cathedral, dedicated to St. *Vigil*, is a fine Piece of Architecture, with Marble Pillars of an extraordinary Height and Thickneſs. The Church of St. *Mary Major* is noted for the Council of *Trent*'s being held in it, and the Hiſtory of that Council is finely painted on its Walls. 'Tis noted alſo for its Organ, which counterfeits all ſorts of Inſtruments, and the ſinging of Birds ſo naturally, that 'tis hard to diſtinguiſh them. This Town was bombarded from the 3d of *September*, 1703. to the 8th, by the Duke of *Vendoſme*, after he had made himſelf Maſter of the adjacent Country.

But that which makes it moſt famous, is the Council which was held here, being open'd the 4th of *January*, 1545, and continued till 1563; during which Time, there are ſaid to have been here no leſs than 4000 Perſons of a Publick Character, with their Attendants, who were all accommodated in this City; among whom were 7 Cardinals, 3 Patriarchs, 33 Archbiſhops, 235 Biſhops, 7 Abbots, 7 Vicars-General, and 146 Divines, beſides a great Number of Ambaſſadors. During the firſt 18 Years they ſat, they were ſeveral times aſſembled, and ſuſpended without doing any thing material; but in 1562, it was managed with ſo much Artifice by the Court of *Rome*, that nothing was determin'd by the Council, but what was firſt reſolv'd on by the Cardinals in their Conclave at *Rome*, which gave juſt Ground for the bitter Sarcaſm of the *Hungarian* Biſhops preſent at the Council, *That the Holy Ghoſt was ſent thither in a Cloak-Bag from* Rome. The Curious may find an Account of their Proceedings in the famous Hiſtory of this Council by Father *Paul*, and in the Review of it by *Du Ramchin*, a *French* Courtier, whoſe Work was tranſlated into *Engliſh* by Dr. *Langbain*, and printed at *Oxford* in 1638. But ſince this Council is the Standard of modern Popery in *Italy*, and all the other Popiſh Countries that ſubmit to its Deciſions, we ſhall, for the Satisfaction of the Publick, give a brief Account of it as follows:

Father *Paul*, in the 2d Page of his Hiſtory of the Council of *Trent*, ſays, "This 'Council was deſir'd and procur'd by Godly Men, to re-unite the Church, which 'began to be divided; but hath ſo eſtabliſh'd the Schiſm, and made the Party ſo 'obſtinate, that the Diſcords are become 'irreconcilable; and being managed by 'Princes for Reformation of the Eccleſiaſtical Diſcipline, has occaſioned the great'eſt Deformation that ever was ſince Chriſtianity began. And the Council being

Digitized by Google

'hop'd for by the Bishops, to regain the 'Episcopal Authority, which was for most 'part usurp'd by the Pope, has made them 'lose it altogether, and brought them into 'greater Servitude: And whereas on the 'contrary, it was fear'd and avoided by the 'See of *Rome*, as that which might mode-'rate their exorbitant Power, which, from 'small Beginnings, has by several Degrees 'come to an unlimited Excess; it has so 'establish'd and confirm'd the same over 'that Part of it which remains subject un-'to it, that it was never so great, and so 'firmly rooted.

There can be no better Proof of what Father *Paul* says, than the Review of that Council by *M. Ranchin* above-mention'd, who tells us, *Page* 1. "That this Council 'was call'd on purpose to reform those Abu-'ses of the Pope, and Court of *Rome*, that 'were the Occasion of the Schism, which 'had rais'd all *Christendom* in Arms, and 'had bred Disturbances for 200 Years and 'upwards in sundry Councils, which Pope '*Hadrian* confess'd in the Diet at *Nurem-'berg*, that some of the Reformers of Pope '*Paul* III. could not deny; but the Popes 'turn'd Cat in Pan, and carried the Matter 'so, that instead of a natural Birth, the 'Council was deliver'd of a Monster; and 'instead of a Synodical Decree, had brought 'forth a Papal Bull; instead of an Extirpa-'tion of Abuses, had brought forth a Nur-'sery of Errors; a Depravation, instead of 'a Reformation; a Source of Injustice, and 'a Legitimation of all the Pope's Usurpa-'tions upon the Authority of the Church, 'Emperors, Kings, and Commonwealths; 'and, in a Word, upon all *Christendom*, with 'all the Estates therein, as well Temporal 'as Spiritual. That the Pope and the Court 'of *Rome* were in a manner compelled by 'Violence to the holding this Council for 'excepting honest *Hadrian*, who went about 'it with an upright Intention; all the rest 'would have gladly been quit of it. *Cle-'ment* VII. did openly contradict the Pro-'posal of it, which *Charles* V. at his Coro-'nation caus'd to be made by his Chancellor 'at *Bononia*: But the Emperor pursuing 'his Instances with the Successors of *Cle-'ment*, they were forc'd to make a Shew of 'an Inclination to it; yet so as they stood 'a consulting 25 Years about calling it, 'from 1522, that *Hadrian*, by his Legate 'at the Diet of *Nuremberg*, promis'd it, till '1546, still giving out fair Pretences, and 'studying new Occasions to delay it, posting 'it from one to another, and passing it over 'as a Debt to their Successors. And after 'they had set about it, they manag'd it so, 'that they kept it betwixt living and dying 'for 18 Years, taking their Time on pur-'pose, that they might level their Stroke 'right. Many of their Predecessors had left 'their Weapons in Councils; *Germany* was 'fatal to them; and the Remembrance of 'the Councils of *Constance* and *Basle* madded 'them, when they thought upon the De-'posal of so many Popes, the Discipline to 'which they had been made subject, and 'the cutting short of their Power by the 'Councils. They had observ'd the Saying 'of Pope *John* XXIII. *The Place of the Council 'is all in all*; and that he would not have it 'in a Place where the Emperor had the up-'per Hand; so that it necessarily concern'd 'them to save themselves by Slight, to shuf-'fle on the Time, to spin out Delays, to 'pump for Pretences; and at last, when 'they could no longer shift it, 'twas neces-'sary for them to pitch upon such a City 'as would be sure to them, as depended on 'them, and where they had absolute Au-'thority; and such at that Time was *Trent*. 'In the next Place, they would admit none 'for Members, but such as they had en-'gag'd before-hand, that they might make 'it more firm for them, and make them 'proceed slow or quick, as they saw Cause. 'Then they broke off and defer'd it; and 'when they found their Party uneasy, they 'adjourn'd it to another Place, particularly 'to *Bononia*, on Pretence of the Badness of 'the Air. Then they solicited all Catho-'lick Princes utterly to extirpate the Pro-'testants; and when that would not do, 'they scatter'd Reports among the Catho-'lick Princes to set them together by the 'Ears, and enter'd into Leagues with the 'stronger Side to support their Greatness, 'and raise it higher. They us'd all possible 'Means to win the Bishops, and the rest 'that had Voices; and the Council gave 'em 'great Promises, and made them Presents, 'till they could give them Dignities and 'Benefices, on Condition, That they should 'determine nothing but according to the

Digitized by Google

Pleasure of the Holy See; to anathematize all the Opinions of the *Lutherans* and *Calvinists*, without Exception; to make good Decrees in Appearance for the Reformation of Manners, and Ecclesiastical Discipline; about Points unnecessary, or such as never came in Question; and, under-hand, to forge others to confirm the groundless Usurpations of the Pope over Christian Princes, and to make his Power truly Monarchical; so as he would make all the Kings and Princes of the Earth to tremble at his Voice. They were also to disannul such Decrees of the Councils of *Constance* and *Basle* that were any way prejudicial to the Pope, and either covertly repeal them, or take such oblique Methods as might avoid the Force of them. And in the last Place, they were not to meddle with the Power of the Pope, with the Abuses and Misdemeanors of his Court, nor to suffer him to be charg'd with Neglect of his Spiritual Charge, and the Good of Souls, or with any unjust Attempts.

This Author gives us a further Account, 'That the Kings of *France* did always reject the Instances made by the Pope, and other Princes, and the Provincial Councils of *France* by the Pope's Instigation; 'That the Pope was a Party, and therefore could not call the Council, nor be Judge in his own Cause, according to his own Canon Law, because of the several Appeals put up against him by Protestants and Papists. That the Papacy stood in need of Reformation, as had been confessed by Pope *Hadrian* VI. by the Councils of *Constance*, *Basle*, and *Pisa*: Therefore the Pope could not be Judge. That he had condemn'd the Protestants before they were called to Council; therefore they were not obliged to obey his Summons, nor submit to the Judgment of their known Enemy. That the Pope had stir'd up several Wars in the Time of the Council, and particularly in *France*, which hinder'd many that ought to have been present. That the *Germans*, *English*, and *French*, had demanded that the Council should be kept in a free Place, which *Trent* was not, being subject to the Pope, and the Passes stopt and guarded, which was a just Objection, as had been own'd in the like Case by the Council of *Pisa*; and therefore they protested against the Council's meeting at the *Lateran*; that where the Place of Judgment is not safe, there may be an Appeal. He adds, That all were not call'd to this Council who ought to have been call'd, not all the Clergy, nor yet all the Laity, which was contrary to ancient Custom: That the Members of *Trent* were the Pope's Creatures, as was complain'd by the Emperor, the *French* King, and the *German* Protestants, and as good as confessed by the Popes: That the Number of Bishops was so few, it could not be call'd a General Council: That the Emperor and *French* King complain'd of the indirect Dealings in the Council: That the *Germans*, the *English* and *French*, protested against this Council: And that Justice was deny'd in Things demanded by the Emperor, the K. of *France*, the Catholick Princes of *Germany*, and the Duke of *Bavaria*; tho many of the Abuses they desir'd to be reform'd, were confessed by the Deputies of Pope *Paul* III."

The Curious may see these, and many other Things to prove the Nullity of this Council, in those Two Authors, who being both Papists, cannot be justly suspected of Partiality.

Dr. *Nicholson* gives us this summary Account of their Proceedings.

At their first Meeting, the Pope's Legate declar'd the Causes of the Calamities of the Church. In their second Session, they read and confirm'd the Articles of Faith profess'd by all Members of the Catholick Church, according as 'tis in the Missal. The *Summa Conciliorum*, by *Carranzam*, says, they likewise confirm'd the Books of the Old and New Testament, with those of the Apocrypha, and Traditions. They also order'd the old vulgar Latin Translation to be used as Authentick in Churches and Schools; and that the Rule of Interpretation should be the Church, and the ancient Fathers. In the 4th Session, they decreed, That all Men ought to believe Original Sin was utterly taken away in Baptism, insomuch, that the Concupiscence which remains in our Natures after Baptism, is not to be accounted a Sin, until we give the Consent of our Minds to it. They decreed,

That

That the Virgin *Mary* was without Original Sin; and that before Regeneration, Man has a free Will to do Good, which being rous'd up and awak'd by God, is an Assistant to his Grace. In the 6th Session, they resolv'd, That Man is justified partly by Faith, and partly by Works; and Justification does by no means consist in a free Forgiveness of Sins, and the Free Imputation of the Righteousness of Christ to all Believers. In the 7th Session, That all Men who would be reputed Members of the Catholick Church, ought to believe that there are 7 Sacraments. These Decrees being pass'd, the Pope's Physician declar'd the Air of *Trent* to be corrupted, on which most of the Bishops were perswaded to remove to *Bononia*; but the *Spanish* Bishops refus'd to go thither. The Emperor's Minister protested against this Translation of the Council, and, in his Master's Name, declar'd, That what was done at *Bononia* should be void. Thus, after two Years, their Meeting was broke up in a Huff.

Their second Meeting was again at *Trent*, in the Time of Pope *Julius* III. *September* 1551, when the *French* Ambassador declar'd, That his Master was so perplex'd with Rebellions, he could not send his Bishops; and that the Council of *Trent* was not a General Council, but a Synod assembled for the Views of a few private Men, and therefore protested against it. In their 2d Session at this Meeting, they confirmed Transubstantiation: And in the 3d Session, That Penance and Extreme Unction were Sacraments of the New Testament. The Protestant Ambassadors offer'd to exhibit a Confession of their Faith; but the Pope's Legate did not receive it, because in the Title they did not signify their Willingness to submit to the Determination of the Council in all Matters of Faith. During this Time, the Elector of *Saxony* and the Emperor came to an open Rupture; and the Elector having taken *Augsburg*, the *Italian* Bishops retired from *Trent* in Precipitation.

The *Spanish* Prelates assembled however, and adjourned the Council for two Years; but did not meet again till *January* 1562, in the Time of Pope *Pius* IV. when they condemn'd *Luther*'s Books, and order'd several Books that had been writ since the Springing up of Heresy, as they call'd it, to be revis'd and reported. They decreed, That the Laity were not bound to communicate in both Kinds; That the Church had Power to order the outward Administrations of the Sacraments as she thought most convenient for the Good of the Receivers; That the Mass was a Propitiatory Sacrifice for the Quick and Dead; and anathematiz'd such as should dare to affirm, That there was no more than a Sacrifice of Thanksgiving, and a Commemoration of Christ and his Sufferings. They likewise declar'd Ordination to be a Sacrament, and made certain Canons for the Administration of it, and anathematiz'd those who should say, That there was not a Hierarchy in the Church of Divine Institution, consisting of Bishops, Presbyters, and Ministers; or such as should say, That the Bishops were not superior to Presbyters, or that the Power of the one and the other was the same. They likewise decreed, That the Church of *Rome*, or her Representative the Pope, had a Power to dispense with the 18th Chapter of *Leviticus*, not only in allowing Persons to marry who are there forbidden, but also to forbid Marriage betwixt such as the Law of God and Nature had allow'd it. In the 9th and last Session held the 3d of *December*, 1563, they confirmed the Doctrine of Purgatory, the Invocation of Saints, the Worshiping of Images and Relicks, granting of Indulgences, Superstitious Fasts, *&c.* and then put an End to the Council. Here 'tis fit to observe, Thas there was as little Regard shew'd to the Demands of the Emperor, the King of *France*, and the Catholick Princes of the Empire assembled in the Diet, as to the Demands of the Protestants.

The Emperor, as *Natalis Comes*, in the History of those Times, informs us, demanded a Reformation both of the Pope and Court of *Rome*; That the Number of Cardinals should be reduc'd; That scandalous Dispensations should be abrogated; That Monasteries should be brought under the Jurisdiction of the Bishops of the Diocese; That the Multitude of Canons and Decrees should be lessen'd, and Superstitious ones repeal'd; That Ecclesiastical Constitutions should be reduc'd to the Rules of God's Law; That none should be excommunicated but for publick Scandal; That the

Digitized by Google

the Breviaries and Mass Books should be purged of all that was not taken out of the Scripture; That Prayers should be allowed in the Vulgar Tongue; That Communion should be in both Kinds; That the Rigour of Fasting should be mitigated; That eating of Flesh might be licens'd, Priests Marriage allow'd, and several Glosses upon the Gospels raz'd out. The *French* Court demanded the like, and also that Psalms might be sung, the Sacraments administred, and a Catechism made in the Vulgar Tongue, that the People might be instructed what they ought to believe concerning the Worship of Images, Indulgences, Pilgrimages, Relicks of Saints, Fraternities; and that all Superstitious Errors might be removed from them; That Publick Penance might be restored for heinous Offences, Publick Fasts appointed for appeasing God's Wrath, and General Councils held once in 10 Years; That holding of Benefices in Trust and Commendams might be abolish'd, and conferr'd upon none but Persons of Merit, with Consent of the Bishops and People.

The Catholick Princes of *Germany* complain'd of these and many other Things, as forbidding of Meats, Marriages, the Abuse of Indulgences, against the excessive Number of Holidays, and against the Usurpation of the Clergy. The Duke of *Bavaria*'s Minister pressed earnestly for the Marriage of Priests, alledging for it, That in the last General Visitation of *Bavaria*, 'twas found, that there were not 3 in 100 Priests but what were either common Whoremongers, or privately married. He pressed also for Communion in both Kinds, and Reformation in Doctrine. But all these Demands were to no purpose; nor are we to wonder at it, since *M. Ranchin* tells us, That Pope *Paul* III. in 1538, appointed 9 Cardinals, and other Clergymen, to consider and advise him what was best to be done for Reforming the Church, and to tell him upon their Oaths the Truth, on Pain of Excommunication; and thô they did it, and pointed at many Things that wanted Reformation, yet he had no Regard to what they said.

Mr. *Ray*, in his Travels, says, That on the Front of the Quire of the Cathedral Church at *Trent*, there's a Latin Inscription, giving a short Account of the Council; by which it appears, that there were at this Council 13 Cardinal-Legates, 9 that were not Legates, 29 Ministers from Princes, 3 Patriarchs, 33 Archbishops, 233 Bishops, 18 Abbots, 12 Generals of Orders, 148 Doctors of Divinity, 18 Proctors or Deputies, 3 Officials of the Council, 9 Chantors, 4 Notaries, and 2 Couriers from the Pope.

Misson, in his Travels to *Italy*, says, the City stands on a flat Rock, of a sort of Red and White Marble, which furnishes Materials for Building; and that the City is subject to dangerous Inundations from the overflowing of the River, and some neighbouring Brooks, which fall down sometimes with such Impetuosity from the Mountains, that they roll great Rocks along with them into the Town, which is fortified only with a single Wall. In one of the Chapels of the Cathedral, they have a Crucifix as large as the Life, which the fabulous Priests say bow'd its Head, in Token of its Approbation of the Councils Decrees when they were proclaim'd under it. They add, That this Crucifix was made without Hands, and that no body knows the Materials it is composed of. The Church of St. *Mary Major*, where the Council sat, is built of a base sort of Marble; and the Organ in it, besides counterfeiting the Singing of Birds, resembles the Cries of several Beasts, and the beating of Drums. In St. *Peter*'s Church, they have a Chapel for St. *Simonin*, a Shoemaker's Son, who in the 28th Month of his Age was stole and murther'd by the *Jews*, who drank his Blood at one of their Feasts, and threw his Carcass into a Water-Pipe, where their Synagogue stood; and being thence carried into the River, it was found by Fishermen: Upon which the Murder was discover'd, 39 *Jews* executed, and the rest for ever baniish'd the City. Pope *Sixtus* IV. canoniz'd this Child, which being embalmed, is kept in a Case on the Altar of his Chapel, with the Knife, Pincers, and 4 great Needles, they made use of to torment him, and two Silver Goblets in which they drank his Blood.

The 2d Town in this Bishoprick is *Pezen*, by the *Italians* called *Bolzano*, 18 Miles N. E. from *Trent*, on the Banks of the *Aysach*. The Town is more considerable for its

Digitized by Google

its Trade than Strength; for it has no other Fortifications but the River, and rocky Hills about it. They have 4 Annual Fairs, of 15 Days each, which are much frequented by Merchants from *Illyricum*, *Dalmatia*, and *Germany*: During which Time, they have a proper Magistracy, and Courts of Judicature of their own, distinct from those of the Town; and none are allowed to trade without being enter'd in their Judges Book, and receiving a Certificate from him, sealed with the Arms of their Corporation, which is a Globe of the Earth, surrounded with abundance of all sorts of Merchandize pack'd up, and this Motto, *Ex Merce pulchrior*; *i. e.* It becomes more beautiful by Trade. These Privileges were granted them by *Claudia* Arch-Dutchess of *Austria*. This Place was taken from the Bishop of *Trent* by *Minard* II. Count of *Tirol*, in 1295, and is now subject to the House of *Austria*.

3. *Roveredo*, or *Roverettum*, on the Banks of the *Adige*, and Frontiers of *Venice*, is a Town of good Note, was formerly subject to *Trent*; but by the Treaty of *Noyon*, was made over to the Emperor *Maximilian* II. It lies about 10 Miles S. from *Trent*, and has a strong Castle.

There are several other Market-Towns and small Cities within this Bishoprick; but are remarkable for little, except that all of them have good Wine. *La Forreſt* mentions *Toblino*, *Madruzzo*, *Arco*, *Nago*, and *Torbole*, which are all fortified Places in this Bishoprick, and were taken by the *French* under the Duke of *Vendôme* during the last War in *Italy*.

The Circle of BAVARIA.

The Bishoprick of Saltzburg.

THE City of that Name was anciently called *Colonia Hadriana Juvavia*, because the Emperor *Hadrian* plac'd a Colony here on the River *Juvavus*. The Inhabitants say, That the Emperors *Augustus* and *Tiberius* having subdued the *Salassii* and *Rhæti*, with other Inhabitants of the *Alps*, they invaded the *Vindelici*, the *Norici*, and *Pannones*; and to secure their Conquests, built a Fort here, which is frequently mention'd by *Antonin*; but 'tis sometimes corruptly writ *Juvavum*, *Ivavum*, *Ivarum*, and *Vivanum*. *Bertius* and *Cluverius* think it to be *Ptolemy's Ganaxadunum*. The present Name of the Town, and the River *Saltza*, on which it stands, is derived from the many Salt-Pits on its Banks. This Archbishoprick has Part of the Dutchy of *Bavaria* on the N. and W. *Carinthia* on the S. and E. with Part of *Stiria* and *Austria*; and on the W. it has Part of *Bavaria* and *Tirol*. Its greatest Length from S. W. to N. E. is about 100 Miles; and the greatest Breadth from N. to S. is 65. The Country affords, besides Plenty of Salt, Mines of Copper, Iron, Silver, *&c.* A little above the Town of *Saltzburg*, springs the famous Bath of *Gastein*; the Water is hot, tastes strong of several Minerals, and by Bathing and Washing cures the Stone, Cholick, Pox, and other Malignant Distempers; but is never taken inwardly. The chief Mines in this Country are at *Gastein*, *Rauris*, *Brixenthal*, &c. They have also many Stone Quarries, with Variety of Stones of different Forms. The large rough Jasper, which lies unregarded in the Court of the Emperor's Palace at *Vienna*, came from hence. The Archbishop is by his Place Legate of the Papal See, which has occasioned Quarrels betwixt him and the Archbishop of *Magdeburg* for Precedency, which the Imperial Court has not yet determin'd. Within this Province, there are reckon'd the Bishopricks of *Chiemsee*, *Gurck*, *Seccau*, *Lavant*, *Freisingen*, *Passau*, and *Brixen*. Some add *Ratisbon*. The first 3 are not Princes of the Empire, and therefore have no Vote in the Diet. There are 8 Cities in this Province, viz. *Saltzburg*, *Hallein*, *Lawfen*, *Titmoning*, *Muldorf*, *Friſach*, and St. *Andrew's*. The two last in *Carinthia*, formerly *Pettau* and *Stiria*, and *Gemund* in *Carinthia*, were reckoned in this Province; but they are not so now.

Towns of Note here.

1. *Saltzburg*, the Metropolis. *Aventinus* thinks it changed its Name of *Juvavia*, when St. *Rupert* began to preach here. The old Name being lost by the Irruptions of

Digitized by Google

of the *Goths*, *Heruli*, &c. about 476. *La Forreſt* ſays, the *Goths* ſack'd it in the firſt Century, and kill'd the Biſhop and all the Chriſtians; ſo that they had no Biſhop for 200 Years. After that the Salt-Springs were diſcover'd, and then it was rebuilt by the Princes of *Bavaria*. *Charlemagne* tranſferred hither the Title of Metropolitan of all *Bavaria* from *Paſſau* in 798. The Cathedral was built by St. *Virgilius* in 773, and by him dedicated to St. *Rupert*, who, according to *Strachan's* Account in *Bleau's* Atlas, was Son to a King of *Scots*, and the Apoſtle of *Bavaria*, as appears by *Canuſius*, in the Monuments of *Saltzburg*, *Antiq. Lect. Tom.* 4. Some ſay, *Virgilius* was alſo a *Scots-man*. Pope *Gregory* VII. made the Archbiſhop of *Saltzburg* perpetual Legate for *Germany* in 1073, and he was made Primate of *Germany* by the Treaty of *Munſter* in 1648. He is a Prince of the Empire, Codirector with the Elector of *Bavaria* of that Circle, has the firſt Voice in the Diet of any of the Eccleſiaſtical Princes after the Electors, and is choſen by a Chapter of 28 Canons, who muſt all prove their Nobility before they are admitted. The Town is very ſtrong, and well built; and thô it has ſuffered much both by Fire and Water, 'tis now one of the faireſt and ſtrongeſt Cities of the Empire. It was formerly an Imperial Town, but is now ſubject to its Archbiſhop. His Palace is a very magnificent Structure, ſtands upon a Hill, is well fortified, and called *Mirabel*. The great Hall, the Galleries, the Tapeſtry, and the Chamber of Rarities, are well worth a Traveller's ſeeing. The Gardens and Orchards are well order'd, and abound with Figs, Pomegraneats, and other choice Fruits; but the Archbiſhop's chief Garden of Pleaſure is at *Hellenbrun*, a Mile diſtant, where there are noble Water-Works of various Shapes, with abundance of ſtrange Beaſts, Fowls, Fiſhes, *&c.* of all Sorts; and at the further End of it, two curious Proſpects from Houſes of Pleaſure. The publick Inns of the City are ſo large, that they are capable to entertain the greateſt Princes of the Empire, with their Attendants. The Inhabitants have a good Trade from the Salt produc'd in the neighbouring Pits. The Cathedral was new built in 1628, and is reckon'd one of the moſt magnificent in *Europe*. In St. *Sebaſtian's* Church, lies buried the famous Phyſician *Theophraſtus Paracelſus*, who died the 24th of *September*, 1541. Some will have him to be a *Swiſs*; but *Quade*, in his Gallantry of the *German* Nation, ſays, he was Baſtard to one of the *German* Lords of *Brombaſt*, who order'd him to be made an Eunuch, and ſent him to a Monaſtery to ſtudy. It lies in Long. 32. 12. Lat. 47. 50. on the Borders of *Bavaria*, at the Conflux of the *Saltz*, and two other Rivers, 67 Miles S. E. from *Munich*, and about 50 S. W. from *Paſſau*. The Univerſity here is one of the moſt conſiderable in the Empire.

2. *Hallein*, two *German* Leagues S. from *Saltzburg*, on the Banks of the *Saltza*. The Latins call'd it *Halliola* and *Hallula*. 'Tis famous for employing multitudes of People in its Salt-Works, from whence it had its Name. Dr. *Nicholſon* ſays, That in 1563, there was found here in a Salt-Pit, 6300 Foot deep, in the midſt of a hard Rock of Salt, a Humane Body, with its Limbs, Hair, and Clothes, uncorrupted; which, by its Antick Dreſs, ſeem'd to have lain there ſome Ages. This is atteſted by *Megiſter* in his Chronicle of *Carinthia*, and by the Author of *Metrop. Salisb. Tom.* 1. *Fol.* 35.

3. *Lauffen*, a ſmall Town betwixt *Saltzburg* and *Titmoning*, on the *Saltz*, about 15 Miles N. W. from *Saltzburg*. In 1147, *Frederick* I. held a General Diet of the Empire here. 'Tis a pleaſant Town, and has a good Trade. *Lazius* fancies it to be the Remains of *Antonin's Laviacum*, becauſe of an old *Roman* Inſcription found near this Place.

4. *Titmoning*, a ſmall Town betwixt *Burckhauſen* and *Lauffen*, ſuppoſed to be *Antonin's Bidaium*. 'Twas almoſt wholly deſtroyed by Wild-Fire in 1571, and taken by *Maximilian* of *Bavaria* in one Day in 1611. 'Tis ſtill fortified, but not ſtrong.

5. *Radſtatt*, a conſiderable Market-Town on the *Ens*. Several Geographers make it the ancient *Taurina* or *Taurnia* of the *Norici Mediterranei*. *Lazius* approves this, becauſe the Names of ſeveral Mountains near this City end in *Taurn*, and in ancient Records 'tis called *Taurachſtatt*. *Albert* Duke of *Auſtria*,

ſtria, before he was Emperor, beſieg'd it two Months, but in vain, being obliged to a ſhameful Retreat.

6. *Muldorf*, famous for a Battle betwixt the Emperor *Lewis* of *Bavaria* and *Frederick* of *Auſtria*, in 1322. It lies on the *Inn*, a *German* League from *Oetingen*.

The Archbiſhop of *Saltzburg* has a Power of creating Knights of the Order of St. *Rupert*, who wear a Medal with the Effigies of that Saint, and the Red Croſs of the Order on the Reverſe.

The County of Tirol.

W*Armund Igle*, a *German* Lord, in his Deſcription of this Country, ſays, 'twas the *Rhætia Superior* of the *Latins*, which, with *Rhætia Inferior*, was by the *Romans* accounted Part of *Italy*; for this, he quotes *Pliny*, who makes *Trent* to be the *Urbs Rhætica*. He adds, That the *Rhætian*, a Dialect of the old *Tuſcan*, is ſtill ſpoke in many Parts of this Country.

Tirol has *Swabia* and *Bavaria* on the N. Part of *Switzerland* and the *Griſons* Country on the W. *Brixen* and *Saltzburg* on the E. and *Trent* on the S. *Moll* makes it 125 Miles from E. to W. and the greateſt Breadth about 52 from N. to S. Dr. *Nicholſon* ſays, for Riches, Number of Inhabitants, and Plenty of Proviſions, it is equal to moſt Dutchies in the Empire. They have ſtore of Silver and Copper Mines in their Mountains, eſpecially at *Braunugg*, *Kutzpuhel*, and *Schwatz*. The Mines at the laſt were found in 1448; and before 1560, were ſo much improved, that they employed 30000 People; but in 1600, they were diminiſhed to 2000, and are now fewer; ſo that the Revenues of the Count of *Tirol* from thoſe Mines fall now much ſhort of 300000 Gilders *per Annum*, which *Cuſpinian* ſays they yielded in his Days. The Country is well ſtock'd with Wine, Fiſh, Veniſon, Wood, and other Neceſſaries for Life; ſo that the Emperor *Maximilian* ſaid, It was like a Countryman's Coat, coarſe, but warm. The Rocky Mountains, almoſt perpetually cover'd with Snow, make no good Appearance to the Eye; but the Vallies about *Inſpruck* are as fruitful as elſewhere. The Populouſneſs of the Country may be gueſs'd at from *Graſſer*'s Account of the ſmall Province of *Nonſiberg*, which, thô but 12 *German* Miles long, and 3 broad, he ſays contains 350 Pariſhes, and 32 ſtrong Caſtles.

The whole is divided into many leſſer Provinces; the chief of which are, 1. *Eſchland*, ſo called from the River *Eſch*. 2. *Inthal*, or the Valley along the *Inn*, the pleaſanteſt Part of the Country. 3. *Funſtermuntze*. 4. *Paſſerthal*. 5. *Munſterthal*. 6. *Vinſtgow*. 7. *Wallerbeid*. 8. *Nonſiberg*, beſides ſeveral others of leſs Note, and 3 or 4 Lordſhips, taken from the *Bavarians* by the Houſe of *Auſtria*.

While this Country was ſubject to the *Romans*, 'twas governed by a Lieutenant ſent from *Rome*; but on the Fall of the Empire, was ſeized by the Princes of *Bavaria*, whoſe Deputies govern'd it under the Name of Marquiſſes, when 'twas joined to the Empire. *Frederick* I. when he proſcribed *Henry the Lion*, Duke of *Bavaria*, divided his Dominions among other Princes, and *Tirol* was divided among others, and ſubjected to ſeveral; the chief of 'em was the D. of *Meran*; but that Duchy and City fell at laſt into the Hands of the Counts of *Tirol*, the laſt of whom, of the *Bavarian* Line, was *Albrecht*, whoſe eldeſt Daughter was married to *Henry*, Son to the Emperor *Frederick* II. and the Country was divided betwixt the Poſterity of her and her Siſter. And in 1289, *Elizabeth* of *Tirol* marrying *Albert* of *Auſtria*, brought that Country to his Family; and by Advice of her Council, *Margaret* of *Tirol* having no Iſſue, ſettled it again upon the Family of *Auſtria* in 1363. Since which, it has always continued in their Hands.

The chief Towns.

1. INſprug or *Inſpruck*, Lat. *Oenipons*, ſo call'd becauſe of its Bridge over the River *Inn*, is the Metropolis of the Country. It lies in Long. 30. 33. Lat. 47. 12. about 12 Miles S. from the Frontiers of *Bavaria*, 28 N. W. from *Brixen*, and 66 N. E. from *Trent*. It appears by an old Inſcription, That *Otto* I. D. of *Meran*, wall'd this Town in 1234; but nothing of theſe Fortifications remain now, except three Gates. The Princes of *Tirol* thought it not worth while to

Digitized by Google

to make the Fortifications ſtrong, becauſe it lies in the Heart of their Territories, and was defended at ſome diſtance by the ſtrong Caſtle of *Ombras*, and the Town of *Hall*; ſo that on the E. Side, it neither has nor needs any Fortifications; but the other Part is defended by Walls and Ditches, which ſeem rather to be deſigned for Ornament than Strength. Beſides, the Entrance of the Country is ſo well guarded by ſtrong Caſtles, that 'twas thought ſtrange *Maurice* Elector of *Saxony* ſhould have been able to march an Army hither, as he did, when he almoſt ſurpris'd *Charles* V. The Town is well built, eſpecially the Suburbs, where there are many ſtately Houſes. The Cathedral or chief Church at the *Franciſcan* Monaſtery is a ſtately Fabrick of hewen Stone, built by the Emperor *Ferdinand* I. who erected a noble Monument here for his Grandfather *Maximilian* I. on the Top of which ſtands a vaſt Statue of that Emperor in Alabaſter, guarded by 28 Statues of Braſs, of exquiſite Workmanſhip, larger than the Life, which make a noble Appearance; 14 of 'em repreſent Emperors and Princes of that Family, and 8 of 'em Empreſſes and Princeſſes, and the reſt ſeveral other Princes. Under the Emperor's Statue, there's a Character of that great Prince in Golden Letters, upon black Marble. The chief Ornament of the Town is the Palace of their ancient Counts, which has ſince been the Reſidence of the Princes of the Houſe of *Auſtria*. 'Tis beautified with many fair Gardens, Groves, Walks, *&c.* The Palace is convenient and large, but not regular or beautiful, having been built at ſeveral times. *M. Miſſon* ſays, the Roofs of the Houſes are flat on the Top, and the Rafters, inſtead of riſing to a Point, are revers'd; ſo that the Rain is gather'd in the middle of them. In the City, there's a Houſe called the *Chancery*, the Porch of which the Inhabitants pretend to have been cover'd with Plates of Gold by Arch-Duke *Frederick*, when he return'd from his Exile; but *M. Miſſon* having view'd them narrowly, found the Plates, which reſembled Tiles, to be of Braſs, cover'd with a thin Plate of Gold, or at leaſt of other Metals gilded; and being about 15 Foot ſquare, he ſuppoſes it might coſt about 200000 Crowns. The Citizens have a good Armory, well furniſh'd for Horſe and Foot, as they pretend for 30000 Men. They have two Cannon of a vaſt wide Bore, and each Barrel 16 Foot long. They have 50 more of a conſiderable Size, one of which has 7 Barrels, that may be diſcharged ſeverally. Dr. *Nicholſon* ſays, That in the Palace, there's a vaſt Collection of Rarities, ſuch as Agates, Chryſtals, Corals, Jaſpers, Jacynths, *Turkey* Stones, *&c.* Several Lumps of Virgin Gold and Silver dug out of the Mines in *Germany*, and a vaſt Number of Medals, with ancient and modern Coins; a compleat *Perſian* Suit of Armour, richly adorn'd with *Turkey* Stones and Rubies; the Arms of the Houſe of *Auſtria*, exactly repreſented in Diamonds and Rubies; a large Crucifix of Coral; the Sword of an ancient *Switſer*, with an Almanack cut on the Hilt; a large Diſh of Chryſtal ſet in Gold, beautified with Pictures in lively Colours, and adorn'd with many different Precious Stones, with abundance of other Rarities, too tedious to inſiſt upon. In the City, there are many curious Fountains, and ſpacious Market-Places.

About an *Engliſh* Mile E. from the City, ſtands the pleaſant and ſtrong Fort called *Ombras*. They derive its Name from the Deſign of it, which was to be a ſhady Summer-Houſe. A large Book was printed here in 1601, with an Account of the Pleaſures and Rarities of this Place. In their Armory, the moſt conſiderable Things are, the Armour of *Charles* IX. King of *France*, and of the Duke of *Parma*; the Statue of King *Francis* I. on Horſeback in Plaiſterwork, exactly repreſenting him in his Armour, and his Horſe in his Trappings, as he was taken at the Battle of *Pavia*. They have likewiſe the Armour of ſeveral Emperors, Kings and Princes of other Nations, with the Picture of each Prince drawn to the Life by his Armour. In another Room, there's a Collection of Rarities, among which, the chief are, Part of the Trunk of an Oak, in the Body of which there's a Deer quite enclos'd with Wood, of which their Philoſophers give this Account, That this Deer did probably periſh in the Snow; and upon a Thaw, was hurl'd down by a Torrent from the neighbouring Hills a conſiderable Depth into the Ground, where 'twas firſt incircled by the Roots, and af-

Digitized by Google

terwards by the Body of the Tree: Several Drawers of *Roman* and other ancient Coins in Gold and Silver; many Pieces of ancient Armour; a Log of Wood and Wedges petrify'd, becauſe, ſay the ſuperſtitious People, the Carpenter ventur'd to work on a Holy-Day; ſeveral fair Copies writ by a *German* with his Feet; a Piece of Wood growing out of a ſmall Lump of Ore, which the Miners call a Farewel, becauſe, when they meet ſuch a Twig as this, they reckon the Ore holds no further. *M. Miſſon* ſays, there's a large Hall with all Sorts of Arms more curious than uſeful, among others a Lance us'd by Arch-Duke *Ferdinand* in Tournaments. They ſay, he was ſo ſtrong, that he could ſtop a Coach and Six by taking hold of a Spoke of the Wheel, and would break two Crown-Pieces join'd together. In an adjacent Gallery, there's the Effigies of many Princes on Horſeback in Armour, with all the Ornaments uſed at Tournaments; and the Skin of a Serpent, 15 Foot long, taken near *Ulm*. At the End of the Gallery, there's an Apartment fill'd with the Spoils and Arms taken from the *Turks*, with a Baſſa and Aga of the Janizaries, repreſented on Horſeback, with the ſame magnificent Habits and Harneſs, imbeliſh'd with Gold, Silver, and Precious Stones, they had when taken. In another Gallery, there are the Rarities mention'd by Dr. *Nicholſon*; among which, there are 7 large Volumes bound in black Velvet, with Edges and Claſps of Silver, which, inſtead of Leaves, contain ſmall Boxes fill'd with Medals. There's a Croſs-Bow, with 34 leſſer Bows within its Compaſs, diſcharging ſo many Arrows at a time. There are alſo abundance of MSS. and rare Books, and Stones naturally repreſenting Trees, Fruits, Shells, and Animals. They have many Sepulchre-Lamps, Urns, Idols, *&c.* and a Piece of Rope, which they pretend to be Part of that with which *Judas* hang'd himſelf. On the Walls and Sieling, there are admirable Paintings, among which, *Noah*'s Rain-Bow is ſo extraordinary, that they ſay, the Great Duke of *Tuſcany* offer'd 100000 Crowns for it. They have a Library, which is not in very good Order, and a Gallery full of Buſts, and other Pieces of Antiquity; beſides many other Apartments adorn'd with Pictures of great Value.

On the S. Side of the Town, croſs a pleaſant Field, ſtands the famous Monaſtery of *Wilsheim* or *Wilden*, called by *Antonin* in his *Itinerary*, *Veldidena*, from which the City of *Inſprug* took its Original. The Monks are of the Order of St. *Norbbert*, and pretend to great Antiquity. They ſay, their Founder was *Heymon*, a Gigantick Prince of this Country, of 12 Foot and a half long; and what they ſtill call his Grave, is above 15. They alledge, That he killed a monſtrous Dragon, which threw down as much of the Monaſtery by Night, as his Men built by Day; and they pretend to ſhew his Tongue, of 3 Span and a half long, which they keep as a valuable Relick. They have a Gallery with the Pictures of all the Abbots ſince the Foundation. The Monaſtery is encompaſſed with a Wall 16 Foot high, which they ſay was leap'd over by a Hart, when cloſely purſued by Dogs ſome Years ago. Before the Gates, there's a Pillar with an Inſcription, giving an Account, That the Road from *Italy* towards *Augsburg* lay croſs the Field where this Monaſtery ſtands; and that it was repaired near 100 Miles together in the Time of the Emperor *Septimius Severus*.

2. *Hall*, 8 Miles N. E. from *Inſpruck*, famous for its Salt-Pits, and great Trade in Salt. Their chief Pits are 4 Miles from the Town, in the Mountains, where they dig the Salt like Ore out of Mines, throw it into great Trenches, which they fill with ſweet Water, and let it ſtand a Month, till the Salt be diſſolved, and the earthy Part ſunk to the bottom: After which they carry it to be boil'd in the City. In their great Salt-Houſe, they have 4 huge Iron Pans, each of which is 48 Foot long, 34 broad, and 3 deep; 3 of 'em are continually boiling, and one of 'em reſts a Week by Turns. About 1000 Men are conſtantly employed in thoſe Mines, and cutting Fuel for them. They have very odd Habits, and Hats of all Colours; and they carry their Salt in little Carts with Wheels, which they draw themſelves. This Town, and that of *Trent*, were taken by the Elector of *Bavaria* in 1703; but he was ſoon obliged to quit them.

3. *Mitten*, on the Frontiers of *Trent*, 33 Miles S. from *Inſpruck*, formerly the Metropolis of the Country, and the Reſidence of

a

a Duke. In 1419, a great Flood broke in upon this Town, which deſtroyed 400 People; and they ſay, That a Child in a Cradle, with a Cat ſitting by it, were carried down the River 12 *Engliſh* Miles, and taken out alive. *La Forreſt* ſays, That 'tis a pretty Town, and a Place of good Trade. Near this Town, ſtands the ancient and fair Caſtle of *Tirol*, with a ſmall Market-Town of the ſame Name, whence the whole Country had its Denomination. 'Tis remarkable for little now but its Situation. *La Forreſt* mentions *Glurens*, a ſmall City, in one of the fineſt Countries of *Tirol*; *Pludentz*, Capital of a County of the ſame Name; *Sonneberg* and *Feldkirock* the like.

4. *Stertzingen*, 17 Miles S. from *Inſpruck*, near the Mountains called *Brenner*, noted by ancient Geographers for being almoſt continually cover'd with Snow; and are by ſome ancient Authors falſly called the *Pyreneen* Mountains, from whence they make the *Danube* to ſpring, which is another groſs Miſtake.

BAVARIA.

THis Country contains a great Part of the ancient *Rhætia*, *Vindelicia*, and *Noricum*; but chang'd its Name, as we formerly mention'd, when the *Boii* ſeiz'd it about 472, as *Jornandes* tells us.

The Country abounds with Corn of all Sorts, Fruit, Veniſon, Metals, Marble, Salt, Baths, *&c.* and ſome Wine, which would very much enrich the Inhabitants, were they allowed the ſame Freedom of Trade with other Parts of the Empire. But their Electors have for many Years monopoliz'd their three chief Commodities: For, 1. They are forbid, on great Penalties, to import Salt from any other Dominions, or to buy any that is imported; and the Elector's Agents are only allow'd to ſell their own Salt they dig at *Draveſtein* and *Oberhall*; which being coarſe, they mix it with the purer Salt brought from *Saltzburg*, and ſell it again to thoſe who want it. 2. He engroſſes all the Corn, ſo that none is permitted to ſell it but his Agents. 3. He monopolizes all the ſtrong Beer, which is ſo much valued, that 'tis exported to other Countries of the Empire, and ſold only by his own Servants; but the People are allow'd to brew a ſorry ſmall Beer for their own Uſe. The Biſhop of *Paſſau* has lately followed the ſame Method, by which he fills his own Treaſures, but impoveriſhes his Subjects; ſo that the chief Subſiſtence of the Peaſants is from the great Herds of Swine fed in their Woods by Acorns and Crabs. They have alſo great Numbers of Bears, Wild-Boars, and other Sorts of Veniſon, in their Forreſts, which they frequently make bold with, thô they are forbid it without the Elector's ſpecial Commiſſion. Their Deer are generally of an extraordinary Size; and their Hiſtorians ſay, That in 1562, there was a Hart caught which weigh'd 625 Pounds.

This Country has *Miſnia* on the N. *Saltzburg* and *Tirol* on the S. *Swabia* and *Francconia* on the W. and *Bohemia* and *Auſtria* on the E. From S. to N. is 155 Miles, and from E. to W. about 125.

Some Foreign Authors, and even ſeveral of their Neighbours, reckon them a rude and barbarous People in compariſon of other *Germans*, and commonly call 'em Hog-drivers; but thoſe who have travelled the Country of late find it otherwiſe, and that they are as hoſpitable and courteous as others; thô it muſt be own'd, that the abſolute Government of their Prince very much hinders their growing rich, as the Impoſitions of their Clergy keep 'em groſly ignorant in Matters of Religion; ſo that moſt of their Worſhip is paid to Images and Saints.

Their ancient Government was like that of the other *Germans*; thô there is little of their Hiſtory that can be depended on before *Charlemagne*.

The *Atlas Hiſtorique*, and Dr. *Nicholſon*, give the following Account of the Geneology of the *Palatine* Family, and of that of *Bavaria*.

Aldigerius is ſaid to have made himſelf King of *Bavaria* in 456, and died in 504. He was ſucceeded by his Son *Theodo* I. who had War with the *Romans*, and, according to Dr. *Nicholſon*, was the firſt who had the Title of Duke in that Country, becauſe the *Franks* having made him their Tributary, that Title was more ſuitable to his Circum-

cumſtances. His Son *Theodo* II. ſucceeded, who was ſirnam'd, *The Great*, becauſe he drove the *Romans* out of his Country beyond the *Alps*. The *Atlas* places his Reign in 512. He was ſucceeded by *Theodo* III. who, Dr. *Nickolſon* ſays, was their firſt Chriſtian Prince, being converted, with his Country, by St. *Rupert* the *Scots-man*, formerly mention'd. We have nothing remarkable of theſe other Princes till *Odilo* or *Utilo*, whom the *Atlas* makes their 13th Prince, but Dr. *Nicholſon* their 14th; who being encourag'd by the Succeſs of ſome of his Predeceſſors, re-aſſum'd the Title of King; but was defeated near *Augsburg* by *Carloman* and *Pepin*, and forc'd to content himſelf with his old Title of Duke. He was ſucceeded by *Taſſilo* II. the laſt Duke of *Aldiger*'s Race, who was depoſed by *Charles the Great*, and *Taſſilo* and his Son *Theodo* were ſhut up in the Monaſtery of *Laureſheim* or *Lorſch*, within 4 *German* Miles of *Heydelberg*, where his Monument is ſtill to be ſeen, with an Inſcription in Rhiming Latin Verſe, giving a ſhort Account of his Story. Dr. *Nicholſon* ſays, That *Charlemagne* having thus ſeiz'd *Bavaria*, he enlarg'd its Boundaries a great way into *Hungary*, and made it once more a Kingdom. After this Emperor's Death, his Son *Lewis the Pious* gave his own Son *Lotharius* the Title of King, tho' he rul'd only as his Father's Deputy. He was ſucceeded by his Brother *Lewis*, whoſe Kingdom, ſays *Aventinus*, reached from the River *Lech*, which runs by *Augsburg*, as far as the *Save* and the *Teiſſe* in *Hungary*. *Lewis* died in 876, and was ſucceeded by his eldeſt Son *Carloman*, who being ſlain in a Battle near *Oetingen*, his Brother *Lewis* ſucceeded, who being choſen Emperor, *Arnolf*, his Brother *Carloman*'s Baſtard, Prince of *Stiria* and *Carinthia*, ſucceeded to *Bavaria*. He alſo being choſen Emperor after his Uncle's Death, made his own Son *Lewis* King of *Bavaria*, who dying without Iſſue, and his Brother *Conrad* being Emperor, the *Bavarians* choſe *Arnolf* II. called *The Wicked*, a Prince of *Charlemagne*'s Lineage, to be their King; who revolting againſt *Conrad*, was by him and the Emperor *Henry* I. forc'd to lay aſide the Title of King, and to re-aſſume that of Duke. The *Atlas* ſays, That this *Arnolf* is by ſome accounted the Founder or Origine of the preſent Families of *Bavaria* and the *Palatinate*, and was Son, as ſome Hiſtorians inform us, ſays Dr. *Nicholſon*, to *Leopold* Marquis of *Auſtria*. He walled *Ratisbon*, and died about 937. From him deſcended the Counts of *Schiren*, who were for ſome Time deprived of their Succeſſion; but *Werner*, one of thoſe Counts, recover'd it again, and from him the preſent Family proceeds. *Henry* III. one of his Succeſſors, is obſerv'd by ſome to have been the firſt Emperor who came in by Election, according to the Order made by Pope *Gregory* V. After which, *Bavaria*, ſince this Emperor died without Iſſue, was transferred to ſeveral Families, according as the Emperors thought fit. But *Conrad* II. *Henry* III. and *Henry* IV. who ſucceeded him in the Empire, kept it in their own Hands, and their Deputies had the Title of Dukes: At laſt, the Dukedom was given by the Emperor *Henry* IV. to *Guelph* Count of *Ratisbon* in *Swabia*, who died in 1101, and was ſucceeded by *Guelph* II. He by *Henry* V. and he by *Henry* VI. ſirnam'd *The Proud*, who married the only Daughter of *Lotharius* the Emperor, and was made D. of *Saxony*. After the Emperor's Death, he diſputed the Title of the Empire with *Conrad* Duke of *Swabia*, who was elected Emperor, for which he was proſcribed. After this, *Bavaria* was given to his Half Brother *Leopold* of *Auſtria*; who dying in 1141, he was ſucceeded by his Brother *Henry* VII. who, at the Emperor's Command, reſign'd it to *Henry* VIII. Son to *Henry* VII. who, for his great Performances in the *Holy Land*, had a Lion given him for his Coat of Arms, and on that Account was call'd *Henry the Lion*. But rebelling againſt the Emperor *Frederick* I. he was proſcribed, and ſucceeded by *Otho* Landgrave of *Witelſpach*, who was deſcended from *Arnolf* of *Shiren*, formerly mention'd: And thus *Bavaria* return'd to the Family of its ancient Maſters. He died in 1183, and was ſucceeded by his Son *Lewis*, who, as *Aventinus* ſays, was made Count *Palatine* of the *Rhine* by *Frederick* II. Others ſay, this Honour was confer'd firſt on his Son. This Prince being murder'd by a Ruffian, was ſucceeded by *Otho the Illuſtrious*, who married the only Daughter of *Henry* Duke of *Saxony*, and Count *Palatine*; whereupon the Electoral Dignity was firſt brought into the Family of *Bavaria*, as is

con-

Digitized by Google

confirmed by an ancient Rhime under the Picture of this Prince in the Electoral Prince's Gallery at *Heydelberg*, where he died, and was ſucceeded by his Son *Lewis the Conſtant*, or *the Severe*, Count *Palatine* of the *Rhine*, and Duke of *Bavaria*. He died in 1294, and from his Son *Rodolph* I. came the preſent *Palatine* Family; and from his Son *Lewis*, came that of *Bavaria*. Here Dr. *Nicholſon* and the *Atlas* differ; for the former makes *Lewis* and *Rodolph* the Sons of *Otho the Illuſtrious*, and the latter makes them Sons to *Lewis the Conſtant*. Dr. *Nicholſon* adds, That *Lewis*, called by Hiſtorians *Lewis* of *Bavaria*, was choſen Emperor, and maintain'd his Title againſt *Frederick* of *Auſtria*, and his Brother *Rodolph*, whom he baniſh'd; but confirm'd the Title of the *Lower Palatinate* and *Amberg* to his Children, and order'd, that the Electoral Dignity ſhould remain by Turns in his own and his Brother's Poſterity. The Emperor *Charles* IV. and his Succeſſors refuſed to obſerve this Edict, and gave the Electoral Dignity to *Rodolph*'s Branch, againſt which the Dukes of *Bavaria* always proteſted at the Election of the Emperor; and many Treatiſes *pro* and *con* have been writ on this Subject, which were printed at *Munichen* and *Heydelberg* about 1612, and 1614. *Stephen* ſucceeded his Father the Emperor in the Dukedom of *Bavaria*, and died in 1237, leaving three Sons, who for ſome Time were joint Governors; but at laſt the greateſt Share fell to *Frederick*, the 2d Brother. But here Dr. *Nicholſon* and the *Atlas* differ in the Succeſſion; for the latter ſays nothing of *Frederick*, or of his Son *Henry*, his Grandſon *Lodowick*, or *George the Rich*, whom the Doctor makes Succeſſors one after another to *Stephen*. The Doctor ſays, That *Lewis*, Grandſon to *Frederick*, baniſh'd the *Jews*, ſeiz'd their Goods, and died 1479. That *George the Rich*, who ſucceeded him, founded the Univerſity of *Ingolſtat*, and died in 1503, without Iſſue-Male, having married his only Daughter to *Robert* Elector *Palatine*, who expected the Dignity of *Bavaria* as her Dowry; but *Maximilian* I. being unwilling that the *Palatine* Family ſhould riſe ſo high, he encouraged the Princes of the Houſe of *Bavaria*, who reſided at *Munichen*, to diſpute the Power of *Palatine*'s Pretenſions by War; ſo that laſt the Dutchy of *Bavaria* came to *Albert*, who was lineally deſcended from Duke *Stephen*; and he dying in 1577, was ſucceeded by his Son *Albert* II. or, as ſome call him, *Albert* V. who was ſo zealous a Papiſt, that he built and endowed ſeveral Colleges for Jeſuits in *Lantzberg*, *Ingolſtat*, and *Munichen*. He was ſucceeded by his Son *William*, as zealous a Papiſt as his Father, who dying in 1626, was ſucceeded by his Son *Maximilian*, who having join'd with *Ferdinand* II. againſt *Frederick* Elector *Palatine*, that was choſen King of *Bohemia*, he was inveſted in the *Upper Palatinate*, and the Electoral Dignity at firſt for Life, when ſeveral Electors proteſted againſt it; but afterwards, in a Diet at *Prague* in 1628, it was confirmed to him and his Heirs, and ratified by the Treaty of *Munſter*. He died in 1651, and was ſucceeded by his Son *Ferdinand*, who was noted for Reſtleſſneſs and Piety, but not much for Valour or Learning. He died in 1679, and was ſucceeded by the preſent Elector *Maximilian Emanuel*, who was born in 1662; and declaring againſt the Emperor in Favour of *France*, and his Siſter's Son the D. of *Anjou*, did, with the *French* Forces, raiſe War in the Empire, ſubdued Part of *Tirol*, and puſhed his Conqueſts to the Frontiers of *Auſtria*; but his Army, and that of *France*, being routed at the famous Battle of *Hochſtet*, he is diſpoſſeſs'd of his Dominions, as is alſo his Brother the Elector of *Cologne*, and he was put into the Ban of the Empire in 1704. His eldeſt Son, *Albert Cajetanus John Joſeph George*, was born in 1697. From the Branch of *Bavaria* came that of *Wartenberg*, by a Son of *Albert* V. The preſent Prince is *Francis Marquardus*, Count of *Wartenberg*, who is a Knight of the *Golden Fleece*.

The Elector's Titles are, - - - By the Grace of God, Duke of *Upper* and *Lower Bavaria*, and of the *Upper Palatinate*, Duke and Count *Palatine* of the *Rhine*, Elector and Grand Maſter of the Houſhold to the Empire, Governor and Captain-General for his Catholick Majeſty in the *Netherlands*, Landgrave of *Luchtenberg*, &c.

His Pretenſions are, to the County of *Tirol*, to the Towns of *Ratisbon* and *Donawert*, to the Marq. of *Burgaw*, to the Vicariate of the Empire, and to ſome neighbouring Countries.

The

The Dominions belonging to him are, the *Upper* and *Lower Bavaria*, the *Upper Palatinate*, the County of *Cham*, the Landgraviate of *Luchtenberg*, the County of *Hag*, the Lordſhips of *Wiſenſterg*, and of *Mindelheim*, and the Town of *Donawert*.

His Arms are, *Lozenge-wiſe*, *Argent* and *Azure*, of 21 Pieces Bend-wiſe, for *Bavaria*; 1. and 4. *Sable*, a *Lion* Or, Crown'd *Langued*, and Arm'd *Gules*, for the *Palatinate*; 2. and 3. *Gules*, with an Imperial Globe Or, as Elector, and Grand Maſter of the Houſhold of the Empire.

The Elector of *Bavaria* was reckoned one of the powerfuleſt Princes in the Empire. His Territories are very populous; but his Subjects are not commonly reckon'd ſuch good Soldiers as thoſe in the neighbouring Countries, ſays Dr. *Nicholſon*. He adds, That his Monopolies before-mention'd, with the great Impoſts on all Commodities carried along the *Danube*, and other Navigable Rivers in his Country, with his own particular Domains, are ſufficient to keep as great an Army as any of the other Electors.

His Court was very ſplendid, and his Great Officers and Miniſters were generally Counts and Barons. His principal Councils were, 1. That call'd the *Court-Council*. 2. The *Privy-Council*. 3. Another call'd the *Chamber*. The Chief Lieutenants or Governors under him were, the Governor of the *Upper Palatinate*, the Adminiſtrators of *Burghauſen Landſhut*, and *Straubingen*, with the Governors of *Munichen*, *Ingolſtat*, and *Rodenberg*. His Standing Troops conſiſted of 14 Regiments of Foot, whereof 2 were of 2400 Men each, 5 of 2100 each, 2 of 1800 each, and 5 of 1200 each. His Cavalry were 10 Regiments, *viz.* the Partizan, Carabinier and Horſe-Granadier Guards, of 130 Men each; 3 Regiments of 940 Men each, 2 of 900 each, and 1 of 940; 7 of 'em being Horſe, and 3 Dragoons.

The Country is divided into *Upper* and *Lower*: The former, which lies under the *Alps*, is cold and barren, affords but little Corn, and no Wine; but the latter, which lies on the Banks of the *Danube*, is ſcarce inferior to any Province of the Empire in Fruitfulneſs, Riches, and Pleaſantneſs. There was formerly a ſtrict Alliance betwixt the Family of *Bavaria* and thoſe of *Brandenburg* and *Brunſwick*; but ſince the Reformation, that good Underſtanding betwixt them is broke off.

The chief Rivers are, the *Danube*, which runs through it, and divides the *Palatinate* from the Dutchy; the *Lech*, which divides it from the Biſhoprick of *Augſburg*; the *Inn*, the *Amber*, the *Iller*, the *Saltz*, the *Nab*, and the *Regen*.

The chief Towns in Upper Bavaria.

1. MUnich or *Munchen*, Lat. *Monachium*, ſuppoſed to be the Καμηδουν of *Ptolemy*. *Aventinus* ſays, Duke *Henry* XII. founded this City out of the Ruins of a Monaſtery; whence it had the Name of *Munchen*, and has the Picture of a Monk for its Arms. 'Tis the Metropolis of *Bavaria*, and the Seat of the Duke. It ſtands on the River *Iſar*, in Long. 30. 30. Lat. 48. 3. 40 Miles S. from *Ingolſtat*, about 60 N. from *Inſpruck*, and about 100 Miles W. from *Linz*. 'Tis eſteemed one of the moſt pleaſant, rich, and populous Cities of *Germany*. The *Iſar* runs in Channels thrô many of the Streets; ſo that the richer Citizens have fair Fountains and Water-Works in their Houſes, and the whole Town the Conveniency of Mills within their Walls. This City has quarter'd 18000 Soldiers for a conſiderable Time. Moſt of its Inhabitants are Glaſiers and Silk-Weavers, intermix'd with Nobility and Gentry that attend the Court. The adjacent Country hardly affords Corn to ſupply the Town. Great Quantities of Salt and Wine are vended here, eſpecially at their two Fairs at St. *James*-Tide, and the Week after the Feaſt of the Three Kings. 'Tis govern'd by a Common-Council of 36, whereof 24 are called the Outer-Houſe, and 12 the Inner; all ſuperintended by 6 Aldermen, uſually Perſons of good Extraction.

The moſt remarkable Buildings are, The Elector's Palace, a ſtately and Royal Structure, fit to receive the greateſt Monarch in *Europe*, with his Attendants and Guards. 'Twere endleſs to give a particular Deſcription of all the Curioſities in it. The chief of 'em are, the Long Gallery; the *Antiquarium* or *Statuarium*, containing a vaſt Number of old and new Pieces in Marble, Wood, Stone, *&c.* The noble Foun-

Digitized by Google

Fountain in the middle of the Garden, on the Top of which ſtands *Perſeus*, holding *Medusa*'s Head in his Left Hand, and a drawn Sword in his Right, and her Body at his Feet; the Water guſhing out of the Head and Neck in ſmall Streams, as out of the Veins of a Body newly diſſected: The ſeveral rare Water-Works and Grotto's: The Old Palace, wherein are reſerv'd the Sword, and ſeveral other Relicks of Duke *Chriſtopher*: The Library, wherein, beſides a vaſt Collection of printed Books in all Languages, Ancient and Modern, there are a great many MSS. of good Note; amongſt which, are theſe that follow: A Latin Treatiſe in Folio, in an old ſquare Character, pretended to be written by Pope *Clement* I. to St. *James* the Apoſtle: The New Teſtament in the *Indian*, *Armenian*, and *Wendiſh* Tongues: Three noble Volumes in Royal Paper, Folio, of Muſical Compoſitions, by *Orlandi di Laſſo*, and other famous Artiſts: A large Book of Medicinal Preparations, by that famous *Italian* Phyſician *Gratiano di Francolino*, &c. In the Chamber of Rarities, Things moſt obſervable are, A neat Perſpective Globe, in the Circumference whereof you have the whole Hiſtory of our Saviour's Paſſion; which being inverted, ſhews the Elevation of the Serpent in the Wilderneſs on one Side, and the Crucifixion of our Saviour on the other: A Landskip in Coral: The Figure of *Parnaſſus* in the ſame Subſtance, with the 9 Muſes plac'd round it: Flowers and Plants caſt in Gold: Several Drawers full of ancient and modern Coins and Medals: A Landskip lively repreſenting Buildings, Fields, Woods, &c. in their proper Colours, made of Stones of different Colours, laid in Wood: Idols, and Heatheniſh Gods and Goddeſſes, of various ſorts: The Picture of *Chriſtopher Froſchamer*, a notorious Murderer, who is ſaid to have committed 345 Murders with his own hand, and to have been privy to 400 more, committed by other Perſons: With many other Curioſities in Art and Nature.

The next Place worth ſeeing is the Jeſuits College, a Princely Fabrick, by ſome reckoned the ſtateliеſt Piece of new Building (next to the *Eſcurial* in *Spain*) that *Europe* affords. It conſiſts of two large Quadrangles, beſides Cloiſters, wherein are a Number of Lodging and Dining-Rooms, Schools, &c. and 800 Croſs-Windows. The Church, built after the *Italian* Manner, and dedicated to St. *Michael* the Archangel, is now the uſual Burying-place for the Electors and Princes of *Bavaria*. The firſt of that Race here entomb'd was *Renata*, a Daughter of *Lorrain*, and Wife of *William*, the Founder of this Church and College, who died *May* 23, 1602. Behind the Quire they have their Treaſury, where there's a vaſt deal of Wealth, beſides Golden and Silver Crucifixes, Candleſticks, Chalices, rich Tapeſtry, and other Church Ornaments.

The *Dom Kerch*, or chief Church in the City, dedicated to the Virgin *Mary*, is beautified with two delicate Towers, each of 'em 333 Foot high, and enrich'd with the Relicks of St. *Benno*. 'Twas at firſt only a Chapel of Eaſe to St. *Peter*'s Church; but in 1271, was made a Pariſh-Church. 'Tis govern'd by a Provoſt, Dean, and 13 Canons.

The *Franciſcan* Monaſtery is worth an *Engliſhman*'s View; 1. Becauſe of the neat Piece of Clock-Work, which repreſents the Poſtures of two *Engliſh* Cavaliers, to whom an Angel blows a Trumpet. 2. For our Countryman *William Occam*'s Sake, who having for ſome Years ſtoutly maintain'd Duke *Ludowick*'s IV.'s Cauſe againſt the Pope, was here buried in 1347. This City was built in 962, and walled round in 1156. *Guſtavus Adolphus* took it in 1632; but would not ſuffer the Palace or Town to be ſack'd, ſaying, It were pity to deprive the World of ſuch a City, and to ruine ſuch a Palace, that ought to ſtand to the End of Time. Moſt of the Houſes are well built, and finely painted on the Outſide. The Market-place is extreme fine, and the Houſes round it uniform, with Piazza's under them, in which there are many rich Shops. Mr. *Ray*, in his Travels, ſays, 'tis the faireſt City in *Germany* for its Bigneſs: The Streets are broad and regular; and in the Elector's Gardens, there's a vaſt Number of Aloe-Trees: He thinks *Europe* cannot produce the like in Number, both for their Stalk and Flowers. There's an *Engliſh* Nunnery in this City, with Pews after the *Engliſh* Faſhion, which is not cuſtomary in Popiſh Countries, where they have generally moveable Chairs and Benches. M. *Miſſon*,

Digitized by Google

in his Voyage to *Italy*, says, Tho' the City be beautiful, 'tis but indifferently fortified, scarce half so big as *Augsburg*, and has little Trade; but we suppose he excepts the Time of their Fairs. He says, the Jesuits shew'd him a Joint as big as that of an Elephant, which they pretended to be one of St. *Christopher's* Back-Bones. He says, the Outside of the Electoral Palace does not answer the Inside; for tho it be a vast Structure, 'tis not very regular, because built at several Times. The great Hall of the Elector's Apartment is 118 Foot long, and 52 broad, full of curious Historical Pictures, the Sacred on the one Side, and the Prophane on the other; and each of 'em has a Latin Inscription in Verse annex'd. In the little Chapel belonging to the Electress's Apartment, there's nothing almost to be seen but Gold, Pearls, and Gems. The Parlour of Perspectives is extreme fine; but the Hall of Antiquities brought hither from *Rome* exceeds all the rest, there being no less than 192 Busts, and 400 other Pieces here, much esteemed for their Workmanship and Antiquity. The Furniture of the Palace is rich, beyond Imagination; and besides the Tapestry in Use, they reckon'd in the Wardrobe to the Value of some Millions of Crowns. In the Treasury, there are whole Services of Gold, and many other Precious Vessels, vast Numbers of Pearls, Diamonds, Rubies, and other Precious Stones, with a vast Number of rare Pictures, curious Works, Medals, and such like Rarities; and among the rest, a Cherry-stone, with 140 Heads distinctly engraven upon it, and a Boat of Palm-Tree Wood turn'd into Stone. Wherever one turns their Eye in this Palace, there's nothing to be seen but Marble, which Mr. *Misson* says is an artificial Composition, but so well harden'd and polish'd, that it looks like natural Marble.

2. *Freysing*, which for its Antiquity deserves the next Place. 'Tis supposed to have been founded by the *Romans*, when they subdued *Noricum*, &c. and by them to have been called *Fruxinum*, *Fruxinium*, or *Fruxinia*, from whence comes its present Name. The neighbouring Hill, on which stands St. *Stephen's* Monastery, was formerly called *Teutonis Mons*, because of an Altar there to their Idol *Teut*. Others call it *Theodonis Mons*, from the Palace of *Theodo*, one of their Princes, where he and his Successors kept their Court, and among others King *Pepin*, whose Name, *Pepinhausen*, and some other neighbouring Villages, still retain. The Town and Bishop's Palace, with its Dependencies, lies pleasantly on the Bank of the *Mosach*, 20 Miles N. E. from *Munichen*, where there's abundance of fair Fields and Parks. Christianity was planted here about 444, when there was a Chapel dedicated to the Virgin, where their Cathedral now stands. Pope *Gregory* II. made it a Bishop's See about 716, and his Successors continued there till most of the Town was destroyed by the *Swedes* in 1632. The See was restor'd in 1639, and is commonly enjoy'd by a *Bavarian* Prince, who owns the Archbishop of *Saltzburg* for Metropolitan. The famousest Bishop of this See was *Otto* I. Son to *Leopold* Marquis of *Austria*. He founded the large Monastery of *Newstiff* near this Town, with several others. He attended *Conrad* II. to the *Holy Land*, and died in 1158. His Memory is still famous for his Work, called, *Ottonis Frisingensis Chronologia*, which gives a Judicious Account of the most remarkable Revolutions of all the chief Governments of the World, from the Creation to his own Time. *Waldo*, their 9th Bishop, is famous for having translated the Four Evangelists into old *Frankish* Rhimes, for the Use of the common People. Bishop *Rhenanus* concludes from this Book, That the *French* had their Origine from this Country, and that their ancient Language was *High-Dutch*.

3. *Ingolstadt*, near the *Danube*, about 27 Miles N. W. from *Freysingen*. This, with other Towns in *Germany*, and *Angleria* in *Italy*, are thought by *Cambden* to have derived their Names from the *Angli*, who sent Colonies into these Countries. Hence some Historians call it *Anglopolis*. Others call it *Oreapolis*, and *Oreatum*. *Bertius* says, the Emperor *Ludowick* IV. first made it a City, and wall'd it about 1412, it being a large Town before. *George the Rich* founded a strong Castle, which is still its chief Defence; and Duke *William* compleated the Fortifications about 1537. It stands in a plain and fruitful Country: The Houses are generally well built, and the Streets uniform and fair. 'Tis famous for 3 Things;

1. The

1. The *Gymnasium*, which has the same Privileges with the Universities of *Bononia* and *Vienna*; and here the great *Bellarmin*, *Obertus*, *Gisanius*, and *Petrus Sapianus*, were educated. 2. For the great Siege it held out against the Protestants in 1545; of which, *Sleidon* and others give an Account. It likewise held out against *Gustavus Adolphus* in 1632. 3. For its impregnable Castle, mention'd before; to which Dr. *Nicholson* adds a 4th, *viz.* the Image of the Virgin in their great Church, which, with its Workmanship and Jewels, cost 50000 Crowns: 'Tis of pure Gold, and a considerable Bulk. Before it, there kneels a *French* King of the same Metal, but of a less Size, with a long Purple Robe, enamell'd with yellow Flower-de-Luces; and near it, stands another small Image of St. *Michael*, compos'd of Jewels and Precious Stones, with a Pair of Scales in his Hand. This is reckoned the strongest Place of *Bavaria*, and has one of the finest Arsenals in *Germany*. 'Twas surrender'd to the Confederates after the Battle of *Hochstet*.

4. *Donawert*, has its Name from the *Danube*, on which it stands, about 25 Miles W. from *Ingolstat*. All Travellers who go up or down the River are obliged to land here, and pay a small Toll, which brings the Town a great deal of Money; as does likewise the Passage of their Bridge over the *Danube*, because it stands near so many great Towns, *viz.* about 14 *German* Miles from *Munichen*, 12 from *Nuremberg*, 3 from *Nordlingen*, 5 from *Weissenburg*, and 6 from *Augsburg*. 'Tis a strong Town, revolted from the Duke of *Bavaria* in 1420, was made an Imperial Town by the Emperor *Sigismund*, and continu'd so till 1607, that it was proscrib'd by *Rodolph* II. for embracing the Protestant Religion, and afterwards taken by the Duke of *Bavaria*. The *Swedes* took it twice in the Civil Wars of *Germany*; but 'twas restor'd to *Bavaria* by the Treaty of *Munster* in 1648. Near this Town lies *Schellemberg*, a fortified Mountain, which serves instead of a Castle to the Town, famous for the Defeat given to the *French* and *Bavarians* there in *July*, 1704. chiefly by the *English* and *Scots*, when they forc'd the Enemy's Trenches with incredible Bravery, and soon after made themselves Masters of *Donawert*.

5. *Rain*, on the *Lech*, 10 Miles S. E. from *Donawert*, a very well fortified Town, and one of the Keys of *Bavaria*.

6. *Landsperg*, on the River *Lech*, 6 *German* Miles from *Augsburg*. The Jesuits have a College here, which is one of the first they had in the Empire, from whence there's a fine Prospect of the neighbouring Country.

7. *Oetingen*, Old and New, in a Plain, betwixt the River *Inn* and the Mountains, about 50 Miles E. from *Munichen*. These Towns were formerly one, and much larger than now. Some fancy it to have been the *Oenipons* of the *Romans*. *Otto* Duke of *Bavaria*, and his Brother *Theodo*, had their Palace here, and were baptiz'd by St. *Rupert* about 616, as some would prove from an old Inscription found here. These Princes founded the two ancientest Churches in the Empire, dedicated to the Virgin, the one at *Ratisbon*, where *Theodo* usually kept his Court, and the other at *Otten*. In the latter, there's a fair Image of the Virgin, curiously done in Wood, which is said to have been presented to *Theodo* by St. *Rupert*. In 910, all the Town was destroy'd by the *Huns*, except the Virgin's Chapel. 'Tis the *Loretto* of *Germany*, and much enrich'd by the Presents of superstitious People, whom the Jesuits perswade that many Miracles have been done by this Image, St. *Philip*'s Arm, and other Relicks they keep here.

8. *Tegernsee*, so called from the *Lacus Tigurinus*, on which it stands. It has a famous Monastery betwixt the *Iser* and *Inn*, about 30 Miles S. E. from *Munichen*, near the Foot of the *Alps*. 'Twas founded by *Albert* and *Ocker*, two *Bavarian* Princes, is well fortified with a Wall and Ditch, and the Abbot takes Place in publick Convocations before all the Abbots and Priors of the Country.

9. *Schyren*, in Latin *Schyrum*, formerly a Town of good Note, and the Residence of the Dukes; but now remarkable only for a Monastery of *Benedictines*, where 120 Dukes and Dutchesses of *Bavaria* lie entomb'd.

10. *Wasserburg*, on the River *Inn*, about 32 Miles S. from *Munichen*, a pretty little Town, strong by its Situation, at the Conflux of another River into the *Inn*, and Capital of a County of the same Name, which

Digitized by Google

was united to *Bavaria* by *Otho the Illuſtrious*, in 1247.

11. *Hag*, a little Town near the *Inn*, about 5 Miles N. from *Wofferburg*, Capital of a County united to *Bavaria* in 1567. 'Tis govern'd by its own Laws.

12. *Muldorf*, on the *Inn*, about 12 Miles N. E. from *Hag*. 'Tis a ſmall Town, but famous for a Victory gain'd here by the Emperor *Lewis* of *Bavaria* over *Frederick* Duke of *Auſtria*, whom he took Priſoner in 1322.

13. *Burkhauſen*, a ſtrong Town on the River *Saltzach*, the *Bedacum* of the Ancients, 10 Miles S. E. from *Muldorf*.

14. *Branaw*, on the *Inn*, 22 Miles E. from *Muldorf*, a Town very well fortified, which held out a ſtrong Siege againſt the *Swedes* in 1632.

15. *Scharding*, a very pretty Town, on the Conflux of the Rivers *Inn* and *Ratt*, 17 Miles N. E. from *Branaw*.

The chief Cities and Towns in Lower Bavaria.

1. *Ratiſbon*, by the *Germans* called *Regenſpurg*, the chief City in the Circle of *Bavaria*, and the only Imperial Town in the Elector's Dominions. It lies on the S. Side of the *Danube*, in Long. 31. Lat. 49. near 60 Miles N. E. from *Munichen*, and 60 from *Augſburg*. There are two old Inſcriptions here, the one over the outermoſt Gate upon the great Stone-Bridge, the other in a Tower near St. *Peter*'s Gate, which ſay, That *Tiberius*, Son-in-Law to *Auguſtus*, pitch'd his Tents here, and called the Place *Auguſta Tiberii*, or *Auguſta Colonia Tiberii*; but this is not taken Notice of in *Antonin*'s Tables, or in the *Notitia Imperii*, and ſeems to be contradicted by *Tacitus*, who ſays, the *Romans* had but one Colony in *Rhætia*, which was the *Auguſta Vindelicorum*, now *Augſburg* in *Swabia*. The modern Name comes from the River *Regen*, which runs by one Side of the Town into the *Danube*; and the Name of *Ratiſbona* was given it, becauſe of its being a Harbour for Veſſels on the *Danube*. *La Forreſt* ſays, the Dukes of *Bavaria* poſſeſs'd it till 1180, that the Emperor *Frederick Barbaroſſa* made it an Imperial Town. It has ſtill the Remains of the Palaces and Houſes of the chief Nobility of the old Dukes of *Bavaria*, which are venerable Pieces of Architecture; and there's yet a Place in the Corn-Market called the Duke's Palace, tho' there are ſcarce any Remains of it now to be ſeen. The Elector *Palatine* had formerly two other fair Palaces here, one of 'em ſold to St. *Emeran*'s Monaſtery, and the other by the Wooden Bridge which leads to the *Under Werth* of the *Danube*; but he was forced to quit his Pretenſions to any Thing in this City, by reaſon of his Quarrel with the Citizens about the Royalty of the *Danube*, which ſtill occaſions Controverſies betwixt them and the Houſe of *Bavaria*. The City is large, populous, and well fortified, with a double Wall, Ditches, and Rampires; and the Situation is ſuch, as affords every Thing for the Pleaſure and Profit of the Inhabitants. The neighbouring Fields abound with all ſorts of Corn and Paſturage, beſides Vineyards, which produce a ſtrong and palatable Wine, ſcarce inferior to the beſt Rheniſh. They have a large Trade, by reaſon of the *Danube*; and the *Regen* and other neighbouring Rivers ſupply them with Plenty of Fiſh. The Houſes are generally well built, and the Streets large. In one of the old-faſhion'd Houſes over againſt the Town-Hall, there's a famous Monument, repreſenting the Emperor *Henry the Fowler*, and a Duel betwixt a *Turk* and a Nobleman of this City in 913, with the exact Figure of the Lances, Armour, and Habit of thoſe Times. The *Turk*'s Armour continued above 600 Years in the Church of the Monaſtery of *Nider Munſter*, till *Charles* V. begg'd it of the Abbeſs. His Helmet was of caſt Braſs, and weighed 20 Pound. His Harneſs was a long Coat of an Elephant's Skin, almoſt cover'd over with thick Boſſes of Iron nail'd upon it. His Shield was of well poliſh'd Steel, upon which was engrav'd the Picture of a Devil, with a Spear in his Hand. His Sword was two Yards and a half long, and near 5 Inches broad. 'Tis the See of a Biſhop, who, *Goldaſtus* ſays, is not ſubject to the Archbiſhop of *Saltzburg*, but depends immediately on the Pope. They embrac'd the *Augſburg* Confeſſion in 1442; but the Biſhop, who is Lord of the neighbouring Territory, has Maſs ſaid in the Cathedral every

Digitized by Google

every Week. The moſt remarkable Thing in this Cathedral is St. *Emeran* or *Hemeran*'s Monaſtery, who came hither from *Poictiers* in *France* to preach about 640. During his Stay, Duke *Theodo*'s Daughter being got with Child by a *Bavarian* Knight, he perſwaded her to lay the Baſtard to *Emeran*, who being then on his Journey to *Rome*, was purſued and killed by her Brother. But his Innocency being afterwards diſcover'd, his Corps was brought hither, and buried in St. *George*'s Church, where Duke *Theodo* immediately founded a *Benedictine* Monaſtery, and enjoin'd them to own St. *Peter* and St. *Emeran* for their Patrons. In this Monaſtery, they pretend to ſhew the Tomb of *Dionyſius* the *Areopagite*, whoſe Bones they alledge were brought hither by the Emperor *Arnulf*, their great Benefactor. This occaſioned a great Diſpute betwixt the Monks of this Place, and thoſe of St. *Denis* in *France*; for both of them pretended to his Body, as they do ſtill; thô Pope *Leo* IX. who was a *German*, forbad thoſe of St. *Dennis* to lay Claim to it. The Monks here boaſt alſo of ſome of the Virgin's Hair, a Piece of the Crown of Thorns, and a Part of the Croſs. They have three Books of great Antiquity and Value; the firſt, a Latin Copy of the Four Evangeliſts, writ in Gold Letters, and in an old *Lombard* Character, by two of this Fraternity, in 870. 'Tis adorned with Boſſes of Pearl, and Claſps of Gold, and was preſented to the Emperor *Charles the Bald*, whoſe Picture is before it, and was given to this Monaſtery by the Emperor *Arnulf*. The 2d is another MSS. of the Goſpels, writ in 754, by an Anonymous Biſhop of 90 Years of Age, in a delicate ancient Character; but not ſo richly embelliſh'd as the other. The 3d is a curious Regiſter of the Exploits of *Attila* the *Hun*. The Abbot depends immediately on the Pope, to whom he pays an Annual Tribute. *Apollonius* ſtudied the Greek, of which he was ſo great a Maſter, in this Monaſtery about 697. The Biſhops of *Ratiſbon* did uſually make their Reſidence here. The Stone Bridge over the *Danube* is worth a Traveller's Obſervation: It was built at the equal Charge of *Henry* X. of *Bavaria*, and the City, was begun in 1135, and finiſhed in 1156. It conſiſts of 15 large Arches, ſupported by ſquare Pillars, defended from the Violence of the Water, and the Shoals of Ice in Winter, by ſharp three-corner'd Butreſſes. 'Tis 23 Foot broad, and 1091 long. There are 3 fair Towers built upon it, and they ſhew Travellers the greateſt Stone uſed at the Building of it, with the leaſt of the ſame Figure inclos'd in it; by which they are enigmatically given to underſtand, that all the Stones uſed in this Structure are cut exactly into one and the ſame Figure. The *Germans* will not believe that any Traveller has been here, whatever Account you give him of the Town, except you give them an Account of thoſe Stones, and their Meaning. *La Forreſt* ſays, the Papiſts here have the Cathedral, and 90 other Churches; but the Lutherans are moſt numerous, and have the Government. He alledges, the Burgers have a Privilege to throw their Children into the *Danube* if they be incorrigible, without being call'd to an Account for it.

That which makes this City moſt famous, is the Diet of the Empire held here. For their Manner of Sitting, we refer to the Cut of the Diet, *Page* 509. Dr. *Nicholſon* and the *Atlas Hiſtorique* give us the following Account of the Colleges which compoſe the Diet, and of their Manner of Proceeding.

'Tis a General Aſſembly of all the Eſtates of the Empire, and may properly be called its Parliament. 'Tis ſummoned by the Emperor, with Advice of the Electors, after they have agreed upon the Time, Place, and Occaſion. Upon which the Emperor ſends Letters ſign'd with his own Hand, and counterſign'd by the Vice-Chancellor of the Empire, to each of the Princes and States 6 Months before it be open'd, to come thither in Perſon, or to ſend their Deputies, which they are obliged to obey upon their Allegiance. He does not write to ſuch Abbots and Biſhops as are not Princes, but only to their Directors, who give them Notice of it.

While the Empire was in the Hands of the *French*, the Princes were all obliged to appear in Perſon, except they were excuſed by the Emperor and Electors; but now moſt of 'em ſend their Deputies, to ſave Charges, which makes their Proceedings much ſlower, becauſe their Deputies are fre-

Digitized by Google

frequently obliged to send to them for Instructions in Cases of Importance: And since the Time of *Maximilian*, many of 'em have even forborn to send Deputies; yet they are as much obliged to submit to the Resolves of the Diet as if they did: But sometimes, in Cases of great Importance, the Emperor not only sends Letters, but Ambassadors, to require their Presence; and in such Cases as require Dispatch, those who do not send, make their Ambassadors Plenipotentiaries. The Emperor has Power, with Advice of the Electors, to call the Diet at what Place he pleases, provided it be within the Bounds of the Empire; but 'tis now generally held here, because of the Conveniency of its Situation, and of the easy Passage which many of the Members have by the *Danube*; and all the Princes bear their own Charge, or that of their Deputies. When they arrive, they give Notice to Count *Papenheim*, Hereditary Marshal of the Empire under the Elector of *Saxony*, who assigns each of 'em their Lodgings according to their Quality, and writes down their Names. If the Emperor be present, they beg Audience of him, shew him their Summons, thank him for calling the Diet, and promise Concurrence for the Good of the Empire. If the Emperor be not there, the Princes send Gentlemen to acquaint the Director of *Mentz* with their Arrival; but if they be Deputies, they send their Secretaries with their full Powers; and the Deputies of Towns do the same. When they are all arrived, the Marshal of the Empire acquaints them with the Time and Place, where the Emperor or his Commissary is to tell them what he has to propose. If the Emperor be there, he goes in his Robes to the Place, and sits down on his Throne, to which he ascends by three Steps. The Electors sit on a Bench, to which they ascend by two, and the Princes upon other Benches not raised so high. If the Emperor be absent, his Commissary, or a Prince whom he chuses, acquaints them with the Occasion of their Meeting. If the Emperor be there before they proceed to Business, they attend him to Church, where publick Prayers are made for a Blessing upon their Consultations. Then they return to the Place of Diet, and having heard the Proposals, the Elector of *Treves*, in the Name of the States, thanks the Emperor for calling a Diet; and the Secretary of the Empire receiving the Proposals from the Vice-Chancellor, reads them. After which, each of the Colleges retire to their particular Apartments to deliberate upon them; and after having maturely consider'd them, they agree upon a Day when they are to meet, and to communicate their Thoughts to one another, in order to agree on a Resolve; which being done, they send it to the Emperor; and if it be approved by him, it becomes a Law or Constitution of the Empire. The Princes of the Empire are divided into two Benches, called the Spiritual and Secular. The first Reason of which was, as Dr. *Nicholson* says, because formerly the Secular Princes did not meddle with the Affairs of the Church, nor the Ecclesiasticks with those of the State; but when the Popes brought all Ecclesiastical Affairs to their own Tribunals, such of the Prelates as had no Temporal Jurisdiction were excluded from the Diet. The Arch-Dukes of *Austria* and the Dukes of *Burgundy* sit on the Ecclesiastical Bench, because they are Princes of more than ordinary Eminence; and the Master of the *Teutonick* Order is allow'd the same Privilege. The *Lutheran* Prelates were formerly excluded from the Diet; but could have no Redress, notwithstanding their frequent Protestations, till by the Treaty of *Westphalia* they were allow'd a Place by themselves. All the Ecclesiastical and Secular Members have not equal Votes; for such of both as have Princely Dignities, are allow'd single Votes; but those who have not, give their Votes by Companies, as the Deputies of the Towns of the Bench of the *Rhine*, and of the Bench of *Swabia*. Formerly the Counts and Barons were also divided into two Benches, called those of *Wetteravia* and *Swabia*, when each Bench was allowed but one Vote; but now the Counts of *Francomia* and *Westphalia*, which includes those of *Saxony*, are allow'd two Benches and two Votes; the former since 1641, and the latter since 1654.

The Deputies of the Imperial Towns make up the Third Rank of Members; but when they came to that Privilege, is not certain; tho the Chronicle of *Spires* says, That several of 'em had this Privilege in the

Digitized by Google

the 12th Century, which Dr. *Nicholſon* thinks to have been only the Cities of *Italy*; and that thoſe called Imperial in the Empire, were not allowed a Vote till the 14th Century. The Deputies of the City where the Diet is held ſit at a Table by themſelves, and there take an Account of the Voices of the other Delegates which are brought to them, and regiſter'd by the two Regiſters of *Ulm* and *Spires*; the former repreſenting the Cities in the Circle of the *Rhine*, and the latter thoſe of *Swabia*.

Hiſtorians tell us, That the greateſt Diſputes in the Diet happen about Precedency, in which they ſpend more Time than in debating the Emperor's Propoſals. Another Part of their Time they ſay is too frequently ſpent in Drinking-Matches, for which the Emperor *Ferdinand* did ſharply reprehend them. A third Part of their Time is ſpent about the Power of the Diet, ſhewing in what Caſes they may or may not be controlled or curbed by the Emperor: And the laſt Part of their Time is ſpent on the Emperor's Propoſals about Peace or War, making or annulling of Laws, regulating the Coin, or raiſing Taxes, and ſuch other Affairs of State.

They ſit in a large and ſtately upper Room in the Town-Hall, richly hung with curious Tapeſtry and Needle-work. The Emperor's Throne is cover'd with Cloth of Gold, and the Chairs and Benches of the other Princes and States are cover'd with Cloth of Silver, Velvet, Satin, Silk, &c. according to their ſeveral Qualities.

The Order of their Sitting is thus: The Way how the Electors ſit, may be ſeen in the Cut, *Page* 509. The Eccleſiaſtical Princes ſit on the Right Hand thus:

The Arch-Duke of Auſtria.
The Duke of Burgundy.
The Archbiſhop of Saltzburg. } A.
The Grand Maſter of the Teutonick Order.

The *Atlas Hiſtorique* ſays, That the Princes who have a Right to ſit in the College of Princes, are thoſe who have a deliberative and deciſive Voice, and who contribute to the Support of the Empire, according to the *Matricula*. The Directors of this College are, the Archbiſhop of *Saltzburg*, the Arch-Duke of *Auſtria*, and the Duke of *Burgundy*, who preſide by Turns, as every new Matter comes to be debated; and the Votes are alternatively taken of the Secular and Eccleſiaſtical Bench. They are gather'd

Digitized by Google

ther'd by Count *Papenheim*: After which, the Archbishop of *Saltzburg* and the Arch-Duke draw up the Result, to report it to the Diet. Such Princes as possess several Dominions, which have a Right of Voting, have so many Votes accordingly. Thus the Elector of *Bavaria* has two, as Duke of *Bavaria*, and Prince of *Liebtenberg*: The Elector of *Saxony* has five, and the Elector of *Brandenburg* four. We have mention'd already, That in the College of the Towns, the Magistrates of the City where the Diet is held are the Directors of that College; and in the Electoral College, the Elector of *Mentz* is Director.

The *Atlas* informs us, That there is another Assembly of the States of the Empire, called the *Assembly of Deputations*, where the Deputies chosen for that End determine Things that have been referred to them by a Diet; or when the Elector of *Mentz*, in the Emperor's Name, summons the Deputies, at the Request of the Directors or Captains of one or more Circles, to take Order about their Affairs, or to appease Controversies, which they are not able to do of themselves.

2. *Straubingen*, on the *Danube*, 20 Miles E. from *Ratisbon*, a Town of good Trade, well fortified, and has a Bridge over the *Danube*.

3. *Landshut*, the chief Town in *Lower Bavaria*, and the Seat of the Elector's Lieutenant, who has a Court here, and several Officers for the Government of the Country, which consists of 6 Bailiwicks, 32 Market-Towns, 14 Monasteries, and 74 Noblemen's Seats, with their Dependencies. 'Twas built by *Otho* of *Bavaria*, the first of that Name of the Line of *Wittelspach*, when *Ratisbon* threw off his Yoke, and became an Imperial Town; and being in the middle of his Territories, and a pleasant Country, he built a Palace here, fortified the Town as much as he could, and call'd it by this Name, which signifies the Bulwark of the Country. His Son Duke *Lodowick* enlarged it, and added the Castle about 1204. The Town is generally well built, being formerly much frequented by the Nobility, who attended the Court, and now by the Elector's Officers above-mention'd. St. *Martin*'s Church, the Chief in the Town, has a Tower, which is thought to be the highest in the Empire. The new Buildings in the Duke's Palace are a neat Piece of Architecture, after the *Italian* Manner.

4. *Passaw*, in Latin *Passavia*, or *Patavia*. Some derive the Name from its being a Passage over the River, which the two *German* Monosyllables, *Pass* and *Aw*, seem to import. Others say, That it comes from the Word *Battavi*, because it formerly held out a great Siege against the *Dutch*; but this seems too much strain'd. *Cluverius*, *Bertius*, and other Learned Men, think, that the Part of the Town called *Instadt*, on the S. Side of the *Danube*, and the E. Side of the *Inn*, is the ancientest, and was the *Boiojurum* of the Ancients. That properly called *Passaw*, lies on the S. Side of the *Danube*, and on the W. Side of the *Inn*; and that called *Ilstat*, lies on the N. Side of the *Danube*, and on the E. Side of the *Ilz*. The River *Inn*, which gives Name to that Part of the Town called *Instadt*, empties it self into the *Danube* with such Force, that it keeps its Stream unmix'd for a long way, which is easy to be seen from the different Colours, tho' in the same Channel. The *Ilz* or *Ilitz*, which gives Name to that Part of the Town on the N. Side of the *Danube*, is also discernable for several Furlongs, tho' in the same Channel with the *Danube*. This City is fortified on all Sides by Rocks or Rivers, and therefore is as strong by Nature almost, as any Town in *Bavaria* is by Art. This City is large, is an Imperial Town, but under the Protection of its Bishop, who is a Prince of the Empire, and the Magistrates act by his Commission, tho' the City pays some Acknowledgment to the Elector of *Bavaria*. The Bishop, who is Lord of the City, and of the Country about 20 Miles in Extent on the N. Side of the *Danube*, has a stately Palace here, and is Suffragan of *Saltzburg*. Most of the Houses are of Timber; but the Bishop's Palace, and the Castle on a Mountain near *Ilstadt*, are handsome Stone Buildings. Their Churches are likewise fair and stately, especially the Cathedral dedicated to St. *Stephen*, which is a neat and sumptuous Fabrick, adorn'd with a great many fair Tombs and Monuments. This City is famous for the Treaty of Peace betwixt the Emperor *Charles* V. and *Maurice* Elector of *Saxony* in 1552, by which the

Digitized by Google

Lutherans had the free Exercise of their Religion granted them in the Empire. It was taken by the Elector of *Bavaria* in 1703; but he was soon after obliged to abandon it. It lies 52 Miles E. from *Landshut*, and 60 S. E. from *Ratisbon*. The Bishoprick has *Bohemia* on the N. *Bavaria* on the S. and W. and *Austria* on the E. Several Towns in *Austria*, and Lordships in *Bavaria*, are Parts of the Diocese, which of late has commonly been govern'd by an *Austrian* Prince, and has 80000 Crowns of Annual Revenue. The River *Ilz* produces Pearls, which belong to the Emperor and the Elector of *Bavaria*, each of whom have an Officer here to take Care of their Interests. Dr. *Brown* says, That most of the City was not many Years ago consum'd by Fire; so that 'tis now rebuilt after the *Italian* Manner, and reckon'd one of the 10 considerable Cities on the *Danube*. There is a Bridge over the *Inn* betwixt *Passaw* and the Town called *Instadt*.

In this Diocese there's likewise *Oberneberg*, a small City, with a good Castle, which has a Privilege to exact a Toll of all those that pass by the River *Inn*, and is the usual Residence of the Bishop of *Passaw*. It lies about 15 Miles S. W. from *Passaw*. *Reichersperg*, a small City near *Oberneberg*, is likewise a Place of the Bishop's Residence.

5. *Mospurg*, a Town and County betwixt *Landshut* and *Freysing*, betwixt the Conflux of the *Isar* and *Amber*, and mid-way betwixt *Freysing* and *Landshut*. Some reckon it, next to *Ratisbon*, the oldest Town in *Bavaria*, but without any Reason. 'Tis a fair and pleasant Town, was annexed to *Bavaria* by Duke *Ludowick*, and has 28 Towns of good Rank, besides a great many Villages, which come to a Court held there for Justice. 'Twas formerly govern'd by Counts of its own.

6. The great and famous Monasteries of *Upper* and *Lower Altaich*, about 5 *German* Leagues from one another, on the Banks of the *Danube*. Latin Authors call them *Altahn*, from two great old Oaks under which the Heathen Priests used to sacrifice; but the *Bavarians*, when converted, built Churches here, that were afterwards turn'd into Monasteries. The Counts of *Pegen* were formerly Protectors of those Monasteries; but now they are immediately subject to the Elector of *Bavaria*, who disposes of the Revenues and the Government as he pleases.

7. *Abach*, a fair Market-Town on the *Danube*, about 8 Miles S. W. from *Ratisbon*, noted for the Birth of *Henry* II. and for several Pieces of *Roman* Antiquities which have been dug up in the Neighbourhood. It has likewise a good Bath, which being artificially heated, is a ready Cure for Melancholy, Apoplexies, Dropsies, *&c.*

The Upper Palatinate *of* Bavaria *or* Nortgow.

IT has the latter Name, because 'tis the most Northerly Part of the Dutchy of *Bavaria*. It has *Bohemia* on the E. *Franconia* on the W. *Missnia* on the N. and the *Danube* on the S. which separates it from the rest of *Bavaria*. *Moll* makes it about 77 Miles long from N. to S. and where 'tis broadest, 'tis much of the same Extent. The Country is rocky and rough, but pleasant to the Eye. They have Plenty of a harsh sort of Wine, and in some Parts store of Corn and Grass; but their chief Riches come from Mines of Silver, Copper, and Iron. They export great Quantities of the latter to neighbouring Countries. In 1664, there were found at *Freyung* in this Country two remarkable Sorts of Lead-Ore, which were sent, with some Specimens of other Metals, to our Royal Society. One of 'em is a kind of Chrystalline Stone, almost all good Lead; the other not so rich, but both of singular Use for Essays upon the Coppel. On the S. W. Corner of this Province there are two small Rivers, *Altmuhl* and *Regnitz*; the first falls into the *Danube*, and the latter into the *Main*, and by consequence into the *Rhine*. Betwixt the Heads of those two Rivers, which are at no great distance, *Charles the Great* began a Canal, with a Design to make a Passage betwixt the *Rhine* and the *Danube*. Part of this Canal is still to be seen near *Weissenburg*, towards the Head of the *Regnitz*; but Dr. *Nicholson* informs us, That the Men employ'd in it were obliged to desist by the Fall of excessive Rains, and the Appearance of strange Specters; of which, we leave the Reader to make his own Judgment.

This

This Country was, upon the Partition of the Dutchy by *Lewis* of *Bavaria* the Emperor betwixt him and his eldeſt Brother *Rudolph*, left for ever to the Family of the *Lower Palatinate*; but *Rudolph* having forfeited the ſame, by oppoſing his Brother the Emperor, 'twas confirmed to *Rudolph*'s Sons by the Decree of *Pavia* in 1329, and enjoyed by that Branch afterwards, till *Frederick* V. Elector *Palatine*, was proſcribed in 1623, when 'twas reſtored to the Family of *Bavaria*; but the Count *Palatine* of the *Rhine*, the Landgrave of *Lichtenburg*, and the City of *Nuremberg*, have laid Claim to it ſince.

Cities and Towns of Note here.

1. *Amberg*, the Metropolis of the *Upper Palatinate*, ſubject to the Elector of *Bavaria*. It lies on the Banks of the *Vils*, 30 Miles N. from *Ratiſbon*, and is ſo well fortified, that 'tis reputed one of the ſtrongeſt Towns in *Upper Germany*. Some ſay, 'twas built by the Emperor *Henry* I. but others, by the Biſhop of *Aichſtat* about 1297, and wall'd round in 1326. 'Twas formerly ſubject to the Dukes of *Swabia*; but the laſt Duke gave it to the Houſe of *Bavaria*. Its chief Ornaments are the Caſtle and Armory, which are both curious Structures. The greateſt Trade of the Town is from their Iron Mines, and the Iron-Works made from 'em, which are ſent down the *Nab* to *Ratiſbon* and other Cities. *La Forreſt* ſays, this is the *Cantiebis* of the Ancients, the Metropolis of the *Armalauſii*. The Town has great Privileges, which were granted 'em by the Emperor *Robert*, and lies conveniently for Trade, being almoſt in the Center betwixt *Ratiſbon*, *Ingolſtat*, and *Nuremberg*.

2. *Sulzbach*, on the top of a Hill near the River *Vils*, about 7 Miles N. W. from *Amberg*. It had formerly Counts of its own, who were ſo conſiderable, that *Erneſt*, who liv'd in the Time of the Emperor *Henry* III. had one Daughter married to *Conrad* III. Emperor of *Germany*, and another to *Emanuel* Emperor of *Conſtantinople*. Their laſt Earl *Gebhard* died of the Plague at *Rome*, in the Reign of the Emperor *Frederick* II. and leaving no Iſſue-Male, this City and its Territories came to the Duke of *Bavaria*, and afterwards to the Family of *Neuburg*, a Branch of which does ſtill reſide here, where they have a ſtately Palace, and call'd themſelves Counts *Palatine* of the *Rhine*, Dukes of *Newburg*, *Bavaria*, *Juliers*, *Cleves*, &c. from whom the preſent Elector *Palatine*, of the Family of *Newburg*, is deſcended. The adjacent Country is ſo ſtony, that they have no Water but from one ſmall Rivulet, with which they brew excellent Beer, that ſupplies their Want of Wine. The Duke's Palace and the Church are fair Structures. 'Tis well built, and the Streets uniform; but it ſuffered much by the Civil Wars of *Germany*; the Effects of which are ſtill to be ſeen by ruinous Houſes.

3. *Cham*, on the Rivers *Champ* and *Regen*, 35 Miles S. E. from *Amberg*, formerly rul'd by a Marq. of its own, who govern'd the Borders of *Bavaria* and *Bohemia* for the Emperor. The laſt of their Princes, about 1210, ſold it to the Duke of *Bavaria*. Their chief Traffick is from Travellers, who come this Way out of *Bavaria*, and other Parts of *Germany*, to *Bohemia*.

4. *Waldſaſſen*, a rich *Ciſtertian* Monaſtery, a *German* League from *Eger* or *Egra*, on the Frontiers of *Bohemia*, to which belongs the Market-Town of *Durſenreuth*, with many adjoining Villages. 'Tis noted for the Monuments of ſeveral Landgraves of *Leuchtenberg*, Counts of *Saltzbach*, and other *German* Princes, who lie buried here. The Archbiſhop is a Prince, and pays 144 Florins *per Annum* to the Emperor.

5. *Caſtel*, another famous Monaſtery, on the River *Lauter* or *Lauterbach*, one of the pleaſanteſt Countries of the *Upper Palatinate*, formerly govern'd by Counts of its own, who came from *Zeland* upon an Irruption of the Sea into that Country, and built a Caſtle and three Churches here, at the Mouth of ſo many Springs. His Poſterity turn'd it into a *Benedictine* Monaſtery about 1098, and Count *Otto* endow'd it nobly ſome Time after. The Jeſuits have lately got Poſſeſſion of it, as they have done of many other rich Houſes and Mannors in *Bavaria*. Among other ancient Monuments in their Chapel, the moſt remarkable is the Epitaph of *Sigefrid Schwepperman*, a great Champion in the Days of the Emperor *Lewis* IV. which

ends thus, *Let every Man have his Egg, but stout.* Schwepperman *two*; which was occasion'd thus: The Emperor having obtain'd a great Victory against his Competitor *Frederick* III. chiefly by the Conduct of this General, there being nothing left after the Battle but Eggs, he commanded that every Soldier should have one, and this Champion two, which has since become a Proverb in those Parts.

6. *Newburg*, for Distinction-sake called *Vormwalds*, because situated not far from the *Bohemian* Forrests. 'Tis a small City with a Castle, of no great Strength, and was taken in 1634 at one Assault by the *Swedes*. It lies on the River *Schwartzach*, but is poor, the Country affording no Commodities for Trade.

7. *Luckrenberg*, noted only for giving Title to a Landgrave. 'Twas formerly govern'd by Princes of its own, but now subject to the Elector of *Bavaria*. 'Tis defended by a Castle, and lies about 18 Miles N. E. from *Amberg*.

8. *Averbach*, at the Head of the *Vils*, noted for the fair and strong Monastery of *Michelfeld*, founded by *Otto* Bishop of *Bamberg*, the Great Apostle of *Pomeren*, about 1119.

Cities and noted Towns in this Country subject to the Dukes of Newburg.

1. NEwburg, on the S. of the *Danube*, a neat little City, 12 Miles W. from *Ingolstadt*, and 15 E. from *Donawert*. 'Twas formerly the Seat, and still gives Title of Duke to the Elector *Palatine*; which Dukedom, *Heylin*, by Mistake, ascrib'd to the other *Newburg* last mention'd. It had its Name in Opposition to *Altemberg*, or the Old Town; the Ruins of which are still to be seen near it. *Velserus* says, it was a Bishoprick in *Charlemagne*'s Time, when their Bishop *Manno* took Place of all the rest in a National Council held in 711: But *Brunner*, in his Annals of *Bavaria*, says, he was the first and last Bishop of this Diocese, which was united to that of *Augsburg*; and *Maximilian*, when he finished the *Bavarian* War in 1505, annex'd this City, with many other great Towns of the Circle, to the *Upper Palatinate*. Soon after it was made a separate Dutchy, of which *Newburg* is still the Metropolis. The Dutchy is, according to *Moll*, 50 Miles long on both Sides the *Danube*, and 32 where broadest. This new Principality being erected, *Otto Henry*, Count *Palatine* of the *Rhine*, and Duke of *Newburg*, built out of the Ruins of an old Castle a stately Palace, which was the Residence of his Successors; one of whom fortified this City. The noble Nunnery of *Benedictines*, formerly the chief Ornament of the Town, was founded by the Emperor *Henry* II. and his Empress *Cunigund*, about 1007; or, as some say, they only repair'd it. It was dissolv'd in 1555, when the Duke embrac'd the *Augsburg* Confession. But *Wolfgang William* turning Papist, he built a fair Church and College out of the Ruins of this Nunnery, and gave them to the Jesuits, who still possess them. The great Trade of this Town is in Wine, which is sold Weekly in their publick Markets; and the Duke has a great Revenue from a Toll on the Vessels that pass up and down the *Danube*, over which they have a Bridge. 'Tis noted for an Image of the Virgin, known by the Name of *Our Lady of Newburg*, to which the superstitious People ascribe many Miracles. This City was taken by the Elector of *Bavaria* in 1703. *Philip William*, Duke of *Newburg*, succeeded to the Palatinate of the *Rhine* in 1685, being the nearest Male of Kin to that Illustrious Family. He was the first Popish Prince who succeeded to that Electorate since the Reformation, to the great Disadvantage of the Protestants of that Country, and of all *Germany*. He was very fortunate in his Issue, having 4 Daughters married to great Princes; the first to the late Emperor *Leopold*, the 2d to the late King *Charles* of *Spain*, the 3d to the late King of *Portugal*, and the 4th to Prince *James* of *Poland*. His eldest Son the present Elector, married the late Emperor's Daughter; his 2d Son is Great Master of the *Teutonick* Order; his 3d married the Princess *Radzeville*, Widow to a Marq. of *Brandenburg*; his 4th is Dean of *Augsburg*, and President of the Chapter of *Constance*; and his 5th Bishop of *Breslaw*; so that 'tis now one of the most potent Families of the Empire.

2. *Laugingen*, a strong and well fortified Town on the *Danube*. Some call it *Lauingen*.

Digitized by Google

wingen. It lies 22 Miles W. from *Donawert*, is a neat City, and has a good Trade. By the many *Roman* Antiquities found in the Neighbourhood, there's Ground to ſuppoſe, that it was formerly one of their Colonies. 'Twas anciently ſubject to the Dukes of *Swabia*; but was ſold by *Conradine*, their laſt Duke, to the Houſe of *Bavaria*, who in 1505 annex'd it to the *Palatinate*. The famous *Albertus Magnus* was born here, of a Noble and Ancient Family, and his Memory is much honour'd by the Citizens. In his Time, a ſtout Shoemaker of the Town procur'd them great Reputation, by killing a *Hungarian* Giant in a Duel; for which, the Emperor *Otto* I. among other Favours, gave them for their Arms a Moor's-Head crown'd, with a Gold Chain about his Neck, which they bear ſtill. The chief Ornaments of the Town are, their Bridge over the *Danube*, the Caſtle, and great Church, which is cover'd with Copper, and has a Tower of 301 Foot high. 'Twas formerly the Sepulchre of the Dukes of *Newburg*, and other Princes of the *Palatine* Family; but they are now commonly entomb'd at *Neuburg*.

3. *Hochſtadt*, on the *Danube*, about 8 Miles E. from *Lavingen*. The Biſhop of *Bamberg* lays Claim to this Town; but the Duke of *Newburg* keeps Poſſeſſion by Strength. In 1634, the *Croats*, during the Civil Wars of *Germany*, did barbarouſly cut off many of the Inhabitants, and ruin'd moſt of the Town; but they have ſince rebuilt it pretty well, are defended by a very ſtrong Caſtle on the *Danube*, and well ſupplied with all Neceſſaries, there being rich Corn-Fields and good Paſtures in the Neighbourhood; but that which eternizes its Fame, is the famous Victory obtain'd here in *Auguſt*, 1703, by the Duke of *Marlborough* and Prince *Eugene*, over the *French* and *Bavarians*. In Remembrance of which, there's a noble Pillar, with an Inſcription upon it, erected in the Field of Battle.

4. *Blenheim*, about 8 Miles N. from *Hochſtadt*, famous for the taking of 20 *French* Battalions of Foot, and 12 Squadrons of Dragoons, after a ſtout Reſiſtance, by the Earl of *Orkney*, where the late Lord *Cutts* did alſo gain immortal Honour. The chief Particulars of this great Victory, we gave an Account of, *Page* 494, *&c.*

5. *Dillingen*, on the *Danube*, betwixt *Lavingen* and *Hochſtadt*, is a pretty little City, with a fine College of Jeſuits. It has the Title of a County, and belongs to the Biſhop of *Augsburg*, who has a fine Palace here, in which he uſually reſides.

6. *Naburg*, a pleaſant City on the River *Nab*, from whence it has its Name, about half a *German* League from *Amberg*, ſtands on the top of a Hill, and is a great Road for Travellers betwixt *Bohemia*, &c. and *Ratisbon*.

7. *Aichſtadt*, about 12 Miles N. from *Ingolſtadt*. 'Tis a Biſhop's See, upon the River *Altmuchl*. Their firſt Biſhop is ſaid to have been St. *Willibald*, by ſome thought to be deſcended from an *Engliſh Saxon* King; but others ſay, he was Son to *Richard* Duke of *Swabia*. The Biſhop's Palace, a Mile from the Town, ſtill bears his Name. This City is but ſmall, and noted for ſome Relicks, to which the Prieſts aſcribe Miracles. The *Scheffer* Stones, mentioned in the Deſcription of *Manſfeld*, are found in the neighbouring Fields. *Mol*, *La Forreſt*, and *Sanſon*, reckon this Biſhoprick in *Franconia*, where we have given a further Deſcription of it.

The City and Territories of Newmarckt *in the* Upper Palatinate.

1. *Newmarckt*, a fair City on the Banks of the *Sultz*, about 5 *German* Leagues from *Nuremberg*, and 2 from *Altorf*. 'Twas formerly ſubject to the Marquiſſes of *Vochburg*, afterwards to the Kings of *Bohemia*, the Dukes of *Swabia*, the Dukes of *Bavaria*, and the Electors *Palatine*, from whom it was taken during the late Civil Wars; before which, there was a conſiderable Proteſtant College here, but deſtroy'd by the Duke of *Bavaria*, who reduc'd the Town, that was formerly an Imperial City. It ſtands in a pleaſant and fruitful Country; but the Air is too ſharp for Vines. Their chief Commodity is Iron, and their Rivers are cover'd with Iron Mills.

2. *Gnadenberg*, *i. e.* The Hill of Grace, noted for a Monaſtery of the Order of St. *Salvator*. It lies on the Banks of the *Schwartzach*, half a *German* League from *Altorf*. 'Tis divided into two Parts, one for Monks, and another for Nuns, with one Church betwixt them, which was a magnificent

Digitized by Google

ficent Fabrick, and had 36 Altars. *Catharine* Dutchess of *Pomern*, who had for her Husband *John* Duke of *Bavaria*, founded this Monastery about 1426, and is buried here. It embraced the Reformation in the 16th Century; but since the restoring of Popery, has lost its former Grandeur, and the Revenues are shar'd by two Jesuits, and one of the Elector's Lieutenants.

3. *Allerberg*, on the W. of this District, is a Town of Trade, which, with its Territory, is subject to the Duke of *Newburg*.

Other Places of Note in *Newmarckt* are, 1. *Freyenstattlein*, destroyed by the *Swedes* in 1632, and afterwards came to Count *Tilly*, whose Heirs pretend to it, with a Salvo to the Elector of *Bavaria*'s Right. 2. *Sultzburg*, from whence the adjacent Country is called *Sulzgow*. 3. *Hellenstein*, a Wall'd Town and Castle on the Confines of the Bishoprick of *Aichstat*, famous for the Iron Mines in the Neighbourhood. There are so many Proprietors of this Country, that 'tis hard to distinguish their Bounderies; but the Chief are the Elector of *Bavaria* and the Duke of *Newburg*.

The Circle of SWABIA, *or* SWEVIA.

DR. *Nicholson* observes, That when the *Romans* came first into these Parts, *Swevia* was a large Kingdom, lying as far W. as the *German* Ocean, and as far N. as the utmost Bounds of the *Swedish* Dominions; so that *Tacitus* reckons no less than 54 different Branches of the *Swevian* Nation, of whom we have given a particular Account from *Cluverius* in Ancient *Germany*. The Doctor observes further, That there's Reason to think, that *Swevia* and *Germany* were at first Synonimous Terms with the *Romans*, who afterwards appropriated the Name of *Suevi* to the *Hermunduri*, the most considerable Branch of 'em, who inhabited that now called *Swabia*. *La Forrest* says, That on the Fall of the *Roman* Empire, it contained all the Country betwixt the *Rhine*, the *Alps*, and the *Elb*, and they call'd their Governors, Kings; but *Clovis*, King of *France*, depriv'd them of that Title after the Battle of *Tolbiac*, when he gave it to *Thierry*, his eldest Son, and it continued under the *French* Kings of the first Race. *Charlemagne* made some of his Officers Governors of this Country, with the Title of Dukes, and the Sovereignty was usurp'd by their Successors. This Dutchy fell afterwards to several Families, till about 1078, when the Emperor *Henry* IV. invested his Son-in-Law *Frederick* Count of *Hohenstauffen* with it. His Posterity kept it till 1269, that the Dutchy of *Swabia* was re-united to the Crown, says *La Forrest*, by the Death of *Conradine*, who was beheaded by Order of *Charles* of *France*, King of *Naples*. The Emperor *Rodolph* I. invested *Rodolph* his eldest Son with it about 1288; but *John* Duke of *Swabia* was deprived of it, for having assassinated the Emperor *Albert* his Uncle.

Dr. *Nicholson* says, That no Prince of the Empire does now pretend a Title to the whole Dutchy, which is subject to many Rulers. The Dukes of *Wirtemberg* have the largest Share; the Arch-Dukes of *Austria* and the Elector of *Bavaria* have another great Part of it; and the rest is possessed by the Marquisses of *Baden*, and the Imperial Cities of *Augsburg*, *Ulm*, &c. as may be seen in the *Matricula* of the Empire, *P.* 515. The Boundaries of *Swabia* at present are, on the N. the Palatinate of the *Rhine*, and *Franconia*; on the S. *Switzerland*, and the County of *Tirol*; on the W. *Alsace*, and the Upper Part of the Palatinate of the *Rhine*; and on the E. *Bavaria*, and Part of *Franconia*. 'Tis in Length from E. to W. if we include the Marq. of *Baden*, 140 Miles; and where broadest, from N. to S. 132. 'Tis commonly divided into 4 Parts; the first contains the Dutchy of *Wirtemberg*, and the Cities of *Ulm*, *Reutlingen*, *Eslingen*, *Nordlingen*, *Hailbron*, and *Hall*: The 2d contains the Marq. of *Baden*, the City of *Rotweil*, &c. The 3d has the Bishopricks of *Constance* and *Kempten*, with the Cities of *Bibrach*, *Ifina*, and *Lindaw*: The 4th has the City and Diocese of *Augsburg*, with the Cities of *Kaufbeuren*, *Memmingen*, &c.

La Forrest says, That the House of *Austria* has in this Country the Marq. of *Burgow*, the Bishoprick of *Constance*, the Landgraviate of *Nellemburg*, the County of *Hohenberg*, the *Ortnaw*, the *Brisgaw*, and the Forrest Towns.

Chy-

Cluytzius and *Frecherus* are of Opinion, That *Heidelberg* ſtands in *Swabia*, and that the *Neckar* is the Boundary betwixt *Francon.* and *Swabia*.

This Country was anciently called *Alemannia*, which was afterwards communicated to the whole Empire. *Swabia* in general has Plenty enough of Corn, tho' in many Places 'tis full of large Woods and Forreſts, which abound with Veniſon of all Sorts, good Breeds of Horſes, Kine, and Sheep; and in their Mountains, they have Mines of Silver, Copper, and other Metals. Moſt of their Woods are Pine and Fir. Their Air is healthful; and beſides Corn, the Country produces abundance of Wine and Flax; and of the latter, the Inhabitants make much Linen Cloth, which they ſell in great Quantities, and in this Trade employ moſt of their Poor. *Plutarch* ſays of the ancient Inhabitants, That they were the braveſt, boldeſt, and beſt Warriors, of the *German* Nation. The modern Inhabitants being accuſtomed to ſpare Diet, and mean Lodgings, are fit to endure all the Fatigues of War: Yet not only Strangers, but their own Authors, accuſe both Sexes of being exceſſively inclin'd to Venery.

The Diverſities of Sovereigns occaſion the Diverſities of Religions in this Country, where there are *Papiſts*, *Lutherans*, *Calviniſts*, and *Jews*.

'Tis commonly divided into *Upper* and *Lower Swabia*.

The chief Towns of Upper Swabia.

1. AUgsburg, in Latin *Auguſta Vindelicorum*, and anciently *Licationam Damaſia*, on the Conflux of the *Lech* and the *Wertach*, in Long. 29. 47. Lat. 48. 20. 25 Miles S. from *Donawert*, and 62 S. W. from *Ratiſbon*. It had its Name from *Auguſtus Ceſar*, who about 12 Years before our Saviour ſubdued theſe Parts, and planted a *Roman* Colony here under *Druſus Nero*, Brother of *Tiberius*. The *Vindelici* were a Branch of the *Illyrians*, who inhabited Part of this Country, and gave it the other Part of its Name; and the *Licatii*, who probably derived their Name from the River *Lech*, occaſioned its being called *Licatiorum Damaſia*; and the *Vindelici* are ſuppoſed to have had their Name from the *Vinda*, now the *Wertach*, which falls into the *Lech* near *Augsburg*. This City continued under the *Romans* and *Goths* 550 Years, and was afterwards poſſeſſed by the Kings of *France*, till the Empires of *Germany* and *Rome* were joined to the Crown of *France* by *Charlemagne*. After which it became ſubject to the Dukes of *Swabia*, till *Conradin*, their laſt Duke, ſold them their Freedom, and obtained a Confirmation of their Privileges from the Emperor. Some of the old Chronicles of this City ſay, That Chriſtianity was firſt planted here by *Lucius*, the firſt Chriſtian King of *England*, then called *Britain*, about 190, after he had eſtabliſh'd Chriſtianity at home. But Dr. *Nicholſon* juſtly obſerves, this ſeems to be a Monkiſh Fable, contriv'd for the Honour of the Monaſtick Life, as preferable to that of a King, eſpecially ſince they ſay he travelled alſo to *Coire* in the *Griſons* Country, and was martyr'd there for his Religion; whereas *Matthew* of *Weſtminſter* ſays, he died at *Glocester* in 201. But the whole Story of this King has been ſo much expoſed by the Learned of late Years, that it deſerves no Credit. However this may be, there's good Authority to prove, that Chriſtianity was planted here in *Dioclesian's* Time, for which *Narciſſus Gerundenſis* and others were martyr'd by his Lieutenant *Gaius* about 303: And in 400, we have an Account, That *Theonneſtus* and *Albanus* oppoſed the *Arian* Hereſy in this City. *La Forreſt* ſays, 'twas taken by *Attila* the *Hun* in 452, and by *Clovis* of *France* in 496. It came afterwards to his Son *Thierry* King of *Auſtraſia*, and then to the ancient Dukes of *Bavaria*. *Charlemagne* took it in 787. His Son *Louis* the Emperor annex'd it to the Kingdom of *Bavaria* in 817. But in 912, when the *Carlovingian* Race was extinguiſh'd, it became a Free City, and was endow'd with many Privileges by *Charles* IV. and other Emperors. In 1518, *Luther* gave an Account of his Faith at the Diet here; and in 1530, the Proteſtants alſo preſented their Confeſſion of Faith to the Emperor *Charles* V. in the Diet here, from hence call'd the *Augsburg Confeſſion*, as before-mention'd; but the Proteſtant Princes being perſecuted, levied an Army for Defence of their Liberty and Religion, which obliged the Em-

peror

Peror to call a Council for determining those Differences, where Matters were debated by 7 Deputies on each Side. For the Papists, there were named the Bishop of *Augsburg*, and *Henry* Duke of *Brunswick*, two Lawyers, and three Divines, *viz. Wimpin*, *Eccius*, and *Cochleus*. For the Protestants, *George* Marquis of *Brandenburg*, *John Frederick* Elector of *Saxony*, *Melancton*, *Brentius*, and *Schepfius*. *Luther*, who was one of 'em, durst not appear with them, for fear of the like Treatment which *John Hus* and *Jerome of Prague* met with at *Constance*; but staid at *Coburg*, on the Borders of *Franconia*, from whence he gave them his Advice. The main Things debated were, the Mass, Priests Marriage, Jurisdiction of Bishops, Monastick Vows, and Transubstantiation. The *Saxons*, says Dr. *Nicholson*, inclin'd to give the Bishops more Respect and Authority, than *Luther* would allow them, who published a Book, Entituled, *Contra Statum Ecclesiæ, & falso nominatum ordinem Episcoporum*; *i. e.* Against the State of the Church, and the Order of Bishops, falsly so called. With him agreed the *Hessians*, *Lunenburgers*, and *Nurembergers*; so that Heats arising, the Deputies were contracted on both Sides, and the whole Dispute left to *Melancton* and *Eccius*, assisted by two Lawyers each: But *Charles V.* being displeas'd with the Demands of the Protestants, and hearing that the *Turks* prepared to invade the Empire, he dissolved the Council by an Edict, wherein he order'd, That no other Doctrine should be taught concerning the Lord's Supper, but what had hitherto been received in the Church of *Rome*; That the Cross should be us'd in Baptism; That Statues and Relicks of Saints should be restored and esteemed as formerly; That to deny Free-will, should be an enormous Crime; That the Doctrine of Justification by Faith should be abolish'd, and the Merit of Works maintain'd. In a Word, That the whole Doctrine and Discipline of the Church of *Rome* should be received, and those of the contrary Opinion prosecuted as Hereticks. But the Protestants being too strong to be thus treated, he was obliged to revoke his Decree next Year, and return again to *Augsburg*, where he propos'd that call'd the *Interim*, to accommodate Religious Differences, which contain'd a mix'd Model of Religion and Church Government, permitted a few *Lutheran* Doctrines, and enjoin'd most of the Popish, so that it pleased neither Side: And the Protestants persisting in their Demands, they were allowed the Freedom of their Religion in a Diet held here in 1555.

The Curious may find an Account of this *Interim* in *Sleidan's* Commentaries, *Anno* 1548, and how 'twas opposed by both Sides, for different Reasons. The Court of *Rome* and the bigotted Papists oppos'd it, because it allow'd Communion in both Kinds, and the Marriage of Priests; and the Protestants rejected it, because it enjoin'd most of the Popish Doctrines; so that the Emperor's Edict, commanding it to be observ'd, had no Effect. The Senate of *Augsburg* embrac'd *Luther's* Reformation, as *Sleidan* informs us, in 1535, and sent to him for Ministers. They afterwards, as *La Forrest* says, expelled their Bishop and Clergy; but *Sleidan* says, they deserted the City upon the Change of Religion, and the Senate publish'd a Paper against them, directed to the Emperor, and States of the Empire, with an Account how ill they had behaved themselves, and had attempted to raise Tumults in the Town. But the Emperor, set on by the Popish Clergy, took the Town, and restored Popery in 1551; and next Year 'twas restored to the *Lutherans* by the Treaty of *Passaw*. Since 1555, the Magistracy of the City has been half Papists, and half *Lutherans*, according to *La Forrest*; but Dr. *Nicholson* says, they consist of 23 Papists, and 22 *Lutherans*, and that their Common-Council has 150 of each. In 1634, the Duke of *Bavaria* took it after a long Siege; but they were restored to their Liberty by the Treaty of *Munster*. 'Tis also famous for the League form'd here in 1687, betwixt the Emperor, the King of *Spain*, the Princes of the Empire, the Prince of *Orange*, the *Dutch*, the Duke of *Savoy*, &c. to declare War, says *La Forrest*, against the King of *France*, and to dethrone the late King *James* of *Great Britain*: But perhaps there is more Truth in what he says of the Elector of *Bavaria*, who took it in 1704, after 13 Days Siege, with a Design, by that and his other Conquests, to pave his Way to the Empire, which had been possessed by several of his Ancestors.

Most of the Houses are built of Timber and Clay; but near a 4th Part of the Town is built of Free-stone. The Publick Buildings,

Digitized by Google

ings, as the Cathedral, the Churches, Town-Hall, Conduits, &c. are in general magnificent and ſtately; but the Glory of the Town, ſays Dr. *Nicholſon*, is that called the *Fuggery*, which conſiſts of ſeveral ſtately Streets and fair Palaces, built and poſſeſſed by the Noble Family of the *Fuggers*, who are Lords of a great Part of the adjacent Country. Four of theſe Streets in the *Fuggery* are built croſs-wiſe, make a fair Town of themſelves, and are inhabited by poor People, who have an Annual Penſion. Over the Gate of this Princely Hoſpital, there's an Inſcription in Latin, ſignifying that 3 Brothers of this Noble Family, out of Thankfulneſs to God, had, for the Good of the Commonwealth, out of their large Eſtate, built theſe 106 Houſes, of which the Four Streets conſiſt, for the Uſe of the frugal Poor of the City. They are under the Inſpection of their Chaplain, who has a noble Salary allow'd him. There's a vaſt Number of *Roman* Monuments in and about this City, of which ſeveral Authors have given a large Account. There's a Library in this City, famous for a good Collection of MSS. *Conringius* makes it equal to that of *Vienna*. The Learned *Welſer* left them the greateſt Part of thoſe Rarities; and a great Number of Greek MSS. have been added ſince by ſeveral Citizens. A Catalogue of this Library was publiſhed by *Raiſer*, their Library-Keeper, in 1675.

Monconys commends this City for the Largeneſs of the Streets, and the Beauty of the Houſes, many of which are painted on the Outſide. They have alſo many noble Fountains, with Brazen Statues of different Figures, ſuch as *Mercury*, *Hercules* killing the *Hydra*, and ſome of 'em are adorn'd with the Statues of Emperors. He gives a large Deſcription of the Town-Hall, which is reckon'd ſecond to that of *Amſterdam*: 'Tis very lofty, the Front is 38 Foot broad, and the Length of it 111 Foot. 'Tis divided into 3 Stories: The firſt is enter'd into by a fine Porch, adorn'd with two Columns of Marble, and ſupported by 8 Pillars. The 2d is a Hall of the ſame Size, with a delicate Sieling of Joyners-work, ſupported by 8 Columns of green Marble, whoſe Baſes and Chapiters, of the *Corinthian* Order, are of Braſs. The 3d Story is a large Hall of the ſame Size, 110 Foot long, 38 broad, and 52 high: The Sieling is of Joyners-work, fram'd in Compartiments, painted and gilded. It has two great Gates by which one enters it on each Side of curious Architecture in Joyners-work, painted and gilded; and there are two other on each Side, which enter into as many large Chambers on both Sides the Hall, but not ſo high. The Upper Hall is pav'd with Marble: And *Miſſon* ſays, the Walls are adorn'd with Paintings, intermix'd with Emblems and Devices, relating to the Government; but the Roof, he ſays, exceeds all the reſt for its ſingular Beauty, the Squares and Pannels of the Compartiments being enriched with Sculptures, richly gilt, and beautified with curious Pictures, and other Ornaments. In the upper Chambers, there are very fine Stoves, as there are likewiſe in the lower, where the Magiſtrates uſually meet; but they are ſunk in the Floor, and do not appear but only by a round Copper Grate, which lets the Heat through. There are two Platforms from the Chambers on the Sides, whence one looks down into the great Hall; and the whole Fabrick is of fine hewn Stone.

The next remarkable Structure is their Arſenal, which is very large: The Porch is a fine Piece of Architecture of hewn Stone, with 5 great Figures in Braſs over it, one of 'em being the Genius of Peace, with a Flaming Sword in her Hand, trampling upon the Devil of War, and 3 little Cupids about her. By another Gate, one enters into a great Court, where, on the Right Hand, and at the further End, there are two Structures, one 76, and the other 40 Paces long, and each of 20 broad. The two Halls below are full of Cannon, moſt of 'em Braſs, and among them a Leather Culverine, a Six Pounder 26 Foot long; and on the Side by the Walls, there are Pyramids of Bullets handſomely pil'd up. Over each of thoſe two Magazines there are 5 Stories. In the firſt, are 300 Harquebuſſes. In the 2d, 3000 new Muskets. The 3d has old Muskets and Arms for Horſe: And in the 5th, are Pikes and other Arms for 15000 Men. In a Word, 'tis one of the beſt furniſh'd Magazines in *Germany*. There's a Gate in the Town called the Secret Gate, which was contriv'd to let in People in Time of War without any Dan-

Digitized by Google

ger, and has so many Engines and Divisions with Gates and Keys, and Apartments for Guards at some Distance from one another, where the Passengers are examin'd, that 'tis impossible for the Town to be surpris'd by such as are thus let in. They make use of it in Time of Peace, to let People in and out at all Hours of the Night, paying 6 *d.* for a Horseman, and 2 *d.* for a Footman. *Misson* says, the Fortifications of the City are not very considerable; yet it has bravely held out many great Sieges. The *Lutherans* are much more numerous than the Papists; but they live in a good Understanding. Their Poor are maintain'd in one and the same Hospital.; and to avoid giving Offence, the *Lutherans* pull off their Hats to the Priests and the Company when the Host is carried through the Streets. The *Jews* are confin'd to a separate Place; and for every Hour they stay in the other Parts of the City, are obliged to pay a Florin. They have brought a Branch of the River *Lech* into the City, whose Water is clear and good, and upon this they have several Towers, with great Cisterns on the Top, fill'd by Pumps, which are mov'd by Mills, and convey the Water all over the Town.

'Twas formerly a Place of great Traffick; but is much decayed since Commodities from the *Mediterranean* cease to be brought this Way from *Italy*, and from thence conveyed to other Parts of the Empire. The Cathedral has a Gate of Brass, over which there are represented several Scripture-Histories in *Basso-Relievo*. Their Mechanicks are equal to those of *Nuremberg*, and excel them in Clocks, Goldsmiths-work, and Ivory, in which they are very curious. They make Chains of Steel so very fine, of a Span long, that when they put them about the Neck of a Flea, it will lift it up when it leaps; and these they sell for 10 *d.* a-piece. The Citizens have great Variety of Habits, which are so regulated by the Magistrates, that every one's Quality and Religion may be discern'd by them. The City carries a Pine-Apple for its Arms, which seems to have been a very ancient Bearing in this Place; for a Pillar of 5 or 6 Foot high was lately dug up here, with a Pine-Apple on the Top, and certain Medals of *Augustus*, with such a Pillar on the Reverse; by which 'tis probable, that this City was then the Boundary of the Empire on that Side. Mr. *Ray* says, it is about 8 *English* Miles round.

2. *Ulm*, on the *Danube*, about 37 Miles W. from *Augsburg*, reckon'd the second for Grandeur, thô not for Antiquity, in *Swabia*. Yet *Cluverius* thinks it to be as ancient as any of its Neighbours, and takes it to be the *Alcimannis* of *Ptolomy*; but if so, it must have decreased much afterwards, for 'twas only a Village, till *Charlemagne* added the rich Monastery of *Augaa* to it. After which, it grew by degrees till it came to be an Imperial City. Its Name is derived from the Elm-Trees, of which there are many in the Neighbourhood. Soon after it was made Imperial, they purchased the County of *Helfenstein*, with some other Towns and Castles, from neighbouring Princes; so that their Territory in a little Time came to be 6 *German* Miles long, and 4 broad. The *Danube* begins first to be navigable here by Vessels of any great Burthen, which advances their Trade of Linen and Cottons. Their Government is by 41 Aldermen, most of which are of the Noblity, and the rest Tradesmen: Out of the Nobility, they chuse Annually two Bayliffs, who preside in their Councils. Their chief Ornament is the Cathedral, which is scarcely exceeded by any in the Empire, except by the great Church of *Strasburg*. 'Tis said to have been 111 Years in building; during which Time, they had a great Number of Architects in constant Pay. It has 5 stately Spires, the highest of which is supported by 36 vast Pillars, and is 102 Foot high. Their Organ is very remarkable, and has been described by two Learned Men. 'Twas 23 Years a making, is 93 Foot high, 28 broad, has 16 Pair of Bellows, with 125 Pounds of Lead on each, and has above 3000 Pipes of pure *English* Tin, the largest of which is 40 Inches in Circumference, and above 13 in Diameter: But Dr. *Nicholson* thinks it to be short of the Organ in the Cathedral of *Exeter*. There are many other stately Buildings in this City; among which, the Town-House is most remarkable. *La Forrest* says, the City is large, populous, and has a good Trade. They embrac'd the Reformation in 1529, and most of the Inhabitants, and all the Magistrates, are *Lutherans*. Their Territory

Digitized by Google

tory contains 40 Bailiwicks and Lordships. *Munemys* says, the *Danube* ſerves for a Ditch on one Side, and the reſt is encompaſſed with a good Wall; beyond which, there is a Ditch 25 Paces broad, which is filled by Water from a little River that runs through the Town. It has beſides very fine Ramparts, with 11 Royal Baſtions, with Fauſſebrays, large Ditches, fine Counterſcarps, and Half-Moons, before the Courtains, all fac'd with Brick, with deep Ditches full of Water, and Cavaliers on ſome of the Baſtions all along the Walls; and within the Town, the Soldiers of the Garriſon have very pretty ſmall Houſes aſſign'd 'em. He adds, That they have a Stone Bridge of 4 Arches over the *Danube*, which forms ſeveral Iſlands near it; and that they have abundance of ingenious Mechanicks, eſpecially for Clock-work. The great *Franciſcan* Monaſtery was, upon the Reformation, turn'd into a College, where they have Profeſſors of all Arts and Sciences. This Town was taken by Surprize by the Elector of *Bavaria* in 1702; but retaken after the Battle of *Hochſtat*.

3. *Bibrach*, *i. e.* a River of Otters, ſo call'd from the Multitude of thoſe Creatures near this Place, from whence it had an Otter for its Arms. 'Tis ſaid to have been an Imperial City ſince the Year 800, and was wall'd in the Reign of *Frederick* II. It ſtands in a pleaſant fruitful Valley, encompaſſed with fair Fields, Gardens, and Meadows. The River affords them Plenty of Fiſh, and their Woods Store of Timber. There's a hot Sulphureous Bath in the Town, which draws great Concourſe of People of Quality and others hither in the Spring; and their Number is the greater, becauſe it lies almoſt in the Center of a great Circle of Imperial Cities. It ſtands upon the River *Ruſs*, and the States of the Circle of *Swabia* meet here. The Magiſtrates are half Proteſtants, half Papiſts. The Elector of *Bavaria* took it in 1702. The moſt remarkable Things in the Town are, St. *Martin*'s Church, and the neighbouring Hoſpital, where Proviſion is made for many decay'd Citizens. It lies about 20 Miles S. W. from *Ulm*.

4. *Bucaw*, or *Buchaw*, a ſmall Imperial Town, about 11 Miles S. W. from *Bibrach*. 'Tis remarkable for little but its Nunnery, where all the Nuns are Counteſſes or Baroneſſes, and have Liberty to marry, except the Abbeſs, who is obliged to take the Vow of Chaſtity. She is one of the Fourteen who is a Princeſs of the Empire, and has a Vote in the Diet, according to *La Forreſt*, and the *Matricula* of the Empire; which ſhews the Miſtake of ſome Geographers, who made this an Abbey of Men, and the Abbot a Prince of the Empire.

5. *Memmingen*, on the *Bach*, betwixt the *Danube* and the *Liller*, about 17 Miles S. E. from *Bibrach*. 'Tis thought to be the *Roſtrum Vemania* of *Antonin*. 'Tis well fortified on one Side with a Marſh, and elſewhere with a ſtrong Wall, and deep Trenches. 'Tis almoſt as large as *Ulm*, but much ſhort in Buildings, and Number of Inhabitants. It has 7 Gates, and a ſmall Rivulet that runs through it. The Inhabitants are Lutherans and Papiſts; the former have two Churches and a School, and the latter a Monaſtery of *Auguſtine* Fryars, and a Nunnery. Their chief Trade is in Linen, Cotton, and Paper: The latter is reckon'd as good as any in *Germany*. They have great Privileges, and are exempted from the Imperial Chamber at *Rotweil*.

6. *Leutkirch*, a ſmall Imperial City, but tolerably well built. It ſtands on a ſmall River about 12 Miles S. W. from *Memmingen*. Some derive the Name from the Multitude of People who flock'd to it upon the firſt Preaching of Chriſtianity, and maintain'd abundance of Preachers. St. *Martin*'s Church here is a ſtately Fabrick, poſſeſſed by the Papiſts, who allow only a ſmall Chapel to the Proteſtants. Half the Magiſtrates or more are *Lutherans*. This is a great Thoroughfare for Travellers to and from *Italy* and *Tirol*; and they have a good Trade in Linen-Cloth, Corn, and Flax. The Citizens have a Privilege to dig for Metals in any of the neighbouring Fields.

7. *Kempten*. This is reckon'd as ancient a Town as any in *Germany*. Their Antiquaries ſay, it was the *Cretica* of the Ancients, and inhabited by the *Cretici*; but being ſubdued by one of *Tiberius*'s Generals, he called it *Campodunum*, becauſe of the Hill which commands the whole Plain where it ſtands, and from which he play'd upon it. Hence by Corruption 'twas called *Kempten*. When it came under the

Digitized by Google

French, they call'd it *Vermetica*, from the multitude of Snakes and other venomous Worms about it; but it has since resum'd its old Name. It was made an Imperial Town by *Frederick* IV. who gave them for Arms the Spread-Eagle of the Empire, half *Or*, and half *Sable*, crown'd with the Imperial Crown. 'Twas taken by the Imperialists in 1633, who burnt 140 Houses, with the great Church, and put 450 of the People to the Sword. Their greatest Trade is in making and whiting Linen, and in lodging Travellers betwixt *Italy* and the Empire, and by the *Swissers*, who bring Salt from *Tirol*, which makes it one of the richest Towns in *Swabia*. They embrac'd the Reformation in 1530. 'Twas formerly the Seat of the Dukes of *Swabia*, and is famous for its Monastery, founded by *Hildegard*, Wife to *Charlemagne*. The Abbot is a Prince of the Empire, and Lord of the adjacent Territory, as he was formerly of the City, before it was made Imperial. It lies 15 Miles S. from *Memmingen*.

8. *Isne*, or *Isna*, on a River of the same Name, mid-way between *Kempten* and *Lindaw*, about 13 Miles from each. It appears, by an Inscription on an old Marble Monument, to have formerly been inhabited by a *Roman* Colony; and that the High-ways betwixt this City and *Kempten*, which is the Road betwixt *Italy* and the *Rhine*, was then repaired at the Charge of *Septemius Severus*, and *M. A. Antoninus*. In the neighbouring Fields, they have no Wine nor Wheat; but Oats, Rape-Seed, Beans, and Flax, Cattle and Corn, are brought from the *Alps* and other neighbouring Places to their Market. In 1631, in 12 Hours Time, 380 Houses, with most of their Publick Buildings, were burnt down, and the Brass Guns on their Bulwarks melted; but 'tis since rebuilt, and as flourishing as ever.

9. *Lindaw*, an Imperial City, upon an Island in the Lake of *Constance*; into which there's an Entrance by a Stone-Bridge of 290 Paces long. Part of the City lies upon the Bank of the Lake, on the N. E. Side. The Inhabitants shew the Ruins of an old Tower, which they pretend was built by *Tiberius*, in his Expedition against the *Vindelici*; but this is disputed, for 'tis said to have been first founded by *Adelbert*, one of *Charles the Great's* Courtiers, Lord of this Part of the Country, who being seiz'd by a Tempest on the Lake of *Constance*, and drove ashore on this Island, did, in Remembrance of his Deliverance, build a Nunnery here about 810, and called it *Lindaw*, from his landing in this Place: But *Dresser* denies this Etymology, and says, it had its Name from the Linden Trees planted round the Nunnery; and in Confirmation, alledges the Arms of the City, which are, a Linden-Tree *Vert*, in a *Field Argent*. However this be, the Nunnery gave Occasion to the building of the Town, and is govern'd by an Abbess, who is a Princess of the Empire, and has Sovereign Jurisdiction within the Precinct and Territories of the Nunnery. The Nuns must be all of Noble Families, and Papists, but may marry when they please. The Magistrates, and most of the Citizens, are *Lutherans*. The Situation of the City is pleasant and healthful, and it lies so convenient for Trade, because of the Lake, and the *Rhine* which runs through it, that they call it the *Venice* of *Swabia*. In that Part of the Town on the Bank of the Lake, they have Plenty of Vines, which yield a rough and harsh Wine. The Town on the Island is inhabited mostly by Fishermen, Watermen, and Weavers. They have several Springs of good Water, and on the N. Side of the Town many fair Fields and Meadows. It was made Imperial by *Rodolph* I. and lies about 27 Miles S. W. from *Kempten*. Its Castle and Situation make it very strong, so that the *Swedes* could not take it in 1647.

10. *Bregentz*, or *Bargentz*, on the same Side of the Lake, 5 Miles S. E. from *Lindaw*, from whence the Lake was called *Lacus Brigantinus*, was formerly a famous City, and by *Antonin* I. called *Brigantia*: 'Tis now inconsiderable, but is Capital of a small County of the same Name. It lies at the Mouth of a little River that falls into the Lake, which Dr. *Nicholson* says is the largest in *Germany*, being 7 *German* Miles long, in some Places two, and in others three broad. 'Tis divided into two Parts, the largest of which reaches from *Bergentz* to the old Fort *Podmen*, from whence it first had the Name of *Podmensee*, and by Contraction *Bodensee*: Tho' others say, 'twas so called because of its Depth. The other Branch is that which begins at *Constance*, and is usually called *Zeller-*

Digitized by Google

Ierse, from *Cell*, a conſiderable Village on its Banks.

11. *Buchorn*, on the ſame Side of the Lake, 12 Miles N. W. from *Lindaw*. It derives its Name from the adjoining Woods of Beech. 'Twas formerly govern'd by a Count of its own, deſcended, as they pretend, from *Charlemagne*, and then by the Counts of *Altorf* and *Ravenſpurg*. It belongs now to the Houſe of *Auſtria*, who have made it a Dependance of the City of *Uberlingen*. The Town is not large, but has a good Trade by Ships, which daily paſs from it to *Swiſſerland*, and from thence again into *Swabia*. The Air here is unwholeſome.

12. *Ravenſpurg*, or rather *Gravenſpurg*, 10 Miles N. E. from *Buchorn*, on the ſame River. 'Twas firſt walled in 1100, afterwards made an Imperial City, and endow'd with many Privileges. In the middle of the Town, there's a very high Tower, called *Blaſerthurn*, or the Watch-Tower, which in 1552 was blown down by a Whirlwind, when the Watchman or Trumpeter, who, according to the *German* Cuſtom, ſounds with his Trumpet to give Notice of the Hour of the Night, fell down from the Top of it without receiving any Hurt, tho' his Wife and Son were killed by it, as appears by an Inſcription made upon it when rebuilt. There's little elſe worth Notice here, but the Town-Houſe, and ſome Churches. *La Forreſt* ſays, 'tis well built; and that the Town-Council is compoſed of Lutherans and Papiſts.

13. *Altorf*, lies, according to Dr. *Nicholſon*, within two *Engliſh* Miles of *Ravenſpurg*, is an ancient and famous Town; from the former Earls of which, proceeded a great Branch of the ancient Dukes of *Bavaria*, and the preſent Dukes of *Brunſwick* and *Luneburg*. Here was formerly the ancient Monaſtery of *Wingarten*, where the *Guelphian* Family was uſually buried. It belongs now to the Houſe of *Auſtria*; and is the uſual Reſidence of the Emperor's Lieutenant for *Suevia*, who keeps a Court here, to determine all Cauſes brought before him from any of the Imperial Cities in *Swabia*.

14. *Wangen*, 10 Miles N. E. from *Lindaw*; is a ſmall Imperial City on the River *Arg*, famous for Sickles, whith are made here in great Numbers, and ſent over the Empire. They have alſo a conſiderable Trade in Paper and Flax, but no Wine of their own Growth; tho' ſome Geographers have ſaid the contrary.

15. *Uberlingen*, a fair Imperial City on the Banks of the Lake of *Conſtance*, 27 Miles N. W. from *Lindaw*. 'Tis encompaſſed with fine Orchards and Vineyards, and ſituate upon the top of a Rock; at the bottom of which, they dig Stones for building their Houſes and Fortifications. The Situation is ſo pleaſant and magnificent, that the ancient Dukes of *Swabia* made it their Reſidence. Upon the Failure of that Family in 1267, it came to the Emperor's Hands. They have a very good Harbour, from whence they ſend Veſſels with Wine and Fruit to the neighbouring Countries and Towns, which makes the Place rich. Among other Privileges, they have this, That they are not to appeal from the Sentence of their Common-Council any further than to *Friburg* in *Brifgow*, *Rotkwel*, or *Ravenſpurg*. In the neighbouring Vineyards and Orchards, there are many cool Springs and Mineral Fountains; one of which is particularly famous againſt the Stone in the Bladder or Kidneys, and a decay'd Appetite. It ſprings out of a Rock on the E. Side of the Town, and is conveyed by Pipes into a Bath-Houſe in the City for the Uſe of Patients. The Water has a Tincture of Lead, Copper, and Brimſtone, and its Virtues are treated of at large by *Eſchen Reutter*, a Phyſician and Native of the Place, in a *German* Treatiſe of the wholeſomeſt Baths. He ſpeaks likewiſe of another Mineral Spring in one of the Vineyards called *Am-Stollen*, which taſts ſomething like *Sal Armoniac*, and by once or twice waſhing removes Warts from any Place of the Body. The Grapes of this Vineyard, which is a hot and ſandy Soil, are the beſt in the Country. They have an Hoſpital, accounted the richeſt in *Swabia*, for poor and decrepit People, of which they have as little need as any of their Neighbours, being generally a laborious and frugal People, and have ſo good a Trade, that in Time of War they maintain 6 Horſemen and 60 Foot, ſays Dr. *Nicholſon*, which is as much as many of the Princes are oblig'd to do by the *Matricula*; but their Proportion ſeems to be raiſed ſince

since that was constituted, for then they paid only 20 Foot.

16. *Rattolfzell*, or *Cella Ratolfi*, on that Part of the Lake called the *Cellerſee*, to which it gives Name. *Ratolf*, Biſhop of *Verona*, built a Palace here in 875, and gave Name to the Town, which afterwards fell, with many other Places, into the Hands of the Emperor. The Princes of *Wirtemberg* got Poſſeſſion of it in 1632, but were forc'd to quit it after the Defeat of the Proteſtant Forces at the Battle of *Nordlingen*; ſince which, the Houſe of *Auſtria* have taken Care to ſtrengthen its Fortifications, chiefly on the Account of the impregnable Caſtle of *Hoben-Dwiel*, which lies near it. This Caſtle ſtands on the top of a high and inacceſſible Hill, in the middle of a fine Plain on the Banks of the Lake, according to *Sanſon*: But Dr. *Nicholſon* ſays, near the Banks of the *Rhine*. A few Men may hold it out againſt an Army, the Hill is ſo very high and ſteep. Beſides, the Soil is ſo full of Flints, that there's no ſpringing of Mines to annoy it; nor can they be eaſily ſtarv'd out, becauſe on the top of the Hill they have a good Annual Crop of Corn and Wine. 'Twas formerly one of the Seats of the ancient Dukes of *Swabia*; and when that Family fail'd, it fell to other Maſters, and at laſt, by Marriage in 1520, to the Dukes of *Wirtemberg*.

17. *Conſtance*, by the *Germans* called *Coſtnitz*, or *Coſtantz*, is the Metropolis of this Part of the Country, which *La Forreſt* calls *Auſtrian Swabia*. Dr. *Nicholſon* ſays, That all the Country on both Sides the Lake is called by the Name of *Hegow*, and this Lake is commonly taken for the true Boundary betwixt *Swabia* and *Switzerland*. This City lies on the S. W. Side of the Lake of that Name, in Long. 28. 5. Lat. 47. 8. about 8 Miles E. from *Uberlingen*, 12 W. from *Buchow*, and 27 S. E. from *Schaffhauſen*. Some derive its Name from *Conſtantius*, Father to *Conſtantine the Great*, who is ſaid to have founded it, and made his Head Quarter here during the Winter. Others aſcribe it to *Conſtantine* himſelf, who gave it this Name in Honour of his Father. But from an old Marble Monument, Part of which is ſtill to be ſeen in the Chapel of St. *Blaſius* here, which mentions the Emperors *Diocleſian*, *Maximilian*, and others, ſome think it to be much more ancient; which Dr. *Nicholſon* obviates, by ſuppoſing this Monument to have been brought hither from the Ruins of the old *Vitodurum*, which the Learned *Schedelius* thinks to have ſtood near this Place. However that is, 'tis certainly an ancient City, ſince we find it was taken by *Attila* the *Hun*. It came afterwards into the Hands of the *French* Kings, and in ſome of their ancient Records is called, *Villa Regia Dagoberti Regis*. Upon which Dr. *Nicholſon* obſerves, That the *French* Kings would not ſuffer the great Towns, which they took at any diſtance from their own Seats, to be fortified, leſt they ſhould revolt. *La Forreſt* ſays, That when *Childebert* King of *Auſtraſia* ſack'd the Town of *Windiſh*, which was a Biſhop's See, the Biſhoprick was transferred to this Place in 594. The Biſhop is a Prince of the Empire, and one of the Directors of the Circle of *Swabia*, but Suffragan to the Archbiſhop of *Mentz*, and has his Reſidence at *Merſburg*. After 'twas made a Biſhoprick, it increas'd daily, and was ſo well fortified in 938, that it reſiſted the *Hungarian* Army, which over-ran the neighbouring Country. 'Twas formerly an Imperial Town; but having refus'd the *Interim* in 1534, was proſcribed, and forced to ſubmit to the Houſe of *Auſtria*, who governs 'em by a Deputy, allows 'em moſt of their ancient Privileges, and to retain the Name of an Imperial City. *La Forreſt* ſays, 'tis very populous, well built, has abundance of fair Structures, and is well fortified both by Art and Nature. It has a good Trade by the Neighbourhood of the *Rhine*, which paſſing by this City out of the great Lake into that called the *Cellerſee*, runs through in a fair Stream, without mixing with the Water of the Lake. Their Churches, and particularly the Cathedral of St. *Stephen*, are very magnificent; and their Exchange, Town-Houſe, Market-Places, and Bridges, are very ſtately. The Biſhop has a ſumptuous Palace in the Suburb called *Peterſhauſen*, which was fortified in 1635, when the *Swedes* beſieg'd the City. That which makes it moſt remarkable, is the Council held here in 1414, being called by the Emperor *Sigiſmund*, to remove the Schiſm occaſion'd in the Church by three Popes at a Time; the *Italians* having ſet up one, the *French* another, and the *Spaniards*

a

Digitized by Google

third, to the general Disturbance of the Christian World. The Council began, as usual, with Mass; at which, while they were singing the Hymn, *Veni Sancte Spiritus*; i. e. Come Holy Ghost, some body clap'd a Paper on the Door with these Words, *Aliis Rebus occupati, nunc adesse vobis non possumus*; i. e. We are taken up with other Affairs, and cannot be present with you now. This the Clergy took for an ill Omen. They quickly agreed to depose all the three Popes; and *John*, who was set up by the *Italians*, came hither, according to their Summons, in Expectation, that since he obey'd them, which neither of the other did, they would confirm him in the Chair; but finding it otherwise, he repented of his Forwardness, fled, was pursued, brought back, imprison'd, and depos'd; the other two who were absent had the same Fate; and the Council chose *Martin* V. at which the Emperor was so overjoy'd, that he immediately went to the Conclave, and kissed the new Pope's Foot. In the 8th Session, they condemn'd *Wickliff*'s Doctrine, in which they inserted many false Articles, and order'd his Bones to be dug up and burnt. In the 15th Session, they condemn'd *John Huss*, notwithstanding his Safe-Conduct from the Emperor, who at first oppos'd it; but at last, as *Sleidan* informs us in his Commentaries, being told by the Council, *That Faith was not to be kept to Hereticks*, he comply'd, join'd in the Sentence against him, and order'd him and his Books to be burnt. To justify this, the Council made a Canon, That Faith should not be kept with Hereticks, or those suspected of Heresy, tho' they should come thither with the Emperor's Safe-Conduct, in order to be try'd or examin'd. In the 21st Session, they passed the like Sentence upon *Jerome of Prague*, who was burnt in the same Place with *Huss*, which the Burghers shew to this Day to any stranger who desires it. This Council asserted their own Authority to be above that of the Pope, as is own'd by *Carranzam*, of the Order of the *Predicants*, in his *Summa Conciliorum*, printed at *Lyons* with Allowance in 1683; tho' many of the Papists be loth to own it. This Council lasted 4 Years; during which Time, there are said to have been in this little City 4 Patriarchs, 29 Cardinals, 346 Archbishops and Bishops, 564 Abbots and Doctors, 10000 Secular Princes and Nobles, 450 common Harlots, 1600 Barbers, and 320 Musicians, as Doctor *Nicholson* informs us.

The Bishoprick of *Constance* lies on the Banks of the *Lech*, on the Borders of *Switzerland*, and is commonly reckon'd among the Allies of the Cantons. He is, besides being a Prince, a Count and a Baron of the Empire, was Sovereign of the Town before it was made Imperial, and is said to have 1000 Castles and Villages under his Jurisdiction.

In an Island in this Lake stands the rich Abbey of *Reichenaw*, or *Auge*, founded by a Bishop of *Meaux*, who retir'd hither in the 9th Century. It was united to the Bishoprick of *Constance* in 1540. *La Forrest* says, this Bishoprick is one of the richest and largest in *Germany*; and that *Merspurg* on the same Lake, the Place of his Residence, is a very pretty City. It lies 12 Miles N. W. from *Buchorn*, over against *Constance*. Geographers are not agreed as to the Divisions of *Upper* and *Lower Swabia*, and therefore, without determining in which of the Parts the Towns stand, we shall only take Notice, That *La Forrest* places many of the Towns in *Upper Swabia*, which Dr. *Nicholson* places in the *Lower*; nor do our Maps exactly distinguish their Boundaries.

La Forrest, besides the Bishoprick of *Constance*, reckons in that which he calls *Austrian Swabia*,

I. *The Marq. of* BURGAW,

Which lies on the S. of the *Danube*, and had formerly Princes of its own, till 1282, that their Issue failing, the Emperor *Rodolph* gave it to his own Son *Rodolph* Duke of *Swabia*.

The Places of Note here are, 1. *Burgaw*, on the *Mindel*, the Capital of the Country, about 20 Miles N. W. from *Augsburg*. The Emperor *Lewis* of *Bavaria* besieg'd it in vain in 1321. 2. *Guntzburg*, a small City on the *Danube*, 8 Miles N. W. from *Burgaw*. It has a Castle, where the Lords of the Country formerly resided, and is now the Seat of the Emperor's Governor. The whole Coun-

Digitized by Google

Country of *Burgaw* is about 30 Miles long, and as much in Breadth.

II. *The Landgraviate of* NELLEMBURG.

'Twas Part of the ancient Landgraviate of the *Henow* or *Hegow*, formerly govern'd by Princes of its own; upon the Failure of whom, the Emperor *Rodolph* II. gave it to Arch-Duke *Ferdinand*.

The Places of Note here are, 1. *Nellemburg*, about 4 Miles S. from the *Danube*, and 12 N.W. from *Uberlingen*. 2. *Stokeim*, a small City about 7 Miles E. from *Nellemburg*. The Country is about 27 Miles long, and 12 broad.

III. *The County of* HOHENBERG,

Formerly govern'd by Princes of its own; but came to the Emperor *Rodolph* I. in the 13th Century, on his marrying the Heiress. It lies betwixt the Dutchy of *Wirtemberg* and the Principality of *Furstemberg*.

The chief Places are, 1. *Hohenberg*, a strong Castle near the Head of the *Neckar*, about 13 Miles N. W. from *Nellemburg*. 2. *Rotemburg* on the *Neckar*, 27 Miles N. E. from *Hohenberg*, which some make the Capital of the Country. 'Twas built by *Albert*, their last Count, in 1271. 3. *Willingen*, on the *Birg*, a large Village, noted for its wholesome Baths. 4. The *Ortnaw*, by some called *Mornaw*. It lies on the *Rhine*, contains no remarkable Cities, belonging properly to the House of *Austria*; but there are 3 Imperial Towns here which are under the Emperor's Protection, *viz.* 1. *Offemburg*, on the *Kintch*, or, as some call it, *Offingen*, within a League of the *Rhine*, and 10 Miles S. E. from *Strasburg*, where M. *de Villars* took a great Train of Artillery, that the Imperialists design'd to have put into Fort *Kheil*. 2. *Zell*, on the *Nagole*, near the *Rhine*, 8 Miles S. E. from *Offinburg*. 'Twas taken by M. *de Villars* in 1703. 3. *Gengenbach*, mid-way betwixt *Offenburg* and *Zell*, which was taken by M. *de Villars* at the same Time. *Sanson* makes this Country about 24 Miles long, and 18 broad. The two Bailiwicks of *Oberkirk* and *Oppinaw* in this Country belong to the Bishoprick of *Strasburg*.

IV. *The* BRISGOW,

Which lies in the Neighbourhood of the *Rhine*, betwixt the *Ortnaw* and the Principality of *Furstemberg*.

The Places of Note here are, 1. *Friburg*, on the River *Treisem*, upon a Hill, where the *Black Forrest* begins. 'Tis now the Capital of *Brisgow*; but was first only a Village, built by Miners, who wrought in the Silver and Gold Mines betwixt it and *Brisac*. In a little Time they grew so rich, as to purchase the Estates and Titles of Noblemen; and the City grew so large, that, on a short Warning, they were able to send 3000 Men to the Field. It belong'd formerly to the Dukes of *Zeringen*, and afterwards by Marriage to the House of *Furstemberg*, from whom they revolted, and submitted to the House of *Austria* in 1386. 'Tis very populous and strong. 'Twas several times taken and retaken during the Civil Wars of *Germany*, particularly three times by the *Swedes*, in 1632, 1634, and 1638; and twice since by the *French*, in 1671, and 1677. 'Twas confirmed to them by the Treaty of *Nimeguen*. After which, they made the Fortifications very strong; but 'twas reftored to the Emperor by way of Exchange at the Treaty of *Ryswick* in 1697. 'Tis also noted for a great Victory obtain'd near it by the Prince of *Conde*, then Duke of *Enguien*, over the *Bavarians* in 1644. 'Tis the Seat of a Sovereign Court, and of an University, founded by Arch-Duke *Albert* in 1450. There are 14 Religious Houses in the Town, and the Citizens are famous for polishing Precious Stones found in *Lorrain*, and the neighbouring Countries. *Baudrand* says, 'twas built in 1120 by the Duke of *Zeringen*, and that it was formerly an Imperial Town. He adds, that the Chapter of *Basle* resides here, tho' the Town be in the Diocese of *Constance*. It lies 30 Miles S. from *Strasburg*, and 10 Miles E. from *Brisac*.

2. *Brisac*, called by *Antonin*, *Mons Brisiacus*; and the ancient Inhabitants are by the Latins called *Brisigavi*. 'Twas formerly the Metropolis of *Brisgow*. Historians say, it was built by the Emperor *Valentinian*. It stands on the top of a round Hill, and is so well

Digitized by Google

well fortified by Nature and Art, that 'tis reckon'd one of the ſtrongeſt Places in *Europe*. But they have only one deep Well, which furniſhes Water to the whole City. In 1638, during the Civil Wars of *Germany*, it held out a great Siege againſt the *Swedes* and *French*, commanded bythe D. of *Sax-Weimar*, for 4 Months: During which, Dr. *Nicholſon* ſays, they were reduc'd to ſuch Straits, as to dig up the dead Bodies of their Soldiers, and eat them, after they had been buried ſome Days; and on both Sides there were 80000 Men ſlain, and 1100000 Crowns ſpent in Ammunition; but being taken, it was given to the *French* by the Treaty of *Munſter*. After which, the *French* King repair'd its Fortifications, and ſet up a Court of Judicature there, like the Chamber of *Spires*, to determine all Controverſies. It was confirmed to him by the Treaty of *Nimeguen*: After which, he laid Claim to ſeveral other Towns and Villages, as its Dependencies. 'Twas reſtored to the Empire by the Treaty of *Ryſwick*; but retaken by the Duke of *Burgundy* in 1703, after 13 Days open Trenches. It is joined to ſome Iſlands in the *Rhine* by Bridges, which are fortified. On the W. Side, it has 8 Baſtions fill'd with Earth, and fac'd with Brick; and before every Curtain, there's a Half-Moon. The Ditch is broad, and the Counterſcarp, Cover'd-way, and Paliſadoes, in very good Order. It has alſo a ſtrong Citadel. On the W. of the Town, the Fortifications are a League in Circumference, and the Town is capable of 10000 in Gariſon. It lies 32 Miles S. from *Strasburg*, and 10 W. from *Friburg*. It had a fair ſtrong Bridge over the *Rhine*, which was deſtroyed by the *French* after the Treaty of *Ryſwick*.

To *Auſtrian Swabia*, belong alſo thoſe called the Four Forreſt Towns, becauſe they lie at the Entrance of the *Black Forreſt*.

Theſe TOWNS *are*,

1. *Rheinfeld*, a ſmall City, with a Bridge over the *Rhine* above *Baſle* in *Switzerland*. It was the Capital of a County, which came to the Emperor *Rodolph* I by his Marriage with *Anne* Counteſs of *Hohenberg*. The Duke of *Sax-Weimar*, General of the *Swedes*, took it in 1638; but 'twas reſtor'd to the Empire by the Treaty of *Weſtphalia*. It lies on the S. Side of the *Rhine*, 28 Miles S. from *Briſac*, and 8 E. from *Baſle*.

2. *Seckingben*, in an Iſland of the *Rhine*, 8 Miles E. from *Rheinfeld*. 'Twas taken by the Duke of *Sax-Weimar* in 1638, and reſtored to the Emperor in 1648.

3. *Laufenburg*, about 7 Miles E. from *Seckingben*. The *Rhine* divides it into two Parts. 'Twas taken and reſtored by the *Swedes* at the ſame Time with *Rheinfeld*.

4. *Waldhuſt*, or *Waldſhut*, on the Conflux of the *Schult* and *Rhine*. It has its Name from being a Key into the *Black Forreſt*, part of which it covers.

La Forreſt, beſides the Places already mention'd in *Upper Swabia*, takes Notice of thoſe that follow.

1. *Arbon*, or *Arbonne*, a City near the Lake of *Conſtance*, which is inclos'd by the Dominions of the *Swiſſers*, and was formerly called *Arbor Felix*. *Sanſon* places it 8 Miles N. E. from *St. Gall* in *Swiſſerland*, and 15 S. E. from *Conſtance*. 2. *Birchoffzell*, a ſmall Town on the *Sitter*, about 8 Miles W. from *St. Gall*. 3. *Kiburg*, on the *Danube*, a City which gave Title to the ancient Counts of that Name, who poſſeſſed ſeveral Lordſhips in *Swiſſerland*. *Guſtavus Adolphus* paſſed the *Danube* near this Place in 1632. 4. *Lechpruck*, on the River *Lech*, a ſmall City, which was ruin'd during the Civil Wars of *Germany*. He mentions alſo 14 Abbies in this Country, beſides thoſe we have already deſcribed; ſeveral of whoſe Abbots are Princes of the Empire; but we ſhall not inſiſt upon them, becauſe he ſays nothing remarkable of them.

Beſides the Secular States already mention'd in *Upper Swabia*, he takes Notice of thoſe that follow.

The Principality of FURSTEMBERG,

A ſmall Country on both Sides the *Danube*, extended about 70 Miles in Length. It has the Fountains of that famous River within its Boundaries, and comprehends Part of the Landgraviate of *Bar*, of the County of *Heyligenberg*, and other Lordſhips, and was erected into a Principality in 1677.

Digitized by Google

The chief Town is *Furſtemberg*, on the *Danube*, about 12 Miles N. from *Schaffhauſen* in *Switſerland*, and 22 N. E. from *Waldſhut*. It gives a Title to the ancient Family of *Furſtemberg*, which is deſcended from the Counts of *Friburg*, and divided into two Branches; that of *Heyligenberg*, call'd Princes; and that of *Blamberg*, call'd Counts. The Principality is ſubject to its own Prince, who is a Count of the Empire. His Family has produced ſeveral great Perſons; among others, the Cardinal of *Furſtemberg* Biſhop of *Straſburg*, who being in the *French* Intereſt, helped to bring that City under the Subjection of *France*, and procur'd himſelf to be choſen Archbiſhop of *Cologne*, which was one of the Cauſes of the late War betwixt the Empire and *France*.

In this Country lie alſo, 1. *Huffingen*, a large open Town near the Fountains of the *Danube*. 2. *Doneſchingen*, another large Town, within a League of the former, upon the Confines of the old *Hercinian* Forreſt. 3. *Heyligenberg*, a Caſtle on a Mountain, with the Title of a County, belonging to the eldeſt Branch of the Family. It lies 9 Miles N. E. of *Uberlingen*, and came to this Family by marrying the Heireſs in 1534.

The County of FURSTEMBERG,

Adjoining to the Principality, contains the Bailiwick of *Blamberg*, the Barony of *Moeskirk*, the Landgraviate of *Hulingen*, and two Lordſhips. Its Counts poſſeſs likewiſe *Gundelfingen* in *North Swabia*. The Family of *Blamberg* is divided into the Branches of *Moeskirk* and *Hulingen*. *Moeskirk*, the Title of the eldeſt Branch, is a pretty ſmall Town, on a little River that falls into the *Danube*. *Hulingen*, the Title of a Landgraviate, belonging to the younger Branch, lies on the Frontiers of *Schaffhauſen*. In this Country lies *Engen*, near the Lake of *Conſtance*; and *Wildenſtein*, a large open Town with a Caſtle, near *Walburg*.

The County of SULTZ,

Lies near the Frontiers of *Zwrich* and *Schaffhauſen*, and takes its Name from a large open Town called *Sultz*, which gives Title of Counts to one of the oldeſt Families in *Germany*.

The County of EMS,

Derives its Name from a Caſtle near the *Rhine*, towards the Frontiers of the Canton of *Appenzel*, and gives Title to the Counts of *Ems*. It lies about 10 Miles S. from *Brigentz*, is about 10 Miles long, and 5 broad. This Family is divided into two principal Branches, called the *Roman* and *German*; and the latter is divided into the Branches of *Hohenelms* and *Wadutz*.

The County of MONTFORT,

Lies S. of *Ems*, about 12 Miles long, and 6 broad, derives its Name from a fine Caſtle towards the Frontiers of *St. Gall* and *Appenzel*, within two Leagues of the *Rhine*. It gives Title of Count to the Family of *Montfort*, one of the oldeſt in *Swabia*.

The County of WALDBURG,

Which lies S. from *Ravenſpurg*, derives its Name from a fine Caſtle belonging to the Family of this Name, which is divided into the 4 Branches of *Wolfeck*, *Zeil*, *Scheer*, and *Trauchburg*. This County is 20 Miles long, and 18 broad; comprehends the Lordſhips, 1. Of *Walſee* near *Waldburg*, a large open Town, fortified with a Caſtle. Here are the Tombs of the Counts of *Waldburg*. 2. Of *Wurtzach*, another large open Town, half a League from *Walſee*. 3. *Friedberg*, which has a fortified Caſtle, betwixt *Memgen* and *Saulgen*. 4. *Sheer*, an open Town, with a ſtrong Caſtle, on the *Danube*.

The County of KOENIGSECK,

A pretty open Town, near the River *Schuſs*, which gives Title of Count to the Family of this Name, deſcended from the ancient Family of the *Guelphs*, ſo well known in Hiſtory. 'Tis divided into the Branches of *Rottenfels* and *Aulendorf*. *Rottenfels* is the principal Town of a Bailiwick of that Name in the *Algow*, and lies 23 Miles E. from *Bregentz*. *Aulendorf* is the chief Town

Town of a Lordſhip of that Name, and lies 8 Miles N. W. from *Waldſee*.

The County of KIRKBERG,

On the *Lifter*, otherwiſe call'd the County of *Sugar*, gives Title to Counts of that Name. The County is 18 Miles long, and 8 broad. This Family is divided into ſeveral Branches, who are very rich. The Town of *Kirkberg* lies about 7 Miles S. from *Ulm*. Theſe Counts poſſeſs likewiſe the Lordſhip of *Kircheim*, a large open Town, within two Leagues of *Urſperg*; and the Lordſhip of *Oberndorf*, a conſiderable open Town on the River *Lech*, 7 Miles S. from *Donawert*.

The Barony of MINDELHEIM,

In the *Algow*, lies betwixt the Biſhoprick of *Augsburg* and the Abbacy of *Kempten*. *Mindelheim*, the chief Town, lies on the River *Mindel*, is a large open Place, 18 Miles N. from *Memmingen*, and 25 S. from *Augsburg*. It was formerly ſubject to Princes of its own, of ſeveral Families, and particularly to the Dukes of *Teck*, and afterwards to the Lords of *Rechberg* and *Fronsberg*, whoſe Iſſue failing, the Emperor *Rodolph* II. inveſted *William* V. of *Bavaria* with it. It continued in that Family till the Proſcription of the late Elector; and after the Battle of *Hochſtat*, was erected into a Principality for the Duke of *Marlborough* and his Poſterity, as a Reward for his Grace's Share in that great Victory. He has a Vote in the Diet, and the Principality is always to be in the Hands of a Proteſtant. *Sanſon* makes it, where longeſt, about 18 Miles, and the greateſt Breadth about 16. It contains, beſides *Mindelheim*, the Towns of *Ingenried*, and *Schwabik*.

La Forreſt mentions alſo in *Upper Swabia* the City of *Kaufbeuren* on the *Wertach*, formerly govern'd by Counts of its own, who ſold 'em their Freedom in 1024; and next Year it was made an Imperial Town by the Emperor *Conrad* II. It lies 18 Miles N. E. from the Abbey of *Kempten*, and 33 S. from *Augsburg*. *Pfullendorf*, on the River *Sel*, a ſmall and neat City, which was made Imperial by the Emperor *Frederick* I. It lies 10 Miles S. of the *Danube*, and 14 N. from *Uberlingen*, on the Lake of *Conſtance*.

La Forreſt mentions the following Places in *Lower Swabia*.

The Principality of HOHENZOLLERN,

Which lies betwixt the Principality of *Furſtemberg* and the Dutchy of *Wirtemberg*. It took its Name from the Caſtle of *Zollern*, built by the Emperor *Henry* V. in 1122. 'Tis, according to *Moll*, 34 Miles in Length, and about 10 where broadeſt; but in other Places ſcarce 5. 'Tis govern'd by its own Princes, deſcended from the ancient Counts of *Zollern*, whoſe Pedigree is derived from *Taſſilo* Count of *Hechingen*. This Family is divided into the two Branches of *Hechingen* and *Sigmaringen*, who were made Princes of the Empire by *Ferdinand* II. They are Chamberlains of the Empire, and Vicars to the Elector of *Brandeburg* in that Office. They and their Subjects are Papiſts.

The Places of Note here are, 1. *Hechingen*, a ſmall City, with the Title of a County, betwixt the *Danube* and the *Neckar*, 8 Miles S. from *Tubingen*. It gives Title to the eldeſt Branch of the Family. 2. *Zollern*, an ancient Caſtle on the River *Zollern*, which gives Title to the Lords who reſide there. 3. *Heicherlock*, or *Hagerlach*, upon the ſame River, a ſmall City, with the Title of a County. 4. *Sigmaringen*, a great open Town on the *Danube*, which gives Title to the younger Branch of this Family.

The Principality of OETINGEN,

A ſmall Country betwixt the Marq. of *Anſpach* and the Dutchy of *Newburg*. *Sanſon* makes it 28 Miles long, and 18 broad, including *Nordlingen* and its Territory. The Lords of this Country are Proteſtants, and were made Princes of the Empire in 1674.

The chief Places are, 1. *Oetingen*, or *Oettingen*, on the *Wernitz*, 15 Miles N. W. from *Donawert*, and 10 N. E. from *Nordlingen*. One half of the Town belongs to the Princes of this Name, and the other to the Counts of *Oetingen*. 2. *Allerheimb*, on the ſame River, the Capital of a Bailiwick.

Digitized by Google

The County of *Oettingen* comprehends 3 Bailiwicks, belonging to the younger Branch of the Family, ſub divided into 4 other Branches, all Papiſts, who obſerve Seniority in Point of Succeſſion among one another.

3. *Wallerſtein*, on the *Eyer*, a great open Town, which gives Title to a Branch of the Family, and is Capital of a Bailiwick.

4. *Nordlingen*, called by the Latins, *Alæ*, *Alie Flaviæ*, and *Nerolingæ*. It lies on the River *Eyer*, in the Confines of the *Norgaw*. 'Tis a ſmall Imperial City, 10 Miles S. W. from *Oettingen*, 8 N. from *Blenheim*, and 15 N. W. from *Donawert*. 'Twas made an Imperial Town in 1251; and for their Security, is in League with the *Swiſſers*. 'Tis remarkable for two great Battles; the firſt in 1634, betwixt the *Germans* and the *Swedes*, when the latter were defeated; and the 2d in 1646, when the *Swedes* and the *French*, who came to the Aſſiſtance of the Proteſtants of the Empire, under the Prince of *Conde*, defeated the *Bavarians*.

5. *Dunkelſpihel*, on the *Wernitz*, a ſmall Imperial City in the County of *Oettingen*, taken by the *French* after the Battle of *Nordlingen* in 1646. One half of the Magiſtrates are Papiſts, and the other *Lutherans*.

6. *Gingen*, on the *Prentz*, half-way betwixt *Ulm* and *Nordlingen*, a ſmall Imperial City, whoſe Magiſtrates are Proteſtants.

The County of WASSENSTAING,

Enclos'd by the Dutchy of *Wirtemberg*, was acquir'd by the Duke of *Bavaria* in 1627. The chief Place is *Weiſſenſtain*, an open Town in a very fruitful Valley, defended by a ſtrong Caſtle.

The County of LOEWENSTEIN,

Within two Leagues of the *Neckar*. It takes its Name from a Caſtle, and is partly included in the Dutchy of *Wirtemberg*. The Elector *Palatine* bought it in 1441, from the laſt of its ancient Counts; ſo that the preſent Count is a Branch of the *Palatine* Family, and has ſeveral other Lands, particularly the County of *Wertheim* in *Franconia*.

The County of HOHENRECHBERG,

Betwixt the Dutchy of *Wirtemberg* and the Territory of *Ulm*. 'Tis poſſeſs'd by a Family deſcended from *Hildebrand*, ſirnam'd the *Sale*, or *Ugly*, which is divided into ſeveral Branches. The only Place of Note here is the Caſtle of the ſame Name, which gives Denomination to the County.

The County of GRAVENECK,

Betwixt the Dutchy of *Wirtemberg* and the Principality of *Hohenzollern*, belongs to Lords of the ſame Name, one of the oldeſt Families in *Swabia*. The Places of Note are, 1. *Graveneck*, a large open Town, with a fine Caſtle, well fortified, the uſual Reſidence of the Counts. 2. *Eglingen*, a ſmall City near *Nordlingen*, which belongs to this Family.

The Dutchy of Wirtemberg.

'TIS a Province of the Circle of *Swabia*, and abounds with every Thing that can bring Profit or Pleaſure to the Inhabitants. Their Mountains are full of Mines and Vineyards, and the Vallies ſtock'd with large Herds of Cattle. They have abundance of pleaſant Meadows and Foreſts, with Variety of Game. 'Tis water'd with many ſmall Rivers, and has ſeveral Lakes full of Fiſh. It has the Palatinate of the *Rhine* and *Francenia* on the N. the *Danube* on the S. the Principality of *Baden* on the W. and the Biſhoprick of *Augsburg* on the E. *Mull* makes it about 70 Miles from N. to S. and including the *Black Breſt*, 90 from E. to W. 'Tis ſo populous, that 'tis ſaid to contain 63 Cities, 158 great Towns, 645 Villages, and 14 Abbies. Before the Civil Wars of *Germany*, the Duke was able to raiſe 24000 Men in 24 Hours; but that calamitous War leſſen'd the Number of People here, as in other Places of the Empire. It was made a County in 1078, and a Dutchy in 1495, by the Conſent of the Diet, becauſe their Princes had much improv'd their Eſtates, which at firſt conſiſted only of the Caſtle of *Wirtemberg*.

Digitized by Google

berg, that gives Name to the County, with the Villages that depended upon it.

The *Atlas Hiſtorique* gives the following Account of their Origine and Genealogy: Authors differ as to their Origine: Some derive them from *Everard*, Great Maſter of *Charlemagne*'s Houſhold, who was Son to *Henry* Lord of *Butelsbach*: Others derive them from *Conrad* of *Wirtemberg*, who was made a Count of the Empire by *Henry* IV. for his good Services. His Son *Everard the Debonaire*, or the Good, enlarged his Dominions, by marrying the Heireſs of the Duke of *Teck*, and was ſo potent, that he had always 6 Princes, 8 Counts, 5 Barons, and 70 Gentlemen, in his Retinue. His Son *Everard* acquir'd the County of *Montbelliard*, by marrying the Heireſs. His Son *Louis* purchas'd 3 Lordſhips from the Count of *Helfenſtein*. His Succeſſor *Everard*, ſirnam'd the *Bearded*, was made Duke and Knight of the *Golden Fleece* by the Emperor *Maximilian* I. and dying without Iſſue, was ſucceeded by *Everard* VII. a Prince of the ſame Family. *Ulrick* VI. who was born in 1487, embrac'd *Lutheraniſm*, and enter'd into the League of *Smalkald*. He died in 1550, and was ſucceeded by his Son *Chriſtopher*, who deliver'd his Country from the *Spaniſh* Yoke, and died in 1568. His Son *Louis* II. ſucceeded, founded the Univerſity of *Tubingen*, and having no Iſſue, appointed his Couſin *Frederick* to ſucceed. His Country ſuffer'd much by the Duke of *Guſe*, who ravag'd it in 1608. He was ſucceeded by his Son *John Frederick*, who in his Youth travelled over the World, and died in 1628. The preſent Duke *Everard Louis*, his Great Grandſon, was born in 1676. He is Knight of the *Golden Fleece*, and General of the Emperor's Horſe. His eldeſt Son, *Frederick Louis*, was born in 1698. This Prince and his Subjects are Proteſtants, and are call'd the Branch of *Stutgard*, which is the eldeſt of the Family. The other Branches of this Family are that called the *Julian* and *Sileſian* Branch, and that of *Bernſtad*. They deſcended from *Frederick* above mention'd. The preſent Prince is *Charles Frederick*, who was born in 1690. From *Julius Frederick* H. of this Branch, came that of *Weillingen*, whoſe Prince is *Frederick Ferdinand*. From *Sylvius Nimrod*, the 2d of the *Julian* Branch, came that of *Juliuſburg*, whoſe Prince is *Charles*, born in 1682. From the abovemention'd *Frederick* did alſo proceed the Branch of *Montbelliard*, whoſe Prince *George* was deſpoil'd of his Dominions by the *French*, but reſtor'd by the Treaty of *Ryſwick*, and died in 1699. His Son *Leopold Everard*, the preſent Prince, was born in 1670, and is Knight of the Order of the *Elephant*. From *John Frederick*, the great Traveller, came the Branch of *Newſtat*, by a 2d Son. The preſent Prince is *Frederick Auguſtus*. From *Everard* VIII. who was born in 1614, proceeded the Branch of *Wirtemberg*, whoſe preſent Prince, *Frederick Charles*, was born in 1652. He was General of the Emperor's Horſe in the laſt War. His Son *Charles Alexander* is General Major of the Empire.

The Titles of the Princes of *Wirtemberg* are, Dukes of *Wirtemberg* and *Teck*, Counts of *Montbelliard*, Lords of *Heidenheim*, &c.

Their Dominions are, 1. The Dutchy of *Wirtemberg*. 2. The County of *Aurach*. 3. The County of *Groningen*. 4. The Caſtle and Bailiwick of *Teck*. 5. Of *Kirkheim*. 6. Of *Owen*. 7. Of *Guttemberg*. 8. Of *Achalmen*. 9. Of the Fort of *Hohenſtauffen*. 10. The Bailiwicks of *Balingen*. 11. Of *Dutlingen*. 12. Of *Blaubeuren*. 13. The Lordſhip of *Heidenheim*. 14. The County of *Kalbe*. 15. Part of the County of *Eberſtein*. 16. The Lordſhip of *Tubingen*.

The Titles of the Princes of *Oels*, another Branch of this Family, are, Dukes of *Wirtemberg*, *Teck*, and *Oels*, Count of *Montbelliard*, Lord of *Heidenheim*, &c. Their Dominion is, the Principality of *Oels*.

The Dominions of the Branch of *Newſtat* are, 1. *Newſtat* and its Diſtrict. 2. *Weiſsberg*. 3. *Mockmuehle*. The Dominions of the Branch of *Montbelliard* are, 1. The County of *Montbelliard*. 2. The Lordſhip of *Blamont*. 3. Of *Herricourt*. 4. Of *Chaſtelet*. 5. Of *Clemont*. 6. Of *Clereval*. 7. Of *Paſſavaut*. The 6 laſt are Fiefs of the County of *Burgundy*. The Branch of *Weiltingen* has *Weiltingen* and its Diſtrict.

The *Atlas* ſays, the Dutchy of *Wirtemberg* is one of the fineſt and moſt fruitful Countries in *Germany*. The *Danube*, which runs by its Neighbourhood, and the River *Neckar*, which runs through the Country, enrich the Inhabitants, by the Conveniency of tranſporting their Commodities: And the

Digitized by Google

the Duke of *Wirtemberg* is ſtill able to raiſe 20000 Men in a little Time. When the Emperor commands his Armies, the Duke carries the Imperial Cornet or Standard, which is *Or*, a *Baton Sable*, pointed *Argent*, with a *Spread Eagle Sable*. He is alſo Great Huntſman of the Empire, and Joint Director of the Circle of *Swabia* with the Biſhop of *Conſtance*.

The Arms of *Wirtemberg* are, *Or*, 3 *Demi-Perches* or Branches of *Stags-Horns Sable*, laid Face-wiſe one above another, charg'd with 4 Antlers, each of the ſame, for *Wirtemberg*. In the 1ſt, *Lozenges Or* and *Sable*, for *Teck*. In the 2d, *Azure*, a *Standard Or*, plac'd Bend-wiſe, charg'd with a *Spread-Eagle Sable*, for the Standard of the Empire. In the 3d, *Gules*, 2 *Trouts Or*, Back to Back, and fac'd Pale-wiſe, for *Montbelliard*. The Helmets are *Or* Crown'd, ſurmounted with a *Horn*, with white Feathers in its Mouth, for *Wirtemberg* in the 1ſt. *Or* Crown'd, a Dog's-Head Lozeng'd *Or* and *Sable*, for *Teck*. The 2d *Or* Crown'd, ſurmounted with a Lady Crown'd *Argent*, and clad *Gules*, with 2 *Trouts Or*, inſtead of Arms, for *Montbelliard*.

Dr. *Nicholſon* obſerves, That Duke *Ulrick* was drove out of his Dominions in 1519, when they were ſold to the Emperor *Charles* V. But he was reſtor'd in 1534, by the Aſſiſtance of the King of *France*, and the Landgrave of *Heſſe*. Whereupon 'twas agreed, That he ſhould pay Homage to the Houſe of *Auſtria*. But in 1599, the Duke was reſtored to his ancient State, the Houſe of *Auſtria* reſerving only the Title and Arms, and the Right of Succeſſion on the Failure of the Duke's Heirs Male.

The Confeſſion of Wirtemberg.

WAS one of thoſe added for explaining the Confeſſion of *Augsburg*, and preſented to the Council of *Trent* by the Miniſters of the Dukes of *Wirtemberg* and *Montbelliard* in 1552. It agrees in Doctrine with that of *Augsburg*, which it explains; and in many Things, is more particular and expreſs. In the Head of Order, they declare againſt Sacrificing Prieſts, and for the Identity of Biſhop and Presbyter; alledging, That except a Presbyter be appointed in the Church for Teaching, he cannot rightly be called either Presbyter or Biſhop. They declare alſo againſt ſignificant Ceremonies, ſuch as lighting of Wax Candles to adumbrate the Revelation or Light of the Goſpel, and the Sign of the Croſs, to denote Chriſt's Victory by it, *&c.*

Their chief Towns.

1. *Stutgard*, the Metropolis of the Country It lies near the *Neckar*, about the middle of the Durchy, in Long. 28. Lat. 48. 38. 62 Miles W. from *Nordlingen*, and 52 S. from *Strasburg*. 'Tis the Reſidence of the Duke, who has a Caſtle there very well fortified. 'Tis a noble Fabrick, adorn'd with delicate Groves and Gardens, with fair Rows of Orange-Trees, fine Grotto's and Water-works, and a Pleaſure-Houſe, as ſtately as that of any Prince of the Empire. The City is pretty large; but moſt of the Citizens Houſes are built of Wood, and low. The Town is much reſorted to, becauſe of its natural Baths, which cure many Diſeaſes. Some derive the Name from its being formerly a Place for breeding young Horſes. This, they think, is confirmed by the Arms of the City, which is a young Colt let looſe.

2. *Tubingen*, the 2d City of the Dutchy. 'Twas not long ago govern'd by Counts of its own, who had their Reſidence at *Leichteneck* in *Alſace*. It lies upon the *Neckar*, about 17 Miles S. from *Stutgard*; is a fair City, and adorn'd with an Univerſity, founded by Count *Everard*, formerly mention'd, in 1477. The College was projected by Count *Chriſtopher*, built by Count *Lewis*, endow'd by Count *John Frederick*, and advanc'd in Reputation by Duke *Everard*. None are admitted here but ſuch as are deſcended from ancient Families, and accounted Gentlemen. Here's a Supreme Court of Judicature, where all Cauſes, Civil and Criminal, are determin'd by 5 Nobles, 4 Doctors of the Univerſity, and 4 Burghers. There's likewiſe a Conſiſtory of Divines and Civilians, who determine Eccleſiaſtical Cauſes. The firſt Rector of the Univerſity was *Nauclerus*, whoſe Hiſtorical Works were publiſh'd by *Melancton* in 1500, and are much commended by *Camerarius*. The chief

Digitized by Google

chief Scholars they can boaſt of, of late, are *Cruſius* and *Schickard*, both well vers'd in the Oriental Languages. In the Church of this City, are the Tombs of the Princes and Princeſſes of *Wirtemberg*. Some Antiquaries pretend, that the Emperor *Caracalla* had a Palace here, where he entertain'd the *Germans* with Publick Games.

3. *Wirtemberg*, a very ancient Caſtle on a Hill upon the *Neckar*, which gives Title to the Dukes, and the Name to the Country.

4. *Eſſingen*, on the *Neckar*, 10 Miles S. E. from *Stutgard*. 'Tis a ſmall Imperial City, under the Protection of the Duke. 'Twas walled by the Emperor *Frederick* II. and made Imperial in the 16th Century. 'Tis a Place of good Trade, and the Magiſtrates are Proteſtants.

5. *Reitling*, or *Rutlingen*, on a ſmall River which falls into the *Neckar*. 'Twas made Imperial by *Frederick* II. in 1240. It lies 12 Miles S. E. from *Tubingen*, is under the Protection of the Duke, and moſt of the Citizens are Proteſtants.

6. *Gemund*, on the Frontiers of the County of *Hohenrechtberg*, 28 Miles E. from *Stutgard*. *Frederick* I. made it Imperial in 1186. The Magiſtrates are Papiſts. 'Twas formerly noted for Tournaments held here by the Nobility of *Swabia*.

7. *Rotweil*, on the *Neckar*, at the Entrance into the *Black Forreſt*, 37 Miles S. W. from *Tubingen*. 'Tis a ſmall Imperial Town, fortified after the ancient Manner. An Imperial Chamber was eſtabliſhed here by the Emperor *Conrad* III. when he made it Free in 1147. The *French* took it in 1643, under the M. *de Guebriant*, when they join'd the *Swedes*. The Marſhal died of his Wounds next Day after it was taken. 'Twas alſo ſeized by the M. *de Villars* in 1703, after he paſs'd the *Black Forreſt*.

8. *Hailbron*, *i. e.* a Fountain of Health, ſo called from its famous Medicinal Springs. It ſtands in the Limits of this Dutchy, on the *Neckar*, 28 Miles N. from *Sturgard*. 'Tis a neat well built Town, and has a fine Bridge over the *Neckar*. 'Twas made Imperial by *Frederick* II. in 1240, and was ſeveral times taken and retaken during the Wars with the *Swedes*. Moſt of the Inhabitants are Proteſtants.

9. *Hall*, on a little River of the ſame Name, on the Frontiers of *Franconia*, 22 Miles E. from *Hailbron*. It has its Name from a Salt Fountain in the Neighbourhood. It depended formerly on the Dukes of *Wirtemberg*; but was made Imperial by *Charles* IV. in 1360.

10. *Weil*, on the *Worm*, 12 Miles W. from *Stutgard*. 'Twas made Imperial by *Frederick* II. in 1240. The Inhabitants are Papiſts.

La Forreſt takes Notice of the other Places following in this Country; 1. *Kunſtatt*, on the *Neckar*, a pretty Town, of good Trade. 2. *Heidenheim*, on the Frontiers of the Territory of *Ulm*, a large Town, well fortified. 3. *Schorndorf*, on the *Rems*, a ſmall City, noted for the great Quantity of Salt made there. 4. *Marback* on the *Neckar*, a ſmall, but a pleaſant Town. 5. *Lauffen*, another ſmall Town on the ſame River, ſeated the moſt pleaſantly of any in *Swabia*. 6. *Newſtatt*, on the *Koker*, near the Borders of the Palatinate of the *Rhine*, a ſmall City, which gives Title to a Branch of the Dukes of *Wirtemberg*. 7. *Befigheim*, on the *Ems*, a little above where it falls into the *Neckar*. 8. *Nagelt*, a ſmall City on a River of the ſame Name. 9. *Neifen*, within a League of the *Neckar*, a ſmall City, which formerly belong'd to the Counts of *Weinſperg*. 10. *Aurack*, a ſmall City, with a good Caſtle, on a riſing Ground betwixt the *Neckar* and the *Danube*. 11. *Schultz*, on the *Neckar*, near the Borders of *Hohenzollern*. 12. *Hornberg*, a ſmall City, upon a River at the Entrance into the *Black Forreſt*. 13. *Reinſtat*, an important Paſs at the Entrance of the *Black Forreſt*, which has been lately fortified, and the Foundations of a Town are marked out within the Fortifications. 14. *Dutlingen*, near the Fountain of the *Danube*, famous for a Battle betwixt the *French* and Imperialiſts in 1643.

The Marquiſate of Baden.

THis Country lies on the Eaſtern Banks of the *Rhine*, has the *Palatinate* on the N. *Switzerland* on the S. the *Black Forreſt* on the E. and *Alſace* on the W. *Moſt* makes it; including *Briſgow*, 87 Miles long, and the greateſt Breath about 20. 'Tis exceeding fruitful in Corn, Wine, and Hemp, and every where ſo full of Villages, that ſome compare it to a continu'd City, interlac'd with

Digitized by Google

with fair Gardens. The *Rhine*, *Ems*, *Wurmb*, *Phints*, and other Rivers, afford them Plenty of Fish. Their Chases and Parks are so well stock'd with Venison and Fowl, that the Rusticks have them for their ordinary Diet. They sell vast Quantities of Hemp and Flax to the *Dutch* and the *Flemings*. They have many Woods of Chesnuts, in which they have great Herds of Swine. They have many Quarries of Free-Stone, and Marble of all Colours; so that they build fair Houses at a small Charge. In the County of *Spanheim*, they have Agate, which they polish and export. But their chief Advantage is from their great Numbers of excellent hot Baths, and Mineral Springs, that occasion a great Resort of the Nobility from most Parts of the Empire, which has mightily civiliz'd the Inhabitants, and makes them very complaisant to Strangers. The People are stout and Warlike, inur'd to Labour and Hardships, and make as good Soldiers as any in the Empire.

The *Atlas Historique* gives us the following Account of the Genealogy of the Princes of this Family: *Archinoald*, *Major-domo* to *Clovis* II. King of *France*, is reckon'd the Founder of it. The next taken notice of is *Hugh* Count of *Ferette*, the 6th from *Archinoald*. After him came *Everard* Count of *Alsace*, from whence, according to some Authors, proceeded the Family of *Lorrain*. Next to him came *Guntran the Rich*, Count of *Altenburg*, from whence came the Branches of *Baden* and *Austria*: From whom, after 6 Descents, came *Herman* III. from whom sprung the first Branch of *Baden*, and that called the Branch of *Baden-Hochberg*, which were reunited in the 15th Century. 'Tis fit to observe here, That Dr. *Nicholson* says, the *German* Heralds can scarce determine the Pedigree of this Family, 'tis so ancient. Some derive them from the *Ursins*: Others from the House of *Della Scala*, or the *Scaligers*: But the most probable Opinion is, That they are of the same Origine with the House of *Austria*. The Branch of *Hochberg* came from *Berthold*, Lord of *Brisgaw*, first Duke of *Zeringen*, and afterwards made Duke of *Carinthia*, who died in 1077. *Herman* IV. Son to *Herman* III. above-mention'd, married into the *Palatine* Family of the *Guelphs*, and died in 1190. His Son *Herman* V. conquer'd Part of *Austria*, and his Son *Frederick* was beheaded at *Naples* in 1269. So that his Brother *Rodolph* succeeded. From him, after 8 Descents, came *Christopher*, who united the Branches of *Hochberg* and *Baden*, and died in 1527. From him proceeded the Branches of *Baden Baden*, and of *Baden Durlach*. From him, after 7 Descents, came the late famous *Louis William*, who was Generalissimo of the Army of the Empire, signaliz'd himself by his great Victories against the *Turks*, and his Defence of the Empire against the *French*, in very discouraging Circumstances. He died in 1706, and has left behind him a Son, born in 1702, who is under his Mother's Guardianship.

The Princes of this Family are Papists; and a Branch of 'em, descended from Prince *Louis*'s Grandfather, is that of *Lobeschutz* in *Bohemia*, whose present Prince, *Leopold William*, has a Defect in his Speech.

The Branch of *Baden Durlach* is *Lutheran*. The present Prince is *Frederick* III. call'd *The Great*, who was born in 1647, and has a numerous Issue; among whom, there's a Son, and two Grandsons.

Their Titles are, Margraves of *Baden* and *Hochberg*, Landgrave of *Sausenberg*, Count of *Spanheim* and of *Eberstein*, Lord of *Rotelen*, *Baden Weiler*, *Lahr*, and *Mahlberg*.

The Dominions of the Margraves of *Baden Baden* are, the Upper Marq. of *Baden*, Part of the County of *Eberstein*, Half the County of *Spanheim*, the Lordship of *Usenberg*, 9 Towns in *Bohemia*, which came to them by Marriage; the Earldom and Castle of *Guntzburg*, betwixt *Ulm* and *Augsburg*, given to Prince *Louis* by the late Emperor, as a Reward of his great Services; and the Fort of *Kheil*.

The Dominions of *Baden Durlach* are, the Lower Marq. of *Baden*, the Marq. of *Hochberg*, the Landgraviate of *Sausenberg*, the Lordships of *Rotelen*, *Lahr*, *Baden Weiler*, and *Mahlberg*.

Their Arms are, *Or*, a *Brochant Gules*, for *Baden*. 1. *Checkee*, *Argent* and *Gules*, for *Spanheim*. 2. Quarter'd, a *Rose Gules*, and a *Bear Sable*, on a Green Hill, for *Eberstein*. 3. A *Lion Gules*, Crown'd *Or*, for *Brisgaw*. 4. three *Cheverons Sable* for *Baden Weiler*. 5. *Azure*, a Wing expanded *Argent*, charg'd with a Demi-circle *Or*, for *Usenberg*. 6. *Coupee*, Wav'd *Or*, a *Lion Naissant*, *Gules*, Fess'd and Wav'd

Wav'd *Argent Azure*, for *Rotelen*. 7. Or, a *Fess Gules*, for *Lahr*. 8. Or, a *Lion Sable*, and Crown'd Or, for *Mahlberg*. 9. *Checkee*, Or and *Azure*, for *Spanheim*.

The Difference betwixt the Arms of the two Families, is, That the Arms of *Eberstein* has only one Quarter in the Arms of *Baden Baden*; but two in those of *Durlach* and *Spanheim*, has two in the former, and but one in the 2d.

These two Families associate themselves with other Princes, according to their different Religions.

Their chief Towns.

1. *Baden*, the Metropolis of the Marquisate. It derives its Name from its numerous hot Baths, of which 'tis said to contain about 300. The Town stands among Hills, upon a rocky uneven Ground, so that the Streets don't lie streight: Some of the Baths are scalding hot; and all of 'em running from Rocks of Salt, Allum, and Brimstone, have the same Taste. Out of that called the *Kettle*, the Water boils at a wonderful rate, and smoaks as if it were set over a Furnace. They are Sovereign against the Cramp and Gout, and some other Distempers, and therefore much frequented. *Keiffer* has given a Learned Description of 'em. The Marquis has his Palace here, which, with the Baths, occasions the chief Trade of the Town. The Palace is well fortified, stands on a rising Ground, and is the principal Defence of the Town. It lies in Long. 27. Lat. 48. 45. 5 Miles E. from the *Rhine*, 18 N. E. from *Strasburg*, and 15 E. from *Fort Louis*.

2. *Stolhoffen*, a small Town fortified by Art, and strong by its Situation, near a Morass. It lies 5 Miles S. W. from *Baden*, and about half a League E. from the *Rhine*. 'Tis famous for the Lines cast up here in the late and present War for Defence of the Empire.

3. *Gersbach*, a small City on the River *Murg*.

4. *Khiel*, on the E. Side of the *Rhine*, over against *Strasburg*, a strong Fortress, which was taken by the Marshal de *Villars* in 1703.

The Marq. of Baden Durlach.

IT lies contiguous to that of *Baden Baden* towards the N. E.

Their chief Towns.

1. *Durlach*, the Capital of the Country, 18 Miles N. E from *Baden*, and 10 S. W. from *Philipsburg*. 'Tis the Residence of the Prince, who has a magnificent Palace here, which far exceeds that of *Baden*, and is capable of entertaining the greatest Monarch in *Europe*: The Town lies on the Banks of the *Pfintz*, at the Foot of a Mountain; on the Top of which there's a strong Tower, with a continual Guard for the Security of the City. The Streets of the Town are straight and fair, and the Buildings stately and uniform. The Marquis has a large Collection of ancient Coins and Medals in his Closet, and a Library with many good Books. There's a *Gymnasium*, with Professors of the several Faculties.

2. *Pforzheim*, 15 Miles S. E. from *Durlach*, by the Latins called *Porta Hercynia*, because it stands at the Entrance of the *Black Forrest*, Part of the *Hercynia Sylva*. On one Side the Town, there are fair Meadows and Pastures; and on the other, Woods and Mountains. It lies on the Conflux of the *Ens* and *Neckar*. It was formerly subject to the Dukes of *Swabia*, but now to the Marq. of *Baden Durlach*.

3. *Gersbach*, a small Town, with a *Lutheran* and Popish Church. Here the Marquis has a Palace, and Court of Judicature for determining Causes belonging to the County of *Eberstein*.

4. *Baden Weiler*, betwixt *Friburg* and *Basle*, near the *Rhine*, about 12 Miles S. from *Brisac*, in the Territories of which it lies, tho' Part of the Marq. of *Baden*. The hot Baths of this Place, which spring from Hills of Allum, Brimstone, and Nitre, are not so hot as those of *Baden*, Being drunk, they cure Asthma's, and all sorts of Stoppage and Shortness of Breath, old inveterate Agues and Fevers; and by washing and bathing, are excellent against Itch, Scabs, Leprosies, old Sores, and Bruises.

Digitized by Google

5. *Hochberg*, an ancient Caſtle, which gives Name to a Marq. and was the Title of a Branch of the Family, which fail'd in 1503. It lies on the Confines of the *Briſgaw*, 7 Miles N. from *Friburg*, and has a great open Town called *Emertingen* near it.

6. *Sauſenberg*, an ancient Caſtle, which gives Title to a Landgraviate, and lies a little above *Baden Weiler*.

7. *Rotelen*, about 7 Miles S. W. from *Baden Weiler*, a Caſtle where the Branch of *Hochberg* had their Reſidence. *Spanheim* and *Mahlberg* are Caſtles which formerly gave Titles to Princes; but are otherwiſe of no great Note.

Alſace, *or* Elſace,

HAS its Name from the River *Ell* or *Ill*, which runs through it, and not from *Edel Saſſin*, as being one of the beſt Countries poſſeſſed by the *Saxons*, as ſome have imagin'd. It has the Palatinate of the *Rhine* on the N. *Switzerland* and Part of *Burgundy* on the S. *Lorrain* on the W. and the Marq of *Baden* on the E. From S. to N. 'tis about 100 Miles long; and where broadeſt, from E. to W. excluding *Briſgaw*, about 25.

This Country is as rich and noble a Province, and as well furniſh'd with Neceſſaries, eſpecially Corn and Wine, as any in the Empire. Their Hills are cover'd with Cheſnut Groves; and *Lebert-Hall*, with others of their Vallies, abound with Mines of Copper, Lead, *&c.* In other Places, they have rich Meadows and fat Paſtures; ſo that they have Butter and Cheeſe equal to the beſt in *Holland*.

'Twas formerly ſubject to the Kings of the *Franks*; and *Hildrick*, one of them, beſtow'd the Title of a Duke on his Favourite *Eticio* in 684. His Succeſſors were drove out by *Charles Martel*, Maſter of the *French* King's Houſhold; and in the Time of the Emperor *Otho* I. the Count of *Keiſburg*, one of his Kinſmen, was made Landgrave of this Country. Others ſay, That the Emperor *Otho* III. divided it into two Landgraviates, and gave the *Upper* to the Counts of *Hapſburg*, and the *Lower Alſace* came afterwards to the Counts of *Ottingen*, who ſold it to the Biſhop of *Straſburg*. 'Twas ſince ſeiz'd by the *French* King, and confirmed to him by the Treaty of *Munſter* in 1648. But being always accounted a Part of the Empire, we deſcribe it here. 'Tis uſually divided into *Upper* and *Lower*, beſides the leſſer Territories of *Ortenaw*, *Briſgow*, *Haguenaw*, *Sungaw*, &c. moſt of which are by ſome reckon'd Part of *Upper Alſace*, and by others Part of *Swabia*.

Their chief Towns.

1. *Straſburg*, on the W. Side of the *Rhine*, in Long. 26. 43. Lat. 41. 42 ½. about 12 Miles S. from *Fort Louis*. The Latins call it *Argentoratum*, *Argentina*, and *Straſburgum*. It ſtands on the Conflux of the *Ill* and *Breuſch*, which a little below it fall into the *Rhine*. *Cluverius* derives the Name from *Argen Straaten*, which ſignifies a bad Street. It was at firſt deſign'd only for a Fort; but is now one of the moſt populous and beſt Trading Towns in *Germany*. The Citizens are generally rich and courteous, and have Houſes to entertain Princes. 'Twas formerly an Imperial Town, being made Free by *Frederick* II. and ſo continued till it was treacherouſly taken by the *French* King in 1681. 'Tis pleaſantly ſituated in the middle of a Plain, and embrac'd the Reformation in 1529. Since the *French* took it, it has loſt much of its Religion, Liberty, and Trade. 'Tis the See of a Biſhop, who is Suffragan of *Mentz*, and has many ſtately Buildings; among which, the Town-Houſe, Arſenal, and Cathedral, are moſt remarkable. The laſt is one of the Wonders of *Germany*, and was deſcribed at large in a Treatiſe writ on purpoſe by *Schadæus*, and publiſh'd there in 1617. The Tower of the Cathedral is reckon'd the higheſt in *Germany*, and by ſome of the whole World. From the Foundation to the Top of the Spire, *Schadæus* reckons it 489 Feet, and 8 Inches; others reckon 575 Geometrical Feet. But that which makes it moſt famous, is the great Clock in it, which, by Mr. *Boyle* and others, is uſually given as an Inſtance of the late great Improvement in Mechanicks. 'Twas finiſhed in 1574, at the Charge of the Magiſtrates, by one *Habrecht*, a great Artiſt, of whoſe Work, they have many famous Pieces

Digitized by Google

Pieces of the ſame kind. He had his Inſtructions from two Learned Mathematicians, *Wolkenſtein* and *Dafypodius*; the latter of whom publiſh'd a Treatiſe about this Clock. The firſt Thing it preſents to our View, is a Celeſtial Globe, with all the Motions of the Planets, Fix'd Stars, *&c.* behind which, there's a Perpetual Almanack, in which the Day of the Month is pointed out by a Statue: The Hours are firſt crow'd by a gilt Cock, and then ſtruck on a Bell by an Angel; near whom ſtands another, with an Hour-Glaſs in his Hand, which he turns as ſoon as the Clock has ſtruck. The firſt Quarter is ſtruck by a Child with an Apple; the 2d by a Youth with an Arrow; the 3d by a Man of full Age, with a Tip-ſtaff; and the 4th by an old Man with his Cane. On the Outſide of the Church, are ſhewn the true Increaſe and Decreaſe of the Moon, with the Courſe of the Sun through all the Signs of the Zodiac. *Miſſon*, in his Travels, ſays, this Clock does much exceed that at *Lyons*, both in the Variety and Curioſity of its Motions. *Ray* ſays, the Cathedral is a noble Structure, with a Pair of folding Gates of Braſs at the W. End; That the Steeple is curiouſly built of carv'd Stone, and has 662 Steps from Bottom to Top. He went up 640 of them to a Place called the *Crown*, from whence there's a fine Proſpect of the City and adjacent Country. He ſays, the City is of a great Circumference, well fortified with Walls and Outworks. *Miſſon* ſays, its Fortifications, ſince the *French* took it, are ſo prodigious, that he would not venture on deſcribing them, but referred to the printed Platform for an Idea of them. They reach within 100 Paces of the *Rhine*, and the *French* King built a Citadel betwixt the City and the *Rhine*, which is reckon'd impregnable. The Arſenal is one of the nobleſt in *Germany*. *Ray* ſays, 'tis govern'd by two Councils, one of 71 Men, in which there are 6 Burgo-maſters, 6 Stadt-maſters, 15 *Patres Patriæ*, and 13 choſen out of the Militia. The other is called the Great Council, and conſiſts of 300 Men choſen by the ſeveral Companies of the City. *La Forreſt* ſays, That after they embrac'd the Reformation, they expelled the Biſhop and Canons, and left the Papiſts only one little Church, belonging to the Commandery of *Mukn*; but when the *French* King took it, he reſtored Popery, with the Biſhop to his See, and the Canons to the Cathedral, after they had been diſpoſſeſs'd 152 Years. *Ray* ſays, their Publick Granaries, Store-Houſes, and Wine-Cellars, are remarkable; That the Women there are generally handſome; That moſt of the Inhabitants were *Lutherans*; and in his Time, the Papiſts had but one Church, two Monaſteries for Men, and two Nunneries: That the Biſhop had a Palace in the City, where he was not allowed to ſtay above 3 Days at a time; but he might ſtay in an Inn 8. *Miſſon* ſays, their noble Arſenal was almoſt emptied by the *French*, who, beſides the Citadel and other Forts, have added a great Horn-work on the Side next the *Rhine*, with ſeveral Forts on the Iſlands, which ſecure the Bridge, and command the River. This Town was left to the *French* by the Treaty of *Ryſwick*; and Fort *Kheil* at the ſame Time was reſtored to the Empire. The Women here are noted for their odd and phantaſtical Dreſſes, as well as for their Beauty. *Mr. Coney* takes Notice, That the Rivers which run through the City occaſion abundance of Bridges; and that they have many Wells in the Streets, with Pails of Braſs handſomely turn'd like ſmall Mortars, with which they take up their Water. He mentions likewiſe abundance of Cannon of an extraordinary Size, and great ſtore of Arms in their Arſenal. They have an Univerſity, founded in 1538, by the Proteſtant Magiſtrates, to which *Ferdinand* II. allow'd great Privileges.

2. *Zabern*, or *Elſaco-Zabern*, to diſtinguiſh it from others of the ſame Name. 'Tis thought to be *Antonin's Tabernæ*, one of the old *Roman* Gariſons, demoliſhed by the ancient *Germans*, and rebuilt by *Julian* the Apoſtate. The City is defended by a ſtrong Caſtle on the top of a high Rock, to which there is only a narrow Paſſage cut out of the Rock by one of the Biſhops of *Strasburg*, who uſually kept their Reſidence here, and a Court of Judicature for determining Cauſes in their Dioceſe. It lies about 15 Miles N. W. from *Alſace*. *La Forreſt* ſays, 'tis noted for the Defeat of the *Lutheran* Army near it in 1525, by *Anthony* of *Lorrain*.

Digitized by Google

3. *Phaltzburg*, a little City, with the Title of a Principality, 12 Miles N. W. from *Zabern*. 'Tis pretty well fortified, at the Foot of a Mountain, on the Frontiers of *Lorrain*, to which it formerly belong'd.

4. *Lutzelſtein*, a Fortreſs with the Title of a County, on the Frontiers of *Lorrain*, about 6 Miles N. E. of *Phaltzburg*.

5. *Hagenaw*, an Imperial City, 15 Miles E. from *Zabern*, between the Rivers *Mottern* and *Zorna*, 6 Miles W. from the *Rhine*, and 14 N. from *Straſburg*, encompaſſed with thick Woods, Corn-Fields, and fruitful Vineyards. 'Tis conſiderable for the Court of Judicature eſtabliſh'd here in 1230 by *Frederick* II. It was given by *Charles* IV. to the Dukes of *Auſtria* in 1371, and was quitted to *France* by the Treaty of *Munſter*. 'Twas anciently reckon'd one of the four chief Villages of the *German* Empire. The *Germans* beſieg'd it in vain in 1674, and moſt of it was burnt by the *French* in 1677. 'Tis the Seat of the Great Baily of *Alſace*, and had the Supreme Court of Judicature for both *Alſaces*. The Emperor *Frederick* I. built a Palace here, where he kept his Reſidence. The Jeſuits had in their College here a large old *Roman* Battering-Ram, a Piece of Antiquity of great Value, which 'tis ſuppoſed the *French* have either removed or deſtroyed.

6. *Fort-Louis*, on an Iſland in the *Rhine*, over againſt *Baden*, from which it lies about 6 Miles N. W. 'Tis ſmall, but very ſtrong, and was built by *Louis* XIV. to command the Paſſage of the River.

7. *Weiſſenburg*, an Imperial City in the Province of *Hagenaw*. Latins call it *Sebuſium*, becauſe 'tis ſuppoſed to have been the Seat of the ancient *Sebuſii*. It lies 14 Miles N. E. from *Hagenaw*. *Dagobert* King of *France* preſented them with a Crown of Silver gilt, adorn'd with a great many Turrets, and other Flouriſhes of Art, whoſe Diameter was 24 Foot. In Remembrance of this, the Citizens hung up a Crown of Copper of the ſame Size in their great Church, where 'twas broke by the Soldiers in the Civil Wars of *Germany*, and carried away. That ſame King granted them Privileges to hunt and fiſh for many Miles round; and the Emperor *Charles* IV. made the Abbot of this Place a Prince of the Empire, and allow'd him to ſit at his Feet in the Diet. *La Forreſt* ſays, the Abbey was ſecularized by Pope *Alexander* IV. in 1496, and erected into a Provoſtſhip.

8. *Landaw*, on the *Queich*, 11 Miles N. E. from *Weiſſenberg*. 'Tis properly a Part of the *Palatinate*, tho' now reckon'd Part of *Alſace*, becauſe 'twas formerly under the Juriſdiction of *Hagenaw*. It was yielded to the *French* by the Treaty of *Munſter*; and in 1702, was beſieged by the King of the *Romans*, now Emperor, and taken, after great Loſs on both Sides; the Confederates having loſt 3 Princes, and, as *La Forreſt* ſays, 16000 Men. M. *Tallard* took it again next Year, after having obtained a conſiderable Victory over the Allies near *Spires*. But it has ſince been retaken by the Confederates, who are ſtill Maſters of it. The Plunder of moſt of the Towns of the *Palatinate*, which the *French* lodg'd here in 1688, was deſtroyed by an accidental Fire in 1689.

9. *Druſenheim*, 8 Miles S. E. from *Hagenaw*, had its Name from *Druſus*, who built a Fortreſs here, to ſtop the Incurſions of the *Germans* on this Side the *Rhine*.

10. *Moltzheim*, on the River *Bruch*, 10 Miles W. from *Straſburg*, whither the Canons of this City retired when they were chaſed out by the Proteſtants. 'Tis a ſmall City, and was almoſt ruin'd by the Imperialiſts in 1677.

11. *Roſtenheim*, on the *Mogel*, one of the 10 Cities that *Frederick* II. included in the Juriſdiction of *Hagenaw*. It lies 10 Miles W. from *Straſburg*.

12. *Benfeld*, upon the *Ill*, a ſmall City, well fortified, and formerly very conſiderable, but now almoſt in Ruins. It lies 15 Miles S. W. from *Straſburg*.

13. *Schleſtat*, a pretty ſmall City, on the *Ill*, 7 Miles N. W. from *Benfeld*. 'Twas formerly an Imperial City, but taken by the *French*, and yielded to them by the Treaty of *Munſter*. The Fortifications were demoliſhed by the Confederates in 1673; but ſince rebuilt, and now made very ſtrong.

All theſe are reckoned in *Lower Alſace*.

The

The Towns in Upper Alsace.

Brisac and *Freburg* are by some reckon'd in this Country; but by modern Geographers in *Swabia*, where we described them: So that the first Town here is,

Colmar, Lat. *Colmaria*, or *Columbaria*. It lies on the *Ill*, 12 Miles S. from *Schlestat*, and is now the Capital of *Upper Alsace*. Dr. *Nicholson* says, 'twas built out of the Ruins of the ancient *Argentuaria*, conquer'd by the Emperor *Gratian* in 378, and afterwards destroyed by *Attila* the *Hun*. This City stands in a plain and fruitful Country, and was formerly so populous, that in the great Church at *Easter*, 'twas usual to have 4000 Communicants. The Duke of *Saxe-Weimar* took it in 1636, and after his Death, it was put into the Hands of the *French* in 1639, and quitted to them by the Treaty of *Munster*: Since which, they have established the Sovereign Council of *Alsace* here, which was formerly at *Ensisheim*; but the Town is much short of what it was formerly.

2. *Keiserberg*, in a Valley, through which runs the River *Weils*, a City formerly belonging to the Jurisdiction of *Hagenaw*. It lies 8 Miles N. W. from *Colmar*.

3. *Turcheim*, formerly an Imperial Town on the River *Fecht*, at the Foot of the Mountains.

4. *Munster*, formerly an Imperial Town in the Valley of St. *Gregory*, 10 Miles W. from *Colmar*.

5. *New Brisac*, a small City, built since the Treaty of *Ryswick*, about a Mile from the *Rhine*, over against *Old Brisac*.

6. *Murbach*, a famous Abbey at the Foot of the Mountains, which separate *Alsace* from *Lorrain*, 14 Miles S. W. from *Colmar*.

7. *Ensisheim*, on the *Ill*, 10 Miles S. from *Colmar*, a very ancient City, where were formerly the Sovereign Courts of *Alsace*.

8. *Mulhausen*, an Imperial City, in Alliance with the Cantons, 15 Miles S. from *Colmar*. It formerly belong'd to the Bishop of *Strasburg*.

9. *Hunningen*, a very strong Fortress, half a League below *Basle* on the *Rhine*. 'Twas built by the *French* King after the Peace of *Nimeguen*. 'Tis large enough to hold 4 or 5000 Men. 'Tis composed of 5 Bastions, and has a Magazine vaulted with Bricks, so strong, that 'tis Proof against Bombs. Besides the Tenailles, Ravelins, Counterscarp, and double Ditch, two large Hornworks to the N. and S. and a 3d on the other Side the River, and from the Ramparts, there went Vaults to the Horn-works, for conveying Men to them; but all these were destroy'd, as was agreed by the Treaty of *Ryswick*.

10. *Pfird*, by the *French* called *Ferett*, a small City, the Capital of *Suntgow*. It lies towards the Frontiers of *Basle*, is a pretty City, and well fortified, about 10 Miles S. W. from *Hunningen*. 'Twas quitted to the *French* by the Treaty of *Westphalia*, and belongs now to the Duke of *Mazarin*.

11. *Before*, or *Betfort*, formerly the Capital of this Country; but was almost ruin'd by the Wars. It stands about 17 Miles N. W. from *Pfird*; and *La Forrest* says, 'tis well fortified, and defended by a strong Castle.

The County and City of MONTBELLIARD.

It lies W. from the *Suntgow* and *Before*, is about 22 Miles long, and 12 broad. It belongs to a Branch of the Family of *Wirtemberg*, to whom it gives Title. Dr. *Nicholson* says, the Name is derived from the sweet Air breath'd from the neighbouring Hills. The Capital City is of the same Name, and lies 33 Miles W. from *Basle*, and 8 S. W. from *Before*, in a very pleasant Country, on the utmost Border of the *German* Empire towards *Burgundy*; whence the Inhabitants are a Mixture of *French*, *Dutch*, *Lorrainers*, *Savoyards*, *Swissers*, and *Burgundians*, and their Language a Mixture of *French* and *German*. The Houses are generally built of Stone, and 3 or 4 Stories high. The Streets are uniform and large; and without the City, there are fine Groves and Gardens, the chief of which is the Duke's Garden of Pleasure, with a stately Summer-House, and all manner of rare Plants and Herbs. It stands upon the Side of a Hill, on the Top of which there is a good Citadel. The Inhabitants of the City and County are *Calvinists*. Some reckon it Part of the *French* County.

The

The Circle of FRANCONIA,

HAS *Saxony* on the N. *Swabia* and Part of *Bavaria* on the S. Part of *Hesse*, *Westerawia*, and the Palatinate of the *Rhine*, on the W. Part of *Bavaria* and *Bohemia* on the E. *Mose* makes it about 125 Miles from S. to N. and from E. to W. about 135. 'Tis Chief of the 10 Circles of the Empire. It has its Name from the *Franks*, its ancient Inhabitants, of whom we gave an Account in Ancient *Germany*, *Page* 417. Dr. *Nicholson* says, they were not one particular People, according to some Authors, but many of the ancient *Germans*, who enter'd into a League to defend themselves against the *Romans*, and took the general Name of *Franks*, to denote that they fought for their Liberty. Or, as others say, there being a great Controversy betwixt the *Swabians* and *Thuringians*, about 316 Years after Christ, the latter sent to *Clodomir* King of *France* for Assistance: Accordingly *Genebald* his Brother came with a great Army, fix'd himself in the Territories round *Wurtzburg*, and making himself Master of all the adjacent Country, gave it the Name of *Franconia*. 'Tis encompassed with Woods and Mountains, but has no Hills of any extraordinary Height. They have several Forrests and Parks well stock'd with Deer, Wild-Boar, and other Sorts of Game. Most of the Hills, especially along the *Mayn* and *Tauber*, are cover'd with Vines, which yield as rich and as good a Wine as the best Vineyards on the *Rhine*. The Fields about *Bamberg* are very fruitful in Corn, Grapes, Apples, and other Fruit; and such Plenty of Liquorish, that 'tis usually carried off the Fields by Waggon-loads. The Citizens of *Bamberg* have also store of Melons and Saffron, and indeed of every Thing necessary for Profit or Pleasure. *La Forrest* says, this Country was the usual Seat of the *French*, before they settled in *Gaul*; That the *French* Kings of the First Race established Lieutenants there, who first had the Title of Dukes, and afterwards became Proprietors of the Country, which was possessed by several Lords, when *Pepin* gave it to the Bishop of *Wurtzburg*; but those who were in Possession of this Dutchy maintain'd it against the Bishop, and became so potent, that *Conrad* Duke of *Franconia* was the first of the *German* Princes who possessed the Empire after the Posterity of *Charlemagne*. There were several other Emperors of that Family, and one of them, *Henry* V. gave this Country to *Conrad* of *Swabia*, his Nephew, who was afterwards Emperor. His youngest Son dying of the Plague at *Rome* in 1167, *Frederick* I. reunited this Dutchy to the Empire.

This Circle is divided into 6 lesser Principalities, 4 of which are subject to Spiritual Princes; *viz.* the Bishops of *Bamberg*, *Wurtzburg*, *Eichstat*, and the Great Master of the *Teutonick* Order. The Temporal Princes are, the Burgraves of *Nuremberg*, and two Princes of the Family of *Brandenburg*. Besides these, there are some other small Counties and Lordships subject to other Princes of the Empire, and several of 'em swear Fealty to the Elector of *Mentz*; of all which in their proper Places. The Bishop of *Bamberg* has the Pre-eminence, and claims a sort of Archiepiscopal Jurisdiction over the rest; but the Bishop of *Wurtzburg* is more potent than he. The Bishop of *Eichstat* has not much in *Franconia*, most of his Territories lying in *Bavaria* and *Swabia*. The Great Master of the *Teutonick* Order has little but a Title to a few Bailiwicks, which seldom take Notice of him as their Governor.

Dr. *Nicholson* says, the old *Françick* Language of this Country, or *Lingua Theotisca*, is the Origine of the present *High Dutch*, in which he gives an Account of many Pieces still extant: Some of 'em were presented by the Learned *Junius* to the Publick Library of *Oxford*.

The prevailing Religion of this Country is *Lutheranism*; but they have likewise *Papists*, *Calvinists*, and some *Jews*.

Their chief Rivers are, the *Main*, the *Regnitz*, the *Altmult*, the *Saal*, and the *Tauber*; all of which have their Rise in this Country.

La Forrest divides the Country into Ecclesiastical and Temporal Dominions, and Imperial Towns.

The

Digitized by Google

The Eccleſiaſtical Dominions are,

I. *The Biſhoprick of* WURTZBURG,

WHich has its Name from the City ſo called, is the Metropolis of *Franconia*, and lies on the River *Main*, in Longitude 28. 50. Lat. 49, 50. 65 Miles S. E. from *Francfort am Main*, and 58 N. E. from *Heidelberg*. The ancient Latins call it *Papolis*, and *Marcopolis*; but the Moderns, *Herbipolis*, according to the *German* Name, which ſignifies a Town of Herbs, becauſe of the great Variety which grow in and about this Place. The Situation is very pleaſant, and the adjacent Country abounds with all ſorts of rich Fruits and Plants, in which it exceeds the neighbouring Provinces. The City is divided into two Parts by the *Main*, and joined by a Bridge. There are likewiſe ſeveral little Streams that run thrô the Streets, which adds to the Pleaſantneſs of the City. *Guldmayer*, an Aſtrologer, born in this Place, alledges, the City was built 3 Years before our Saviour; but *Genebald* ſays, 'twas built 236 Years after. The Biſhop has a ſtately Palace on the Top of a high Hill beyond the River, which ſome fancy to have been built before the City, becauſe 'tis called *Old Wurtzburg*. The Biſhoprick was founded in the 8th Century, by St. *Boniface*, Archbiſhop of *Mentz*, and is ſtill Suffragan to that See. The Biſhop has ſupreme Juriſdiction over the City in Temporals as well as Spirituals; and when he appears in Publick, there's a Sword carried before him with this Inſcription;

Herbipolis ſolo judicat enſe & ſtolo.

Denoting both Juriſdictions; and when he ſays Maſs, the Sword lies down before him on the Altar. Other remarkable Things here are, 1. the Hoſpital, one of the richeſt and moſt magnificent in *Europe*: The other is the Univerſity or great College, founded in 1043, which Dr. *Nicholſon* ſays is very regular and uniform, and equal to moſt of the new-built Colleges in *Oxford*. The Biſhop's Palace is join'd to the Town by a Wall flank'd by 4 Baſtions. The City was formerly Imperial, but reduced by one of the Biſhops, and has ſince been ſubject to their See. He is a very potent Prince, has 400 Villages and Towns under him, and is able to raiſe 15000 Men. He has the Title of Duke of *Franconia*, and has above 100000 Crowns Revenue. His Chapter is compos'd of 24 Capitular Canons, and 29 who are domicil'd. They muſt all make Proof of the Nobility of their Deſcent; and when a new one is admitted, he muſt walk through the reſt drawn up in a Lane, and each of 'em gives him a Laſh with a Whip on the Back. *Memconys* ſays, the Fortifications of this City are not regular, but the Caſtle is very ſtrong both by Nature and Art; the Cathedral is ancient, but not very magnificent, and is filled with the Tombs of their Biſhops. The Bridge over the River is of Stone, and 300 Paces in Length. There is a good Arſenal in the Caſtle, well provided with Cannon and Arms. In one of the Courts of the Caſtle, there's a fine Fountain; and below the Caſtle, there's a Pump with 3 Branches, which raiſes the Water as high as the Caſtle, thô it be at leaſt 200 Fathom high, which is very much wonder'd at. In the Biſhop's Cellar, there are above 60 great Tuns of curious Workmanſhip, the leaſt of which contains 22 or 23 Waggon-loads of Wine, reckoning 6 Hogſheads to each Waggon-load; and there he ſaid he drank Wine, which they told him was above 123 Years old, and was clearer than the beſt *Spaniſh*.

The Places belonging to this Biſhoprick are, 1. *Oſchenfurt*, a pretty ſmall Town on the *Main*, 10 Miles S. E. from *Wurtzburg*. 2. *Kitzingen*, a good Town on the N. Side of the ſame River, about 8 Miles S. E. from *Wurtzburg*. Half of this City belongs to the Marquis of *Anſpach*. 3. *Wilkach*, a large open Town on the *Main*. 4. *Carlſtat*, upon the ſame River, a very pretty Town, 12 Miles N. from *Wurtzburg*. 5. *Schonwin*, on the S. Side of the *Main*, 12 Miles N. W. from *Carlſtat*: 'Tis Capital of a Bailiwick, formerly Part of the County of *Reinek*, but acquir'd by the Biſhop of *Wurtzburg* in 1559. 6. *Konigſhoven*, a ſtrong Town towards the Frontiers of the County of *Henneberg*, taken by the *Swedes* in 1631. It lies 45 Miles E. from *Wurtzburg*.

H. BAM-

II. BAMBERG.

Which derives its Name from *Baba*, the Emperor *Henry* I.'s Sister: Or, according to others, from *Papen*, as being anciently the Residence of Priests. It lies on the *Regnitz*, 43 Miles N. E. from *Wurtzburg*. 'Twas formerly Imperial, and govern'd by Earls of its own, who had their Residence at *Altenburg*, about a Mile from the Town, but is now subject to its Bishop, who has a Palace on an Island in the River *Regnitz*, which runs through the middle of the City, and a little below it falls into the *Main*. The Palace is very magnificent and beautified, with fair Gardens and Orchards. The adjacent Country abounds with rich Fruits and Plants, and the Bishoprick is reckon'd 60 Miles in Length, and 30 in Breadth, besides several Manors in *Carinthia*, and Royalties elsewhere. *La Forrest* says, he is the first Bishop of the Empire, and depends immediately on the Pope. His Subjects are Papists, and cannot Appeal from him in his Decisions. The King of *Bohemia*, the Electors of *Bavaria* and *Brandenburg*, hold several Lordships of this See. He is Joint Director of the Circle with the Marquis of *Culmbach*, and has a Right to receive the Oath which the Secular Electors swear to the Emperor, for the Offices of the Houshold which they bear. This Cathedral is one of the most Magnificent in the Empire, with a lofty Steeple and 4 noble Spires. The Chapter is composed of 20 Capitular Canons, and 15 Domicil'd. The Jesuits have a stately College here. Formerly when the Emperors had no Hereditary Countries in the Empire, *Bamberg* was the Place of their Residence, and in that case the Bishop was oblig'd to retire to *Villach* in *Carinthia*. The Bishoprick was founded by the Emperor *Henry* II. in 1106.

Other Places belonging to this Bishoprick, are, 1. *Forcheim*, a strong Town on the Conflux of the *Regnitz* and *Wisnet*, 10 Miles S. E. from *Bamberg*. 2. *Chronach*, a Fortress on a small River of the same Name.

III. AICHSTAT, or EICHSTAT;

A Bishoprick which takes it Name from the principal Town that lies on the *Altmul*, 12 Miles N. W. from *Ingolstat* on the *Danube*, 12 N. E. from *Newburg*, and 12 S. E. from *Weissenburg*. The Bishoprick is about 30 Miles from E. to W. and from 8 to 15 and 16 in Breadth. The *Latins* call this Town *Ala-Naristea*, and *Eistadium*. The Bishop is Suffragan of *Mentz*, and was founded by Archbishop *Boniface* at the same time with *Wurtburg*, and has been richly endow'd since by several Emperors and Princes. The Bishop is a Prince of the Empire, and has a Chapter of 16 Capitular Canons, and 15 Domicil'd. *John Conrad* of *Gemmingen*, says *la Forrest*, presented the Cathedral with a fine *Pyxis* for the Sacrament of pure Gold, weighing 40 Marks, enrich'd with 350 Diamonds, 1400 fine Pearls, 250 Rubies, and several other precious Stones. This Town was taken in 1703, by a Detachment of *French*.

Other Places in this Bishoprick, are, 1. *Willibaldsburg*, a Fortress built by one of the Bishops near this City. 2. *Dolfustein*, a small City on the River *Altmult*.

IV. *The* DOMAIN *of the Great Master of the* Teutonick Order;

Of whom we gave a large Account in *Prussia*. After *Albert* of *Brandenburgh*, their Great Master, had imbrac'd *Luther*'s Doctrine, he appropriated Part of that Country to himself, and quitted the other to the King of *Poland*: The Knights of the Order remov'd their Chapter to *Mariendal* in *Franconia*, where they chose *Walter* of *Cronberg* for their Great Master, who sued *Albert* at the *Aulic* Council of *Vienna*, where he obtain'd a Decree against what he had done, which never had any Effect. This Order possesses still Eleven Commendaries, and the Commanders have a Right to chuse their Great Master, who is always a Prince of the Empire. The Knights before Admission must prove the Nobility of their Extract by 16 Descents, both by Father and

Digitized by Google

ioned such a Difference betwixt him and *Bessancourt*'s Nephew, who succeeded his Uncle, that the King was forced to send thither one *Pedro Barba*, who having forced the *Frenchmen* thence, gave them as a Dowry with his Daughter to one *Perrera*, who stiling himself King of the *Canaries*, try'd to make himself Master of all by the Conquest of the remaining Part of the Island; but not succeeding, he sold 4 of them to *Ferdinand* the Catholick, K. of *Aragon*, only reserving to himself that of *Gomera*, with the Title of Earl; but King *Ferdinand* soon found Means to reduce the two great Islands.

Captain *Dampier* says, these Islands abound with Beans, Pease, and Cockle, a Grain like Maiz, Papahs, Apples, Pears, Plumbs, Cherries, choice Peaches, Apricocks, Guavoes, Pomegranates, Citrons, Oranges, Limons, Limes, Pumkins, the best Onions, Cabbages, Turneps, Potatoes, *&c.* and with Horses, Cows, Asses, Mules, Sheep, Goats, Hogs, Coneys, and Deer. Sir *William Monson* says, that in 1599 the *Dutch* sent a Fleet hither of 13 Ships, under the Command of *Peter van Dorst*, and at their Return published a Book, intituled, *The Conquest of the Grand Canaries, made that Summer by 73 Sail of Ships sent out by the Command and Direction of the States General, &c. with the taking of a Town in the Island Gomera*; by which Title our Author observes they endeavoured to make the World believe that they had conquered all the *Canary* Islands, whereas they only surprised and took the City of *Palmes* in the Island of *Grand Canary*, where they took no Prisoners nor Booty, the Inhabitants being retired with all their Goods into the Mountains, so that they only delivered 36 Prisoners; but after they had taken the Town, some of the Soldiers, without their Officers Leave, did so much Mischief in the Country, that (for want of knowing the Passages) the *Spaniards* killed Scores at Times, and made the rest retire. Nevertheless they rifled their Cloysters, Monasteries, and Churches, and then burnt them to the Ground, for which Reason Sir *William Monson* severely reflects upon them. After this, the *Dutch* General took *Gomera* without Opposition, for all the People fled to the Mountains, where they killed many of the *Dutch* Stragglers.

Le Maire, who made a Voyage to these Islands in 1682 under M. *Dancourt*, Director-General of the *French* Royal *African* Company, says, they abound with Bread, Corn, Barley, Honey, Fowls, and all other Necessaries for good Living, particularly *Malmsey* Sack, which is imported every Year into *England*, *Holland*, *France*, and *Spain*, so that the Pagans thought them the *Elysian* Fields. Their Water is not very good, but they purge and make it wholesome by pouring it into Vessels of porous Stone made in the Shape of Mortars. Their Harvest is commonly in *March*, sometimes in *April*, and in several Places twice a Year, and the Soil is so fat, that a Cherry-Tree Slip bears Fruit in 6 Weeks time after grafting, and Flowers grow without Cultivation. He observes, that *Lanzerota*, *Forteventura*, *Gomera*, and *Fer*, first embraced Christianity; but that the other three continued in Idolatry some Time after the Conquest of the *Spaniards* in 1460. However at last they followed their Example. He adds, that the *Spaniards* sent abundance of the Inhabitants for Slaves to *Spain*, in order to make an entire Conquest of the Country; but that those who stay'd behind became civiliz'd, and liv'd like their Conquerors. He tells us, that they are very fond of Strangers; that all the Islands are very mountainous, and well Peopled; and that the least is 60 Miles in Compass.

La Croix places these Islands between N. Lat. 26½. and 29½. tho *Ptolomy* extends them no farther than the 16th and he takes Notice, that some confound them with the Cape *Verd* Islands. Some by the Islands of *Ombrio* and *Junonia* understand *Porto Santo* and *Madera*; by *Plutralia*, *Lancerota*; by *Casperia* or *Capraria*, *Forteventura*; and by *Canaria*, the *Great Canary*, which still retains its Name. *Purchas* and others include among the *Canaries* the small Islands of *Lobos*, *Roca*, *Graciosa*, *Sante Clara*, *Alegranca*, and *Inferno*, to which *Ortelius* adds the *Salvages* Islands in the same Rank of that of *Alegranca*, together with those of *Graciosa* and *Coro*, which *Thevenot* calls the *Isle of Stags*, the chief of which we shall hereafter describe in their Order. *La Croix* sets these Islands over against Cape *Nun* in *Morocco*, 70 or 80 Leagues from the Continent, and 9 or 10 Leagues from one another. He tells us,

Digitized by Google

that the above-mentioned *John de Betancour* was a Native of *Caux* in *Normandy*; and that as soon as *John* King of *Caſtille* had transferred to him his Right to theſe Iſlands, he furniſhed him with all Neceſſaries for the Conqueſt; that at his firſt Arrival he ſeized the Harbour and Caſtle of *Lancerota*; after which he built the Cloyſter of *St. Francis*, and a Church there, and then returned into *Spain*, where, according to *Gramaye*, he made over his Right to *Diego de Herrera* for a Sum of Money. Upon this, the latter took the Iſle of *Fortaventura*, which he called by that Name in Honour of St. *Bonaventure*, on whoſe Feſtival he made the Deſcent. *Sanutius* ſays, that when *Betancour* arrived at the Iſlands of *Lancerota* and *Forteventura*, he took Poſſeſſion of them by the Conſent of the Queen of *Caſtille*, and that his Heirs ſold it after his Death to K. *John* while he was but young. The ſame Author ſays likewiſe, that *Diego de Herrera* made himſelf Maſter alſo of the Iſles of *Ferro* and *Gomera*; and that after he had made a vain Attempt upon the others, he ſold his Right to King *Ferdinand*, who made himſelf Maſter of *Grand Canary*, after an obſtinate Fight with the Iſlanders. *La Croix* ſays, that *Alfonſus* and *Bartelt de Lugo* being afterwards ſent thither in 1512, conquer'd the Iſle of *Fer* and 4 others before he was Maſter of *Palma*; but on the contrary *Sanutius* ſays, that *Gomera* and the Iſle of *Fer* were diſcovered by *Ferdinand Doriac*; and the *Grand Canary*, *Palma*, and *Teneriff*, by *Alfonſes de Lugo*, and *Peter de Vera*, a Gentleman of *Xeres*; and that all five were conquer'd by the Commiſſion of King *Ferdinand* and Queen *Iſabella*, *viz.* *Palma* and *Teneriff* by *Alfonſis de Lugo*, and the three others by *Peter de Vera* and *Michael de Mexica*.

La Croix obſerves, that the Nearneſs of theſe Iſlands to the Tropick of *Cancer* expoſes them to the vehement Heat of the Sun, as appears from their early Harveſt. He ſays, the Soil is equally good, and produces that famous *Canary* Wine which is ſo much eſteemed all over the World; but *Sanutius* ſays, that at firſt there was but one of theſe Iſlands which produced this Wine and Corn. Among other Fruits, they abound with Figs, Sugar-Canes, Palm-Trees, *&c.* which grow on the Bank of Rivers. It alſo produces abundance of the Plants commonly called *Oriſelle*, which moſt Herbaliſts think the ſame that *Phalaris* of *Dioſcorides*, and *Daletchamp* upon *Pliny*, take for the ſecond Sort of Barley of *Theophraſtus*, which bears *Canary* Seed. The Inhabitants cultivate this Seed with a great deal of Care for the Nouriſhment of thoſe called the *Canary* Birds, and it thrives very well too if tranſported into *Europe*. There's a Sort of black Gum or Pitch called *Bee*, which abounds in the Iſle of *Teneriff*, where they take it off of the Pines in this Manner: They cut and cleave thoſe Trees into little Billets till they have 10 or 12 Waggon-load, and then lay them croſs-wiſe one upon another over a great deep Hole, into which the Pitch drops by the Heat of the Fire, which they light firſt at the Top: But ſome only dig a Trench round the Tree, and then put in the Fire. The Sea here abounds with Fiſh, eſpecially Sturgeons, which is the poor People's principal Food, and all the Iſlands have certain Marſhes and Ditches, into which the Sea flows at high Tide, and afterwards the Water turns by Degrees and the Heat of the Sun, into Salt.

La Croix tells us, that the Inhabitants are ſtrong, neither white nor black, but of a brown ſwarthy Complexion, and have flat wide Noſes. They are very brisk and mettleſome. Thoſe few of the ancient Barbarians that are left have abandoned their native Roughneſs, are called *Guanchas* by the *Spaniards*, and conform to their Way of Living. They talk little, and liſp; but they have good Stomachs, ſo that ſome of them can eat 20 Rabbets and a Goat at a Meal. They all ſpeak good *Spaniſh*, beſides the different Languages of the Country, and are of the *Romiſh* Religion. 'Tis ſaid, that ſome of the Inhabitants fled to the Mountains at firſt out of Obſtinacy, but that now they are all diſperſed. He adds, that their chief Merchandize and Wealth conſiſts in their Wines, Goats-Skins, Sugar, *&c.* *Dampier* ſays, they have Cocks, Hens, Ducks, Pigeons, Partridges, and other Fowl, beſides Mackrel, and Plenty of other Fiſh; but all Proviſions are deareſt on the three moſt Trading Iſlands, which are *Grand Canary*, *Teneriff*, and *Palma*. He obſerves, that they are beſt noted for their *Malmſey* and other Wines, *Lancerota* for Horſes, *Forteventura* for Dunghil-Fowls, and *Gomera* for Deer.

The

'he Governor in 1699 was Don *Pedro de onte*, a Native of *Teneriff*, and formerly Pre-dent of *Panama* in the South Seas, from 'hence he brought Pearls to the Queen of *pain*, and was therefore made Governor of ne *Canaries*. He gives him the Character f a very worthy Perſon, and ſays, he was ell beloved for his Moderation and Juſtice. *oberts*'s Map of Commerce ſays, they make reat Quantities of Marmalade and other onſerves of their Sugars, and that they ave excellent Woad for Dying. He adds, hat they export 2000 Tuns of Wine every 'ear to *England* and *Holland*, beſides their Woad and Sugars, for which the *Engliſh* ring hither Says, Serges, Bays, Linens, and he like. The ſame Weights, Meaſures, nd Coins, are uſed here as at *Seville*.

Heylin obſerves, that the Ancients fixed he firſt Meridian among theſe Iſlands, which s ſince removed to *St Michael*'s, one of the *Azores*. He ſays, that then they made 'riſoners and condemn'd Perſons their or-linary Butchers, and obliged them to live in ſeparate Quarter. Each Iſland had a King of its own, yet they had a Common-Coun-il out of all, conſiſting of 130 Perſons, who had the chief Direction of all Matters ſpiritual and Temporal, and us'd to have he firſt Night's Lodging with every Man's Bride. He adds, that they were of a mild Diſpoſition, own'd one God, Creator of the Word, but agreed in nothing elſe, wore Goats-Skins, lived in Caves, and that they eat Dogs-Fleſh to this very Day.

He gives a Hiſtory of theſe Iſlands, which, ſince it differs in ſome Things from the Account already given, we ſhall briefly touch upon as follows: After the Decay of the *Roman* Empire, they lay undiſcovered till about 1330, when they were found out by an *Engliſh* or (as ſome ſay) *French* Ship drove hither by Tempeſt. K. *Alphonſo* IV. of *Portugal* ſent *Lewis de Orde* to conquer them; but being repulſed at *Gomera* in 1334, he gave over his Enterprize. Nevertheleſs the *Portugueſe* found their Claim to theſe Iſlands upon this Ground. But Pope *Clement* VI granted them to Prince *Lewis* of *Spain*, Son of *Alphonſo de la Corde*, the right Heir of *Caſtille*, by the Name of the *Fortunate Iſlands*, and cauſed Soldiers to be levied in *France* and *Italy* to aſſiſt him in the Conqueſt, which gave ſuch Umbrage to the *Engliſh* Ambaſſadors then at *Rome*, who thought there were no other *Fortunate Iſlands* than thoſe of *Great Britain*, that they poſted an Expreſs to the *Engliſh* Court to prevent the Danger of the ſuſpected Conveyance. But nothing being done in Purſuance of the Pope's Grant, in 1393 ſome *Biſcayners* fell among theſe Iſlands, and having pillaged *Lancerota*, returned into *Spain* with great Store of Wax, Hides, and other Commodities of the Iſland. Upon this *Katherine*, one of the Daughters of *John* Duke of *Lancaſter*, the Dowager of K. *Henry* of *Portugal*, did, during the Minority of *John* II. commit the Conqueſt of them to *John* of *Betancourt* above-mentioned, who died in 1417, after he had ſubdued 4 of the Iſlands, and left his Son, who not being able to ſubdue *Canary*, whither moſt of the Iſlanders were retired, fortified himſelf in *Lancerota*, and took the Title of King, which he left ſoon after to one *Menault*, in whoſe Time the Iſlands under his Command received the Goſpel, and had an Epiſcopal See in *Lancerota*. But Complaint being made at the Court of *Caſtille* that this King ſold his Subjects for Money, *Pedro Barva de Campos* was ſent againſt him with three Men of War; after which the King of *Caſtille* gave him Leave to ſell his Intereſt in theſe Iſlands to *Fernando Xeres*, a Knight of *Sevil*, who was aſſiſted by that City to maintain his Purchaſe, and left the 4 leſſer Iſlands to his Succeſſors, while *Canary*, *Teneriff*, and the Iſles of *Palmes*, were each under their own Kings. Thus it continued, ſays our Author, till 1483, when *Ferdinand the Catholick*, under the Conduct of two great Commanders, *Alphonſo* of *Mexico* and *Pedro de Vera*, became Maſter of them, and tranſlated the Biſhop's See to the *Great Canary*; ſo that our Author obſerves, the Poſſeſſion hath always belonged to the *Caſtillians*, notwithſtanding the Claim of the *Portugueſe*. He ſays, 'tis now divided into two Eſtates, the one ſubordinate to the other, *Gomera*, *Lancerota*, and *Hierro*, being in the Hands of private Subjects, and *Canaria*, *Palma*, *Teneriff*, and *Forteventura*, belonging to the Crown, to which 'tis ſaid they yield 50000 Ducats a Year. He adds, that the Seat of Juſtice is fixed in the *Grand Canary*, whither all reſort upon Occaſion.

Luyts and the *Sanſons* place theſe Iſlands over againſt the Capes of *Bojador* and *Nun* in *Teſſet* in *Biledulgerid*, and extend the chief of them betwixt Lat. 26. and 28 or 29. Several Maps extend them from the firſt Meridian to the 7th Deg. of Long. *Luyts* adds, that the *Orſeelum* above mentioned is much uſed in the dying of Cloths with a Purple Colour. *Morery* computes that they ſend 16000 Hogſheads of Wine every Year into *England*. He makes the Number of theſe Iſlands 12, including the leſſer ones, and ſays, the People value Iron more than Silver or Gold. He adds, that in 1598 the Earl of *Cumberland* fitted out 11 Ships at his own Charge, with which he took *Lancerota*, *Beriquema*, and *Porto Rico*, where he would have ſettled a Colony; but his Men fell ſick and died. The *Sanſons* prove that theſe are *Ptolemey's Fortunate Iſlands* by a particular Diſcuſſion, to which we refer the Curious. *Morden* ſays, the *Spaniſh Weſt-India* Fleets often rendezvous among theſe Iſlands, to receive Orders at what Part of *Spain* they ſhall unlade their Wealth. *Gordon* reckons Dragon's Blood and Plantanes among the Commodities of theſe Iſlands.

We come now to the particular Deſcription of the *Canary* Iſlands, as they are ſet down in the Maps, beginning with

1. *The* SALVAGES *or* SALVATICÆ ISLAND.

Tho' 'tis not ſo conſiderable as any of the 7 principal Iſlands, and by ſome not reckoned among the *Canaries*, yet we mention it firſt, becauſe it lies nearer to the *Maderas* than the others. The *Sanſons* ſay 'tis deſert. Captain *Woodes Rogers*, who was at the taking of the rich *Acapulco* Ship, and viſited this Iſland in 1708, ſays, that at a Diſtance it looks like the Iſland *Lundy* in *Briſtol* Chanel, and that 'tis high, and two Miles long. *Luyts* makes it two Iſlands, and ſo does *Villalam*, who adds, that tho' they are barren and uninhabited, yet they are often frequented for the getting of *Canary* Birds, which are ſo numerous here, that there's no walking without cruſhing their Eggs.

2. *The Iſland* PALMA.

Mercla ſays, it lies 70 Leagues from *Madera*, and 216 from Cape *Verd*. *Herbert* 10 Leagues from *Fer* Iſland, and 20 from *Teneriff*. He ſays, 'tis very high and woody. *La Croix* makes it the Weſtermoſt of all the *Canaries*, and places it 12 Leagues N. from *Fer*, and 4 from *Gomera*, in N. Lat. 28. He ſays 'tis ſmall, but very fruitful, abounds in Cattle and good Paſture, Grapes, Sugar, *&c.* that the Inhabitants make abundance of Milk and Cheeſe; and that its principal Traffick is in Wine. The *Sanſons* think it to be the *Capraria* of the Ancients. They place it 12 or 15 Leagues N.W. of *Gomera*, and ſay, 'tis round or oval, 25 Leag. in Compaſs, and abounds in Corn, *&c.* It has a Town of its own Name, a ſafe Harbour, well frequented for Wines, which ſome reckon the beſt of the *Canaries*, and like *Malmſey*. They are tranſported thence to the *Weſt Indies* and elſewhere. The beſt comes from the Neighbourhood of *Brenia*, from whence they ſend above 12000 Pipes a Year. They add, that they have little Corn beſides what is tranſported from *Teneriff*, and that there are 4 fine Sugar Engines, beſides the Church and the Governor's Palace. *Mordon* ſays, 'tis the Victualling-place of the *Spaniſh* Fleet in their Paſſage to *Peru* and *Braſil*. *Du Pleſſis* tells us, that in 1493, or as *Heylin* ſays in 1491, this Iſland was conquered for the *Spaniards* by *Alphonſus Fernand de Lugo*. He makes it 26 Leagues in Compaſs, and ſays, it has a Volcano and ſeveral Villages, beſides its Capital *Santa Cruz de la Palma*. *Luyts* ſays, 'tis well cultivated, 10 Miles long, and 7 broad. Dr. *Heylin* ſays, that this, and the Iſlands *Canary* and *Teneriff*, make up the Biſhoprick of the *Canaries*, the reſt being in the Dioceſe of *Madera*. *Morery* tells us, that in 1677, its Volcano ſent forth Fires, accompanied with Earthquakes, remarkable for their Quality and Continuance. *Nuno de Penna*, in his Hiſtorical Memoirs, ſays, that on the 13th of *November* 1677. a little after Sun-ſet, the Earth ſhook for 13 Leagues with a frightful Noiſe, that laſted 5 Days, during which the Earth opened in ſeveral Places; but the greateſt Gap was upon that called

Mor

Digitized by Google

Mont aux Chevres, a Mile and a half from the Sea, from whence proceeded a great Fire, which caſt up Stones and Pieces of Rock. The like happened in ſeveral Places thereabouts, and in leſs than a quarter of an Hour it made 28 Gaps about the Foot of the Mountain, which vomited up abundance of Flames and burning Stones. It took its Courſe over the Plain of *Las Caſas*, and ran with Violence towards the Holy Fountain; but coming near the Brink of the great Deſcent, turned to the Right, and forced its Way towards the Old Port, where the *Spaniards* landed when they made themſelves Maſters of theſe Iſlands. He adds, that on the 20th of *November* following, there was a ſecond Eruption of the *Mont aux Chevres*, from whence came forth Stones and Fire, with great Earthquakes and Thunders for ſeveral Days, ſo that black Cinders were taken up at 7 Leagues Diſtance, the adjacent Ground was entirely waſted, and the Inhabitants forced to quit their Habitations.

3. FERRO, FERRAIN, FER, FIERRO, or HIERRO *Iſland.*

Herbert ſays, it lies S. S. W. from *Grand Canary*, and appears very high at Sea. He places it 10 Leagues from *Palma*, and makes it but 6 Leagues in Compaſs. He ſays, 'tis famous for a Tree called *Garre* by the Natives, and *Santo* by the *Spaniards*, which affords freſh Water to all the Inhabitants. 'Tis covered with a cloudy Miſt ſome Part of the Day, which caſts ſuch a plentiful Dew upon the Leaves, as diſtils in Streams of clear ſweet Drops into Stone Ciſterns, that hold enough for all the People and Cattle, ſo that they never drink out of Rivers or Ponds. Sir *Richard Hawkins* ſays, this Tree ſtands upon the Declivity of a Hill, and is ſhaded with a multitude of ſtately Pines. 'Tis as big as a middling Oak 6 or 7 Yards high. The Bark is white, the Boughs ragged, the Leaf white on one ſide, and green on the other; but it bears neither Fruit nor Flower. He ſays, the Miſt covers it in the Night, and that the Inhabitants have laid Leaden Pipes, which carry all the Water to a great Pond in the Valley, which is handſomely paved, and holds 20000 Tun of Water; but he obſerves 'tis generally filled in a Night's time, and communicates its Water to ſeveral leſſer Fountains, which diſperſe it thro' the Iſland. He adds, that the Iſland contains 7 or 8000 Inhabitants. *Mandelſlo* ſays, it claims the next Place to *Teneriff*, and is ſo called from the Dryneſs of the Soil, which is as hard as Iron; for except a few Springs near the Shore, the whole Iſland has no Rivulet, Brook, Well, or Spring. He ſays, the Tree ſtands in the middle of the Iſland, and is like no other that he ever ſaw. It has very long narrow Leaves, which are always green. *La Croix* ſays, this Iſland was taken for the *Spaniards* in 1512 by *Alphonſus* and *Bartelt de Lugo*. On the other Hand *Sanutius* tells us, this and *Gomera* Iſland were taken by *Diego de Herrera*, who afterwards ſold his Right to King *Ferdinand*, and that both were diſcovered by *Ferdinand Dorias*. *La Croix* places this Iſland 8 Leagues from *Gomera*, in N. Lat. 2. Some think it the *Pluvialia* of *Ptolemy*, and the *Ombros Pluitalia* of *Pliny* and *Solinus*. It has ſome Towns, and in its Capital there's a Cloyſter and a Church called *St. Francis*. He ſays, the aforeſaid Miſt never retires but in the Heat of the Day, and that its Water is received into two Stone Baſins on the N. Side of the Tree, each 20 Foot ſquare, and 4 deep. If it happens that this Miſt fails in *Auguſt*, 'tis obſerved that its Abſence is ſupplied by a Vapour which comes from the Sea-Side, and ſpreads about the Tree, where it turns into Dew, and runs along the Leaves like the Miſt. Our Author tells us, that when the *Spaniards* landed here, the Inhabitants told them they had none but Rain Water, and hid this Tree with Sugar-Canes, Earth; *&c.* in Hopes to oblige the *Spaniards* to retire when they ſaw no Water; but a Harlot of the Iſland told the Secret to a *Spaniard*, who reveal'd it to his Commander; but it proved the Woman's Ruin. He ſays, its Leaves are a little bigger than thoſe of the great Walnut-Tree, and that it bears a Fruit which reſembles an Acorn, eſpecially in its Husk, which contains a Kernel of a choice, ſweet, aromatick Taſt. He adds, that 'tis encompaſſed with a Stone Wall, and that its Soil is very fruitful, notwithſtanding its Want of Water, and abounds in Corn, Sugar-Canes, and ſeveral Sorts of Fruits and Herbs, and feeds a good

Digitized by Google

good Number of Cattle, which furniſh the Iſlanders with Milk and Cheeſe. *Hackluyt* calls the above-mentioned Tree an Olive, and ſays, the Iſland abounds with Orchel and Goats, and belongs to the Earl of *Gomera*, but has only one Vineyard, planted by one *Hill* of *Taunton* in *England*. *Heylin* ſays, 'tis called *Fierri*, becauſe of its Iron Mines, and that ſome think it the *Aprofitus* of *Ptolomy*. *Luyts* ſays, this is the moſt Weſtern Iſland of all the *Canaries*, and that 'tis barren and untilled for want of Rain. The Tree above-mentioned is ſaid to be extremely ancient, and that it never fades; but ſome deny that it has any ſuch Property, and ſay there are others of the ſame Kind, eſpecially in the Iſland of *St. Thomas*. The *French* have made the firſt Meridian to paſs thro' the W. Part of this Iſland ever ſince 1634. by the Command of King *Lewis* XIII. after he had conſulted the moſt able Aſtronomers and Geographers. *John Nun de Pena* makes this Iſland 6 Leagues broad, 7 long, and 22 in Compaſs, and ſays, that it has a Town of its own Name, with a convenient Harbour. The *Sanſons* place it 15 or 16 Leagues from *Palma*, and but 5 or 6 from *Gomera*. They obſerve the great Difference there is between Authors who have wrote of the Bigneſs of the Iſland, the Nature of its Soil, and its Water. The Hiſtory of the Conqueſt of the *Canaries*, writ by two of the Sieur *Bethencour*'s Domeſticks, makes it 7 Leagues long and 5 broad. *Maynal* an *Engliſhman*, who was Factor here in 1526 for ſome *London* Merchants, makes it but 6 Miles in Compaſs, which ſeems very improbable. Another Writer ſays, here is Plenty of Sheep, Pigs, Wild-Fowl, *&c.* The Hiſtory of the Conqueſt of theſe Iſlands ſays, the Coaſt is unpleaſant here, but the Inland Country very high and delightful, where they have Plenty of Water, and frequent Rains. It adds, that the Water of the Tree is of a ſingular Virtue, and concoſts in an Hour's time: *Jackſon* an *Engliſhman*, who ſays he ſaw and meaſured this Tree in 1618. tells us, that it dries up and withers by Day. The aforeſaid Hiſtory of the Conqueſt mentions ſeveral Trees here of this Sort. Some place it on the Top of a very high Mountain, two Leagues from the Sea. *Sanutus* ſays, the Miſt begins to riſe about Noon, and that it continues till next Day-break; but moſt ſay, that it always hangs about the Tree. From hence the *Sanſons* judge that the Iſland is above 6 Leagues in Compaſs; that it abounds with all neceſſary Proviſions for Men and Cattle; that there is Water upon the Coaſt and within Land, beſides the Trees juſt now mentioned in the Middle of the Country, whoſe Water is uſed more than that of others, becauſe of its ſingular Virtue. *Du Fer* ſays, this wonderful Tree is 40 Foot high, and the Trunk 12 Foot in Diameter, with no Branches. *Le Maire* ſeems to grant that there is ſuch a ſort of Tree here; but he was informed it never furniſhed ſo much Water.

4. GOMERA *Iſland.*

Herbert places it 5 or 6 Leagues W. from *Teneriff*, and 12 from *Palma*, and makes it 8 in Length. Sir *William Monſon* ſays, 'tis a poor weak Iſland, and that the *Dutch* took it the Beginning of the laſt Century without Oppoſition, while the Inhabitants fled to the Mountains, and killed many of the *Dutch* Straggglers. *La Croix* places it in Lat. 26½. and ſays 'tis barren, but that Wine and Sugar would thrive here if cultivated; and that there's a Town of its own Name, with a Harbour on the Side of *Teneriff*, which the *Sanſons* ſay is one of the beſt and moſt frequented in the *Canaries*. They place it 8 or 9 Leagues from *Teneriff*, and 12 or 15 S. E. from *Palma*, and make it 10 or 12 in Length. They ſay, that the *Spaniſh Weſt India* Fleet often comes into its Harbour, and takes in Corn, Fruits, Sugar, Wine, *&c.* and that the Country is high, plain, feeds ſmall Cattle, produces many Dragon Trees, and is encompaſſed with great deep Roads. *Heylin* ſays, that now 'tis as civil and well cultivated as any other of the Iſlands; but that the Men lie reciprocally with one another's Wives, and that the Siſter's Son us'd to claim the Inheritance. He makes it 22 Leagues in Compaſs, tho' but 8 in Length, and ſays, the Haven is large; that the Ancients called it *Theode*; and that the Proprietor of it is an Earl. *Hackluyt* ſays, it yields Corn, Fruit, Wine, and Sugar; and *Morery*, that it has *Fer* on the W. *Luyts* places it on the S. of *Palma*, and ſays, it has Plenty of Apples.

Du

Digitized by Google

Du Pleſſis ſays, 'twas diſcovered in 1445 by Ferdinand Peraza, a Spaniard.

5. TENERIFF.

Herbert ſays, 'tis 50 Miles long, and as populous as the *Grand Canary*. This Iſland is chiefly noted for that called the famous Pike of *Teneriff*, or the Pike of *Adam*. Moſt ſay 'tis 15 Miles high, but *Scaliger* reckons it 60, *Patricius* 70, *Thevet* 54, and one *Nicholls* an *Engliſhman*, who lived here, 47; but then 'tis ſuppoſed they compute the oblique Aſcent; for *Varenius* ſays, 'tis but 3 Miles and 15 Furlongs perpendicular, and *Raymundus* but 3. Sir *Thomas* tells us, 'tis ſo high, that the Top is ſeen in clear Weather 120 Miles; and that there's Plenty of Wood at the Bottom, Snow in the Middle, and Flames on the Top, where there are Veins of Brimſtone burning, which the People call the Devil's Cauldron. It riſes from the Middle of the Iſland, and has a Ledge of Hills on each Side, which divide it. He places it 13 Leagues from *Grand Canary*, 20 from *Palma*, 5 from *Gomera*, 75 from the Continent of *Africa*, and 80 from *Madera*. He adds, that thoſe who aſcend it uſually ride round for the Space of 9 Leagues, and then foot the reſt. *Mandelſlo* ſays, 'tis called *El Pico de Terraira*, and reckoned the higheſt in the World, ſo that it requires 3 Days time to aſcend it, and that muſt be in *July* or *Auguſt*, it being cover'd with Snow all the reſt of the Year, tho' there falls none in any of the other Iſlands. For this Reaſon 'tis ſuppoſed to be the *Nivaria* of *Pliny*. M. *Rennefort* ſays, 'tis 47812 Foot high, and that the Middle is never without Snow, but that the Top is always dry, becauſe 'tis above the middle Region. *Le Maire* ſays, the Snow never falls off nor freezes. *Dampier* ſays, 'tis beſt ſeen by Ships that are to the W. and Captain *Rogers*, that 'tis generally clouded, but that the Top is often viſible above the Clouds when all the reſt is covered with them. *La Croix* ſays, the *Moors* call it *El-Bard*, others the Pike of *Teyde*, and that the Top is plain and even. The *Sanſons* ſay, 'tis ſteep and round, and 45 *Engliſh* Miles in perpendicular Height. It often vomits Fire and Brimſtone, and the Top reſembles a Sugar-Loaf. Within two Miles of the Top there's nothing but Aſhes and Pumice-Stones, and the Wood at Bottom conſiſts of Trees called *Vinatico*, whoſe Timber is heavy, and does not rot in the Water, and below them are pleaſant Woods of Bay or Lawrel-Trees for 10 or 12 Miles, frequented by the Singing Birds of the *Canaries*. *Snellius* ſays, it riſes up after the Manner of a vaſt Pillar of a Conical Figure, the loweſt Parts of which are moſt ſpacious, and contracting by degrees to a ſharp Point at the Top. Many of the *Dutch* Maps reckon the Beginning of Longitude from this Mountain. *Morery* makes it 15 Leagues high, and ſays, it does not vomit Flames now. *Hakluyt* ſays, 'tis half a Mile broad at Top, and hollow like a Cauldron. *Gordon* ſays, it looks like a large Maſs of Rocks heaped up together in Form of a rugged Pyramid, and is thought by ſome natural Philoſophers to have been raiſed on a ſudden by a mighty Conflagration of ſulphurous Matter; and in Favour of this Opinion 'tis alledged, that there's ſtill a great Quantity of Sulphur nigh the Foot of the Pike, and that the Colour of the Rocks looks as if they had been long burnt in a Fire.

But the beſt Account of this famous Pike is to be ſeen in the Hiſtory of the Royal Society of *London*, publiſhed by Dr. *Sprat*, late Biſhop of *Rocheſter*, from a Relation of ſome conſiderable Merchants and others of Credit who went to the Top of it. For our Reader's Satisfaction, we have extracted it as follows:

They ſet out from *Orotavia*, and paſſed over ſeveral bare Mountains and ſandy Places, till they came to the Foot of the Pike, where there are many huge Stones, which ſeem to have fallen down from ſome upper Part. After they had aſcended about a Mile, they were obliged to quit their Horſes, and tho' the Air was very mild in the Day-time, yet it was ſo cold and ſtrong after Sun-ſet, that they were forced to keep great Fires all Night. The black Rocks begin a Mile above, and lie flat like a Pavement. From hence they proceeded to the Sugar-Loaf, where they began to travel again in a white Sand, with Shoes whoſe ſingle Soals are made a Finger broader than the upper Leather, to facilitate the Paſſage. When they had climbed to the Top of the Pike, they found a ſtrong Wind, and a continual

Digitized by Google

tinual breathing of a hot ſulphurous Vapour, which made their Faces ſore, but no ſuch Smoak as there was below. The Top on which they ſtood being not above a Yard broad, is the Brink of a Pit called the *Caldera*, which they judged to be a Muſket-ſhot over, and near 4 Yards deep, in Shape like a Cone, hollow within like a Cauldron, and covered all over with ſmall looſe Stones mixed with Sulphur and Sand, which ſend forth a hot ſuffocating Steam. They deſcended 4 or 5 Yards into the *Caldera*, but no farther, becauſe of its ſliding from their Feet, and the Difficulty; but ſome have ventured to the Bottom. They obſerved a clear Sort of Sulphur upon the Stones like Salt; and from hence they kenned the *Grand Canary*, 14 Leagues diſtant, *Palma* 18, *Gomera* 7, and *Fer* above 20. So ſoon as the Sun appears, the Shadow of this Mountain ſeems to cover not only this and the *Grand Canaries* Iſland, but even the Sea to the very Horizon, where its Top ſeems to turn up, and caſt its Shadow into the Air. Sometimes, eſpecially during the N. W. Wind, the Clouds ſeem to hang above or to wrap themſelves about the Pike, which they call the *Cappe*, and ſay 'tis a certain Sign of approaching Storms. There are ſeveral choice Springs on the Tops of the other Mountains. The ſandy Way to the Foot of the Sugar-Loaf is ſteep, almoſt to a Perpendicular. There's a Cave 10 Yards deep and 15 broad, in Shape like an Oven or Cupola, with a Hole at the Top near 8 Yards over, by which they ſwung down by a Rope that their Servants held at the Top, till they came to a Bank of Snow. They were forced to ſwing thus, becauſe in the Middle of the Bottom of this Cave, oppoſite to the Overture at the Top, there's a round Well of Water, the Surface whereof is about a Yard lower than the Snow, but as wide as the Mouth at Top, and about 6 Fathom deep. This is not ſuppoſed to be a Spring, but only diſſolved Snow blown in, or Water dropping thro' the Rocks. About the Sides of this Grot, for ſome Height, there's Ice and Icicles hanging down to the Snow. When they returned to *Oratava* from this Mountain, their Faces were ſo red and ſore, that they were forced to bath them with the Whites of Eggs, *&c.* to cool them. The whole perpendicular Height of this Mountain is reckoned two Miles and a half. There are no Trees, Herbs, nor Shrubs, in all the Paſſage, but Pines, and among the whiter Sands a buſhy Plant like Broom. On one Side there's a Sort of Cordon, which hath Stems of 8 Foot high, with a Trunk near half a Foot thick, every Stem growing in four Squares, and riſing from the Ground like Tuffets of Ruſhes, upon the Edges of which grow ſmall red Buttons or Berries, which contain a poiſonous Milk, that immediately fetches off the Hair from the Skin. 'Tis ſaid, this Plant is ſpread over all the Iſland, of which we come next to give an Account.

Hylin ſays, 'tis leſs than the *Grand Canary*, but that it is equally fruitful. He makes it 17 Leagues in Length, 48 *Spaniſh* Leagues in Compaſs, ſays 'tis rich, and has been ſubject to the *Spaniards* ever ſince 1496. He obſerves, that many late Geographers count the firſt Meridian from this Iſland, and places it in N. Lat. 27½. He ſays, the Land lies all very high, and that it yields more Corn than any of the reſt, beſides the ſame Fruits which all the others produce. He adds, that before the Conqueſt of it, ſeven Kings reign'd in it, who dwelt in Caves, and wore Goats-Skins; and that this and the Iſlands of *Grand Canary* and *Palma* pay 30000 Ducats a Year to the King of *Spain* for Cuſtoms, beſides 12000 to the Biſhop. *Luyts* ſays, the Inhabitants and *Spaniards* call it *Theneriſe*, and that it lies next to *Gomera* on the E. and almoſt in the Middle of the 7 *Canary* Iſlands. He makes it 8 *Spaniſh* Leagues in Breadth. He ſays, 'tis a very pleaſant Iſland, and that after two Years War with the Natives, the *Spaniards* took it in *September* 1496, under *Alfonſo Ferdinando de Lugo*. He places it 36 *Spaniſh* Leagues E. of *Forteventura*, 10 from *Grand Canary*, 55 from the neareſt Coaſt of *Africa*, 8 from *Gomera*, and 18 from *Ferro*. Some place it 16 Leagues N.W. from *Grand Canary*, and make it 24 or 25 Leagues in its greateſt Breadth. The *Sanſons* ſay, that it produces Wines, which are tranſported to the *Weſt-Indies*, Honey, Sugar, Wax, Flax, Silk, *&c.* and that their beſt Vines grow on the Side of *Ramble*. There are certain Shrubs that yield a Liquor like Milk, which becomes thick, and turns into a choice Gum called *Tayhuyba*. They cut the Dragon-Tree at

Digitized by Google

the Bottom, and it ſends forth a red Liquor called Dragon's Blood, which is uſed by the Apothecaries. *La Croix* places this Iſland 5 Leagues W. from the *Grand Canary*. *Thevet* and *Sanutius* make it the biggeſt of all the *Canaries*, and extend it 40 Leagues in Length; but *Gramaye* differs from them. M. *Rennefort* makes it 18 Leagues long, and 10 broad. He ſays, the Hills are full of Orange, Citron, and Pomegranate Trees. The Perſons of Quality here are very civil, but the common People haughty and lazy like the *Spaniards*, ſo that they had rather live upon Radiſhes and Pulſe than to take the Pains to hunt, tho' they have Plenty of Game. The Women go always covered with a Mask, and make a little Hole in it, thro' which they only look with one Eye. Their Corn is like that of *Turkey*. They have abundance of Malmſey, which generally coſts 20 Ducats *per* Pipe, beſides 17 Reals for the Duties of Exports, ſo that it amounts to 489 Livres of *France*, and contains 486 Pints of *Paris*. Money is common enough here, and the Merchants trade either with great Advantage. The chief vendible Commodities here are Swords, Piſtols, Knives, Coats, Habits, Cloaks black and grey, broad brimm'd Hats, Ribbans, Linen, *&c.* He adds, that this Iſland yields abundance of Sulphur, which they tranſport elſewhere, and that it contains about 5000 Souls.

Du Pleſſis ſays, 'tis the biggeſt and richeſt of all the *Canaries*, and is ſaid to yield above 18000 Tuns of the choiceſt *Canary* Wine. He makes it near 60 Leagues in Compaſs, and 25 Leagues in Length, but ſays, the Breadth is very unequal. He adds, that about the End of *December* in 1704, a terrible Earthquake happen'd here, which continued two entire Months without ceaſing, when above 80000 Perſons were killed, whole Towns overthrown, and others ſwallowed up by Fire, which, with the prodigious Eruption of Sulphur and Bitumen out of the Volcano's in the Mountains, burn'd the fineſt Country in the World into Deſert. *Dampier* ſays, it lies for moſt part N. and S. and that 'tis pretty full of deep craggy Mountains, with Riſings and Fallings, ſo that 'tis very troubleſome to travel, except in the Cool of the Mornings and Evenings, and they uſe Aſſes both for Riding and Carriage. The true *Malmſey* Sack grows here, which is ſaid to be the beſt in the World, beſides *Canary* Wine, and *Verdona* or Green Wine. The former grows chiefly on the W. Side of the Place, and is commonly ſent to *Oratavia*, where the *Engliſh* Merchants have a great Trade for it. *Verdona* is a green ſtrong Wine, harſher and ſharper than *Canary*; but 'tis not ſo much eſteemed in *Europe*; therefore 'tis exported to the *Weſt Indies*, where it will alſo keep beſt. 'Tis made chiefly on the E. Side of the Iſland, and ſhipped off at *Santa Cruz*. 'Tis ſaid, they can raiſe 12000 armed Men on this Iſland. *Le Maire* ſays, that in his Time it contained about 15000 Souls.

Dr. *Sprat*'s Hiſtory of the Royal Society gives this Account of it, from the Information of a judicious and inquiſitive Man that lived 20 Years here as a Phyſician and Merchant. His Opinion is, that the whole Iſland being mightily impregnated with Brimſtone, did formerly take Fire, and blow up all or moſt Part of it at the ſame time, and that many Mountains of huge Stones calcin'd and burnt, which appear every where about the Iſland, eſpecially in the S. W. Parts of it, were raiſed out of the Bowels of the Earth at the Time of that general Conflagration; and that the greateſt Quantity of this Sulphur lying about the Center of the Iſland, raiſed the *Pico* to its preſent Height; for he ſays, theſe calcin'd Rocks lie 3 or 4 Miles almoſt round the Bottom of the *Pico*, in ſuch Order one above another almoſt to the Sugar-Loaf, as if the whole Ground, ſwelling up together by the riſing of the Brimſtone, the Torrents and Rivers, did with a ſudden Eruption tumble them from the reſt of the Rocks, eſpecially to the S. W. where, from the Top of the Mountain almoſt to the Shore, there are huge Heaps of theſe burnt Rocks one under another. And there remain to this Time the very Tracts of the Rivers of Brimſtone as they ran over all this Part of the Iſland, which has ſo ruin'd the Soil, that 'twill produce nothing but Broom; but there are few or none of theſe Stones on the N. Side of the *Pico*, ſo that he concludes the Volcano diſcharged it ſelf chiefly to the S. W. He adds farther, that ſeveral Metallick Mines were broke and

Digitized by Google

blown up at the same time, and that some of these calcin'd Rocks resemble Iron Ore, some Silver, and others Copper: Particularly in the S. W. Parts called the *Azuleios*, which are very high Mountains, where never was any *Englishman* but himself, that he heard of, there are vast Quantities of a loose bluish Earth, intermixed with blue Stones, which have a yellow Rust on them like that of Copper and Vitriol, and there were many Springs of Vitriolate Waters, where he supposes was a Copper Mine; and a Bell-founder of *Oratavia* told him, that out of two Horse-loads of this Earth, he got as much Gold as made two large Rings; and a *Portuguese* who had been in the *West-Indies* told him, that his Opinion was there were as good Mines of Gold and Silver as the best in the *Indies*. There are likewise hereabouts Nitrous Waters and Stones, cover'd with a deep Saffron-colour'd Rust, and tasting of Iron. He also mentions a Friend of his, who out of two Lumps of Ore brought from the Top of this Side the Mountain, made two Silver Spoons. All this he confirms from the late Instance of the *Palme* Island, where a Volcano was fired about 12 Years since, the Violence of which made so great an Earthquake in this Island, that he and others ran out of their Houses for fear they would fall. They heard the Noise of the Torrents of flaming Brimstone like Thunder, and saw the Fire very plain by Night for 6 Weeks together. In some Part of this Island there grows a crooked Shrub called *Legnan*, which they bring for *England* as a sweet Wood. There are likewise Abricots, Peaches, *&c.* in Standard, and Pear-Trees which bear twice a Year, Almonds of a tender Shell, Palms, Plantans, Oranges and Limons, especially the Pregnadas, so called because they have small ones in their Bellies. They have also Sugar-Canes, a little Cotton, Colloquintida, *&c.* The Roses blow at *Christmas*. There are good large Carnations, but Tulips will not grow or thrive there. Their Rocks abound with Samphier, and their Meadows with a kind of Clover. There's another broader leav'd Grass near the Sea, which is so luscious and rank, that it kills all Horses that eat it, but no other Cattle. Some of their Wheat bears 80 Fold; but it grows not very high. Its Corn is bright like the purest yellow Amber, and one Bushel has produced 130 in a seasonable Year. The *Canary* Birds breed in the *Barancos* or Gills, which the Water hath fretted away in the Mountains, and are very cold Places. There are also very beautiful Quails and Partridges, larger than ours, great Wood Pigeons, Turtles at Spring, Crows, and sometimes Falcons that come over from the Coast of *Barbary*. Their Bees thrive exceedingly in the Mountains, where they have wild Goats, which climb sometimes to the Top of the *Pics*, besides Hogs, and Multitudes of Coneys. Among other Fish, they have the Cherna, a choice large Fish, better tasted than any of ours, besides the Mero, Dolphin, Shark, Lobsters without the great Claws, Muscles, Periwinkles, and the Clacas, which are reckoned the best Shell-Fish in the World. They breed in the Rocks, 5 or 6 under one great Shell, that has Holes at the Top, out of which they peep with their Nebs, and are taken out by breaking the Shells. There's another Fish like an Eel, with 6 or 7 Tails of a Span long, and its Head and Body is of the same Length. Besides, they have those called Turtles and Cabridos, which are better than our Trouts. The Island is full of Springs of pure Water that tasts like Milk; and in *Lalaguna*, where the Water is not so clear, they strain it thro' a kind of spungy Stone cut in Form of a Bason. Their best Vines grow within a Mile of the Sea, and will not thrive in any other Islands. He gives this Account of the *Guanchies* or ancient Inhabitants: A great Number of those who derive themselves from this People live at the Town of *Guimar*. They have such a Veneration for the dead Bodies of their Ancestors, and are so averse against molesting them, that 'tis Death for a Stranger to visit 'em in their Caves without Leave, which they seldom or never give. Their Corpses are various'ly sow'd up in Goat-Skins, with Thongs of the same closely fitted to their Bodies. Most of them are entire, the Eyes closed, Hair on the Head, Ears, Nose, Teeth, Lips, Beard all perfect, only discolour'd, and a little shrivell'd. He saw 3 or 400 of them in several Caves, some standing, others on Beds of Wood so harden'd by Art, (which the *Spaniards* call *Curar*, *i. e.* to cure a Piece of Wood) that no Iron can pierce it. He says,

Digitized by Google

says, that one Day when he was hunting Rabbets, which is the common Diversion here, a Ferret with a Bell about its Neck ran after a Coney into a Hole, where they lost the Sound of the Bell; upon which the Owner seeking after the Ferret among the Rocks and Shrubs, found the Mouth of a Cave, into which he no sooner enter'd, but he cry'd out for Fear at the Sight of one of those Bodies, lying with his Head on a great Stone, his Feet on a little Wall, and the rest of the Body upon a Bed of Wood. The Fellow was no sooner recovered of his Fright, but he cut a great Piece of Skin off of the Breast, which the Doctor says was more pliant than Kid's Leather, and so far from being rotten, that the Man used it for his Flail many Years after. These Bodies are very light, and in some broken Limbs he distinguished the Nerves and Tendons, and some Strings of the Veins and Arteries. The Doctor made it his chief Enquiry to know what Tradition they had concerning the Manner of preserving dead Bodies, and had this Account from some of them who were above 110 Years old, which, for the Information of the Curious, we have inserted as follows:

Anciently they had a particular Tribe of Men, who were their Priests, that kept this Art secret to themselves, and for this End never married out of their own Tribe; but upon the Conquest of the *Spaniards*, most of them were destroyed, and the Art lost with them, only they retained some Traditions of a few Ingredients. They took Butter of Goat's Milk, (mixed as some say with Hog's Grease) which they kept for the Purpose in the Skins, and in this they boiled a sort of wild Lavender, which grows very plentifully on the Rocks, an Herb called *Lara*, of a gummy Substance, which grows only under the Tops of the Mountains, a kind of *Cyclamen* or Sow-bread, and wild Sage, (which is very plentiful here) which, with other Herbs bruis'd and boil'd in the Butter, made it a perfect Balsam. This done, they unbowelled the Corps. The poorer Sort, to save Charges, had only the Brain taken out behind, and were sow'd up in Skins with the Hair on, whereas the richer Sort were wrapt in Skins finely dressed, as is said before. After the Body was thus ordered, they had a *Lixivium* ready made of the Bark of Pine-Trees, with which they washed the Body, drying it in the Sun in Summer, and in Stoves in the Winter, which they repeated very often. Then they spread the Balsam on both Sides, drying it again as before, which they continued till the Balsam had penetrated into the whole Habit, and the Muscles in all Parts appeared thro' the contracted Skin, so that the Body became exceeding light. Then they sow'd them up, as already mentioned. Our Doctor was told by these old People, that they have above twenty Caves of their Kings and great Persons, with their whole Families, which are unknown to any but themselves, and which they will never discover. Lastly, he says, that Bodies are found in Caves of the *Grand Canary* in Sacks, and quite consumed, not as these in *Teneriff*. Thus far of their Bodies and Embalming. We shall conclude our General Description of this Island with his Account of the People.

He says, they are poor, yet will not marry with the best *Spaniard*. Anciently, when they had no Knowledge of Iron, they made their Lances of Wood harden'd by Art, as above. He saw Earthen Pots so hard, that they cannot be broke, and that some of them are found in the Caves and old Bavances, which are used by the poor People that find them, to boil Meat in. They also harden'd Stone, *viz.* a kind of Slate now called *Tabona*, which they first formed to a proper Edge or Point, and then used either as Knives or Lancets. Their Food is Barley roasted, and then ground with little Mills made of Stone, and mixed with Milk and Honey, which they carry in Goat-Skins upon their Backs. They drink no Wine, nor eat much Flesh, and are generally very lean, but tall, active, and courragious. He tells us, that he saw them leap from one Rock to another from a vast Height till they came to the Bottom, and that sometimes they leap 10 Fathom deep at once after this Manner: They poise their Lance, which is about the Bigness of a Half-Pike, then aim the Point of it at any Piece of the Rock on which they intend to light, (tho sometimes not half a Foot broad) and at their going off clap their Feet close to the Lance, and so carry themselves in the Air. The Point of

Digitized by Google

the Lance first comes to the Place, which breaks the Force of their Fall; then they slide gently down by the Staff, and pitch with their Feet upon the Place at first intended, and so from Rock to Rock till they come to the Bottom. He added several Stories to this Effect, and how 28 of them escaped from the Battlements of a very high Castle in this Island, when the Governor thought them very secure; but he says, that sometimes their Novices break their Necks in learning. He told also, (and the same was seriously confirmed by a *Spaniard*, and another *Canary* Merchant then in Company) that they whistle so loud as to be heard 5 Miles off, throw Stones with as great a Force almost as that of a Bullet, and that they now use them, as they did anciently, in all their Fights.

The chief Towns here are, 1. *St. Christoval de Laguna*, *Lagena*, or *Linogona*. *Herbert* says, it stands at the Bottom of a Hill called *Garachico*, and exceeds all the Towns in the other Islands for abundance of choice Grapes, so that some say it yields 28000 Buts of Sack a Year. *Dampier* calls it the Metropolis of this Island, and says 'tis the Seat of the Governor-General of the *Canary* Islands. The Road from *Santa Cruz* to this Place is all the Way up a pretty steep Hill, yet Carts pass it up and down laden. There are some Taverns by the Way for Accommodation. The Land on each Side seems rocky and dry, but in many Places there are Spots of good Corn. At farther Distances there are small Vineyards by the Sides of the Mountains, intermixed with abundance of waste rocky Land, that bear nothing but Dildo Bushes, and are not fit for Cultivation. Here our Author met with some *English* Merchants, who treated him at Dinner, and shew'd him the Town. He tells us 'tis pretty large and compact, and yields an agreeable Prospect, but stands part against a Hill, and part in a Level. The Houses for most Part have strong Stone Walls, and are cover'd with Pantiles; and tho' they are not uniform, look pleasant enough. It has many fair Buildings, particularly two Parish Churches, with pretty high square Steeples, which over-top the other Buildings; two Nunneries, an Hospital, 4 Convents of St. *Austin*, St. *Dominick*, St. *Francis*, and St. *Diego*, besides Chapels, and many handsome Gentlemen's Houses. The Streets are not regular, but for most part spacious, and pretty handsome, and near the Middle of the Town there's a large Parade, adorned with good Buildings. There's a strong Prison on one Side on't, and a large Conduit of good Water near it that supplies the Town from the Hills behind the Plain. They have many Gardens planted with Oranges, Limes, and other Fruits, with Pot-Herbs, Sallads, Flowers, *&c.* in the Middle; and our Author thinks that the Inhabitants might improve them more than they do, because the Town stands high from the Sea on the Brow of a Plain that is all open to the E. and has the constant Benefit of the true Trade Wind, which is commonly fair, and the Town is blessed with cool refreshing Breezes all the Day. There's a large Plain behind it three or four Leagues in Length, and two Miles wide, which produces a thick Sort of Grass, as green as ours at Spring. On the E. Side on't, near the Back of the Town, there's a natural Pond of fresh Water, which is half a Mile in Circumference; but being stagnant, 'tis only frequented by the Cattle. There is Plenty of several Sorts of Wild-Fowls. Mr. *Dampier* observes, that the Town is called *Laguna*, because that Word in *Spanish* signifies a Lake or Pond. The Plain is bounded on the W. N. W. and S. W. with steep Hills, as high above this Plain as the latter is above the Sea. From the Foot of one of these Mountains, the Water of the Conduit, which supplies the Town, is carried over the Plain in Stone Troughs raised on Pillars. It has a large Prospect to the E. Side as far as the *Grand Canary*. There are several Gardens, Arbors, a pleasant Plain, green Fields, Ponds, and Aqueducts. The Island is so mountainous, steep and craggy, that 'tis very troublesome travelling up and down, unless in the Cool of the Mornings and Evenings; and they use Mules and Asses for Riding and Carriage, as fittest for the stony uneven Roads. M. *Rennefort* places this Town two Leagues from the Pike, and says, there are thick Woods of very high Trees on both Sides the Spring above-mentioned. The same Author tells us, that the neighbouring Hills are cover'd with Orange, Citron, and Pomegranate Trees; and that at the Foot of the

Moun-

Digitized by Google

Mountain, there's a very pleaſant Wilderneſs, with a Spring on one Side which falls from the Deſcent of the Hill, and runs with an eaſy Channel for a League and a half thrô the adjacent Plains, from whence 'tis conveyed by an Aqueduct half a League in Length, till within 200 Paces of the City, where there are two very large Ciſterns with Cocks. The *Sailors* place it 4 or 5 Leagues from the Sea, others but 3.

2. *St. Cruze*, *St. Croce*, or *St. Crux*. *Dampier* ſays, 'tis a little unwalled Town at the E. End of the Iſland, defended only by two Forts, where in 1657, in 6 Hours time, Admiral *Blake* burnt 16 *Spaniſh* Galleons, bound home from the *Weſt-Indies*, thô they were well manned, and had a Caſtle and Forts well provided to defend them. The Wrecks ſtill lie in 15 Fathom Water. 'Tis one of the beſt Ports of the Iſland, eſpecially in *January*. There's Anchorage from 30 to 50 Fathom in a black ſlimy Ground, not above half a Mile from the Shore; and if there are many Ships, they muſt ride cloſe one by another. The Shore is generally high Land, and in moſt Places ſteep. It lies very open to the E. Winds, and when they reign, it makes the Sea ſwell, ſo that 'tis then bad Landing for Boats, and Ships are often forced to put to Sea, and ſometimes to cut or ſlip their Anchors. The beſt Landing is in a ſmall ſandy Cove about a Mile to the N. E. of the Road, where there's good Water, which ſupplies Ships that lade here, and many times thoſe that ade at *Oratavia* ſend Boats hither for it. Between this and *Santa Cruz* ſtand two little Forts, beſides thoſe which guard the Road, and there are ſome Batteries along the Coaſt. The Town contained in 1699 about 200 Stone Houſes, ſtrongly built, two Stories high, and covered with Pantiles. Its chief Buildings were two Convents and a Church. The *Engliſh* under Admiral *Blake* battered the Town very much, and the Captain ſays, the Marks of the Shot are ſtill in the Fort-Walls, and that 'tis ſaid moſt of the Plate lies in the Harbour, thô ſome on't was haſtily carried aſhore at *Blake*'s coming in Night. The Governor lived in the main Fort cloſe by the Sea. He gives him the Character of a civil, diſcreet Man, and ſays he keeps a Porter or Centinel, beſides other Servants, and has 200 Muskets and ſome Pikes hung up againſt the Walls, but no Wainſcot, Hangings nor much Furniture, beſides a few old Chairs, a Table, and two or three Forms. *Heylin* ſays, it ſtands three Leagues from the Sea. *Rennefort* ſays, the chief Fort has 4 Baſtions, and that on the N. Side along the Coaſt there are three Sconces, and on the S. a Fort in Form of a Tower.

3. *Oratavia* or *Rotavia*, another Port on the W. Side of the Iſland. *Dampier* ſays, 'tis an ordinary Harbour, and worſe incommoded by the W. Winds, than *St. Cruz* by the E. but that 'tis the chief Port for Trade, eſpecially for Wine, and that therefore the principal Merchants reſide here, with their Conſul. He ſays, he was told that 'tis bigger than *Laguna*; that it has many Convents, thô but one Church; and that before the N. W. Winds come on, a great Sea tumbles in on the Shore, and there's a black Sky in the N. W. upon which Ships put to Sea, and ply off and on till the Weather is over, and ſometimes they muſt do ſo two or three times before they can take in their Lading, tho' the Weather be otherwiſe fair. The Relation publiſhed in Dr. *Sprat*'s Hiſtory of the Royal Society ſays, it lies on the N. Side of the Iſland, two Miles from the main Sea.

6. GRAND CANARY *Iſlands.*

'Tis agreed to be the *Canaria* of the Ancients. Mr. *Davis* of *Lime-houſe* places this Iſland Lat. 27. 40. Sir *Thomas Herbert* ſays, 'tis the Reſidence of the Grand Inquiſitor, and the Grand Council of Juſtice among the *Canaries*; that it abounds with Goats, Beeves, Aſſes, Hogs, Barley, Rye, Rice, Variety of Flowers, Grapes, *&c.* and Sugar-Houſes, where they grind their Canes, and boil the Juice for Sugar. He extends it 50 Miles in Diameter, almoſt as broad as long, 13 Leagues from *St. Croix* in *Teneriff*, 20 from *Forteventura*, and 18 from *Lancerota*, and ſays, it has a large Bay at the S. End on't called *Maſpatomba*, which yields freſh Water. *Mandelſlo* ſays, 'tis the Seat of the Biſhop of the *Canaries*; that the Inhabitants were reckoned about 9000 in his Time; and that beſides its famous Wine, it produces Wheat, Honey, and Wax; and that they drive a great Trade in Leather with the

Digitized by Google

the *Spaniards*, *English*, *Dutch*, and *Hamburghers*. He adds, that the firſt take in moſt of their freſh Proviſions here for their *Weſt-India* Voyages. Sir *William Monſon* makes the Length and Breadth but 12 Leagues, and ſays, that beſides many Villages, it has one Town bigger than the reſt, which they call the City of *Palmes* or *Canary*. *La Croix* places it W. of *Lancerota* near Cape *Bojadore*, but a little more to the N. He makes it 30 *French* or 18 *German* Leagues in Length. *Thevet* ſays, 'tis of a round Figure. *La Croix* tells us, that there are ſeveral Cloyſters here, built for moſt part at the Charge of the *Genoeſe* Merchants; and that its Government and Juriſdiction extend over all Affairs Eccleſiaſtick and Secular. *Le Maire* makes it about 30 Leagues in Compaſs, and ſays, 'tis a very pleaſant Iſland. The *Sanſons* extend it 18 or 20 Leagues either Way, and ſay, 'tis not inferior to any of the Iſlands in Bigneſs, Fertility, and a good Air. They tell us, that it abounds in Potatoes, Melons, Apples, Pears, Oranges, Citrons, Pomegranates, Figs, Olives, Peaches, and eſpecially in a Tree called *Plantano*, which thrives beſt near the Water, is cut, and ſprouts again every Year with three or four Branches, which bear each 30 or 40 Apples like Cucumbers, and when ripe, turn blackiſh; but they eat more deliciouſly than Comfits. They abound with Fir-Trees, Dragon-Trees, Palm-Trees, and Wild-Fowl, but no Wood. *Heylin* ſays, 'tis reckoned the biggeſt of all the Iſlands, and 90 Miles in Compaſs, and that here are Plenty of Camels, of which, with their Cheeſe and Beaſts-Skins, they make great Profit, but moſt of all from Dying-Woad. He adds, that they uſed to ſend 3000 Tuns of Wine every Year to *England* and the *Netherlands*. *Morery* ſays, here are 12 Sugar-Mills. *Luyts* makes it the moſt South of all the *Canary* Iſlands, between *Forteventura* on the E. and *Teneriff* on the W. and ſays, 'tis as pleaſant as any of the other Iſlands. He places it 30 Leagues W. from Cape *Bojador*, and 100 S. from *Madera*, and extends it 11 *Spaniſh* Leagues in Length, 12 in Breadth, and 38 in Compaſs. *Du Pleſſis* ſays, the Harveſt here is twice a Year, *viz.* *February* and *May*, and that 'twas diſcovered in 1483 by *Peter de Vera*, a *Spaniard*. He makes it 40 Leagues in Compaſs. *Dampier* ſays, 'tis much ſuperior to *Teneriff* Iſland in Bulk and Value. *Leguat* ſays, the *Turkiſh* Ships generally cruiſe hereabout, to ſeize what Veſſels they can that are outward-bound with Wines.

The chief Town here is *Canary* or *Palmes*. *La Croix* calls it the Capital of all the Iſlands, and ſays, 'tis the Seat of a Biſhop, ſubject to the Metropolitan of *Sevil*, and has a Cathedral, with a Convent of St. *Francis* and others. The *Sanſons* place it at the Bottom of a Bay on the E. Side of the Iſland, and ſay, 'tis a pretty Town, whoſe Inhabitants wear neat Apparel; and that its Streets, which are only of Sand, are always dry, tho' it rain never ſo much. They have good Wheat, and make very white Bread. *Le Maire* ſays, 'tis a League and a half from the Road, and defended by a ſorry Caſtle. There's good Anchorage in the Road in 18 Fathom; but Ships muſt not come too near the Town, becauſe there are Rocks under Water. The Caſtle which guards it ſtands on a Hill, and our Author ſays here are 12000 ſtout Inhabitants. He makes its Precincts near a League in Compaſs, and ſays, moſt of the Houſes are well built, but no higher than two Stories, and flat Roofed, without any Ridge. He obſerves, that in the Day-time ſcarce any body is ſeen in the Streets, and adds, that there are 4 Religious Foundations here, one belonging to the *Dominicans*, one to the *Franciſcans*, and two to the *Bernardins* and *Recollects*. *Luyts* ſays, 'tis a neat Town, with a convenient Harbour, and a fine Caſtle. *Morery* tells us, that the Inhabitants are rich. *Nicholls* an *Engliſhman*, who lived here 7 Years, ſays, the Air is very temperate, and that the *Spaniards* call it *La Cividad di las Palmas*, or the City of Palm-Trees. Thoſe who accompanied the Earl of *Cumberland* in his 11th Voyage to the *Weſt-Indies* ſay, that 'tis a finer Country than *Teneriff*; yet the King of *Spain* is fonder of the latter, and keeps a greater Force to defend it.

7. *FORTEVENTURA* or *FUERTAVENTURA*, *or the Iſland of Good Luck.*

Herbert makes it 15 Leagues long, and 8 broad, and ſays, that this and *Lancerota* were taken by the *Engliſh* in 1596, ſo that both are ſince better fortified. Captain *Peyton* ſays, 'tis placed a Degree too far N. *Gra-*

Digitized by Google

maye and others reckon it the *Casperia* of *Ptolomy*, and the *Capraria* of *Pliny*. *La Croix* places it near *Barbary*, in Lat. 28 N. from *Lancerota*, and E. from the *Grand Canary*. He makes it but 3 Leagues broad. He adds, that it contains 3 or 4 little Towns, and a safe Harbour on the W. Side. The *Sanſons* say, 'twas formerly call'd *Erbania*, and place it but 10 or 12 Leagues from Cape *Bojadore*, 16 or 18 from *Grand Canary*, and 6 from *Lancelotta*. They extend it 25 Leagues in Length, and 15 or 16 where broadeſt, but ſay, that in the Middle 'tis not above a League or two over, where there's a Wall that divides it into two Parts. The Soil is partly mountainous, and partly champaign, bounding in Wheat and Barley. There are ſeveral Brooks of freſh Water along the Coaſt, and ſoft crooked Trees on their Banks that yield Gum, of which they make white Salt. There are Palm-Trees which bear Dates, Olive and Maſtich Trees, Orichel for Dying, and a ſort of Fig-Tree which yields Balm as white as Milk, that is of great Vertue for ſeveral Medicines. They make Cheeſe of the Milk of their Goats, of which it breeds above 50000 a Year. Beſides, their Fleſh is very good, and they make great Profit of their Skins and Fat, each Beaſt weighing 30 or 40 Pound. They add, that their Harbours are only fit for middling Veſſels. *Heylin* makes it 70 Leagues broad, and places it 50 Leag. W. from Cape *d'Aguer* on the Continent, and 24 E. from *Grand Canary*, in Lat. 27. He ſays, it has Plenty of Oxen, but very little Wine. *Morery* places it S. of the Iſland *Lobos* or Wolves, and makes it 70 Leagues in Compaſs, but ſays 'tis not above 4 Leag. over in the Middle, and is ſubject to the King of *Spain*. *Luyts* places it but 18 Leag. from the Continent, but ſays 'tis 25 in Length, 8 in Breadth, and 56 in Compaſs, and that 'tis well cultivated. *Du Pleſſis* deſcribes its Diſcovery to *John Betancourt*, a *French* Gentleman, in 1417.

3. *LANCEROTA, LANSAROTE, LANZAROTTA, LANCELOTTA, LANCHAROTA,* or *LANGAROTA Iſland.*

Mr. *Davis* of *Limehouſe* places it N. Lat. 28. 50. Long. 5. 24 and ſays, the Compaſs varies here 6 Deg. 6 Min. from N. to E. The Account of the Earl of *Cumberland*'s Voyages to the *Weſt-Indies*, bound up with *Hariot*'s Collection, ſays, that in 1596, when the Earl came with his Fleet into the Road, which bears E. S. E. of the Iſland, he had Notice of a very rich Marquis here, who commanded this and the next Iſland of *Fortaventura*: Upon which he ſent 5 or 600 Soldiers aſhore under Sir *John Barkley*, who purſued the Natives, but could not overtake them, for they ran like Bucks. When they came to their Town, which was 10 Miles from the Landing-place, they found every thing carried away except a little Cheeſe and ſome Wine, and the Governor with his Guards was fled from his Caſtle, tho' it was built of ſtrong ſquare ſtone, flank'd and fortified to Advantage, and defended with a great many Braſs Guns, beſides abundance of great Stones laid about in proper Places to knock out the Brains of the Aſſailants, and the Entrance was ſo high, that 'twas impoſſible for a Man to get in without a very long Ladder; ſo that 'twas thought 20 Men might eaſily have defended it againſt 500 only by ſhutting the Door, and pulling in the Ladder. *Cambden* ſays, the Earl was forced to give over his Deſign by the Sickneſs of his Men. The Account above-mentioned adds, that the Town conſiſted of 100 and odd Houſes roughly built, and for moſt Part of one Story, with flat ſloaping Roofs to caſt off the Rain. They were cover'd with Canes and Straw laid upon Rafters, and dawbed over with Mud which the Sun had harden'd. There was but one old ratter'd Church in it, with an Altar at one End, but no Chancel, Veſtry, or other ſeparate Room. There were no Seats, except Stone Benches along the Sides, nor no Windows, ſo that all the Light came in at the Doors. The prettieſt and moſt convenient Structure was the Fryar's Convent, which had fine Gardens and Waters. The Inhabitants are ſtrong and very tall. Their Arms are Lances and Stones. When a Man preſents a Gun at them, they fall flat upon the Ground, and after the Diſcharge riſe again, throw their Stones and Lances, and then run away. They are very ſtupid, and have little Religion. Abundance of Popiſh Bulls and Pardons were found in their Houſes.

The

Digitized by Google

The Island it self, says the same Account, is somewhat oblong, and extends to the N. E and S. W. 'Tis rather bigger than the Isle of *Wight*, and parted by a Ridge of Mountains, which afford nothing but Pasture to the Sheep and Goats; but the Valleys produce very good Wheat and Barley, tho' they seem sandy and dry. Besides Sheep and Goats, here are Asses, Kine, Camels, and a few small Horses. There's a Harvest the beginning of *April*, and another about *Michaelmas*. *Mandelslo* says, that it was once surprised by the *Biscayans* and *Andalusians*, who brought away abundance of Wealth. Some take this Island for the *Pluitalia* of *Ptolomy*, and the *Pluvialia* of *Pliny*; but *Bochius* and others with more Probability the Island *Fer*. *La Croix* places it N. of *Forteventura*, and W. of *Grand Canary*, in N. Lat. 29 ½. and says, 'tis 12 Leagues long, and 7 broad. In this Island *Gramaye* places the Town of *Ceyar*, which was plunder'd in 1618, with the whole Island, by the Corsairs of *Algier*, when they carried off 1648 Persons into Slavery. *Herbert* says, 'tis less than *Teneriff*. The *Sansons* make it 16 or 18 Leag. in Length, and 10 or 12 in Breadth. They say, 'tis difficult of Access on the N. and W. Sides, and that the Country is plain towards the E. and has the same Properties as *Forteventura*. *Hylin* says, 'tis the first of the *Canary* Islands that was subject to the *Spaniards*; that the *Biscayners* discover'd it in 1493, pillag'd it, and carried off 170 of the chief Inhabitants Prisoners into *Spain*; upon which Discovery the Kings of *Castille* claimed a Propriety in all these Islands. Our Author places it Lat. 26. makes it 12 Leagues in Length, and adds, that Pope *Martin* V. erected an Episcopal See here, which in the Time of *Ferdinand the Catholick* was removed to the *Grand Canary*; and that it was formerly an Earldom, belonging to the Family of *Herrera*, who was also possessed of *Forteventura*. *Luyts* says, it took its Name from a *Portuguese*, and makes it the 7th and last of the chief *Canary* Islands, over against *Forteventura*. He makes it 24 Leagues in Compass, and 10 in Length, but scarce 4 in Breadth. *Du Plessis* says, 'twas discovered by *Betancourt* in the same Year as *Forteventura*. *Dampier* gives several Views of this and the Islands *Teneriff* and *Allegrance*, to which we refer the Curious. *Morden* says, 'tis so difficult of Access sometimes, that 'tis called the Inaccessible or Enchanted Island.

Having thus described the chief *Canary* Islands, we proceed now to,

IV. *The Islands of* CAPE VERD.

'TIS generally agreed that these Islands are so called because they lie over against the Cape of that Name, and that they were first Peopled by the *Phœnicians*. *Harris* says, they were discover'd about 1440, a little before the Death of K. *Henry* of *Portugal*, by *Antonio de Nolle*, a *Genoese*, in his Commission. *Herbert* says, he was a *German*, and discover'd them in 1445, at the Charge of King *Alphonsus* V. *De la Val* extends them from N. Lat. 14. to 20. Sir *Richard Hawkins* says, they are so hot and unhealthy, that it cost him near half his Company by Fevers, Fluxes, and other Distempers; and that sometimes it does not rain in 3 or 4 Years, when the Earth is so scorched, that a Man can scarce endure to go where the Sun shines, tho' he be never so well shod, which makes the People impatient to cool themselves at any Rate, and so lay themselves open to the N. E. Wind, that generally blows very fresh every Afternoon at 4 a Clock, by which Means they expose themselves to many dismal Disorders. To prevent this, Strangers who are most liable to these Inconveniencies cover their Heads with a Night-Cap, a Montero, and a Hat, and their Bodies with a Suit of thick Cloth, and a Gown furr'd or lin'd with Cotton or Bays, by which means they feel less of the Heat, and are more out of Danger of catching Cold. 'Tis also found here, that the Moon has very pernicious Effects upon such humane Bodies as are exposed to its Rays, therefore they never sleep in the open Air, or with their Windows open; and Sir *Richard Hawkins* tells us, he knew a Person who for sleeping one Night in his Cabbin on the Coast of *Guinea* with the Moon shining upon him, had such a violent burning Pain in his Shoulder, that for above 20 Hours he was like a Madman, and was not freed from it at last without a great many Applications, and abundance of Pain.

He

Digitized by Google

He makes these Islands 6 in Number, and says, they belong to the Crown of *Portugal*; but the Anchorage is generally bad about them. They abound with Ambergreece, Civet, Elephants Teeth, Gold which they have from *Guinea*, Salt, Rice, Cotton, Wool, and Cloth, Spunges, Pumice-Stones, and Sugar. *Mandelslo* makes them 10 in Number, and extends them from Lat. 15. to 19. He says, the *Dutch* call them the Salt Islands, because they abound with Salt. He makes the nearest 70, and the most remote 100 Leagues from the Continent, for which Reason he thinks they cannot be the *Gorgonides* of *Ptolomy*, because 'tis not probable that he who left so confused an Account of the *African* Coast should have any Knowledge of the Isles at so great a Distance. Some think they are called *Verd* or Green Islands, from a green Weed called *Sargasso*, like our Water-Cresses, which is so thick upon the Sea from Lat. 20. to 24. that Ships are sometimes stopped in their Passage without a strong Gale. He observes, that none of this Herb is seen any where else within 150 Leagues of the *African* Shore; but does not favour their Opinion who think 'tis washed from the Rocks in the *West-Indies*, and forced hither by the Winds, because the N. E. Winds reign here all the Year. He tells us, that when they were first discover'd by the *Portuguese*, they were uninhabited and desert, but that now they produce Millet, *Turky* Wheat, Oranges, Limons, Citrons, Bananas, Ananas, Ignanes, Potatoes, Melons, Citruls, Cucumbers, Pomegranates, Coco-Nuts, Figs and Raisins, twice a Year; and that they send whole Ship loads of Cattle, especially Goats, to *Brasil* from the three Islands of *Mayo*, *Sal*, and *Bonavista*. The *Portuguese* have also stored them with all Sorts of tame and wild Fowls, which are so increased, that they may be had almost for nothing. There's a sort of Bird here which the *Portuguese* call *Flamincos*, as big and white all over their Bodies as Swans; but their Wings are of a high red Colour. There are vast Numbers of Rabbets, and the Sea abounds with Fish, which great Numbers of the *Portuguese* Fisher-Boats catch, and carry hence to *Brasil*. Our Author observes, that these Islands lie extremely commodious for such Ships as trade to the *Indies*, because going they may take in Refreshments at a very easy Rate in the Isle of *Mayo*, and in their Return at that of *St. Anthony*, the *Portuguese* Inhabitants being not in a Condition to prevent it. *Dampier* makes them as many in Number as *Mandelslo*, and extends them from Cape *Verd* about 5 Deg. of Long. in Breadth, and from 14 to 19 of N. Lat. and says, they are inhabited by *Portuguese* Banditti's, but that most of them seem mountainous and barren. He tells us the *Flamences* are of the Shape of a Hern, but larger, and that they are very shy, and live in Ponds or muddy Places When many of them stand together, (which they do one by one in a Row, except when feeding) they look at a Distance like a Brick Wall. They build their Nests with the Mud in the shallow Places of Ponds, which they raise up like Hillocks, tapering to the Top two Foot above the Water, where they have a Hole to lay their Eggs in, which when they do, or are hatching them, they stand with their long Legs in the Water close to the Hillocks, and so cover the Hollowness only with their Rumps; for if they should sit down upon them, the Weight of their Bodies would break them. They never lay more than two at a time, and seldom fewer. Their first Colour is light Grey; but as their Wing-Feathers spring out, they grow darker. The young ones cannot fly nor come to their true Colour and Shape till they are 10 or 11 Months old, but run very fast. Their Flesh is lean and black, but well enough tasted. They have large Tongues, and a Piece of Fat near the Root of them, which is counted a great Dainty He adds, that the Natives have got the Way of adulterating Ambergreece: that they are all very poor, except those of *St. Jago*; and that he saw abundance of Flying Fish in his Passage hither from the *Canaries*. He observes, that 'tis a general Rule never to anchor to the Windward of any Island between the Tropicks. *Merolla* says, there's a Sort of Worms in these Islands that pierce into a Man's Heel, and creep under the Skin like a Horse-hair; and that the Way to extirpate them is either to scarify the Flesh, or else to seize them by one End, and draw them out by degrees. Admiral *Columbus* says, the Currents among these Islands set violently to the N. and N. W. Sir *William*

ham Monſon obſerves, that a conſtant Wind blows betwixt the N. and E. from the *Canaries* to the *Weſt-Indies*. *Macquet* ſays, theſe Iſlands are very much ſubject to Storms and high Winds, which come out at certain Hours of the Day, and drive ſometimes to Land, and ſometimes to Sea, which gives Occaſion to ſome to ſuppoſe that they are repulſed by the Sea-Winds. *Schouten* ſays, the neighbouring Sea ſwarms with Monſters, ſome called Sea Devils, an ugly Fiſh almoſt like Thornbacks, but bigger, and they ſwim very faſt. Beſides theſe, there are Sea-Dogs, Tunnies, Sea Hogs, *&c.* which are of very hard Digeſtion. The Dogs are coarſe Meat; but they taſt well with *French* or *Rhenish* Wines, or ſuch good Sauce, and the Hogs eat well if ſeaſon'd with Pepper and Vinegar; but the Dorades, Bonites, Corettes, and Flying Fiſh, are much better Food. They catch great Quantities of the former with the Angle. The Flying Fiſh are purſued in the Sea by great Fiſh and Sea-Monſters, and in the Air by Mews, ſo that they often fly a Ship board, where they are eaſily taken by the Mariners, who broil them upon a Gridiron. They have two Fins on their Back like Wings, with which they fly while they are wet; but as ſoon as they begin to dry, they fall down to the Water again, and wet them. *Struys* ſays, theſe Iſlands are very ſubject to thick Miſts of a reddiſh Colour, and a naſty Smell. He places them betwixt the Line and the Tropick of *Cancer*, ſo that the Sun is twice a Year over their Heads, and they have two Summers a Year. It rains almoſt continually from the End of *June* to the Middle of *October*, and 'tis accompanied with terrible Winds, Thunder and Lightning. When this Seaſon draws near, the Air grows thick and dark, the Salt in their Pits melts into Brine, the S. Winds riſe, and the Current runs faſter along the Coaſt. *Le Blanc* ſays, the Iſlands of *Mayo*, *St. Vincent*, *St. Nicholas*, *St. Lucia*, *St. Anthony*, and *Bonaviſta*, abound with Cattle and Veniſon, which the Inhabitants live by hunting, for they powder the Fleſh, and ſell it with the Skins to Strangers.

Some reckon that theſe Iſlands are the *Gorgades* of *Pliny*, which, as the Poets feign, were the ancient Reſidence of the three Siſters or *Gorgons*, the Daughters of *Phorcus*; and others, that they were anciently called *Heſperides*, from *Ptolomy*'s Cape of *Heſperia*, which is not far diſtant; yet *La Croix* thinks they were unknown to *Ptolomy*. The former places them betwixt the Capes *Blanc*, and 42 Leagues from the Continent, and extends them above 90 into the Sea. He obſerves, that Authors differ about the Number of theſe Iſlands, of which ſome reckon 12, others 11, and others 9; but that moſt are agreed there are 10 principal ones, *viz. Sal*, *Bonaviſta*, *Mayo*, *St Jago*, *Fogo*, *Brava*, *St. Nicholas*, *St. Lucia*, *St. Vincent*, and *St. Anthony*, beſides other leſſer ones, whoſe Names are not known. *Jarric* ſays, they were firſt diſcover'd in 1446 by the *Portugueſe*; and *Sanutus*, by a certain *Venetian* called *Lewis*, of the Family of *Cadamoſto*, who was ſent by the Infanta of *Portugal* to diſcover unknown Countries. *La Croix* adds, that now they are almoſt all Peopled. *Jarric* ſays, it never rains here but in *Auguſt*, *September*, and *October*. *La Croix* tells us, that ſome Years the Salt in the Pits hardens in *January*, but commonly in *February* or *March*; that their Goats breed every three or four Months; and that they have Hens, Herons, Turtles, Turkies, Partridges, and Quails. He adds, that the chief Riches of theſe Iſlands conſiſt in their Goat-Skins and Salt, which laſt they tranſport in great Quantities to *Europe* from *Sal*, *Bonaviſta*, *Mayo*, and *St. Jago*.

Mr. *Ovington* places theſe Iſlands 150 Leagues from the Shore of *Africa*, and ſays, that 10 of them are conſiderable, tho' not inhabited. Captain *Rogers*, who makes theſe Iſlands 10 in Number, as they are ſet down in *Moll*'s Map, and in the Tables of *Luyts* and the *Sanſons*, ſays, that *St. Jago*, *St. Nicholas*, *St. Anthony*, *Bonaviſta*, *Brava*, *Mayo*, and *Fogo*, are inhabited. *Herbert* thinks them the *Heſperides* of the Ancients.

The *Sanſons* extend them from Long. 153. to 157. and ſay, that they compoſe a Semicircle, of which the Convex Part faces the Continent, and the Points the Ocean. The N. W. Point is formed by the Iſland of *St. Anthony*. Thoſe of *St. Vincent*, *St. Nicholas*, and *St. Lucia*, follow between the E. and S. Thoſe of *Sal*, *Bonaviſta*, and *Mayo*, from the N. to the S. and are the moſt E. of all. Thoſe of *St. Jago*, *Fogo*, *and Brava*, are the moſt S. and run from E. to W. but

Digitized by Google

advance a little to the S. so that *St. Anthony* and *Bravo* are the two Extremities of the Semicircle to the W. and *Bonavista* the Middle of it to the E. They make *St. Lucia*, *St. Nicholas*, and *St. Jago*, the biggeſt, *St Anthony* and *St Vincent* not half ſo big, and the others the leaſt of all. They ſay, that *St. Jago* and *St. Lucia* are the moſt populous, and that *St. Nicholas*, *St. Vincent*, and *St Anthony*, were reckoned deſert by ſome formerly, becauſe they had not near ſo many Inhabitants as they could maintain. When the Ships of the United Provinces came hither in 1622. they found 500 Souls in *St. Anthony*, all *Ethiopians*, as many in *St Vincent* and *St. Nicholas*, and there are others at *Mayo*, who are ſtrong and well ſhap'd; but 'tis believed there are *Portugueſe* every where to keep them in Awe. Their Salt is formed in ſuch Abundance out of the Sea-Water which is thrown upon the Iſlands, that they ſend 100 Ship-loads every Year into Foreign Parts, beſides what they ſpend and waſte; for 'tis ſaid, the Iſland of *Mayo* is able to load 2000 Ships a Year with it, and each of the others almoſt as much. There are ſuch Multitudes of Goats, that they go 1000 in a Flock. Their Skins are ſent to *Braſil*, *Portugal*, &c. and they make good Marroquins of them. They ſalt the Fleſh, and ſell it to Ships that paſs to or from the *Indies*. They have abundance of wild Horſes, Oxen, Aſſes, and Apes. Their Turtles are two or three Foot long. They lay their Eggs in the Night, hide them in the Sand, and the Heat of the Sun hatches them. They have Wines in *Fogo* and *Bravo* as good as the *Canaries*. *Linſchotten* and *Dawity* ſay, that the Sea is covered with the green Weed formerly mentioned, call'd *Sargaſſo*, as far as Lat. 34. and the *Sanſons* ſay, the Sea is called by the ſame Name. The latter obſerve, that 'tis like Sea-Parſley, but yellower, and bears Grains or Berries at one End, which has no Taſt nor Subſtance. They are above 60 Leagues from the Continent and Iſlands, and the *Sanſons* think they are the ſame which hinder'd *Sataſpes* from finiſhing his Voyage round *Africa*, after he was forced to this Enterprize by *Xerxes* for raviſhing the Daughter of *Zopyrus*, the Son of *Megabyſes*. They add, that the Poſition of theſe Iſlands anſwers more to *Ptolomy's Fortunate Iſlands* than the *Canaries*, ſince he places the former between Lat. 10 and 16. whereas the *Canaries* are beyond 16. Alſo the Meridian of *Ptolomy's Fortunate Iſlands* is Long. 8 W. from the *African* Shore, the ſame as thoſe of Cape *Verd*; but the ſame Meridian of the *Canaries* touches the *African* Coaſt. Beſides, *Ptolomy* ranges his Iſlands in one and the ſame Meridian, and extends them from N. to S. 5 Deg. of Lat between 10 and 16. And tho' the Cape *Verd* Iſlands are not exactly in the ſame Meridian, yet they take up the ſame Number of Deg between Lat. 13 and 19. whereas the *Canaries* lie from E. to W. almoſt under one and the ſame Parallel, *viz.* Lat. 27. and extend from Long. 1. to 6. Yet for all theſe Reaſons, the *Sanſons* obſerve, that *Ptolomy's* Poſitions are often falſe, and they prove, as we formerly ſhew'd you, that the *Canaries* anſwer to his *Fortunate Iſlands*.

Heylin makes the chief Iſlands but 9, excluding *Bravo*; and *Luyts* ſays, ſome reckon 20 in all; and that when they were firſt diſcovered, they abounded with Flocks of tame Doves. Some aſcribe the Diſcovery of them to a *Venetian* in 1445, and *Nicoloſſo* to the *Portugueſe* in 1572. *Du Pleſſis* diſtinguiſhes them into 5 great ones, *viz. St Jago*, *St. Nicholas*, *St. Lucia*, *St Vincent*, and *St. Anthony*, and 5 leſſer ones, *viz. Sal*, *Bonaviſta*, *Mayo*, *Fogo*, and *Bravo*. *Gordon* ſays, ſome of theſe Iſlands are fruitful, the others very barren; that the Length of their Days and Nights is the ſame as in *Negroland*, both lying under the ſame Parallels of Lat that the Inhabitants, who are *Portugueſe*, reſemble thoſe on the Continent in their Way of Living; and that the Governor for the King of *Portugal* has the Title of Viceroy. *Legant* ſays, that the Birds formerly mentioned, *viz. Flamengos*, are called *Flamans*, from *Flamboyant* Flaming. Moſt Authors deſcribe their Beak like a *Spatula* or little Spoon; but Mr. *Willoughby* makes it ſharp, and the latter thinks they were called *Flamantes*, becauſe the Colour of ſome of their Feathers is like a Flame. Captain *Cook*, who in 1710 accompanied Captain *Rogers* in his Voyage to the *South Sea*, makes the chief Iſlands 11 in Number, by adding that called *Rouses*. *Chriſtopher Columbus* ſays, they are falſly named, for in his third Voyage he found them to be dry and barren. *Morden* ſays, that in ſome of them there are only Goats,

Digitized by Google

and no Inhabitants. We come now to describe the chief Islands of Cape *Verd*, and shall begin with the Westermost, *viz.*

1. *St.* ANTHONY *or* ANTONIO *Island.*

Nieuhoff places it three Leagues from the Island of *St. Vincent*, over against it, and says, that at the Foot of its E. Point there's a small sandy Bay, fit only for small Vessels, and called by the *Portuguese*, *Es Pracadon Simao*, where there are about 30 Huts, inhabited by *Portuguese* and Negroes, who live for most Part by Fruit, which tho' scarce, before 'twas transplanted hither by the *Portuguese*, yet abounds now in great Plenty, notwithstanding the Isle is full of high barren Rocks. Their Vines and most of their other Fruit-Trees bear twice a Year. They have abundance of all Sorts of Wild-Fowl and Goats; but the Heat is intolerable at Noon-Day. Captain *Rogers* says, there's a Governor here, who, tho' poor, reckons himself a great Man; that there's Plenty of Cattle, Hogs, Fowls, Musk, and Water-Melons, Oranges, Bananas, Potatoes, Limes, ordinary Brandy, Tobacco, *Indian* Corn, *&c.* that they exchange for Cloths or other Necessaries, which the Natives of all these Islands prefer before Money. The Inhabitants of this Island are poor, and will truck at any Price for what they want in such Payments as they can make. He adds, that there's a Deputy-Governor, and that the Landing-place is far from the inhabited Part of the Island.

La Croix says, 'tis the most N. of all the Islands, in N. Lat. 17. two Leagues or two and a half from the Isle of *St. Vincent*, with a Canal between both, which runs from S. W. to N. W. He extends the Island from N. E. to S. W. and says, it has two high Mountains, one as high as the Pike of *Teneriff*, and generally cover'd with the Clouds, especially its Top. He makes the Inhabitants about 500, and says, there's a Village at the N. End with about 20 little Houses, and 50 Families of Negroes and Whites, who have a Captain, a Priest, and a Schoolmaster. They all speak *Portuguese*. There's a Road near a Plain on the N. Side, in Lat. 16. 56. where there's a vast Heap of Waters when it rains, because of the neighbouring high Mountains; but in dry Weather there's not a Drop to be seen there. There's abundance of Wood, Palm-Trees, Pomegranates, Sugar-Canes, and Bacoves, and there's an Orchard, of which only one Tree, that is a very high Palm, is seen at Sea. Mariners commonly come hither from St. *Vincent*'s Bay with a Boat for Fruit, which they buy for Knives and such Trifles. There are three little Houses over against the Palm-Tree. There's another Orchard farther in the Island, from whence the Negroes bring their Fruit upon Asses to the Sea-Side to sell it to the Mariners. About the End of *December* they have great ripe Citrons and Limons. The *Sansons* say, this Island is less by above one half than the biggest, and that 'tis not above 100 Miles in Compass.

2. *St.* VINCENT.

Beaulieu says, the common Anchorage of this Island lies in Lat. 17 20. the Needle varying 2 Deg. ¼. N. E. About the Middle of *August* it affords great Plenty of excellent Tortoises, called Free Tortoises, and distinguished from the others called *Cabaumes* by the Smoothness and Greenness of the Shell, the Largeness of their Body, the Smallness of their Head, and the Form of their Snout, which is like the Teeth of a Saw. They eat as well as a young Heifer, and some of them are 3 Hundred Weight. They lay their Eggs in the Night upon the Sand in *June* and *July*; and bury them a Foot deep. Those who hunt them take this Opportunity to slip behind, and turn them over upon their Backs; after which they cannot get again upon their Feet, but lie there till the Morning. Most of them have 250 Eggs shell'd, and as many unshell'd in their Bellies, which are very good.

There's abundance of young Kids; but Admiral *Beaulieu* saw no Fruit here except wild Figs, which were all spoiled with Worms. Under a high Mountain to the E. there are vast Quantities of Purslain. There's a great Number of wild Pines, but no other Wood besides some Shrubs, that have a milky Juice, which is very dangerous and painful to the Eyes if it touches them. There's very good Fishing along the Rocks, especially at a little Rock at the Entry of a Bay,

Digitized by Google

Bay, about a quarter of a League from the Anchorage, where 7 or 8 Men may catch Fish enough in two Hours time to ſerve 200. In ſhort, our Author ſays 'tis as good a Place for Refreſhment as St. *Helens*, only the Water is brackiſh; but then 'tis more acceſſible all over, and furniſhed with pleaſant Walks. He makes it about 9 Miles in Circumference, and ſays, it has always the Wind at N. E. and ſeveral pleaſant Bays, eſpecially that called *St. Vincent*'s, towards the Iſle of *St. Anthony*, which is the beſt Road that can be for Ships, there being 5 Fathom Water, on an excellent ſandy Ground, ſhelter'd from all Winds. He adds, that they travell'd over moſt of the Iſland, but ſaw neither Men nor Houſes. In 1602, or as *Nieuhoff* ſays in 1596, Captain *William Parker* of *Plimouth*, with two ſmall Ships and 180 Men, took this Iſland, burnt the Town of the ſame Name, and gave the Spoil to the Soldiers The latter adds, that it abounds with Oranges, Limons, Bakoras, and Pompions, which the Inhabitants exchange for Toys; but that otherwiſe 'tis rocky and barren, and affords nothing but Graſs for the wild Goats. He makes it about 5 Leagues in Compaſs, and ſays, 'tis under the Command of a *Portugueſe* Governor; and that the Inhabitants are Negroes, tranſplanted hither from ſeveral Parts to catch wild Goats, whoſe Skins they ſend to *Portugal*, and the Fleſh which they can't ſpend they throw away. They have no Women, and lead wretched Lives. They have no freſh Water but what they gather in Bags of Goat-Skins at the Foot of the higheſt Rock, which being always cover'd with Clouds on the Top, ſends a conſiderable Quantity of Rain-Water down to the Bottom by ſmall natural Chanels. The Governor's Reſidence is on one Side of the great Rock, not far from the Shore, and 3 Leagues from the Harbour. His Officers live in Huts cover'd with Tortoiſe-ſhells among Trees. Our Author went to the Top of the higheſt Rock, where he had a full Proſpect of the Iſland: The Inhabitants have a ridiculous Story of a King's Daughter turned into a Serpent here.

La Croix places it about 30 Leagues W. from *Sal*, and two from *Lucia*, makes it 5 Leagues in Length, and extends it to the W. and S. W. He ſays, St. *Vincent*'s Bay on the N. W. is a League and a half broad at the Entrance, and encompaſſed with high Mountains, but runs half-way into the Iland. There's a great round Rock near the E. Point, and 'tis the ſafeſt Road in all the Iſlands, being ſecured from the W. and N. W. Winds by the Mountains of *St. Anthony*'s Iſle, and yet the Acceſs to it is dangerous, becauſe of the violent Winds which come down from the Side of the Mountains. There's a high Tide here every Morning and Night, which runs N. There are ſeveral other little Bays on the S. Side of the Iſland, where the *Portugueſe* come to load their Barks with Skins, and there's a ſmall Spring in a Valley upon the S. W. Point of the Bay, where the Anchorage is, which if cleanſed and deepen'd, would afford Plenty of freſh Water. The S. E. Side of the Iſland is a ſandy Shore over againſt the ſandy Bay of *St. Lucia*. The dryeſt Part of all the Iſland is about that called the Monks Rock, where there's no Herb, Leaf, nor any thing but a little ſorry Wood for Firing, and there's no Fruit or other Refreſhment, but an incredible Number of Apples of *Coloquintida*. Their Tortoiſes are ſo large, that Mariners are forced to tie them to the Ship by a great Cord. Their Goats lie chiefly about the Rocks, where the Natives hunt them with Dogs. 'Tis ſaid, that in 1613, when a *Dutch* Veſſel ſuffered Shipwreck near this Iſland, the Mariners found but 19 Souls in it, *viz.* 8 Men, 7 Women, and 4 Girls. *La Croix* adds, that the *Dutch Eaſt-India* Ships commonly anchor here, and that formerly the *Eaſt*- and *Weſt-India* Fleets uſed to meet here.

The *Senſons* make it almoſt of equal Extent with the Iſland of *St. Anthony*. *Du Pleſſis* makes it one of the five largeſt Iſlands. Captain *Rogers* ſays, that Monks Rock is high and round like a Sugar-Loaf, and lies almoſt in the Entrance of *St. Vincent*'s Bay. He cautions Mariners from running too near under the high Land of the N. Point, for fear of being becalmed and ſurpriſed by ſudden Flaws on every Side, and to avoid a ſmall Shoal about three Ships Length almoſt without the Point. There's good Landing at this Bay, eſpecially at the N. Point. The Wood lies in the Middle of the ſandy Bay, and the Water between the N. Point and the Place of Anchorage, half a Mile from the

Digitized by Google

the latter; but he says, there's good Anchoring all over the Bay, and that the Monks Rock will direct any Stranger into it, there being no other like it about the Island on the Side oppolite to that of *St. Anthony*. A constant Trade-Wind blows here betwixt the E. by N. and the N. N. E. except in *October*, *November*, *December*, and *January*; but it sometimes blows S. with Tornadoes and Rain. Several Negroes come hither from the Islands of *St. Nicholas* and *St. Anthony* to make Oil of Turtle, there being very good green Turtle about *October*. They have wild Asses, *Guinea* Hens, Curlews, and abundance of Sea-Fowls. Captain *Dampier* and others say, that thô this Island is not often frequented by Ships, yet 'tis preferable to *St. Jago* for stopping outward, because 'tis a much better Road for Ships and Landing, and more convenient for Wood and Water; but the Island is mountainous and barren, and the plainest Part lies against the Bay of its own Name. They have very large Spiders here, as big as small Walnuts, which weave their Webs so strong betwixt the Trees, that 'tis difficult to get thrô them. He adds, that thô this Island was formerly inhabited, and had a Governor, yet at present 'tis only frequented in the Season (by the Inhabitants of the other Islands, who are for most Part poor *Negroes* and *Mulatto's*) for catching Tortoises; that the wild Goats are almost all destroyed by the People of *St. Nicholas* and *St. Anthony*; and that the Heats here are excessive. Captain *Cook*, one of our Author's Companions, places this Island in Lat. 16. 55. and Long. 25. 36. from the Meridian of *London*.

3. *St. LUCIA, LUCE*, or *LUZIA Island.*

La Croix says, 'tis high and mountainous. He makes it 8 or 9 Leagues in Length, and says, it runs from the S. End, which is in Lat. 16. 18. towards the N. E. and by E. There are two little Islands at the S. E. End very near one another, and at that End which is on the E. S. E. there's a Harbour. It has a fine sandy Shore, and contains a little Island, encompassed on all Sides with a sound clean Bottom. It has a safe Road over against *St. Vincent*'s Isle, at the S. W. End, in 20 Fathom Water. He adds, that it abounds with Forrests and fresh Water, which they find at the Foot of a Hill pretty far in the Island; that 'tis not inhabited on the W. Side, where there's no fresh Water, but a great many Field Mice and Tortoises, especially in *October*. The *Sansons* reckon this one of the largest of Cape *Verd* Islands, but *Moll* makes it the least, and they say 'tis the most populous, next to that of *St. Jago*. *Heylin* calls it *St. Lucie*'s Island. *Du Fer* says, that this and the Islands of *St Nicholas* and *St Jago* are each 100 or 120 Miles long, and 20 or 30 broad.

4. *St. NICHOLAS Island.*

Dampier places it 22 Leagues W. S. W. from *Sal*, and 40 W. by N. from *Mayo*. He says 'tis triangular, the longest Side to the E. being 30 Leagues long, and the other two 20 Leagues each. 'Tis rocky and barren near the Shore, but has some Valleys farther in the Country, where the *Portuguese* have Vineyards and Plantations, and Wood for Fuel. There's Grass too for Goats, which, tho' poor, are better than those of *Sal*. They make a palish Wine here, which tasts like that of *Madera*, but is muddy. The Governor and chief Gentlemen are pretty well cloathed, and carry Swords and Pistols; but the rest are ragged. The chief Village contains about 100 Families, and lies in a Valley 14 Miles from a Bay on the S. E. Side. The Inhabitants are of a dark swarthy Complexion. There's no fresh Water here but what they dig for. *Luyts* makes this the biggest, and Captain *Rogers* the most populous Island next to *Jago*. *La Croix* places it but 17 Leagues from *Sal*, in Lat. 16. 20. and differs very much from *Dampier*, for he makes it but 5 or 6 Leagues long, and 3 broad, at the W. End, and not above a League and a half at the E. He says, there's a Rock or little Island against the most S. Point of the E. End, which Ships may glance upon without Danger. The Road lies about a League from the most E. Point of the W. Side, and there's a fine Bay on the S. Side, on a very commodious Bottom, where Ships come close to the Shore. The Harbour, according to M. *Figueredo*, is on the S. Side, and the *Portuguese* call it *Porto de Perguira*. There's a little Island at its Entrance, and beyond a Point

to

Digitized by Google

to the N. W. there's another Harbour, where there's always good fresh Water. There are several Hills on the N Side of the Island but the highest is exactly in the Middle, and the S. E. End is lower than the W. He adds, that there are but few Trees on the Island, but that it abounds with wild Cats and Gold-Fish, and that there's a Pond of fresh Water over against the Shore, which in rainy Weather overflows into the Sea.

5. *S A L*, or the Island of *S A L T*.

Mr. *Davis* of *Limehouse* places it in Lat. 10½. Long. 12. 12. and 3 Deg. ½ Variation from N. to E. He observes, that when one is in the Mid-way between Cape *Verd* it self and these Islands, there's 2 Deg. 15 Min. Variation to the E. and that the nearer one comes to the main Land, there's the less Variation. *Dampier* makes it one of the most Eastern Islands, in Lat. 16. Long. 19. 33. from the *Lizard* in *England*, 8 or 9 Leag. from N. to S. and about two Leagues wide. It has its Name from the abundance of Salt that is naturally congealed there, the whole Island being full of large Salt Ponds, but no Trees or Grass, except some Shrubs near the Shore, upon which a few poor Goats feed. There are some Wild-Fowl, especially *Flamingo's*. There was not above 5 or 6 Men on the Island, and a poor Governor, who exchanged 20 Bushels of Salt and 3 or 4 poor Goats for some old Clothes and Powder and Shot, for he was very ragged, and said there had not been a Ship there in 3 Years before. *La Croix* says, it appears at a Distance like a little Hill to those that sail to it from the *Canaries*; and that when one comes very near it, it looks like two; but the other Parts are low, and the S. E. Side is very barren. There's a little River at the N. End, and a little Harbour at the S. E. and just beyond it there's another small Island, with a Sand-Bank in a sort of Bay. A Musket shot S. from the W. End there's a very safe Road for Ships, into which a little Brook of fresh Water runs from the Mountains thro' a deep sandy Valley. The Heart of the Island is very stony and barren. At the S. E. Point of the Island, near a Hill of white Sand, there are 72 great and small Salt-Pits. There's Plenty of Turtles and Fish about the Rocks, whose Bodies are cover'd with large pointed Fins of a Finger's Length, which the Slaves of the Island boil in Whale-Oil. They kill a great Number of Goats every Year for their Skins, and there are some Horses and Asses. *Luyts* says, it abounds with wild Horses. *Baudrand* says, this Island belongs to the *Portuguese*; that 'tis but thinly inhabited, and lies 40 Miles E. of *St. Nicholas*, and 70 N. of *St. Jago*. *Du Plessis* makes it about 20 Leagues in Compass, and the biggest of the 5 lesser Islands of Cape *Verd*. *Legnat* and his Company anchor'd in a Creek to the Southward of the Island, in 8 Fathom Water. He says, they brought a Swallow hither from the *Canaries*, which was let fly every Morning, and return'd at Night to the Vessel; and that they catched several Birds here, particularly those called Long-Tails, Fools, and Frigats. They lie in wait upon Trees for Turtles, of which they destroy so many while young, that scarce 10 in a Hundred can be saved. They live only on Fish, and build their Nests on Trees. They have a rank Taste, but their Eggs are very good. The Fools come every Night to roost in this Island, and the Frigats, which are larger, and so called because they are light and admirable Sailers, lie in wait for them upon the Trees, from whence they flounce down upon them like Falcons, not to kill them, but to make them bring up the Fish that is in their Craw, which the Fool immediately does as soon as he is thus seized. The Frigat always catches it before it comes to the Ground. This Bird is blackish, and as big as a Duck. It has large Wings, Talons, and a Beak above half a Foot long, a little crooked at the End. The old ones of the Males have a sort of red Flesh under its Neck like a Cock's Comb. The Fools are so called, because they perch inconsiderably about the Ropes of the Ships, and easily suffer themselves to be taken. Their Backs are of a Chesnut Colour, their Bellies whitish, their Beaks sharp, 4 Inches long, and big towards the Head, a little indented at the Edges. Their Legs are short, and their Feet of a pale Yellow like those of a Duck. *Legnat* and his Company could find no Water here but what was brackish. The Heat of the Sun is very vehement, and the more tron-

Digitized by Google

troublesome because there's no Shade. They saw a handsome wild Horse here of a reddish bay Colour, with a long Mane and Tail, and a noble Chest; and a sort of Cat which one of them took for a Fox. For want of Wood, they roasted their Goats Flesh with a Fire made of Asses and Horse Dung. They found some Cow-Dung here, but could see no Cows. He says, the Island is not 8 Leagues round, and that the Salt is very good in its kind, and lies in Crevices of the Rocks on the S. Coast of the Island. He adds, that all the Birds they met with on Shore were Sparrows like ours, but not half so big, and that there's abundance of fine Shells of various Colours over all the Coast.

6. BOA-VISTA, BUENAVISTA, BONA-VISTA, or the Island of *Good Sight.*

It lies N. from *Mayo* and *St. Jago*, and S. from *Sal*. Admiral *Middleton* says, that this and *Mayo* Isle bear S. W. by S. at 12 Leagues Distance. *Lopez* says, the Discoverers gave it that Name, because they were overjoy'd with their Success; but *La Croix* ascribes it to the agreeable Prospect it gives to the Mariners when they see it at a Distance; and Admiral *Columbus* says, 'tis a wretched dull Place. The former places the N. End 8 Leagues from the Island of *Sal*, and the S. End but 7. He observes, 'tis easy to distinguish it a great Distance at Sea from *Sal* by several white Rocks which lie along the N. Coast, whereas the Island of *Sal* has none on that Side. He says, 'tis also higher than that of *Sal*, and 20 Leagues in Compass. The E. Side runs for most Part from N. W. to S. E. and is full of Downs; but farther within the Island there are Hills. There's a long Chain of Shelves and Rocks from the N. End towards the N. E. and the N. E. and by E. which run for half a League, or as some say a whole League, into the Sea, and have occasion'd divers Shipwrecks. There's another Shelve which may be discover'd by the Stones above the Water, and runs from the S. Point of the Island towards the E. and the E. by N. E. a League and a half beyond that Point. The best Road and Harbour of all the Island has 15 or 16 Fathom Water on a sandy Bottom, and lies under the S. E. Point, where the Coast runs from E. N. E. to W. S. W. The *Sansons* say, it abounds with Salt as well as *Sal*, *Mayo*, and *St. Jago*. Admiral *Columbus* anchor'd in a Chanel near a small Island on the W. Side on't, where the Inhabitants had 6 or 7 Houses for Lepers, who he was told were cured here partly by the Goodness of the Air, and by eating Tortoises, and anointing with their Blood; but that those who are born so, are longer a curing. He says, this Island is very barren, but abounds with Goats and Tortoises, which, because the Shores are all sandy, come hither in *June*, *July*, and *August*, to sleep and lay their Eggs. The People pursue them in the Night along the Shore with Lanterns, and find them by their Track, for their coming so far tires them, so that they sleep, and are daily surprised and turned upon their Backs, as formerly mentioned; after which they let them lie till the Morning, (for they cannot recover their Feet) and then go and chuse the biggest, and let the least go. They have no Springs, but Wells of thick brackish Water. The Owner and four more, who had Charge of the Island for the *Portuguese*, had no Employment but to kill and salt Goats to send into *Portugal*, of which 'twas said there were then such Multitudes on the Mountains, that some Years they killed as many as amounted to 3 or 4000 Ducats, and that they all came from 8 Goats carried thither by *Rodrick Alfonso*, the Proprietor of the Island, and Secretary of the King of *Portugal*'s Customs. He adds, that the Hunters are often 4 or 5 Months without any Provision, except Goats Flesh and Fish. M. *Renefort* says, 'tis a very long Island, and that when he was here, the low Lands were only inhabited by some *Portuguese* Shepherds that kept Goats. *Leguat* says, 'tis as dry and barren as *Sal* Island, and more mountainous.

7. MAGO, MAI, or *St. MAGO Island.*

'Tis reported in Sir *Francis Drake*'s Discoveries, that good Store of dry'd Goats us'd to be made ready here every Year for such of the *Portuguese* Ships as called there, and that there are Mountains on it three Days Journey in Length. Part of it is well cultivated,

Digitized by Google

tivated and fruitful, and lovely Grapes are in their Prime here about *January*. It lies in the Torrid Zone, and has the Sun twice a Year in its Zenith, so that they have two Summers in a Twelvemonth. It abounds with Coco-Trees, wild Hens, and Salt, which the Sea throws up in great Quantities upon the Land, and the Heat of the Sun condenses; after which the People gather it in Heaps, and sell it to their Neighbours. Admiral *Middleton* says, that the N. and N.N.W. Part of *Mayo* is all very bad and foul Ground, and that 'tis dangerous riding there for Ships. He adds, that full North from the high Hammocks, there's a great Ledge of Rocks from the Land 5 or 6 Miles off, and 20 Fathom Water a Mile without them. Sir *John Narborough* says, it appears high and craggy to the E. Part, but low to the N.W. and that 'tis 18 Leagues S. by W. from *Bonavista*. The Road of Anchorage is a Mile from the Shore, in 7 Fathom Water, sandy Ground, the N. Point of the Road bearing N.N.W. half a Point to the W. and the S. Point of the Road a Mile and a half S.E. He says, there are craggy Rocks near the Shore to the S. of the Road, but that 'tis low and sandy to the N. that the Road lies in the N.W. by W. Part of the Isle, in a sandy Bay, a Bow-shot from the Shore, and that there's a Salt Pond in the flat Grounds, where he saw 20 Tuns of Salt. He adds, that he caught here abundance of Mullets, with some Cavalle, Silver Fish, *&c.* which they split, pickled and dry'd; and that they bought several Goats of the Inhabitants at half a Piece of Eight *per* Head, and Cows at 6 Pieces of Eight each. They hunt the Goats with Dogs. He places the Road 9 Leagues N.E. from Port *Praya* in *St. Jago*. *Dampier* places it 40 Miles E. by S. from *St. Nicholas*, and 4 or 5 Leagues E. of *St. Jago*. He says, the Island is better stocked with Beeves and Goats than the rest, and that the Natives would not suffer the *English* of his Company to land, because not long before, one Captain *Bond* of *Bristol* carried the Governor and chief Inhabitants aboard, and made them send ashore for Cattle to ransom their Liberties, yet after that sailed away with them. This Island is but small, and the Coast full of Shoals; yet our Author says, it has a great Trade in Salt and Cattle. The Tortoises lay their Eggs here in the wet Season in *May*, *June*, *July*, and *August*. The Natives plant Corn, Yames, Potatoes, and some Plantanes, and breed a few Fowls, but are very poor, tho they live better than any others of Cape *Verd* Islands, except *St. Jago*. *Dampier* says, the Road lies in the Leeward Part of the Island, in 14 Fathom clean sand, and smooth Water. He places the Island in N. Lat. 15. makes it roundish, and 7 Leagues in Compass. He says, that those who come here to lade Salt, take it up as it kerns, and lay it in Heaps. The Inhabitants are Negroes, descended from the *Africans*, whom they resemble. As they are Subjects to *Portugal*, they follow their Religion and Language; but they have Priests and a Governor of their own Nation. Their Fruits are only sorry Figs and Water-Melons; and their best Land Animals, Asses, Goats, and wild Horses. Among other Fish, here are Dolphins, Bonettas, Snappers, Salmon, Trout, and Garfish. It has many small rocky Points shooting out a Mile or more into the Sea, and 'tis said there are dangerous Shoals on the N. and N.W. Side that lie farther off at Sea. There are two Hills of a considerable Height on the Island, one pretty bluff, the other peeked at Top. The rest of the Island is pretty level, and a good Height from the Sea. The Shore clear round has sandy Bays between the above-mentioned rocky Points. The Salt Pont lies in a large sandy Bay and Sand-Bank 40 Paces wide, and two or three Miles along the Shore. 'Tis two Miles long, and half a Mile wide; but above half on't is commonly dry, except the N. End of it, which is deepest, and never wants Water, but produces Salt all the dry Season from *November* to *May*. In the Spring Tides, the Salt Water works in there from out of the Sea thro' a Hole in the Sand-Bank like a Sluice, and fills the Pond more or less, according to the Height of the Tides. If there is any Salt in the Pond when the Water bathes in, it presently dissolves; but then in two or three Days after, it begins to kern, till all or most Part is congeal'd, or till a fresh Supply comes in again from the Sea. *Dampier* says, he was told the Water never works in but at the New Moon Spring-Tides, and 'tis observed that the

Salt kerns only in the dry Season, contrary to the Salt Ponds in the *West Indies*, the Reason of which he leaves to the Judgment of Philosophers. The *English* he says have commonly a Man of War here to guard their Vessels that come hither to take in Salt for *Newfoundland*, of which he was told that in some Years there have been no less than 100, and it costs them nothing but the Labour to rake it together, and wheel it out of the Pond, except the Carriage thence to the Frape-Boat, (so called by the Seamen because 'tis girded with Ropes) whereby 'tis conveyed aboard, which is very cheap, and performed by Mules, which the Inhabitants lade and drive themselves, for they have scarce any other Employment to live by. The Pond is not above half a Mile from the Landing-place, so that the Asses make a great many Journies in a Day, and they have a set Number of Turns for both Forenoon and Afternoon, which the Owners will not exceed. The Boat which lies to take in the Salt is made for the Purpose, with a Deck reaching a third Part of the Boat from the Stern, and a Bulk head that rises two Foot above the Edge of the Deck, all very well calked. The Use of it is to keep the Waves from dashing into the Boat, when it lies with its Head to the Shore to take in the Salt, because otherwise the great Sea which commonly runs here would break in over the Stern, and soon fill the Boat. To keep the Boat thus with the Head to the Shore, and the Stern to the Sea, there are two strong Stantions set up, one at the Head, and the other in the Middle of the Boat against the Bulk-head, and a Foot higher, and there's a Notch cut in the Top of each big enough for a small Rope to lie in, one End of which is fastened to a Post ashore, and the other to a Grappling or Anchor off at Sea, to hale the Boat in and out, while the Stantions keep her fast, so that she cannot swing to either Side when the Rope is hal'd tight, otherwise the Sea would fill or toss her ashore: But to prevent this, there are two Sets of Rope more, the first of which going athwart from Gunnal to Gunnal, binds the Sides of the Boat so hard against the Ends of the Rowers Benches when they are laid, that the Boats Sides can't fall asunder, nor the Benches be crush'd inwards. There are commonly but two of these Ropes dividing the Boat's Length as they go across the Sides into three equal Parts. The other Set of Ropes are more in Number, and so placed as to keep the Ribs and Planks from starting off; for which Purpose there are Holes made thro' the Edge of the Keel that runs along the Inside of the Boat, thro' which these Ropes pass along the Ribs, and are fasten'd to them by Rattans or small Cords twisted close about both Ropes and Ribs up to the Gunnal, by which Means, tho' several of the Nails or Pegs of the Boat should be shaken out, yet the Ropes of both Sets would hold her together, especially with the Help of a Rope quite about the Gunnal on the Outside. Two Men suffice to hale the Boat in or out, and to take in the Salt and put it out again. As soon as the Boat is brought near enough to the Shore, one stands by the Bulk-head, who takes a sudden Turn with the Hozer round the Bulk head Stantion, which stops her fast before the Sea can turn her aside; and when they have got in their Lading, they hale off to Sea till they come a little without the Swell, where they remove it into another Boat that carries it aboard the Ship. *Dampier* observes, that without such a Frape-Boat, there would be bad Landing here at any time, because of the great Sea which falls on the Shore, tho' 'tis commonly very smooth in the Road, so that he advises every Ship that comes here to bring, make or borrow, such Boat of some other Ships here, because the Inhabitants have none. We have been so particular in the Description of these Frape-Boats for *Dampier*'s own Reason, *viz.* because 'tis of the same Use in any Places where a great Sea falls in upon the Shore, as it does especially in many open Roads in the *East* and *West-Indies*. We come now to its Natural History.

He tells us, that on the sandy Bank that pens in the Salt Pond, grows a Sort of Silk Cotton, and a Plant that runs along the Ground, with thick broad Leaves branching out like a Vine. The Silk-Cotton grows on tender Shrubs 3 or 4 Foot high, in longish Cods as big as an Apple, which when ripe open at one End, when the Cotton breaks forth, and parts by degrees into 4 Quarters; but the Cotton is only fit for stuffing Pillows, or the like. *Dampier* says, he laid some of the Cods in a Chest before they

Digitized by Google

they were quite ripe, and that in two or three Days they threw out the Cotton; that he bound others so fast, that the Cod could not open; but a few Days after, when he slacken'd the Strings, it burst, and the Cotton flew out like the Pulp out of a roasting Apple, till all was exhausted. He says, the right Cotton Shrub grows here also, but not on the Sand Bank. There are some Bushes of it near the Shore, but the most on't, which is but little, is planted in the Middle of the Isle, where the Inhabitants live chiefly by making Cotton-Cloth. There are also other Trees within the Island, but none on the Shore, except a few scattering Bushes against the Sides of the Hills. The Soil is generally sandy and barren, without any fresh Water, except Showers in the wet Season, which run off as fast as they fall, and a small Spring in the Middle of the Island running thro' a Valley, where the Inhabitants have three small Towns, with each a Church and Padre, and 6 or 7 Miles from the Road. *Pinose* is said to be the chief, and to have two Churches, *St. John*'s the next, and *Lagoa* the third. The Houses are very little and mean, and built with Fig-Tree, for they say here are no others fit for Building. The Rafters are a sort of wild Cane. Among other Fruits, they have Callavances (a sort of Pulse like *French* Beans) and Pumpkins for ordinary Food. Their Fowls are Flamingo's, great Curlews, and abundance of *Guinea*-Hens, which the Natives call *Gallinas Pintadas*, or the painted Hens. They seem to be much of the Nature of Partridges. They are bigger than our Hens, have longer Legs, and run faster. They can fly too, but not far, because they have heavy Bodies, but short Wings and Tails. They have thick, strong, sharp Bills, and long Claws. They feed either on Worms which they scrape out of the Ground, or on Grasshoppers. Their Feathers are so prettily speckled with dark and light grey Spots, that they look more beautiful than Birds of finer Feathers. Their Necks are small and long, and their Heads but little. The Cocks have a small Rising on their Crowns like a Comb, which is very hard, and of the Colour of a dry Walnut-Shell. They have a small red Gill on each Side of their Heads strutting down like Ears; but the Hens have none. They are very hardy, and so strong, that one can't hold them. They are good tender Meat, and in some the Flesh is extraordinary white, but in others black, yet both are sweet Food. The Natives run them down with Dogs, and sometimes there are 2 or 300 of these Fowls in a Company. Our Author says, some of them throve well aboard for 16 or 18 Months, but then began to pine; and that when they are taken young, they'll grow tame. Their other Fowls are Pigeons and Turtle-Doves, Miniota's, a sort of Land Fowls as big as Crows, of a grey Colour, and good Food; Crusia's, another sort of grey-colour'd Fowl almost as big as a Crow, which are only seen in the Night, and said to be good for consumptive People, for none else eat them; and Rabeks, a large grey sort of eatable Fowls; with long Legs and Necks like Herons, besides many small Birds. They had abundance of Bulls and Cows; but *Dampier* says, the Pyrates have carried off most of them, as well as many of the Inhabitants; and not long before he was there they took away the Governor, and carried him about a Year or two; and then restor'd him. There are large Mullets here a Foot and a half or two Foot long, besides Porpoises and little Whales, that commonly visit the Road every Day. The People of both Sexes are of a yellowish Complexion, but lusty, well set, and fleshy, and their Children round and plump, notwithstanding the Barrenness of the Island. Our Author was told there were about 230 Souls on it when he was here, and there was a Negro Governor, who had his Patent from the *Portuguese* Governor of *St. Jago*. He praises him for his Sense and Civility, and says his Subjects are generally a good sort of People. He expects a small Present from every Commander that lades Salt here, and is fond of going aboard their Ships. In the Salting Season, which is his Harvest, he spends most of his Time with the *English*, on whom the Islanders place their chief Dependence for Trade, for they have no Vessels of their own, and scarce any come hither but the *English*, who give them Victuals, some Money, or old Clothes, for their Salt, yet some of them go almost naked. They hunt Turtles by Night, as well as those of the other Islands, and have small Huts about the sandy Bays

Digitized by Google

for Shelter from Rain and for Sleep; but when the Turtle Season is over, they have little else to do besides hunting *Guinea* Hens, and managing their small Plantations. When any of them are desirous to go over to *St. Jago*, they get a Licence from the Governor, and desire Passage in some *English* Ship that is going thither, as they are generally obliged to do for fresh Water, for there's none here fit for drinking. He adds, that several of our Ships come hither to lade Asses for *Barbadoes*, and our other Plantations. *Dampier* gives the View of this Island at several Bearings, for which we refer to his Book. Captain *Roger's* says, the People have Salt enough to load several Thousand Ships in a Year if they had Vent for it, and that they make fine Marroquin Leather of their Goats-Skins. *Struys* places it but 8 or 9 Leagues from *Bonavista*, and makes it the least of all the Cape *Verd* Islands. He says, that on the N. Side on't there's a Plain above a League in Breadth, and a great Sand-Bank which runs very far into the Sea, besides another a League farther W. At the Foot of a small Point of Land, a little N. from the S. W. Road, there's a Village of 10 or 12 Houses, where Foreigners may have some small Refreshment. All the Verdure of the Country consists in some Herbs that grow between the Rocks. Their Figs are very ill tasted. There are wild Horses, Partridges, Geese, and other Fowls, which are unknown to *Europeans*. Great Part of the People's Employment is Hunting and Fishing. He adds, that in many Pits there's reddish Salt, which is form'd partly by the Water of the Sea, and partly by some subterranean Springs. When the Pits are full, they stop up the Holes.

La Croix says, its W. Coast runs from N. to S. and that which faces the S. W. from N. W. and by N. to S. W. and by S. There is good Angling below the Island in 25 Fathom Water upon the Brink of the Shore when the Tide rises; but there's none in 25 Fathom. The Pond he says is about the Height of a Man, Waste deep, and receives a Brook of fresh Water, which runs down three Leagues above from the high Grounds. The Water is clear, but not very wholesome, because 'tis brackish, especially when 'tis a very dry Season, and the Water of the Pond is sunk, at which Time there's good Fishing for Breams. There are so many Goats, that they export above 5000 Skins every Year. Their Partridges are as big as Pheasants, with white and black Spots. The Island is inhabited by Whites and Negroes, which are commonly sent hither every *November* from *St. Jago*. He tells us, that in 1505 here were 225 Souls, but in 1628 no more than 50, without any Women. They have their Meal and Wearing Stuffs from *St. Jago*, and give the Inhabitants of that Island Notice how many Ships they have in the Road by lighting Fires.

8. *St. JAGO* or *St. JAMES's Island.*

Sir *Francis Drake* reports, that 'tis a fair large Island, inhabited by *Portuguese*, and that there are Mountains in it possessed by the *Moors*, who have fortified themselves ever since they fled hither from Slavery. Sir *Richard Hawkins* says, 'twas plunder'd twice by the *English*, *viz.* under Sir *Francis Drake* in 1585 with less than 1000 Men, and under Sir *Anthony Shirley* in 1596, and once by the *French* in 1582. *Mandelslo* says, 'tis the chief of all the Cape *Verd* Islands, and and that it has a Town of its own Name, which is the ordinary Residence of the Governor and Archbishop, whose Jurisdiction extends not only over all these Islands, but such of the *African* Coasts as belong to the *Portuguese*. Admiral *Columbus* says, the Island is unhealthy, and that there was such a thick Fogg all the Time he was here, which was the four first Days of *July*, that he never saw the Sky nor any Star, insomuch that three Parts of the Inhabitants were sick, and they had all a base Colour. *Le Blanc* says, it has been in the Hands of the *Portuguese* ever since 1446, where they have a well fortified Town and a Bishoprick stil'd *Civitad*. He makes it 60 Miles long, and 36 broad, and says, they have no Rain but in *September* and *October*, which is their Winter. The Vallies yield choice Melons all the Year round, with abundance of Dates and Sugar-Canes, all Sorts of Flesh, Fowl, and Venison, and good Horses. 'Tis inhabited by People of all Nations; and because the Air is unwholesome, they transport those that are infirm to an Island two Leagues

Digitized by Google

Leagues distance called *Praya*, of which by and by. *Struys* makes it the biggest of all the Cape *Verd* Islands, 45 Leagues from the S. E. to N. W. where longest, 10 where broadest, and 95 in Compass. He says, it has a fine River called *Coren*, which yields a lovely Prospect, and is planted on both Sides with Coco's, Oranges, Limons, Pomegranates, Figs, and other Fruit-Trees, and some Cedars. It also abounds with Cotton, Rice, Maiz, or *Turkey* Wheat, and all Sorts of other Fruit, and as much Cattle as *Mayo*. *La Croix* makes it but 12 Leagues in Length, and places it 25 S. S. W. from *Sal*. He says, *European* Herbs and Plants brought hither from *Portugal* thrive very well if the Seed be renew'd every Year. They have no Vines, but have all their Wine from *Lisbon*. The *Sansons* say, they abound most with Goats; that they bring forth three or four at a time every four Months; and that their Flesh is very fat and tender. *Luyts* says, 'tis more populous than the other Islands; that here are vast Numbers of Tortoises, and an incredible Quantity of Salt. *Heylin* says, 'tis but 7 Miles long; and that thô 'tis rocky and mountainous, it has several fine Vallies.

But the best Account we find of this Island is given by Mr. *Ovington* and Captain *Dampier* as follows:

The former says, that when he was here, which was in 1689, the Island was very dry and barren, for he was told they had not one Shower of Rain in three Years before. The Island is not so pleasant as *Madeira*, nor so mountainous; and the Wine drunk here, which is but little, is imported from thence. Among other Fruits, they have a few Vines, Coco-Nuts, and Bononoes, better than those at *Madera*. They had few Cattle, but Plenty of Fowl, which, with other Commodities, they sold for old Clothes, for the *Portuguese* here are so vain as to strut in the Sailors cast-off Garments, and so thievish, that while one or two of them hold a Man in Discourse, another shall steal his Hat or his Sword; and when they have an Opportunity, they'll strip Strangers naked. They know not how to make Butter or Cheese, so that a Couple of Cheese, a Sea-Bisket, 12 Stock-fish, and two Dozen of Poor Jack, were an acceptable Present to the Governor, who was a *Romish* Prelate, that presided in all Affairs both Civil and Ecclesiastical, and admitted the native *Africans* to officiate in their Oratories and Convents. Most of the Inhabitants are Negroes, transported hither from *Africa*, and converted to the *Romish* Faith. Their Habit is a sort of *Indian* like Stuff wrapped carelessly about their Middle, and a thin Stuff over their Breasts and Shoulders; but the rest of their Body is naked. The Women here are very loose, and easily led away by the Sailors, whose Extravagancies of this kind have given Rise to an *English* Proverb us'd in *India*, *That in sailing from hence thither, they leave their Consciences on this Side the Cape; and in returning from thence to* Europe, *they leave them on t'other Side.*

Captain *Dampier* places it 5 Leagues W. of *Mayo*. He was told they make a great deal of Wine here like that of *St Nicholas*. He says the Natives, for want of Boats to carry their Salt from one Island to another, are forced to buy it of Strangers, and that he truck'd it with them for Fowls and Maiz, which the Governor order'd them to bring by a Cryer; but that they won't part with their Cattle without Money. The People are generally black, or at least of a mix'd Colour, except the Governor, Bishop, a few of the chief Gentry, and some of the Padres. He owns, that the People about Port *Praya* are thievish, but says that those of *St. Jago* are orderly, because they live under the Governor's Eye; but they are generally poor, and have little Trade; yet besides chance Ships of other Nations, a *Portuguese* Ship or two come hither every Year in their Way to *Brasil*, which sell them a few *European* Commodities, and take off their chief Manufactures, *viz.* strip'd Cotton-Cloth, which they carry to *Brasil*. Another Ship comes hither from *Portugal*, and returns with Sugar, for 'tis said there are several small Sugar-works on the Island, from whence they send home near 100 Tun every Year; and they have so much Cotton up in the Country, that besides what they wear themselves, they send a great deal to *Brasil*. Among other Fruits, here's abundance of Plantanes, Limes, Guava's, Quinces, Custard Apples, Papahs, *&c.* He says, the Custard Apple is as large as a Pomegranate, and like it in Colour. The Outside Husk is for Substance between the

Shell

Digitized by Google

Shell of a Pomegranate and the Peel of a *Seuil* Orange, yet ſofter than the latter, and more brittle than the former. The Coat is beſet round with ſmall regular Knobs, and the Inſide is full of a white, ſoft, ſweet Pulp, like a Cuſtard in Colour and Taſt, from whence our Author thinks it had the Name. In the Middle there are a few black Kernels, but no Core. The Tree is as big as a Quince-Tree, with long, ſmall, and thick-ſet ſpreading Branches. The Fruit grows upon a ſlender tough Stalk 9 or 10 Inches long, and hanging down with its Weight. One large Tree ſeldom bears above 20 or 30 Apples. He obſerves, that this Fruit grows in moſt Countries between the Tropicks, and in both the *Indies*, as does alſo the Papah, which he thus deſcribes. 'Tis as big and hollow as a Musk-Melon, and like it in Shape and Colour; but in the Middle there's a Handful of blackiſh Seeds, of the ſame Size and Taſt as Pepper-Corns. The Fruit is ſoft and luſcious when ripe; but while green, 'tis hard and unſavoury; tho' even then, when boil'd and eaten with ſalt Pork or Beef, it ſerves inſtead of Turneps. The Tree is 10 or 12 Foot high, the Body near the Ground a Foot and a half or two Foot diameter, and tapering to the Top without any Branches, but only large Leaves growing immediately upon the Stalks from the Body. The Leaves are roundiſh and jagged, and their Stalks are longer or ſhorter as they are nearer or farther from the Top. They begin to ſpring out of the Body of the Tree at 6 or 7 Foot high from the Ground, the Trunk being bare below, but above that the Leaves grow ſtill thicker and larger towards the Top, where they are cloſe and broad. The Fruit grows only among the Leaves, and in moſt Plenty where they are thickeſt, ſo that towards the Top of the Tree the Papahs are as thick as they can hang one by another; but then lower down, where the Leaves are thinner, the Fruit is larger; and at the Top, where they are thick, 'tis no bigger than a Turnep, thô of the ſame Taſt as the others.

Dampier adds, that this Iſland abounds with the ſame Beaſts, Fowls and Fiſh, as *Mayo*, particularly Bullocks, for which they asked him 20 Dollars apiece; Horſes, Aſſes, Mules, Deer, Goats, Hogs, and black fac'd long tail'd Monkeys, Cocks and Hens, Ducks, wild and tame *Guinea* Hens, Parakites, Parrots, Pigeons, Turtles, Herons, Hawks, Crab catchers, (of which there's a large Sort called *Galdens*) and Curlews. Captain *Rogers* ſays, it produces ſome Indigo and Tobacco, which they ſend with Goats-Skins and others to *Lisbon*.

The chief Places here are, 1. *Praya*. *La Croix* ſays, 'tis a *Portugueſe* Word to ſignify the Shore; that 'tis very commodiouſly ſituate, and naturally fortified by a Mountain on each Side on't, and as others ſay upon a riſing Ground, encompaſſed with two Rivers, which fall into the Sea, and form two Bays; the firſt of which, called *Porto Praya*, is large enough for 100 Veſſels to anchor in, in 14 Fathom Water, beyond the Reach of Cannon from the Shore, and behind an Iſland which ſhelters it from the Winds. *Le Blanc* ſays, it lies in a fine Climate, and that the other Iſlanders affect to land here, becauſe the other Ports are full of Sands. Sir *John Narborough* places this Road 9 Leagues S. W. from *Mayo*. He ſays, that called Port *Praya* is no Port, but only a round Bay, with ſteep Cliffs on the E. Side, and a Hill in the Bottom, on which ſtands a mean Caſtle, furniſhed with only 4 Cannon, and that there's another on the Top of a Hill on the E. Side which has but three. He adds, that the N. W. Side of the Bay has a gravelly ſandy Shore, and a fine Grove of Coco-Trees; that a Brook of good freſh Water runs thro' the Valley into the Sea; that there's a little Iſland cloſe to the Shore near the W. Part of the Bay, which yields very good Paſture; and that tho' a Man of War may venture into the Harbour without any Danger from the Forts, yet Fireſhips may ſoon deſtroy a whole Fleet here, for every Day blows a freſh Gale, and there are but two Points of Land whereby one may fetch into any Part of the Bay, which lies open to the Sea from the E. and Southerly to the W. S. W. *Dampier* ſays, it lies on the E. Side of the Iſland, and in Time of Peace is ſeldom without Ships, which touch here for Water and Proviſions, as do the *Engliſh*, *French* and *Dutch*, bound to the *Eaſt-Indies*, or to the Coaſt of *Guinea* and *Surinam*, and the *Portugueſe* to *Braſil*; but few Ships call here in their Return to *Europe*, nor do ſo many *Engliſh* call in their Paſſage to the *Eaſt-*

Digitized by Google

Indies as formerly. When Ships are here, the Country People bring down their Commodities to ſell to Seamen and Paſſengers for Shirts, Drawers, Handkerchiefs, Hats, Waſtcoats, Breeches, or almoſt any ſort of Cloth, eſpecially Linen.

2. *St. Jago. Mortry* ſays, it lies in the Form of a Triangle, and has two rocky Mountains on the E. and W. Sides, the Tops of which are fortified. The main Sea lies on the S. Side, and a Valley on the N. between the two Mountains, which growing narrower next the Town, is not above 240 Paces over. A Rivulet of freſh Water runs in the Middle on't, which makes a Pond near the Sea to water the Ships. But farther from the Town the Valley is broader, and well planted with Gardens, Orchards and Vineyards, full of Limons, Oranges, Sugar-Canes, Cocoes, Plantans, Potatoes, Cucumbers, Onions, and Garlick. He adds, that Sir *Francis Drake* took it without Reſiſtance, but was forced to leave it in fourteen Days, becauſe his Men fell ſick of Calentures. *Dampier* places it in the S. W. Part of the Iſland, N. Lat. 15. and ſays, the Entrance to its Harbour is ſubject to many uncertain Flaws of Wind. It ſtands ſcattering againſt the Sides of the Mountains above mentioned. He makes the Valley 200 Yards wide againſt the Sea, but ſcarce 40 within a quarter of a Mile higher. In the Valley by the Sea there's a Street of ſtraggling Houſes on each Side, and a Run of Water in the Bottom, which falls into a fine ſmall Cove or ſandy Bay, where the Sea is commonly very ſmooth, ſo that there's always good Watering and Landing here, tho' the Road be rocky and bad for Ships. Juſt by the Landing-place there's a ſmall Fort almoſt level with the Sea, where there's a conſtant Court of Guard, and there's another on the Top of the Hill above the Town, which, by the Wall that is to be ſeen from the Road, ſeems to be a large Place. 'Twas mounted with Cannon, but our Author knew not how many, nor could not ſee for what Uſe, unleſs for Salvo's. He adds, that the Town contains 2 or 300 Houſes, all built of rough Stone, with a Convent and a Church; but he ſays the Road is one of the worſt that he ever was in, for there's ſcarce clean Ground enough for three Ships. *Du Pleſſis* ſays, there's no Town here of this Name, and with *Heylin* calls it *Ribeira Grande*. The latter ſays, when 'twas plunder'd by the *Engliſh*, they found great Store of Meal, Wine and Oil. *Baudrand* ſays, it lies at the Mouth of a River, capable of containing the largeſt Ships. The *Sanſons* and *M. Fer* ſay, *Ribeira* contains about 500 Houſes, and *Du Pleſſis* makes it the Capital of the Iſland, and the Reſidence of the *Portugueſe* Governor and Biſhop. Captain *Rogers* ſays, it lies towards the W. and has a good Harbour, which *Struys* tells us is very ſecure, becauſe of its Situation between two Mountains, and that a River runs in the Middle to the Sea with a Mouth, which is about a Bow-ſhot in Breadth. *Dampier* gives ſeveral Views of this Iſland, for which we refer to his Book.

9. *FOGO*, *FOGHO*, or *PUEGO*, or the *Iſland of Fire.*

Sir *Francis Drake* ſays, 'tis inhabited by the *Portugueſe*, and that on the N. Side on't there's a Volcano that is continually ſending out Smoke and Flame. Sir *Richard Hawkins* ſays, the Flames are ſeen 20 Leag. off at Sea in the Night-time. Admiral *Columbus* ſays, the S. Side is high Land, and looks at a Diſtance like a great Church, with a Steeple at the E. End. He adds, that the Volcano is a vaſt high Rock, which ſends forth much Fire before the E. Winds riſe. *Struys* places it 12 Leagues S. W. of *St. Jago*, and ſays, that it has a little Fort at the Foot of a Mountain on the N. W. for the Defence of ſuch Ships as anchor in the neighbouring Harbour, which is not very commodious, becauſe of the Rapidity of the Current. The eaſieſt Way to come at the E. Side on't is to go about by the N. The Iſland is ſubject to great Whirlwinds and Tempeſts, and the Water is every where ſo deep, that there's no anchoring in any Place except near the little Fort abovementioned. *Le Blanc* ſays, there's as good Wine in this Iſland as at the *Canaries*. *La Croix* places it in Lat. 14. 20. *Luyts* ſays, 'tis not far E. from *Bravo*. *Heylin* ſays, that when Sir *Anth. Shirley* took this Iſland in 1595, the Flakes of Fire fell ſo thick upon his Ship, that the upper Deck was cover'd with

Digitized by Google

with Ashes. Mr. *Ovington* says, the burning Mountain sends forth vast Numbers of Pumice-stones, which swim upon the main Ocean, and are carried by the various Currents to several distant Places, and some to *St. Jago*. He says, the Volcano is above two Stories high in the Clouds. *Dampier* says, the Inhabitants live at the Foot on't near the Sea; that they have some Goats, Fowls, Plantanes, Coco-Nuts, *&c.* and that their Subsistence is much the same as in the other Islands.

10. *BRAVA, BRAVO, BRANO,* or *BRAMA.*

Sir *Francis Drake* says, 'tis a delightful Island on the S. Side of *Fogo*, well planted with flourishing Trees, and refreshed with cooling Streams; but the Sea is so deep here, that there's no Anchorage for Ships. Nevertheless Sir *Richard Hawkins* says, the best Watering-place of all the Islands is in the W. Side of this, where there's a great River. *Struys* places it 4 Leagues S. W. from *Fogo*, and says, 'tis in a manner desert and uncultivate; but that it has a Watering-place on the S. E. Side, better than that on the W. which is 15 Fathom deep, so that the greatest Vessels may come to the Shore without Danger. Above the Harbour there is a populous Village, and a pleasant Ermitage. He adds, that their chief Fruits are Figs, Mulberries, Melons, and Maiz, but fewer Cattle than in the two others. *Mosquet* says, it bears Tobacco, abundance of Mace, and yields sweet Water, dry'd Fish, and other Refreshments, and that 'tis very mountainous. *Le Blanc* says, 'tis full of Venison and wild Beeves, with thick and tough Hides.

V. *The* Islands *in the Gulph of* GUINEA *or* St. THOMAS, *between* Guinea *and* Lower Ethiopia.

The chief are, 1. *FERNANDO POO*, or *FERDINAND PO*, *PAO* or *POI*.

Harris says, this and the other Islands here were discovered in the Reign of *Alphonsus*, Successor to King *Henry* of *Portugal*. *Purchas* ascribes the Discovery of this Island to one *De Poo* in 1472, who called it after his own Name. *Luys* says, it lies nearest to the Continent, and is larger than the *Prince*'s Isle, but much of the same Nature, and has several Villages with a Castle. He observes, that the Possession of these Islands and other Places in the Kingdom of *Congo* has given the King of *Portugal* an Opportunity to stile himself King of the hither Side of the *African* Ocean. *La Croix* says, 'twas discovered by *Fernand Lopez*, a *Portuguese*, who called it *Ilhas dos Formosas*, or the Fair Isle. He places it in N. Lat. 3 ½. between the high Country of the *Ambisis* and the River of *Camarones*, about 4 Leagues and a half from the Continent, between which the Bay is very navigable. He makes it larger than *Prince*'s Island or those of *St. Thomas* and *Annobon*, or at least of the same Bigness as *St. Thomas*. He says, 'tis very high, and produces Mandihoca, which they grind in Hand-Mills; Tobacco, Rice, and Fruit-Trees. The Inhabitants are wild and faithless, and govern'd by 7 Kings, who spend most of their Time in War, and allow no *Europeans* to anchor here for Traffick, but only for Wood and Water. *Du Plessis* says, it lies a little to the N. of *Prince*'s Island; that 'tis 26 Leagues in Compass; and that the Air, Soil and Government, are the same as in the others. *Morden* says, 'tis not inhabited, but produces Fowls, Wild-Beasts, and Fish.

2. *PRINCE's Island*, or *DEL PRINCIPE.*

Oliver Neort places it N. Lat. 1 ½. He and his Company were surprised here by a Body of *Portuguese* in Ambush, and most of them made Prisoners, after Pretence of Friendship; but the *Dutch* revenged this Treachery, by burning all their Sugar-Houses. *Purchas* says, it was first discovered about 1472 by *Sequeira*, together with the Island of *St. Thomas*. *Heylin* says, it had this Name because its Revenues were allowed to the Prince of *Portugal*. He places it N. Lat. 3. 120 Miles N. E. from *St. Thomas*, and almost as much from the Continent. He says, 'tis very fruitful, and that 'twas taken for the *Dutch* in 1598 by *Julian Gerchogen*, but soon aban-

Digitized by Google

abandon'd. *Luyts* says, 'tis somewhat long, and abounds with Sugar, and that it has a considerable Town, with some Villages. *La Croix* says, 'twas called *Prince*'s Island because a *Portugueſe* Prince firſt diſcovered it. He makes it the leaſt of all the Iſlands in the Gulph, and places it N. Lat. 2. 38 Leag. from the Continent, and 24 N. from *St. Thomas*. He ſays, it has a much more wholeſome Air than the latter, and a Village of 200 Houſes on the Shore, encompaſſed with a Parapet 3 Foot deep, and defended by 5 Cannon, which the Inhabitants took out of a Veſſel that was wrecked on their Coaſt. The whole Iſland is covered with Trees, eſpecially Oranges, Limons, Bananas, Cocoa-Nuts, Sugar-Canes, a few Vines, and the like. There is Cotton, of which the Women make Callicoes for their own Uſe, and Mandihocs, which they grind to Meal. They have Hogs, Hens, and River and Salt Fiſh. The Inhabitants in our Author's Time were 30 or 40 *Portugueſe Mulatto's*, *Negroes*, and about 3000 Slaves, who were employed in the Sugar-Mills, and in planting Rice, Tobacco, Millet, and other Neceſſaries. The *Sanſons* ſay, that among other Fruits it has Ginger. *Du Pleſſis* places it N. E. from that of *St. Thomas*, and ſays, that the *Portugueſe* here are long liv'd. Mr. *Boſman*, whoſe Letters we quoted ſo often in our Account of Guinea, ſays, that at the latter End of the 17th Century, 'twas ſubject to a conſiderable Merchant of *Amſterdam*, till the Diſſention of the *Dutch* themſelves, and the Treachery of the *Portugueſe*, obliged them to quit it. The latter have now a ſtrong Fort here, and have indifferently well Peopled the Iſland, and ſo well cultivated it, that it yields them vaſt Quantities of Proviſions, with which they ſtore their own Ships, and ſell the reſt to others. He adds, that all Ships which go for Slaves touch at ſome of theſe Iſlands for Refreſhments, except thoſe of the *Dutch* Company, which he thinks are not permitted, leſt they ſhould drive a clandeſtine Trade, to the Prejudice of the Company.

73. *St.* THOMAS *or* *St.* THOME,

The chief of all the reſt, and from whence 'tis ſaid this Gulph is denominated. We have already obſerved when and by whom this Iſland was diſcover'd. *Mandelſloo* ſays, the *Portugueſe* gave it this Name, becauſe 'twas diſcover'd on *St. Thomas*'s Day, and that it lies under the Line, in an Air ſo unwholeſome, and ſuch exceſſive Heats, that tho' ſome of the Natives live to 100 Years of Age, yet few *Europeans* exceed 50. The Days and Nights are equal here throughout the Year, and it never rains except in *March* and *September*; but a Dew falls every Night, which renders the Soil very fruitful. When 'twas firſt diſcover'd, Trees were found here with very ſtrait Branches, and formerly it produced 40 Shiploads of Sugar in a Year, but in our Author's Time ſcarce enough to lade 6. Nevertheleſs it yields Wheat, Wine, Millet, Rye, Barley, Melons, Cucumbers, Figs, Ginger, red Parſnips, Cabbages, Navews, Lettuce, Radiſhes, Sage, Beet, Parſley, and all Sorts of Roots, Pulſe, and Pot-Herbs, particularly Muſhrooms with a black Rind; but the Meat is white like the *French* Navew, only it ſhoots forth divers Branches below. The Inhabitants reckon them a Dainty, bake them on the Embers, and then eat them as we do Cheſnuts; but they have a better Flavour. The *Spaniards* have planted Olive, Peach, and Almond-Trees here, which thrive well enough, but bear no Fruit, becauſe of the exceſſive Heat and Moiſture. Here's abundance of Land Creviſſes, which work under Ground like Moles, with great Numbers of Partridges, Quails, Black-Birds, Parrots, *&c.* and the Sea abounds with excellent Fiſh, eſpecially great Whales. There's a Mountain in the Centre of the Iſland, cover'd on the Top with a Cloud, which moiſtens the Trees, and makes them drop Water enough for the Sugar-Canes; and 'tis obſerved, that the higher the Sun mounts above the Horizon, the more Water falls from the Cloud. The Natives are Negroes; but ſuch Foreigners as ſettle here keep their natural Colour to the 3d or 4th Generation. 'Tis affirmed, that the Lice and Fleas, with which the Negroes are peſter'd, never afflict any Strangers.

Le Blanc ſays, 'twas diſcovered by the *Portugueſe* in their firſt Navigation to the E. that it has 50 Leagues of ſound Land; and that it bears little beſides Sugar-Canes, planted by the *Portugueſe*; but the Trees are ever green. They built a Town here call'd

Digitized by Google

Povoaſon, with a Harbour towards the Continent of *Ethiopia*. It was at firſt inhabited by all Nations, who had a free Trade here, but now all pay Tribute, except the *French*, who enjoy the ſame Immunities as the *Portugueſe*, becauſe a *French* Jeſuit was very laborious and ſucceſsful in propagating the *Roman* Faith here. The Natives are ſome white, ſome black, and marry ſtill in their own Colour. The Town is pleaſant, and the whole Iſland full of Sugar-Canes, and conſequently of Flies. In our Author's Time, a Hundred Weight of Sugar here might be purchaſed for 8 Reals; but 'twill not eaſily dry. They exchange it for Wines, Cheeſe, Leather, and Clothes. Their Gardens abound with all Sorts of Herbs and Fruit, except Stone-Fruit. It yields the Root Igname, which is very wholeſome either boil'd or raw. They make choice Diſhes of Millet and Sugar. The Soil is ſtrong, yellowiſh, in ſome Parts reddiſh, and the Dew of the Night ſo moiſtens it, that it never turns to Duſt. They bend their Sugar-Canes to the E. and ſay they then thrive beſt; and they have about 70 Sugar-Mills, which are like that called the *Samaritan* at *Pont-Neuf* in *Paris*. They pour it into great Cauldrons, and when 'tis like Honey they make it into Loaves before 'tis ſtarce dry; but 'tis not ſo ſound nor ſo good as that of *Madera*, tho' they uſe all poſſible Art, and refine it with Cinders. The Blacks fetch Water to ſet the Mills at work from the Plantations, which are at a conſiderable Diſtance. When the Sugar is drawn, they give the Canes to fat the Swine, which makes their Pork well taſted and wholeſome. From the Middle of *May*, to the Middle of *Auguſt* they have E. Winds, which dry their Sugars, otherwiſe they could never do it, for all other Winds are rainy. Their Houſes are good, and built and cover'd with Timber, of which they have great Plenty. The Corſairs bring many Slaves hither from *Guinea* for Sale. Captain *Ribaut Dreppin* took a Veſſel with ſeveral entire Families on board, whom he ſet aſhore, but cauſed two Blacks to hang the Maſter and 5 Mariners. They marry the Slaves among themſelves for Breed, which makes them hereditary Slaves; whereas in the E. at 10 Years end they are made Freemen. They have but one Day in the Week to themſelves, which they ſpend in dreſſing to pleaſe their Miſtreſſes. The *Portugueſe* here, like thoſe of their Nation, affect to have their Slaves rich, and that they ſhould walk with the ſame Gravity as themſelves, and therefore give them 100 or 200 Crowns to buy *Turks* for their Gain and Eaſe. They cauſe moſt of them to be baptized, and to marry together, and give them a Livelihood. They celebrate Feaſts like the *Banks*, by beating of Drums, and ſinging under the Trees. The Slaves chuſe one among them every Year for their Prince to govern at their Meetings, and then they give him a Drum, which he beats in Conſort with Flutes and other Inſtruments, while the Muſicians ogle their Miſtreſſes, and play 1000 apiſh Tricks to them as they dance. They go together to fetch their Prince from his Maſter's Houſe, where they have a Collation. Then they bring him forth decked with Flowers, a Scepter in one Hand, and a Noſegay in the other, and carry him on their Shoulders in a Palanquin to the Dancing-place, where their Miſtreſſes meet them. The Prince dances firſt with his, and then the others follow. The Prince *de l'Amour*, call'd the *Arcadit*, ſalutes his Lady, and then gravely preſents her the Poſie, which ſhe receives, and dances with Smiles. Afterwards they all attend the Prince to his Maſter's Houſe, where, if they are Chriſtians, the Nuptials are conſummated.

La Croix ſays, *Thevet* and others call it *Dame dus Humre*, and the *Barbarians*, *Ponam*; and that the Equinoctial Line croſſes the Town of *Povoaſon* over the great Church. The Iſland is almoſt of a round Figure, about 40 Leagues in Compaſs, 12 broad, and as many in Length. Two Brooks run thro the Town, which lies in the Middle of the Gulph on a Plain in the N. Side of the Iſland. 'Tis of an oval Figure, near half a League in Compaſs, and contains 500 Houſes, all two Stories high. On the Sea-Side 'tis encompaſſed with Stone Ramparts, which the *Portugueſe* Governor cauſed to be built here in 1607; and ordered all that paſſed thro' the Town to bring a Stone for that Purpoſe. Their Timber with which they build their Houſes is white and hard as Oak, and the Bront and Roof are made of Planks inlaid into one another. There

were

were but 3 Stone-Houſes in the Iſland in our Author's Time, and in one of them lived the Governor. There are 3 Churches in the Town, the biggeſt of which is the Cathedral, call'd the *Conception*; the ſecond *Iſabella*, with a Hoſpital join'd to it; and the third *St. Sebaſtian*, which is but ſmall, and lies over againſt a Caſtle of the ſame Name. There are ſeveral others without the Town, as *St. Anthony*'s within two Muſket-ſhots, *St. John*'s a little nearer, that call'd *Matre Dios* a League to the S. E. *Trinity* Church two Leagues to the E. and *St. Ann*'s three to the S. E. *St. Sebaſtian*'s Caſtle has four-pointed Baſtions, and lies on a Point of Land to the N. Side of the Town and Gulph. 'Tis neatly built of hard Freeſtone, and the Walls are 25 Foot high, which, together with its Situation, makes it impregnable, if there be but 100 Soldiers in Garriſon, and all Warlike Neceſſaries, which may be ſafely brought to it by Sea in Yachts. The Iſland is water'd by ſeveral Rivers and Brooks of clear freſh Water, which render the Soil very fruitful, and fall for moſt part into the Sea. The Air is not only exceſſive hot, but moiſt; and 'tis affirmed, that 'tis ſo prejudicial to Foreign Youth brought hither, that they ceaſe growing at their Arrival, and are never no bigger. The Heat is ſo violent here, that dead Bodies rot in leſs than 24 Hours, ſo that they don't keep them above Ground as we do. Some aſcribe the Malignity of the Air to its Moiſture, join'd with the intemperate Heat; but others ſay, it has its bad Quality no where in the Iſland but in the Town, which lies in a low Place; for ſince it rains as faſt as it can when it begins, and the Water naturally runs to the deepeſt Places, the Heat raiſes the Vapours out of the Water, turns it every Morning and Evening into Dew, becauſe of the freſh Air, and falls upon People's Bodies. For this Reaſon our Author obſerves, the Air is not ſo unwholeſome in the N. and S. Parts of the Iſland as in this City. Sometimes he ſays 'tis darken'd by Miſts and Fogs, which make the *Portugueſe* confine themſelves to their Houſes. But this exceſſive Heat and Dampneſs of the Air abate in the Summer Months of *July* and *Auguſt*, becauſe of the freſh dry S. W. Winds that blow from the Coaſts of *Ethiopia*, for which Reaſon they are called the Windy Months. Theſe Winds purify the Air, and revive Strangers; but they are very troubleſome to ſuch of the Natives as are lean. They have no N. nor E. Winds, which *La Croix* thinks are interrupted or diverted by the high Mountains of *Africa*. They have two Winters as well as all other Countries under the Line, which are more wet than cold; one falls out in the Spring, and the other in the Autumn, or in *March* and *September*, when the Sun is directly over their Heads, and caſts no Shadow, which happens exactly twice a Year about Noon, for then it exhales ſuch a vaſt Quantity of Vapours from the Sea, as loads the Air with Clouds, which diſſolve into Rain, ſo that the Sun-beams having not Power enough to penetrate thro' the Miſts and continual Rains, cauſe the Air to be freſher at that Time than any other. The Rains laſt here from *December* to *April*, and drown all the low Lands. Our Summer is their Spring, and their Summer holds from *December* to *March*, during which Seaſon the Air is ſo hot and moiſt, that Strangers are obliged to keep under Ground, and run the Hazard of Death or dangerous Diſtempers, becauſe of the intolerable Heat and Moiſtneſs of the Air, while the Natives, who are of a cold, dry, and hagged Conſtitution, enjoy perfect Health. But when the Heat is moſt violent, it makes them ſo lazy and weak, that they are not able to walk, and the Ground is ſo hot, that they are obliged to wear double Soles, with a Piece of Cork underneath. Their chief Maladies are hot malignant Fevers, with which Strangers, eſpecially Whites, are ſoon overtaken, and are very often carried off the 4th, 7th, or 14th Day. They begin with a great Cold and Shiverings, which are ſucceeded by a Heat that runs over all the Members for two Hours. If the Patient labours under it above a Fortnight, he commonly recovers, except he relapſes by intemperate Eating or Drinking, ſo that the beſt Remedy they obſerve is to eat little, and faſt very much; yet ſometimes they bleed as we do; but our Author ſays, 'tis ſeldom ſucceſsful, and condemns it. They purge generally with the Pulp of Caſſia, and let the Patients drink as much Water as they will. The Diſtemper call'd *Bitios de Cu* makes great

Digitized by Google

Havock here, and they cure it with Limon-Juice; as we observed in *Lower Ethiopia*. Venereal Maladies are also very common here, but the Negroes soon cure them with Mercury; yet they kill many, especially Foreigners, who catch them of Negro Women. They are also very subject to the Dropsy, but cure it in a few Days by swallowing the Oil of Coco-Nuts, with a certain Herb, and chafing it into the Body. Above 100 Years since, the Kings of *Portugal* being informed of the Fruitfulness of the Soil, sent some Men hither, who all dy'd by the Malignity of the Air; wherefore those that were sent afterward stopped first in *Guinea*, and thence went to stay a while at *Angola*, in order to accustom themselves by degrees to the Badness of the Air before they came to settle in this Island. 'Tis said also, that *John* K. of *Portugal* sold for Slaves all that refused to embrace the Christian Religion; and after having baptized their Children, transported them into this Country, from whence those are descended who now inhabit the Island. The *Dutch* had a great many Men sick, and others that dy'd here when they took it in 1641 under Admiral *Jol* or *Houtebeen*, who dy'd himself, besides several others of the Commanders, and there were scarce 12 healthy Men left in each Company. Nay the Disease increased so much, that they had scarce Men enough for the Centries, nor Sailors enough to man their Vessels; upon which they wrote to C. *Maurice* at *Brasil* to send them a Supply of Men, Wine, and other Provisions. Most of them dy'd mad with a violent Pain in the Head, and some were carried off in 3 or 4 Days by a Pain in the Belly. They said, that some fell into this Distemper by heating themselves with their Negro Mistresses, and then exposing themselves to the Cold, and others by eating black Sugar, or the Milk of Coco-Nuts, which causes the Flux in the Belly. Besides, they did not go home and shut themselves within Doors, as the *Portuguese* commonly do when the Island is covered with Mists, for they are generally charged with certain Arsenical Particles full of Malignity. *La Croix* tells us, that this poisonous Air was much more fatal to Admiral *Peter Verdoes*'s Men when he took this Island in *November* 1610, for in a Fortnight's Time it carried off above 1000 with Pains and Disorders in the Head and Belly. The Admiral himself and the Vice-Admiral died, besides 17 Captains of Ships, and all the Soldiers of the Land Army except one. Some of their Bodies were opened, in which the Fat of their Bellies were dissolved into Water. Therefore C. *Maurice* advised the States, when they were in Possession of this Island, to do as the *Spaniards* had done, *viz.* to send none but condemn'd Malefactors here to people and defendit. Our Author says, the Soil is so good, that so soon as any Plain or Field is left uncultivated, it produces very high Trees in a little Time, which they cut and burn, and plant Sugar-Canes in the Ashes, which grow very high in the Valleys, but don't yield as much Sugar as those in *Brasil*, tho' they are planted, cut and ground, in the same Manner, only the Mills here are smaller, and not so much clogged, because they purify no more Sugar in the Island than what every one wants for his own Use. The Canes require 5 Months Growth after they are planted in the Ashes, so that they don't cut till *June* those planted in *January*, nor those planted in *February* till *July*, by which Means they cut Sugar-Canes every Month of the Year; nor do the Sun-beams, which dart directly upon the Island in *March* and *September*, hinder their Growth, because of the continual Rains in that Season, which do great Service to the Canes. When they are ripe, they cut and grind them in Mills, which are drove either by the Currents of Rivers, and where there's none by Slaves, or by Oxen; after which they boil and purify the Juice or Pith in great Cauldrons over the Fire. In our Author's Time they used to load 7 Ships a Year with the Sugar, *viz.* four for *Portugal*, two for the *Madera* and *Canary* Islands, and one for *England*. They could also have drawn much more, and have made white Sugar; but they had not Pots, *&c.* to refine it, nor Men that understood it. The *Portuguese* sent for several Master Workmen from the Island of *Madera* to make their Sugar whiter and harder; but they could never compass it, because they could not divest it of the Smell and Fat of the Soil which produces it. Besides, the Air would not dry it, for 'tis commonly hot and moist, except when the fresh Winds blow from *Ethiopia*; but our Author says, that

Digitized by Google

that Air does not dry it as it should be, therefore the Workmen are obliged to lay it upon low Planks shut up close all round, and to lay Branches of great dry Trees upon them, which, when kindled, produce neither Flame nor Smoke, but burn like Coals. By this Means they dry their Sugar as it were in Stoves, and keep it in close Places, lest the Air should enter; for then it would soon dissolve, as it will certainly do after it has been kept two or three Years. They had no Ginger here before 'twas planted by the *Portuguese*. In 1645, there were 54 Sugar-Mills in this Island, each of which had a Month marked for grinding, and might all together furnish every Year 6 or 700 Load of black Sugar, more or less, according as the Canes thriv'd. There were 61 Mills before; but they were ruin'd by the *Dutch* in 1610, and continued useless a long Time for want of Coppers, Cauldrons, and other Necessaries, and Slaves to work them. The Corn they sow never comes to Perfection, but only yields a long Stalk without Ear or Grain, because the Soil is too fat and moist. They have a great many Vines, which bear all the Year white and black Grapes, some ripe, others unripe and in Blossom, for they never thrive. They have sweet and sower Oranges, Limons, and Coco-Nuts, and their Water-Melons are ripe in *June*, *July*, and *August*. For want of Corn, the Inhabitants use Batata's, which they call Ignames, and are their common Food instead of Bread. There are four Sorts on t us'd here, which all take their Names from the Places from whence they are brought. One Sort is sweeter than the rest, and another keeps longest. They also plant the Root Mandihoca, which they grind into Meal; but the Inhabitants eat very little, and send most Part on't to *Angola*. When 'tis at its highest Growth, 'tis as big as a Man's Arm or Leg, and from one to three Foot high. They dry it as soon as 'tis grated, and they eat as much as they please on't without any Harm. It produces Banana's, Bacoves, Cusco Apples, two or three Sorts of Jojoos or little Beans, of which they make good Putties, and *Turkey* Wheat or Maiz, which serves them instead of Corn. There's also a Tree called *Pessigot*, whose Fruit that grows along its Stem or Trunk looks like Bottles of Water, and has Leaves at the End of its Branches. The Fruit is cover'd with Hairs, which they cut off before they eat it. They are pretty fleshy, have a tender Kernel, and are very sweet and refreshing. They have another Fruit called *Gola*, which grows upon a great Tree. 'Tis as big as a Nut, and lies in a palish green Husk as big as one's Arm, and a Foot and a half long. It properly consists but of red Pippins, with 4 or 5 Angles, cover'd with a white Skin, and placed near one another. The Negroes eat them. They have a bitterish Taste like raw Chesnuts, which turns sweet if you drink a Glass of Water upon it. They drive a great Trade with these Fruits, and carry a vast Quantity of them to *Loando St. Paulo* in their Husks, that they may keep the longer. There are a great many Palm-Trees, from whence the Inhabitants draw their Wine, and make Oil of the Kernels, which they send to *Angola*. They have abundance of Cotton, which they manufacture for little dark Stuffs, and others of a Sky Blue, for their own Use, like those of *Benin*; but they are much coarser, and of a worse Dye. They drive a profitable Trade with them to *Loando St. Paulo*.

Besides Swine, *La Croix* says they have Cows, Sheep, Goats, and small red Horses. Among other Fowls and Birds, they have *Turkey* Hens, Geese, Ducks, Turtles, Hens, Thrushes, and Starlings. The Rivers are full of Fish. In short, our Author thinks this Island would deserve to be called a Terrestrial Paradise, if the Temper of the Air was answerable to its Abundance of Animals and Fruits. He says, the Land Crevisses are of a greenish Colour, like those of the Sea, gnaw the Plants, and do abundance of Mischief. Their Flies are much bigger than ours, and are very troublesome to those who go into the Forrests to cut Wood for boiling the Sugar. Some Years ago there was abundance of Ants, that gnaw'd all the Sugar Canes they could find; but they dy'd as soon as the Weather began to change. There are also Rats and Worms, which do great Mischief to the Sugars.

The Inhabitants, says the same Author, are the *Portuguese* who first discover'd and peopled it, and Negroes brought hither from *Angola* to work. Those descended from *Portuguese* Parents, notwithstanding their

Digitized by Google

their long Residence in the Country, are as white as those born in *Portugal*; but those born of a *Portuguese* and a Negro are brown or tawny, and called *Mulatto's*. They usually send hither from *Lovando St Paulo* near 5000 young Negro Slaves to bring them up. Those who are originally *Portuguese* imitate the *Portuguese* Habit, as do also the trading Negroes and their Children; but the Slaves of both Sexes go stark naked, except a Rag of Linen or Palm-Tree Cloth before their Privy Parts. Their common Drink is Palm-Tree Wine, Water, or Goat's Milk. In the extreme Heats, 5 or 6 Families join and dine together with their Wives and Children in a Place under Ground, whither they bring their Necessaries, and sit round a long Table.

Their chief Merchandize is black Sugar, of which they export to *Europe* every Year 200000 Arobs, each 32 Pounds Weight, packed up in Leaves. Those who live far within the Island bring it in Canoes along the Rivers to the Town; but those who live nearer bring it in Waggons drawn by Oxen. Their other Merchandize is Cotton, Stuffs, Colas, and the like. Those which the *Portuguese* bring, as the *Dutch* did before, consist in Cloths of *Holland*, *Rouen*, &c. Threads of all Colours, Serges, Silk Stockings, *Leyden* Camlets, Serges of *Mesmes*, mix'd Serges of *Saignour*, Hatchets, Bills, Iron, Salt, Olive-Oil, red Copper in Plates, Copper Cauldrons, Pitch and Tar, Cordage, Sugar-Mills made of Earth from 25 to 30 Livres apiece, Aquavitæ, and all Sorts of Distill'd Liquors, *Canary* Wines, Olives, Capers, fine Flower, Butter, Cheese, and the like.

The Yearly Revenues which the *Portuguese* draw from hence amount to a pretty good Sum. All the Merchandizes which they export (for those that they import pay nothing, only what they pay in *Portugal*,) are to pay a Tenth to the King, whether they are sold for ready Money, or exchang'd for Sugar, Palm-Oil, or Stuffs. Those who fish by the Shore with a Net give one Fifth of those they catch, and the others who fish at Sea with Canoes pay 3 *d.* a Week; besides, something is paid to the King out of all Plants.

La Croix tells us, that all the Inhabitants are *Roman* Catholicks, except Slaves, or such Merchants as have no fix'd Residence here. The Ecclesiastical Government belongs to a Bishop, whose Seat is in the Capital, and is Suffragan to the Archbishop of *Lisbon*. The Temporal Government is in the Hands of the *Portuguese* Viceroy, who also resides in the Capital, and of a Corregidor or Judge, who administers Justice. The Differences of all the Inhabitants, both in Town and Country, are carried first to the Governor of the Island to be determin'd before him, from whence there's an Appeal to *Lovando St. Paulo* without Resort. The Inhabitants are obliged to keep the Governor's House, Castle, and the *Corps de Guard*, from Fire, and are obliged to rebuild the Palace at their own Charge, as well as to keep in Repair all the Ways and Bridges built about the Town and Country, to facilitate the Transportation of Merchandizes, and the Passage of Horses and Waggons; but our Author observes, 'tis impossible to keep the Ways good during the great Rains from *December* to *April*.

He adds, that while there was a Treaty of Truce on foot between the Crown of *Portugal* and the States General, (tho' the Reasons of the War were still in Force) the *Dutch* took this Island in *October* 1641, after 40 Days Siege, under Admiral *Jol* before-mentioned, who landing with his Men two Leagues from the Town notwithstanding the Resistance of the Negroes, took the Cover'd-Way of the Castle, which was destitute of Men and Ammunition, and fortified only with 6 Cannon; after which they attacked the great Fort, that was encompassed with a Wall of 20 Foot high; but were obliged to retire with considerable Loss, after an obstinate Dispute, for want of Ladders to scale the Walls. However they enter'd the Town without Resistance, the Burghers and Soldiers who were to defend it being fled. Some Days after the Garrison of the Fort, being attacked all that Time from a Battery of 6 Pieces, capitulated, and the Governor went out with 80 Men, Negroes, Whites, and *Mulatto's*, and embarked, according to the Agreement, for *Lisbon*, with 25 of the King's Soldiers. The *Dutch* found in the Place 36 great Cannon, of which 20 were of Brass, with a great Quantity of Powder, Match, and Ball; but they had scarce Provisions for a Month.

Digitized by Google

Then the *Dutch* Admiral ſummoned all the *Portugueſe* that had left the Town to appear in a Fortnight, to treat of Amity. Two of the chief Burghers came accordingly, and for 55000 Croiſadoes, and 10000 Arobs of Sugar, purchaſed the Preſervation of their Mills, and the Enjoyment of their ancient Laws and Liberties, on Condition that the Conquerors ſhould have all the King's Revenues and Treaſure. Several of the Negroes and Proprietors of the Sugar-Mills obtained Leave to retire with Paſſports. Our Author tells us, that the *Dutch* took this Iſland before under Admiral *Verdoes*, formerly mentioned, in 1610, and made themſelves Maſters of the two Caſtles, one of which ſurrender'd after they had landed 7 Cannon, and the other was abandon'd by the Garriſon. Then the Town refuſing to give 10000 Ducats to ranſom it from being plunder'd, was laid flat in Aſhes, and a Booty was carried on board, conſiſting of 1000 Cheſts of Sugar, a great Quantity of Ivory, Silk and Woollen Stuffs, and 25 Cannon.

Some ſay this Iſland is 30, others 40, and others 60 Miles in Diameter, and that 'tis 180 Miles in Compaſs. The *Sanſons* encline to the latter, and ſay the Town has 700 Houſes, and ſome Forts to defend the Haven; that the Iſland formerly furniſh'd 150000 Arobs of Sugar; that the *French* import here Meal, Stuffs, Beads, Glaſs-Bowls, and Shells, which are current in *Ethiopia* inſtead of Money; that the Inhabitants trade to the Rivers of *Boreo*, *Campo St. Benito*, *St. Juan*, and the Iſle of *Coriſco*; and that they reckon their Pork a nicer Dainty than their Fowls. *Nieuhoff*, who was here in 1640, makes it 36 Leagues in Compaſs, and ſays, the high Mountains in the Middle of it are always cover'd with Snow, which melts down and moiſtens the Sugar-Fields below; and that the Fogs here diſperſe at 10 a Clock in the Morning; but they are not ſeen at Sea. In his Time there were above 60 Sugar Mills there, and the Town contained 800 Houſes and 3 Churches. Its firſt Inhabitants were *Jews* baniſh'd out of *Portugal*, who have a very odd Complexion, and there's abundance of Negroes among the Mountains, who are run away from the *Portugueſe*, and make Excurſions ſometimes to the City Gates. *Loyer* ſays, the Town is alſo called by the Name of the Iſland; and *Merry* obſerves, that the *Portugueſe* Name *Povoaſon* ſignifies a Colony. The latter ſays, that *European* Women who live here are ſubject to Iſſues of Blood, which kill them after 3 or 4 Years Stay here, ſo that the *Portugueſe* have choſe rather to marry with the Women of *Congo*. He adds, that the *Dutch* firſt took it in 1599, and then abandon'd it, but took it again in 1641, and the *Portugueſe* retook it ſince by Force of Arms. He places it 180 Miles from the Coaſt of *Africa*. *Heylin* ſays, that on the W. Side of the Iſland there's a high Pike, which is very ſmall and ſtrait like a Church Steeple, and this he places exactly under the Line. Two or Three Hundred Slaves belong to each Sugar-houſe. He obſerves, that the Art of Boiling and Refining Sugars was firſt found out by a *Venetian*, who is ſaid to have got above 100000 Crowns by it, and to have left his Son a Knight, before which our Anceſtors us'd rough Sugar, as it came from the Canes, or elſe Honey.

Boſman obſerves, this Iſland was ſo fatal to the *Dutch*, his Countrymen, when they were here, that in *Europe* they called it the *Dutch* Church-yard. He ſays, the Valleys are full of thick ſtinking Miſts in the hotteſt Time of the Day, and that ſome of the *Portugueſe* bleed themſelves 50 times a Year. They have great Plenty of Cattle, larger and finer than thoſe on the Gold Coaſt. He was here about 1699, when he ſays there were two Convents, one of St. *Peter*, and the other of *St. Auguſtin*. He adds, that the *Portugueſe* Ships in their Paſſage to the *Weſt-Indies*, and indeed all that by reaſon of contrary Winds cannot reach *Prince*'s Iſland, put in here for Refreſhment. Mr. *Robotier*, in his Map of Commerce ſays, they ſend 50 Ships every Year laden with Sugar from hence to *Spain* and *Portugal*.

4. *ANNOBON*, *ANNOBOON*, or *ANNABOA Iſland.*

The Name ſignifies a good Year. *Oliver Nouts* places it S. Lat. 2. When Mr. *Adams* and his Company, who ſerved the *Dutch*, were here in 1598, he ſays they found Peeves, Oranges, and other Fruits, but an unhealthy Air. They took the Town, conſiſting

sisting of 80 Houses. He adds, that betwixt this and 4 Deg. of S. Lat. they had always S.E. and S.S.E. Winds. *De la Val*, who was here in 1601, says, 'twas possessed by the *Portuguese*, who had a Viceroy here, that had the Gift on't from the King of *Spain*, the other *Portuguese* who inhabit it being only his Factors and Commissaries. The Natives, who are all Negroes, are his Slaves, and go naked, but cover their Privities with Cotton. Their Women's Breasts are very long, so that they carry their Children upon their Backs, and suckle them over the Shoulder. He places it in Lat. 2 ½, and makes it 5 or 6 *French* Leagues in Circumference, and 2 in Length. He says, 'tis high, mountainous, and always green. There's a Road on the N. W. Side, but 'tis dangerous, because of Flats and Rocks. It abounds with Fruit and Cotton, in which all the Revenues are paid. Mr. *Ovington*, who was here in 1689, makes the Circumference 10 Leagues, and says it had this Name because 'twas discover'd on New-Year's-Day. Provisions are so plenty, if we may believe him, that a Sheet of Paper will purchase a roasting Pig. It yields a fragrant Smell of fresh Herbs and Flowers 3 Leagues distance at Sea. When he was entring the Harbour, the Inhabitants made Fires on the Shore in the Night to give him Light, and sent him a Canoo with Oranges and Fowls, rowed by 6 Men, born in *Africa*, who confessed themselves to be *Romans*; but such Heathens, that they scarce knew what the Mass meant, nor the Pope from the Great Mogul. Our Author says, contrary to Mr. *Adams*, that the Air is very healthy, but the People very poor. He adds, that there's a convenient Road here on the Lee-Side, as Providence has order'd it in *St. Thomas*, *Ascension*, *St. Helena*, *St. Jago*, and many other Islands, where the Winds generally hang towards one Quarter.

La Croix places this Island 25 Leagues from the Isle of *St. Thomas*, and 45 from Cape *Lopez Gonsalves*, upon the Continent. He says, here are several Springs and Brooks of fresh Water, which turn Salt in the New and Full Moon, when the Tide is high. It has some Mountains which reach to the Clouds, whose Tops are always cover'd with Snow. Both the Hills and Valleys abound with all Sorts of Plants, and yield a charming Prospect. The Sides of the Rivulets are planted with Palm-Trees, from whence the Inhabitants draw their Wine, Ignames, Infantas, Potatoes, Bananas, Ananas, Oranges, Sugar-Canes, and Tamarinds. They have also Rice, Maiz or *Turkey* Corn, several Sorts of Beans, small black purging Nuts, and all other Kinds of Plants. Here are a great many Wild-Boars, Deer, and Goats, Hens, Pigeons, black and white Herons, and several other Birds. The Sea abounds with several Sorts of Fish and Oysters. *Mercator* and others say, this Island is both uncultivate and uninhabited, which is false, for *La Croix* tells us it is very populous. 'Tis true, some Years only a few *Portuguese* liv'd here, with 50 or 60 Negroes, upon Tillage and Fishing. But the *Dutch* in 1605 found two *Portuguese* and 200 Negroes here. The Town is encompassed with a Parapet, and contains 100 Houses built with Canes, except some Timber ones which belong to the *Portuguese*. The *Samsons* say, that in 1623 the *Dutch* Fleet had 200000 Oranges from hence in less than 4 Days, and there are some here which weigh 12 Ounces. *Heylin* says, there's abundance of Crocodiles and other venomous Creatures about the Shore, which destroy the Fish. *Bosman*, who was here in 1699, says, 'tis frequented by a great Number of Ships, as well those bound from *Guinea*, as those bound to *Angola* and the *East-Indies*. He tells us, 'tis better stocked with Cattle and Fruit than *St. Thomas*'s or *Prince*'s Island; but not above half so big as either. 'Tis commonly cover'd with a thick Mist like the former, yet the *Portuguese* here say 'tis more wholesome. The Land is full as high as *St. Thomas*, and the *Portuguese* report, that in the highest Place on't there's a Lake of very good fresh Water, about which the Air is cold as the severest Autumns in *Holland*. The Soil is good half-way up the Hills, therefore the *Portuguese* have till'd it so far; but below it seems dry and barren, tho 'tis all over planted with Fruit-Trees, particularly Coco's, Limons, and Bakovens, so that 100 Coco Nuts are sold for a Rixdollar, 1000 Oranges or Limons at the same Rate, and other Fruits in Proportion. In short, our Author calls it *Amalthea* and *Cornucopia*. They exchange their Hogs, Sheep, &c. for old Linen and Woollen

Digitized by Google

Woollen Clothes. The Inhabitants are Negroes, except the *Portugueſe*, who treat them as Slaves, becauſe they are deſcended from thoſe Slaves which they firſt ſet on the Iſland, and they are all of them thieving Rogues. The Women are common Whores, and almoſt all of them very ugly. The *Portugueſe* Governor has the honourable Title of Governador; but our Author ſays, he that had this high Poſt in his Time was ſo poor, that he would have been glad of a Crown, and ſo little reverenced, that he believed his Subjects would have broke his Head, and ſurrender'd the Iſland to our Author, if he had deſir'd them, becauſe being appointed a Rent-gatherer by the Proprietor of the Iſland, who was a *Portugueſe*, to collect a Third of all their Cattle, Fruit, and Income, he fleeced the Inhabitants of one half, which has made him ſo hated, that they want to be rid of him. But our Author obſerves, it would not be ſerviceable to any Nation; for unleſs the Negroes are tranſported, they would fly on the leaſt Difference with the Poſſeſſors to the Hills, which no *Europeans* could approach, and from thence oblige them to abandon it, as he ſays they ſerved the *Engliſh* when we were in Poſſeſſion of it. There were two *Capuchin* Prieſts here, great Brandy Drinkers, who were very profuſe of their Holy Water, and ſhew'd him their Churches, which were very handſome, and large enough for four times the Number of Inhabitants then on the Iſland. There were ſome ſmall Cannon, which they took out of a little *French* Pyrate that ſtranded here. One *Tho. Kent*, an *Engliſh* Captain here, at that Time, agreed to carry the Men and their Booty to the *French* Iſlands for Part of the Prey: Accordingly the Men put their Goods on board; but Captain *Kent* fir'd upon them as they were going to embark, and obliged them to keep aſhore, while he and his Men ſailed away with their Goods. *Merdn* ſays, the *Portugueſe* live towards the N. Part of the Iſland.

5. ROLLES *Iſland.*

Mandelſloe places it 35 Leag. S. of *St. Thomas* Iſland, and ſays, it abounds with Oranges, Citrons, Bananas, Ananas, Ginger, Poultry, Hogs, and other freſh Proviſions; that 'tis one of the moſt convenient Places for Ships to refreſh themſelves in; and that it has a commodious Haven at 10 Fathom Water. *La Croix* ſays, it lies three Muſket-ſhots from *St. Thomas*, and that there are 7 Rocks that appear above Water betwixt it and *Ilha del Cabres*; but that there's good Anchorage and Paſſage for Ships betwixt this and *St. Thomas*. He adds, that there's another called *Goat Iſland*, the ſame Diſtance from *St. Thomas*, which is hilly, and full of wild Limon-Trees. There's the ſame good Road betwixt both Iſlands.

6. CARACOMBO.

La Croix places this Iſland at the Mouth of a River near the Equinoctial, lower than the Iſland *Ferdinand Po*, below the River of *Gaba* or *Gabon*, and ſays, it abounds with Fruits unknown to *Europeans*, and ſeveral Sorts of Birds and other Animals, ſo that ſometimes (if we may believe *Linſchotten*) there are 100 Birds-Neſts on one Branch, wonderfully ſecured from Serpents and Lizards. *La Croix* tells us, that the Women here proſtitute themſelves publickly to all Comers. Some of the Men went aboard a *Dutch* Veſſel here, with a Drum and a hollow Stick inſtead of a Flute, a green Bow with a Bell, and certain little Birds of the Size of a Sparrow, which they let fly about the Veſſel, while they tingled the Bell, which the *Dutch* interpreted as Tokens of their Friendſhip, and gave them a Pot of Palm Wine. Then ſome *Dutchmen* landed with them to truck Iron for Ivory, and when they came to their Village, they ſaw a little Houſe 3 Foot high, cover'd at the Top, but open on one Side. There was a ſort of Gallows on the Top, with a little Net ſpread over it; but they would not ſuffer any one to lift it up to ſee what was under. Over againſt this there was a Child's Skull upon a Stick, with a Bone in one of the Balls of its Eyes, and ſeveral others near it, the Earth being cover'd with Fiſh and other Animals, which made them believe it to be ſome Burial Ground. He adds, that the Inhabitants obſerve Circumciſion, tho' they live without Faith and Religion.

Before we leave this Gulph, we will give a brief Account of the merry Cuſtom us'd by Sailors when they paſs the Line.

Angelo, a *Capuchin*, and Miſſionary to *Congo*, ſays, that the *Portugueſe*, who have never been under the Line, muſt give the Sailors Money or a Treat, not excepting the Admiral or *Capuchins* themſelves, of whom they take Beads, *Agnus Dei's*, or the like, which are ſold for Money, wherewith they purchaſe Maſſes for the Souls in Purgatory. If any Man refuſe to pay this Duty, the Sailors in the Habit of Officers carry him bound to a Tribunal, where a Seaman ſits as Judge in a long Robe, examines him, and orders him to be thrice ducked in the Sea after this Manner: The condemn'd Perſon is ty'd faſt with a Rope, and the other End of it run thro' a Pully at the Yard-Arm, by which he is hoiſted up, and then plunged three times under Water. Our Author obſerves, that there ſeldom fails one or other that thus expoſes himſelf to the Diverſion of the reſt, and that the ſame Cuſtom is practis'd in paſſing the Streights of *Gibraltar* and the Cape of *Good Hope*. *Merolla*, another Miſſionary, ſays, 'tis a ſort of Court erected by Conſent of Commanders of Ships; that there are two Judges who ſit at a Table, examine and lay a Mulct upon thoſe that have not paſſed the Line, according to their Quality, as if they had omitted an indiſpenſible Duty; and that the Money ſo raiſed is laid out in maintaining a Church. *Le Maire* ſays, this Ceremony is called Baptiſm, and us'd by all Sailors; and that 'tis alſo put in Practice upon all that never yet paſſed the Tropick. He gives a particular Deſcription on't as follows: They ſet a great Tub of Water at the Foot of the Main-maſt, with a Stick laid acroſs it: Then thoſe that have been already *Seaſon'd* in former Voyages ſmut their Faces, and walk in ſtately Proceſſion round the Deck with Cutlaſſes, Frying-pans, and other Kitchen Utenſils, and the Sound of Drums and Trumpets. The Pilot diſtinguiſhes himſelf by turning his Coat, and carrying a Rag for his Colours. When the Proceſſion is over, they baptize the Ship, by ſlinging Pails of Water about the Deck, till the Captain gives the Crew ſome Drink and Money. Then they go firſt to the moſt conſiderable Men aboard, and make them ſit one after another upon the Stick juſt now mention'd. The Mob gets about him with a Baſon to receive what they call his Baptiſmal Offering, holding a Scymiter acroſs his Neck. Then the Pilot brings his Book of Charts, and makes the Patient put his Hand upon the Tropick Line, and ſwear to obſerve the ſame Ceremony for the future to thoſe that are freſh Travellers. At laſt they mark his Forehead with a black Croſs, ſling a little Water upon his Head, and diſmiſs him, after a Preſent thrown into the Baſon. Thus they uſe Men of Note very civilly; but if he be a mean Man, and will not pay ſomething, they draw the Stick from under him, ſouce him into the Tub, ſling Buckets of Water on him, and thump him with the Stick he ſate upon. *Leguat*, who agrees pretty well in the Deſcription, ſays, 'tis an ancient Cuſtom, that they make rough Muſick with the Kitchen-Veſſels; that he was diſcharged from all this Penance for a Crown; and that the Captain was obliged to give Drink and Money to the Sailors to ſave the Beakhead of his Ship, for elſe they pretended they had a Right to cut it off. He obſerves, that every Nation practiſes this ridiculous Cuſtom after a different Manner. Captain *Rogers*, Commander of the *Duke* Frigat, who begun a Voyage round the World in 1708 from *Kingroad* near *Briſtol* along with the Ship *Dutcheſs*, and was preſent at the taking of the famous *Acapulco* Ship, ſays, that 60 of his Company were ducked after this Manner, and that others choſe to pay Half a Crown Fine to be ſpent at a publick Meeting of all the Ships Companies when they returned to *England*, and that ſome deſir'd to be duck'd 8 or a dozen times to have the better Title to the Treat.

VI. *The Iſlands againſt* Caffaria.

The chief are, 1. *St.* MATTHEW's or *St.* MATHEO.

Hylin ſays, 'twas diſcover'd much about the ſame time with the Iſlands in the Gulph of *Guinea*, and on the Feſtival of its own Name, according to *La Croix*, who places it in S. Lat. 1. 50. He ſays, the *Portugueſe* lived here ſome Years, and that it has a Brook

Digitized by Google

Brook or Lake of freſh Water, Fruits, Fowls, Wild-Beaſts, and Fiſh; but that 'tis now deſert.

2. *ASCENSION* or *ACEMSAON.*

Admiral *Beaulieu* ſays, 'tis very high, and has good Anchorage over againſt a ſandy Creek, but has no Wood, freſh Water, Herbs, nor nothing except dry Rocks and Mountains, but not ſo high as thoſe of *St. Helena*, thô 'tis larger. Nevertheleſs it affords ſome Hogs, and a great many Fowls as big as Geeſe, with abundance of Fiſh, particularly Flying ones, and Tortoiſes upon the Rocks and in the Road, which are eaten either freſh or ſalted. He places it in S. Lat. 8. and makes it 8 Leagues in Circumference. *Purchas* ſays, 'twas diſcover'd about 1501 by *John de Nova*, a *Portugueſe*, and on the Feſtival ſo call'd, according to *Herbert*, who places it Lat. 7. about 720 Miles N. W from *St. Helena*, and makes it above 30 Miles in Compaſs, but ſays, it has nothing remarkable. *Mandelſlo* makes the Diſtance from *St. Helen*'s 190 *Spaniſh* Leagues, and places it Lat. 8 ½. *Struys* ſays, ſome of the Tortoiſes are two or three Hundred Weight, and that the Mountains are full of Birds-Neſts. *Navarette*, a *Dominican* Friar and *Spaniſh* Miſſionary, who was here about 1673. ſays, there's a high Pyramidical Mountain near the Bay of Anchorage, with two great Croſſes on the Top, ſet up by the *Portugueſe*. He places this Iſland almoſt Half-way between *Guinea* on the E. and *Braſil* on the W. which are 400 Leagues aſunder. He ſays, thoſe that ſail this Way leave Letters in Bottles, and put them in a ſafe Place where they may be ſeen, to inform the next that come who are gone by, and the Succeſs of their Voyage. *Heylin* ſays, 'twas diſcover'd by *Triſtan d'Acuna* in 1508. *Morery* places it but 100 Leagues from *Braſil*, makes it 4 Leagues long, and one broad, and ſays, that Rain-Water ſtinks here in 24 Hours. M. *Rennefort* places this Iſland Lat. 7. 40. and Long 7. 36. and ſays, he anchor'd here on the N Side, when ſo many Thouſand Birds crying like Crows, perch'd about the Rigging, that the Seamen, *&c.* killed 500 in a quarter of an Hour, and ſtunn'd as many others, ſo that they could only flutter about the Ship, where they entangled and took them. They were ſo troubleſome when aſhore, that they ſtruck off People's Hats and Caps, ſo that there was no Paſſage without beating the Air. They roaſted ſome of them, which were very bitter, lean, and taſted of the Sea. He makes this Iſland but 7 Leagues in Compaſs, and ſays, there's very white Salt here, form'd by the Sun between the Rocks on the Shore. The Anchorage is from 14 to 17 Fathom, on a red ſandy Bottom; the Croſſes on the Mountain above-mentioned are of Fir, the leaſt very ancient, and cover'd with obſcure Characters; but on the biggeſt, which was new, there was *October* 23, 1669 and ſeveral Names, beſides this Inſcription the Year after, *viz. June* 24, 1670 *the* French *Ship* la Force *anchor'd here, and fiſh'd for Tortoiſes.* He adds, 'tis a little bigger than *St. Helena*, and not ſo mountainous, but has more barren Plains, and abundance of tame Sea-Birds, particularly thoſe called *Boobies*, which freely ſuffer themſelves to be touch'd. Mr. *Ovington* ſays, that notwithſtanding its Sterility, 'tis generally us'd by our homeward-bound *Eaſt India* Ships as a Place of Refreſhment. The Soil is cover'd with Cinders and Aſhes, which makes ſome think here was once a Vulcano; yet in ſome Parts 'tis fit for Tillage, and has a ſafe convenient Harbour, where the Mariners ſometimes hunt and feed upon Turtles for 10 or 15 Days together, which they reckon both pleaſant and wholeſome Food. There are a few Goats here, but they are lean. Our Author ſays, when the Hunters turn the Tortoiſes upon their Backs, they ſhed abundance of Tears; that they are ſo ſtrong beyond the Proportion of their Size, that ſome not above 8 Inches broad are able to bear the Weight of a Man, and ſo hardy, that after their Necks have been cut off, except by a ſmall Piece of Skin, and their Guts taken out, ſome of them have open'd their Mouths, and their Hearts have moved for two or three Hours, tho' out of the Body. Nay, he ſays, that ſome have lived 12 Hours after their Heads were off. He diſtinguiſhes the Turtles or Sea-Tortoiſes into three Sorts, *viz.* the Hawk Bill, the Loggerhead, and the Green Turtle, which ſwim in the Water, and creep and eat Graſs on Land. They have two Fins before like

Digitized by Google

Wings, and two broad and long ones behind like Feet. Their Head and Eyes are like thoſe of a Hawk. Their Fleſh is white, better than Veal, and is ſaid to be good againſt the Scurvy and foul Diſeaſe; yet the *Dutch* won't touch them, and the *French* are ſo barbarous, that when they have turn'd more than they can ſpend upon their Backs, they ſail away, and leave the reſt to ſtarve and ſtink above Ground. But our Author ſays, the *Engliſh* turn no more than they have Occaſion for. He tells us, the Place here where the Mariners leave their Letters is called the *Poſt-Office*, and ſays they are commonly put in a cloſe cork'd Bottle, which the next that comes breaks, and leaves another in its ſtead. *Du Pleſſis* places this Iſland in Lat. 4.

3. *St.* HELENA *or St.* HELEN's *Iſland.*

Columbus ſays, that in 1497 a Skirmiſh happen'd here between the Negroes and the *Portugueſe* under *Vaſco de Gama*, in which many of the latter were wounded by the ſharp long Poles darted by the Negroes, and forced to abandon the Iſland. Mr. *Francis Pretty*, who accompanied Mr. *Candiſh* of *Suffolk*, the ſecond Admiral that ſailed round the World, ſays, there's Anchorage here in 12 Fathom Water, in a good Bay, under the N. W. Side of the Iſland, two or three Cables Length from the Shore. He places it as it were in the midſt between Cape *Negro* in *Guinea*, and *Rio Grande* in *Braſil*, in S. Lat. 15. 48. and between 5 and 600 Leagues from the Cape of *Good Hope*. He ſays, that in 1588, when he was here, there was a Church with a fair Cauſey leading to it, a Frame with two Bowls, and a Free-ſtone Croſs near it, and the Inſide was hung with painted Cloths, having an Altar with the Virgin *Mary*, and the Story of the Crucifixion pictur'd in a Table. It ſtood in a very pleaſant Valley, full of choice Fruit-Trees and Plants, like a Garden, particularly Limon, Orange, Citron, Pomegranate, Date, and Fig-Trees, nicely trimm'd in long Rows, that preſented the Eye with Bloſſoms, green and ripe Fruit all at once. It was water'd by ſeveral ſmall Streams, proceeding from a clear Spring that roſe at a Diſtance, and in ſhort every Part of the Garden was bleſſed with the Productions either of Art or Nature. From hence 'twas called *Church* or *Chapel Valley*. The Iſland abounded with Partridges and Pheaſants, much larger and fairer than ours, and black and white Turkies with red Heads; but their Eggs are quite white; and wild Goats as big as Aſſes, with Horſes Manes and Beards down to the Ground, which ſometimes go together in a Herd that reaches a Mile in Length. There are alſo vaſt Herds of fat Swine, that keep chiefly upon the Mountains, as the Cabrito's do; but they are ſo wild, that there's no coming near them, except when they are aſleep, or rumbling in the Mire. He adds, that the Wind is commonly off the Shore here. Admiral *Noort*, who was here in 1599, ſays, they refreſhed themſelves with good Water, Fiſh, and ſome Fleſh, but could not meet with any Cabrito's or Fowl, (which are both hard to be taken) nor no Oranges. Mr. *Davis* of *Limehouſe* places it in Lat. 16. and Long. 4. 30. E. from the *Lizard*, and 23 ½. W. from the Cape of *Good Hope*, and ſays, 'tis one of the beſt Iſlands in the Ocean for a good Air, Road, and Refreſhment; that the Anchorage is in a good ſafe Ground, from 7 to 12 Fathom; and that the Variation here is 7 Deg and a half from N. to E. Mr. *Halley* ſays, that about 1600, the Needle declin'd 8 Deg. to the E. in 1623, but 6; in 1677, but 40 Min. and in 1692, 1 Deg. W. of the N. Admiral *Beaulieu*, who was here in 1623, ſays, there's good Fiſhing here, and ſeveral choice Herbs, *viz.* Purſlain, abundance of Tarragon, ſome Fenugreek, Tobacco, and Mayoc; that here are ſome Pigeons and Oxen; and that thô the Iſland is mountainous, and looks as if it was wither'd, yet there's a great deal of Moiſture on the Top, and not a Gap or Valley without a Brook or Rivulet, the greateſt of which runs in the above mentioned Valley, where a Chapel is built, tho' the Valley is not above 150 Paces broad, and 1000 long. He adds, that there's a ragged Cleft-hill of Rocks at the End on't, upon which a Stream of Water falls down from a very high Mountain; and that the Needle vary'd here in his Time 5 Deg. ½. N E and has always the Wind at S. E. *De la Val* makes its Diſtance from the Cape of *Good Hope* quite 600 Leagues. He ſays, that upon the Altar of a Chapel here he found

Digitized by Google

found several Letters, advising that the *Dutch* had passed this Way, and that the Air, Fruit, Flesh, and Water, of this Island, are so healthy, that his Men, who were much oppressed with the Scurvy, recover'd here in 9 Days. *Purchas* says, this Island was found in 1501 by *John de Nova*, a *Portuguese*. Sir *Thomas Herbert* says, it lies in a rough Sea, without any Isles near it, and that 'twas so called by *John de Nova* on *May* 3, the Day which is dedicated to the Empress *Helena*, the Mother of *Constantine the Great*. He places it Long. 22. W. or 1740 Miles from the Cape of *Good Hope*, 400 Leagues from the Continents of *Africa* and *America*, 3000 Miles from *Madagascar*, 6600 from *Surat*, 6900 from *Bantam*, and 4500 from the Land's-End in *Cornwal*. He says, 'tis not above 30 Miles in Compass, but very high, and blessed with moderate Rains. The Sea here is very deep, so that the Tide is hardly visible, and there's bad Anchorage, except at the N. W. where 'tis 20 Fathom, so that he advises to carry the Anchors ashore. The Land is so steep and difficult of Ascent, that the Sailors say, *That a Man may chuse whether he will break his Heart in going up, or his Neck in going down.* But he says when a Man is up, no Place can yield him a better Prospect. The Land is very plain at Top: It has some Springs, which tho' sweet at their Rising, become brackish by running thro' the Salt Hills, and drawing near the Sea. There are but two Rivulets of Note, *viz.* one running down to the Chapel which was built by the *Spaniards* in 1571, but pulled down by the *Dutch*, and put to common Uses, the other running into *Limon Valley*, so called from a Limon Tree growing there. There are the Ruins of a little Town demolished by the *Spaniards*, because it was a Magazine of a private Trade from both the *Indies*; but there are no other Monuments or Antiquities. There were no Inhabitants in our Author's Time, and he saw none of the Fruits mention'd by Mr. *Candish*, except one Limon-Tree, but Store of Pouts, Quails, and Hens, among other Birds, and Plenty of Herbs and Roots sown by a *Portuguese* in 1509, such as Wood-Sorrel, three Leav'd Grass, Basil, Parsley, Mint, Spinage, Fennel, Anniss, Radish, Mustard-Seed, and the like. He adds, that Captain *Parker* found a Mariner here that was left ashore 18 Months before by Captain *Kendal* in 1591, who dy'd with Joy at the Ship's Arrival, for then the Island was uninhabited; and that when he wrote, which was in 1677, the *English* and *Dutch* us'd to dispute the Propriety of this Island with the *Portuguese*. He gives a View of it, for which we refer the Curious to his Book. *Mandelslo* places it in Lat. 16. 12. 350 Leag. from *Augusta* or the Cape of *Angola*, 550 from that of *Good Hope*, and and 510 from *Brasil*, and makes it but 7 Leagues in Compass. Our Author says, that in 1639, when he was here, it excelled most *European* Provinces in the Plenty of Fruits, and all Sorts of Creatures, which some say were first planted and brought hither by the *Portuguese*, and he says they improved to such a degree, that 'twas then able to furnish whole Fleets with Refreshments; Figs, Pomegranates, Oranges, Citrons, Goats, Hogs, *Barbary* Hens, Pheasants, Partridges, Quails, Peacocks, and Pigeons, being to be had here at all Seasons of the Year, besides vast Quantities of Fish and Salt, enough for keeping them. It produces so many wholesome Herbs, that the *Portuguese* used to leave their sick Men here, who certainly recover'd against their coming back the next Year. Its Mountains are so high, that they are seen 14 Leagues off at Sea. The *Portuguese* never attempted to make a Settlement upon it, for fear of giving Umbrage to other Nations trading in these Parts, and because of its great Distance from the Continent. There are daily Showers of Rain, to which, and the Sun's extraordinary Heat at Intervals, he ascribes the Fruitfulness of the Island. He says, Ships may take in fresh Water at the Mouths of three Rivers which rise in the Mountains, and fall into the Sea. They abound with Snakes, which the *Dutch* eat as a better Dainty than Eels. *Struys* says, there's a well tasted Sorrel here, as purgative as Sena.

Navarette observes, that if the *Portuguese* had kept Possession of this Island and the Cape of *Good Hope*, they might easily have lorded it in *India*, because Ships would be at a loss for fresh Water and Provisions; but he says the *Dutch* took it till they six'd at the Cape, when they lost it to the *English*. Nevertheless the *Dutch* retook it afterwards,

Digitized by Google

wards, and the *English* beat them out on't again. *Struys* says, it was retaken from the *English* with about 300 Men the beginning of the Year 1673; but that 'twas surrender'd 4 Months after upon honourable Terms to the *English*, who landed under Captain *Monday*, and climbed up the Rocks in the Night, from whence they fired next Morning on the Fort. *Navarette* tells us, the Island is encompassed with very high Rocks, and looks like a great Castle; and that there's no Harbour, but safe Anchorage in *December*, because then the Winds come over the Island. The *English* in his Time, which was about 1673, lay in a Valley, without Tree, Bush, or a Foot of Strand. There is no Wood, and beyond the Rocks 'tis said there's a pleasant plain Ground, well water'd. Here he says there's a little Town of *English*, who till the Ground, sow Rice, and make Butter and Cheese, and have some Fruit, Swine, and Goats, that were put in by the *Portuguese*. The Governor in his Time was Mr. *Richard Cung*, an *Englishman*, and there was a pretty good Fort and Garrison. He adds, that about 27 Years before, a *Portuguese* Carrack being cast away, the Men set the Swine, Goats, and other Cattle which were aboard, upon the Island, where they increased so fast, that 12 *English* and *Dutch* Ships putting in there soon after, found Provisions enough for them all. Nay, the very Dogs multiplied, and hunted the Calves and Kids. There's abundance of Pigeons here all white, which are called the Pigeons of *St. Helena*, to distinguish them from those that have been carried from several Parts of *India*.

Mr. *Nieuhoff*, who was here in *March* 1658, places it in Lat. 16 ¾. and says, it has many fine Valleys, planted with Oranges, Limons, Pomegranates, and all Sorts of Trees; that there's one called the *Apple Valley*; and that in the *Church Valley* are still to be seen the Ruins of the *Portuguese* Chapel above-mentioned. He tells us, that after the *Portuguese* left the Island, an Hermit here us'd to kill great Number of Goats, and sell their Skins; but the *Portuguese* having Notice on't, remov'd him; and that at another Time some Negroes, with two Female Slaves, got into the Mountains, where they increased to 20, and then were forced away by the same Means. The Valleys are excessive hot, but the Hills are cool enough, and the Springs are so clear, and reckon'd so wholesome, that the Seamen drink and bath in them as soon as they arrive. Their Timber is fit for nothing but to burn. Their wild Hogs are sprung from the tame ones brought over by the *Portuguese*. Their Partridges, Pigeons, and Peacocks, are so tame, that there's no catching them without a good Company. It produces no ravenous nor poisonous Creatures, except large Spiders and Flies; but there are vast Multitudes of Sea Gulls about the Island, which feed upon the Fishes. There are several choice Dying Colours here, especially a good Red, and a fine white Salt form'd by the Sun out of the Sea-Water. The neighbouring Sea is full of Mackarel, Carps, and other Fish, which are only to be catched with the Angle, because 'tis so deep. There are also vast Quantities of Craw-fish, Crabs, Oysters, and Muscles, near the Shore. Our Author gives a View of this Island, for which we refer to himself. Sir *William Monson* makes it but two Miles in Compass, and says, the Fish hereabouts are better tasted and wholesomer than all others. *La Croix* says, there's a great Rock on the S. Side a quarter of a League from the Shore, which is haunted by the greyish Birds call'd *Foals*, and the white and black ones call'd *Frigats*; that the *Apple Valley* is so named, because it yields Fruit enough to load 5 or 6 Ships; that there's good Anchorage on the E. Side of the Chapel close under the Island; that 'tis extraordinary cold upon the Mountains; that the Soil produces wild Pulse in untill'd Places, together with Radishes, Turneps, Cabbages, Ananas, Bananas, Melons, and whole Woods of Orange, Limon, and Pomegranate Trees, which are hung all the Year with Flowers and Fruit, besides great Forrests of Ebony and Lignum Rhodium; and among other Antiscorbutical Herbs, wild *Roman* Cammomile, and Alkekengi. Among other Animals, there are Woodcocks, Wild-Boars of divers Colours, and Horses so wild, that they would sooner fall down the Precipices than be taken. Their Flies are as green as Grashoppers, and there are Thousands of black and grey Water-Hens, that lie about the neighbouring

Digitized by Google

ing Rocks and Islets on the S. There are some Mountains that contain choice Saltpetre, red Bolus, and a fat greyish Clay like *Terra Lemnia*. On the S. E. Side there's a Mountain full of red Earth, and on the E. there's one of a fine Azure Colour, clear at Top, and dark at Bottom. Among other Fish, here are Flying Fish and Breams, which, together with their Mackarel, differ from ours in Colour. Their Snakes are as big as one's Arm, their Oysters are better than ours, and their Muscles stick so fast to the Rocks, that there's no dividing them without a Knife. M. *Rennefort*, who was here in 1666, says, there's a Water-fall between two great Rocks by the *English* Fort, from whence a Current is turned thro Pipes for Mariners to fill their Vessels. The Governor's House is at the Left Hand of the Entrance into the Fort, built after the *English* Model, and cover'd with the Tiles which served to ballast a Ship. There was an Ascent by a Balcony of 6 Steps into a great Hall of Arms, kept in excellent Order. At the 4 Corners, there were 4 Apartments of three Rooms each, hung with *India* Stuffs and *Persian* Tapestry, and furnished with Beds and Seats of grey and black Ebony, turn'd and trimm'd with gilt Buttons. They were adorned with Pictures, particularly that of King *Charles* II. in the best Place of the Governor's Chamber, and that of *Cromwel* at his Bedside upon the Hangings. The Soldiers of the Garrison have 20 Rooms in a Row at the Right Hand of the Fort, which is encompassed with Rocks. It is triangular, and has three Bastions, two of which are mounted with 7 great Iron Cannon pointed towards the Water, and the 3d, which is behind, has four, and would serve instead of a new Fort, if the Place was in Danger. On the Side of the two first there were two Redoubts, with two Cannon each, pointed towards the Sea. There's no Landing-place in all the Island but at this Fort, where the Ascent is with great Danger on the Right Side from Ladder to Ladder for near a quarter of a League. 'Tis so healthy, that for 6 Years, before our Author's Time, there dy'd but one Man, and he killed himself by a Fall in ascending it. Vines will not thrive here, and there are abundance of Rats which gnaw the Rice and Corn. The Governor's Name was *Robert Stringer*, who had a Wife, a Son, and 5 Daughters; but they afterwards went over to *England*. His Lieutenant was *Alex. Bouhler*, and the Inhabitants were about 50 Men and 20 Women, that were maintained with Bisket, Oil, and Salt-Beef, at the Charge of the *English East-India* Company. Most of them had Houses here, and came in their Turns to the Fort to watch and ward; but when a Ship comes in Sight, they all assemble there together in an Instant. Some of them were appointed to take Care of about 80 Bulls and Cows, which multiplied exceedingly, and the Governor kept 4 Women to milk his Cows, and make his Butter. There were also 6 Negroes taken by some *English* Captains at *Madagascar*, and presented to the Governor. He shewed our Author the Rarities of his Cabinet, such as the Skin and Bones of a Sea-Cow, a Flying Fish, Ambergreece, *Indian* Stuffs, 5 Pounds of Civet in a Glass Bottle, a bluish Stone, and other Curiosities. The *French* that accompanied our Author bought Boxes of Civet, Cornelian Rings, Agat Hafts, *China* Sattin, Porcellane, Japan Canes, and other *Indian* Merchandizes, with which the *English* here were well provided. The *French* paid 60 Piasters for two Civet-Cats, and they made the Governor a Present of *Spanish* Wine. In 1670, several Ships were here in the Spring, which made Provisions so dear, that the *English* rated a Calf at 7 *Spanish* Pistoles, and a Kid at 15 Franks. There were no Hens nor Sheep to sell, yet they kept 200 Cows for Butter and Cheese. At that Time there were 34 *English* Men, 14 *English* Women, and 18 Negroes of *Madagascar* and *Angola*. There's good Water to be had on the Left Side of the Entrance into the Fort; but there's no Wood to be got, except in the Mountains a League from the Harbour. That Year some Apple-Trees began to come up, and they gather'd a Bushel of Corn. Our Author makes this Island but 5 Leagues in Compass, and adds, that there are abundance of Rabbets.

Dampier, who was here in 1691, says, the Air is commonly clear, except in the rainy Months, and that there are certain moist Seasons to plant and sow. He extends it 9 or 10 Leagues in Length, and places it 3 or 400 from the main Land. He says, there's

Digitized by Google

there's Landing at two or three Places, and that he was informed there are some Trees in the Valleys fit for Building. This Island has belong'd ever since 'twas taken by Captain *Monday* to the *English East-India* Company, who have strengthen'd it with Men and Guns enough for its Security. The common Landing-place is a Bay like a Half-Moon, scarce 500 Paces wide, between the two Points. Close by the Sea-Side there are good Guns, planted at equal Distances from one End of the Bay to the other, besides a small Fort a little farther from the Sea, near the midst of the Bay, so that 'tis impossible to force it. The small Cove where Captain *Monday* landed his Men when he took the Island, tho' scarce fit for a Boat to land at, is also fortified. The *English* Town here contain'd in our Author's Time 20 or 30 little Houses, whose Walls are built of rough Stone, and but meanly furnished within, for they stand empty except when Ships are here, because the Owners have all Plantations farther in the Island, which afford Potatoes, Yames, Plantanes, and Bonanoes, Plenty of Hogs, Bullocks, Cocks and Hens, Ducks, Geese, and Turkies, which they sell at a low Rate to the Sailors in Exchange for Shirts, Drawers, or any light Clothes, Callicoes, Silks or Muslins, Arack, Sugar, and Lime-Juice: But while our Author was here, they were in Hopes to have Wine and Brandy of their own, for he was told they already began to plant Vines, and had some *Frenchmen* to manage them. There are Sea-Lions here. Most of the Islanders are very poor, but keep several Punch-houses, and have proper comely Daughters, which often marry the Seamen or Passengers, on purpose to see the World.

Mr. *Ovington*, who was here much about the same Time with *Dampier*, brought over several *French* Refugees with him, who were kindly entertained by the Company, and some advanced to considerable Posts. He saw this Island 25 Leagues at Sea. He says, the Serenity and Temperateness of the Air gives the Islanders as fair and fresh a Complexion as those in *England*. He observes, that one Cause of the Poverty of the Place is, because they are not permitted to trade with so much as one single Vessel, and have no Clothes but what are transported from *Europe*, or come by Accident. Nevertheless the Island was very populous at his Arrival, and upon his Enquiry how so many Women came thither, he was told that they were decoyed hither by a false Report spread in *England*, that all the single Men upon the Island were either Commanders or Lord's Sons; whereas they only found them poor honest Husbandmen and Mechanicks. He says, the Soil is fruitful enough to bear many Hundreds for one Grain of *Indian* Corn that is sown in it; but then it requires several Inches of Ground for its Growth, and before it comes to Maturity most Part on't is devour'd by the Rats and other Vermin. Their common Pasture, instead of Grass, is Mint and Purslain. The Company's Affairs here are managed by a Governor, Deputy-Governor, and Storehouse-keeper, who have standing Salaries allow'd by the Company, besides a publick Table well furnish'd, to which all Commanders, Masters of Ships, and eminent Passengers, are welcome. The Natives sometimes call the Results of their Consultations severe Impositions; and tho' Relief may perhaps be had from the Company in *England*, yet he observes that the unavoidable Delays in returning a Redress at that Distance does sometimes put the Addressers under a Hardship; and he thinks, that were not its Situation very serviceable to our *East-India* Ships homeward bound, the constant Trouble and Expence would induce the Company to abandon the Island, for tho' 'tis furnished with Conveniencies for Life, yet it has no Commodities of any Profit to Merchants. He says, Turkies are of late wonderfully increased, and that the Governor's and some other Gardens are stocked with Plantanes, Bonanoes, and other choice Fruits brought from the E. The Soil is generally of a reddish Colour. The Inhabitants are lewd, tho' the Company allow a Minister here 100 *l.* a Year, besides Gratuities from the Inhabitants, which he partly ascribes to the Poverty of the Place.

Mr. *Lockyer*, who was here in 1706, makes it 20 Miles in Circumference, and says, that in *Chapel Valley* was *James* Fort, of 10 small Guns, which he was told was demolished afterwards, and a much larger erected in its stead. There was also a Platform of 29, and 3 at the Landing-place. *Bank's* Pla-

Digitized by Google

Platform had 6, *Rupert's* Platform 17, and in *Limon Valley*, where the *Dutch* formerly landed, was a Platform of 6 more; all which have received considerable Additions since the Loss of the *Queen* and *Dover*. There is no landing to the Windward, and all the Creeks and Bays are secur'd as above, besides Alarm Guns on the Hills. All Things are dear to Strangers, except choice Roots and Limons. They had then about 1500 Head of Black Cattle, with Plenty of Hogs, Goats, Turkies, and all Sorts of Poultry. Their chief Grain is Kidney-Beans, from 8 to 12 *s.* a Bushel. A small Ox is sold for 5 *l.* and Turkies for a Dollar apiece. The common People subsist chiefly on Potatoes, Yams, Plantanes, Pulse, and Fish, as Horse-Mackarel, Conger-Eels, Water-Snakes, *&c.* and if they can get Flesh once a Week, they reckon it good Living. The Company allow the Soldiers salt Meat; but how often, our Author does not say. Both these and the Mechanicks may earn a great deal of Money by their Labour. Their common Drink is plain Water or Mobby, which is but one Remove from it. The chief Town, which is in *Chapel Valley*, had 40 or 50 Houses in his Time. Many of the Girls that belong to the Punch-houses dress up while Ships are here; but as soon as they are gone, run up and down again bare-foot. The Masters of the Plantations keep a great many Blacks, who upon severe Treatment hide themselves for a quarter of a Year together, keeping among the Rocks by Day, and roving at Night for Provisions; but they are generally discover'd and taken. The Island produces here and there a Drug like Benjamin, and great Plenty of wild Tobacco on the Hills, which the Slaves use to smoke for want of the right Sort. The Inhabitants are supplied with Necessaries twice a Month out of the Company's Store, at six Months Credit. The chief Commodities for Sale here are Cherry-Brandy, Malt, and Cyder, Spirits, Beer, *Madera* and *Canary* Vines, and *Spanish* Brandy, which may be taken in at those Islands, *Batavia* Arack, Sugar, Sugar-Candy, Tea, Fans, China, Jacker'd Ware, Silks, *China* Ribans, coarse Chrip'd Ginghams, ordinary Muslin, coarse Chints, blue and brown Longcloths, Salampores, and all Sorts of coarse Callicoes. An *English* Shilling goes for the same Value here, but a Crown is 6 *s.* in Account; but to be chang'd into small Money, Five Shilling Pieces are a Crown. A *Spanish* Dollar is reckon'd 6 *s.* and a *Venetian* Ducat 9 *s.* Their Weights are the same as ours.

Wyts makes it about 13 Leagues in Compass, and thinks it deserves to be called the *Inn* or *Storehouse of the Sea*. He places it 1550 *Spanish* Leagues W. from *Goa*, 1000 from *Lisbon*, 520 from the Cape of *Good Hope*, 370 from *Angola*, and 540 from the E. Coast of *Brasil*. *Morery* says, 'twas first discover'd by *John Pimentel*, Vice Admiral of the first Fleet *Emanuel* King of *Portugal* sent to the *Indies*, who was drove on Shore here by a Tempest. Most of the Waters have a Mineral Taste, and the Island is very subject to sudden Storms of Wind, and dreadful Thunder and Lightning, especially about the Time that the Sun approaches the Equinox, insomuch that Masters of Ships are obliged to carry little Sail, and they are commonly follow'd by great Calms, which are very troublesome to those that want Water or Provisions, when they chance to miss of this Island in their Passage between *Mozambique*, or the Isle of *Madagascar* to the Cape *Verd* Islands. *Heylin* says, our *East-India* Company first settled a Colony here in 1660. 'Tis reckon'd to be farther from the Continent than any other Island in the World. Some say, there's another Island call'd *New St. Helena*, 160 Leagues farther W. but *Du Plessis* says, this and the invisible Island of *St. Borondon* among the *Canaries* are both equally Fables.

There are two other Islands about the Cape, which we shall just touch upon before we proceed to *Madagascar*.

1. *CONEY Island*, in Lat. 33. 27. near the Coast on the W. Side of the Cape. Mr. *Davis* of *Limehouse* says, it has bad Ground about it, and a dangerous Ledge of Rocks on the W. Side to the Seawards, but that there's safe Passage betwixt it and the Shore. Sir *Thomas Herbert* says, 'tis but small, yet abounds with Coneys, from whence it has the Name, Pengwins, and Seals.

2. *PENGWIN Island*. Captain *Middleton* says, it lies near *Soldania*, and has abundance of those Fowls, from whence it has the Name, so that they go 500 in a Flock, besides great Numbers of Seals all about the Shore, Geese, Ducks, Pelicans, and several Sorts of Wild Fowls.

VII. *The* ISLANDS *over against* Zanguebar.

1. *MADAGASCAR* or *St. LAWRENCE Island.*

De la Val places it between S Lat. 14 and 26. *Herbert* from 16 to 26. Some begin it at the 11th, and others at the 12th Deg. but *Moll* from Lat. 11 ½. to 24 ½. and the *Sanſons* begin it on this Side the 12th Deg. and extend it beyond the 26th. *La Croix* ſays, 'tis called *Madecaſe* in the Language of the Country, *Magaſter* according to *Paul* the *Venetian*, or *Alboreo* according to *Thevet*, and *Sarandib* by the *Perſians* and *Arabians*. *Mercator* calls it *Inſula Santi Georgii*. The *Portugueſe* call it *San Lourenco*, from its firſt Diſcoverer *Laurence Almeida*, Son to *Francis Almeida*, chief Viceroy of the *Eaſt Indies* for the King of *Portugal*, who in 1506 anchor'd here the firſt time; but our Author thinks it owes its Name to the Saint's Day on which it was diſcover'd. Some ſay that *Pliny* call'd it *Cerne*; *Ptolomy*, *Menuthias*; and *Diodorus*, the Iſland of *Jol*; but our Author does not believe that the Ancients had the Knowledge of any Countries S. of *Sierra Leona*. It extends in Length from N.N.E. to S.S.W. beyond the Line, *viz.* from Cape *St. Sebaſtian* to that of *St. Mary*. *Linſchotten* places it 126 Leagues from Cape *Corientes* on the Continent, 110 from *Sofala*, and 44 from *Mozambique*.

'Tis ſaid to be one of the biggeſt Iſlands in the World: Some make it 200 and 220 *German* Leag. from N. to S. 70 in Breadth, and 600 in Compaſs. *Cauche* extends it 260 *French* Leag. in Length, 100 where broadeſt, and 800 in Compaſs. *La Croix* ſays, the Sea is very ſtrong betwixt this Iſland and the Continent, and forms a Canal that *Moll* calls the *Mozambique* Chanel, the S. W. End of which is 85 Leagues over, the Middle over againſt *Mozambique*, where 'tis narroweſt, but 44; but then it enlarges it ſelf on the N. E. Side, where there are ſeveral Iſlands. 'Tis the common Paſſage for Ships between *Europe* and the *Indies*, unleſs ſtormy Weather obliges them to another Route.

La Croix divides this Iſland into ſeveral Regions or Provinces, of which he treats in their Order, and ſays, that moſt of them are of the ſame Name with the ſeveral Rivers which water them; that all the E. Side of the Iſland runs directly from N.N.E. to S.S.W. *viz.* from the Cape of *Itapera* or *Fitorah* to the Bay of *Antongil*, and from thence to the End of the Iſland N. From the Cape of *Itapera* to the Country of *Carem Boule*, the Coaſt runs W. in the Figure of a quarter of a Circle. From *Carem-Boule* to the Mouth of the River *Sacalites*, the Coaſt runs towards the N. W. From thence to S. Lat. 17. it runs almoſt N. inclining a little to the E. and from thence to the 14th Deg. it runs directly N. It has ſeveral Rivers, fine Bays, good Roads, and Harbours. The greateſt Part of the South Coaſt, from Cape *Itapera* to *Carem Boule*, was formerly poſſeſſed by *Europeans*, eſpecially the *French*; but our Author ſays, the ill Management of the Directors of the *French Eaſt-India* Company obliged them to abandon it. He tells us, that they were the firſt Diſcoverers of the Coaſt between the Bays of *Antongil* and *St. Auguſtin*, and fortified themſelves in the S. E Side of the Province, which he calls *Carcampi*, where they built Fort *Dauphin*, of which more hereafter, and diſcover'd the Inland Countries from S Lat. 19. to the S. End of the Iſland. He owns, that the *Portugueſe* and *Dutch* have diſcover'd ſeveral Maritime Places of the Iſland, but ſays, that neither of them ever went ſo far into it as the *French*.

Herbert ſays, 'twas diſcover'd by *Triſtan d'Acuna* in 1508; but he obſerves, that the *Spaniſh* Writers differ very much in this Point. He extends it 1000 Miles from Cape *Roma* in the S. S. W. to that of *St. Sebaſtian* in the N. N. E. and 100 where narroweſt, which ſome make 230, and *Oſorius* 400. Sir *Thomas* ſays, the N. End parallels *Cuama* in *Quiloa*, and the S. End the River *Magnice*. *Struys* places it between S. Lat. 11. and 26. and Long 72. and 81. and extends it 350 Leagues where longeſt from N. to S. 120 where broadeſt, and 900 in Compaſs. The *Sanſons* extend it from N. N. E. to S. S. E. *viz.* from *St. Sebaſtian*'s Cape to that of *St. Romain* 400 Leagues, and make it 60 or 75 Leagues broad towards the Equator, and 120 or 150 towards the S. Side. They obſerve, that ſome interpret *Madagaſcar* for the

Digitized by Google

the Island of the Moon. Sir *William Monſon* places it 500 Leagues from the Cape of *Good Hope*. M. *Rennefort* extends it from Lat. 11. to 25. 50. or 336 *French* Leagues in Length, and 120 where broadeſt towards the S. Some affirm the Length to be 1200 Miles, and the Compaſs 4000. *Heylin* extends it from Lat. 17. to 26. and places it 170 Miles from the Point, which *Ptolomy* call'd *Praſum* in *Moſambique*. The *Nubian* Geographer makes it but 1200 Miles in Compaſs, and 80 Leagues ſquare. *Pory* makes it but 400 in Compaſs, and yet ſays 'tis bigger than *Italy*. *Morery* ſays, the *French* call'd it the *Dauphin's* Iſland in the Reign of *Henry* IV. He makes it but 50 Leagues long, and 100 or 80 broad, and places it under the Torrid Zone and the Tropick of *Capricorn*. M. *Dellon* extends it to S. Lat. 27. and makes it 750 *French* Leagues in Compaſs. *Morden* places it 90 or 100 Leagues from the Continent, and makes it 340 Leagues in Length. *Du Pleſſis* ſays, that 'tis not ſo big as *California*, and makes it 300 Leagues in Length.

La Croix ſays, it abounds with Iron and Steel, which their Smiths forge and purify with more Eaſe than ours. They lay the Oar after they have redue'd it to Duſt over burning Coals, between 4 Stones plaiſter'd all over with Clay, and blow with Bellows made like a Piece of Ordnance, or a Wooden Pump, which melts the Metal in leſs than an Hour. Then they take out the caſt Iron, and caſt it into Bars of 3 or 4 Pounds Weight by means of a great Fire. There are alſo Mines of fine Steel in ſome of the Provinces, and in others Iron, which differs not from it in Goodneſs. There are no Mines of Silver, but 'tis very common here ſince the Shipwreck of a certain *Dutch Eaſt-India* Veſſel (that was laden with it) on their Coaſt. They have three Sorts of Gold; that of the Country, which is a little paliſh, melts as ſoon as Lead, and is almoſt 20 Florins an Ounce. The ſecond is the Gold of *Mecca*, which the *Rohandrians* bring with them from their Country. 'Tis very fine and good Ducat Gold. The third is that brought hither by the Chriſtians, which is more difficult to melt in their Way. Their own Gold is of three Sorts, one very fine, another coarſer, and the 3d Sort between both.

There are Precious Stones of ſeveral Sorts in their Rivers and Brooks, particularly Chryſtals, Topazes, Granats, Amethyſts, Eagle-ſtones, Emeralds, Saphires, Hyacinths, Jaſpers, Blood-ſtones, Cornelians, Touch-ſtones, and the like. *La Croix* thinks it evident, that here are all Sorts of Minerals, from the many Saline, Sulphurous, Bituminous, and other Waters, which attract Medicinal Qualities from the different Soils and Metals which they paſs thro'. They have 6 Sorts of Honey, all of a different Taſt, *viz.* that of Bees, that of certain green Flies, and two Sorts of the Honey of Ants, one of which is made by the Ant-Flies that gather in the Holes of Trees, and the other by that Sort which is bigger, but not winged, and make their Honey on the Hills of their own raiſing. There's another Sort of Honey, or rather Sugar, which is dropped by Flies upon little Shrubs, and turns afterwards into Spots, or little yellow, green, or red Bits. There's another Sort of Honey too that is ſuppoſed to be venomous, and made by Bees that ſuck the Bloſſoms of a poiſonous Tree. The Inhabitants make three Sorts of Wine; firſt Mead, which is common, and another Sort from Sugar, which is bitteriſh. They boil the Sugar-Canes in Water to the Conſumption of one Third, then pour it out into great Gourds, which in three Days makes it ſo ſtrong, that it will eat thro' an Egg-Shell in leſs than a Night. They make a 3d Sort from the great Bananas boil'd 4 or 5 Hours, which is ſoweriſh. There are ſeveral Sorts of Oil with which they rub themſelves, tho' ſometimes for want on't they uſe the Fat of Oxen mix'd with Wax. They have ſeveral Sorts of Earth, *viz.* Red Earth, which is good as the Bole-Ammoniack of the Apothecaries, and that called *Terra Sigillata*, the ſame that is brought from the Iſle of *Lemnos*; and *Flacourt* ſays, that of *Madagaſcar* is as good as the other. There's another white Earth like Chalk, which ſerves to whiten Linen inſtead of Soap. There are ſeveral Gums, ſome fragrant, ſome ſtinking, and others without any Smell at all, ſome of which are uſed inſtead of Glue, and there's one white Sort made by Ants, that hangs at the Branches of Trees. They have Musk, and two Sorts of Dragon's Blood.

Digitized by Google

It abounds with divers Sorts of Plants, *viz.* Rice of ſeveral Sorts, two of which are barbed and white, the others without a Beard, with a red Chaff or Husk, which turns to the Colour of a Roſe when boil'd. One Sort grows only in Winter, and another only in Summer. There are ſeveral Sorts of the Root Igname, ſome white, ſome of a Violet Colour, and others of a light Grey, which are very well taſted: Some are as big as a Man's Middle, ſo that two Negroes can ſcarce carry them; but moſt of them are as big as a Man's Leg, and 100 or 150 of them purchaſe an Ox. There's one bitter Sort, which the Iſlanders ſoak, and boil the Bitterneſs out. Then they ſell it, and the Negroes count it a Dainty, and ſome dry them in the Sun till they are hard as Wood, ſo that they'll keep a Year or two. There's another Sort of an agreeable Taſt, of which one Plant only ſhoots forth 10 or 12 Roots, which are no bigger than a Hen's Egg, and have the Taſt of Cheſnuts, only they are more ſavoury, and don't load the Stomach; but they are cover'd with a little Skin, which is bitterish. One Sort is like Vine Roots, bears black Berries, and has a Muskiſh Taſt. Its Wood dies every Year, and its Leaves are like thoſe of a Vine. 'Tis very inſipid, and difficult to digeſt, ſo that 'tis only eaten in Time of great Scarcity; and there's another Sort which grows in the Ground, is as big as a Man's Head, with a grey Skin, and they eat it either raw or dreſs'd. There are other Roots with a reddiſh Skin that grow under little Shrubs, ſome of which are as big as a Man, and very ſweet, but moiſt, ſo that they ſatisfy both Hunger and Thirſt, are eaten raw, digeſt well, and cauſe Urine. They have a Sort of Cabbages with round Leaves, large enough for Umbrella's, which they boil with Meat, and are as good as Artichokes. There's another Root like a Turnep as big as one's Thumb, which is ſo fruitful, that one Plant produces 100 Roots in a Year. There are three Sorts of Nenuphar, with white, yellow, and violet Flowers, and may be eaten boil'd or roaſted, as we do Cheſnuts. The violet Sort is very ſweet, and eaten by both Sexes to provoke Luſt; but the others have the contrary Effect.

They ſow a great deal of Barley here, which grows to the Height of a Pike, is ripe in *June*, and is hard of Digeſtion. They have little Beans, which are well taſted, whether ripe or not, but load the Stomach. They are ſown in *June*, and are ripe 3 Months after. They ſow ſmall Peaſe at the ſame time, which come up well, and they have a ſort of *French* Beans. There's one Sort which comes up well enough, but the Fruit lies under Ground, and every Husk contains but one Bean. It has Leaves like thoſe of Trefoil, but no Branch nor Stalk. There's another Tree which in every Kid bears one ſmall Pea, and grows as big as a Cherry-Tree; and in one of the Provinces they maintain Silk-Worms, with its Leaves. They have Plenty of Bananas, which in ſome Places they put in all their Preparations. Some are as big and long as a Man's Arm, and ſome bear Fruit half ſo big. The Bananas are very nouriſhing, and they roaſt them like Apples when ripe. They often gather the unripe Grapes, and hang them up to the Cieling, where they ripen in leſs than a Fortnight. In ſome Parts they ſpin the Bark of this Tree, and make Habits on't. They have Plenty of Ananas, and Water-Melons of two Sorts, ſome black, and others red. The Inhabitants eat them to cool their Thirſt in the exceſſive Heats. There are other Melons like ours, and Gourds that thrive well, whoſe Seed was firſt brought from *France*. They are of two Sorts, *viz.* long and round. They boil the long ones before they are quite ripe, and eat them with Milk or the like; and when they are dry, they uſe them inſtead of Bottles. There's abundance of Sugar-Canes; but the Inhabitants know not how to take out the Sugar, ſo that they only draw a Wine from them, which is not ſo good as Metheglin, and will not keep above 3 Days. There's a great Tree on the Coaſt which bears a Fruit called *Voanate*, that is nouriſhing, but clammy, and the Inhabitants eat it alone, or with Milk and Salt. The Wood is very ſubſtantial, fit for Building, very even and ſmooth, and not ſubject to rot. There's another Fruit called *Ventaca*, as big as a Quince, with a Skin as hard as that of a Gourd, and full of flat Kernels. The Juice and Pap, when 'tis ripe, taſts and ſmells well; but 'tis bad for the Stomach if it be not ripe. *Garcias* calls them the Quinces of *Bengala*. They draw

a

Digitized by Google

a Wine from them which taſts like Beer, and looſens the Belly, but cauſes Gripings. They fatten Hogs with the Fruit when 'tis ripe. They have white Pepper enough to load a Ship every Year. The Turtles and Wood-Pigeons feed upon it, and it ripens in *Auguſt*, *September*, and *October*. They have the Great Cardamum, Malaguetta, or the Grain of Paradiſe, which bears a red Fruit and a white Pulp, of a pleaſant ſharp Taſt, with black Kernels. There's alſo very good Ginger. *Flacourt* ſays, they have but little; but *Cauche* tells us, there's great Plenty of it over the whole Iſland, and that the Iſlanders plant nothing elſe about their Houſes to keep off the Rain, and near the Hives to feed the Bees. There's another Sort called Hog's Ginger. They have a few Coco-Nuts, ſuppoſed to have been firſt drove upon the Shore above 60 Years ago by the Sea, and ſometimes there are Coco-Nuts ſtill to be ſeen floating near the Shore, which 'tis ſaid come from ſome Country where the Coaſt is planted with thoſe Trees. There's alſo *Indian* Saffron, and Buck-Wheat, which is yellow in the Inſide, and taſts like Ginger, only 'tis not ſo biting, and ſerves for dying or ſeaſoning Victuals. There's another Fruit called *Voatzatre*, which grows upon a pretty large Tree with broad Leaves. The Fruits grow together like a Bunch of Onions, are each as big as an Egg, and full of Juice, and the dry Paring has an Aromatick Taſt, and is good to eat. The Natives uſe the Leaves to make Cords, Mats, and Baskets. There are abundance of Vines, whoſe Grapes are ripe in *January*. There's a little Plant called *Anbouton* like Flax, which has a bitteriſh Stiptick Taſt. The Natives chew it to blacken their Teeth, Lips, and Gums, and to ſweeten their Breath. 'Tis corroborative, and much uſed in Time of Famine. There's another wild Fruit called *Lengou*: The Natives chew its Skin to blacken their Mouth, Teeth, and Gums. It has ſeveral Angles, and taſts like a great green Nut. There's another ſtinking Herb call'd *Zanale*, that creeps upon the Ground, and is very much coveted by the Natives for the ſame End as the former, and to cure ulcerated Gums; but thoſe that chew it contract an intolerable ſtinking Breath. There's alſo Betel, which they chew with a little Lime as they do in the *Eaſt Indies*; but in ſome Parts they chew it with a certain Fruit like the *Indian Areca*. There's a Plant called *Bangbeh*, of which they make Indigo for Dying, by infuſing the Stalks and Leaves when they begin to bloſſom in Water, and ſtirring them every Day with a Stick. Two or three Days after, when 'tis rotten, they ſtrip off the Shanks and Fibres, draw off the Water, which is charg'd with a Violet Colour, into a Tub by a Hole at the Bottom of the Veſſel, ſtrain it thro' a Sieve, put ſome Olive-Oil into it, mix them well together, and ſtir them. Then they let the Dye ſettle to the Bottom; after which they draw the Water off again by ſome Pipe, or elſe ſpunge it out till there's nothing at the Bottom but the Lees, which is the true Indigo, and then they dry it upon a broad clean Stone. There's a Sort of Balm with great Leaves, that grows two Inches high, and ſmells like Cloves and Cinnamon. There's a great deal of Oriental Cypreſs along the Rivers and Marſhes, which they uſe againſt Pains in the Head. There's a Plant called *Aromatico*, two Inches high, which bears a hollow Flower and Fruit like a Veſſel with a Cover to it. There are two Sorts, ſome with red Flowers, and others yellow. The Inhabitants dare not gather them, and pretend that ſuch Travellers as do will be ſuddenly overtaken with Rain. Theſe Flowers will hold each a Gallon of Rain-Water, if we may believe *La Croix*. There's another Plant that creeps on the Ground, and bears ſmall Peaſe or red Beans. Their Goldſmiths uſe it to ſolder Gold inſtead of Borax, which they know nothing of. For this Purpoſe they grind them to Flower, and mix them with the Juice of Limons. There's another Plant called *Fenouxs*, with yellow Flowers, and thick Leaves. The Women apply it to certain Parts of their Body to fetch off the Hairs. They alſo burn it while green, when it ſmells like Melilot, and of the Aſhes they make a Coſmetick. There's a Tree call'd *Fimpi*, which is as big and as high as an Olive. The Bark is of an Aſh-grey Colour. It ſmells like Muſk, and has a more biting Taſt than Pepper. The Wood is very white and hard, and ſmells like Aloes, and the Leaves have the ſame Scent as the Bark. They are jagged, a little bigger than thoſe of the Great Myrtle,

Digitized by Google

Myrtle, and have almoſt the ſame Smell, which cauſes Sneezing. There's Ebony, which grows in the Trunk of a great Tree that has little Leaves of a dark Green like thoſe of a Myrtle. There are 3 or 4 Sorts on't. There's another Tree which bears a Fruit a little longer than one's Finger, of an Aſh grey Colour, with Leaves like thoſe of a Pear-Tree. The Fruit contains a white ſweet Juice, which they uſe to curdle Milk. There are Box-Trees, and another Sort that bears Pulſe. There's another Tree whoſe Wood has a Smell almoſt like Cummin-Seed, but ſtronger, and the Bark is like that of Elder. The Inhabitants uſe it againſt the Fever and all Wounds, for which Purpoſe they bray it upon a Stone with Water. There's another Sort of Wood, the Heart of which is full of Veins of a green Colour, which has the Smell of Roſes, and is commended as a Remedy for Pains in the Heart, and for Swoonings, if apply'd to the Stomach after 'tis bray'd on a Stone with Water. The Tree of which the Inhabitants make their Canoes is never Worm-eaten, and it produces a Gum which is ſaid to be good for Wounds. There's another Tree that produces Benjamin, and a very ſtrait high Tree, whoſe Wood is blacker than Ebony, and without any Knot, Fibre or String, ſo that it may be plan'd as ſmooth as a Horn, and the biggeſt Part of its Trunk is not above 7 Inches thick. But there's a Sort of black Wood which is more crooked, grows in ſtony Places, is encompaſſed with Thorns, and has very few Leaves. Its Bloſſom ſmells well, as does alſo the Wood when 'tis kindled, and there are ſome of theſe Trees that have a thick Trunk and Branches. There's a Sort of Tree called *Zaga*, of which they make Handles for their Zagays. There's an Apple-Tree, whoſe Fruit when ripe opens into 4 Parts. The Pith is full of Kernels, and cover'd with a thin Orange-colour'd Skin, that makes a Sort of Dye. There are alſo a great many Tamarinds, and a little Shrub called *Vahats*, the Bark of which, when ſtripp'd from the Roots, ſerves for Dying. While the Roots are freſh, they are eaſily ſeparated by Water; but when they are dry, it can't be done without a little Wooden Knife. When they uſe it, they boil the Bark over a ſober Fire with the Silk or Wool they would dye, in Lye made of the Aſhes of the ſaid Bark. There's a Tree called *Anghive* of two Sorts, one bigger than the other. The leaſt bears a Fruit as big as Gooſeberries, and the biggeſt a Fruit as large as a Hen's Egg, and both are of a Scarlet Red, and well taſted. The Decoction of its Roots is preſcribed for the Heat of Urine and the Gravel. There's a Plant called *Varancoco*, which twines about great Trees, and bears a Violet-colour'd Fruit as large as a Peach, of an agreeable Taſt, but ſweetiſh and clammy, with four great Kernels in the Middle. The Wood is fit to make Hoops, but they'll not laſt above a Year, becauſe they are apt to be Worm-eaten. There's a red roſinous Sort of Gum in the Bark, which melts and ſmells like a Candle. The Tree called *Rhoa* or the Dragon-Tree is as big as a Nut-Tree. The Bark, Branches, and Trunk, contain a Juice as red as Dragon's-Blood, for which Reaſon the Apothecaries have given it that Name. The Wood is white, and ſoon ſubject to rot. The Leaves are like thoſe of a Pear-Tree, but a little too long. The Flower is as red as Fire. The Fruit is as big as a little Pear, only 'tis bigger towards the Tail or Stem, and forms as it were five Horns. It contains a Stone within it, which is cover'd with a ſingle Membrane, and has the ſame Form, Colour and Smell, as a Nutmeg. Some ſay, that when this Fruit is par'd, it ſhews the Mark of a Dragon; but *Flacourt*, who par'd ſeveral, denies it. There are three Sorts of this Tree, ſays *La Croix*, which bear different Fruits. They draw an Oil from the Stones, which is commended for a ſovereign Remedy againſt Inflammations, Burnings, St. *Anthony*'s Fire, the Itch, and Scabs. 'Tis alſo ſaid to be anodyne, and that the Decoction of the Bark is good to ſtop the Bloody Flux. There's a Sort of Jeſſamin-Tree like ours, with fragrant Flowers, which the Women infuſe in the Oil of Seſamum to perfume it. There's a little Tree called *Langhare*, which commonly grows in the Hedges and Thickets, with long jagged Leaves, and ſtrait Stem and Flowers that grow in the Bark of the Trunk without any Shank, which are of a Blood Colour, and ſo biting, that if chew'd they cauſe Spittle, and looſen the Belly. 'Tis ſaid, that the Wood bruis'd and ſwallow'd,

Digitized by Google

low'd, or only hung about the Neck, is good to ſtop the Hiccough. There's a Tree called *Mimbouhe*, that bears fragrant Flowers that chear the Heart, and a great Tree called *Horame*, that produces a certain Gum well known among the Apothecaries by the *American* Name of *Tacamahaca*, which is properly Roſin. The Tree is about the Size of a Poplar, with long ſtrait Leaves, and thick roſinous Fruits as large as a Prune or a great Nut. The Wood is fit to make Planks for Barks and Ships. Here grows alſo the Banian or ſpreading Fig-Tree of the *Indies*. There's a great Tree called *Endraebendrach*, the Wood of which is yellow, and ſmells like Sandal. 'Tis heavy and as hard as Iron, and loſes no more by lying under Ground than Marble. There's a Shrub called *Erocoſſe*, that bears little round Cabbages good to eat. There's another called *Sira Moughits*, the Wood of which ſtrengthens the Heart. The Leaves have the ſame Smell as white and yellow Sandal, the Bark ſmells of a Clove, and it yields a fragrant Roſin. That called *Fouraha* yields a green fragrant Balm, which is a powerful Remedy againſt all Sorts of Wounds and Bruiſes. The Women mingle it with their Oils to anoint their Hair, and it bears a large Fruit. There's another Tree called *Arindranto*, whoſe Wood, when rotten and burnt, yields a wonderful good Smell. *Laſſa* is a creeping Plant, which yields a Gum like Scammony. It purges very violently. *Laldits* is a fine woody Plant, which bears red Flowers in a Bunch like a Plume of Feathers. The Seed provokes Vomits, but the Root ſtops them. *Pendre* is a Tree like *Rauver*, and of the ſame Height. It caſts forth Leaves very ſharp towards the End, and higher than thoſe of Aloes, and produces 10 or 12 white Flowers of an admirable Smell, which in the Sun-ſhine the Women infuſe in the Oil of Seſamum. That called *Apocapouc* is a Tree with Leaves and Flowers like thoſe of the Lawrel: The Fruit is rank Poiſon, yet they extract an Oil from the Stones, which are as big as an Almond, to anoint the Hair. There's another Tree call'd *Oviau*, which bears a Sort of Almond, from whence they draw a choice Oil for anointing their Hair, and ſeaſoning their Proviſions. There are alſo a Sort of Bamboo-Canes: The Natives cut and burn them, and dung their Rice-Fields with the Aſhes. Some are as big as a Man's Leg. They are all high, black, round, and the chief Ornament of the Country. Every three Years they bear a Fruit no bigger than a ſmall Bean, of which they make as good Meal as we do of our Corn. 'Tis as uſeful to theſe Iſlanders as the Coco-Tree is to the *Indians*, for they make Pots of it for boiling their Rice, Buckets and other Veſſels for drawing Water, Bottles, Knives, Pens, Violins, Harps, Meaſures for their Rice, Stables, Pipes, Tinder-Boxes, little Wherry-Boats for only two Perſons, Roofs, Cielings, Planks, and Props for Houſes and Chairs to carry great Perſons in; for which End they bend them as ſoon as they begin to grow. The Bark of the Tree *Amporefitchi* is good to make Cordage. The Leaves of the Tree *Taovoule* have no Shank, and grow round the Branches as if they were glued. *Ouvave* is a kind of knotted Reed like the *Indian* Canes: The Root is good to eat. The Wood is of a Violet Colour, and ſerves for dying Red. There are a great many true Grapes in ſome Parts of the Iſland, but the Inhabitants dare not taſt them, becauſe they know not their Quality. There is good Tobacco every where, beſides ſeveral Sorts of Jeſſamin. They have alſo a great deal of Hemp, which *Flacourt* ſays the Natives cultivate with a great deal of Care, and ſmoak the Leaves when dry'd inſtead of Tobacco, which makes them ſleepy; but when they awake, they are brisk and merry, and pretend that they have had pleaſant Dreams; but none except their old Women and Prieſts, and ſome Negroes, uſe this Cuſtom to drive away Care and Melancholy. They throw away the Stalk of the Hemp, inſtead of ſpinning it into Cordage. They have Leeks, Purſlane, Lettice, Skirwort, Cabbages, Radiſhes, Dill, *Turkey* Wheat, Muſtard, and White-Thorn. There's a great Tree called *Voarats*, whoſe Leaves are like thoſe of an Olive, which, with the Height and Extent of its Branches, makes it yield a fair Proſpect. The Fruit is very tart, and as big as a Cherry, with a thick Shell like that of a Nut. There are three Sorts of them, *viz.* the white, black, and red. There's another ſweet Fruit of a Violet Colour, no bigger than a red Gooſeberry, which gives a Black and a Violet Dye.

There

Digitized by Google

There are white Mulberries here of such a strong Taſt, that they fetch the Skin off one's Tongue. The Fruit is like ours, but the Leaves are different. *Tumbeba* is the Fruit of a Tree like a little Pear-Tree, which kills Dogs. The Tree is very high, the Wood is of a Musk Colour, harder, and more manly than any Tree in this Country; but it may eaſily be poliſhed. The Leaves are long, like thoſe of an Almond-Tree, and bear Flowers like thoſe of Roſemary. It has no Smell, and turns at laſt into Fruit. There's another Fruit call'd *Voanane*, half a Foot long, which is compoſed of 4 Parts, and taſts like ſtony Pears. 'Tis a ſovereign Remedy againſt Looſeneſs. There's a Plant call'd *Fouts or Douron*, which grows in Form of a Plume of Feathers, the Leaves being a Fathom in Length, and two Foot broad. There are ſome that are above 8 or 10 Foot long, beſides the Stem, which is ſometimes two Foot more. *Vos* is another Fruit like a Grape, but as long as an Ear of *Turkey* Wheat. It lies in a hard Huſk. Every Grain or Berry is like a large Pea, encompaſſed with a blue Skin, of which they make Oil, and of the Grains or Berries they make Meal to eat with Milk. The Inhabitants commonly chew it with a Sort of Betel-Leaf and a little Lime, as formerly mentioned, to preſerve Health and a ſweet Breath. They build the Walls of their Houſes with the Stalks of this Plant, and they'll laſt 6 Years, as will alſo the green Leaves, which ſerve for Mats, Plates, and Cups. The *Alamatou* are ſuppoſed to be a Sort of black Prunes, becauſe they taſt like them when ripe; but they have no Stone, and only 10 or 12 ſmall flat Kernels. They grow alſo upon a Shrub, whoſe Leaves are like thoſe of our Prune-Trees. There's a great Number of theſe Prunes about a certain Harbour here, which the *French* have for that Reaſon named the *Port of Prunes*. There is another Sort of the Size of a wild Prune, which has the like ſmall Kernels inſtead of a Stone, and taſts like Figs. Too many of them cauſe a Pain in the Stomach. There's Plenty of ſweet and ſower Pomegranates, which ripen in *November* and *December*, as alſo ſeveral Sorts of Oranges, particularly ſmall ones of a delicate Taſt, that is ſweetiſh. They are no bigger than a Prune, have a very fine Colour, and hang 10 or 12 upon one Stem. There are 7 Sorts of Citrons, ſome ſweet, large and fair, ſome common, and others ſharp, and no longer than Prunes. Two Sorts have the Taſt of Muſk, and are long, of which ſome are large, and others ſmall. There's another Sort as big as an Infant's Head, cover'd with a thick Shell, which is good to candy. *Ravenſara* is a great Tree like a Lawrel, only the Leaves are ſmaller. The Fruit is like a great green Nut, and taſts like Cloves, as does alſo the Rind and Leaves. The Bloſſom has the Form of a Clove, as well as the Taſt, Smell, and Vertue; but the Tree only bears Fruit once every three Years. When the Inhabitants have a mind to the Fruit and Leaves, which they ſtrew with Onions and Ginger in a Diſh of Fiſh, they don't climb the Tree, but cut it near the Root. *La Croix* adds, that this Tree grows upon the Mountains, and that it is Male and Female. He and *Flacourt* mention ſeveral other Trees, Fruits, Herbs, and Plants; but theſe being the chief, we refer the Curious for the reſt to their Books.

Admiral *Lancaſter* ſays, that here's Plenty of Limons. Captain *Keeling* tells us of a ſtrange Plant here, which he ſuppoſes to be a wild Coco Nut. 'Tis of a ſhrubby Nature, and comes up with ſeveral prickly Stalks near two Yards long, with a Leaf at the End of each, indented half round like Sword-Graſs, and as big as that of a Cabbage. Out from the Tops of theſe Stalks, among the Leaves, ſhoot forth great Numbers of woody Branches, very thick ſet with Fruit, of the Colour and Size of a large Catherine-Pear, and like a Sheep's Bell in Form, with a Rind bearing forth near the Head, which is flat at Top, ſmooth within, and hard almoſt like the Coco-Shell, and there's a Kernel within which is hard, but may be eaten, and contains a Spoonful of cool clear Water like that of Coco. There's another Tree he ſays as large as a Pear-Tree, thick ſet with Boughs and Leaves like thoſe of the Bay-Tree, which bear a mighty, great, round Fruit, that hangs on a ſtrong Stalk, divided by Seams thro' the whole Length of it into 4 Parts. The Rind is vaſtly thick, and if cut while green, it yields a ſort of Turpentine. It has a Kernel of a darkiſh Colour, hard, bitter, and very ill taſted. Admiral *Beaulieu* ſays, they have

white

The chief TOWNS *are,*

1. *Liege*, called *Leodium*, *Leodicum*, and *Legia*, by the Latins. 'Tis the Capital of the Country, and lies on the *Maes*, 17 Miles S. W. from *Aken*, 12 S. from *Maestricht*, 10 N. E. from *Huy*, and 17 N. W. from *Limburg*, in Long. 24. 15. Lat. 50. 40. 'Twas but an ordinary Village before the Time of *Charles the Great*; but the making it a Bishop's See, drew a Concourse of People to it. The See is said to have been founded by *Hubert*, Son to *Bertrand* Prince of *Aquitain*; tho' some make it of a much older Date. They say, he came into *Brabant* on the Account of his Religion, which had not much Footing in his own Country: That at *Maestricht* he contracted a Friendship with *Lambert*, Bishop of that Place; and going afterwards to *Rome*, was made his Successor by Pope *Sergius*; those of *Maestricht* having murther'd *Lambert*: And tho' *Hubert* was much caress'd by the Inhabitants of that Town, yet not trusting 'em, he remov'd to *Liege*, where he built the Cathedral, which he dedicated to St. *Lambert*, and order'd his Corps to be interr'd he. bout 713. The Bishop is Suffragan of *Cologne*, and Prince of the City and Country of *Liege*, Marq. of *Franchemont*, Count of *Loos* and *Harbaye*, &c. He calls himself likewise Duke of *Bouillon*, because of some Pretensions he has on that Dutchy. *La Forrest* says, the Chapter is compos'd of 60 Canons, all Nobles or Doctors. He is of the Opinion of those who say, the Town was founded by *Ambiorix*, K. of the *Eburones*, after he had cut off the *Roman* Legion. He says, 'twas walled by St. *Hubert* Bishop of *Maestricht*; that 'twas ruin'd by the *Normans* in 881; that *Henry* I. Duke of *Brabant* took it in 1212, and let his Men pillage it for 6 Days. There have been frequent Disorders here about the Elections of their Bishops, and many Quarrels betwixt them and the Magistrates of the City about the Sovereignty of the Town, which they pretend to be independent of him. In 1409. *John* Duke of *Burgundy* killed above 36000 *Liegois*, for having made War upon their Bishop; and *Charles the Bold*, Duke of *Burgundy*, chastis'd them so severely on the like Account, that ever since they have entertained an irreconcileable Hatred to the *Burgundians*. We have formerly taken Notice, That of late Years, they have generally chosen the Elector of *Cologne* for their Bishop.

The City is now large and beautiful, about 4 *English* Miles in Circumference, and much resembles *Roan* in *France*. Within the Walls, there are several Vallies, Hills and Islands, form'd by the *Maes*, which runs through it in two Streams. Most of the Streets are spacious and well built, and have a clear Stream running through the middle of 'em. Besides which, many of the best Houses have two or more Fountains with cool Spring Water. In the City and Suburbs are reckon'd above 100 Churches: The most stately of which is the Cathedral; for which, and many other excellent Fabricks, *Liege* has this Character given it by Travellers, That for fair Churches, Convents, and other Religious Foundations, no City in *Germany* or *France* is able to compare with it. The *English* Jesuits have a College here, well seated on the top of an Hill; and not far from thence, there's an *English* Nunnery. In St. *William's* Convent without the City, lies Sir *John Mandeville*, the famous *English* Traveller, whose Works are better esteem'd in *France* and *Germany* than here. Having viewed most Cities in the World, he chose this to spend his last Days in. Near his Grave are kept his Saddle, Spurs, and Knife, that he made use of in his Travels; and on his Tomb, there's an Inscription in old barbarous *French*, requesting those that pass over him to pray for him. They have an University here, once so famous, that at one Time they had 9 Kings Sons, 24 Dukes, and 29 Counts Sons, besides many others of Quality, who studied here; and, if we may believe *Meibomius*, in 1131, there were 21 Kings Sons in this University. This City is still very populous; but the Account given by some Historians, that *Charles* Duke of *Burgundy*, when he lack'd it, put 100000 of the Inhabitants to the Sword, as is mentioned by Dr. *Nicholls*, seems to have no good Authority; for *Comminus*, who was present in that War, and gives an Account of the sacking and burning the City, says no such Thing; but he owns, that abundance of 'em were drown'd. The Citizens are form'd into 32 Companies of Freemen; among whom the Goldsmiths have the Preeminence.

Digitized by Google

The Dioceſe of *Liege* was formerly more conſiderable than at preſent; for *Luxemburg*, *Namur*, and *Hainault*, have enrich'd themſelves with its Spoils, beſides what it has ſuffered in the late and preſent Wars. It contains, or has a Right to, 52 Baronies, 18 Wall'd Towns, and 400 Villages, well Peopled. Dr. *Brown* ſays, the Biſhop's Palace in the City is a very noble Structure; That the Cathedral is built of red Stone, and has abundance of fine Carving about it; That the Canons of the Church are very rich and powerful. They have 60 called *Canonici Majores*, who muſt all be of Noble Extraction, except a few Learned Men they admit among them. Theſe 60 elect the Biſhop. They have 12 called *Canonici Mediocres*, and 12 more called *Minores* or *Parvæ Menſæ*, according to Mr. *Ray*, who ſays, the Three States of this Dioceſe, compos'd of the Clergy, Gentry, and Commons, have a conſiderable Share in the Government, there being no Tax rais'd, or other Matters of Weight tranſacted, without their Conſent. Dr. *Northleigh*, in his Deſcription of the *Spaniſh Netherlands*, ſays, they have a Key of a quarter of a Mile long upon the *Maes* for landing their Goods; That it reaches to their new Bridge over the *Maes*, which has 6 Arches, every one twice as large as thoſe of *London* Bridge, and not much inferior to the celebrated Arch of the *Rialto* at *Venice*. Veſſels paſs eaſily through 'em. The Bridge riſes high in the middle, is broad enough for 5 or 6 Waggons to go a-breaſt, and is mounted with ſome Cannon. The Form of the City, he ſays, is Triangular, and their Citadel lies on a ſteep Hill; was built by the Archbiſhop of *Cologne* in 1650, was afterwards demoliſhed by the *French*, but ſince rebuilt, and ſtrongly fortified. He mentions great Variety of Dialling invented by the famous Mathematician *Linus* in the pleaſant Garden belonging to the *Engliſh* Jeſuits; and among them, that in the middle of the Garden is the moſt curious, by its ſeveral Ways of ſhewing the Hours: 1. By a Wine-Glaſs; in the middle of which, a perpendicular Gnomon directs to the Figures on the Outſide. 2. By a Glaſs reflecting like a Looking-Glaſs; in which, if one centers his Eye, he ſees a little Star, cauſed by the Penetration of the Sun-Beams, that points at the Hour. 3. A round Glaſs full of Wire, and ſmall Braſs Bars that ſurround it, from which, to the Point of Time, the Sun-Beams are reflected in a *Punctum*, as from a Burning-Glaſs; ſo that by counting the Number of theſe little Bars, from the firſt to the Point, where the Heat centers, a blind Man may, by his Fingers, find the Hour of the Day. 4. Reflexions on a Globe of Conſtellations for a Night-Dial. 5. By the Elevation of the Pole-Star, and the Light of the Sun trajected. 6. By the receding of the Gnomon, till it caſt no Shadow, the Reverſe of ordinary Dials. He ſays, the Convent of St. *James* is a noble Structure, with two beautiful Monuments, one of their Founder, and the other of one of their Abbots, both curiouſly wrought in *Relievo*; as is the Paſſion of our Saviour in the Skreen. They pretend to abundance of Relicks; among which, they ſhew a Tooth, ſaid to be one of our Saviour's; ſeveral Pieces of the Croſs; ſome of *Mary Magdalen*'s Hair; a Shift of one of the Children murder'd by *Herod*'s Command; ſome of the Apoſtles Skulls; and many Relicts of Martyrs. Among the laſt, they ſhew an *Antipendium*, made of the embroider'd Cloak that our King *Charles* I. wore on the Scaffold when he was murther'd; which the Doctor ſuppoſes, if it be true, muſt have been given them by his Queen. He adds, That in this City there are two or three handſome Squares; and that the Biſhop's Palace is a noble Fabrick, with ſeveral Courts; one of which is more ſpacious than our *Royal Exchange*, and has fine Piazza's. *Miſſon* ſays, the adjacent Coal-Mines have drawn thither a great many Armourers; and that the Vineyards on the neighbouring Hills afford them a tolerable ſort of Wine, but not ſtrong; the neighbouring Woods ſupply them with Plenty of Veniſon; and they have excellent Mutton, fed in the Forreſt of *Ardenne*. This City was taken by the *French* in 1675, and next Year they deſtroy'd the Caſtle. It was retaken in 1702 by the Confederate Troops. Pope *Innocent* II. held a Council here in 1131, and crown'd the Emperor *Lotharius* II. in the Cathedral, when the Chapter, as their Annals ſay, conſiſted of 9 Kings Sons, 14 Dukes Sons, 29 Counts, and 8 Barons.

2. *Ban-*

Digitized by Google

Bouillon, on the River *Semay*, is by Dr. *Nicholſon* reckon'd to belong to this Diocese; but *La Forreſt* and *Mall.* reckon it in *Luxemburg*: To the Deſcription of which, we refer it.

3. *Tongren*, called by the Latins *Tungrorum Oppidum*, and anciently *Atuatuca Tungrorum*. 'Tis the oldeſt Town in theſe Parts, and was formerly very conſiderable, when there lay a pav'd Road from it to *Paris* of 200 Miles long; ſome Pieces of which are ſtill to be ſeen. Many *Roman* Coins, and other Antiquities, have been found in and about this City. There's one very remarkable in the great Church, ſuppoſed to be the Image of *Minerva*, worſhip'd here before they were converted by *Maternus*; but others think, the Image agrees better to the Deſcription of *Hercules*, who had a Temple in this Town. *La Forreſt* ſays, a Biſhop's See was founded here very early; but was tranſported firſt to *Maeſtricht*, and then to *Liege*; and ſome ſay, there were 100 Churches in it when it was deſtroyed by *Attila*; but it has nothing now of its ancient Luſtre. The *French* King ſeiz'd it in 1672, but quitted it next Year. The Marſhal *de Villeroy* took it by Surprize in 1703, with a Confederate Garriſon of 700 Men; but abandon'd it again in 1705, upon the Approach of the D. of *Marlborough*. Dr. *Northleigh* ſays, they pretend it was built 1100 Years before our Saviour; and that 'tis generally believ'd, the Ruins of the old Caſtle, and the old Wall on Biſhop *Maternus*'s Chapel, are older than the Time of our Saviour's Birth. He ſays, he obſerv'd in the Moulding the Images of *Sol*, *Venus*, and *Jupiter*. Their old Church is a very handſome *Gothick* Structure, and has a Dean and 22 Canons. The *French* demoliſhed the Jeſuits Church there, which is ſince rebuilt. It had certainly a conſiderable Territory in the Time of the *Romans*, as appears from *Ceſar*, *Strabo*, *Tacitus*, *Julius Capitolinus*, &c. About half a Mile from the Town, there's a Mineral Water of a Chalybiat Taſt, which tinges the Earth and Stones with an Iron Ruſt, which ſome take to be the Spring deſcrib'd by *Pliny* in his Natural Hiſtory, *Lib.* 3. *Cap.* 2. but moſt Antiquaries apply it to the preſent *Spaw*, about 8 Leagues from hence; tho' conſidering the former Largeneſs of the Territory of this City, it may perhaps include both. This Town lies 15 Miles N. W. from *Liege*, and 9 S. W. from *Maeſtricht*.

4. *Hoy*, on the *Maes*, 12 Miles S. W. from *Liege*, and 17 N E. from *Namur*, is a fair old City, in a pleaſant Valley, on a ſmall River that falls here into the *Maes*, over which there's a fine Stone Bridge, that joins the two Parts of the Town. 'Tis the Capital of the *Condros*, and, according to ſome Antiquaries, was formerly a potent City call'd *Beneſactum*, and afterwards *Hesum*, or *Huyum*; but being ruin'd by the Incurſions of the *Barbarians*, it loſt its Juriſdiction. 'Tis defended by a ſtrong Caſtle on a neighbouring Hill, and well fortified. It had formerly Counts of its own; but the laſt of 'em reſign'd it to the See of *Liege*. They have Iron Mines in the Neighbourhood, which employ moſt of the Inhabitants. 'Twas taken by the *French* in 1675, who diſmantled it. The Biſhop of *Liege* fortified it again. The *French* retook it in 1693; but the Duke of *Marlborough* recover'd it in 1703.

5. *Dinant*, a very ancient City on the *Maes*, 12 Miles S. from *Namur*. 'Tis fortified with a ſtrong Caſtle on a ſteep Rock, and has a Bridge over the *Maes*. The *French* diſmantled it in 1554; but it was ſince more regularly fortified. It had formerly a conſiderable Trade; but has ſuffer'd much that Way by the late and preſent Wars. Their chief Income is from Black Marble, Iron and Braſs. The *French* took it in 1675, but reſtor'd it to the Biſhop of *Liege* by the Treaty of *Ryſwick*.

6. *Franchimont*, or *Franckenberg*, anciently a large and populous City, but now reduc'd to a Village. 'Tis defended by a Caſtle, and gives Title of Marquis to the Biſhop of *Liege*. The Inhabitants of its Diſtrict were always accounted the beſt Soldiers of the Dioceſe. 'Twas ruin'd by *Charles*, the laſt Duke of *Burgundy*, and the Inhabitants diſpers'd after he took the City of *Liege*, as above-mentioned. They have a good Mine of Lead, and a fine Quarry of Marble, in the Neighbourhood. It lies about 8 Miles S. W from *Limburg*.

7. *Walcourt*, near the Head of the ſmall River *Heur*. According to *La Forreſt*, 'tis the Capital of the Country belonging to the Biſhop of *Liege* betwixt the *Sambre* and

Digitized by Google

the *Maes*, and was noted for an Advantage which the Confederates obtain'd near it over the *French* in the beginning of the laſt War.

8. *Spaw*, called in Latin *Spadanum Vicus*, is a neat Village, ſeated in a Valley in the Forreſt of *Ardenne*. 'Tis encompaſſed on all Sides with Hills, and on the N. it has high ſteep Mountains. It lies 14 Miles S. E. from *Liege*, and 7 S. W. from *Limburg*. 'Tis noted for its Mineral Waters, much frequented by People from all Parts of *Europe*, and on that Account has been always allow'd a Neutrality during the hotteſt Wars. 'Tis ſuppoſed to be the Fountain that *Pliny* mentions, as we took Notice above, to be near *Tungri*, a City of *Gaul*, whoſe Waters he ſaid had a Taſt of Iron or Steel, was Purgative, cur'd Tertian Agues, and the Stone: When boil'd, it grew turbid, and at laſt of a red Colour. *Cluverius*, in his *Germania Antiqua*, *Lib.* 2. ſays, That this muſt be meant of the *Spaw*, and anſwers the Objection from *Pliny*'s ſaying it belong'd to *Tungri*, a City of *Gaul*: That by *Civitas*, *Pliny* meant the Community of People called *Tungri*, and not the Town of *Tongeren*; and that 'tis certain, the *Spaw* lay within their Boundaries. Dr. *Brown*, in his Account of thoſe Waters, ſays, his Hoſt inform'd him when there, That he had ſent this Water as far as *Saragoſſa* in *Spain*; That he had then 30000 empty Bottles ready to fill; and the moſt convenient Time to do it was the hotteſt and drieſt Seaſon in the Summer, or the hardeſt Froſt in the Winter, becauſe at ſuch Times the Water is ſtrongeſt, ſparkling and brisk. The chief of theſe Mineral Fountains, he ſays, are Four, *viz. Geronſter*, *Sauviniere*, *Tonnelet*, and *Pohnt*. The firſt ſprings in the middle of a thick Wood, a Mile and a half S. from the *Spaw*: 'Tis the ſtrongeſt of any, according to Dr. *Brown*, and the beſt adorn'd, having a Pavilion over it, ſupported by 4 Stone Pillars, and a green Place clear'd in the Wood near to it, with a little Houſe for the Patients to warm themſelves in cold Weather. It ſmells ſtrong of Brimſtone, cauſes many that drink it to vomit, paſſes chiefly by Urine, as the reſt do, and ſtrikes a Purple with Nut-Galls, more inclining to Red than the *Tunbridge* Waters. The Sediment is of a light Blue in the Fountain, but of a dark dirty Red every where elſe. Near this, there's a large Spring in the Wood much like it, but not built or adorn'd. 2. *Sauviniere*, lies a Mile and a half E. from *Spaw*, and is built up like a Tower. The Waters are not ſo ſtrong as the former, but peculiarly good againſt the Stone and Gravel. 3. *Tonnelet*, riſes in the Meadows near the Town, and having no Shades about it, is not ſo pleaſant as the other two. *Henricus ab Heers*, in his *Spadacrene*, ſays, 'tis more nitrous than the reſt, and cauſes ſuch a Chilneſs in the Mouth and Stomach, that few can drink it. 4. *Pohnt*, in the middle of the Town, where moſt of the Water that is ſent abroad is taken up, except there be Orders to the contrary. They ſometimes call it the Fountain of St. *Remaclus*, a Biſhop of *Liege* of that Name, who beautified it with handſome Stone-Work. Over the Mouth of the Well, there's this Inſcription, *Sanitati Sacrum*, *i. e.* Conſecrated to Health; and the following Diſtich, with an Account of its Virtues:

Obſtructum reſerat, durum terit, humido ſiccat,
Debile fortificat; ſi tamen arte bibas.

i. e. It opens Obſtructions, diſſolves hard Swellings, dries up too much Moiſture, and ſtrengthens weak Parts, if drunk according to the Advice of Phyſicians.

Dr. *Northleigh* ſays, That the Waters of *Pohnt* have a Vitriolate Taſt; and that if we put into it any thing auſtere, as Galls, Oak-Leaves, *Balauſtium*, &c. it turns black; That thoſe in the Woods are of a more Piquant Taſt, and of quicker Operation, than our Chalybeat Waters; That, according to Mr. *Boyle*'s Experiments, they weigh two Grains in three Ounces more than *Tunbridge*, and four Grains more than ſome of the *Iſlington* Waters, yet both leſs than the common Water by ſeveral Grains; but a conſiderable Allowance muſt be given for what they evaporate bringing hither. The Doctor ſays, they are cleerer on the Place than the *Engliſh* Chalybeats; and that 'tis worth Obſervation, that tho' by the exacteſt Scrutiny of Glaſſes, no viſible Difference has been found hitherto betwixt the Contexture of the Minute Parts of Com-

Digitized by Google

Common and Mineral Water, yet by Chymical Precipitations and ordinary Solutions, and ſometimes by ſubſiding, conſiderable Separations of a different Subſtance are made without much Difficulty. He adds, That theſe Waters are much colder than thoſe commonly mix'd with Rhenſiſh Wine upon the *Rhine* and *Moſelle*, which generally paſs under the Name of *Spaw* Water, and make a ſtrong Ebullition with the Wine; whereas the true *Spaw* Water, tho' mix'd with Sugar, produces no ſuch Ebullition, and is always bottled up in the Place in little Wicker Flasks; but the other in Stone Bottles. He adds, That near the great Well in the Town, there's another leſſer one arch'd, the Water of which ſeems to be ſtronger than the other; and he thinks it deſerves Obſervation, that there are ſeveral Springs both in the Town and Wood near thoſe Chalybeat Waters, which have nothing either of their Taſt or Virtue.

Other Places in this Dioceſe are, 1. *Horn*, a ſmall Town with a Caſtle, on the *Maes*, Capital of its County, formerly belonging to the Dukes of *Burgundy*, afterwards to particular Lords, but now to the See of *Liege*. 2. *Maſeick*, a little Town within a quarter of a League of the *Maes*, 18 Miles N. from *Maeſtricht*, of Importance, becauſe of the Paſſage over that River. 3. *Loos*, *Lotz*, or *Borchlen*, a rich ſtrong Town betwixt *Tongeren* and St. *Truden*, Capital of its County, and about 6 *Engliſh* Miles diſtant from each. It had formerly Counts of its own, but was united to the See of *Liege* in 1372. It has a Collegiate Church, dedicated to St. *Odulphus*. 4. *St. Truden*, or *St. Tron*, a Wall'd Town on the Frontiers of *Brabant*, in the County of *Hasbaye*. It has its Name from St. *Trudo*, who was martyr'd here in the 7th Century, and has a Monaſtery of *Benedictines* dedicated to his Memory. Sometimes 'tis called *Centron*, whence ſome have thought it was the Seat of the *Centrones* mentioned in *Cæſar*'s Commentaries. One half of the Town is ſubject to the Biſhop of *Liege*, and the other to the Abbot of the *Benedictines*. 'Tis fortified with a good Wall. 5. *Bilſen*, a ſmall Town two *German* Leagues from *Maeſtricht*, and 4 from *Liege*. 'Twas deſtroyed by Fire in 1636, but well rebuilt ſince. Near this Town, there's a Nunnery called *Munſterbilſen*, richly endow'd for young Ladies of Quality, who are allow'd to marry at Diſcretion. Among other Rarities here, they have a compleat Unicorn's Horn near 7 Foot long. 6. *Haſſelt*, a well built and populous Town on the *Demer*, 4 *German* Miles from *Maeſtricht*, and 6 from *Liege*, where the Biſhop has a noble Palace, in which he reſides ſometimes. 'Tis noted for the Birth of *Haſſelius* and *Textelmannus*, two eminent Writers. Near this City lies the rich *Ciſtertian* Nunnery of *Hirchenrod*. 7. *Cowin*, in the Forreſt of *Lagne*, a ſmall City, purchas'd by the Biſhop of *Liege* from the Counts of *Hainault* about the End of the 11th Century. It lies 12 Miles S. W. from *Chârleroy*. 8. *Verviers*, a large Town, well built, on the ſame River with *Franchimont*.

The Dutchy of Berg.

HAS its Name from its Mountainous Soil, has the Dutchy of *Juliers* on the W. the County of *March* on the N. the Dutchy of *Weſtphalia* on the E. and Part of the Electorate of *Cologne* on the S. 'Tis about 50 Miles long on the Banks of the *Rhine*, and 20 where broadeſt. 'Twas govern'd formerly by Lords of its own, but at laſt came to the Houſe of *Juliers*, and was made a Dutchy in 1389, and came to the Family of *Cleves* in 1505; whoſe Male-Iſſue failing, a Diſpute happen'd about the Succeſſion by ſeveral Deſcendants from Daughters of the Family, which occaſion'd great Troubles in *Germany*. The Family of *Brandenburg*, with the Aſſiſtance of the *Dutch*, maintain'd their Pretenſions; and the Family of *Newburg* maintain'd theirs by the Aſſiſtance of the *Spaniards* in like manner; but at laſt they came to an Agreement, as we have formerly mentioned, in 1614, which was renewed and confirmed in 1651.

The chief PLACES *are*,

1. *Duſſeldorp*, the Metropolis of the Dutchy, and Reſidence of the Duke of *Newburg*, now Elector *Palatine*, on the E. Banks of the *Rhine*. 26 Miles below *Cologne*, and 6 above *Keyſerſwart*. The Publick Buildings towards the *Rhine* make a very good Appearance, particularly the Duke's Palace, which

first hold a red-hot Iron in his bare Hand, and go bare-foot over some burning Ploughshares, which the Legend says he perform'd without any Hurt. Near the Altar, they show the Stump of the Tree, guarded with Bars of Iron; and an Annual Fair is still kept on the Hill, which from thence is called the *Vision Market*.

Engern, or *Angrivaria*, so called from the *Angrivarii*, the ancient Inhabitants of those Parts. 'Twas formerly a famous Town, and the Residence of King *Witekind*, who founded a Collegiate Church here of the Order of St. *Denis*. *Witekind* was buried in it, and his Epitaph was still legible within these few Years; but the Town being destroyed, and now only a poor Village, the Members of the College remov'd to *Herford*, where they still show some Relicks and other Rarities belonging to their Ancestors. This Town gives Title of Duke to the Elector of *Cologne*.

Blotho, on the *Weser*, 15 Miles E. from *Herwerden*, was anciently a Barony, that reached as far as *Herwerden*, but has for some Ages been reckoned Part of *Ravensberg*. The Castle was built by the Dukes of *Brunswick* for the Count of *Waldeck*, then Baron of this Place. The Town is conveniently seated for Trade; the River there being capable of large Ships.

The Dutchy of Cleve,

IS reckon'd one of the oldest Principalities in *Germany*, being first conferred upon *Ælius Gracilis*, or *Gratius*, the Companion of *Charles Martel*, in his Expeditions against the *Persons*, *Saxons*, and *Bavarians*: But *La Forrest* says, 'twas given him by King *Pepin* about 759. His Posterity match'd with the Family of *Marck* in 1532, by which they procured that County, and one of their Successors was created Duke of *Cleve* by the Emperor *Sigismund* in 1417. The Country is well furnished with Woods, Corn, and Pasturage, and is watered by the *Rhine*, the *Ruer*, the *Lippe*, and the *Nierse*. The chief Forrest is that of *Duysburg*, which almost encompasses that Town, and is thought by some to be that mention'd by *Tacitus*, and other ancient Authors, under the Name of *Saltus Teutoburgensis*. This Dutchy has the *Dutch Netherlands* on the N. The Territories of *Cologne* and *Berg* on the S. Part of *Guelderland* on the W. and the Bishoprick of *Munster* on the E. *Moll* makes it 46 Miles long from S. E. to N. W. and about 20 where broadest.

The chief TOWNS *are*,

Cleve, so call'd from its Situation on the Rising of a Hill. It stands above 60 M. below *Cologne*, and about 12 S. E. from *Nimeguen*, within a League of the *Rhine*, in one of the finest Countries in *Germany*. *Cluverius* thinks it to be the Remains of the old *Colonia Ulpia Trajana*; the Main of which he supposes was at *Kellen*, about an *English* Mile from *Cleve*. It appears by several remarkable Ruins to have been formerly much larger than now, which favours *Cluverius*'s Opinion. Over the S. Gate, there's the Monument of *Eumenius Rhetor*, who is said to have taught Oratory here; and under it there's an Inscription, which says, he liv'd here in the Time of *Julius Cæsar*, who founded the Castle; of *Augustus*, who garrison'd it; of *Ulpius Trajanus*, who made it a Colony; and of *Ælius Adrianus*, who made it a City: But *Eumenius Rhetor*'s being here, is strongly argued against by *Lipsius*, and stoutly defended by *Pighius*. The Castle is a Place of no great Strength, but pleasantly seated on the Top of an Hill; and there's a curious Prospect of the neighbouring Country from the Top of that called the *Swan Tower*. The City is little, but well Peopled, being the Residence of the Elector's Deputies who govern the Country, and the Place where the States assemble, who hold their Meeting in the Castle. There are several fine Houses here belonging to Persons of Quality; but those of the ordinary Burgers are mean. The great Church, a Monastery of *Capuchins*, and another of *Franciscans*, are the only Publick Buildings of Note, except the Castle. The Government of the City and Country is in the Hands of the *Calvinists*, who have a large handsome Church here; but the Publick Churches are possessed by the Papists in most Places of this Dutchy, by Agreement with the Duke of *Newburg*, who upon that Account is obliged to allow the Protestants a Liberty in his Dominions.

Men-

Montanus ſays, the Town has no Fortifications; that the Caſtle is large, but irregular, and has two old ſquare Dungeons; that it has very Majeſtick Apartments, and a great Hall, in the End of which there's an Alcove, to which they go up by 20 Steps, the whole Breadth of the Hall; from whence there's a Proſpect of the neighbouring Country further than one's Eye can reach, with a great Number of Cities and Villages, and a noble View of the Courſe of the *Rhine*, and of the River *Hel*, which runs by the Foot of the Caſtle. On the W. Side of the Town lies Prince *Maurice*'s Parks, where there are a great many pleaſant Ponds and Water-Works, Grotto's, *&c.* Above them, lies the high Hill called *Sternberg*, from whence one may ſee *Utrecht*, tho' 51 Miles diſtant, with near 40 other Cities and great Towns, 12 of which are ſeen through Walks cut in the Wood; at the End of each of which appears a fair rich City. On the E. Side ſtands the Prince's Houſe in the Wood, where, among other Rarities, there's a notable Collection of old *Roman* Urns, and other Monuments of Antiquity, with ſeveral Inſcriptions, omitted by *Gruterus*.

2. *Embrick*, on the E. Side of the *Rhine*, 4 Miles from *Cleve*. The Emperor *Rudolph* prevailed with the States of *Holland* to reſign this Town to the Duke of *Cleve* in 1600, and at the ſame Time engaged the *Spaniards* to reſtore *Rhinberg* to the Elector of *Cologne*; but the *Spaniards* failing in their Performance, the States repoſſeſs'd themſelves of *Embrick*, which they fortified; but reſtor'd it, with other Towns in that Dutchy, to the late Elector of *Brandenburg*. The Jeſuits have a College here, where they teach Youth. The Fortifications conſiſted of 8 or 9 very fine Baſtions of Earth, Half-Moons of the ſame, and large deep Ditches on the Land Side; but on the Side of the *Rhine*, which is very broad there, they have only a Wall. They have always a ſmall Garriſon; but the Fortifications are neglected of late. 'Twas taken by the *French* when they invaded the *Netherlands* in 1672, but was reſtored in 1674. 'Tis a very ancient City, one of the Hans-Towns, and has a pretty good Trade. Over againſt it, there's a large Iſland in the *Rhine*, on the Corner of which, next the Town, there was a Fortification; which, together with the Cannon of the Place, commanded the River.

3. *Griet*, betwixt *Embrick* and *Rees*, on the *Rhine*, formerly a ſtrong Place; but was taken by the *Netherlanders* in 1636.

4. *Gennep*, at the Mouth of the *Nierſe*, over againſt *Guelderland*. 'Twas anciently a large populous City, well fortified, and the chief Defence of theſe Parts; but of late the Fortifications have been demoliſhed. 'Tis well ſeated for Trade; but lying on the Frontiers of *Guelderland*, and being ſubject to frequent Attacks, it has loſt its Commerce. The *Dutch*, becauſe of its Situation in the Road betwixt *Nimeguen* and *Venlo*, took it in 1641. The River *Nierſe* abounds with delicate Eels, and there's a very ſtrong Fort at a ſmall Diſtance from the Town. 'Twas taken by the *French* in 1672, but reſtored after they demoliſhed its Fortifications.

5. *Goch*, on the *Nierſe*, a little above *Gennep*, a ſmall fortified Town, which was taken by the *Netherlanders* in 1641.

6. *Calcar*, on the River *Meu*, 7 Miles S. E. from *Cleve*. 'Twas built for a Place of Refuge in caſe of any ſudden Invaſion from *Guelderland*, or the Electorate of *Cologne*, and grew populous and rich by their Trade in Linen-Cloth, Malt, and Beer. Duke *Adolph* I. built a vaſt Granary here, where moſt of the neighbouring Boors bring their Corn to be made into Malt. It has a ſtrong Caſtle, a fine Market-Place, and a ſtately Town-Houſe. St. *Nicholas*'s Church, and the *Dominican* Monaſtery, where they have a great Library, are noble Structures. In the Road betwixt this Town and *Santen*, ſtands the rich Monaſtery of *Marienboom*; on the Wall of which, next to the Road, there's a Latin Inſcription, to teſtify their Gratitude to the late Elector in 1650, for accepting their great Collection of MSS. on Condition that he would not turn them out, and ſecularize their Revenues.

7. *Santen*, near the Banks of the *Rhine*, 10 Miles S. E. from *Calcar*. 'Tis an ancient Town, which ſome ſay was built by *Trojans*, that came hither under *Francus*, one of *Hector*'s Sons, who call'd it *Troja Francorum*. Others ſay, 'twas built by the *Sicambri*, and that 'twas called *Santen*, becauſe the *Theban* Legion ſuffer'd here under the

Digitized by Google

Emperor *Maximianus*, which is just as true as that it was built by the *Trojans*. *Pighius* is of Opinion, That it was the *Ulpia Trajana*; but *Cluverius*, with more Reason, thinks it is the *Vetera Castra* of *Tacitus*, where *Julius Cæsar* resided for some Time. 'Tis now very much decayed; but in their great Church, there are many fine Altars of good Workmanship, with abundance of Relicks; and if you will believe them, they have a MS. of St. *Paul*'s writing.

8. *Wesel*, called *Nether Wesel*, to distinguish it from *Wesel* in the Dominions of *Treves*. It lies on the E. Side of the *Rhine*, 6 Miles from *Santen*, and is the largest and best built Town in the Dutchy. 'Tis a Hans-Town, and usually reckon'd among the Imperial Cities of *Westphalia*; but the Princes of *Cleve* freed it from the Monthly Contributions paid by other Imperial Towns. 'Tis strong, populous, and well seated for Trade. It first grew rich by the Concourse of Merchants who came hither from the *Netherlands*, to avoid the *Spanish* Persecution; but suffer'd much by the *French*, who took and plunder'd it in 1672, and exacted great Contributions from the Inhabitants, which forc'd many of 'em to retire. 'Twas restored in 1674, and is govern'd by its own Laws; but owns the Elector for Sovereign. Among other Publick Buildings, there's a noble Hospital here, founded by a Chancellor of the Dutchy, and richly endowed for aged and decrepit People. In the Porch of the great Church here, was born *Peregrine Bertie*, afterwards Earl of *Lindsey*, by the Lady *Catharine*, Dutchess Dowager of *Suffolk*, who with her Husband fled beyond Seas in the Time of Queen *Mary*'s Persecution; and not daring to discover her Quality, was reduced to great Straits for some Time. *Menconys* says, the Ramparts of the Town are flank'd with 9 good Bastions, 4 of which are fac'd with Brick; that there are two Suburbs, well fortified with good Bastions, Half-Moons, and Ditches; and that in the middle of the Curtains, there are Galleries which enter into the Ditch, and have at the end of 'em separate Places for the Men and Women in case of a Siege. There's a small Harbour here for Vessels that sail on the *Rhine*, with several Monasteries.

9. *Rees*, 12 Miles N. W. from *Wesel*, a large well fortified Town. 'Twas taken by the *French* in 1672, and restored in 1674. 'Twas formerly garrison'd by the *Dutch*. There was also a Fort on the other Side the *Rhine*. The Protestants have a Church here, where they have preserved a very fine Altar, which has an excellent Sculpture on gilt Wood, containing the History of our Saviour's Life.

10. *Burich*, a fortified Town over against *Wesel*, within a quarter of a League of the *Rhine*. 'Twas taken by the *Netherlanders* during the *Belgick* War, and by the *French* in 1672, but restor'd again in 1674.

11. *Alphen*, a little City about half a League S. from *Burich*.

12. *Orsoy*, another little City on the W. Bank of the *Rhine*, about 6 Miles S. E. from *Burich*. 'Twas well fortified, but taken by the *French*, in 1672, and the Garrison and Burgers cruelly treated by the *French* King, because they offered to hold out against his Army.

13. *Dinslacken*, near the Banks of the *Rhine*, 7 Miles S. E. from *Wesel*, is called by the *German* Geographers *Locus Martis*, but without Ground. 'Twas taken by the *Netherlanders* in 1627; since which, it has never recover'd its ancient State.

14. *Roerort*, on the Mouth of the *Roer*, which was also taken and fortified by the *Netherlanders*.

15. *Duisburg*, on the Borders of *Cleve* and *Berg*, about 16 Miles N. E. from *Wesel*. 'Tis alledg'd by some to be the *Teutoburgum* of the Ancients; and some think that the *Saltus Teutoburgensis*, where *Varus* was slain with his *Roman* Legions, is that called the *Duisburg* Wood. They have had a long Controversy with the Princes of *Cleve* about their Title to be an Imperial City; but have hitherto paid all Subjection to the Elector of *Brandenburg*, who calls himself Supreme Lord of this Place. 'Twas formerly noted for Annual Fairs; but that Trade is now enjoyed by *Francfort*. 'Tis a small City, but strong, well fortified and populous. They have an University; and St. *Salvator* and St. *Mary*'s Churches, with several Monasteries, are very fair Structures. 'Twas taken by the *French* under Marshal *Turenne* in 1672, but restor'd in 1674.

The

Digitized by Google

The Barony of RAVENSTEIN,

A small Tract of Land betwixt *Guilderland* and *Brabant*, has for some Ages been added to the Dutchy of *Cleve*, and has its Name from the Castle of *Ravenstein* on the *Maes*, a *German* League below *Grave*.

The Bishoprick of Munster,

HAS that of *Osnabrug* on the E. the Dutchy of *Cleve*, and Part of the County of *Zutphen*, on the W. the Counties of *Bentheim* and *Steinfurt* on the N and the County of *Mark* on the S. The Country is generally barren and ill Peopled, is about 100 Miles in Length, but of an unequal Breadth, being in some Parts 20, in some 40, and in others 60. 'Tis entirely subject to the Bishop, who is a Count of the Empire, and able to maintain 15000 Men. The principal Commodity of this Country is *Westphalia* Bacon. Their Bishops, till the Time of *Bernard Van Galen*, were always reckon'd peaceable, and fond of a Neutrality when their Neighbours were at War, and paid 12000 Crowns Annually to the States of *Holland* for their Protection; but that Bishop join'd with the *French* and *English* against the *Dutch*; and because of his Military Inclinations, was courted by the greatest Potentates. In all the Variety of Fortunes, he was successful in his War, being so cunning as to change Sides opportunely. He made it his Business to foment Divisions among his Neighbours, and to receive Pensions on both Sides; but all his Conquests were not able to compensate the Ruin of his Diocese, and the Loss of so many Thousands of Men as were kill'd by his Means. He died in 1678, just upon the Peace betwixt *France*, *Spain*, and the *Netherlands*. Upon which his Neighbours and Subjects made this Remark, That 'twas time for him to walk off the Stage, when Men grew weary of War, and delirous of Peace.

Their chief PLACES *are*,

1. *Munster*, the Metropolis of *Westphalia*, in a fruitful Soil, near the Banks of the *Ems*, well fortified by Nature and Art. It lies in Long. 26. 7. Lat. 52. 52 Miles N E. from *Cleve*, and 22 S. W. from *Osnabrug*. The Houses are generally fair and well built, there being a good Quarry of Free-Stone at *Bamberg*, two *German* Leagues from the Town. It has 5 Collegiate Churches, and a College of Jesuits well frequented. The chief College is that of the Cathedral, consisting of a Dean and Chapter, who chuse the Bishop. The River *Aa* runs through the City, and the Fishing of it belongs to the Bishop. The Bishoprick was founded by *Charlemagne* in 758, who made St. *Ludgar* their first Bishop. It has a strong Castle, and was formerly an Imperial Town; but was taken by *Bernard Galen* in 1661, and has since lost that Privilege. The Revenues of the Diocese were reckon'd in 1661 at 300000 Crowns *per Annum*; but are now much abated. This City is famous for the bloody Tragedy acted there in 1533 by the Enthusiastical Anabaptists, under the Conduct of *John Buckholt*, a Taylor, born at *Leyden* in *Holland*, and on that Account called *John* of *Leyden*. He brought over to his Party *Rothman*, a Minister of the Suburbs, who had embrac'd *Luther*'s Doctrine, and successfully preach'd it in the City. The Senate endeavour'd to suppress those Disorders; but the Faction grew so strong, that they were obliged to give them a Toleration. After this, *Buckholt*'s Followers pretended to Revelations, and bawl'd about the Streets, commanding all Men to repent, and be baptiz'd. Then they seiz'd the Town-Hall, with the publick Arms and Ammunition, and usurp'd the Government; After which they sent *Rothman* and *Knipperdelling* privately to invite all of their Persuasion in the neighbouring Countries, which fill'd the Town with Anabaptists, who drove out the other Inhabitants. In 1534, the Bishop besieg'd them, but in vain. In the mean Time *John* of *Leyden* took the Title of King, and made one of his Concubines Queen, whom he afterwards beheaded, for shewing a Dislike at some of his Frantick Tricks. In 1535, the Bishop, assisted by the Landgrave of *Hesse*, and the Troops of *Cologne*, surpris'd the City, by the Direction of a Deserter, took the Mock King, with his two great Favourites, and sent them in Derision to the

Digitized by Google

neighbouring Courts. Next Year *John* of *Leyden* was torn to Pieces with hot Pincers, and his Bones hung in an Iron Cage on the Top of a Steeple. This City is alſo famous for the Treaty of *Weſtphalia*, concluded here in 1648. The Biſhop is Suffragan to the Elector of *Cologne*.

2. *Meppen*, at the Mouth of the *Haſe*, on the Frontiers of *Frieſland*, 43 Miles N. from *Munſter*. 'Twas fortified by *Guſtavus*, a *Swediſh* General, and afterwards ſold to *Charles Ludowick*, Count *Palatine* of the *Rhine*, for 60000 Crowns. 'Tis reckon'd the Key of *Eaſt-Frieſland*, and was taken by the *Netherlanders* in 1587. 'Tis the chief Town of *Lower Munſter*.

3. *Haſelunen*, 10 Miles E. from *Meppen*. In 1639, 70 Imperialiſts ſurpris'd and defeated 100 *Swedes*, who beſieged this ſmall Place, which was defended by 50 Men.

4. *Kloppenburg*, 16 Miles N. E. from *Haſelunen*. 'Twas taken by the *Swedes* in 1635, and regularly fortified; but ſoon after ſurrender'd to the Imperialiſts.

5. *Vecht*, a ſmall City near the Confines of *Oſnabrug*, 13 Miles S. E. from *Kloppenburg*, formerly ſubject to Lords of its own, and is Capital of a County of 15 Pariſhes, each of which contain 10 or 12 Villages; and in the whole, there are 31 Seats of People of Quality. In 1394, the Duke of *Luneburg* and Count of *Hoy* invaded the Biſhoprick of *Oſnabrug*, and carried off much Plunder; but were ſurpris'd and defeated by the Burgers of *Vecht*, who reſcued the Priſoners and Booty.

6. *Warenberg*, on the *Ems*, ſaid to have been built by *Varus*, a *Roman* Captain, who was kill'd at *Paderborn* in a Sedition, under the Reign of *Auguſtus*.

7. *Stromberg*, S. of *Warenberg*, Capital of a Burgraviate, for which the Biſhops of *Munſter* obtain'd in 1653 a Vote in the Diet.

8. *Coesfelt*, a ſmall fortified Hans-Town on the River *Berkel*, 20 Miles W. from *Munſter*, and the uſual Place of the Biſhop's Reſidence.

9. *Ahuſen*, or *Aſchenhuys*, on the *Regge*, Capital of a large Barony. It lies 15 Miles N. W. from *Meppen*.

10. *Borcklos*, on the River *Berkel*, Capital of a Barony, which belongs to the Counts of *Stirum*.

11. *Tilligt*, on the *Ems*, noted for a Convention of the States of *Munſter* in 1532, to oppoſe the Growth of *Lutheraniſm*.

12. *Rheyne*, a ſmall neat City on the River *Ems*, 18 Miles N. from *Munſter*.

There are ſeveral other Market-Towns in this Biſhoprick, of which we have no Deſcription.

The Biſhoprick of Paderborn,

IS ſo large, that it contains 24 Market-Towns, 20 Seats of Men of Quality, 16 Monaſteries, and 54 Pariſhes. It has on the E. the Dutchy of *Brunſwick*, and Part of *Heſſe*; on the W. the Dutchy of *Weſtphalia*; on the S. the County of *Waldeck*; and on the N. that of *Lippe*; and is, according to *Moll*, 43 Miles long, and 23 broad. There's a great Concourſe of Drovers from *France*, *Brabant*, &c. to their Annual Fairs. They abound with Deer and other Veniſon, rich Springs of Salt, and have ſome Iron Mines.

The chief TOWNS *are*,

1. *Paderborn*, on the River *Pader*, a large, fine, and populous City, and one of the Hans-Towns, in Long. 30. 28. Lat. 51. 40. 32 Miles S. W. from *Caſſel*, and 50 N. E. from *Munſter*. The Biſhoprick was founded by *Charlemagne* in 777, and is Suffragan of *Mentz*. 'Twas liberally endowed by neighbouring Princes. The *Romiſh* Legends make the Foundation of this Biſhoprick miraculous; and ſay, That *Charles the Great* encamping on that Ground where the City now ſtands, his Army being at that Time in great Want of Water, the firſt Pin that was ſtruck in the Ground to faſten his Pavilion gave Iſſue to a plentiful Spring, that now drives ſome Water-Mills; on which the Emperor order'd the Church to be built upon that Spring, from which the Town derives its Name: But if the opening of every Fountain be a Miracle, there are abundance performed by Labourers every Day. *La Forreſt* and others alledge, That 'twas here where the *Romans*, under *Varus* were defeated by *Arminius*, the General of the *Cheruſci*; but *Cluverius*, in the Third Book of his *Germania Antiqua*, offers many Au-

Digitized by Google

Authorities to prove, that *Varus* was defeated betwixt the Mountains and the Town of *Dietmelle*, which he takes to be the ancient *Teutobergum*, that lies about 12 Miles N. E. from *Paderborn*, and is by *Aimonius* call'd *Theothmelli*, which differs little from its preſent Name. To the Objection rais'd from *Ptolomy*, that this Battle happen'd near the River *Weſer*, he anſwers, That *Ptolomy* mention'd this, becauſe 'twas the moſt noted River near the Place of Battle, being within 11 or 12 Miles of it; which confutes thoſe who would have *Duysburg* in the Dutchy of *Cleve* to be the ancient *Teutoburgum*, and that *Varus* was defeated in that called *Duysburg* Wood, there being 95 Miles diſtance betwixt *Duysburg* and *Dietmelle*. *Pomarius*, in his Chronicle of *Magdeburg*, ſays, That *Charlemagne* order'd the greateſt Part of the *Weſtphalians* and *Saxons* to be baptiz'd in this Fountain at *Paderborn* in 776, and 777. The moſt remarkable Publick Structures in this City are, the Biſhop's Palace and the Cathedral, to which *Otho* II. gave a Golden Crucifix of 60 Pound Weight, valued at 60000 Crowns. *La Forreſt* ſays, the Chapter is compoſed of 24 Capitular Canons, who are all obliged to ſtudy in ſome *French* or *Italian* Univerſity; and that the Cathedral is one of the fineſt in *Germany*. They loſt their Privilege of being an Imperial City ſince 1604, when they were ſubjected to their Biſhop. In *Luther*'s Time, the Citizens began to embrace the Reformation; but *Herman* Archbiſhop of *Cologne* being elected their Biſhop, he condemned 16 of the chief Burgers who embrac'd the Reformation to die, and forc'd the reſt to ſwear, they would never endeavour any Alteration in Religion *Theodore* of *Furſtemberg*, their Biſhop, built the adjacent Caſtle in 1590, and founded their Univerſity in 1592.

2. *Lippeſpring*, or *Lippesburg*, about a *German* League N. from *Paderborn*, ſo called from the River *Lippe*, which riſes in a large Stream in this Town. It ſtands on the Edge of a Heath, two *German* Miles long, uninhabited, and much infeſted by Robbers. The Dean and Chapter of *Paderborn*, who are Lords of this Town, have a Caſtle here, near the Place where the River ſprings, which, before it leaves the Town, drives 3 or 4 Mills.

3. *Warburg*, a Hans-Town on the *Dymel*, 18 Miles S. E. from *Paderborn*, was formerly ſubject to Counts of its own, that were Members of the *Weſtphalian* States; but is now under the Biſhop It ſtands in a fruitful Soil, drives a great Trade in brewing ſtrong palatable Beer, and has a conſiderable Income from the neighbouring Mines of Iron and Lead.

4. *Lude*, *Ludge*, or *Leys*, a Town properly in the County of *Pyrmont*, but ſubject to the Biſhop. It lies 27 Miles N. E. from *Paderborn*, and is noted for a Medicinal Fountain, called the *Holy Well*, reckon'd a ſovereign Remedy for moſt Diſtempers, and upon that Account much frequented. 'Tis alſo noted for *Charlemagne*'s Encampment here in 787.

5. *Brackel*, on the River *Brug*, formerly an Imperial Town, but now ſubject to the Biſhop. It lies 18 Miles E. from *Paderborn*.

6. *Herſel*, on the *Weſer*, built by *Charlemagne* in the 8th Century, when he held a Meeting of the Eſtates there. It had a fine Caſtle, which was burnt by the *Heſſians* in 1637.

7. *Buren*, 5 Miles S. from *Paderborn*, purchas'd from its own Lords by the Biſhop in the 16th Century: 'Twas burnt by the *Swedes* in 1636, but ſince rebuilt.

8. *Welsburg*, on the River *Alme*, famous for the Cruelty of the *Huns* to the Inhabitants about 451.

9. *Solkot*, 8 Miles S. W. from *Paderborn*, noted for its Salt Pits, which bring in a conſiderable Revenue.

Our *Philoſophical Tranſactions* of *December*, 1665, tell us of a Spring in this Biſhoprick which loſes it ſelf twice in 24 Hours, but returns again with ſuch Violence, that it drives 3 Mills not far from its Source; and becauſe of its Noiſe, is called by the Inhabitants *Bolderburn*, or the Boiſterous Spring. *Mottery* ſays, it lies near *Oldenbeck*, in *Teutburg* Forreſt; that it ſometimes runs about an Hour, and then ſtops for three; that it ceas'd running from 1630, to 1638; after which it had a regular Courſe like other Springs: But the *Philoſophical Tranſactions* being later, we may ſuppoſe that it now runs and ſtops by Turns. The *Philoſophical Tranſactions* of *January*, 1665, gives us an Account of another Fountain called *Marborn*, about two Miles from *Paderborn*, which

ſeats

ſes with a treble Spring; two of which, thô not above a Foot and a half diſtant, differ ſo much in Quality, that whereas one of 'em is limpid, bluiſh, luke-warm, bubbling, and holding Sal Armoniac, Ochra, Iron, Vitriol, Allum, Sulphur, Nitre, Orpiment, us'd againſt Epilepſies, bad Spleens, and the Worms; the other is ice-cold, turbid, and whitiſh, much ſtronger in Taſt, and heavier than the former, holding much Orpiment, Salt, Nitre, Iron, and ſome Sal Armoniac. All Birds that drink of it, are obſerved to die of Convulſions; but if they have common Salt given them immediately after, they do not die ſo ſoon: If they have Vinegar given them, they do not die at all; but in 7 or 8 Days after are troubled with the Pip. The Lungs of ſuch as dy'd being open'd, they were found quite ſhrivel'd up: Yet People who are troubled with the Worms, taking a ſmall Quantity of it mix'd with common Water, it kills the Worms, and brings them away in great Numbers; but makes the Patient very ſick. The 3d Stream, that lies lower than the other two, and 20 Paces from them, is greeniſh, very clear, and of a pleaſant Taſt, partaking both of Sowr and Sweet. 'Tis of a middle Weight, betwixt the other two, and is ſuppoſed to be a Mixture of both: For the Gentleman who ſent this Account to the *Royal Society*, ſays, he mix'd an equal Quantity of the two former with a little common Fountain Water, and when they were ſtir'd together, and ſuffer'd to ſettle, they made a Water of the ſame Colour and Taſt with the 3d Spring. We refer the Curious for a further Account of theſe, and other Springs in this Country, to the Works of *Taberna Montanus*.

The Abbacy of CORBEY,

Lies on the E. of this Biſhoprick, betwixt it and the River *Weſer*. Its Juriſdiction is about 16 Miles long, and 8 broad. The Town of *Corbey*, from whence it has its Name, lies on the *Weſer*, 27 Miles E. from *Paderborn*, and, with the adjoining Country, is ſubject to its Abbot, who is a Prince of the Empire. *La Forreſt* ſays, the Abbey was founded by St. *Adelard*, Abbot of *Corbey* in *France*, about 822, and by him called *New Corbey*. But others ſay, 'twas founded by the Emperor *Lewis* I. It ſtands in the *Solenger* Forreſt, and is half encompaſſed by the *Weſer*. He alſo founded an Univerſity here, where ſeveral *German* Biſhops have been bred. Their firſt Rector was *Auſcharius*, ſeveral of whoſe Scholars were ſent by the ſame Emperor to convert the Iſland of *Rugin*; for which the Emperor *Lotharius* beſtow'd it upon this Abbey, according to his Vow, when he went to conquer it, That he would beſtow it on St. *Vite*, who lay buried in that Monaſtery, as appears by his *Diploma*, ſign'd at *Aix la Chapelle* the 20th of *May*, 844. *Lætzner*, in his Chronicle of this Abbey, gives an Account of all the Abbots and famous Writers buried here; among whom he reckons *Witekind*, a famous *Saxon* Hiſtorian. Near this Place was found the *Saxon* Idol *Irmenſewl*, formerly mentioned.

To this Monaſtery belongs the City of *Hoxter* or *Huxer*, on the *Weſer*, 4 Miles S. W. from *Corbey*. 'Tis a fair Town, of good Trade, by the Conveniency of the River, which occaſions many of the *German* Nobility to keep their Houſes here, for the Improvement of their Eſtates by Trade and Merchandize; a Practice not common to *Germans* of Quality. This Town ſuffered much during the Civil Wars, when 1500 Men were kill'd in one Siege, and thrown into the *Weſer*; but it has ſince recover'd much of its ancient Luſtre, has 3 fair Pariſh-Churches, and has ſeveral other Publick Buildings of Note. *La Forreſt* ſays, it's now a Free Town, under the Protection of the Dukes of *Brunſwick*. There are ſeveral other Towns and Mannors belonging to this Abbey, but not worth deſcribing.

The County of Lippe,

IS a ſmall Tract of Land S. of the Biſhoprick of *Paderborn*. *Mill* makes it 35 Miles where longeſt, and about 11 where broadeſt. The Princes of this County are Counts of *Ritberg*, and ſome other Places in the Neighbourhood, which make them more conſiderable than the firſt View of their Dominions in the Map would ſeem to do. Some *German* Heralds derive their Pedigree from *Maulius*, who ſo bravely defended

Digitized by Google

ded the *Roman* Capital againſt the *Gauls*. Others bring them from the two *Urſini*. But all agree, that they are of ancient *Roman* Extract. They are divided into the Branches of *Diethmold*, *Brackel*, and *Buckemburg*, and have married into great Families.

Their TOWNS *of Note are*;

1. *Dietmelle*, *Dethmold*, or *Diethmold*, about 12 Miles N. E. from *Paderborn*, and is the chief Reſidence of the eldeſt Houſe. *Cluverius* derives the Name from *Dith* or *Diet*, the ſame with *Teuto*, the old *German* Idol; and, as we have mention'd before, makes it the ancient *Teutoburgum*. 'Tis alſo remarkable for a great Overthrow given to the *Saxons* in its Neighbourhood by *Charlemagne*, in his 6th Expedition againſt thoſe People. The Town is ſmall, and ſubſiſts chiefly upon the Court of the Prince.

2. *Lippe*, or *Lippeſtat*, Lat. *Lippia*, on the River *Lippe*, 20 Miles W. from *Paderborn*, 35 S. E. from *Munſter*, and 36 S. from *Oſnabrug*. 'Twas built by Count *Bernard* II. in 1150, who was Son to *Bernard* I. Count of *Oberwal*, Favourite to the Emperor *Lotharius* II. The Town is well fortified, and by the Inhabitants reckon'd impregnable. It made a brave Reſiſtance againſt *Dietrich* Archbiſhop of *Cologne* in 1447. The Fortifications have been much improved ſince, and 'twas the firſt Place in thoſe Parts which reſiſted the *French* with any Succeſs in their late Wars, that were concluded by the Treaty of *Nimeguen*. Their chief Trade is in preparing Timber for building Veſſels on the *Rhine*, to which it has an eaſy Conveyance by the River *Lippe*. 'Twas formerly the chief Reſidence of the oldeſt Houſe of *Lippe*, to whom the County ſtill belongs; but the City is now poſſeſſed by the King of *Pruſſia*.

3. *Horn*, an old Town near *Diethmold*, thought to be ſeated in or near the Place where *Varus* was defeated. It had Counts of its own till 1567, that it was made ſubject to the Counts of *Lippe*.

4. *Lemgow*, 15 Miles N. E. from *Paderborn*, and 5 N. from *Diethmold*, a rich and neat Hans-Town on the River *Pega*, in a Country abounding with Corn. The Citizens are ingenious and induſtrious; two Qualities, ſays Dr. *Nicholſon*, not very common in thoſe Parts. Tho' they be ſubject to the Counts of *Lippe*, they have as large Privileges as other Hans-Towns, and are one of the Eſtates of *Weſtphalia*. The People are generally *Lutherans*, and have a good *Gymnaſium*, and a Preſs for the Uſe of the Scholars.

5. *Uffen*, or *Salzuffen*, in the Road betwixt *Lemgow* and *Herwordren*, noted for a noble Salt-Spring, and a ſtrong Cloth made here, and exported in great Quantities.

6. *Pyrmont*, a ſtrong Fort near *Ludge*, about two *German* Miles from *Hamelen* in the Dutchy of *Brunſwick*. It had formerly Counts of its own, who were alſo Counts of *Spigelberg*; but their Male-Iſſue failing, it came by Marriage to the Counts of *Lippe* in 1557.

7. *Ritberg*, a large Town with a Caſtle, on the *Ems*, 10 Miles N. E. from *Lipſtat*. It had formerly Counts of its own; but *John*, the laſt of 'em, who rais'd a Diſturbance among the States of *Weſtphalia*, was unanimouſly oppos'd by them, taken and impriſon'd at *Cologne*, where he died. Upon which *Ritberg* came to the Count of *Lippe*, who married one of his Daughters; but it pays ſome Acknowledgment to the Biſhop of *Paderborn*.

The County of Schawemburg,

HAS the Dominions of the Houſe of *Brunſwick* on the N. E. and S. and of the latter Part of the County of *Lippe*, with the Principality of *Minden*, on the W. *Molt* makes it 30 Miles long, and 17 broad. It abounds with Corn and Hay, Quarries of Free-Stone, of which they export great Quantities, Salt-Pits, Timber, Coal, Allum, Chalk, Veniſon; and ſome Years ago they had Copper Mines, in which there were ſome ſmall Quantities of Gold, and Silver-Ore, which Dr. *Nicholſon* thinks now to be loſt. 'Tis water'd by the *Weſer*, *Hamel*, *Awe*, *Caſpaw*, and the *Exter*; from which, and the *Steinhuder-See*, a Lake 5 Miles long, and 2 broad, they are plentifully ſupplied with Fiſh, eſpecially Perch, for Conſumption and Export. *La Forreſt* ſays, this County was given by the Emperor *Conrad* II. to *Adolph*, a *Saxon* Lord, about 1032; whoſe Poſterity failing in 1459, *Chriſtian* of *Oldenburg*, King of

Digitized by Google

of *Denmark*, deſcended from a Daughter of the Family, fell Heir to it. *Otho*, deſcended from another Daughter, had the County of *Pinnenberg*; but his Poſterity failing, *Pinnenberg* was divided betwixt the King of *Denmark* and the Duke of *Holſtein*; and moſt of *Schawenburg* fell to the Landgrave of *Heſſe-Caſſel*, with which the *Atlas Hiſtorique* agrees.

The PLACES *of Note here are,*

1. *Schawenburg*, an old Caſtle on the Top of an high Hill on the E. Side the *Weſer*, 17 Miles E. from *Minden*, and was the ancient Seat of their Counts.

2. *Buckenburg*, the Seat of the 2d Branch of the Houſe of *Lippe*, 12 Miles W. from *Schawenburg*. *Cluverius* thinks it to be the *Ars Bructerorum* of the Ancients, well known in the Time of *Tacitus* for Sacrifices offer'd there to *Hercules*, or an Idol that reſembled him. It has nothing remarkable but the Count's Palace, which is a ſtately Fabrick.

3. *Rentelen*, on the W. Bank of the *Weſer*, about 17 Miles N. E. from *Lemgow*, where there is a *Gymnaſium*.

4. *Stathagen*, a pleaſant little Wall'd City, in the middle of a large Forreſt, 17 Miles W. from *Hanover*, and 8 N. from *Schawenburg*. 'Twas built by Count *Adolph* for a Reſidence of Pleaſure, as appears by the Inſcription on the Seal of the Town.

5. *Oldendorf*, a little ſtrong Town about 5 Miles S. E. from *Schawenburg*. The Imperialiſts beſieg'd it in vain in 1633, but took and plunder'd it in 1639. The Counts of *Lippe* have a Cuſtom-Houſe here, where all Veſſel's that paſs up and down the *Weſer* pay a Duty.

6. *Saxenhagen*, a Town with a ſtrong Fort in the moſt Northerly Part of the County, about 16 Miles N.W. from *Hanover*.

The Principality of Minden.

MOſt makes it about 26 Miles where longeſt from S. to N. and much the ſame Breadth from E. to W. It has the County of *Hoy* on the N. and *Lippe* on the S. and abounds with Corn, of which they export great Quantities; and in the N. and W. 'tis full of Woods and Hills, which abound with Game.

The PLACES *of Note here are,*

1. *Minden*, a large and rich Hans-Town, on the W. Bank of the *Weſer*, 30 Miles W. from *Hanover*, and 38 E. from *Oſnabrug*. *Charles the Great* made it a Biſhoprick, and it continued ſo till 1638, that 'twas ſecularriz'd by the Treaty of *Munſter* in Favour of the Elector of *Brandenburg*. The Cathedral is ſtately, but dark, and is ſaid to have been formerly King *Witekind*'s Palace, which upon his Converſion he turn'd into a Church. The Town is neat, and well fortified. 'Twas taken by the Imperialiſts in 1628, and by the Duke of *Brunſwick* in 1634.

2. *Peterſhagen*, on the ſame River, about 3 Miles below *Minden*. 'Tis defended by a good Caſtle, formerly the Reſidence of the Biſhops, where now the Chancery for the Principality is kept.

The County of Hoy,

HAS *Bremen* on the N. *Minden* on the S. *Lunenburg* on the E. and *Diepholt* on the W. is 28 Miles long, and 20 broad. The chief Town, of the ſame Name, lies on the E. Side the *Weſer*, 30 Miles N.E. from *Minden*, 40 S.W. from *Zell*, and 25 S. E. from *Bremen*. 'Tis a ſmall Town, but well fortified, and has one of the ſtrongeſt Caſtles in *Weſtphalia*. It had formerly Counts of an ancient *Saxon* Family, to whom 'twas given by the Emperor *Lotharius*. They were much reſpected in the Empire; but the laſt of 'em dying in 1582, the County was divided betwixt the Families of *Brunſwick* and *Heſſe*; the latter of which gave their Share, which was *Uchte* and *Freudenburg*, to the Counts of *Bentem*. The moſt conſiderable Place next to *Hoy* is *Nyenburg*, on the E. Side the *Weſer*, 10 Miles E. from *Hoy*. 'Tis a well fortified Town, and ſuſtained ſeveral Sieges during the Wars of *Germany*.

The Dutchy of VERDEN *or* FERDEN,

Is by the *Matricula* made Part of *Weſtphalia*; but we have formerly deſcrib'd it as Part of the Dutchy of *Bremen*, to which 'twas united by the Treaty of *Weſtphalia*.

The

Digitized by Google

The County of Diepholt,

LIes betwixt *Hoy* and the Bishoprick of *Osnabrug*. *Moll* makes it 30 Miles long; but its Breadth is unequal, the broadest Place being about 18 Miles. The Capital, of the same Name, lies on the Lake *Dummer*, 27 Miles W. from *Hoy*. It had Lords of its own, whose Posterity failing in 587, it fell to the Dutchy of *Lunenburg*. The Town was almost ruin'd during the Civil Wars of *Germany*; but is since rebuilt, and defended by a Fort. In this County there's a Hill called *Hulfemburg*, or the Mountain of Help, because, says the Chronicle of *Brunswick*, *Charlemagne* pray'd here against *Witekind* and his Idols; and having obtain'd the Victory, he built a Chapel on the Top of an Hill, which being much frequented, a large Village was built in the Neighbourhood, which they call St. *Hulp*. They had afterwards an Annual Fair granted them, where the Monks sold Indulgences; but since the Reformation, that Custom is abolish'd.

The Bishoprick of Osnabrug,

HAS Part of the Bishoprick of *Munster* on the N. the County of *Ravensburg* on the S. *Minden* and *Hoy* on the E. *Lingen* and Part of *Munster* on the W. *Moll* makes it 39 Miles from S. to N. and 28 where broadest from E. to W.

This is the first Bishoprick founded by *Charles the Great* after he subdued *Witekind* the *Saxon* about 776, when he dedicated the Cathedral to St. *Peter*, and the two Martyrs, *Crispin* and *Crispinianus*. It appears by his Diploma, that he exempted this Bishop from all manner of Homage and Service, except to go in an Embassy at the Emperor's Charge to negotiate any Match that should be proposed betwixt the Families of the Emperors of the E. and W. Dr. *Nicholson* says, That since the Reformation, which was introduced here in 1634, there has been little more than the Name of a Bishop; the *Lutherans* not allowing the Execution of Episcopal Jurisdiction, and the Papists not being strong enough to obtain it for one of their own Opinion. By the Treaty of *Westphalia*, the House of *Brunswick* is to enjoy this Bishoprick by an alternate Succession. 'Twas lately enjoyed by *Ernest Augustus* of *Hanover*, but now, says *La Forest*, by a Prince of *Lorrain*. There are 25 Canons, 18 of which are enjoyed by Popish Ecclesiasticks; the Revenues of 4 by the Jesuits, for the Support of their College; and the other 3 by *Lutherans*. When they have a Popish Bishop, he is Suffragan to the Elector of *Cologne*.

The TOWNS *of chief Note are,*

1. *Osnabrug*, so called from a Bridge over the *Hasa* or *Ose*. It lies 22 Miles N. E. from *Munster*, and 37 W. from *Minden*. It stands on a fair Plain. Some say, 'twas founded by *Julius Cæsar*, but without any good Authority. *Charles the Great* erected a School for Latin and Greek, which is since become a *Gymnasium*, with 3 or 4 Professors of several Faculties. They have a considerable Trade by brewing a palatable thick sort of Beer, which they call *Buse*, and in baking the best white Bread in *Westphalia*. 'Tis noted for a Treaty betwixt the Emperor and the King of *Sweden* in 1648, wherein all the Affairs of the Protestants were concerted, which was a Branch of the Treaty of *Westphalia*. 'Tis a neat City, and adorn'd with several noble Publick Buildings. 'Tis divided into the Old and New Towns by the River *Ose*. 'Tis pretty strong, encompassed with Walls and Ditches, but commanded by a neighbouring Mountain within half a Cannon-shot, upon which there's an Abbey of Men of Quality. The Ancient and Present State of *Germany* says, it stands in the fruitfulest Part of *Westphalia*, and the Inhabitants are industrious, breed abundance of Cattle, particularly Hogs, which make the best *Westphalia* Bacon. They have also a considerable Trade by making Linen. The same Author adds, That the *Lutheran* Canons are capable of electing a Bishop, but not of being elected; whereas the Popish Canons are capable of both. The Papists have the Cathedral Church, and the Church and Monastery of the *Dominicans* in the Old City, and the Collegiate Church of St. *John* in the New. The Protestants have the great Parochial Church of St. *Mary* in the Old City, and

Digitized by Google

have a Voice in chuſing Magiſtrates in both. The Biſhop's Palace and Caſtle of *Petersburg* is well fortified, and a great Defence to the Town. Not far from the City, there's the Ruins of an old Church and Caſtle called *Beelem*, which ſome ſay was built by King *Witekind* upon his Converſion; and the Country People have an old Song with the whole Story of it, by which they pretend to prove he was baptiz'd here, and not at *Minden*; and this they ſing with great Veneration. About two *Engliſh* Miles from hence lies the Monaſtery of *Rulle*, on the Bank of a Lake, ſo deep, that it could never yet be fathom'd.

2. *Iburg*, S. from *Oſnabrug* about 12 Miles, with a commodious Caſtle, in which the Biſhop formerly reſided. 'Twas taken and plunder'd by *Philip the Great* of *Brunſwick* in 1553.

3. *Quakenbrug*, a ſmall and neat City on the River *Oſe*, 28 Miles N. from *Oſnabrug*.

The County of TECKLENBURG,

Lies on the S. W. of *Oſnabrug*, is about 16 Miles long, and 9 broad. The only Place of Note in it is the Capital of the ſame Name, a large open Town, with a Caſtle, formerly the Seat of its Counts. It lies 7 Miles W. from *Oſnabrug*. The Counts of this Place had formerly large Dominions in the Neighbourhood, which are now parcel'd out among other Princes; but this Town, with the Title, came to the Counts of *Bentem* about 1560. Some will have it to be the Remains of the ancient *Teſelia*, the City of the *Angrivari*, who inhabited thoſe Parts.

The County of LINGEN,

Lies on the N. W. Part of *Oſnabrug*, is 15 Miles long, and about 10 broad. The only Place of Note in it is the Capital of the ſame Name. It came to the Houſe of *Naſſaw* by the Marriage of the only Daughter of the laſt Count of *Buren* to *William* Prince of *Orange* about 1560. The Inhabitants are *Calviniſts*.

The County of STEINFORT,

Is encompaſſed with the Biſhoprick of *Munſter*, and lies N. W from the City of *Munſter*. 'Tis about 15 Miles long, and 9 where broadeſt. The only Town of Note in it is *Burchſteinfort*, on the Banks of the *Aa*, 10 Miles N. W. from *Munſter*. It belongs to the Counts of *Bentem*. It has a *Gymnaſium* for the Languages and Liberal Arts.

The County of BENTEM,

Lies N. from *Steinfort*, is 30 Miles long, and 13 where broadeſt. It has the United Provinces on the W. and N. Theſe two Counties were formerly ſubject to different Families; but thoſe of *Steinfort* ſucceeded to the other by Marriage. They are both full of Woods, except about *Bentem* and *Nienhuys*, where there are pleaſant and fruitful Vallies on the River *Aa*. Count *Arnold*, who founded the *Gymnaſium* at *Steinfort*, brought in the *Augsburg* Confeſſion in 1564; but their Count *William Henry*, who turn'd Papiſt in 1668, gave ſome Trouble to his Proteſtant Subjects, till the States of *Holland* interpoſed. The only Place of Note is *Bentem*, the ancient Seat of their Counts, which lies 30 Miles N. W. from *Munſter*. It lies in the middle of a Wood, and is of no great Note.

The County of DELMENHORST,

Lies S. E. from *Bremen*, is about 17 Miles long, and 7 broad. The only Place of Note is *Delmenhorſt*, on the *Delm*, a ſmall Town, fortified with a Caſtle, 10 Miles S. W. from *Bremen*. It formerly belong'd to the Counts of *Oldenburg*, and now to the King of *Denmark*.

The County of OLDENBURG,

Has the Sea on the N. Part of the Biſhoprick of *Munſter* on the S. the County of *Embden* on the W. and the Dutchy of *Bremen* on the E. 'Tis about 50 Miles long from S. E. to N. W. and about 30 where broadeſt. 'Tis generally barren, full of large Heaths and Marſhes, which breed only a ſmall ſort of Cattle. The Inhabitants are generally poor, and live in mean Cottages of Clay and Turf; ſo that were it not for the Barony of *Jevern* in *Eaſt-Frieſland*, with ſome other Acceſſions elſewhere, the Counts

Digitized by Google

Counts of *Oldenburg* could ſcarce maintain the Rank of a Prince of the Empire, thô they boaſt of as much Antiquity as any in *Germany*, and derive their Pedigree from *Witekind* King of the *Saxons*, who they alledge call'd himſelf Count of *Oldenburg*: but Dr. *Nicholſon* thinks it muſt have been of the Country of that Name in *Holſtein*. Their own Counts fail'd upon the Death of *Anthony Gunter*, the laſt of 'em, in 1656; and the King of *Denmark*, who was of the ſame Family, ſucceeded, having agreed with the Duke of *Holſtein* for his Pretenſions. *Crantzius*, *Chytræus*, and *Helmoldus*, ſpeak very honourably of the Antiquity of the Inhabitants.

The only Place of Note is *Oldenburg*, the Capital, on the River *Hund*, which falls into the *Weſer* a little below, where there's a Cuſtom-Houſe, at which Ships pay Toll to the King of *Denmark*. The Town is well fortified with Walls and Ditches; and large Barges come up from the *Weſer* as far as the Bridge, which brings them a good Trade. The Caſtle, in which the Count reſided, is round, uniform, and ſtately; but the Houſes of the Burgers are mean, and ſcarcely one of 'em of Stone. Dr. *Nicholſon* ſays, That upon the Diviſion of this County betwixt Count *Chriſtian* and his Brother *Otho* about 1247, the latter built a Palace on the River *Delma*, which gave Riſe to the Town of *Delmenhorſt*, formerly mentioned, which was afterwards fortified, and grew conſiderable. He founded alſo a Monaſtery there, which upon the Reformation was converted into a Church, a Free School, and an Hoſpital. It was taken in 1482 by the Biſhop of *Munſter*, but retaken in 1547 by the Count of *Oldenburg*. There are ſome other ſmall Towns in this Country, of which we have no Deſcription.

The County of EMBDEN,

Has the Province of *Groningen* on the W. the County of *Oldenburg* on the E. the Biſhoprick of *Munſter* on the S. and the Sea on the N. *Moll* makes its greateſt Length from N. W. to S.E. 47 Miles, and its greateſt Breadth about 36. Moſt of the *Germans* call it *Emmerland*, and will not allow the Name of *Eaſt-Frieſland* to be Authentick.

Pliny makes the ancient Inhabitants to be the *Chauſi Minores*, to which *Cluverius* agrees; and by the Deſcription *Pliny* gives of their Manners, ſome of the modern Inhabitants do well enough anſwer the Character. Dr. *Nicholſon* thinks from their Language, that they are of the ſame Stock with the *Hollanders*; and that ſome of the Remains of thoſe *Netherlanders* who fled hither from the *Spaniſh* Perſecution, may ſtill be among them; but in general they differ much from the *Hollanders* and *Flemings*, and fall much ſhort of them in Point of Induſtry. He adds, That the ancient *Friſii* were originally from the Province of *Utrecht*, and extended their Limits as far N. as *Denmark*, formed themſelves into a Monarchy, and choſe themſelves a King upon extraordinary Occaſions; but when thoſe were over, obliged him to lay down his Authority, according to the Practice of the ancient *Saxons*. *Charles the Great* reduc'd them to a Province of his Empire; and thus they continued, till the Earldom of *Holland* was erected by *Charles the Bald* in 840, when this Country was made a Branch of the *German* Empire, and govern'd by the Emperor's Deputy, till 1453 or 1441, according to *La Forreſt*, *Ulrick Sirſene*, Governor of the Province, and one of the chief Lords of the Country, was created Count of *Eaſt-Frieſland* by the Emperor *Frederick* IV. in Conſideration of his great Services: Since which, the Title is continued to his Poſterity. The firſt of whom was *Ezard* his Son, who ſucceeded him in 1468, and recovered *Fredeberg* from the Citizens of *Brunſwick*, who much diſturbed the Trade of *Embden*. He was ſucceeded by his Son *Enno* I. in 1528, who recover'd *Greetzyl*, a conſiderable Port on the N. Point of *Embſtand*, which had been ſurpris'd by the Duke of *Guelderland*. His Son *Ezard* II. ſucceeded in 1540, and by marrying the King of *Sweden*'s Daughter, advanc'd his Intereſt and Reputation. His Son *Enno* II. received the *Augſburg* Confeſſion. He was ſucceeded by his Son *Rudolphus Chriſtianus*, who being a zealous *Lutheran*, and falling into a Controverſy on that and ſome other Accounts with the Citizens of *Embden*, who were *Calviniſts*; they diſpoſſeſſed him in 1595, wherein they were aſſiſted by the *Dutch*, under whoſe Protection they put themſelves. His Son *Enno*, ſays *Meurſy*, en-

Digitized by Google

deavour'd to re-assert his Right, but in vain; and afterwards married his Daughter to his Brother *John*, by the Pope's Dispensation. In 1606, a Peace was made betwixt that City and the Count, by the Intercession of our K. *James* I. Since which Time, they have been govern'd by their own Magistrates; but have a Dependance on the States of *Holland*, as *Bertius* informs us. His Great Grandson *Enno Ludowick* II. was in 1641 married to *Henrica Catharina*, Daughter to *Henry Frederick* Prince of *Orange*, and created Prince of the Empire by *Ferdinand* III. in 1653; but dying without Issue-Male in 1660, he was succeeded by his Brother *George*, who married a Daughter of *Wirtemberg*, by whom he had *Christian Everard* in 1665, who succeeded him. *La Forest* says, there are 4 Branches of this Family, *viz.* that of the Eldest or the Prince, that of *Creange*, and two of *Nordeland*. The eldest Branch is *Lutherans*.

The chief PLACES *of Note in this Country are,*

1. *Embden*, on the N. Side of the *Ems*, in Long. 25. 35. Lat. 53. 21. 70 Miles N. W. from *Bremen*, 47 from *Oldenburg*, and 20 N. E. from *Groningen*. 'Tis a rich, large, and populous City, fortified towards the Land with a double Ditch, regular Bulwarks and Bastions, and on the S. by a strong Wall and the River. *Ubbe Emmius* calls it the *Eye of Friesland*, because 'tis so conveniently situated, that from hence one may see a great way into the Ocean, and over the neighbouring Country. The Island *Nessa*, which lies in *Dallert* Bay, over against *Embden*, and is about 3 *English* Miles in Circumference, makes the Harbour as large and convenient as any on the *German* Coast. They have likewise artificial Canals, by which they can bring large Vessels into the Heart of the Town; and by opening their Sluces, can lay the neighbouring Country under Water, and make the Town inaccessible. Their Houses are generally neat and high, and the Town-Hall very magnificent. The Count keeps his usual Residence in their Castle, but has no Jurisdiction over them, nor will they allow him to fortify his Castle; but they pay him this Deference, that as when he writes to them, he calls them Loving Friends; when they answer, they sign themselves his Humble Servants. They are very industrious, much addicted to Commerce, zealous Asserters of their Liberties, excellent Soldiers, make good Provision for their Poor, and allow Freedom of Worship to all but Papists. Our *English* Merchants formerly kept their chief Storehouse of Cloth here, upon some Difference with those of *Hamburg*; then they remov'd it to *Antwerp*, and at last return'd again to *Hamburg*.

2. *Norden*, a pleasant Sea-Port, about 12 Miles N. E. from *Embden*. The Town is well built, but not fortified, nor is their Harbour capable of great Ships. 'Twas anciently the Burying-place of the Counts; but the great Church, with Part of the Town, being burnt down by the Baron of *Esens* in 1531, their Monuments were removed to *Embden*, where they have since been buried. 'Tis remarkable for the Defeat of a great Army of *Normans*, of which 10000 were killed near this Place.

3. *Aurich*, 15 Miles N. E. from *Embden*. It gives the Name of *Auricherland* to the adjacent Country, which is rough, woody, and barren, but abounds with Venison and other Game. There are 7 great Fairs of Cattle here every Year. 'Tis encompassed by a slight Wall. They have also a Castle well fortified, the Residence of a Branch of the Family. In this Town are held the Courts of Judicature for the County, of which a Nobleman is always President, and a Doctor of Laws their Chancellor. They have 9 Assessors, 3 of which are Noblemen, and 6 Civilians. The President is obliged to attend the Prince's Court out of Term-time, and to determine Causes within the Verge of the Palace.

4. *Jevern*, 34 Miles N. E. from *Embden*, a fair Town, which gives Title to a Baron, whose Lordship is about 40 Miles in Circumference, and contains many stately Seats of Nobility and Gentry. The Town is defended by a strong Castle, and has a good Trade by a Canal from the Sea. These Barons pretended formerly to be Sovereign Princes, but are now subject to the Counts of *Oldenburg*.

5. *Esens*, 25 Miles N. E. from *Embden*, and 10 W. from *Jevern*. It stands on a River of the same Name, which a little below falls

Digitized by Google

falls into the Sea. They have have a ſtrong Caſtle, the uſual Reſidence of their Barons. They had a long Quarrel with the Counts of *Eaſt-Frieſland*, to whom they pretended to be ſuperior; by Vertue of Grants from the Emperors *Frederick* IV. and *Charles* V. they alledged, it was not in the Power of the Emperors to grant it; but the Controverſy was ended in 1581, by the Marriage of the Count of *Eaſt-Frieſland* with the Heireſs of *Eſens*, which brought that Barony into the Counts Family. A great Part of this Town was burnt by thoſe of *Bremen* in 1540.

6. *Witmund*, the Capital of a large Barony, which held of the Count of *Eaſt-Frieſland* at the ſame Time with *Eſens*. 'Twas formerly a Town of good Trade, but now much decayed. It lies about 5 Miles E. from *Eſens*.

Other Places of Note in this Country are, 1. *Leer*, or *Lora*, on the *Ems*, a ſtately Market-Town, which ſurpaſſes many *German* Cities, and has a good Trade. 2. *Fredeberg*, 30 Miles N. E. from *Embden*. It formerly belong'd to the Citizens of *Brunſwick*. There are many more Towns and Villages, as neat and populous as thoſe in *Holland*, which we cannot inſiſt upon; but refer the Curious to the Chorographical and Hiſtorical Account of that Country, publiſh'd at *Leiden* by the Learned *Ulbo-Emmius* in 1616.

The principal RIVERS *of* Germany *are*,

1. The *Danube*, which is ſo famous in all ancient Greek and Latin Hiſtorians, that *Eratoſthenes* and *Apollodorus* are very ſevere upon *Homer*, for omitting it in his Account of the many large Rivers that fall into the Ocean. 'Tis known by the Name of *Iſter*, eſpecially below *Belgrade*; but is promiſcuouſly call'd by both Names, as appears by *Ovid*, who ſpeaking of ſome memorable Places near its Banks, ſays,

Stat vetus urbs, ripæ vicina binominis Iſtri.

Mela will not allow it had the Name of *Iſter*, till after it had run ſome Hundreds of Miles, wherein he has been follow'd by others; but the contrary appears by *Polybius* and *Herodian*, compar'd with *Dion*; for they give the ſame Deſcription of the whole by the Name *Danubius*, that he does of it under that of *Iſter*. Some think, that the Difference of its Names happen'd from the Difference of the Language of the People who dwelt upon it. Authors do not agree as to the Etymology of the Name; but that given by *German* Writers ſeems moſt probable, ſince *Dona* in their Language ſignifies a Ruſhing and Noiſy Stream; for every one knows that it runs with a rapid Courſe for many Miles, and makes a great Noiſe at ſeveral Cataracts. 'Twas known by the Name of *Iſter* in the Time of *Jaſon* and his *Argonauts*. It riſes in *Swabia*, not far from a Village called from thence *Dona*, or *Thona Eſchingen*, in the *Black Forreſt*. The Hill at the Foot of which it ſprings is not above 15 or 16 Cubits high; and *Cluverius* ſays, the Fountain is inclos'd with a Wall. Soon after it leaves the Village, it receives two other Streams, that riſe 15 *German* Miles higher up in the Country, which by others have been reckon'd the true Fountains of the *Danube*; and it receives 10 other conſiderable Rivers before it comes to *Belgrade*. Its whole Courſe, from its Fountain to the ſeveral Mouths, is reckon'd to be about 27 Degrees, which, reckoning 60 to a Degree, is 1620 *Engliſh* Miles, without including its Turnings and Windings, which muſt certainly make it much longer. 'Tis doubtleſs the greateſt and nobleſt River in *Europe*, and by *Ovid*, who knew it very well, is reckon'd equal to the *Nile*, and reſembles it in many Things, as may be ſeen by comparing it with an Account of the *Nile*, tranſlated from a *Portugueza* MS. by Sir *Peter Wich*, at the Requeſt of the *Royal Society*, and publiſh'd in 1673. It begins to be navigable at *Ulm*, which it encompaſſes with two fair Streams. There are Three remarkable Cataracts in it before it leaves *Germany*: The Firſt is that called *Der-Saw-Ruſſel*; *i. e.* The Swine's Snout, ſo called from a ſharp pointed Rock which hangs over Part of the River near *Lintz* in *Auſtria*, about 92 *Engliſh* Miles above *Vienna*; under which there's a dangerous Whirlpool, that ſucks in the Veſſels which come near it, without extraordinary Care and Management. *Athanaſius Kircher*, in his

Mun-

Digitized by Google

Mundus Subterraneus, ſays, whatever it ſucks in, is thrown up again in a Lake near *Canifch* in *Hungary*. The Second is that called *Der-Strudel*, from the Noiſe which the Waters make at its Fall near *Grenon* in *Auſtria*, where it runs with ſuch Violence among the Rocks, that it diſtracts the Watermen withits Noiſe and Smoak, and many times ſplits or over-turns their Veſſels; ſo that formerly few would venture to paſs it without an expert Pilot from the Neighbourhood, who made it his Buſineſs to underſtand all the Turnings and Windings of this dangerous Paſſage; but of late Years the Watermen in thoſe Parts are ſo well acquainted with it, that they reckon it no great Danger to paſs this Way. On the Top of one of the higheſt Rocks, there's the Ruins of an old Caſtle, formerly inhabited by Pirates, who us'd to plunder Veſſels on the River. The Third Cataract is called *Der-Wurbel, i. e.* Whirlpool, about a Furlong from the *Strudel*, but not ſo dangerous. As ſoon as you paſs this, a Fellow comes on board from a Chapel dedicated to St. *Nicholas*, on the Bank of the River, with the Picture of that Saint, and an Alms-Box for the Paſſengers to throw in ſomething as a Thank-Offering to St. *Nicholas* for their Deliverance. On the Top of a great Rock here, there's the Ruins of an ancient Fort, call'd the *Devil's Tower*, on this Occaſion, as *Aventinus* informs us. *Bruno* Biſhop of *Wurtzburg* attending the Emperor down the *Danube*, when they came to this Tower, one appear'd from it like a Black Man, and cry'd out, *Bruno, I am thy evil Genius, will do thee no Miſchief at preſent, but meet with thee again e're long*: And when they came to *Boſenburg*, 10 Miles from hence, where they lodg'd, the Chamber in which the Emperor and the Biſhop were fell down, and kill'd *Bruno*.

The ſwift Current of the *Danube* makes the Water muddy and whitiſh; ſo that the Waters of other Rivers which fall into it may be diſtinguiſh'd for a great way. Some Authors alledge it reſembles the Ocean in this, that notwithſtanding the many Rivers which fall into it, it is ſcarce ever diſcernably augmented, thô thoſe Rivers themſelves overflow their Banks; and one Cauſe they aſſign for it is, that in the Summer the melted Snow from the Hills keeps the Channel almoſt as full as the Floods do in the Winter, which has ſomething of Truth in it, and is very diſcernable in thoſe Rivers which fall into it from the *Alps*; which keeping the Stream always muddy, makes its Increaſe at other Times leſs viſible.

The Trouts, Perches, Carps, and other ſorts of Fiſh, are much larger in the *Danube* than other Rivers of *Europe*. Some aſcribe this to the Saline Tinctures of its Water, which waſhing ſo many Mines, are ſuppoſed to contain more Principles of Fecundity and Nouriſhment than other Rivers; but this we leave to ſuch as make Natural Philoſophy their Study. The rarer Kinds of Fiſh here, that are not common elſewhere, are, 1. *Coppen*, a ſort of *Capito*. 2. *Biſturn*, which looks like a ſort of a Lamprey. 3. *Grundel*, or a ſpotted ſort of *Cobites*, with 6 Beards, 2 ſhort, and 4 long. 4. The *Scheyden*, or *Silurus Geſneri*, ſomewhat reſembling a Pike, but much larger. 5. The moſt remarkable of all is the *Huſo* or *Houſon*, as they call it, which we formerly mentioned in our Deſcription of *Auſtria*, P. 618. 'Tis a Salt-Water Fiſh, reſembling our Sturgeon, and is ſuppoſed to come from the *Euxine* Sea. 'Tis ſo much valued by the *Hungarians* and *Germans*, that they reckon it one of the greateſt Dainties for Perſons of Quality, and ſeldom to be met with but at their Tables. We refer the further Deſcription of this River to *Hungary*, and other Countries through which it paſſes; this being the chief of what is to be ſaid of it, in ſo far as it relates to *Germany*.

The 2d great River in *Germany* is the *Rhine*. Authors are likewiſe divided about the Etymology of its Name. Some derive it from the Greek Word Πειν, which ſignifies to flow, becauſe of its rapid Stream: Others from the *Celtick* Word *Ryen*, which ſignifies to ſeparate, becauſe it was the ancient Boundary betwixt *Gaul* and *Germany*; and others from the *German* Word *Rein*, which ſignifies Pure and Clean, becauſe the ancient Inhabitants, as *Cæſar* tells us, if they ſuſpected their Wives, threw their new-born Children into it, fancying they would ſwim if legitimate; but ſink if otherwiſe. *Schottelius* ſays, this occaſioned the *German* Proverb, *When a Man was guilty of any notorious Crime, that the* Rhine *could never waſh it*

Digitized by Google

it off. Tacitus says, the old *Germans* worship'd it as a God: To which *Martial* seems to allude, when he calls it the Father of Nymphs and Rivers.

It rises from two Springs 40 Miles distant, says Dr. *Nicholson*, but according to *Sanson* not above 4. The first near a small Village called *Tavetsch*, out of a high Mountain named St. *Gottards*. The 2d from another Mountain near *Reinwald* in *Rhetia*; both of 'em among the *Alps*. These two Currents meet about 8 Miles from the City of *Coire* in the *Grisons* Country, and after a Course of 45 Miles, according to *Sanson*, falls into the Lake of *Constance*, runs thrô *Switzerland*, and then thrô the rest of *Germany* and the United Provinces, till it fall into the Sea by several Mouths in the Dominions of the *Dutch*. The Cataracts of this River are reckon'd 9, whereof 7 are small, and all of 'em short of those in the *Danube*. The most dangerous and terrible of 'em is a little below *Schaffhuysen* in *Switzerland*, where it falls from the Top of a Rock 75 Foot high, and is not passable by Vessels. The other great Cataract is near *Lawffenburg* in *Switzerland*, where sometimes Watermen let down their Vessels by Ropes. It runs through a Country above 400 Miles long; but if we reckon its Turnings and Windings, it runs above 600, and is navigable by Vessels of a lesser Size at least 400. There's a great Dispute among ancient and modern Geographers about its Mouths. Formerly there were two known Channels by which it emptied it self into the Sea. They divided at *Schenkenschans*, a Fort about 5 Miles below *Cleve*, from whence the Southern Branch, call'd the *Vahalis*, runs by *Nimeguen*, and mixing with the *Maes*, falls with it into the Sea below *Rotterdam* and the *Brill*. The other, which retains the Name of the *Rhine*, passing by *Arnheim*, *Utrecht* and *Leiden*, fell into the Sea at *Catwic*; but in 860, or, as some say, in 1170, an extraordinary Spring-Tide fill'd up the Harbour at *Catwic*, and obstructed the Current of the *Rhine*, which still runs with a slow Stream towards the Ruins of *Catwic*, but sinks before it comes near it, and is probably convey'd by a subterraneous Passage into the Sea, or some other River. Another Channel by which it empties it self into the *Issel*, and with it falls into the *Zuyder* Sea, was made by the *Roman* General *Drusius*, and still bears the Name of his Ditch: But we shall have Occasion to touch further on this Subject in the Description of the *Netherlands*.

The 3d great River is the *Elb*, which Name, some say, was given it, because it rises from 11 Fountains; and the *Saxon* Word *Elve* signifies 11. *Tacitus* and *Ptolomy* were both mistaken about the Head of this River; but *Dubravius* gives the exactest Account of it, *viz.* That it has its Rise from the Mountains near *Kirschberg* in *Silesia*, on the Confines of *Bohemia*, from 11 Fountains, which 'tis needless to name. It receives several others as it passes through *Bohemia* and *Saxony*, and at *Hamburg* bears Merchant-Ships, as large as most that traffick on the Ocean; it being usual to see in that Harbour, tho' 72 *English* Miles from the Sea, Vessels of 300 Tun, which is farther than Ships of that Burthen can sail in any other River of *Europe*. On the S. of *Hamburg*, it divides it self into a great many Branches, which form a vast Number of Islands; and a little below *Glucstadt*, it empties it self by two Mouths into the *German* Ocean. 'Tis navigable by lesser Vessels a great way up into *Germany*, which very much promotes the Trade of the Country, especially by its Communication with the *Spre* and the *Moldaw*, the former in the Marq. of *Brandenburg*, and the latter in *Bohemia*; which has occasioned some to think it practicable to form a Communication betwixt this River and the *Danube*, and by that means betwixt the *German* Ocean and the *Black Sea*.

The other most remarkable Rivers in *Germany* are, 1. The *Oder*, which rises in *Moravia*, and after running 300 *English* Miles thro' Part of *Brandenburg* and *Pomerania*, falls into the *Baltick* by 3 Mouths. 2. The *Weser*, which begins in the Mountains of *Thuringia*, runs thro' *Hassia* and *Westphalia*, and falls into the *German* Ocean about 40 Miles below *Bremen*.

For such as are of less Note, 'tis needless to say any more of 'em than we have done in the particular Descriptions of the Countries through which they run.

CHAP.

CHAP. XXVIII.

The NETHERLANDS.

INcluding the 17 Provinces, has the *German* Ocean on the N. *France* on the S. *East-Friesland*, *Westphalia*, the Dioceſe of *Cologne*, the Dutchy of *Juliers*, and the Dioceſe of *Trevet*, on the E. the *Britiſh* Ocean, and Part of *France*, on the W. If we take in the *French* Conqueſts, the Country, according to *Sanſon*, is about 290 Miles from the Borders of *Picardy* to the Mouth of the River *Ems*; and the greateſt Breadth, from the Frontiers of *Treves* to *Gravelin*, is about 200; but the Breadth of the other Parts is very unequal, eſpecially towards the United *Netherlands*.

The ancient Name of the Country was *Belgica*, according to *Cluverius*, and took its Name from its Inhabitants the *Bellovaci*; but 'twas then of a much larger Extent, having on the E. and N. the *Rhine* and the Ocean; on the W. the *Seine* and the *Marne*; and on the S. the Countries of the *Sequani*, *Leuci*, and *Lingones*, comprehending *Lower Alſace*, *Lorrain*, the *Weſtereich*, the Dioceſe of *Treves*, the Dutchies of *Luxemburg* and *Limburg*, the Biſhoprick of *Liege*, Part of that of *Cologne*, the Dutchy of *Guelderland*, the S. Part of *Holland*, all *Zeland*, *Brabant*, *Flanders*, the County of *Boulogne*, the 3d Part of *Normandy*, the greateſt Part of the Iſle of *France*, half *Champagne*, *Picardy*, *Arras*, *Hainault*, the County of *Namur*, and the Dutchy of *Bouillon*. He cautions Authors againſt the Miſtake which ſome have fallen into of confounding *Belgium* with *Belgica*, the former being only a Part of the latter. We have formerly given an Account of the ancient Inhabitants of moſt of that at preſent called the *Netherlands*, in our Deſcription of Ancient *Germany*, P. 405, *&c.* The Reaſon *Cluverius* gives why this Country was rather called after the *Bellovaci*, than any of the other numerous People that dwelt in it, is, that he ſuppoſes in *Cæſar's* Time they were at leaſt the moſt noted People, if they had not the Sovereignty of the whole. He adds, That the ancient Inhabitants of that Part of the Country which lies on the N. Side the *Rhine*, were ſubdued by *Druſus* in the Reign of *Auguſtus*; and that thoſe who lay on the S. Side in *Gaul*, had been formerly ſubdued by *Julius Cæſar*. They continued under the *Roman* Empire, eſpecially thoſe on the S. Side, till the Time of *Theodoſius*, when the Empire being over-run by Strangers, ſeveral People of *Germany* came hither one after another. Some of which having afterwards removed into *France* and *Britain*, the Inhabitants created Princes over themſelves, and recover'd their Liberty. In Proceſs of Time, all this Country was divided into 17 Provinces; ſome govern'd by Dukes, as *Brabant*, *Limburg*, *Luxemburg*, *Guelderland*; ſome by Counts, as *Flanders*, *Arras*, *Hainault*, *Holland*, *Zeland*, *Namur*, *Zutphen*; one by a Marquis of the Empire, as *Antwerp*; and 5 by Lords, as *Weſt-Frieſland*, *Mechlen*, *Utrecht*, *Overiſſel*, and *Groningen*. *Frieſland* he ſays, after it ſhook off the *Roman* Yoke, was govern'd by Kings for near 400 Years; but theſe being extinguiſhed, they were brought under by *Charlemagne*; after whom they begun to chuſe their ſeparate Princes, as the reſt had done before

Digitized by Google

before them. The ſeveral Princes marrying into one another's Families, they came all at laſt under the Dominion of the Duke of *Burgundy*, whoſe Heireſs being married to the Houſe of *Auſtria*, the Government of them fell into the Hands of that Family.

But the Inhabitants finding their Liberties invaded, from the Time of *Charles* V. his Great Grandſon, they reſolv'd to defend their Privileges by Arms; and after a War of 47 Years, 10 of them ſubmitted to the Arms of *Spain*, and are now called, *The Spaniſh Netherlands*; and 7 recover'd their ancient Liberty, which are now called, *The United Provinces*, or *Netherlands*.

The Revolt of the Netherlands *from the Crown of* Spain: *With a brief Hiſtory of the Republick of* Holland, *from its Riſe to this preſent Time.*

THE *Spaniſh* and *Italian* Writers, ſuch as *Strada*, &c. aſcribe this Revolt to the Stubborneſs of the People, to the Change of their Religion, and to the Ambition of the Princes of *Orange*; but the *Dutch* Writers, Sir *William Temple*, Mr. *Peers* in Vol. IV. of *Pitt's Atlas*, and others, give the following Account of that Matter.

Their former Princes, the Dukes of *Burgundy*, being engag'd in War with *France*, began to raiſe greater Taxes upon 'em than they had been accuſtom'd to, which made them uneaſy; but upon the Succeſſion of the Houſe of *Auſtria*, the bringing firſt of *German* Troops, and then of *Spaniards* and *Italians*, into the Country, heighten'd both their Charge and Diſcontents; yet *Charles* V. being a Prince of great Reputation, Conduct and Succeſs, and having a natural Kindneſs to the *Netherlanders*, among whom he was born, and employing their Great Men in his Court, Camp, and other Poſts, he left them in a peaceable Condition, when he reſign'd the Government to his Son *Philip* II. in 1556. This Prince being a *Spaniard* born, reſolv'd to return to *Spain*, and to leave the *Low Countries* under a Subordinate Government, which, till his Father's Time, had been the conſtant Seat of their own Princes. He likewiſe gave the chief Offices and Poſts of Honour to *Spaniards*, introduc'd their Cuſtoms, Language, and Habit, into the Court of *Flanders*; and after the Peace, continued the *Spaniſh* and *Italian* Forces, and the ſame Taxes he had demanded from them during the War, which quickly loſt him the Love of his Subjects. This he regarded ſo little, that when he return'd to *Spain*, he was ſo far from thinking their Grievances worth hearing or redreſſing, that he added new ones, by ſubverting their Conſtitution, and changing all their ancient Forms. At his Departure, he left his natural Siſter, the Dutcheſs of *Parma*, to be Governeſs of the Country, with Cardinal *Granvell* to aſſiſt her as her Chief Miniſter; and order'd her to continue the Foreign Troops, and the former Taxes; to eſtabliſh the 14 Biſhops he had agreed with the Pope to add to the former three; to revive the Edicts of *Charles* V. againſt *Luther*, publiſh'd in a Diet of the Empire in 1550, thô never executed in the *Low Countries*, even in that Emperor's Time; but this *Philip* was reſolv'd on, in order to bring the Inquiſition into the *Netherlands* againſt the Proteſtants, as 'twas practis'd in *Spain* againſt the *Moors* and *Jews*.

Sir *William* ſays, when theſe Things came to be known and executed, it made a general Uneaſineſs in the Minds of the People. The Inſolency of the *Spaniſh* Troops, and the Charge of maintaining them in a Time of Peace, made the *Netherlanders* hate them, as the Inſtruments of their Slavery and Oppreſſion. Therefore the States began their Complaints with this Grievance, with the general Conſent and Concurrence of People of all Ranks; but meeting with no Redreſs, the States firſt refuſed to pay any more Money either for their own ſtanding Troops, or for the *Spaniards*; and the People were ſo much diſcourag'd and enrag'd, particularly in *Zealand*, that they gave over working at their Dykes or Banks, and ſuffer'd the Sea to gain upon them, reſolving rather to be drown'd, as they ſaid, than to be made Slaves by the *Spaniſh* Soldiers. So that after many Diſputes with the Governeſs, the King, upon her Remonſtrance, remov'd thoſe *Spaniards*, to the great Satisfaction of the People.

The next Controverſy was about the 14 new Biſhops. The Lords oppoſed it as a leſſening of their Power to introduce ſo many great Men into the Council. The Abbots, out of whoſe Lands they were to be endow'd, decry'd it as an Uſurpation upon the Rights of the Church, and contrary to the Will of the Deceas'd, who had mortify'd thoſe Lands to particular Uſes. The common People oppos'd it as much as any, and complain'd of it as the higheſt Degree of Oppreſſion upon their Liberties and Conſciences to erect 17 Spiritual Courts of Judicature inſtead of 3, eſpecially when they muſt entirely depend upon the Pope or the King; every one exclaim'd againſt it; and *Strada* himſelf confeſſes it was a Breach of the King's Coronation-Oath, who at his Acceſſion to the Government had ſworn to preſerve the Church and State as he found them. This Point however was gain'd by the Governeſs, but not without the general Diſcontent of the People, which in a little Time had fatal Effects.

At the ſame Time Sir *William* obſerves, a great many Proteſtants were drove out of *France*, *Germany*, and *England*, by Perſecution, which in a little while fill'd the Country, but eſpecially the Cities, with new Inhabitants; who being in Favour with the People, becauſe of their Doctrine and Piety, as well as for the Riches and other Advantages they brought them, their Numbers increas'd every Day. This made Work for the Court of Inquiſition, in which *Granvell* ſcrew'd up his Maſter's Authority to the greateſt Height. On the other hand, this Court became univerſally hateful to the Lords, becauſe 'twas a new and arbitrary Judicature, unknown to their Anceſtors; and 'twas no leſs odious to the People, becauſe of the Cruelty of their Executions.

Theſe Things occaſion'd angry Debates in Council, which were increaſed by the abſolute Power aſſumed by the Cardinal, a *Burgundian* of mean Birth, and more remarkable for his Parts than his Piety. This made the Prince of *Orange*, the Counts of *Egmont* and *Horn*, and other chief Lords of the Country, proteſt that they would not attend at Council while a Perſon ſo abſolute ſat there, to the Ruin of their Country. This at laſt oblig'd the Court to turn out the Cardinal: Upon which, the Prince of *Orange* and other Lords return'd to Council, the Rigour in Affairs of Religion was abated, a Redreſs of other Grievances was promiſed, and the Governeſs was both honour'd and obey'd. But about the beginning of 1565, there was a Conference at *Bayonne* betwixt *Catharine* Queen Mother of *France*, her Son *Charles* IX. thô very young, and his Siſter *Iſabella* Queen of *Spain*, to which none was admitted but the Duke of *Alva*. King *Philip* excus'd his own Preſence, in order to make it paſs for an Interview of Kindneſs betwixt the Mother and the Children; whereas 'twas own'd afterwards, that the Subject of the Conference was about Religion; and the Prince of *Orange* declar'd, That he had diſcover'd their Deſign to be a Combination betwixt the two Crowns, to aſſiſt one another in extirpating all Proteſtants out of their Dominions. The Truth of which was confirm'd by the Orders that ſoon after came from King *Philip* to the Dutcheſs of *Parma*, to put all Hereticks to Death without Remiſſion; to publiſh and obſerve the Emperor's Edicts, and the Council of *Trent*; and to give her utmoſt Aſſiſtance to the Court of Inquiſition, which was quite contrary to what he had promiſed to Count *Egmont*.

When this was divulg'd, the People were at firſt ſeiz'd with Aſtoniſhment, which ſoon gave Way to their Rage, as appear'd by their Looks, Speeches, Meetings, and Libels. Their Reſentments were heighten'd by ſo many cruel Executions on the Account of Religion, and the Conſtancy of the Sufferers, that they breath'd nothing but Revenge againſt the Authors of thoſe Proceedings, of whom the Duke of *Alva* was reckon'd the chief. In the beginning of 1566, the People mutiny'd in many Cities, hinder'd Executions, and forc'd Priſons and Officers, which was follow'd by a Confederacy of the Lords, never to ſuffer the Inquiſition in the *Low Countries*, as being contrary to all Laws Sacred and Prophane, and exceeding the Cruelty of all former Tyrannies. After this, the Count *de Bredorode*, at the Head of 200 Gentlemen, went through the Provinces to *Bruſſels*, and boldly petition'd the Governeſs to aboliſh the Inquiſition, and the Edicts about Religion; and that thoſe Affairs ſhould be left to a general Meeting of the States. While the Go-

Digitized by Google

Governeſs look'd upon them with ſome ſort of Aſtoniſhment, *Barlemont*, one of her Confidents, ſtanding by her, ſaid, *Madam, I hope you are not afraid of thoſe Gueux*, which in their Language ſignifies Beggars; but the Count, and thoſe who adher'd to him, were ſo far from being aſham'd of the Reproach, that they glory'd in the Name, cloath'd themſelves ſoon after in mean Apparel, and hung Budgers at their Girdles, with a Medal, having this Inſcription on it, *We will be true to the King, even to our Budgets*.

Theſe Proceedings oblig'd the Governeſs to milder Methods, and ſhe promis'd to repreſent their Deſires to the King, at which, tho' he was ſtartled, his Anſwer came too late; and the People having loſt all Confidence in him, a great Inſurrection enſued, wherein they ſpoil'd many Churches of their Ornaments, pull'd down Images, and, which is unavoidable in ſuch Caſes, committed many Diſorders. After this, the Proteſtants began to elect Magiſtrates of their own, and to ſet up Conſiſtories in each Town, to form publick Confederacies, and to raiſe private Contributions for the Support of the Common Cauſe: But the Nobility and richeſt Citizens dreading the Effects of ſuch Proceedings, tho' they were unſatisfied with the Government, yet on the Arrival of the King's Conceſſions, they join'd with the Governeſs to ſuppreſs the Inſurrections, wherein the Authority of the Prince of *Orange*, and the Count of *Egmont*, who were belov'd by the People, was of great Uſe to her. But ſome Time after, the Government having reduced ſeveral Towns by Arms, others having ſubmitted, the Count of *Egmont* having deſerted the Confederacy, which afterwards prov'd his Ruin, Count *Brederode* dying, and the Prince of *Orange* being forc'd to fly into *Germany*, the Country ſeem'd to be entirely reduc'd to their former Obedience.

King *Philip* had been long preſs'd by his wiſeſt Counſellors to go into *Flanders*, where his Preſence was thought neceſſary to ſuppreſs thoſe Diſorders: But inſtead of that, he ſent the Duke of *Alva* with 10000 Veteran Troops to execute his firſt Reſolutions with all Violence and Rigour; which, as *Bentivoglio* informs us, was not only contrary to the Advice of the Governeſs, and his other beſt Friends, but diſpleaſing to many of the *German* Popiſh Princes, who dreaded the Effects of ſo ſudden a Change in a neighbouring Government; but the King was unmoveable in his Reſolutions. Upon the Approach of this Army of *Spaniards* and *Italians*, under the moſt expert Officers in *Europe*, the adjoining People left the Country in ſuch Numbers and Precipitation, that, as the Governeſs inform'd the King, above 100000 of 'em went off in a few Days with their Effects: So great is the Antipathy, obſerves Sir *William*, between Merchants and Soldiers. When the Duke arrived, firſt he ſeized the Counts of *Egmont* and *Horn*, which, with the ſuſpected Death of the Marquis of *Bergen*, and the Impriſonment of *Montigny*, who had been ſent to *Spain* with Inſtructions by the Governeſs, oblig'd her to deſire Leave to retire. This was eaſily obtain'd, and ſhe went for *Italy* the beginning of 1568.

The Duke of *Alva* having receiv'd the Government, with greater Powers than any of his Predeceſſors, he ſeiz'd the Count of *Buren*, the Prince of *Orange*'s eldeſt Son, who was ſtudying at *Louvain*, and ſent him under a Guard to *Spain*: Then he erected a Council of 12, who determin'd all Civil and Criminal Cauſes ſovereignly, without Appeal, put great Numbers of People to Death every Day, impriſon'd, baniſh'd, and confiſcated others, exceeded the Inquiſition in Cruelty, and treated the Country with as much Barbarity, as if it had been a Conqueſt: Upon which Account, the People juſtly call'd it the *Council of Blood*. They utterly ſubverted the Conſtitution, depriv'd the Towns of their Charters, the People of their Liberties, the Knights of the *Golden Fleece* of their Privileges, and all other Courts of their Power; making as much Havock among the Subjects on Pretence of the above-mentioned Inſurrections, as the Inquiſition did among them on Pretence of Hereſy. This occaſioned People of all Ranks to complain of the laying aſide the States, and of governing them by a ſtanding Army, but without Redreſs. The Duke of *Alva* being naturally cruel, and inexorable, wanted nothing ſo much as Rebellion to make Work for his Army. The People were enrag'd, but over-aw'd, and without a Head. The Prince of *Orange* was

Digitized by Google

fled, and proclaim'd a Traitor, and the Counts of *Egmont* and *Horn* publickly executed at *Bruſſels*, notwithſtanding all the great Services they had formerly done to *Charles* V. and King *Philip*, and their late Merits in ſuppreſſing the Inſurrections of the People. After their Murther, the Prince of *Orange* was ſummoned to appear and take his Tryal; which not having obey'd, he was condemn'd as a Traytor, and his large Eſtate in the *Netherlands* and *Burgundy* confiſcated; and a Proclamation was publiſh'd in King *Philip*'s Name, authorizing any Man to kill him, and promiſing a Reward to them that ſhould do it, or aſſiſt in it. This was publiſh'd through all the Provinces in 1580, which occaſioned the Prince to publiſh that noble Piece, well known by the Name of his *Apology*, wherein he vindicates himſelf, and gives a large Account of all the Tyrannical Proceedings, Perjury and Treachery, of King *Philip*, and his Governors. This was publiſh'd at *Delft* in *Holland* the 25th of *January*, 1581, with a Letter directed to all the Kings and Potentates of *Chriſtendom*; and this Apology was juſtified by the *States General* of the *Low Countries*. The Prince at the ſame Time made uſe of his Intereſt with the Princes of *Germany*, where he was living quietly when the Proclamation was publiſh'd, againſt him, to obtain ſome Forces. He was was alſo join'd by great Numbers who flock'd to him out of the Provinces, which were univerſally enrag'd at the Execution of Count *Egmont* their Darling, and likewiſe by Troops from the Proteſtants of *France*, who had then taken Arms under the Prince of *Condé*. With theſe Troops he enter'd *Brabant*, and after many Encounters with various Succeſs, not being able to do much againſt the Duke of *Alva*'s Veteran Troops, eſpecially ſince his own began to mutiny for want of Pay, he was oblig'd to disband his Army, and to return to *Germany*. The Duke of *Alva* after this return'd to *Bruſſels* in Triumph; and out of the Cannon taken from *Lewis* of *Naſſau*, who was defeated at the Battle of *Gemming* on the Borders of *Weſt Friſtland*, he order'd his own Statue to be caſt in Braſs, treading upon two ſmaller Statues, repreſenting the two Eſtates of the *Low Countries*. This Statue was ſet up in the Citadel of *Antwerp*, that he had newly built for curbing that City. Nothing could more raiſe the Indignation of the *Flemings* than this Piece of Inſolence, conſidering that they had now loſt the Liberties enjoyed by their Anceſtors for ſo many Ages: But the Duke of *Alva* thinking them to be abſolutely brought under, would be no longer ty'd to any Forms or Meaſures, but demanded larger Taxes than what had been uſually granted, particularly the Hundredth Part of every Man's Eſtate at once, and for the future the Twentieth of all their Immoveables, and the Tenth of all that was ſold. The States, with much Reluctancy, agreed to the firſt, as a Thing finiſh'd at once; but refuſed the other two, becauſe of their Poverty, and the Ruin of Trade. But the Duke perſiſting, they petition'd the King for a Redreſs, without obtaining it: Upon which the Duke publiſh'd an Edict, commanding the People to pay it without the Conſent of the States; which being refuſed, the Soldiers began to levy it by Force: The Townſmen ſhut up their Shops, and the Country People forbore coming to Market; ſo that there were no Proviſions to be had in the Town. This ſo much enrag'd the Duke, that he order'd ſeveral of the Burgers, who refus'd Payment, to be hang'd immediately on their Sign-Poſts; and as the Soldiers were going to put it in Execution, News came that the *Brill* in *Holland* was ſurpris'd, and a general Revolt in *Holland* expected, which forc'd the Duke to put a Stop to thoſe barbarous Proceedings, for fear likewiſe of a general Revolt in *Brabant*. This Seizure of the *Brill* having begun the ſecond Inſurrection of the *Low Countries* in 1570, which ended in the Loſs of the United Provinces to the Crown of *Spain*, we ſhall give the following Account of it:

A great many of the People who fled from the Duke of *Alva*'s Cruelty, put themſelves under Protection of the Count of *Marck*, who hated the Duke and his Government, while others of 'em fled into the Woods, and liv'd upon plundering the *Spaniſh* Soldiers, and their Adherents, to whom they did a great deal of Miſchief, when the Prince of *Orange* firſt enter'd the Country with his Army. Some of the former, who had ſav'd Money for their Subſiſtence, put out to Sea in Ships with the Prince of

Orange's

Digitized by Google

Orange's Commiſſion, called themſelves by the Name of the *Water Gueuſe*, took all the *Spaniſh* Ships they met with, and by this Means acquir'd conſiderable Riches, ſheltering themſelves ſometimes in the Harbours of *England*, and at other Times in the Mouth of the *Ems*, and other Ports of *Frieſland*; but being prohibited the *Engliſh* Ports by Queen *Elizabeth*, then at Peace with *Spain*, *Strada* ſays, they were drove to the *Brill* by a Tempeſt, which they took by Storm. Upon this, the People being provok'd, as above, moſt of the Towns of *Holland*, *Zealand*, and *Weſt-Frieſland*, revolted, pull'd down the Images in their Churches, declar'd publickly for the Proteſtant Religion, and againſt the *Spaniſh* Tyranny, renounc'd King *Philip*, and ſwore Obedience to the Prince of *Orange*. They publiſh'd Libels againſt the D. of *Alva*, and pictur'd him with the Count of *Marck* ſtanding behind him, putting a Pair of Spectacles on his Noſe, becauſe *Brill* ſignifies Spectacles in their Language. At the ſame Time Queen *Elizabeth*, upon ſome old Pretenſions, ſeiz'd a great Sum of *Spaniſh* Money, as 'twas going to *Flanders* to pay their Army, and would never reſtore it, which prov'd a great Mortification to them in their then Circumſtances.

The Prince of *Orange* having levy'd ſome new Troops in *Germany*, made uſe of this Opportunity to poſſeſs himſelf of *Holland* and *Zealand*, march'd up within 5 Leagues of *Bruſſels*, ſeiz'd ſeveral other Towns, and had like to have reduc'd all the Provinces, had not his Men been diſcourag'd, and the Duke of *Alva*'s Party reviv'd by the horrid Maſſacre of the Proteſtants at *Paris*, contriv'd by the joint Councils of *France* and *Spain*, and one of the Effects of the Interview at *Bayonne*, formerly mention'd. This oblig'd the Prince of *Orange* to retire into *Holland*, becauſe of the natural Strength of the Country, and the Genius of the People, who being proud of their ancient Fame, recorded in the *Roman* Hiſtory, as noble Defenders of their Liberty, they ſcorn'd to come behind their Anceſtors in defending themſelves againſt the Tyranny of *Spain*. They were confirm'd in this Reſolution by the Cruelty of the Duke of *Alva* and his Son, who upon the taking of *Naerden*, put off all the People, without Regard to the Capitulation, Age or Sex, and deſtroy'd the Town; and upon the Surrender of *Haerlem* by Famine, after an obſtinate Siege of 10 Months, kill'd 400 of the Burgers in cold Blood, which made their Averſion to the Government of *Spain*, and their Hatred to the Duke of *Alva*, incurable. In 1572, the Duke of *Alva* ſat down before *Alkmaer*; but after a long and fierce Siege, was oblig'd to riſe from before it, becauſe of the Plague in his Camp; and the King becoming at laſt ſenſible of the Danger of a total Defection of the Provinces, he recall'd the Duke of *Alva*, who had made himſelf ſo hateful to the People, and ſent in his ſtead Don *Lewis de Requiſenes*, great Commander of *Caſtile*, who arriv'd here in 1573, and endeavour'd to appeaſe the People, by pulling down the inſolent Statue the Duke of *Alva* had ſet up in the Citadel of *Antwerp*: But the Diſtemper was too far gone to be cur'd; for they were ſo provok'd by the Duke of *Alva*'s Cruelty, who boaſted, beſides what he had ſlain in Battles and Sieges, of his having brought 18000 Men to their End by the Hand of Juſtice, that they would hear no more of the *Spaniſh* Government. In 1574, the *Spaniards* beſieg'd *Leiden*, and not being able to take it by Force, they reſolv'd to ſtarve it; but were prevented by the Boors, who open'd the Sluces, drown'd the Country, and forc'd the *Spaniards* to raiſe the Siege, which gave a great Turn for the worſe to the Affairs of *Spain*. In the mean Time Don *Lewis de Requiſenes* died without any appointed Succeſſor; ſo that the Government, by the Cuſtom of the Country, devolv'd upon the High Council, which *Bertivoglio* ſays, occaſioned the moſt violent Agitations that ever were known in *Flanders*; for the *Spaniſh* Army having taken *Zirickſea*, and being deny'd the Plunder of the Town, and alſo in want of Pay, they ſeiz'd and plunder'd *Aloſt* near *Bruſſels*: Upon which the People ſhut up their Shops, the Country-men gave over their Labour, and all took to Arms. They forc'd the Senate of *Bruſſels*, pull'd out ſuch as were for the *Spaniſh* Government, kill'd all the *Spaniards* they met, demanded an Expulſion of all Foreigners out of the *Low Countries* and an Aſſembly of the States; to which the Council was forced to agree. In the mean Time,

Time, the chief Men of the Provinces agreed with the Prince of *Orange* to carry on their common Affairs by joint Councils; ſo that when the States aſſembled at *Ghent*, they agreed upon that Act, call'd, *The Pacification of* Ghent, in 1576. The chief Articles were; To drive all Foreign Soldiers out of the Province; To reſtore the ancient Conſtitution, which had been ſubverted by the Duke of *Alva*; To refer Matters of Religion in each Province to their own States; and that for Performance of it, the reſt of the Provinces ſhould enter into a Confederacy with *Holland* and *Zealand*. Here we muſt obſerve, That the Prince of *Orange* had acquir'd great Reputation by bringing King *Philip*'s Commiſſioners to the like Agreement for *Holland* and *Zealand* the Year before, which pav'd the Way for this Agreement; which, ſays Sir *William Temple*, made the firſt Period of the *Low Country* Troubles, and prov'd to King *Philip*, by dear-bought Experience, that the beſt Conduct, and the boldeſt Armies, are not able to withſtand the Torrent of a ſtubborn and enrag'd People, which ever bears all down before it ſo long as it laſts. Upon the paſſing of this Act, not only the *Spaniards*, but the *German* Troops, were order'd to depart the Country; and upon their Refuſal, were declared Rebels. The *Spaniards* being enrag'd at this, plunder'd ſeveral Towns, and *Antwerp* among the reſt, which alienated the Affections of many People from King *Philip*, who till then had adher'd to him. The *Spaniards* defended themſelves in ſome of thoſe Places till the Arrival of Don *John* of *Auſtria* to take the Government upon him.

The States refuſed to admit him, except he would confirm the *Pacification of* Ghent, which at length he did, by Conſent of the King, and ſent away the Foreign Troops; but ſoon after, on Pretence of complimenting Queen *Margaret* of *Navarre* upon her Journey from *France* to the *Spaw*, he ſurpris'd the Caſtle of *Namur*. Upon which the Provinces renounc'd the *Spaniſh* Government the third time, and called the Prince of *Orange* to *Bruſſels*, where the States made him Protector of *Brabant*; ſo that *Spain* had nothing left but the Provinces of *Namur* and *Luxemburg*. The reſt of the Provinces, that did not chuſe the Prince of *Orange*, ſent and offer'd their Government to Archduke *Matthias*, the Emperor's Brother. This was occaſioned by the Envy of ſome of the Grandees againſt the growing Greatneſs of the Prince of *Orange*. Upon which they form'd a third Party, who declar'd their Adherence to the Church of *Rome*, and agreed in nothing with the Prince but in driving out the Foreign Troops, and Defence of their old Conſtitution. The Head of this Faction was the Duke of *Arſchot*; but the Archduke having neither the Conſent of his Brother, nor the King of *Spain*, could do nothing to the purpoſe, and therefore return'd to *Germany*. In the mean Time Don *John* died ſuddenly, not without Suſpicion of Poiſon by a *Spaniſh* Lady, and the Duke of *Parma* ſucceeded as Governor for *Spain*. The Malecontent Party offer'd their Government to *John Caſimir*, of the *Palatine* Family; but being afterwards diſcontented with him, they ſent for the Duke of *Alençon*, Brother to the *French* King, who came to their Aſſiſtance with a conſiderable Army. The Queen of *Navarre* had made an Intereſt for him on Pretence of going to the *Spaw*, as before-mentioned, whither Don *John* went foolihly to compliment her: But the very Day when the Duke of *Alençon* enter'd *Antwerp* in 1582, a *Biſcayner* ſhot at the Prince of *Orange*, and wounded him, which began a Jealouſy betwixt the *French* and the *Netherlanders*, that afterwards increas'd upon the Duke's Endeavours to poſſeſs himſelf of the Town by Violence, and make himſelf abſolute; ſo that he was forced to return to *France*, after having been ſhamefully drove out of that City, and died of Grief at the Caſtle of *Thierry*. Upon the Growth of the Malecontent Party, and the Breach of the *Pacification of Ghent* by Don *John*, the Deputies of *Guelderland*, *Zutphen*, *Holland*, *Zealand*, *Utrecht*, and the Omlands of *Frize*, enter'd into the Union of *Utrecht* in 1579; wiſely foreſeeing, that the ſaid Party, which pretended to follow a middle Courſe, would at laſt betray the whole to *Spain*. The chief Articles of that Union conſiſted in theſe Points, drawn out of the Inſtrument it ſelf.

" The 7 Provinces unite themſelves ſo " as if they were but one Province, and ſo " as never to be divided by Teſtament, Do-

" Neighbouring Princes, Lords, Lands, " and Cities, to be admitted into the U- " nion, by Conſent of the Provinces.

" For Religion, thoſe of *Holland* and *Zea-* " *land* to act in it as ſeems good unto them- " ſelves. The other Provinces may regu- " late themſelves according to the Tenor " eſtabliſh'd by *Matthias*, or elſe as they " ſhall judge to be moſt for the Peace and " Welfare of their particular Provinces; " provided every one remain free in his " Religion, and no Man to be examin'd " or entrapp'd for that Cauſe, according to " the *Pacification of Ghent*.

" In caſe of any Diſſention or Differen- " ces between Provinces, if it concern one " in particular, it ſhall be accommodated " by the others; if it concern all in general, " by the Stadtholders: In both which Ca- " ſes, Sentence to be pronounc'd within a " Month, and without Appeal or Reviſion.

" The States to be held as has been for- " merly mentioned; and the Mint in ſuch " manner as ſhall hereafter be agreed by all " the Provinces.

" Interpretation of theſe Articles to re- " main in the States; but in caſe of their " differing, in the Stadtholder's.

" They bind themſelves to fall upon and " impriſon any that ſhall act contrary to " theſe Articles; in which Caſe, no Privi- " lege nor Exemption to be valid.

This Act was ſigned by the Deputies of of *Gueldrland*, *Zutphen*, *Holland*, *Zealand*, *Utrecht*, and the Omlands of *Friſe*, *Jan.* 23, 1579. but was not ſign'd by the Prince of *Orange* till *May* following; and with this Signification, judging that by the ſame the Superiority and Authority of Arch-Duke *Matthias* is not leſſen'd.

That ſame Year the Cities of *Ghent*, *Nimegnen*, *Arnheim*, *Leewarden*, and ſome of the Nobles of *Frieſland*, with the Towns of *Venlo*, *Ipres*, *Antwerp*, *Breda*, and *Bruges*, enter'd into the Union; but the Confederates were in ſo low and uncertain a State, becauſe of the different Humours and Intereſts of the Parties they were made up of, and becauſe of the great Preparations againſt them by *Spain*, that on their firſt Coin they caus'd a Ship to be ſtamp'd, toſſed by the Waves, without Sails or Oars, and this Motto upon it: *Incertum quo fata ferant*; i. e. *We know not what Providence will do with us.*

Not long after the Duke of *Anjou*'s unhappy Management, the States renewed their Union in 1583, obliging themſelves to ſee ſuch Points of it as had been neglected during the Fury of the War, carefully obſerv'd; in caſe any Doubt happen'd, to ſee it clear'd; and any Difficulties that were ariſen, compos'd: And as to Religion, whereas in the firſt Union Popery was allow'd in all the Provinces, the States finding that many of the Papiſts were for ſubmitting again to the *Spaniſh* Yoke; they agreed, That in thoſe Provinces which continued firm to the Union, the Proteſtant Religion only ſhould be openly exercis'd. The Prince of *Orange* was barbarouſly murther'd at *Delft* by one *Balthazar Gerard*, a *Burgundian*, who ſhot him *Anno* 1584, in the 51ſt Year of his Age, with a Piſtol charg'd with

Digitized by Google

with three Bullets, juſt as he was riſing from Table, and ordering the Villain a Paſſport to go to a certain Place whither he was ſending him; for he had got into the Prince's Service on purpoſe, pretending to be a Proteſtant, and that his Father had ſuffer'd Martyrdom for his Religion: Upon which Account the Prince employ'd him on ſeveral Meſſages, without ſuſpecting his Fidelity. Thus the Court of *Spain* effected his Death at laſt, which they had ſeveral times attempted before: For beſides the Shot by which he was wounded at *Antwerp* by a *Spaniard*, in hopes of the Reward promis'd him in King *Philip*'s Proſcription, the Baron *de Maurier* informs us in his Lives of the Princes of *Orange*, That *Salviedo*, a *Spaniard*, who was in a Conſpiracy with others to have murther'd him, confeſs'd before his Execution, by Order of the Parliament of *Paris*, that the Prince of *Parma* had given him 4000 Crowns to murther the Prince of *Orange* by Poiſon or otherwiſe. After the Prince received his Wound, he died immediately, with theſe Words in his Mouth, *Lord have Mercy on my Soul, and on this poor People*; which was an effectual Confutation of the Calumnies thrown upon him by the *Spaniards*, that his Ambition and Deſire of Government was the Cauſe of his Revolt, ſince with his laſt Breath he plainly diſcover'd it to be the cordial Affection which he bore to his Country, as became ſo noble a Patriot. The People lamented his Loſs as that of a common Father, and never was a Funeral attended with greater Pomp, and more real Sorrow. The execrable Aſſaſſin was ſoon after put to Death, and died ſo harden'd, that he ſaid, If it were to be done again, he would do it: Yet this Villain is enroll'd by the Papiſts among their Martyrs.

The Murder of this great Prince was ſo far from diſcouraging the United States, that it confirmed them in their Reſolution never to ſubmit again to the *Spaniards*: And after having done what they could in Honour to the Prince's Memory, they conferred upon his Son Prince *Maurice* all his Honours and Employments, and bravely rejected all the Propoſals that were made them by the Court of *Spain*, being encourag'd and ſupported under-hand by Queen *Elizabeth* of *England*, as a juſt Repriſal for the Encouragement given to her *Iriſh* Rebels by the Court of *Spain*. K. *Philip* had lately increas'd his Dominions by invading and uſurping *Portugal*; and aiming at the Univerſal Monarchy, he embrac'd at once the Protection of that call'd the *Catholick League* againſt *Henry* III. and IV. of *France*, and the Donation of *Ireland* made him by the Pope, which brought on his War with *England* and *France*, and engag'd both thoſe Crowns in the Aſſiſtance of the *Dutch*; for thô Queen *Elizabeth* refus'd their Sovereignty when they petition'd her to accept it, yet in 1585 ſhe enter'd into Articles with their Deputies, to furniſh them great Supplies of Men and Money, upon their putting the *Brill*, *Flushing*, and *Ramekins*, into her Hands as Cautionary Towns. She ſent Sir *John Norris* with Forces to aſſiſt them; and in 1587, being then at open War with *Spain*, who were preparing their Armado to invade her, ſhe ſent over greater Forces under the Earl of *Leiceſter* to aſſiſt them, and the States ſwore Obedience to him as Governor of the United Provinces. But his Government was of no long Duration, the States growing jealous that he affected an abſolute Dominion, and having juſt Cauſe to be offended with his Male-Adminiſtration, particularly with the ſcandalous Loſs of ſeveral of their Towns by his Governors, and the ill Management of their Naval Affairs, as we find in *De Witt's Intereſt of Holland*: And thô they were jealous alſo that the Queen would make a Peace with *Spain*, thoſe Suſpicions were ſoon removed by her Majeſty's recalling the Earl of *Leiceſter*, and continuing her Supplies to them; and they on the other hand aſſiſted her very frankly by Sea againſt the *Spaniards*. After the Earl of *Leiceſter*'s Removal, they choſe Prince *Maurice* to be their Governor, with a Reſervation to Queen *Elizabeth*, to whom they paid the greateſt Deference that ever they did to any Foreign Prince; and her Memory, their Succeſſors ſtill revere. Prince *Maurice* anſwer'd the Expectations which the States conceived of him, proved the greateſt Captain of his Age, particularly for the Diſcipline of his Armies, and the Ways of Fortification he invented. Before his Father's Death, the Prince of *Parma*, by his Conduct, Valour, and other good Qualities, did, with the Aſ-

Digitized by Google

Aſſiſtance of the Malecontents, reduce moſt of the Provinces to the Obedience of *Spain*; which he effected the more eaſily, becauſe of the Differences which were fomented by the Popiſh Clergy betwixt the Proteſtants and Papiſts that were united againſt *Spain*; ſo that the Papiſts chas'd the Proteſtants out of *Boiſleduc*, and the Proteſtants chas'd the Papiſts out of *Antwerp*. The Duke of *Parma* improving thoſe Diviſions, took ſeveral Towns, and endeavoured to bring off the Prince of *Orange* by large Promiſes, but in vain. The Duke of *Parma* recover'd all *Flanders*, with ſome other Provinces, and took *Antwerp* after a long Siege; ſo that the Affairs of the Confederate Provinces ſeem'd to be reduc'd to a deſperate Condition by thoſe Loſſes, and the Murther of the Prince; but were happily retrieved by Prince *Maurice*'s Conduct, and Queen *Elizabeth*'s Aſſiſtance. The reducing of *Flanders* by the Duke of *Parma*, forced all the Proteſtants to retire from thence into the United Provinces, which much contributed to their Strength, and to the Eſtabliſhment of the Reformation there. Prince *Maurice* gain'd great Reputation by his firſt Eſſay, which was the Surpriſal of *Axel*, and taking it by Scalade. The *Spaniards* at the ſame Time endeavour'd to amuſe Queen *Elizabeth*, and to raiſe Jealouſies betwixt her and the States, by making Propoſals of Peace to her. But King *Philip*'s Diſſimulation was ſoon diſcover'd by the Equipment of what he call'd his *Invincible Armada*; with which, and his Army in the *Netherlands*, he flatter'd himſelf with Hopes of conquering *England* and *Holland*; to which Pope *Sixtus* V. encourag'd him, by laying *England* under an Interdict, excommunicating Queen *Elizabeth*, and giving her Crown to any that could ſeize it. The *Atlas Hiſtorique* ſays, That both *England* and *Holland* were too negligent at firſt in preparing for their Defence; but if it were ſo, that Defect was happily ſupplied by the Care of Providence, and their after Diligence. The *Spaniſh* Armado was deſtroy'd by the Hand of Heaven, which ſcatter'd them by Tempeſts, and by the Valour of the *Engliſh*, who attack'd them with a Fleet far inferior in Number and Greatneſs of Ships, while the *Dutch* block'd up the Mouth of the *Scheld*, and hinder'd the Duke of *Parma* from ſending an Army that Way to invade *England* by Land; ſo that very few of the *Spaniſh* Fleet return'd home with the News of their Diſaſter, which occaſion'd an univerſal Conſternation and Mourning in *Spain*, and laid the Foundation of the Declenſion and Weakneſs which has ſince come upon that Monarchy.

After this, the Duke of *Parma* laid Siege to *Bergenopzoom*, but was forc'd to raiſe it. *Gertrudenberg* revolted to the *Spaniards*, and Prince *Maurice* reliev'd the Town of *Heuſden*, which they had cloſely beſieg'd, while the Duke of *Parma* took *Rhinberg*, after a long Defence; and the brave *Schenk* was unhappily drown'd while he attack'd *Nimeguen*, and had almoſt taken it in Behalf of the States. But Prince *Maurice* had better Succeſs in ſurpriſing *Breda* by 70 Men, who got into the Citadel under a Load of Turf, which was carried in a Boat for Fuel to the Gariſon. Sir *William Temple* obſerves, That the Affairs of the States had a mighty Turn for the better by the ſharp Wars which Queen *Elizabeth* made upon the *Spaniards* in the *Indies* by Sea, and the Expeditions againſt *Lisbon* and *Cadix*; to which Turn, the Declenſion of the Affairs of the League in *France* did very much contribute; for whoſe Support K. *Philip* was ſo paſſionately engaged, that he twice commanded the Duke of *Parma* to interrupt the Courſe of his Victories in the *Netherlands*, and march into *France* for the Relief of *Roan* and *Paris*, which were then much preſſed by the Forces that the *French* King had rais'd againſt thoſe of the League; and this, as Sir *William Temple* juſtly obſerves, did very much increaſe the Fame of this great Captain; but as much impair'd the State of the Affairs of *Spain* in the *Netherlands*, where Prince *Maurice* took ſeveral Places, notwithſtanding the Oppoſition made to him by Count *Mansfeld*, an old and experienc'd Captain; and after the Duke's Return in 1590, the Prince took *Hulſt* and *Nimeguen*, and oblig'd the Duke to raiſe the Siege of *Knodſemburg*. After theſe and ſeveral other Conqueſts during that Campaign, Prince *Maurice* return'd to *Holland*, loaden with Glory; and his Fame was ſpread through all *Europe*. In 1592, the Duke of *Parma* was commanded again into *France* to aſſiſt the Leaguers, but without much Effect; for their Affairs,

Digitized by Google

and thoſe of *Spain*, received a fatal Blow by the Succeſſion of *Henry* IV. to the Crown of *France*, and the good Correſpondence he entertain'd with Queen *Elizabeth* and the States of *Holland*. This Year the Duke of *Parma* died, and with him the Succeſs and Diſcipline of the *Spaniſh* Armies in the *Netherlands*. In the mean Time Prince *Maurice* appeaſed ſome Seditions in *Utrecht* and *Zealand*, and took *Stenwick*, *Coeworden*, and *Otmarſen*. In 1593, he retook *Gertrudenberg*, and puniſh'd thoſe who occaſioned its former Revolt. In 1594, Archduke *Erneſt* ſucceeded the Duke of *Parma*. Prince *Maurice* miſcarried in his Deſign on *Maeſtricht* and *Boiſleduc*, but reduced *Grouingen*. The Archduke made Propoſals to the States, which they rejected; and ſoon after he and ſome other great Men form'd a Conſpiracy to murther the Prince, and ſome of the principal States, as appear'd by the Confeſſion of ſeveral of the Aſſaſſins who were ſeiz'd: Upon which the Deſign was happily defeated. In 1595, the Archduke died, and King *Philip* left the Government of the *Netherlands* to a Senate, under the Direction of the Count *de Fuentes*, their Preſident. They ſent Deputies to treat with Prince *Maurice*, but without Effect. About this Time the *Dutch* began to enlarge their Navigation to the *Eaſt-Indies*. In 1596, King *Philip* ſent Archduke *Albert* to govern the *Netherlands*, where his Armies had been very mutinous ſince the Death of the Duke of *Parma*. Sir *William Temple* ſays, That the ſending of Archduke *Albert* had a deeper Root and Deſign than appear'd at firſt; of which he gives the following Account:

King *Philip* finding his Body broke with Age and Infirmities, and his Mind with Care and diſtemper'd Thoughts, was willing now to be at Reſt and Quiet, which he had never yet allow'd the World or himſelf. His Deſigns upon *England* by his Invincible Armado, had ended in Smoak; and thoſe upon *France* had Events quite contrary to his Expectation. Inſtead of eſtabliſhing a Tyrannical Government in the *Low Countries*, he had loſt 7 of his Provinces, and kept the reſt only by a War, which coſt him more than they were worth. He had lately made a Peace with *England*, and deſired it with *France*; and tho' he ſcorn'd to make Peace with the *Dutch* in his own Name, yet he wiſhed it in another's, and was unwilling to entail a Quarrel upon his Son, which had ruin'd all his own vaſt Projects. He therefore committed the Management of this Affair to Archduke *Albert*, to whom he gave the Title of Governor and Prince of the *Low Countries*, who, if he could reduce them, was to govern them as *Spaniſh* Dominions; but if he could not, he was to marry *Clara Iſabella Eugenia*, King *Philip*'s beloved Daughter, and to receive the 10 Provinces as her Dowry, on Condition they ſhould return to *Spain* if ſhe died without Iſſue. He hop'd that the Birth and Manners of the Archduke, who was a *German*, and the generous and obliging Temper of *Iſabella*, might gain more upon the *Netherlanders* than his own Tyrannical Conduct, and that at worſt they might make a Peace, if they were not ſucceſsful in War, without intereſſing the Honour and Greatneſs of the *Spaniſh* Monarchy. In Purſuit of this Determination, King *Philip*, while he intended nothing but Peace, made Preparations as if he deſign'd nothing but War, well knowing that his own Deſires of Peace would ſignify nothing, except his Enemies were brought to deſire it too. He therefore ſent the Archduke with an Army into *Flanders*; and believing that Peace with *France* muſt be the firſt in Order, and make Way for that of the *Low Countries*, he marched into *France*, took *Amient*, the Capital of *Picardy*, and gave the *French* Court ſuch an Alarm, as they had not received in the former Wars. But we return from Sir *William*'s judicious Reflection to the Courſe of the Hiſtory, part of which has been anticipated by this neceſſary Digreſſion. The Archduke brought with him *Philip* Prince of *Orange*, Prince *Maurice*'s eldeſt Brother, whom we mentioned before to have been carried off from his Studies at *Louvain*, contrary to the Privileges of that Univerſity, thinking by his Means to bring the United Provinces to a Compliance. The Archduke had Succeſs againſt the *French* at firſt, having taken *Amiens*, *Calais*, and *Ardres*, from them, as well as *Hulſt* from the States. Soon after this, the Queen of *England* and the *Dutch* ſent a Fleet againſt *Spain*, where they took *Cadiz*, as above-mentioned: But a Miſunderſtanding betwixt the Commanders hinder'd the Advan-

Digitized by Google

vantage that might have accrued from it both to *England* and *Holland*. After this, the *Dutch* made an Alliance with *France* and *England*. King *Philip* ſent a Fleet of 128 Sail againſt the *Engliſh* to revenge their plundering of *Cadiz*; but they were overtaken by a Tempeſt off of Cape *Finiſterre*, that drove 40 of their Veſſels aſhore, and drown'd 5000 Men, which made this Expedition abortive. The ſame Year the *Dutch* continued their Navigation to the *Eaſt-Indies*, and ſent a Veſſel a third time to diſcover a Paſſage by the N. E. but miſcarried in the Deſign, the Ship being frozen up, and the Men Wintering in *Nova-Zembla*. They all died but 12, who return'd with a melancholy Account of that fatal Adventure. In 1597. Prince *Maurice* defeated the Count *de Varax* with the *Spaniſh* Veteran Troops at *Turnhout*; but fail'd in his Deſign to ſurpriſe *Venlo*. This Year there happen'd a Difference betwixt the City of *Groningen* and the neighbouring Country, and likewiſe betwixt the Provinces of *Holland* and *Zealand* about a Tax on Merchandize; but they were both accommodated. Ambaſſadors from *Poland* and *Denmark* endeavoured to mediate a Peace betwixt the States and *Spain*; but the former rejected the Propoſals, and publiſh'd their Reaſons. This Year 4 *Dutch* Ships return'd from the *Eaſt-Indies*, after a Voyage of 3 Years; and their Succeſs laid the Foundation of their *Eaſt-India* Company, which is ſince become ſo powerful. The Prince took *Rheinberg*, *Meurs*, *Grol*, *Bredefort*, *Othmarſen*, *Oldenſeel*, *Lingen*, and all the other Towns beyond the *Rhine*, from the *Spaniards*, during the Archduke's Expedition againſt *France*; and the Prince, upon the Cloſe of this Campaign, return'd to *Holland*, where he was received with great Pomp, and the loud Acclamations of the People. In 1598. Archduke *Albert* married *Iſabella*, King *Philip*'s Daughter above-mentioned, and had with her *Burgundy* and the *Netherlands*. He hop'd by this Means to have brought the *Dutch* to ſubmit, on the Proſpect of having a Prince of their own continually dwelling in the Country, whoſe Poſterity would be Natives, and govern them according to their own Laws and Cuſtoms. He made uſe of the Prince of *Orange* to perſwade them to it, but in vain; for they look'd upon it to be only a Trap to enſnare them. After this, the States ſent two ſplendid Embaſſies to *Henry* IV. of *France*, and Queen *Elizabeth*, being the firſt they had ſent ſince they form'd their Republick, and made a new Treaty with *England*. At this Time a Ruſſian had undertaken to murther Prince *Maurice*, but was diſcovered and puniſh'd. This Year King *Philip* II. of *Spain* died, having been a Prince of great Qualities as well as Dominions, but guilty of great Defects, being a Diſſembler, Revengeful, Superſtitious, and of unmeaſurable Ambition. His whole Reign was a Courſe of War, during which he acquir'd *Portugal*, that was no laſting Conqueſt, and he loſt the United Provinces. About this Time *Mendoza*, the Admirant of *Arragon*, commanded the *Spaniſh* Army in the *Netherlands*, paſſed the *Maes* into *Guelderland*, and marched to the Frontiers of *Germany*, where he committed great Diſorders and Cruelties on Papiſts as well as Proteſtants, his luſtful *Spaniards* not ſparing the Nuns, which obliged the *German* Princes to raiſe Troops, and repulſe him. In 1599, the *Dutch* Army being inconſiderable, it made Prince *Maurice* very uneaſy, ſince he had not above 4000 Men to defend the Paſſages of the *Rhine* and the *Iſſel*. The States put out a conſiderable Fleet under *Peter la Douze*; but he was unſucceſsful, having only burnt the Fort and Town of the *Canaries*, but loſt his own Life, and part of his Equipage, in the Expedition. *Frederick Spinola* brought 6 Gallies into the *Netherlands* to infeſt the *Dutch* Trade, and was to have all the Prizes he took for a Reward. The *Dunkirkers* would not let him have their Harbours, ſo that he brought them to *Sluys*, and cruiſed upon the *Zealanders*, who were very much afraid of them at firſt; but at laſt defeated them in ſeveral Rencounters. The Republick endeavour'd to raiſe a Tax for the Support of the War; but ſome of the Provinces oppos'd it, and the Elector *Palatine* ſollicited other Princes of *Germany* to aſſiſt them. *Breaute*, a *Norman* Gentleman in the Service of the States, with 19 of his Countrymen, challeng'd 20 *Spaniards* of the Garriſon of *Boiſleduc* to a Combat, which they accepted: *Breaute* kill'd the *Spaniſh* Commander at firſt, and the Conflict was ſo ſharp, that half the Men on

Digitized by Google

both Sides were kill'd in a little Time; but the *French* fled, and *Breaute* yielding, was barbarouſly kill'd by the *Spaniards*, tho' they promis'd him Quarter. The States of *Zealand* having repreſented the Neceſſity of making War in *Flanders*, Prince *Maurice* went thither in 1600 with an Army, and the Archduke encounter'd him near *Newport*, where the Victory fell to the *Dutch*, chiefly by the Bravery of the *Engliſh*, under the Conduct of Sir *Francis Vere*. The Archduke was wounded, and very near taken in this Battle, where he had 6000 Men killed, and 600 taken, with 300 Colours; but the Badneſs of the Seaſon hinder'd Prince *Maurice* from improving this Victory. Some Conferences were held at *Bergenopzoom* this Year about Peace, but without Succeſs. In 1601, the Archduke form'd the Siege of *Oſtend*, where the Garriſon of the States made ſuch a brave Defence, as very much diſhearten'd him, and made him deſpair of Succeſs; but being recruited by 8000 *Italians*, under the Marquis *de Spinola*, he left the Direction of the Siege to him, who took it after 3 Years, 3 Months, 3 Weeks, 3 Days, and 3 Hours; not ſo much by any want of Men or Proviſions within, the Haven being open all that while, ſo that they had conſtant Supplies by Sea, but perfectly for want of Ground, which he gain'd from them Foot by Foot, till they had not ſo much left as would hold Men to defend it. Prince *Maurice* attempted to relieve it ſeveral times, but in vain, the *Spaniards* were ſo ſtrongly intrench'd, and his Army not large enough to force them. In the mean time the *Dutch* increas'd in their Trade, *Oliver de Nord* having diſcover'd the Streights of *Magellan*, and their Navigation being ſucceſsful in the *Indies*, from whence in 1602 they had Ambaſſadors ſent them. They likewiſe burnt *Spinola*'s Gallies, formerly mentioned, in 1603, and took *Sluys*, which he came to relieve, where his Troops were defeated, and himſelf kill'd. The King of *Spain* publiſh'd an Edict, allowing the *Dutch* to trade in his Kingdom; but becauſe of the great Impoſts he laid on their Goods, they would not accept it. The ſame Year they ſent a Squadron to the *Eaſt-Indies* and *Brazile* to pillage the *Spaniards*. In 1604, the Emperor wrote to the *Dutch* to perſwade them to Peace, which they refuſed, and excuſed themſelves, by alledging that they could not rely upon any Treaty with the *Spaniards*. This Year concluded the Siege of *Oſtend* above-mention'd, when the Garriſon obtain'd very honourable Terms, and retir'd to *Sluys*, where Prince *Maurice* receiv'd them with as much Honour, becauſe of their brave Defence, as if they had come from a Conqueſt. *Puffendorf* ſays, the *Dutch* loſt 70000 Men during that Siege; but the *Spaniards* a great many more, beſides the Loſs of *Rhinberg*, *Grave*, and *Sluys*, which Prince *Maurice* took in the mean time. The *Engliſh* under Sir *Francis Vere* did the *Dutch* great Service in Defence of this Town while he continued Governor, as both they and the *Scots* did on other Occaſions; for they had Troops from *Scotland* before King *James* came to the Crown of *England*, the *Spaniards* having eſpouſed the Cauſe of his Mother, in order to dethrone him; and *Strada* takes particular Notice of the Intrepidity of ſome of the *Scots* during this War, who in Engagements ſtrip'd themſelves, and fought naked, with amazing Courage. In 1605, the *Spaniards* made freſh Propoſals of Peace, but without Effect, thô *Spinola* took *Lingen*, *Groll*, and *Rhinberg*, from the States, and Prince *Maurice* miſcarried in his Deſign upon *Antwerp*. This Year a *Dutch* Squadron return'd from the *Eaſt-Indies* and *Brazile*, with a great Booty they had taken from the *Spaniards*; and they ſent out more Ships, under the Director of their *Eaſt-India* Company. In 1606, the *Spaniards* enter'd the United Provinces with ſeveral Armies, againſt whom Prince *Maurice* made a brave Defence on all Sides; ſo that they only took *Rhinberg*, but were repulſed at *Nimeguen* and *Zwol*. In 1607, the States continued ſucceſsful in the *Indies* againſt the *Spaniards*, and in their Negotiations with the Princes in thoſe Parts, by which in a manner they engroſſed the Spice Trade. The *Portugueze* ſuſtaining great Loſs by theſe Expeditions, they adviſed the King of *Spain* to make Peace with the *Dutch*, wherein *Spinola* concurred with them, and Deputies were accordingly ſent to the *Hague*, but without Succeſs, tho' there was a Ceſſation of Arms for ſome Time. After this the *Dutch* ſent *Heemskirk* with a Fleet againſt *Spain*. He attack'd the *Spaniſh* Fleet in the Har-

Digitized by Google

Harbour of *Gibraltar*, tho' they were very ſtrong, and had a numerous Artillery, and ſeveral Regiments of the beſt Land-Forces aboard. This brave Admiral was kill'd in the Battle; but his Fleet obtain'd a compleat Victory over the *Spaniards*. The Kings of *France*, *Denmark*, and *Sweden*, with ſeveral Princes of *Germany*, interpoſed for a Peace; but the Ratification of the Articles ſent from *Spain* not being anſwerable to the Archduke's Promiſes, 'twas not then concluded; yet a great many Troops were caſhier'd on both Sides on the Proſpect of an Agreement. In 1608, the Negotiations were again ſet on foot; as to which, Sir *William Temple* gives us the following Account: The *Dutch* had purſued their *Eaſt-India* Trade with ſo much Application and Advantage, that they made themſelves Maſters of moſt of the Colonies and Forts belonging there to the *Portugueze*, then Subjects of *Spain*; That *Holland* became the great Magazine of all the Commodities of thoſe Eaſtern Regions. In the *Weſt-Indies*, tho' the Attempts of the *Dutch* were neither ſo frequent nor proſperous, the *Spaniſh* Plantations there being too numerous and ſtrong, yet by the Multitude of their Ships ſet out with publick and private Commiſſions, they infeſted thoſe Seas, laid wait for the *Spaniſh* Plate-Fleets, and ſometimes attempted their Coaſts in that New World, which was to touch *Spain* in the moſt ſenſible Part, and was a ſtrong Motive to their Court to endeavour a Peace, in order to ſecure thoſe Treaſures, and preſerve them in *Spain*, by ſtopping the Iſſue of thoſe vaſt Sums that they continually ſent out to maintain the War in the *Netherlands*. This occaſioned the Propoſals of Peace to come wholly from the *Spaniards*; but the *Dutch* would never hear of it, till the Archduke declared he would treat with them as with Free Provinces, upon whom neither he nor *Spain* had any Pretences: And the *Spaniſh* Court condeſcended ſo far as to treat at the *Hague*, the Seat of the Sates General; and the Archduke's Four chief Miniſters were appointed to go thither to manage the Treaty, *viz.* their General *Spinola*, the Preſident of the Council, and the Secretaries of State and War. The *Dutch* proceeded with the greateſt Coldneſs imaginable, criticiz'd upon every Word of the Archduke's Declaration to treat with them as Free Provinces and upon the King of *Spain*'s Ratification of it; ſo that they forc'd them to ſend Expreſſes to *Spain* upon every Occaſion, and to attend their tedious Returns: For the Succeſs of the States in 30 Years War by Land, and the mighty Growth of their Naval Power and Trade, had made all thoſe concern'd in the War by Sea or Land averſe to a Peace, as well as the greateſt Part of their People, whoſe Hatred againſt *Spain* was ſtill as great as ever; and not a few of them had Hopes of raiſing their Fortunes by the War, of which they had many great Examples among them: But that, ſays Sir *William*, which chiefly contributed to bring them to a Peace, was, 1. Their Jealouſy of the Growth of *France* under the Conduct of *Henry* IV. who had then made a Peace with *Spain*: For they knew that the hot Spirits of the *French* could not long continue without ſome Exerciſe; and they were afraid that King *Henry*'s great Preparations for War might be deſigned againſt *Flanders*, and that the Neighbourhood of the *French* would prove more dangerous to them than the Government of *Spain*, whoſe Power they now ſaw declining very faſt. The 2d was their Jealouſy of Prince *Maurice*, whoſe Credit and Power being founded on that of his Father, and advanc'd to a great Height by his own Perſonal Merit and Succeſs, they were afraid he might aim at an abſolute Power, he being then Stadtholder of 4 of the Provinces, and two of his Couſins of the other 3. Theſe Jealouſies were heighten'd by *Barnevelt*, Penſioner of *Holland*, a Perſon of great Abilities and Authority. This had more Influence upon the Peace than the Interceſſion of neighbouring Princes, or any other Conſideration; yet the Treaty was like to break off on the Points of Religion, and the *Indian* Trade. But the latter of thoſe Difficulties being referr'd, a Truce of 12 Years was ſign'd in 1609; and Foreign Powers did after this receive the Deputies ſent them by the States as Ambaſſadors. The principal Things agreed on at this Treaty were, 1. The Declaration by the Archduke, owning that he treated with them as with a Free People, which was afterward ratified by the King of *Spain*. The States a long time debated the Word *As*, conceiving it might bear a double

ble Meaning; but by the Advice of the *French* Ambaſſador, they paſs'd from it, he having ſaid, as *Puffendorf* informs us, that this Word could not add much to the Strength of *Spain*, nor diminiſh theirs. 2. That all Priſoners ſhould be relieved on both Sides without Ranſom. 3. That each Party ſhould enjoy what they then poſſeſs'd. 4. That all Hoſtilities during the Truce ſhould ceaſe. 5. That a free Commerce ſhould be reſtored on both Sides as before the War. 6. That no new Fortifications ſhould be raiſed on either Side during the Truce. About this Time the Differences betwixt the *Calviniſts*, who had the Publick Eſtabliſhment, and the *Arminians*, began to break out. *Hudſon*, an *Engliſhman*, ſays the *Atlas Hiſtorique*, being ſent this Year by the *Dutch Eaſt-India* Company to ſeek a Paſſage to the *Indies* by the N. was ſtop'd by Ice; and afterwards going to ſeek a Paſſage by *Davis*'s Streights, diſcover'd that ſince called *Hudſon*'s Bay. He went to *England* in his Return, where he was detain'd; and oblig'd to ſerve his own Country, who made uſe of his Diſcovery. The *Eaſt-India* Trade being referred at the Treaty, as above-mentioned, new Controverſies happen'd betwixt the *Dutch* and the *Spaniards*, and mutual Hoſtilities enſued in the *Indies* on that Account. In 1611, the Difference betwixt the *Calviniſts* and *Arminians* occaſioned great Diſturbances in the State, the latter being countenanc'd by *Barnevelt* and others, who rais'd Suſpicions of the Prince, as if he deſign'd to make himſelf abſolute. In 1612, the *Spaniards* and *Portugueze* envying the Succeſs of the *Dutch* in their Trade, they oppos'd their Commerce, and pretended that none but themſelves had any Right to paſs the Line, which oblig'd the States to ſet out a Fleet to ſecure their Navigation. In 1613, King *James* I. of *Great Britain* made Prince *Maurice* a Knight of the Garter. In 1614, new Differences happen'd betwixt the *Dutch* and the *Spaniards* about the Succeſſion of *Cleve* and *Juliers*, which was claimed by the Elector of *Brandenburg* and the Duke of *Newburg*. *Puffendorff* ſays, the Emperor, upon the Death of the laſt Duke of thoſe Countries in 1609, had a Mind to annex them to his own Houſe, and ſent the Archduke *Leopold* to make a Sequeſtration of them: Upon which he took the ſtrong City of *Juliers*; but was beat out again by the *Dutch* and *French*. The Elector of *Brandenburg* and Duke of *Newburg* came afterwards to an Agreement; but differing again, the Duke was ſupported by the *Spaniards*, and the Elector by the *Dutch*; ſo that the States and the *Spaniards* made War upon one another in the Name of their Allies, tho' the Truce was ſtill continued betwixt themſelves. During theſe Wars, *Spinola* took *Weſel* by Surprize, and the *Dutch* put Garriſons into *Rees* and *Embrick* in the Dutchy of *Cleve*; but were ſo much alarm'd at the taking of *Weſel*, which might give the *Spaniards* a new Opportunity of invading their Provinces on that Side, that they engaged the *Engliſh* and *French* to mediate an Agreement betwixt the Elector and the Duke, who divided thoſe Dominions betwixt them, and engaged neither to call the *Dutch* nor the *Spaniards* afterwards into thoſe Countries. In 1616, the *Dutch* ſent *Barnevelt* into *England*, upon King *James*'s Demand of the Money which Queen *Elizabeth* had advanc'd to them on the Security of the Cautionary Towns. *Barnevelt* agreed to repay the Sum, and had thoſe Towns reſtor'd, which the States were the more willing to have effected, becauſe till that Time the *Engliſh* Ambaſſador had not only the Preference of all others in their Dominions, but likewiſe a Vote in their Council of State; which, Sir *William Temple* ſays, was by Agreement with Queen *Elizabeth*, becauſe of the Aſſiſtance ſhe gave them; tho' the *Dutch* pretended, that 'twas on the Account of the Cautionary Towns being poſſeſs'd by the Crown of *England*, and that this Privilege was to ceaſe upon the Redemption of thoſe Towns. Sir *William* alſo obſerves, That when the States made the Truce with *Spain*, they enter'd into a mutual Alliance with *Henry* IV. of *France* for preſerving the Peace, who, in caſe of a Breach, was to aſſiſt them with 10000 Men; and if he was invaded, they were to ſend him 5000. This King maintain'd a Body of Horſe and Foot at his own Charge in their Service after his Truce with *Spain*, in order to oblige the *Dutch*, and to make himſelf the Arbiter of Peace and War, he being their chief Support after Queen *Elizabeth*'s Death. In 1617, *James le Maire* diſcovered a new Paſſage near the Streights of

Digitized by Google

of *Magellan*, by him call'd, *Le Maire's Streights*. He diſcovered alſo two Countries, one of which he called, *Maurice* of *Naſſau*; and the other, *The Country of the States*. In 1618, the Troubles increaſing in the Country by the Practices of the *Arminians*, and the Oppoſition made to them, the States aſſembled a National Synod at *Dort*, at which Divines aſſiſted from *England*, *Germany*, *Switzerland*, and *Geneva*, wherein the 5 Articles of *Arminius* and his Adherents were condemned; but more of this when we come to the Account of their Religion. This Year *Philip* Prince of *Orange* died at *Bruſſels* without Heirs: Upon which Prince *Maurice*, his Brother, ſucceeded to his Title and Dominions. In 1619, *Barnevelt*, *Hugo Grotius*, and others, who had ſupported the *Arminians*, were Heads of the Faction that oppos'd Prince *Maurice*, and countenanc'd the levying of Troops to the Diſturbance of the State, were impriſon'd; for the Differences were come to that Height, that one of the Parties muſt be ſuppreſs'd, or the Ruin of the State endanger'd. Upon which *Barnevelt* was condemned to loſe his Head in an Aſſembly of the States General, and was accordingly executed in the 72d Year of his Age, much lamented by many, becauſe of the great Services he had done the State, and his having always profeſs'd himſelf a Patriot of his Country's Liberty. This made the Prince's Enemies write bitterly againſt him, as aiming ſtill at an abſolute Power. At the ſame time *Grotius* was condemn'd to perpetual Impriſonment in the Caſtle of *Louveſtein*, from whence his Wife got him convey'd in a Cheſt by which ſhe ſent him Books. After this he retir'd into the *Spaniſh Netherlands*, and from thence into *France*, where he was kindly received by *Lewis* XIII. He return'd afterwards to the *Netherlands*, upon Encouragement from Prince *Henry Frederick*; but the States would not ſuffer him to ſtay there: Upon which he went to *Chriſtina* of *Sweden*, who employ'd him in Affairs of the greateſt Importance, to *France*, and elſewhere; and he died at *Roſtock* in *Mecklenburg* in 1649. But tho' he was a Man of extraordinary Learning and Parts, it muſt be own'd, that his Unſteadineſs in Matters of Religion and Politicks, gave too great Ground to the Adverſaries of the then *Arminians* in *Holland*, one of whoſe Leaders he was, to ſay, that they intended very dangerous Innovations in Matters of Religion, if not in the State. Theſe Controverſies laid the Foundation of that called the *Louveſtein* or the Republican Faction, and that called the Prince's or Stadtholder's Faction, who, as Sir *William Temple* obſerves, have ever been very liberal in their mutual Reflections; the *Calviniſts* charging the *Arminians* to be Enemies to the true and purer Reformation, and the *Arminians* charging them as Enemies to the true and free Liberty of the State. But this Matter will appear in a clearer Light when we come to the Synod of *Dort*.

In 1620, the Differences which happen'd betwixt the Emperor and the Elector *Palatine* occaſion'd the *Spaniards* to aſſiſt the former, and the States the latter; ſo that they made War upon one another a ſecond time in the Name of their Allies, without breaking the Truce.

In 1621, the Truce ending, both Sides prepared to renew the War. That Year the Archduke *Albert* died at *Bruſſels*, much below'd of his Subjects, becauſe of his ſweet Temper. He was much troubled at his Death, becauſe he had not been able to eſtabliſh a laſting Peace with the *Dutch*.

In 1622, the War began afreſh with *Spain*. *Spinola* took *Juliers*; but was obliged to raiſe the Siege of *Bergenopzoom*, after he had loſt 10000 Men before it; becauſe Count *Mansfeld*, and *Chriſtian* Duke of *Brunſwick*, having defeated the *Spaniards* near *Fleru*, were marching to the Aſſiſtance of the *Dutch*.

In 1623, a Conſpiracy was form'd againſt the Prince, but the Authors diſcover'd and puniſh'd. That ſame Year the States ſettled their *Eaſt-India* Company by an Edict, were ſucceſsful in their Navigation, and took St. *Salvador* from the *Spaniards*.

In 1625, *Spinola* beſieg'd *Breda*, and ſo fortified his Camp, that the Prince was not able to raiſe the Siegé; ſo that it was taken after 9 Months Attack. The Loſs of this Town, and the Miſcarriage of his own Deſign on *Antwerp*, threw the Prince into a Melancholy, of which he died, extreamly lamented, having been a wiſe and valiant Commander, and endowed with all the Qualities requiſite in a great Captain.

In

In 1626, his Brother *Frederick Henry* ſucceeded. He hinder'd the *Spaniards* from finiſhing the Canal which they had begun to dig betwixt the *Rhine* and the *Maes*, and deſign'd to have brought by the Town of *Gelder*.

In 1627, he was made Knight of the Garter: The Marquis *de Spinola* was called back to *Spain*, and the Prince took *Grol*.

In 1628, General *Carpenter*, ſent out with a Fleet by the *Eaſt-India* Company, diſcovered that Part of *Terra Auſtralis* called *New Holland*. *Peter Adrian*, with 12 Veſſels, attack'd the *Spaniards* at the Iſle of *Cuba*, drove their Veſſels aſhore, and brought home a rich Booty to *Holland*. Admiral *Heyn*, who the Year before had defeated and taken the *Brazile* Sugar Fleet, did this Year take the *Spaniſh* Plate Fleet, and brought home in 1629, in Plate and Goods, above 60 Millions. The Prince receiv'd him with great Honour, gave him noble Preſents, and the States made him Knight and Admiral, and preſented him with a Crown of Gold, in Form of a Lawrel. The Prince took *Boiſleduc*, notwithſtanding the brave Defence of the Garriſon, and that the Count *de Berg* came with a great Army to relieve it. At the ſame Time the Governor of *Embrick* ſurpris'd *Weſel* for the States, which put a Stop to the Invaſion of the *Spaniards*, who had paſſed the *Iſſel* to ravage the United Provinces.

In 1630, the *Dutch* were ſucceſsful in the *Weſt* and *Eaſt Indies*, and obliged the Emperor of the Iſle of *Java* to raiſe the Siege of *Batavia*, which he attack'd with 200000 Men, and the Year after with 150000; but alſo in vain: And their *Weſt-India* Company poſſeſs'd themſelves of *Brazile*. Cardinal *Richelieu* had corrupted the Governor of *Orange*; but the Prince having Notice of it, turn'd him out, and fav'd that Principality.

In 1631, the *Spaniards*, with a great Fleet of Gallies and other Ships, endeavour'd to cut off the Communication betwixt *Holland* and *Zealand*; but Vice-Admiral *Hollart* defeated them; and of 6000 Men on board that Fleet, only 11 eſcaped, beſides the Governor of *Breda*, and one Captain.

In 1632, the Prince took *Venlo*, *Ruremond*, and *Maeſtricht*. The Imperial General *Papenheim* came with a great Army to relieve the latter; but the Prince intrench'd himſelf, ſo as to repulſe him in ſeveral Attacks, which obliged the Town to ſurrender.

In 1633, the *Spaniards* deſpairing to reduce the United Provinces, made new Propoſals of Peace, but in vain; and the Prince took *Rheinberg*, and all the Towns which the *Spaniards* had in *Guelderland*. This Year the Archdutcheſs *Iſabel* died at *Bruſſels*, in the 67th Year of her Age, much lamented by her Subjects, becauſe of her Juſtice, Wiſdom, and Exemplary Piety in her Religion.

In 1634, the Cardinal Infant, Brother to *Philip* III. of *Spain*, ſucceeded her as Governor of the *Spaniſh Netherlands*. The Count of *Naſſau* defeated the *Portugueze* in *Brazile*, and the *Dutch* made a conſiderable Progreſs in the *Indies*.

In 1635, *France* declar'd War againſt *Spain*, and join'd their Troops with the *Dutch*; ſo that the *Spaniſh Netherlands* ſuffer'd much on both Sides. The Confederates took *Tillemont*, and beſieg'd *Louvain*; but their Progreſs was hinder'd by Jealouſies betwixt the *French* General and the Prince of *Orange*; and the *Spaniards* ſurpris'd the important Fort of *Schenk*.

In 1636, the Prince retook it by a vigorous Siege; and the *Dutch* Fleet defeated the *Dunkirkers* near *Diep*.

In 1637, the *Dutch* were ſucceſsful in the *Weſt-Indies*, took two or three Places, and gain'd a Battle. That ſame Year the Prince recover'd *Breda*.

In 1638, the Count *de Naſſau* was oblig'd to raiſe the Siege of *Calo*, attack'd by the *Spaniards* with a ſuperior Force, obliged to retire, and loſt his Son in the Action.

In 1639, *Van Trump* defeated the *Spaniſh* Fleet on the Coaſt of *Flanders*, made their Admiral run aſhore, burnt their Vice-Admiral, took two of their Ships, and forc'd the reſt aſhore. The *Spaniards* in Revenge ſent out a greater Fleet to attack *Van Trump*. The Battle continued two Days; but the *Spaniards* were defeated, and few of 'em eſcap'd to *Dunkirk*. The *Spaniſh* Power being broke at Sea, the Prince enter'd *Flanders* next Year, but without any great Succeſs. The States poſſeſſed themſelves of the Streights of *Malaca*, which was a great Advantage to their *Eaſt-India* Company.

In

Digitized by Google

In 1641, the Prince's Son *William* married K. *Charles* I. of *Great Britain*'s eldeſt Daughter *Mary*, and the Prince took *Gennep*. The Cardinal Infant died, and was ſucceeded by *Caſtel Rodrigo* as Governor of the *Spaniſh Netherlands*.

In 1642, there was no great Matter done on either Side.

In 1643, the *Portugueze* ſhook off the *Spaniſh* Yoke, and choſe the Duke of *Braganza*, a Prince of their own Blood Royal, for King, with whom the *Dutch* made an Alliance. Count *Maurice* of *Naſſau*, who commanded in *Brazile*, ſent ſome of his Men to *Chili*: They diſcover'd that call'd *Brewer's Streights*, from the Name of their Commander, and took ſeveral Forts; but his Death ſtop'd their Progreſs. He was ſucceeded by *Herkman*, with whom the Natives were ſo well pleas'd, that they revolted from under the *Spaniards*; but he was obliged to retire for want of a ſufficient Number of Troops. The *Dutch Eaſt-India* Company made themſelves Maſters of the Streights which forms the *Peninſula* of the *Eaſt-Indies*, from Cape *Comorin* as far as the Coaſts of *Coromandel*.

In 1644, Negociations of Peace were ſet on foot betwixt the *Dutch* and *Spain*, but without Effect. The States renewed their Alliance with *France*, and engaged themſelves to make no Peace without them. The *French* beſieg'd *Gravelin* by Land, and *Van Trump* ſo block'd it up by Sea, that the *Spaniards* loſt it. In the mean time the Prince took *Hulſt* and *Sas van Ghent*.

In 1645, while the Preliminaries of Peace were treating at *Munſter*, the Prince attempted to take *Antwerp*, but miſcarried, becauſe the *French* General refus'd to let him have 3000 Horſe. This Year the *Portugueze*, during a Truce, and contrary to the publick Faith, ſays the *Atlas Hiſtorique*, poſſeſs'd themſelves again of *Brazile*, which was a great Prejudice to the *Dutch Weſt-India* Company.

In 1646, Cardinal *Mazarine* propoſed the Siege of *Ghent*, in order afterwards to form that of *Antwerp*. The *Spaniards* being inform'd of this, ſent to propoſe a Truce at the *Hague*; and the States of *Zealand*, with the City of *Amſterdam*, oppos'd the Deſign againſt *Antwerp*, becauſe they thought the taking of that Town would damage their own Commerce.

In *March* 1647, the Prince of *Orange* died of a Dropſy, having been, ſays the *Atlas Hiſtorique*, the Ornament of his Country, the Support of the Republick, and the Inſtrument of its Liberty and Power.

He was ſucceeded by his Son *William* II. with general Applauſe. Some were for impoſing hard Conditions upon him; but the more moderate Party carried it.

In 1648, the Peace was concluded betwixt *Spain* and the *Dutch* at *Munſter*, wherein the King of *Spain* own'd them to be a Free and Sovereign People, and renounc'd for himſelf and his Succeſſors all Pretences to Dominion over them. But as this Peace was an Authentick Acknowledgment of the Liberty of the Provinces, the Prince's Faction reckon'd it a Check to his Power. New Treaties were afterwards made with *Spain*, to clear ſome Things relating to Commerce: And Admiral *Boucher* did in Part retrieve the Affairs of the *Dutch* in *Brazile*; but was obliged to return to *Europe* for want of Soldiers and Ammunition, which prov'd a great Loſs to their *Weſt-India* Company; but that of the *Eaſt-Indies* gain'd by it: For this having occaſioned a War with *Portugal*, which laſted till 1661, the *Dutch* took from the *Portugueze* almoſt all the Places they were poſſeſs'd of in the *Eaſt-Indies*.

In 1650, a General Aſſembly of the States met, to conſider of Methods for diſcharging the publick Debts, and eaſing the People of the Taxes they had been obliged to pay during the War. Some of the States, and particularly thoſe of *Holland*, as *Puffendorf* and the *Atlas* inform us, were for caſhiering a great Part of their Troops. The Prince took it ill that they ſhould talk of diſbanding ſuch a great Part of the Army, that had ſo faithfully ſerv'd their Country. He repreſented how dangerous this might be to the States during the War betwixt *France* and *Spain*, and that in *England* betwixt the King and the Parliament. The States being divided about this Matter, 'twas agreed upon by the Majority of the States General who were Friends to the Prince, that he ſhould viſit the Cities in Perſon, and endeavour to convince them; but this was petition'd againſt by ſome of the Cities in *Holland*, and particularly by *Amſterdam*, alledging, that if he ſhould come thither in Perſon, he might, by changing their Ma-

Digitized by Google

giſtrates, and other Alterations, invade their Liberty. The Prince, diſſatisfied with thoſe Proceedings, alledg'd they did it to affront him and his Officers. He went to *Dort*, *Haerlem*, and *Amſterdam*, to prevent their disbanding the Troops; and deſir'd the Magiſtrates of the latter might be aſſembled, which being deny'd, provok'd him to the higheſt Degree. He demanded Reparation; but the Cities continued in their Reſolution, alledging that it was according to their Privileges. Upon this the Prince took into Cuſtody 6 of the States, whom he thought to be moſt oppoſite to his Deſigns, and among them *De Wit*, the Burgomaſter of *Dort*, whom he ſent Priſoners to the Caſtle of *Louveſtein*. He likewiſe form'd a Deſign to ſurpriſe *Amſterdam* by his Army, but miſcarried, ſome of the Troops having miſtaken their Way in the Night, and their March being diſcover'd by the *Hamburgh* Poſt, who rode through them without being diſcern'd. Upon this the *Amſterdammers* aſſembled their Senate, and ſent Deputies to acquaint the Prince, That if he had put himſelf at the Head of ſo great an Army to execute any Deſign for the publick Good, they had 60000 Men ready to follow his Banner. He anſwer'd, That he had no other Deſign but the publick Service, and to reduce thoſe to Reaſon, who, out of a ſeditious Principle, endeavour'd to break the Fundamental Union of the Provinces, of whom their Burgomaſter *Bicker* being one of the chief, he was come at the Head of 30000 Men to puniſh him, according to the Laws of their Country; and bid the Deputies tell thoſe of *Amſterdam*, That his Army being the ſame which had ſo frequently made *Spain* to tremble, and ſecur'd the Liberty of the Provinces, their 60000 Burgers would find it a hard Task to oppoſe them. The City being ſtartled at this reſolute Anſwer, put themſelves in the beſt Poſture of Defence they could, open'd their Sluces, and threaten'd to pierce their Dykes, in order to hinder his nearer Approach; but at the ſame time enter'd upon a Treaty with him. In order to give him ſome Satisfaction, they turn'd out Burgomaſter *Bicker*, on Condition that he ſhould releaſe the 6 Gentlemen whom he had impriſon'd. Thus the Affair was compromiſ'd; but the Prince was ſo much vex'd at the miſcarrying of his Deſign, and the diſbanding of his Army, which made him uncapable of doing any thing to relieve his Father-in-Law King *Charles* I. againſt the Deſigns which *Oliver* had then form'd upon his Life, that he was oppreſs'd with a heavy Melancholy; and going to compoſe ſome Differences betwixt the Nobles and Cities of *Guelderland*, he was taken ill, and returning to the *Hague*, his Phyſicians let him Blood; ſoon after which the Small-Pox appear'd, and he died the 6th of *November* following, when his Phyſicians thought him to be paſt all Danger, which gave occaſion to a Diſcourſe, that he had been poiſon'd. He was a Prince of excellent Qualities, of a ſtrong Conſtitution, and a Majeſtick Countenance, which commanded Reſpect from all that beheld him. He was popular, valiant, able in Counſel, and indefatigable, well vers'd in Languages, Hiſtory, and Mathematicks; and had he liv'd, was like to have equall'd, if not exceeded, any of his great Anceſtors. Seven Days after his Death, the Princeſs was brought to Bed of a Son, *William* III. who was afterwards Stadtholder, and King of *Great Britain*; of whom in his Place.

In 1651, the Republick being without a General and Stadtholder, it occaſioned a ſolemn Meeting of the States, to whom the Princeſs of *Orange* wrote, and recommended the Intereſt of the young Prince her Son: But the Remembrance of his Father's Attempt upon *Amſterdam*, and the Sollicitations of *Cromwel*, who had then uſurp'd the Government of *Great Britain*, occaſion'd them to ſuppreſs the Office of Stadtholder; and they renew'd the Union of *Utrecht*. *Cromwel*, ſays the *Atlas*, having attain'd his ambitious Ends, he made uſe of ſeveral Pretexts to declare War againſt the *Dutch*, and one of them was, That the States had not done *England* Juſtice for the Murther of Dr. *Doriſlaus*, who was ſent from the Parliament as a Publick Miniſter to the *Hague*; but having been one of K. *Charles* I.'s Judges, was aſſaſſinated there by ſome *Scots* and others that belong'd to King *Charles* II. before he had his publick Audience of the States. To prevent a Rupture, the *Dutch* ſent Ambaſſadors to *England*, who could effect nothing, ſays the Author of *The Life of Van Trump*. In the mean time the *Engliſh*, according

cording to that Author, had taken near 200 Merchant Ships, by which the *Dutch* suffered some Millions of Loss. The *English* likewise pretended to the Dominion of the Narrow Seas, and would allow no Flag to appear there but their own.

In 1652, the *English* declar'd War against the *Dutch*, and Admiral *Trump* put to Sea to convoy home some Merchant Ships; but had Orders to avoid engaging with the *English* if possible, and to pay the usual Respect to their Flag, if he chanc'd to meet them in the Narrow Seas. *Trump* was forc'd by a Tempest on the *English* Coast, but quitted it again as soon as possible, and made towards *Calais*: But being inform'd that the *English* were pursuing some Merchant Ships, he advanc'd to their Relief, and met *Blake* with the *English* Fleet, who, the *Atlas* says, had Orders to attack the *Dutch*. *Trump* prepared to give the usual Honours to the *English* Flag, and order'd one of his Captains to go on board with a Compliment to the *English* Admiral; but *Blake* having no Regard to these Marks of Submission, fir'd twice at *Trump*'s Ship, who made no Return till he receiv'd a third Shot, and then the Fight began, which lasted till Night parted them; and both Admirals sent an Account of the Action to their Principals. *Trump*'s Letter to the States was sign'd by all his Officers, to prove that he was not the Aggressor; and by *Blake*'s Letter to the Parliament, after he retir'd to the *Downes*, 'twould seem to be true. The States sent *Trump*'s Letter to their Ambassadors, to lay it before the Parliament; but the *Dutch* Ambassadors being at *Chelsey*, the Letter was kept up, and the Mob went to *Chelsea* to attack them, which obliged the Parliament to give them Guards; and *Cromwel* march'd with some Forces to the Coast to appease the People, and secure them against their Apprehensions of being ravag'd by the *Dutch*. The Curious may see more of this in *The Life of Van Trump*, with what *Blake* and his Officers said in their own Defence, alledging, that *Trump* when he came to an Anchor before *Dover* Castle, refus'd to strike his Flag, tho the Garrison fir'd three times to give him Notice of his Duty: And they pretended likewise, that *Trump* came up to the *English* Fleet on purpose to brave them; and to justify their Charge, produc'd a Copy of the Commission which *Trump* had given to his Captains. Yet by that Commission it does not appear there was any sufficient Ground for the Accusation; but it serv'd *Oliver* for a Pretext to cover his ambitious Designs. In the mean time the *Dutch* Ambassadors obtain'd Audience of the Parliament, to whom they made a Speech, and did what they could to renew a good Understanding betwixt *England* and *Holland*, but in vain. They sent another Ambassador, who made Application to the Parliament and Council of State, but without Success; so that the *Dutch* Ambassadors return'd home, and an Engagement happen'd betwixt *De Ruyter*, and the *English* Admiral *Ashew*, who had the worst. The *English* had also the Disadvantage in an Engagbment near *Leghorn*, betwixt Commadore *Bodley* and the *Dutch* Commander *De Galen*; but the *Dutch* were worsted in the Fight betwixt *Cola* and *Dover* under *De Ruyter* and *De Wit*, the *English* Fleet under *Blake* being much superior in Force. Another Engagement happen'd betwixt *Trump* and *Blake*, wherein the *English* were obliged to retire into the *Thames*: But afterwards in another Engagement betwixt *Trump* and *Blake*, which lasted three Days, the *Dutch* were worsted. *De Galen* obtain'd another Advantage over the *English* in the *Streights*, but lost his Life in the Action. The *English* after this, in 1653, inclin'd to a Peace; but were prevented by *Cromwel*, who dissolv'd the Parliamnt. That Year a cruel Battle happen'd betwixt *Van Trump* and the *English* Admirals *Dean* and *Monk*, wherein the *Dutch* were worsted, which occasioned Tumults in *Holland*: And in *August* that Year, there happen'd another terrible Battle, wherein the *Dutch* were defeated, and *Trump* killed. He was buried with great State in *Holland*, and had a sumptuous Monument erected for him by the States.

In 1654, the *Dutch* made a dishonourable Peace with the *English*, in which there was an Article excluding the young Prince of *Orange* from all publick Offices in the Commonwealth, which occasioned some Mutinies in *Holland*, the People having a great Love for him, because of the glorious Actions perform'd by his Ancestors in the Defence of their Liberty; but the prevailing Faction abolish'd the Office of Stadtholder and Cap-

Digitized by Google

tain-General, except in the Province of *Frieſland*, where the People continued that Dignity in the other Branch of the Family of *Naſſau*.

In 1655, Differences happen'd in *Overiſſel*, where ſeveral of the Nobility choſe the Prince of *Orange* for their Stadtholder, and nam'd Count *William* of *Naſſau* for his Lieutenant, whence Quarrels enſu'd; but the Matter was accommodated by the Mediation of the States General.

In 1656, the States, on Account of their Trade, concern'd themſelves in the Quarrels betwixt *Charles Guſtavus* King of *Sweden*, and *John Caſimir* King of *Poland*, whom they brought to a Peace by the Treaty of *Elbing*, their Admiral *Obdam* having over-aw'd both of them with his Fleet. This Year, the ſumptuous Stadthouſe at *Amſterdam*, which they began in 1654, was almoſt finiſh'd. The Plague cut off many People in the Provinces of *Holland* and *Utrecht*, and 13000 died at *Leiden* in a ſmall Time.

In 1657, Differences happen'd betwixt the *French* and the *Dutch*, becauſe of ſome *French* Privateers, which took their Ships, and diſturb'd their Commerce. The *Dutch* complain'd of it in vain, and took the Privateers, for which their Ships were ſeiz'd in *France*, and the *Dutch* made Reprifals; but M. *de Thou* being ſent into *Holland* by the Court of *France*, made up the Difference, and the Ships were releaſed on both Sides.

In 1657, the *Weſt-India* Company diſcover'd the *New Netherlands*, built *New Amſterdam*, and made War on the *Portugueze* to recover *Braxile*.

In 1658, they ſent a famous Embaſſy to *China*; but the Jeſuits hinder'd the Succeſs of it. Their Embaſſy in *Japan* had a better Effect. The States concern'd themſelves in the War betwixt the *Danes* and *Swedes*, and deliver'd the King of *Denmark*, who was much ſtreighten'd in his Capital. The *Dutch* Admiral *Obdam* defeated the *Swediſh* Fleet, reliev'd *Copenhagen*, and enter'd it in a triumphant Manner.

In 1659, *De Ruyter* ſail'd to the North, and joining his Troops with thoſe of *Denmark*, defeated the *Swedes* at the Battle of *Nitung*; for Grief of which, the King of *Sweden* died.

In 1660, a Peace was concluded in the North by the Mediation of *England* and *France*. The States were ſucceſsful in the *Eaſt-Indies* againſt the *Portugueze*.

In 1661, the *Dutch*, by their Negligence, gave the *Chineſe* an Opportunity to ſeize the Iſle of *Formoſa*, which was a great Prejudice to their *Eaſt-India* Company.

In 1662, an Alliance of 25 Years was renewed betwixt *England*, *France*, and *Holland*; and *John de Wit*, the Penſionary of *Holland*, got the Right of *Aubaine* taken off the *Dutch* Subjects in *France*, by which the *French* King was before intitled to the Eſtates of all Strangers that died in his Dominions.

In 1663, the *Dutch* had ſome Difference with the Biſhop of *Munſter*, but obliged him to keep the Peace, and were ſucceſsful againſt the *Portugueze* in the *Indies*.

In 1664, an *Engliſh* Squadron under Commadore *Holmes* unexpectedly ſurpris'd and took ſeveral Forts from the *Dutch* on the Coaſt of *Guinea*; but *De Ruyter* quickly retook them. The *Dutch* did all they could to avoid a War with *England*, but in vain; ſo that they came to an open Rupture in 1665; the Duke of *York* and his prevailing Faction at Court refuſing all the advantagious Propoſals made by the *Dutch*, who put a Fleet to Sea under Admiral *Obdam*, to whom they gave poſitive, but imprudent, Orders to fight the *Engliſh*, let the Wind behow it would; which being forced to obey, contrary to the Opinion of his Officers, it had a fatal Effect to the *Dutch*; for the *Engliſh* Fleet, commanded by the Duke of *York*, Prince *Robert*, and the Earl of *Sandwich*, defeated the *Dutch*, burnt and ſunk 19 of their Men of War, kill'd about 6000 of their Men, with the Loſs only of 4 Men of War, and 1500 Men, on our Side, among whom were Rear-Admiral *Samſon*, the Earls of *Marlborough* and *Falmouth*, the Lords *Portland* and *Fitzharding*, with 14 other Perſons of Note. The Lord *Obdam*, in the beginning of the Action, attack'd the Duke of *York*, ſunk the 3 Yachts that attended him, and had almoſt diſabled him; but he was ſeaſonably reſcued by Vice-Admiral *Lawſon* and Captain *Smith*; and *Obdam* being engaged with ſeveral other *Engliſh* Ships who had the Wind of him, he was blown up, either by an accidental Shot that enter'd his Powder-Room, or, as the *Dutch* ſay, by the Treachery of an *Engliſh* Gunner that ſerv'd on board him. *Obdam* wa

Digitized by Google

was interr'd with great State in *Holland*, and had a noble Monument erected for him, being one of their ancient Nobility.

In 1666, *De Ruyter* succeeding *Obdam* as Admiral, he fought the *English* Fleet under General *Monk* for 4 Days; and thô the *English* behav'd themſelves with their uſual Gallantry, they loſt, ſays the Author of *The Hiſtory of the United Provinces*, 23 large Men of War, beſides many others, and had 6000 Men killed, beſides 2600 taken; the *Dutch* having loſt about 6 Capital Ships, and 2300 Men. Notwithſtanding which, our Court made publick Rejoycings at *London*, as if they had obtain'd the Victory. In *Auguſt* that ſame Year, another Engagement happen'd, wherein the *Engliſh* had the Advantage, for which *De Ruyter* blam'd the Conduct of *Van Trump*, who was thereupon diſcharged from his Employment, while *De Ruyter* himſelf acquir'd as much Glory by his Gallantry in the Fight, and brave Retreat, as if he had obtain'd the Victory: And beſides the Honours he receiv'd from the States, the *French* King, who was then their Ally, ſent him the Collar of the Order of St. *Michael*, with a Gold Chain, and his own Picture richly ſet with Diamonds. Soon after this Engagement, the States ſent a Squadron to join 36 *French* in the *Mediterranean*, in order to deſtroy our Commerce there; a Treaty was ſet on foot by the Mediation of the Queen Mother of *England*, which had no Effect. And the *French* and *Dutch* having join'd their Fleet near *Dunkirk*, ours retir'd before 'em, after having loſt one Ship of 50 Guns. Not long after this, 20 Men of War, under Commadore *Holmes*, made a Deſcent on the *Dutch* Coaſt near the *Vlie* and the *Texel*, where they burnt two Frigats, miſs'd narrowly of deſtroying their *Ruſſia* Fleet, and committed ſome other Hoſtilities, to countenance a Rebellion againſt the States, rais'd by one *Heemskirk*, who revolted with ſome of their Ships under his Command, burnt about 100 of their Merchant-men, and ſome Men of War on the Stocks; but being purſued by a *Dutch* Squadron, he was killed in the Engagement, ſeveral of his Ships taken, and the Men on board them executed in *Holland*, while the reſt made their Eſcape to *England*.

In 1667, the *Dutch* made Propoſals of Peace, which were treated of at *Breda*: But while the *Engliſh* protracted the Negociation, *De Ruyter* put to Sea, and anchoring at the Mouth of the *Thames*, ſent 17 of his lighteſt Ships, with 4 Barks and 4 Fireſhips, into the River, where they took *Sheerneſs* Fort, demoliſhed the Fortifications, and burnt or carried off the Naval Stores laid up there. After this, *De Ruyter* advanc'd as far as *Chatham*, where he met with little Reſiſtance, except from a few *Scots* under the Command of Captain *Douglas*, who was burnt on board one of our Men of War as he bravely defended her. The *Dutch* came from thence to *Graveſend*, where they burnt 6 of our largeſt Ships, among whom were the Admiral and Vice-Admiral of the White, took the *Royal Charles*, and a Frigat of 44 Guns, which haſten'd the Concluſion of the Peace to the Advantage of the *Dutch*, who preſented their Commanders *Ruyter*, *De Wit*, and *Ghent*, with a Gold Cup each, on which was engraven the Action of *Chatham*, to perpetuate in their Families the Memory of this great Enterprize. This Diſgrace to *England* was chiefly aſcrib'd to the Treachery of the *French*, who puſh'd the *Dutch* on to it during the Treaty, it being their Intereſt to foment a Diviſion betwixt thoſe Proteſtant Maritime Powers, in order to deſtroy both. That ſame Year, the *Dutch Eaſt-India* Company brought the King of *Madageſcar*, and ſome other neighbouring Princes, to a Submiſſion.

In 1668, the *French* King having treacherouſly declar'd War againſt *Spain* the Year before, on Pretence of the Rights of his Queen, which he had ſolemnly renounc'd at his Treaty of Marriage; the *Dutch* being alarm'd at his Progreſs, rais'd 25000 Men, and ſollicited *England* to enter into an Alliance with them, which brought on the Peace of *Aix la Chapelle*.

In 1669, they ſollicited the Triple Alliance betwixt *England*, *Sweden* and themſelves, which broke the *French* King's Meaſures, and provok'd him ſo much, that he found Means to break the ſaid Triple Alliance, and engage *England* with him in a War againſt *Holland*, as we ſhall hear anon.

In 1671, the *Dutch* did all they could to prevent a Rupture with *England* and *France*, but in vain; for the *French* King, by the Interview betwixt King *Charles* II. and his Siſter the Dutcheſs of *Orleans*, at *Dover*, had

Digitized by Google

had riveted that Prince in his Intereſt. The *Dutch* upon this prepar'd for War; but their Force was very unequal to that of their Enemies. Beſides, they were divided into three Factions at home. The firſt was for continuing the Excluſion of the Prince of *Orange* from all the Dignities and Offices enjoyed by his glorious Anceſtors; the 2d was for reſtoring him; and the 3d was Neuter, but at laſt join'd with the 2d, and carried it for the Prince; who in 1672, tho' very young, put himſelf at the Head of their Forces, which were then but inconſiderable. Tho' King *Charles* II. of *Great-Britain* endeavour'd to perſwade them by his Ambaſſador Sir *George Downing*, that he would faithfully adhere to the Triple Alliance, he at the ſame time prepared his Fleet to attack the *Dutch* by Sea, and ſent Forces into *France*, under the Conduct of his natural Son the late Duke of *Monmouth*; and ſoon after, without any Declaration of War, order'd Commadore *Holmes* to attack their *Smirna* Fleet in their Return home off of the Iſle of *Wight*; which he did, and took ſome of 'em, after two Days Fight, wherein the *Dutch* made a brave Defence, and got home with moſt of their Fleet, having only loſt one of their Convoys, and three Ships. This Conduct of King *Charles* was diſpleaſing to the People, and the Houſe of Commons, becauſe it was contrary to the late Treaty of *Breda*, and done without any Declaration of War. But the King notwithſtanding order'd 4 of their *Eaſt-India* Ships to be taken in their Return from *Batavia*, and all their other Veſſels to be ſeiz'd in his Harbours. In *April* following, he publiſh'd his Declaration of War, alledging they had broke the Treaty of *Breda*, diſturb'd our Commerce in the *Indies*, injur'd the *Engliſh* at *Surinam*, and affronted his Perſon by inſolent Medals and Pictures, and burnt his Effigies in *Perſia*. The *French* King and the Biſhop of *Munſter*, with the Archbiſhop of *Cologne*, declar'd War againſt the *Dutch* at the ſame time; for which the *French* King alledged no other Reaſon, but that he was diſſatisfied with their Conduct; and that he could no longer diſſemble his Indignation, without a Diminution of his Glory. The Declarations of the two Biſhops were every whit as frivolous: But we refer the Curious for the Motives of this War to the Hiſtory of it, publiſh'd in the Firſt Volume of *State Tracts*, collected ſince the Revolution, tranſlated from the *French* Copy printed at *Paris* in 1682; but ſuppreſſed at the Inſtance of the *Engliſh* Ambaſſador, becauſe of the Diſcoveries it made of the League betwixt the Kings of *France* and *England* for enſlaving *Europe*, and introducing Popery into *England* and *Holland*.

In the mean time the Prince of *Orange* did all that he could for the Defence of his Country, and *De Ruyter* put to Sea with a Fleet. The *French* King at the ſame time invaded the *Netherlands* with 100000 Men in 4 Bodies, and took 6 of their Frontier Garriſons in the Dutchy of *Cleve*, in ſo little a Time, as ſtruck an univerſal Terror into the *Dutch*, which was very much heighten'd by his paſſing the *Rhine*, while the Prince of *Orange*, who was encamp'd on the *Iſſel* with about 13000 Men, marched to cover the Country, and ſuch Towns as were moſt expoſed. At the ſame time *De Ruyter* attack'd the *Engliſh* and *French* Fleets in *Solbay*, commanded by the Duke of *York*. The Battle was fierce, and maintain'd with great Bravery on both Sides, and almoſt with equal Advantage; tho each aſcribed the Victory to themſelves, and made publick Rejoycings accordingly. The Loſs of Men was computed to be near the ſame; but the *Engliſh* loſt four Ships, and the *French* one; whereas the *Dutch* loſt but three. In this Engagement, we loſt the brave Earl of *Sandwich*, who commanded the Blue Squadron, himſelf, with his Son, and 850 Men, being blown up, with his Ship of 102 Guns: But had it not been for the Advantage of the Wind, the *Dutch*, being much ſuperior in Number, might probably have done us more Miſchief. The Account of this Naval Engagement, in which the *Dutch* pretended to have the Victory, did ſerve to keep up the Spirits of their People; but the *French* Army having paſſed the *Rhine*, not without a Mixture of Treachery and Cowardice in ſome, that the Prince of *Orange* ſent to oppoſe their Paſſage. They took ſeveral important Places, with the ſtrong Forts of *Schenk* and *Knodſenburg*, while the Biſhop of *Munſter* took *Deventer*; and the *French* being Maſters of the *Betaw*, the Prince was obliged to retire towards *Utrecht* where.

where being refuſed Admittance by the mutinous Faction, he was obliged to decamp, and to divide his ſmall Army into 4 Bodies, to cover the Country as well as he could; and the *French* took ſo many Towns, and made ſuch a Progreſs, that the Penſionary *De Wit* adviſ'd the *Dutch* to ſue for a Peace on the beſt Terms they could. Accordingly they ſent Deputies to the *French* King, who inſiſted on ſuch hard Conditions, that they reſolv'd to abide the laſt Extremity rather than agree to them. The People in the mean time were ſo enraged at the Management of the two *De Wits*, whom they charged with all their Misfortunes, that ſome of them attempted to aſſaſſinate them both, for which one of the Aſſaſſins was executed. During theſe Diſorders, *Zutphen* and *Utrecht* ſurrender'd to the *French*; and the Approach of their Army to *Naarden* occaſioned an univerſal Confuſion in the Cities of *Holland*, where the People beſieged their Magiſtrates in their Houſes, and threaten'd to kill 'em, except they would declare the Prince of *Orange* their Stadtholder, being of Opinion, that none but the Family that founded the Republick, were able to reſtore it. The City of *Amſterdam* was under ſuch a Conſternation, that the greateſt Part of the People were for ſurrendring betimes, to ſave their Riches; but were diſſwaded by their Magiſtrates, who prepar'd for a vigorous Defence, and laid the neighbouring Country under Water to hinder the Approach of the Enemy. Their Example being followed by other Towns, did, with the Conduct of the Prince, ſave their Republick, when it was brought to the Brink of Ruin. The Calamity of the Country, and the Inclinations of the People, being improv'd againſt the *De Wits* and their Party by the Princeſs Dowager, Grandmother to the Prince, and others of his Friends, ſupported by the Elector of *Brandenburg* who was his Uncle, the People threaten'd to aboliſh the perpetual Edict themſelves, which excluded the Prince from the Dignities of his Anceſtors, if the States would not do it. The Peaſants of *Weſt-Frieſland*, who make the beſt Soldiers in the *Dutch* Dominions, refuſed to take Arms till they were admitted to ſwear to be true to the Republick, and to obey the States, and his Highneſs the Prince of *Orange*. Upon which he was unanimouſly choſen General by the States, and enter'd upon his Office after taking the Oaths. Then he went to the Army intrench'd at *Newrop*, and kept his Poſt with ſo much Courage and Conduct againſt *Lewis* XIV. who commanded his Army in Perſon, that he forc'd him to retire with Loſs, and to abandon his Works, when he thought to have beat the Prince out of his Trenches. But in the mean time the *Dutch* Frontier Towns and Garriſons fell ſo faſt into the Hands of the *French*, that the People ſuſpecting Treachery, would not be ſatisfied till the Prince was created Stadtholder, and poſſeſſed of all the Poſts enjoyed by his Anceſtors. The Inhabitants of *Dort* were the firſt that took Arms on that Account, and forc'd their Burgomaſter old *De Wit*, Father to *Cornelius* and *John*, to draw up an Act, to abſolve themſelves and the Prince from the Oath they had taken to obſerve the perpetual Edict, which excluded him from the Stadtholderſhip, and ſent for the Prince to accept it. He modeſtly repreſented the Danger that might accrue to them by his leaving the Army; but they would not be deny'd. He came to the City, where he was received with great Solemnity; but refuſed to be Stadtholder, till he was abſolved from his Oath by Conſent of the States General. They ſent Miniſters to confer with the Prince, and convince him that he might lawfully do it; and accordingly an Act was drawn in the Name of the Magiſtrates, by which they renounc'd the Perpetual Edict, and made the Prince their Stadtholder; which *Cornelius de Wit* refus'd to ſign, till he was prevail'd on by the Tears of his Wife and Children. The Example of *Dort* being followed by the other Cities, and confirmed by the States General, who abſolved the Prince and the People from their Oath to obſerve the Perpetual Edict, he was by general Conſent created Stadtholder, and reſtored to all thoſe Dignities which his Anceſtors had purchas'd with their Blood. The People inſiſted likewiſe, that thoſe whom they charged as the Occaſion of their Calamities ſhould be turned out of their Poſts in the Government, and deſir'd their new Stadtholder to interpoſe his Authority for that End; but he wiſely aſcrib'd

Digitized by Google

another Part, conſidering the Danger of the Juncture, and writ Circular Letters to the Cities, declaring it to be his Opinion, that the Deputies of the States, and the Magiſtrates of their Cities, had perform'd their Duties; and that ſuch diſorderly Practices deſerv'd to be reſtrain'd by Corporal Puniſhments. From this Time the *Dutch* were inſpir'd with new Courage. The ſmall Town of *Arſemburgh* repulſed 5000 *French* that attack'd them, and killed a great many of their Officers and Perſons of Quality. Thoſe of *Groningen* oblig'd the Biſhop of *Munſter* to raiſe their Siege, with the Loſs of 10000 Men, after a prodigious Expence he had been at in the Undertaking. A Stop being thus put to the Courſe of the *French* King's Victories, the *Dutch* ſent Deputies to *England* to ſollicite a Peace with King *Charles* II. They were very grateful to the People, but coldly receiv'd at Court; yet the King gave them Audience, and having heard their Propoſals, ſent the Duke of *Buckingham*, the Marquis of *Halifax*, and Mr. *Silvius*, to the *French* Court then at *Utrecht*. My Lord *Hallifax* and Mr. *Silvius* went directly thither; but the others going to the *Hague*, they had a Conference with the States, and another with the Prince of *Orange* at his Camp; and declar'd to them both, that the King had not enter'd into the Alliance with *France* to reduce them under the *French* Yoke, but only to humble them; and that *England* being alarm'd at the Progreſs of the *French*, was much enclin'd to the Intereſt of *Holland*: But notwithſtanding this, ſays the Author of *The Hiſtory of the United Provinces*, when they came to *Utrecht*, and knew the Inſtructions given by the King to the Lord *Hollifax* and Mr. *Silvius*, they labour'd all they could to renew the Alliance betwixt the two Crowns, while Preparations were making in *England* for a Deſcent upon *Holland* by our Fleet, which was accordingly attempted, but diſappointed by a violent Tempeſt, which obliged our Fleet to return, without being able to put to Sea again that Year. In the mean time the Towns of *Grave* and *Nimeguen* were ſurrender'd to the *French*. The King of *France* having made the Duke of *Luxemburg* Governor of *Utrecht*, return'd to *France*, and in his Way was met by the *Engliſh* Ambaſſadors, who renewed a Treaty with him for three Years; by which the two Crowns were to communicate to one another whatever Propoſals of Peace were made: After which, their Demands were deliver'd to the *Dutch* Deputies that were ſent to attend the *French* King and our Ambaſſadors.

The Demands of the *French* were, 1. That all Placaets againſt *French* Wine and Manufactures ſhould be recalled. 2. That the Papiſts ſhould have Freedom of Worſhip, with publick Churches and Maintenance for their Prieſts through all the Dominions of the States. 3. That his Majeſty ſhould leave the Provinces in their preſent State, and reſtore ſuch as he had conquer'd, except as follows. 4. The States ſhould yield to the *French* King all the Countries, Towns and Places, they poſſeſs'd in *Flanders* and *Brabant*, that were yielded him by the King of *Spain*, except the Town of *Sluys* and the Iſland of *Cadſant*. 5. That they ſhould alſo quit *Nimeguen*, *Knodſenburg*, *Schenckenſchantz*, and that Part of *Gueldерland* on the W. Side of the *Rhine*, together with the Iſland and Town of *Bommel*, the Iſland and Fort of *Voorn*, the Fort of St. *Andrew*, *Louveſtein*, and *Crevecœur*. 6. The City of *Grave*, and the County of *Meurs*, for which the States ſhould make the Prince of *Orange* a Compenſation. 7. That the States ſhould quit all their Pretenſions to ſuch Places as his Majeſty had ſeiz'd in the Empire, together with the County of *Embden*, and the Fort of *Liercort*, to the Count of *Eaſt-Frieſland*. 8. That the *French* Subjects of all the Places to be yielded to the *French* King, ſhould have Liberty to paſs and repaſs through all the Dominions of the States by Sea or by Land, and all Rivers and Canals, without having their Goods, Baggage, Ammunition, or Proviſions, viſited, or paying any Duty. 9. That the States ſhould reſtore all the Commanderies belonging to the Knights of *Malta* in their Dominions. 10. That they ſhould reſtore the Count of *Bentheim*, his Children to be bred Papiſts. 11. That they ſhould pay for the Charge of the War 20 Millions. 12. That in Conſideration of the Peace which his Majeſty was willing to give them, they ſhould Annually, on a certain Day, by an Ambaſſador ſent on purpoſe, preſent him with a Gold Medal weighing a Mark, with this Inſcription, That

they

they owe the Preservation of their Liberty to his Majesty, which he and his Ancestors had in a great measure procur'd to them. 13. That if they did not accept these Proposals in 10 Days, his Majesty would not stand to them; and if they did, they must also give Satisfaction to the King of *Great Britain*, and to the Princes of the Empire, who were the *French* King's Allies. His Majesty likewise further declar'd, That without tying himself to the Terms which he had propos'd to them by way of Alternative, he would content himself with the Conquests he had already made, or should yet make, before they accepted his Proposals; *viz.* the whole Province and Dutchy of *Guelderland* belonging to the said States, the Lordship of *Utrecht*, the County of *Zutphen*, and all the Towns and Forts he had possess'd himself of: And that he might the better secure the Possession of 'em, the States should resign to him the absolute Sovereignty of the Towns of *Maestricht* and *Wyck*, and all that they possess'd on the *Upper Maes*, *Dalen*, *Fauquemont*, the Town and Mayory of *Boistduc*, with its Dependencies, and the Fort of *Crevecœur*. And further, That the States should withdraw all their Garrisons in Towns and Places belonging to the Empire.

The Demands made by the King of *Great Britain* were, 1. That the *Dutch* should give him the Honour of the Flag without any Dispute; and that their whole Fleet should strike their Flags, and lower their Top-Sails, to any one *English* Ship bearing his Majesty's Flag, in any Part of the *English* Sea, as far as the Roads of *Holland*. 2. That the *English* remaining in *Surinam* should be allowed a whole Year to retire whither they pleased with their Effects, according to the Treaty of *Breda*. 3. That all his Majesty's Subjects, who had by him been declared Criminals, should for ever be banish'd their Dominions, and likewise all others whom his Majesty should signify to them had publish'd Seditious Books, or conspir'd against the Peace of his Kingdoms. 4. That towards the Charge of the War, they should pay his Majesty a Million of Pounds Sterling at certain Terms. 5. That they should pay him Annually 10000 *l* Sterling for Liberty to fish for Herring on the *British* and *Irish* Coasts. 6. That the Prince of *Orange* and his Posterity should from henceforward enjoy the Sovereignty of the United Provinces, except such Parts of 'em as were to be yielded to the two Kings and their Allies; or at least, that the Prince and his Heirs should for ever enjoy the Dignities of General, Admiral, and Stadtholder of the said Provinces. 7. That in three Months Time they should make a Treaty of Commerce. 8. That they should yield to his Majesty the Island of *Walcheren*, the Town and Castle of *Sluys*, the Islands of *Cadsant*, *Goree*, and *Voorne*, as Cautionary Places for the Performances of the Conditions. 9. That they should give full Satisfaction to the most Christian King.

These exorbitant Demands, which we have from the Author of *The Lives of the De Wits*, publish'd in *Holland* in 1677, were rejected both by the Prince and the States, who applied themselves to the Princes of *Germany* for Assistance, and sent them Copies of those Demands, which had the desir'd Effect. The Elector of *Brandenburg* arm'd first on their Behalf, and the Prince of *Orange* fortify'd the Places that were most exposed, and changed many of the Magistrates to satisfy the People, who still made Complaints of the *De Wits* and their Faction. They publish'd Libels against the Pensionary, whom they charged with mismanaging the Publick Money, and their Military Forces. Upon which he wrote a Letter to the Prince, desiring him to justify his Conduct in both those Respects. To which, says the Author of *The History of the United Provinces*, and the Author of *The Lives of the De Wits*, the Prince answer'd, That he ought to despise those scurrilous Pamphlets, as he himself had been frequently forc'd to do; and for what related to the Publick Money, he referred it to the Council of State, because he himself knew nothing of the Matter. This Answer, says the Author of *The History of the United Provinces*, confirmed the Suspicion of *John de Wit's* Enemies, tho' he procured a Discharge from the Council of State. His Brother *Cornelius de Wit* had the same Misfortune, tho' he was vindicated by *De Ruyter* as to his Behaviour in the Fleet; and not only they, but their Friends were pursued by the Hatred of the People, particularly *Peter Grotius*, who with much ado escaped their

Digitized by Google

Fury, by retiring out of the Country; but he return'd afterwards, vindicated himſelf, and died of the Gout, or, as ſome ſay, of Poiſon, according to the laſt mention'd Author. The Count *de Mombas*, Brother-in-Law to *Cornelius de Wit*, was likewiſe condemned by a Council of War to loſe all his Employments, and to be impriſon'd for 15 Years; but making his Eſcape, he was condemned to loſe his Head, and executed in Effigie. He was charged among other Things with not having defended the Paſs of the *Rhine* as he ought to have done, when the *French* ſwam that River. While the Faction of the *De Wits* labour'd under theſe Misfortunes, a Barber-Surgeon called *Tichelaer* came to the Prince's Camp, and informed the Lord *Zuylenſtein*, Natural Uncle to the Prince, that *Cornelius de Wit*, the Burgomaſter of *Dort*, and Brother to the Penſionary *John de Wit*, had given him Money, and promis'd him a great Reward, to poiſon or murder the Prince, becauſe, as he ſaid, they could not otherwiſe preſerve their Liberty, the Prince being now made Stadtholder, contrary to the Perpetual Edict, and that they might come to fall under a Foreign Power, by a Match betwixt ſome Foreign Potentate and a Daughter of the Prince, if he ſhould have any. The Surgeon having given in this Information upon Oath, the Prince communicated the ſame to the Court of *Holland*, who thereupon committed *De Wit* to Priſon; and after having examin'd both Parties, confronted them, and enquir'd into the Matter by Torture and otherwiſe, the Author of *The Lives of the De Wits* informs us, That conſidering all Circumſtances, with the ſtedfaſt Adherence of the Surgeon to his Accuſation, and the perplex'd Anſwers of the Defendant, they condemn'd the latter to loſe all his Offices and Employments, baniſh'd him for ever out of *Holland* and *Weſt-Frieſland*, and order'd him to depart as ſoon as poſſible, without ever returning, on Pain of ſeverer Puniſhment, condemn'd him in Coſts of Suit, and ſet his Accuſer at Liberty. *De Wit*'s Wife and Friends preſented ſeveral Petitions and Informations to the Court to vindicate the Defendant; inſiſting upon the well known Services he had done to the State for a great many Years, and that he was but juſt return'd home from on board the Fleet, where his very Enemies would bear Witneſs to his Courage and Conduct. They alledged alſo the whole Tenor of his Converſation as a ſufficient Defence againſt this Calumny, and referred to the Records of ſeveral Courts, where the Surgeon had been condemned for Perjury, and ſcandalizing ſeveral Perſons of Note: That he was under Sentence at the ſame Time for a Rape, for which he was anſwerable to a Court of the Defendant's Juriſdiction, who was thereby entitl'd to his Forfeiture, for which he ow'd the Defendant a Grudge: That the Defendant never ſaw him but once, which was ſoon after his Return from Sea, when the Surgeon, after ſeveral Applications, was admitted to his Bed-Chamber, on Pretence of having ſomething of Importance to diſcover to him, without any body's being by: That Mrs. *De Wit* diſtruſting the Fellow becauſe of his ill Looks, and becauſe of the univerſal Clamour that was rais'd againſt her Husband and his Brother, who had narrowly eſcap'd being murther'd by Aſſaſſins a very little before, ſhe order'd the Chamber-Door to be kept open, and her Son and her Servant to ſtay in the next Room in view of the Bed upon which her Husband then lay, becauſe of his Indiſpoſition: That they heard all that paſſed betwixt her Husband and the Surgeon: That the latter, after ſome Diſcourſe about the Calamities of their Country, and the preſent ill Poſture of Affairs, ſaid, He had ſomething to propoſe to him, if he would keep it ſecret, and give him Aſſiſtance. To which her Husband anſwer'd, That if what he had to propoſe was good, he would do what he deſir'd; but if otherwiſe, he might get him gone. To which the Surgeon reply'd, *Since you will not hear me*, Sir, *I'll be gone*. And ſo bidding him farewel, was let out of the Houſe by her Servant, after he had ſtay'd about a quarter of an Hour. That *De Wit* reflecting upon what had paſſed, ſent for the Town-Clerk, gave him an Account of what the Fellow had ſaid, and deſir'd him, ſince he was not able to go himſelf, that he would go to the preſent Burgomaſter, and get a Warrant to take up and examine the Surgeon. A Warrant was accordingly had; but the Witneſs could not be found till after he had given in his Accu-

Digitized by Google

Accuſation upon Oath, to which he was encourag'd by the Clamours of the People againſt her Husband. All which Mrs. *De Wit* and her Friends offer'd to prove, as may be ſeen at large in *The Lives of the De Wits* above-mention'd, together with the Surgeon's Defences. The Subſtance of which was, That the Courts, who had condemn'd him for the Crimes above-mentioned, had proceeded unjuſtly againſt him: That he came to *De Wit* in order to repreſent his Caſe to him, and to deſire a Redreſs, which *De Wit* promis'd him, if he would do ſomething he had to propoſe to him; and that he readily undertook it, provided it were in his Power. Upon this, *De Wit* having taken his Oath to keep the Propoſal ſecret, perſwaded him to poiſon or kill the Prince, for which he laid down ſeveral Schemes, promis'd to give him Money, and a conſiderable Poſt; and if he loſt his Life in the Attempt, to reward his Friends. The Surgeon deſir'd a Security under *De Wit*'s Hand, which he refuſed; but told him, there were 30 more Perſons of Note engaged in the Deſign againſt the Prince, that would ſee to the Performance of what he had promis'd him. Upon this, the Surgeon, not daring to refuſe for fear of his Life, conſented to it, and *De Wit* gave him 6 Ducatoons in Hand, telling him, 'twas all the Money he had about him; and that he would not call for more, for fear of giving Cauſe of Suſpicion. The Surgeon going home, was uneaſy in his Mind until he had reveal'd it, as above; and that *De Wit* being ſenſible of his Danger, in order to prevent it, had ſent for the Town-Clerk, as above-mentioned; and that they might eaſily have taken the Surgeon up if they would, ſince he was well known in the Town, and appear'd publickly there ſeveral Days after, before he made his Diſcovery.

But however that Matter was, the Surgeon being ſet at Liberty, and telling about the *Hague*, that *De Wit* was convicted upon his Accuſation, the People, eſpecially after *De Wit*'s Sentence was publiſh'd, began to murmur, and to grow tumultuous; to which they were prompted by the Surgeon, who told them, That if they did not prevent it, *De Wit* would ſoon be carried out of the Priſon: Upon which they took Arms, and went to the Priſon. In the mean time the Penſionary, who had been ſent for by his Brother, went to him, contrary to the Advice of his Friends; and as he was bringing him out of Priſon, in order to depart according to Sentence, a Woman cry'd out to the Guard of Burgers who ſtood before the Priſon-Door, *What the Devil! Man, there's the Traytors going off; drive them up again, or knock them dead.* Upon which, the Guard order'd them both to go up again, or they would fire upon 'em; and while the Penſionary ſpoke to them with Authority to forbear, they forc'd 'em both in again, and oblig'd their Coach to ride off, in which 'twas reported their Father ſat, in order to have carried them to Dinner. In the mean time the Tumult increas'd, and the Report being ſpread, that *Cornelius* had eſcap'd, the People would not be ſatisfied till two of the Burgomaſters and four Burgers went up, and ſatisfied them to the contrary. The Penſionary prevail'd with the Magiſtrates to dine with him and his Brother. But in the mean time all the Companies of Burgers came in Arms about the Priſon, drew up in good Order, and would ſuffer no Man to go in for fear of an Uproar. Three Troops of Horſe, which then lay in the *Hague*, did alſo mount: One of 'em went to the uſual Place of Rendezvous, and the other two endeavour'd to get into the outer Court of the Priſon; but the People kept them off with their Pikes and Muskets, and the arm'd Rabble got up to the Tops of the neighbouring Houſes, to ſee that neither of the *De Wits* ſhould eſcape; and perceiving that the Officers ſtay'd long in the Priſon, and apprehending them to be murder'd, they began to throw Stones, and to fire their Pieces at the Doors and Windows, till the Officers ſpoke to them out at the Windows, and told them, All was well. In the mean time a falſe Report was ſpread, That the Mob of the neighbouring Villages and Towns had taken Arms, and were coming to plunder the *Hague*. This increas'd the Tumult, and ſome of the Burgers cry'd out, *We ſtay here to guard a couple of Rogues, who will certainly be reſcued e're next Morning by Force or Craft; and if they eſcape, the Town will be next Day all in Blood and Confuſion, and our Houſes plunder'd.* Upon which, many requeſted that the *De Wits* might be carried

ried to the Town-House, where they would be kept securely without any Trouble. Others cry'd out, *Let us tie them to the Gibbet, and shoot them.* Upon which one of the Mob bid them follow him, and he would be their Leader; and then with their Muskets and Smiths Hammers they broke up the Doors, and came to the Chamber, where they found the Pensionary sitting upon the Foot of the Bed, reading in his Bible, and his Brother laid down in his Night-Gown. The Pensionary ask'd them, What they would have, and why all that Violence? One of 'em answer'd, *You must walk down, for we will have your Lives.* *Cornelius* rising from his Bed, spoke roughly to the Fellow, and bid him go down; but the Pensionary seeing that no Reason would do, he took his Brother by the Hand to go down Stairs, where he was wounded by a Pike over the Eye: Upon which he held up his Hands and Eyes to Heaven, recommending his Soul to God; and as he went out, was forced by the Mob to the very Place where he had been assassinated two Months before, and barbarously murder'd, covering his Face with his Cloak, says the Author of their Lives, as *Julius Cæsar* did; and his last Words were, *Well Men! Well Citizens!* And soon after his Brother had the same Fate. Upon this, the Companies retir'd under their respective Colours in good Order, while the barbarous Mob carried their dead Bodies to the Gallows, where they hung the Pensionary a Foot higher than his Brother, and afterwards mangling their Corps, cut their Clothes in a Thousand Pieces, and sent them about the Country as if they had been Trophies of a Conquest; and, says *The History of the United Provinces*, and the Author of *The Lives of the De Wits*, some of 'em cut out large Pieces of their Flesh, which they broil'd and eat.

Thus fell those two great Men by popular Fury, *Cornelius* in the 49th, and the Pensionary in the 47th Year of his Age, both equally zealous, says that Author, for the Glory and Liberty of their Native Country, and formerly as much belov'd, as now they were hated by the People, who look'd upon them to be the Causes of all the Calamities with which their Country was at that time overwhelmed. The *Atlas Historique* says, the Cause of their Ruin was the too great Opposition they made to the Prince's Party; with which Sir *William Temple* seems to agree in *The Causes of the Fall of this Republick*, where he says, "That the "chief Thing which concurr'd to weaken, "and indeed to break the Strength of their "Land Force, was the Alteration of their "State, which happen'd by the Perpetual "Edict of *Holland* and *West Friesland* upon "the Death of the last Prince of *Orange*, "for the Exclusion of the Power of Stadtholder, or at least the Separation of it "from the Charge of Captain-General; "for after that Time, the main Design and "Application of those Provinces had been "to work out by degrees all the old Offi"cers both Native and Foreign, who had "been formerly sworn to the Prince of "*Orange*, and were still thought affectio"nate to the Interest of that Family, and "to fill the Commands of their Army with "the Sons or Kinsmen of Burgomasters, "and other Officers or Deputies in the "State, whom they esteem'd sure to their "popular Constitution, and good enough "for an Age, wherein they saw no Ap"pearance of an Enemy to attack them by "Land. But the Humour of Kindness to "the young Prince, both in the People and "Army, was not to be dissolv'd or dispers'd "by any Medicines or Operations either of "Rigour or Artifice, but grew up insensi"bly with the Age of the Prince, ever "presaging some Revolution in the State, "when he should come to the Years of "aspiring and managing the general Af"fections of the People; being a Prince "who join'd to the great Qualities of his "Royal Blood, the popular Virtues of his "Country; silent and thoughtful; given "to hear, and to enquire; of a sound and "steady Understanding; much Firmness "in what he once resolves, or once denies; "great Industry and Application to his Bu"siness, little to Pleasures; Piety and Re"ligion of his Country, but with Charity "to others; Temperance unusual to his "Youth, and to the Climate; frugal in the "common Management of his Fortune, and "yet magnificent upon Occasion; of great "Spirit and Heart, aspiring to the Glory "of Military Actions, with strong Ambi"tion to grow great, but rather by the "Service, than the Servitude of his Coun"try.

" try. In short, a Prince of many Virtues, without any appearing Mixture of Vice. At the same time the Prince was approaching the 22d Year of his Age, which the States of *Holland*, ever since their Alliance with *England* in 1668, pretended should be the Time of advancing him to the Charge of Captain-General and Admiral of their Forces, tho' without that of Stadtholder; but the nearer they drew to this Period, which was like to make a new Figure in their Government, the more desirous some of their Ministers seem'd either to decline or restrain it. On the other side, the Prince grew confident upon the former Promises of *Holland*, and the concurring Dispositions of the other Six Provinces, to his Advancement; and his Party, spirited by their Hopes, and the great Qualities of this young Prince, now grown ripe for Action, resolved to bring this Point to a sudden Decision; against which the other Party prepared, and united all their Defences. — Besides, those Ministers who had still the Direction of Affairs, bent their chief Application to the Strength and Order of their Fleet, rather than of their Army. — Perhaps content that some ill Successes should attend the Prince of *Orange* at his first Entrance upon the Command of their Armies, and thereby contribute to their Designs of restraining his Authority, while they were to leave him the Name of Captain-General. This indeed was not likely to fail, considering the ill Constitution of their old Army, the hasty Levies of their new, and the Height of the Faction now broken out in the State, which left both the Towns and the Troops in Suspence under whose Banners they fought, and by whose Orders they were to be governed, the Prince's or the States. — In this Posture were the Affairs of this Commonwealth when the War broke out, with those fatal Events that must needs attend any Kingdom or State where the Violence of a Foreign Invasion happens to meet with the distracted Estate of a Domestick Sedition. — Their Towns were without Order, their Burgers without Obedience, their Soldiers without Discipline, and all without Heart; and indeed it was the Name of *England* joining in the War against them that chiefly broke their Hearts, and contributed more to the Loss of so many Towns, and so much Country, than the Armies of *Munster* and *France*.

These judicious Reflections of Sir *William*'s are confirmed by the Account given even by the Author of *The Lives of the De Wits*, who, tho' a Friend to that Faction, yet does not dissemble the great Opposition made in the United Provinces to the Exclusion of the Prince from the Dignities of his Ancestors, which was so very ungrateful to the People in general, and so manifestly contrary to their Fundamental Union concluded at *Utrecht*. That those who were for it thought it necessary to vindicate themselves, as not being the first Movers of it, but meerly forc'd to it by *Cromwel*, who would listen to a Peace on no other Terms but the Exclusion of the Prince, lest he should some Time or other revenge the Murder of his Grandfather upon him and his Party, as *Van Beverning*, the *Dutch* Ambassador who negotiated the Treaty in *England*, did afterwards openly declare in the Assembly of the States General.

However that was, the Author of *The History of the United Provinces* says, the Prince of *Orange* was so far from shewing the least Countenance to these barbarous Proceedings, that when the States of *Holland* wrote to him, expressing their Abhorrence of so detestable an Action, he order'd a strict Enquiry to be made after the Authors and Promoters of it; but upon several Petitions by the Burgers of the *Hague*, who excus'd the same by the vast Numbers of those concern'd in it, these Proceedings went no further than summoning the Guilty before the Court of Justice. Soon after this the Sieur *Teckhart*, Head Bailiff of the Mayoralty of *Bois-le-duc*, and Cousin-German to the *De Wits*, was accused by his own Coachman of the like Conspiracy against the Prince, but acquitted, because the Coachman could not make good his Accusation. We have been the larger on this Particular, because the *Dutch* were then so much divided in their Opinions about it, as they are still, that both the Factions make it a Handle for bitter Reflections on one another. And as the one

Digitized by Google

one Side was ſo much enraged againſt the Memory of the *De Wits*, that after their mangled Corps were buried, they threaten'd to take them up, to burn them, and ſcatter their Aſhes, leſt they ſhould afterwards have Monuments erected for them as Martyrs of State, as ſome had talk'd of doing for *Barneveld*: The other Party ſtruck Medals in Honour of their Memory; of which the Curious may find an Account in the Hiſtory of their Lives: And we leave the Reader to make his own Judgment on the whole.

Fagel was choſen Penſionary after the Murther of *De Wit*; and having obſerv'd the Fate of his Predeceſſors, becauſe of their violent Oppoſition to the Family of *Orange*, he ſteer'd a contrary Courſe.

Much about this Time the Elector of *Brandenburg* wrote to the States, to whom he recommended the Prince, as inheriting all the Virtues of his Anceſtors; and ſaid, He thought himſelf oblig'd to have aſſiſted him in recovering thoſe Dignities, which they had ſo dearly purchas'd; but ſince the States had reſtor'd him, he doubted not that Heaven would proſper a Reſolution ſo advantagious to the Publick.

After this, the Prince chas'd the *French* advanc'd Guards as far as their Trenches before *Utrecht*, and beſieg'd *Naerden*, but without Succeſs, the *French* being directed by ſome treacherous Peaſants how to throw Succours into the Town; but not without Loſs, the Prince having defeated 5 of their Regiments, and killed or wounded moſt of their Officers. Then he marched with 24000 Men to the Country of *Liege*, obliged the *French* to retire, and inveſted *Charleroy*, to bring them to a Battle, which they avoided, and the unſeaſonable Weather obliged the Prince to riſe from before *Charleroy*; but he took *Bins*, made the Garriſon Priſoners of War, demoliſhed the Fortifications, and put his Army into Winter Quarters. During this Expedition, the Duke of *Luxemburg*, with 40000 Men, attempted to conquer and plunder the Province of *Holland* by the Favour of the Ice; but was prevented by a Thaw, and retir'd with Loſs, having narrowly eſcap'd being drown'd himſelf. His Men made themſelves more odious to the *Dutch* than ever by their Cruelties and Rapes, in ſome ſmall Places that had been abandon'd by the Garriſons; but the Return of the Prince ſoon reſtor'd Things to their former State.

In 1673, the Prince took *Naerden*, *Rhineberg*, and *Bonne*, which oblig'd the *French* to abandon moſt of their Conqueſts in the United Provinces. This, with the taking of *Coevorden* by Surprize, and ſome other Advantages, very much raiſed the Spirits of the *Dutch*; thô the Elector of *Brandenburg*, for want of being duly aſſiſted by the Empire, was obliged to come to a Neutrality with the *French* King, on Condition of having what the *French* had taken in the Dutchy of *Cleve* reſtored to him. That ſame Year the *Dutch* under *Van Trump* had another Engagement by Sea againſt the *Engliſh* and *French* commanded by Prince *Robert* near *Dungenneſs*, in which both pretended to the Victory; the *Engliſh* and *French* loſt moſt Ships; the *Dutch* made Rejoycings in *Holland*, and order'd a Day of Thankſgiving for their Advantage. In *July* after, there was another bloody Engagement betwixt the Fleets at Sea, while the *Engliſh* prepared for a new Deſcent upon *Holland*; but after a ſharp Engagement, they both retired without claiming the Victory, and the Deſcent miſcarried. That ſame Year the *French* King took *Maeſtricht*, after a vigorous Siege; but his further Progreſs was ſtopp'd, by laying the Country about *Bergenopzoom* and *Boiſleduc* under Water. At the ſame time the *Dutch* recover'd moſt of the Places that had been taken from them by the Biſhop of *Munſter*.

In 1674, the Parliament and People of *England* being diſſatisfied at the War with the *Dutch*, and uneaſy at the Progreſs of the *French* in the *Netherlands*, a Treaty for a General Peace was ſet on foot at *Cologne*, but without Effect, becauſe the Emperor order'd the Prince of *Furſtemberg*, a Native of the Empire, but Plenipotentiary for *France*, thô under Pretence of being ſo for the Elector of *Cologne*, to be carried off. In Conſideration of the Prince of *Orange*'s great Services, the States of *Holland* and *Weſt-Frieſland*, and the States General, made his Dignities Hereditary to him and his Heirs-Male lawfully begotten; ſo that he was exalted above any of his Anceſtors in the 23d Year of his Age. This Year was alſo fought the Battle of *Seneff*, where the *French* had

Digitized by Google

had the Advantage at firſt; but the Prince of *Condé* loſt the Honour and Profit of it by his too great Eagerneſs. Both Sides claim'd the Victory; but the *French* avoided coming to a ſecond Engagement, tho' the Prince of *Orange* did all he could to bring them to it. He gave ſuch Proofs of his Courage and Conduct in this Battle, that the Prince of *Condé* gave him this Teſtimony, That he ſhew'd himſelf equal to the oldeſt Generals; but that he too frequently expos'd his Perſon, an Error which his high-wrought Courage would never allow him to reform. After this Battle, the Prince took *Grave*, which put an End to the Campaign.

In 1675, the States, upon Hopes of a Revolt on the Coaſts of *Normandy*, ſet out a Fleet under *De Ruyter* and *Van Trump*; but the Conſpiracy was diſcovered, as 'tis ſuppos'd by the King of *Great Britain*, ſays *The Hiſtory of the United Provinces*, for which the Chevalier *de Rohan* was beheaded, and ſome others executed in *France*; ſo that the Deſign miſcarried: But *Trump* returning from the Coaſts of *France*, defeated the *Swediſh* Fleet, and forc'd them to return into their own Harbours, in purſuance of the League the States had made with ſome Princes of the Empire againſt the *Swedes*, who had invaded the Elector of *Brandenburg*'s Dominions. The ſame Year the Prince took *Bimch*; and the States of the Province of *Guelderland* offer'd him their Sovereignty, which, by the Advice of the other Provinces, he wiſely refus'd, there being none of 'em for his accepting it but *Utrecht*; ſo that he thank'd them for their Proffer, ſays *The Hiſtory of the United Provinces*, but told them, he could not comply, becauſe it would prove the Occaſion of Jealouſy and Miſtruſt, as if he aim'd at nothing but his own Grandeur. Yet notwithſtanding his Modeſty, this gave Occaſion to the *Louveſtein* Faction to ſay, That he aim'd at the Sovereignty of all the Provinces: Upon which the States General, to prevent the ill Conſequences of ſuch Reflections, iſſued a ſevere Proclamation, forbidding all Perſons, of what Rank or Degree ſoever, to utter by Word or Writing, that the Prince ever aim'd at any ſuch Thing, or that the propoſing of it to him had ever been debated in their Aſſembly. The Prince being after this taken ill of the Small-Pox, the *French* King laying hold of the Opportunity, took *Liege*, *Dinant*, *Huy*, and *Limburg*. This Year the great Marſhal *Turenne*, who had defeated the *Germans* at *Sintſheim* the Year before, was killed by a Cannon-Bullet as viewing the *German* Camp; and the Duke of *Lorrain* defeated Marſhal *Crequi*, and afterwards took him with his Garriſon Priſoners of War at *Treves*, whither he had retired after the Battle.

In 1676, the Treaty of *Nimeguen* was ſet on foot by the Mediation of King *Charles* II. but without Effect; ſo that the *French* King invaded the *Netherlands* with his Army, and took *Conde* and *Bouchain*. *De Ruyter* being ſent to Sea againſt his Will, becauſe his Fleet was too ſmall, had two Engagements on the Coaſts of *Sicily* with the *French*, and loſt his Life in the ſecond, wherein both Sides claim'd the Victory; but the *Dutch* were defeated in a third Engagement, and their Army miſcarried in the Siege of *Maeſtricht*, where the Prince of *Orange* was wounded. That ſame Year he appeaſed ſome Religious Differences that had riſen in *Zealand* upon the Subject of *Coccieniſm*.

In 1677, the *French* took *Valenciennes*, *Cambray*, and *St. Omers*, and defeated the Prince near *Mont-Caſſel*, which made the *Dutch* inclinable to accept the Propoſals made by the *French* Plenipotentiaries at *Nimeguen*; but the Prince oppos'd it, as being contrary to their former League with the Princes of the Empire.

This Year the Prince was married to the Duke of *York*'s eldeſt Daughter, the Princeſs *Mary*, our late Queen of glorious Memory; which, with the enſuing Alliance betwixt *England* and *Holland*, put the Confederates in Hopes of obtaining an advantagious Peace with *France*; but the unſteady Management of the Court of *England*, and the Slackneſs of their Preparations to aſſiſt their Allies, together with the Clamours of the *Louveſtein* Faction in *Holland*, that the Prince's Match would prove fatal to their Liberties, prevailed with the States to clap up a ſeparate Peace with *France*, contrary to the Mind of the Emperor, the King of *Denmark*, the Elector of *Brandenburg*, and their other Allies. The Prince having oppos'd it with all his Power, did all he could, ſays the above-mentioned Author, to tra-

verſe

verse it, for which the *French* furnish'd him with a very good Opportunity, by continuing the Blockade of *Mons* during the Cessation of Arms. Upon this he attack'd the Duke of *Luxemburg*'s Head Quarter at the Abbey of St. *Denis*, from whence he chas'd him with great Slaughter, tho' not without considerable Loss on his own Side. After this the Prince design'd to have relieved *Mons*; but as he was consulting about it, he receiv'd Advice that the Peace was concluded, of which he sent the Duke of *Luxemburg* Word, which put an End to the War at that Time. In this Action the Prince ventur'd so far, that he was in Danger of being kill'd; but was happily rescued by the Lord *Auverquerque*, who shot a *French* Captain just as he was going to discharge a Pistol at him; for which the States made that Lord a very noble Present.

In 1679, the *Dutch* sent Ambassadors to *France* to promote a Peace betwixt that Crown and their Allies, who had not agreed to the Peace of *Nimeguen*; but the *French* King refused to give their Ambassadors the Respect due to those of Crown'd Heads; tho' at last, having proved that this had been allow'd them by *Henry* IV. his Father, and himself, he comply'd: And a Peace betwixt *France* and the *Dutch* Allies was concluded.

In 1680, the Prince of *Orange* had an Interview in *Germany* with the Elector of *Brandenburg*, the Dukes of *Zell* and *Hanover*; after which he came to see his Uncle King *Charles* in *England*. The *French* propos'd a Defensive Alliance with the *Dutch*, who rejected it, and new Differences happen'd betwixt them and *France*, because the *French* King delay'd to settle the Limits betwixt him and the *Spaniards* in the *Netherlands*; and urg'd, that the King of *Spain* should renounce his Title of D. of *Burgundy*, which the *Spaniards* were fore'd to comply with.

In 1681, the *Dutch East-India* Company reduc'd their Tributary the King of *Ternate* in the *East-Indies*, for taking Part with the King of *Bantam*: And the States being alarm'd at the *French* King's seizing *Strasburg* and *Casal*, they made an Alliance of Guarantee with the *Swedes*, and propos'd the same to King *Charles*; but the Duke of *York* dissuaded him from it. This Proposal provok'd the *French* K. to threaten the *Dutch*; and he sent an Officer with some Dragoons to take up a *French* Count, that had retir'd to their Dominions; but the *Dutch* took the Officer, condemn'd him to die, and sentenc'd the Dragoons to work 10 Years in their Rasp-House. Yet when the Officer was carried to the Place of Execution, they pardon'd both him and the Dragoons. The Emperor being provok'd with the *French* King's seizing of *Strasburg*, and his Pretences of reuniting several Places of the Empire by Vertue of the Treaty of *Nimeguen*, he enter'd into the Treaty of Guarantee, and made a League with the Circles of *Franconia* and *Upper Rhine* for Defence of that River. At the same Time the *French* King possessed himself of the Principality of *Orange*, and dismantled the Town, which was complain'd of by the *English* and *Dutch* Ambassadors: But the *English* Court, instead of being cordial in the Matter, quarrel'd likewise with the *Dutch*, for having supported the young King of *Bantam* against his Father, who was their Enemy, and had resign'd the Crown to his Son, which he afterwards would have reassum'd; but the young King having prevail'd, by the Assistance of the *Dutch*, he order'd the *English*, who had taken Part with his Father, to depart his Dominions, which the Court of *England* charged on the *Dutch* as an Intrigue of theirs; but they excus'd themselves, and alledg'd, they did the *English* there all the good Offices they could, tho' they took Part with the old King against them to ruin their Commerce: However they offer'd an amicable Composition about that Matter.

In 1683, and 1684, the *French* continued their Encroachments on the *Spanish Netherlands*, and took *Luxemburg*. Upon which the Prince and the *Dutch* propos'd to raise an Army to stop their Progress; but the City of *Amsterdam* oppos'd it, which brought on the Peace of *Ratisbon*, where a Truce of 20 Years was concluded; yet the Prince of *Orange* had not his Principality restor'd.

In 1685, *Charles* II. of *Great Britain* died, and was succeeded by his Brother *James* II. Upon which the Duke of *Monmouth*, being oblig'd to retire from the *Spanish Netherlands* at the Sollicitation of King *James*, went to *Holland*; as did others who were obnoxious to the Government in *England*. King *James* requir'd

Digitized by Google

requir'd the States to baniſh them; which they having agreed to, the Duke of *Monmouth* and the Earl of *Argyle* rais'd a Rebellion in *Great Britain*. Upon this, the States not only ſent the 6 *Britiſh* Regiments in their Service to help to ſuppreſs them, according to Agreement when they were firſt rais'd, but the Prince of *Orange* offer'd to come in Perſon with more Troops; the latter of which King *James* refus'd; and notwithſtanding this generous Offer, did not in the leaſt interpoſe in Behalf of the Prince, whoſe Subjects were barbarouſly perſecuted in *Orange*, and their Miniſters ſent Priſoners to *France*.

In 1686, King *James* allow'd the *Algerines*, then at War with the *Dutch*, the free Uſe of his Ports; and 20 of their Frigats in the Channel took above 30 rich *Dutch* Merchant Ships, moſt of whoſe Cargo they ſold in *England*. This, together with a Memorial from the Marquis *de Albeville*, King *James*'s Miniſter in *Holland*, about the Affair of *Bantam*, and the hindering of his Envoy to carry off Sir *Robert Peyton*, who had retir'd to their Country, gave the *Dutch* ſufficient Reaſon to perceive that King *James* deſign'd to quarrel with them. The *French* King being likewiſe offended, becauſe of the kind Reception they gave his perſecuted Proteſtants, a Squadron of his Men of War took a *Dutch* Man of War in the *Streights*; but that Matter was ſoon compromiſed.

In 1687, the Marquis *de Albeville* gave in freſh Memorials concerning the Affair of *Bantam*, and the ſeizing ſome *Engliſh* Officers whom *Skelton* had employ'd to take up Sir *Robert Peyton*: Upon which the *Dutch* deliver'd the Officers, after having proceeded againſt them judicially, and baniſh'd them their Provinces; but they refus'd to baniſh Dr. *Burnet*, now Biſhop of *Saliſbury*, tho' King *James* requir'd it, the Doctor being naturaliz'd in *Holland*.

In 1688, King *James* having given evident Proofs of his Deſign to ſubvert the Proteſtant Religion, and the Liberties of *Great Britain*, he continued to preſs the *Dutch* about the Affair of *Bantam*, and demanded they ſhould ſend home the 6 *Britiſh* Regiments in their Service; which the *Dutch* refuſed, becauſe, according to Agreement, they were not to be ſent home, except *Britain* was engaged in a War. Beſides, the old *Britiſh* Regiments there being disbanded in 1665, the new ones had taken an Oath of Fidelity to the States. However, they gave Paſſports to ſuch Officers as had a Mind to return, which 40 of 'em accepted; but the reſt, with the Troops, liſted themſelves afreſh in the Service of the States. In the mean time King *James*'s Queen pretended to be brought to Bed of a Son, tho' there were violent Suſpicions of the Truth of her Pregnancy: Beſides, neither the Princeſs of *Orange* nor the Princeſs of *Denmark*, who were the Perſons moſt immediately concern'd to know the Truth of it, were invited to be preſent at her Labour: The Archbiſhop of *Canterbury*, who ought to have been in the Bed-Chamber, by Vertue of his Office, at the ſame Time, was, with 6 other Biſhops, impriſon'd in the *Tower*, for refuſing to read King *James*'s Declaration for Liberty of Conſcience, which he had publiſh'd with the Advice of his Judges, by Vertue of his Diſpenſing Power. This heighten'd the Diſcontents in *Great Britain*, and gave new Cauſe of Jealouſy to the Prince of *Orange*, and the States. At the ſame Time the *French* King prohibited Commerce with the *Dutch* as to Woollen Manufacturies and Herrings; and the Elector of *Cologne* being dead, he threaten'd the *Dutch*, if they interpos'd in the Eleſtion of his Succeſſor, who he deſign'd ſhould be the Prince of *Furſtemberg*, that he would oppoſe them with his Troops, and began to march them accordingly. The *Dutch* perceiving plainly by theſe Steps, that *England* and *France* deſign'd a War upon them, they prepar'd for it. The *Engliſh* and *French* Courts demanded the Reaſons of thoſe Preparations. To which the *Dutch* anſwer'd, That they did it according to the Example of *England* and *France*. Upon this, the *Engliſh* Miniſter offer'd an Alliance with the *Dutch* againſt the Infractions of the Treaty of *Nimeguen*, and the late Truce; but the States perceiving that this was only propoſed to gain Time; and the Prince having a Memorial ſent him from many of the chief Proteſtants of *Great Britain*, repreſenting the Grounds they had to ſuſpect the Birth of the pretended Prince, by which the *Engliſh* Court deſign'd to defraud his Princeſs of

Digitized by Google

her R'ght of Succeſſion, and to overturn their own Religion and Liberties; the *Dutch* continued their Preparations with Vigour, and ſent Part of their Army and Fleet to the Prince, who, purſuant to the Memorial, landed in *England*, where, King *James* being deſerted, the Prince and Princeſs were declared King and Queen of *Great Britain*, and King *James* retired into *France*, having ſent his Queen and pretended Son thither before: But we refer the further Account of this Matter to the Hiſtory of *England*. The *French* King, to divert the Prince and States from this Enterprize, had threaten'd them with Memorials, and declar'd War againſt the *Dutch*, but without Effect.

In 1689, the *Dutch* ſent Ambaſſadors to congratulate King *William* and Queen *Mary*'s Acceſſion to the Throne; and the *French* King, inſtead of bending his Force againſt the *Dutch*, invaded *Germany*, and ruin'd the *Palatinate*. The Cloſe of that ſame Year, the *French* declared War againſt *Spain*, and invaded the *Netherlands*; but met with a conſiderable Repulſe from Prince *Waldeck*, who commanded the *Dutch* Army at *Walcourt*.

In 1690, the *French* being ſuperior in Number, defeated that Prince at the Battle of *Fleru*s; but bought the Victory ſo dear, that they did nothing more that Campaign. That ſame Year the *French* engaged our Fleet and a Squadron of *Dutch* off of *Beachy-head*, wherein the Confederates had the worſt: But we refer the Particulars to the *Engliſh* Hiſtory.

King *William* having defeated the late King *James* in *Ireland*, and oblig'd him a ſecond time to retire to *France* in 1691, his Majeſty went to the *Hague*, where, in a Congreſs of Princes and Ambaſſadors, he concerted Meaſures for carrying on the War againſt the *French* in the *Netherlands*. An Engagement happen'd near *Leuſe* betwixt the *French* and Prince *Waldeck*, where, tho' the *French* were ſuperior in Number, they had equal Loſs.

In 1692, the *French* King with 45000 Men, being cover'd by the Duke of *Luxemburg* with 60000, beſieg'd and took *Namur*. King *William* march'd to have reliev'd it; but the great Rains ſo ſwelled the Rivers, that he could not paſs them to effect it. That ſame Year, a Plot was form'd by the *French* and the *Engliſh Jacobites* to have murther'd Queen *Mary*, while the *French* Fleet was to have invaded *England*; but the Plot was diſcover'd, and prevented by the Vigilance of Mr. *Johnſton*, then Lord Secretary for *Scotland*; and the *Engliſh* and *Dutch*, under the Conduct of Admiral *Ruſſel*, defeated the *French* Fleet near *La Hague* on the Coaſt of *Normandy*, where the *French* loſt 18 or 20 of their Capital Ships. At the ſame time a Plot was diſcover'd to have murther'd King *William* in *Flanders* by *Grandval*, a *French* Officer, and other Aſſaſſins; for which *Grandval* was taken and executed at the Head of the Army. Soon after this, the *Engliſh* and *Dutch* were defeated at *Steenkirk*, where they were overpower'd by the *French*, thô the Loſs was almoſt equal on both Sides.

In 1693, the *French* ſeiz'd and diſpers'd moſt of the *Dutch Smirna* Fleet in their Return home. The *French* defeated the *Engliſh* and *Dutch* again at the Battle of *Landen*, while a great Part of their Army was detached to force the *French* Lines. The *Engliſh* and *Scots* perform'd Wonders in this Battle; and the Loſs of the *French* was ſo great, that tho' they kept the Field, they made no further Progreſs this Campaign. In the mean time the *French*, to divide the Confederates, made ſeparate Propoſals to the Emperor by the Pope, and to King *William* by the Miniſter of *Denmark*; but they were rejected.

In 1694, the *Engliſh* and *Dutch* made a Deſcent near *Breſt*; but their Deſign being betray'd, miſcarried. They bombarded *Dieppe* and *Havre-de-Grace*, and attempted *Dunkirk* and *Calais*, without Succeſs; but Admiral *Ruſſel*, with another Part of the *Engliſh* and *Dutch* Fleet, ſav'd *Barcelona*. King *William* fail'd in ſeizing *Pont d'Eſpierre* in *Flanders*, being prevented by the Vigilance of the *Dauphin*, who commanded the *French* Army; but the King took *Dixmuyd* and *Huy*. His Majeſty appeaſed ſome dangerous Differences in Religion, which begun then to appear in *Holland*, and order'd the Publick Eſtabliſhment, and the Canons of the Synod of *Dort*, to be duly obſerv'd there, according to the laudable Example of his Predeceſſors.

In

In 1695, the Confederates had a great Loſs by the Death of Queen *Mary* of glorious Memory; and the *French* loſt their great General the D. of *Luxemburg*. King *William*, notwithſtanding his juſt Grief for the Death of that excellent Princeſs, return'd to *Flanders*, where he took *Namur* in ſight of the *French* Army, after a vigorous Defence by M. *Bouffters*, who was arreſted by way of Repriſal for the detaining the Garriſons of *Dixmuyd* and *Deyuſe* by the *French*, contrary to the Capitulation. Prince *Vaudemont* being well nigh ſurpris'd with Part of the Confederate Army by the *French*, made a noble Retreat. This Year a dangerous Tumult happen'd at *Amſterdam*, which laſted ſeveral Days, on Occaſion of ſome Alterations introduc'd in their Way of Burying; but was happily ſuppreſs'd by the Magiſtrates and Train-Bands, and the Ring-leaders put to Death.

In 1696, a new Plot to aſſaſſinate King *William* was ſet on foot by the *French* Court and the *Engliſh Jacobites*, while the late King *James* marched with an Army to the Coaſts of *Normandy*, where he was to have embark'd, upon a Signal that the Murther was effected; but he was diſappointed, and the Inſurrection of his Friends in *England* prevented by the Diſcovery of the Plot, and the Seizure and Execution of ſome of the chief Aſſaſſins and Conſpirators. The *French* Magazine at *Givet* in *Flanders* was burnt by the Confederate Bombs, and *Calais* was a ſecond time attack'd in vain by the Confederate Fleet; but they bombarded St. *Martin* and *Olone*. This Year the *French* King found Means to break the Duke of *Savoy* off from the Confederacy. The Earl of *Galway*, then in *Italy*, gave Notice of the Deſign three Months before-hand; but it could not be prevented: The Duke, among other advantagious Terms, having obtain'd a Match betwixt his eldeſt Daughter and the Duke of *Burgundy*, eldeſt Son to the Dauphin. This prevail'd with the *Dutch* to liſten to the *French* Propoſals of Peace, which, by the Mediation of the K. of *Sweden*, was concluded at *Ryſwick* in 1697. The *Dutch* having obtained more advantagious Conditions than they had by the Treaty of *Nimeguen*, and the *French* King having alſo own'd King *William*: But more of this when we come to *England*. This Year the *Turks* did alſo agree to a Treaty of Peace with the Emperor at *Carlowitz*, by the Mediation of the *Engliſh* and *Dutch*.

In 1698, King *William* went into *Holland*, and from thence to *Zell*, where he had a Conference with the Duke of that Name about the Affairs of *Germany*. The ſame Year, a Treaty of Partition of the *Spaniſh* Monarchy was agreed upon betwixt *England*, *France*, and *Holland*, by which *Spain* and the *Weſt-Indies* were, in caſe of the King of *Spain*'s Death without Iſſue, to be ſettled upon the Electoral Prince of *Bavaria*, and *Naples*, *Sicily*, and *Guipuſcoa*, with the Places on the Coaſt of *Tuſcany*, were to remain to the Dauphin, and the Dutchy of *Milan* to be given to the Archduke *Charles* and his Heirs. The Elector of *Bavaria* was to be Tutor to his own Son during his Minority; and in caſe of his Death without Iſſue, the Elector and his other Poſterity were to enjoy his Share: But the Electoral Prince dying, another Treaty of Partition was agreed upon in 1699 between *England*, *France*, and *Holland*, by which *Spain* and the *Weſt-Indies* were to be ſettled upon Archduke *Charles* and his Heirs; and the Dauphin and his Heirs were to have *Naples*, *Sicily*, the Places belonging to *Spain* on the Coaſts of *Tuſcany*, *Guipuſcoa*, &c. The Emperor rejected this Treaty, as being contrary to his Intereſt; and the *French* King, ſays the *Atlas Hiſtorique*, tho' he was the firſt that mov'd it, on Pretence of preventing the Wars that muſt otherwiſe enſue in *Europe*, charg'd it upon the *Engliſh* and *Dutch*, in order to make them hateful to the *Spaniards*, who could not endure to hear of the diſmembring of their Monarchy.

In 1700, the *French* improving the Diſguſt which this Treaty had rais'd in the *Spaniards*, found Means to induce King *Charles* II. of *Spain*, as was pretended, to make a Will, or as others ſay, they and their Creatures, of whom Cardinal *Portocarero* was the chief, made it for him; by which, contrary to the Treaty of the *Pyrenees*, and his own Father's Will, *&c.* the Duke of *Anjou*, ſecond Son to the Dauphin, was declared Heir to the whole *Spaniſh* Monarchy; and *Charles* II. dying a little after, the *French* King fell in with the Will, and rejected the Treaty of Partition, for which he order'd his Miniſters in *England* and *Holland*

Digitized by Google

land to acquaint thoſe two Powers with his Reaſons; who being very much offended, they prepared to oppoſe his Pretenſions: But the *French* King, by gaining the Electors of *Bavaria* and *Cologne*, was before-hand with them; and the former, tho' he was made Governor of the *Netherlands* in King *Charles* II.'s Time, by the Intereſt of thoſe two Powers, made it eaſy for the *French* King to ſeize *Luxemburg*, *Namur*, *Charleroy*, and other Towns, where the *Dutch*, by K. *Charles* II's Conſent, had Troops in Garriſon for the Security of their own Frontiers, and thoſe of the *Spaniſh Netherlands*. At the ſame Time a War broke out in the North betwixt *Sweden* and *Denmark*, on Account of the latter's Pretenſions to *Holſtein*; but the *Engliſh* and *Dutch*, to prevent the dangerous Conſequences of it, brought thoſe Princes to a Peace.

In 1701, the *Dutch* were very much alarm'd at the Approach of the Troops of *France*, while ſo many of their own were detained in the Garriſons of the *Netherlands*; of which the *French* King had made himſelf Maſter by the Elector of *Bavaria*'s Treachery: But King *William*, who was their Stadtholder, having come into *Holland*, did, in the Meeting of the States General, make a pathetick Speech, and aſſur'd them of the Continuance of his Affection for their Republick, and to do his Utmoſt for their Welfare, as he had always done. This was one of the laſt Proofs that he gave them of his Affection, for he was then in a bad State of Health. In the mean time the *French* King, by his Miniſter, propoſed to enter into a particular Conference with the States; but they refuſed to do any thing without King *William*'s Participation. However, becauſe the *French* King pretended to detain their Troops in the *Spaniſh Netherlands*, becauſe they had not own'd his Grandſon as King of *Spain*, they removed that Objection by owning him, and recover'd their Troops; but they refuſed to enter into any further Treaty with him, except he would put *Venlo*, *Ruremond*, *Stevenſweert*, *Luxemburg*, *Namur*, *Charleroy*, *Mons*, *Dendermonde*, and St. *Donas*, into their Hands as a Security: And *England* demanded *Oſtend* and *Newport*; to which the *French* King return'd no Anſwer: But the States having recover'd their Troops, were more reſolute than they had been before. The late King *James* dying this Year at *St. Germains*, the *French* King, contrary to the Treaty of *Ryſwick*, own'd the pretended Prince of *Wales* as King of *Great Britain* and *Ireland*, which gave new Cauſe of Offence to the *Engliſh* and *Dutch*. The Elector of *Cologne* at the ſame time received *French* Troops into *Bonne*, *Rhinberg*, *Keyſerſwaert*, and the Citadel of *Liege*, where the *French* carried off the great Dean. All which did mightily incenſe the Empire. The Cloſe of this Year, King *William* return'd to *England*, where he call'd a new Parliament, in order to carry on the War againſt *France*.

In 1702, the Duke of *Anjou* ſent his Majeſty a Letter by a Gentleman, to notify his Marriage with a Daughter of the Duke of *Savoy*; to which King *William* return'd no Anſwer, and ſent the Meſſenger away. His Majeſty, whoſe bad State of Health we formerly took Notice of, being eas'd of his Aſthma, (with which he had been troubled moſt part of his Time) by vomiting at Sea when he came from *Holland*, did afterwards go a hunting for his Diverſion; but his Horſe falling, the Clavicula of his Neck was put out, but ſet again immediately; ſo that he found himſelf in a Condition to diſpatch publick Affairs, and ſeem'd to recover; but dy'd of a Fever the 8th of *March*, to the great Regret of the whole Confederates, and particularly of *Great Britain* and *Holland*, which he had ſav'd from Popery and Tyranny. Thus fell that great Man, the laſt of the Houſe of *Orange*, who, contrary to all Expectation, was rais'd by Heaven to do ſuch mighty Things. The *Atlas* gives him this Character, That he was a Prince of extraordinary Endowments, of a ſolid and piercing Judgment, of a ſuperior Genius, and invincible Courage. His Patience, Evenneſs of Temper, and Firmneſs of Mind, were Proof againſt all Attacks. He was ſober, vigilant, wiſe in Counſel, valiant in Arms, and ſo indefatigable, notwithſtanding the Weakneſs of his Conſtitution, that he continually apply'd himſelf to publick Affairs. He was always an Enemy to Diviſions, ſtudy'd the Peace of his Subjects among themſelves, was ready to forget Injuries, and as much contemn'd Flattery and vain Glory, as he purſu'd what was ſolid and true; nor was he ever diverted by Plea-

Digitized by Google

Pleaſures or Grandeur from the Love that he bore to his Country and his Subjects. This, with what we have formerly quoted from Sir *William Temple*, may ſerve to give the World a brief View of that Prince's Character, and makes it appear truly great both in Adverſity and Proſperity. Tho' to ſay he had no Failings, both as a private Man and a Prince, were a mean Piece of Flattery, and to make him more than a Man. By his Will, he left Prince *William* of *Naſſau*, Hereditary Governor of *Frieſland*, his univerſal Heir.

After his Death, the States confirmed their Alliance with his Succeſſor Queen *Anne*, and their other Confederates. The *French* King, whom he had made to tremble when alive, inſulted him in a Memorial preſented to the States by his Reſident after his Death, wherein he had this Expreſſion, *That being reſtor'd to themſelves, they would now be govern'd by their own Spirit.* To which they reply'd, " That their Repub-" lick was always animated by the ſame " Spirit; and that the Counſels of his *Bri-*" *tiſh* Majeſty were ever directed to their " Welfare, and the Preſervation of their " Liberty.

Tho' the War betwixt the Confederates and the *French* King was not then formally declar'd, it was continued in *Italy* in the Emperor's Name, where Prince *Eugene* made a ſurprizing Progreſs, notwithſtanding thoſe Difficulties, which to another would have been unſurmountable. The Elector of *Bavaria* having return'd to his own Dominions, embroil'd the Empire. Upon which, at the Emperor's Sollicitation, the *Engliſh* and *Dutch* declar'd War againſt *France* on one and the ſame Day. General *Coehorn* open'd the Campaign in the *Netherlands* by taking Fort St. *Dona*, and bombarding Fort *Iſabella*; and Count *Tilly* advanc'd with his Army to *Santen*, to cover the Siege of *Keyſerſwaert*, which proved one of the moſt bloody that happen'd during this War; but was at laſt reduc'd by the Allies. At the ſame Time the *French* under the Duke of *Burgundy* attempted to ſurpriſe *Nimeguen*, which they had well nigh effected; but were prevented by the Diligence of the Earl of *Athlone*. The *French* were alſo beat off from before *Huiſt*; and the Earl of *Marlborough*, now Duke, obliged the *French* to retire on the *Maes*, and took Fort St. *Michael*, *Stochem*, *Venlo*, *Stevenſwaert*, *Ruremond*, and *Liege*, in a little Time.

In 1703, the *Engliſh* and *Dutch* miſcarried in their Deſign upon *Cadiz*, but took the *Spaniſh* Galleons at *Vigo*, where they ruin'd Part of the *French* Fleet. In this Expedition, the Duke of *Ormond* and the late Sir *George Rooke* behav'd themſelves with great Gallantry. This Year the Allies took *Bonne*, forc'd the *French* Lines in the Country of *Waes*, but could not bring them to a Battle, they were ſo ſtrongly intrench'd. They endeavour'd to ſurpriſe the Allies at the Battle of *Eckeren*, which was bravely fought on both Sides, and almoſt with equal Loſs; but tho' the *French* were ſuperior in Number, the Allies kept the Field, and both Sides claim'd the Victory. The Duke of *Marlborough* took *Huy* and *Limburg*. *Gelders* and *Rhinberg* were alſo ſurrender'd to the Allies: And this Year the Archduke *Charles* being own'd as King of *Spain* by *England* and *Holland*, he viſited both thoſe Countries in his Way to *Spain*, whither he was conducted by the Confederate Fleet. The Death of the Earl of *Athlone*, and of the famous General and Engineer *Coehorn*, this Year, was a great Loſs to the States.

In 1704, the Duke of *Marlborough*, with Part of the *Engliſh* and *Dutch* Army, march'd from *Flanders* to the *Danube*, and fought the famous Battle of *Hochſtet*; of which we have already given an Account. Several Attempts were made to force the *French* Lines in *Flanders*, without Succeſs; but the *Dutch* took Fort *Iſabella* in *Flanders*, rais'd Contributions in the Enemy's Country, and fore'd *Bruges* to pay a conſiderable Sum to avoid a Bombardment.

In 1705, the States, in Conjunction with the Queen of *Great Britain*, preſſed the Emperor to take more Care of puſhing on the War upon the *Upper Rhine*, and to accommodate the Troubles in *Hungary*, and not leave the Burden of the War againſt *France* upon the *Engliſh* and *Dutch*, which produc'd large Promiſes, but faint Performances, from the Court of *Vienna* in both Reſpects. The *Engliſh* and *Dutch* under Sir *John Leak* defeated *Pointi* and the *French* Squadron, who came with freſh Supplies to the *French* and *Spaniards* that beſieg'd *Gibraltar*. The *French* took *Huy*, while the *Engliſh* and *Dutch*, by

Digitized by Google

by the Slowneſs of the Imperialiſts, miſcarried in their Deſigns upon the *Moſelle*; ſo that the Duke of *Marlborough* was oblig'd, at the Deſire of the States, to return with the Confederate Army to the *Netherlands*, where they retook *Huy*, and forc'd the *French* Lines near *Hilleſheim* in *Flanders*, deſtroy'd almoſt 24 Squadrons of *Bavarians*, with 3 Regiments of *French*, and took many great and inferior Officers, with about 1400 Men, and ſeveral Colours and Standards. Baron *Spar*, with a Detachment of the *Dutch* Army, forc'd the *French* Lines at *Lovendegem* near *Bruges*, and took 300 Men, with ſeveral Officers. After which the Confederates finiſh'd the demoliſhing of the *French* Lines, and took *Soutleuwe* and *Santvliet*, whilſt the *French* took *Dixſt*. The Confederates under the Conduct of the Earl of *Peterborough* took *Barcelona*, the Capital of *Catalonia*, wherein the *Engliſh* and *Dutch* were particularly ſerviceable: But we refer the Particulars till we come to the Deſcription of that Country.

In 1706, the *French* attack'd *Barcelona*, where the *Engliſh* and *Dutch* Troops made a brave Defence, and their Fleets contributed to the Relief of the Town; but we leave the Particulars to its proper Place. This Year was fought the Battle of *Rommelies* in *Flanders*, under the Conduct of the Duke of *Marlborough* and General *Auverquerque*, where the *Dutch* Troops, and particularly the *Scots* in their Service, diſtinguiſh'd themſelves with extraordinary Gallantry. The Heat of the Action being on the Left, where the *Dutch* were poſted, the Duke of *Marlborough*, as he brought up the Horſe of the Right to their Aſſiſtance, rallied ſome of the Troops, and gave others Orders to charge, was ſingled out by ſome of the Enemy, and being diſmounted, was in Danger of being kill'd or taken, had not Major-General *Murray*, the Duke of *Argile*, and others, come ſeaſonably up to his Reſcue, and repulſed the Enemy. While the Duke was remounting, Colonel *Brinfield*, his Gentleman of the Horſe, was killed with a Cannon-Bullet. By this time the *French* Horſe on the Right being entirely defeated, our Horſe broke their Foot, and the Lord *John Hay*, with his Regiment of *Scots* Dragoons, took the *French* King's own Regiment of Foot Priſoners of War, and made them ſurrender their Colours and Arms. The Purſuit continued all Night; and General *Auverquerque* following them with his *Dutch* Troops, took above 4000 of 'em, with about 80 Colours and Standards, moſt of their Artillery, Carriage, Baggage and Arms, with the Kettle-Drums and Standards of the Troops of the *French* King's Houſhold. The *French* were ſuppoſed to have loſt 8000 Men on the Field of Battle, and had about 6000 taken, among whom were two Major-Generals, two Brigadier-Generals, a Son of the Marſhal *de Tallard*, a Nephew of the late Duke of *Luxemburg*, with other Officers of Diſtinction; and two Princes in their Service were killed. The Allies had 1066 Men killed, and 2577 wounded: The chief of thoſe killed were, Prince *Lewis* of *Heſſe-Caſſel*, 1 Count, and 8 Colonels. The Deputies of the States, in their Letter to the States General, aſcribed the Glory of this Victory, chiefly under God, to the Courage and Conduct of the Duke of *Marlborough* and the Lord *Auverquerque*, who animated the other Generals and Officers of the Army, who all, without Exception of any Nation whatever, attack'd the Enemy with the utmoſt Bravery and Unanimity. The *French* after this Battle abandon'd *Louvain*, and retir'd over the Canal of *Bruſſels*, being purſu'd by the Allies: Upon which the City of *Bruſſels*, the States of *Brabant*, and the Towns of *Mechlen* and *Aloſt*, ſubmitted to K. *Charles*. *Ghent*, *Bruges*, *Audenard*, and *Antwerp*, follow'd their Example; and the States of *Flanders* own'd K. *Charles*. General *Churchill* was made Governor of *Bruſſels*, and all the *French* were order'd to depart the City. K. *Charles* was alſo ſucceſsful in *Spain*. The Earl of *Galway*, with the *Portugueze* and other Confederates, came to *Madrid*: *Carthagena* ſubmitted. The *French* this Year beſieg'd *Turin*, where the Duke of *Savoy* commanded in Perſon, having been oblig'd to ſend his Mother, his Dutcheſs, and the reſt of his Family, to *Genoa*; from whence the two Dutcheſſes ſent a Repreſentation of their Diſtreſs to the States General, with a Deſire that they would uſe their utmoſt Endeavours to contribute to their Relief. The Miniſters of *England* and *Holland* endeavour'd an Accommodation betwixt the Emperor and *Hungarian* Malecontents, without Succeſs, which they charged upon the Imperial Generals and Miniſters. Prince *Ragotzki* writ after this

Digitized by Google

this to the Queen of *Great Britain* and the States, thanking them for their Mediation, and gave them an Account, that he was willing to have ſurrender'd his own Dignity for the Sake of Peace, and deſir'd the Continuance of their good Offices to procure it, which hitherto have had no Effect. This Year the *Engliſh* and *Dutch* laid Siege to *Oſtend*, and in a little Time obliged the Garriſon to ſurrender on Terms, which was very extraordinary, conſidering how ſtrong that Town is both by Art and the Nature of its Situation, and that the *Dutch* formerly held it out above 3 Years againſt the great *Spaniſh* General *Spinola*. The Town of *Menin* in *French Flanders* was alſo ſurrender'd to the *Dutch*, while the D. of *Marlborough* cover'd the Siege, in which the *French* loſt 1300 Men, and the Allies about 517. Soon after the D. of *Savoy* and Prince *Eugene* defeated the *French* before *Turin*, and relieved that City, wherein the *Dutch* Troops behav'd themſelves with great Gallantry, as was own'd by both thoſe Princes in their Letters to the States: But we refer the Particulars, and the further Progreſs of the Imperialiſts in *Italy*, to its proper Place; as we do the Loſs which the *Dutch* Troops under the Prince of *Heſſe* ſuſtain'd ſome Time after at the Battle of *Medoli* in *Italy*. King *Auguſtus*'s Miniſter preſented a Memorial to the States, and deſir'd that they and the Queen of *Great Britain* would oblige the K. of *Sweden* to withdraw from *Saxony*, by invading his Dominions on the *Baltick*. *Dendermond* ſurrender'd on Terms to the D. of *Marlborough*; and the Confederates retook *Salamanca* in *Spain*, wherein the *Engliſh* and *Dutch* aſſiſted; and their Fleet at the ſame time reduc'd *Ivica* and *Majorca* to K. *Charles*'s Obedience. After this, General *Auverquerque* took *Aeth*, and made the Garriſon Priſoners of War. The Elector of *Bavaria* made Propoſals of Peace on the Behalf of *France*; but they were rejected by the Queen and the States.

In 1707, the *Dutch* ſent a Squadron to *Portugal*, with Recruits for their Forces; and K. *Auguſtus* of *Poland* being driven from thence by the K. of *Sweden*, who invaded him in his own Country, and forc'd him by a Treaty to renounce the Crown of *Poland*, deſir'd the States to be Guarantees in the Treaty betwixt him and the K. of *Sweden*; but the States were cautious in concerning themſelves with that Matter. This Year the Allies were defeated at the Battle of *Almanza* in *Spain*, where the *Engliſh* and *Dutch* Troops ſuffered very much. The *Dutch* Envoy in *Portugal*, the Count *de Noyelles*, and other *Dutch* Officers, complain'd in their Letters of the Earl of *Galway*'s Conduct in that fatal Battle: But we refer the Particulars to the Deſcription of that Country. The *French* made an Irruption into *Germany*, and forc'd the Lines of *Stolhoffen*, where the *Dutch* Troops under the D. of *Wirtemberg* made a brave and a noble Retreat, tho' overpower'd by the Enemy. The States and the *Engliſh* did this Year extend their Charity to the *Vaudois*, who had been forc'd to abandon their own Country, and were reduc'd to great Straits by the *French* Army. This Year the Siege of *Toulon* was form'd, wherein the *Engliſh* and *Dutch* bore a great Share: But we refer the Particulars, and how it came to miſcarry, to its proper Place. The States publiſh'd an Order againſt the negotiating of *French* Mint-Bills in their Country, to prevent the *French* King's drawing out their ready Money for thoſe Bills, which had loſt their Credit at home: And at the ſame Time they forbad the conveying of ready Money or Plate out of their Dominions. The Republick of *Genoa* made Application to the States for continuing a good Correſpondence with them, which was agreed to. This Year the States concern'd themſelves in the Election of the Biſhop of *Paderborn* to be Biſhop of *Munſter*, and carried it, after ſome Oppoſition made by the Imperial Court. They did likewiſe, in Conjunction with the *Engliſh*, and others of the Allies, promote the K. of *Pruſſia*'s Succeſſion to the Principality of *Neufchattel* and the County of *Vallengin*, in Oppoſition to the Prince of *Conti* and others, Pretenders ſet up by the *French* King. They made alſo ſeveral preſſing Inſtances to the Diet of the Empire for carrying on the War with more Vigour on the Part of the *Germans* againſt *France*. They did the like to the Court of *Vienna*, and join'd with the *Engliſh*, in deſiring that Prince *Eugene* might be ſent to command in *Catalonia*, in order to retrieve the Affairs of *Spain*; but without Effect.

In

In 1708, they renewed thoſe Inſtances; and the *Engliſh* and *Dutch* Squadron under the Command of Sir *John Leak* and the Baron *de Waſſenaer* took a *French* Convoy in the *Mediterranean*. This Year *Ghent* and *Bruges* were treacherouſly ſurrender'd to the *French*, which brought on the Battle of *Audenard*, where the *French* were defeated, loſt above 4000 Men in the Field, and had 8000 taken, with a Lieutenant-General, 4 Major-Generals, 5 Brigadiers, 14 Colonels, 6 Lieutenants, 96 Cornets, 186 Gens-d'Armes, and 47 Quartermaſters. The whole of their Officers that were taken amounting to 750. The Confederates loſt a Major-General, 2 Colonels, 1 Lieutenant-Colonel, 42 other Officers, and about 1000 Centinels. The Electoral Prince of *Hanover* diſtinguiſh'd himſelf in this Action. The *French* afterwards retir'd to *Ghent*, and the D. of *Marlborough*, Pr. *Eugene*, and General *Auverquerque*, ſent a Detachment, who demoliſhed the *French* Lines in *Flanders*, and laid the *French* Country under Contribution as far as *Arras*, and a great way into *Picardy*. The *French* in the mean time poſted themſelves on the Canal of *Bruges*, took the Fort of *Plaſſendal* near *Oſtend*, and made Incurſions into the *Dutch* Territories. At the ſame time the Allies form'd the Siege of *Liſle*, and the *French* Army march'd to raiſe it, without Effect. Prince *Eugene* was dangerouſly wounded in one of the Attacks, and the *French* threw in a Supply of Powder into the Town, which, with the Miſtake of one of our Engineers, did very much retard the Siege; and the *French* having ſtopp'd the Paſſage of the Confederate Convoys from *Oſtend* and other Places, the Allies were reduc'd to Straits. This brought on the Battle of *Winnendal*, where the Confederates, by the admirable Conduct of Major-General *Webb*, with 7000 Men, defeated 24000 *French*, who loſt above 4000 Men, and retired in Confuſion, which gave an Opportunity to a Confederate Convoy to reach our Army before *Liſle*. The Allies did not loſe above 1000 Men in this Expedition, and the Arrival of the Convoy enabled them to proſecute the Siege of *Liſle*, which brought the Marſhal *de Boufflers* to a Capitulation. The Loſs of the *French* in this Siege was computed to be about 7000, and that of the Allies about 9000. The *French* after this took the Poſt of *Leffinge*, with 150 Men, but loſt near 600 in the Action; and they ſurpris'd the Lord *Stairs* near *Furnes*, with ſome *Pruſſian* Squadrons and Battalions, whom, after a ſharp Diſpute, they obliged to ſurrender Priſoners of War. After this, the E. of *Bavaria*, with 10000 Men, having form'd a Correſpondence in *Bruſſels*, attack'd that City, and had well nigh carried it; but was bravely repulſed by the Conduct of the Governor Monſieur *Paſcal*, Major-General *Murray*, Baron *Wrangel*, and others, who were very much animated by the Preſence of the Deputies of the States General. The D. of *Marlborough* and Pr. *Eugene* hearing of the Danger of *Bruſſels*, march'd to its Relief, and paſſed the *Scheld*, notwithſtanding the ſtrong Lines and Intrenchments which the *French* had rais'd to prevent it; but were obliged to abandon them, with the Loſs of Part of their Baggage, Bread-Waggons, ſeveral Colours, Standards, and Kettle-Drums, and about 1000 Men killed or taken. In the mean time the Siege of the Citadel of *Liſle* was carried on with Vigour, and forc'd by Pr. *Eugene* to capitulate, where they left 90 Braſs Cannon, with many of Iron, and 20000 Weight of Powder, but little Proviſions. Thus this great and important City, with the Citadel, being reckoned one of the ſtrongeſt and moſt regular Fortifications in *Europe*, fell into the Hands of the Allies. After which the Confederates beſieg'd *Ghent*, which they forc'd to ſurrender in a little Time; and the *French* did hereupon abandon *Bruges*, *Plaſſendal*, and *Leffinge*, and retir'd into their own Territories, which brought the Campaign to a glorious Concluſion. After this, the Council of State of the United *Netherlands* preſented their Petition in the uſual Form to the States General, recapitulating the Advantages which it had pleaſed God to give to the Confederate Arms in the *Netherlands*, *Italy*, and the *Mediterranean*; towards which, the *Dutch* Forces by Sea and Land had very much contributed: And in this Petition, they laid before them ſuch Meaſures as they judged neceſſary for bringing the War to a happy Concluſion by a firm and a laſting Peace. On this Occaſion they put the States in Mind of the Treachery of *France* in all their Treaties ſince that of *Munſter*:

And

Digitized by Google

and concluded, That the Memory of this War, and the Animosities conceiv'd by the French against the Republick, for having oppos'd their Encroachments, were not immediately to be extinguish'd by a Treaty of Peace, as was plain from their former Conduct, since they founded the War of 1672 on the Measures the States had taken before to prevent their seizing the *Spanish* Provinces in the *Netherlands*, as they have since done, their keeping Possession of the whole Monarchy of *Spain*; besides, the Hatred that the *French* bear to them on the Account of the Protestant Religion, which that Court had design'd to extirpate every where; and therefore 'twas their Opinion, that no other Peace with *France* but a sure one was to be admitted. The *French* during the Winter endeavour'd to bring the *Dutch* and others of the Allies to a separate Peace by large Concessions; but finding it in vain, they obtained Leave to send Deputies to *Holland*, and at last their Minister of State the Marquis *de Torcy*, with further Propolals for a General Peace, in the Beginning of 1709, where the well known Preliminaries, according to the Demands of the Allies, were concluded and sign'd by the Confederate Plenipotentiaries, and those of the French King, the 28th of *May*, 1709: But being afterwards rejected by the *French* King, it occasioned the renewing of the War.

Their GOVERNMENT.

WE have formerly taken Notice, That the Basis of their United Government is the Union of *Utrecht*, whence Sir *William Temple* justly observes, that it cannot properly be call'd a Commonwealth, but rather a Confederacy of 7 Sovereign Provinces for their mutual Defence, without any Dependancy upon the other as to their particular Government. Each of the Provinces is likewise composed of many little States or Cities, which have several Marks of Sovereign Power within themselves, and are not subject to the Sovereignty of their Provinces, not being concluded in many Things by the Majority, but only by the universal Concurrence of Voices in the Provincial States. For, as the States General cannot make War or Peace, new Alliances, or levy Money, without the Consent of every Province; the States Provincial cannot conclude any of those Points without Consent of each of the Cities that has a Voice in their Assembly. And tho' in many Civil Causes there's an Appeal from the Courts of the Cities to that of the Province, in Criminal there's none; nor can the Sovereignty of the Province exercise any Judicature, seize upon any Offender, pardon any Offence within the Jurisdiction of the Cities, or execute any common Resolution or Law, but by the Justice and Officers of the City it self: So that each City has a Power of Justice, of levying Money, and of making Peace and War; but the Coining of Money is in the Generality of the Union, by common Agreement; so that the principal Ingredients in the Composition of this State, are the Freedom of the Cities, the Sovereignty of the Provinces, and the Articles of the General Union; to which we may add the Authority and Dignity of their Stadtholder, when they have one.

The States General,

IN whom resides the Sovereign Authority of the United Provinces, assemble at the *Hague*. Each of the Provinces send their Deputies hither, in what Number they please; yet the Deputies of each Province have but one Voice, and the Deputies of the respective Provinces preside by Turns every Week. 'Tis this Assembly which declares War, makes Peace, and gives Audience to Foreign Ministers. The States of *Guelderland* have the first Voice, the States of *Holland* the 2d, *Zealand* the 3d, *Utrecht* the 4th, *Friesland* the 5th, *Overissel* the 6th, and *Groningen* the 7th. Sir *William* observes, That the States General us'd formerly to be assembled on extraordinary Occasions by the Council of State, who call'd them but seldom, because they usually consisted of above 800 Persons, which made the Debates long, and sometimes confus'd, the Resolutions slow, and upon sudden Occasions out of Time. In the Absence of the States General, this Council of State represented their Authority, executed their Resolves,

Digitized by Google

and judged of the Neceſſity of a new Convocation; till after the Earl of *Leiceſter*'s quitting the Government, the Provincial States deſir'd of the General that they might, by their conſtant reſpective Deputies, continue their Aſſemblies under the Name of, *The States General*, which were never after aſſembled but at *Bergenopzoom*, for ratifying with more Solemnity their Truce with *Spain*. The Reaſon they alleg'd was this, That the Council of State aſſembled them but ſeldom, and at Will; and being to execute all in their Abſence, they aſſum'd too much Authority: But their weightieſt Reaſon was, That the *Engliſh* Ambaſſador, who, by Agreement with Queen *Elizabeth*, had a conſtant Place in their Council of State, ſhould not be preſent at the firſt Digeſtion of their Affairs, which was then uſually agreed upon in the Council of State. Since that Time, the States General have conſtantly ſat in the Court at the *Hague*, being indeed but a Repreſentative of the States General, whoſe Aſſemblies are now wholly diſus'd. Neither Stadtholder, Governor, or any Perſon in Military Charge, has Seſſion in the States General; and as every Province preſides in their Week by Turns, the moſt qualified Perſon among the Deputies of that Province is choſen for Preſident, and ſits in an Arm'd Chair, at the Middle of a long Table, capable of holding about 30 Perſons, which is the uſual Number of this Council. The *Greffier* or Secretary ſits at the lower End. When a Foreign Miniſter has Audience, he is ſeated at the Middle of the Table, over againſt the Preſident, who propoſes all Matters, makes the Greffier read all Papers, puts the Queſtion, calls the Votes, and forms the Concluſion: Or if he refuſes to conclude according to the Plurality, he is obliged to reſign his Place to the Preſident of the following Week, who concludes for him. This is the Method in all Affairs, except in Caſes of Peace and War, Foreign Alliances, raiſing or coining of Monies, or of the Privileges of each Province or Member of the Union: In all which, the whole Provinces muſt concur; for in thoſe Caſes, Plurality is not weigh'd. This Council, as Sir *William* obſerves, tho' they are ſaid to be Sovereign, only repreſents the Sovereignty; and therefore, tho' Ambaſſadors are both received and ſent in their Name, yet neither are their own choſen, nor Foreign Miniſters anſwer'd, nor any of the above-mention'd Affairs reſolv'd, without conſulting firſt the States of each Province by their reſpective Deputies, and receiving Orders from them; and in other important Matters, tho decided by Plurality, they frequently conſult with the Council of State. This Method has never been broken, ſays Sir *William*, ſince the Foundation of their Republick, except in 1668, when he himſelf being ſent by our K. *Charles* II. to conclude a League of Defence with the States, and another for the Preſervation of *Flanders*, then invaded, and much of it conquer'd by *France*, he prevailed with the States General to conclude 3 Treaties in 5 Days, without having Recourſe to the Provinces, who muſt likewiſe have conſulted their ſeveral Cities, where the Foreign Miniſters who oppos'd thoſe Treaties could not have fail'd to have prevented 'em, ſince the engaging the Voice of any one City muſt have outdone it. He owns, that the States General endanger'd their Heads by this Step, had they been diſown'd in it by their Provinces; but being unanimous, and knowing it to be the Intereſt of their Country, they ventur'd it, for which they were applauded by every Province, having thereby changed the Face of the Affairs of *Chriſtendom*, and laid the Foundation of the Triple Alliance, and the Peace of *Aix la Chapelle*, which at that time broke the *French* King's Meaſures. So great, ſays he, has the Force of Reaſon and Intereſt ever proved in this State, whoſe Safety and Greatneſs has been chiefly founded upon the ſtrict Obſervance of their Conſtitution; tho' being overpower'd by the ſupreme Law of Neceſſity, they diſpens'd with it in this Inſtance. Nor have they, ſays he, ever us'd any greater Means to unite the Members of their Union in neceſſary Reſolutions, upon the moſt preſſing Occaſions, but by ſending ſome of their ableſt Members to repreſent to the diſſenting Provinces their Reaſons, and the Intereſt by which they have been indue'd to this or that Reſolution.

The

The Council *of* State,

IS compoſed of one Deputy from *Guelderland*, ſays the *Atlas Hiſtorique*, three from *Holland*, two from *Zealand*, one from *Utrecht*, two from *Frieſland*, one from *Overiſſel*, and one from *Groningen*, which differs from what it was in Sir *William*'s Time, when *Guelderland* and *Utrecht* ſent two each, and *Frieſland* but one. The Reaſon of which is, That upon the Re-admiſſion of the Provinces conquer'd by *France* into the Union in 1674, the States General took one of the Votes from the Province of *Guelderland*, and gave it to *Groningen*, for the noble Defence which that City made againſt the Biſhop of *Munſter*, ſays the 4th Volume of *Pitt*'s *Atlas*. But ſince the *Atlas Hiſtorique* makes the Number of this Council but 11, ſome other Alteration muſt have been made ſince that Time. In 1650, the Provinces of *Utrecht*, *Overiſſel*, and *Groningen*, pleaded for more Deputies in this Council; but 'twas oppoſed by *Holland*, which then in a manner govern'd all the reſt, and was upbraided by thoſe of *Guelderland*, as deſigning to enſlave them. The Majority of Votes carries it in this Council, and every Deputy preſides by Turns. In this Council the Governors of the Provinces have a deciſive, and the Treaſurer-General only a deliberative Voice; yet he has much Credit, becauſe his Place is for Life. So is the Perſon deputed from the Nobles of *Holland*, and the Deputies of *Zealand*; whereas the reſt are but for two, three, or 4 Years. This Council of State executes the Reſolves of the States General, conſults and propoſes to them the moſt expedient Ways of raiſing Troops and Money, and the Proportion of both, ſuperintend the Troops, Fortifications, Contributions rais'd out of the Enemy's Country, the Forms and Diſpoſal of all Paſſports, and the Affairs, Revenues, and Government, of all the Places conquer'd ſince the Union; which being gain'd by the common Arms of the State, depend upon the States General, and not upon any particular Province. Towards the End of every Year, this Council forms a State of the Expence they think neceſſary for the enſuing Year, preſent it to the States General, and deſire them to demand ſo much of the States Provincial, to be raiſed according to the uſual Proportions, which are of 100000 Gilders.

Groningen, and the *Omlands*,	8	00	00

This Petition, as 'tis called, is made to the States General in Name of the Governor and Council of State; and every Province raiſes what Money, and by what Means, they pleaſe, ſend their Quota to the Receiver-General, and convert the reſt to the preſent Uſe, or reſerve it for the future Occaſions of the Province. The Council of State diſpoſes of all Money deſign'd for extraordinary Affairs, and gives Orders for the whole Expence of the State, according to the Reſolves of the States General; and theſe Orders muſt be ſign'd by 3 Deputies of ſeveral Provinces, as well as by the Treaſurer-General, and regiſtred in the Chamber of Accounts, before the Receiver-General pays them, which is then done without any Charge or Delay.

The Chamber of Accounts,

WAS, according to Sir *William*, erected about 90 Years ago, for the Eaſe of the Council of State, to examine and ſtate all the Accounts of the ſeveral Receivers, to controul and regiſter the Orders of the

Digitized by Google

Council of State, which disposes of the Finances; and this Chamber is composed of two Deputies from each Province, who are changed every three Years.

The Council of the Admiralty,

IS subdivided into 5 Colleges, of which 3 are in *Holland, viz.* one at *Amsterdam*, one at *Rotterdam*, and one at *Horn*. The 4th is at *Middleburg* in *Zealand*, and the 5th at *Harlingen* in *Friesland*. Each of these Colleges is composed of 7 Deputies, 4 of that Province where the College resides, and 3 nam'd by the other Provinces. The Admiral, or in his Absence the Vice-Admiral, has Session in all these Colleges, and presides when he is present. As soon as the Number and Force of the Fleets design'd for any Expedition is agreed by the States General, and given out by the Council of State to the Admiralty, each particular College furnishes their Proportion, which is as well known as that of the Money each Province is to raise. In all which, the Admiral has no other Share or Advantage besides his Salary, and Proportion of Prizes. The Captains and Superior Officers of each Squadron are chosen by the several Colleges, who appoint the Number of Men for every Ship. After this, each Captain uses his best Diligence to get his Number of as good Men as he can, and has the Care of Victualling his Ship for the Time appointed by the Admiralty at so much *per* Head. He likewise takes Care of Medicines; and, according to the Discharge of his Trust, he grows in Credit or otherwise with the Seamen, and according to their Report with the Admiralties, upon whose Esteem the Fortune of all Sea-Officers depends. This occasions an Emulation among the Captains who shall treat their Seamen best, instead of filling their own Purses by starving their Men, or giving them bad Diet. This Council of the Admiralty has Cognizance of all Crimes committed at Sea, judge Pirates, and all Frauds or Neglects in paying or collecting the Customs, which are appropriated to the Admiralty; and if not sufficient in Time of War, is otherwise supplied by the States: But in Time of Peace, when they are at little other Expence, except for Convoys, the Overplus is applied to the building of Men of War, and laying up Naval Stores. So much for their Government in general. For the particular Government of their Provinces and Cities, we shall instance in that of the Province of *Holland*, and City of *Amsterdam*.

The Government of the Province of Holland.

THE Sovereignty of this Province is represented by Deputies of the Nobles and Towns, consisting of 19 Votes, of which the Nobles have only the first, and the Cities 18, according to the Number of those call'd *Stemmt*, the other Cities and Towns having no Voice. These Cities were originally but 6, *viz. Dort, Haerlem, Delft, Leyden, Amsterdam*, and *Tergou*; but Prince *William* of *Nassau* added 12 more, *viz. Rotterdam, Gercum, Schiedam, Schenkoven, Brille, Alcmaer, Horn, Enchusen, Edam, Monickendam, Medenblick*, and *Purmeren*. The latter of which, being a very small Town, has an equal Voice in the Provincial States with *Amsterdam*, which pays almost half the Charge of the whole Province; as the Province of *Overissel* has an equal Voice in the States General with *Holland*, which bears more than half the Charge of the Union. This is ascrib'd to the Policy of Prince *William* I. to lessen the Power of the Nobles, and ballance that of the greater Cities by the Voices of the smaller, which were more easy to be gain'd. The *Atlas Historique* leaves out *Tergou* among the Towns that send Deputies; and instead of it, places *Gouda*. The Nobles, tho' few in this Province, send 8 or 9 to the Provincial States; and when one dies, chuse another to succeed; and tho' they have all but one Voice, yet they are very considerable in the Government, being possess'd of the best Charges, Civil and Military, and having the Direction of all the Ecclesiastical Revenue that was seiz'd by the State upon the Change of Religion. They likewise send Deputies to all the Councils both of the Generality and Province, and have the Nomination of one Counsellor in the two great Courts of Justice. They have the first

firſt Vote in the Aſſembly of the States, which gives them a great Weight in the Buſineſs under Conſultation. The Penſioner of *Holland* ſits with them, delivers their Vote, and aſſiſts at their Deliberations before they come to the Aſſembly; and thô he be but Servant to the Province, and ſits behind all their Deputies, yet he has always great Credit, becauſe he is ſeldom chang'd; tho' they have a Power to chuſe another, or continue him every 5th Year. He has Place in all the Aſſemblies of the Province, propoſes all Affairs, gathers their Votes, forms their Reſolves, and pretends to have Power not to conclude any important Affair by Plurality of Voices, if he think in his Conſcience that he ought not to do it, or that it will be prejudicial to the Province. He is likewiſe one of their conſtant Deputies in the States General.

The Deputies of the Cities are choſen out of the Magiſtrates and Senate of each Town, in what Number they pleaſe. They have altogether but one Voice, are maintain'd at the Charge of the Cities; and one of their Burgomaſters, with the Penſionary, are uſually of the Number. The States of *Holland* meet in the Court at the *Hague* in *February*, *June*, *September*, and *November*, every Year. In the former Seſſions, they fill up vacant Charges, renew the Farms of the Taxes, conſult about the common Affairs of the Province, and determine particular Differences that may happen betwixt Towns. In *November*, they meet about their Quota agreed upon by the States General for the Support of the Union the following Year. On extraordinary Occaſions, they are aſſembled by a Council called the *Gecommitteerde Raden*, or Commiſſion Counſellors, who are properly a Council of State for the Province, compoſed of one Deputy from the Nobles, one from each of the 8 chief Towns, and one from 3 of the ſmaller Towns; each of which chuſe a Deputy by Turns. This Council ſits conſtantly at the *Hague*, propoſes Matters to the Provincial States at their extraordinary Aſſemblies, and execute their Reſolves. In theſe Aſſemblies they muſt all be unanimous; but aiming all at the common Good, they generally agree in what, after reaſoning, appears to be their common Intereſt. When they come to a Reſolve, they ſend ſome of their Number to their reſpective Towns, with their Concluſions and Reaſons, and deſire Orders about it, which is generally granted: But if the Matter be intricate, and requires Delay, they adjourn till ſuch Time as the Deputies can go to their reſpective Cities, and obtain their Conſent.

The Province has likewiſe a Chamber of Accounts, who manage their Revenues, and have the abſolute Diſpoſal of the ancient Demeſne of *Holland*, without accounting to the States; only upon a Neceſſity of Money, the States call upon them for a Subſidy of 2 or 300000 Crowns, or more, as they have occaſion, or conceive the Chamber to be grown rich, beyond what is proportion'd to the general Deſign of increaſing the Eaſe and Fortunes of the Perſons that compoſe it, who are ſuch as have grown aged in their Service, and paſſed through moſt of the Employments of State with Reputation: This being provided for them as an honourable and profitable Retreat.

The Provinces of *Holland* and *Zealand*, as they had one Governor before their Revolt from *Spain*, have one common Judicature exercis'd by two Courts of Juſtice; each of them common to both the Provinces. The firſt conſiſts of 9 Counſellors from *Holland*, and 3 from *Zealand*, in which the Governor, by the old Conſtitution, us'd to preſide, and to name all the Counſellors except one, who is choſen by the Nobles. There lies no Appeal from them in Criminal Cauſes; but in Civil there does, to the other Court called the *High Council*; from which there is no Appeal, but by Petition to the States of the Province for a Reviſion. When the States think there's Reaſon for it, they grant Letters Patents, in which they name ſome Syndics out of the Towns, who being added to the Counſellors of the two former Courts, judge the Cauſe in the laſt Reſort.

The Government of the Province of Guelderland.

AGrees in general with that of *Holland*; but differs in this, that 'tis divided into the 3 Quarters of the *Betuwe*, the County of *Zutphen*, and the *Veluwe*; each of which

Digitized by Google

which have their States, compoſed of the Nobility, and of the Deputies of the Towns, in their ſeveral Juriſdictions; and the Provincial States are compoſed of the Nobility and Deputies of Towns of thoſe 3 Quarters. All the Nobles that have certain Fees or Lordſhips in the Province, have a Voice in the Provincial States, of which they compoſe one half, and the Deputies of the Towns the other; and tho' ſome from among them are deputed to the States General, all the Nobles of *Guelder* may have Place there, if they will attend at their own Charge. The Towns that ſend Deputies to the Provincial States are, *Nimeguen, Tiel, Bommel, Zutphen, Doesburg, Doetekum, Leckum, Grol, Arnheim, Harderwick, Hattem*, and *Dreburg*.

The Government of the Province of Zealand.

THE Nobility here being extinguiſh'd in the *Spaniſh* Wars, the Prince of *Orange* poſſeſſing the Marquiſates of *Fluſhing* and *Terveer*, is the only Nobleman of the Province, and has by himſelf or his Deputy the firſt Place and Vote in the Provincial States, the Council of State, and Chamber of Accounts; and as Sovereign of *Fluſhing* and *Terveer*, he creates the Magiſtrates there, and conſequently diſpoſes the Voices not only of the Nobles, but alſo of 2 Towns; whereas there are but 6 in all that ſend Deputies to the States, and make up the Sovereignty of the Province; the other 4 being *Middleburg, Ziricxee, Goes*, and *Tholen*.

The Government of the Province of Utrecht.

BEſides the Deputies of the Nobles and Towns, 8 Delegates of the Clergy have Seſſion, and make a 3d Member in the States of this Province. Theſe 8 are choſen out of the 4 great Chapters of the Town; the Revenues of which, ſince the Biſhoprick was ſeculariz'd, are poſſeſs'd by Gentlemen of the Province. The Towns that ſend Deputies are, *Utrecht, Amersford, Rhenen, Wyck Te Duurſtede, Montford*, and *Iſelſtein*.

The Government of the Province of Frieſland,

DIffers from the reſt, and is compoſed of 4 Members, *viz.* the Quarter of *Oſtergo*, conſiſting of 11 Bailiwicks; of *Weſtergo*, which has 9; of *Sevenwolden*, that has 10; and of the Towns of the Province, which are 11. Theſe 4 Members ſend each their Deputies to the Provincial States, *viz.* two from every Bailiwick, and two from every Town, who repreſent the Sovereignty of the Province, and conclude all Affairs of what Importance ſoever, without either Recourſe to thoſe who deputed them, or being obliged to know their Intentions, which the Deputies of the other Provinces are ſtrictly obliged to, as we have heard already. They differ likewiſe in this, that whereas in the other Provinces, the Nobles and the Towns chuſe the Deputies which compoſe the States. Here 'tis quite otherwiſe; for every Bailiwick, which is compoſed of a certain Extent of Country, and Number of Villages, from 10 to 20, is govern'd by a *Greetman*, or Bailiff, with a certain Number of Aſſeſſors, who with him determine all Civil Cauſes in the firſt Inſtance, but with Appeal to the Provincial Court of Juſtice. When the States are to be aſſembled, the Bailiff calls together all thoſe who poſſeſs a certain Quantity of Land within his Diſtrict; and theſe Men chuſe, by Plurality of Voices, the Deputies which each Bailiwick ſends to the Aſſembly. This Aſſembly of the States diſpoſes of all vacant Employments, chuſe the 9 Deputies which make a conſtant Council of State for the Province, and likewiſe 12 Counſellors, *viz.* 3 from every Quarter, who compoſe the Court of Juſtice for the Province, and judge of all Civil Cauſes in the laſt Reſort, but of all Criminal from the firſt Inſtance; there being no other Criminal Court in the Province. The Towns that ſend Deputies to the States are, *Leeuwaerden, Dockum, Franeker, Bolſwert, Sneek, Tiſt, Harlingen, Oſtergo, Weſtergo*, and *Sevenwolden*; which are but 10 according to the *Atlas Hiſtorique*, though Sir *William* make them 11.

The

Digitized by Google

The Government of the Province of Overiſſel.

ALL Gentlemen poſſeſs'd of Seigneurial Lands or Lordſhips, have a Seat in the Provincial States; and the Towns of *Deventer*, *Zwol*, and *Kampen*, ſend their Deputies.

The Government of the Province of Groningen.

AS this Province lies on the ſame Tract of Land, they chuſe their Deputies from the Country in the ſame Manner; and the Towns of *Groningen* and *Omlands* ſend their Deputies.

Sir *William* obſerves, That theſe 3 Provinces laſt mentioned, with the Countries betwixt the *Weſer*, the *Iſſel*, and the *Rhine*, were the Seat of the ancient *Friſons*, who under the Name of *Saxons*, becauſe their Swords were made like a Sythe, and by them called *Seaxes*, conquer'd *England*. He ſays, the Biſhop of *Munſter*, whoſe Territories lie in this Tract of Land, gave him the firſt certain Evidences that this was the Seat of our *Saxon* Anceſtors; in which he was confirmed by many Things he obſerv'd in the Hiſtory of thoſe Times, and by the great Affinity that he found betwixt the old *Engliſh*, and the ancient Language of the *Friſons*, whoſe Tongue to this Day has many Words of the ſame Signification and Sound with ours, and differs much from that of the *Hollanders*. He likewiſe obſerv'd many Things in their Conſtitution which looks like the Origine of ours, particularly their Bailiffs or *Greetmen* reſemble our Sheriffs; their Aſſeſſors, our Juſtices; their Provincial Courts, our Quarter-Seſſions; their 4 ſeveral Quarters, our Circuits; and the Compoſition of their States, our Houſe of Commons. To this Original he likewiſe aſcribes, that we never find in *England* upon Record any Lord or Lordſhip that pretends to the Exerciſe of High or Low Juſtice, which ſeems to be a Badge of ſome ancient Sovereignty, thô they be frequent among our Neighbours both in Monarchies and popular States.

The Government of their Cities.

FOR a Specimen of that, we ſhall, according to Promiſe, give an Account of the Government of *Amſterdam*. The Sovereign Authority of this City lies in their Senate of 36 Men, who adminiſter Juſtice according to their ancient Forms, in the Names of Officers and Places of Judicature. They levy Money in what Proportions they pleaſe, according to Occaſion. The Senators are for Life, and were anciently choſen by the Votes of all the Freemen; but to avoid Tumults, becauſe of their Number, about 140 Years ago the Burgers agreed, that they ſhould be choſen by the Senate for the Time being; and when any of 'em dies, the reſt chuſe a new one, which makes their Government a ſort of Oligarchy; and their Example was in a ſhort Time followed by the other Towns of the Province, but with different Numbers, according to their Extent. The Senate chuſes the Deputies which are ſent from the City to the States of *Holland*, and the Burgomaſters and Eſchevins of the Town. The Burgomaſters are 4, 3 of which are choſen Annually, and one of 'em continues two Years, and preſides the firſt 3 Months of the 2d: After which the other three, call'd the Governing Burgomaſters, preſide by Turns. They are choſen by the Majority of thoſe in the Senate, who have been Burgomaſters or Eſchevins. They reſemble our Lord Mayor and Aldermen, repreſent the Dignity of the Government, do the Honour of the City on all Occaſions, diſpoſe of the vacant Offices that fall in their Time, and pay the Money out of the Treaſury for the Occaſions of the City, as they judge neceſſary. They keep the Key of the Bank of *Amſterdam*, and have the Inſpection of it, which is never open'd except one of 'em be preſent. They likewiſe inſpect the Stadthouſe, Fortifications, and publick Buildings. This Office is of the greateſt Truſt, Authority, and Dignity, but not of any great Profit, their Salary being but 500 Gilders a Year each; only it paves the Way to other Employments in the City that are more gainful; and thô they have Officers at their Diſpoſal, worth 5000 Gilders

Digitized by Google

per Annum, they never take any Money for them, becauſe that would ruin their Credit, and prevent their being choſen to other Places of Profit; but they may beſtow Vacancies upon their Friends or Relations if they be capable. They are obliged to no extraordinary Expence in their Habits, Attendants, or Tables; but on all publick Occaſions, are waited on by Men in publick Salary from the Town; and the Charge of whatever Feaſts they make for Princes and Foreign Miniſters, *&c.* is defrayed out of the publick Treaſury, and proportion'd to their own Diſcretion. At other Times, they appear with all the Plainneſs and Modeſty of private Citizens; and when their Time expires, they are of courſe diſpoſed into other beneficial Employments of the Town, except they have loſt their Credit by Miſmanagement. There are 9 Eſchevins, of which 7 are choſen Annually, and 2 of the preceding Year continue. A double Number is nam'd by the Senate, out of which the Burgomaſters now chuſe whom they think fit, as the Prince of *Orange* did in the former Conſtitution. They are Sovereign Judges in all Criminal Cauſes; but in Civil, there lies an Appeal from them to the Court of the Province, if it exceed a certain Sum; yet they pronounce Sentence of Death upon no Man without firſt adviſing with the Burgomaſters, tho' they are not obliged to follow their Opinion; but this is reckon'd a neceſſary Precaution for the Lives of their Subjects, which are ſoon cut off, but never to be retrieved. Under theſe Sovereign Magiſtrates are the Treaſurers, who receive and pay all the publick Money; the *Scout*, who takes Care of the Peace, ſeizes Criminals, and ſees Juſtice executed; ſo that he reſembles our Sheriffs; the Penſioner, who is a Civilian, vers'd in the Cuſtoms, Records, and Privileges of the City; concerning which, he informs the Magiſtrates, vindicates the Privileges of the City, is Servant to the Senate and Burgomaſters, delivers their Meſſages, makes their Harangues on publick Occaſions, and reſembles our Recorder.

The Revenues of this City riſe from the conſtant Exciſe upon all ſorts of Commodities bought and ſold within their Precinct, from the Rents of Houſes or Lands that belong in common to the City; from certain Taxes upon every Houſe for charitable Uſes; Repairs and Ornaments of their Publick Buildings and Fortifications; from extraordinary Levies agreed to by the Senate for their Quota of the publick Charge laid on by the States of the Province, or by the Deputies of the States General, for the Support of the Union: And all theſe Payments are made into the common Stock of the City; ſo that their whole Revenue may be more eaſily calculated. Some compute it at 50000 Gilders *per* Day; and Sir *Wm. Temple* ſays, he has heard it affirm'd, that *Amſterdam* pays above 1600000 *l.* Sterling *per Annum* for the Uſe of the City, the Province and the Union. The Author of *The Hiſtory of the United Provinces* ſays, in 1650, the Exciſe of Beer, Fleſh, and Corn, carried to the Mill at *Amſterdam*, was lett at 1600000 Gilders, without reckoning the Exciſe of Wine, Turf, *&c.* the Taxes upon Houſes, and the Income of Weights, for which there are 3 noble Buildings in different Parts of this City; one of which, before the Stadthouſe, brings in above 100000 Gilders *per Annum*.

The Power of the Stadtholder.

THO' this Office be now extinguiſh'd by the Death of K. *William* in all the other Provinces but *Frieſland*, we ſhall give this brief Account of it from Sir *Wm. Temple*: He had the Command of all Land and Sea Forces as Captain-General and Admiral, with a Diſpoſition of all Military Commands, the Power of pardoning the Penalty of Crimes, the chuſing of Magiſtrates upon the Nomination of the Towns; for they preſented three to him, out of which he choſe one; nor did the States uſe to reſolve any important Matter without his Advice. Beſides, as the States General repreſented the Sovereignty, the Prince repreſented the Dignity of the State by the publick Guards, and the Attendance of all Military Officers, by the Application of all Foreign Miniſters, and all Pretenders at home, by the Splendour of his Court, and the Magnificence of his Expence, ſupported not only by the Penſions and Rights of his ſeveral Charges and Commands, but by a mighty Patrimonial Revenue in Lands, Sovereign Prin-

Digitized by Google

Principalities, and Lordſhips in *France*, *Germany*, *Burgundy*, and ſeveral Parts of the 17 Provinces; ſo as Prince *Henry* was us'd to anſwer ſome that would have flatter'd him into the Deſigns of a more arbitrary Power, that he had as much as any wife Prince would deſire in that State, ſince he wanted none beſides that of puniſhing Men, and raiſing Money; whereas he had rather the Envy of the firſt ſhould lie upon the Forms of the Government; and he knew the other could never be ſupported without the Conſent of the People, to that Degree which was neceſſary for the Defence of ſo ſmall a State againſt ſuch mighty Neighbours. The Greatneſs of this State, ſays Sir *William*, ſeems much to conſiſt in theſe Orders, how confus'd ſoever, and of different Pieces they may ſeem, but more in two main Effects of them, *viz.* the good Choice of the Officers of chief Truſt in the Cities, Provinces, and State, and the great Simplicity and Modeſty in the common Port, or Way of Living of their Chief Miniſters; without which, the Abſoluteneſs of the Senate in each Town, and the Immenſity of the Taxes throughout the whole State, would never be endur'd by the People with any Patience, being both of 'em greater than in many of theſe Governments, which are eſteem'd moſt arbitrary among their Neighbours; but in the Aſſemblies, and Debates of their Senates, every Man's Abilities are diſcover'd as their Diſpoſitions are in the Conduct of their Lives and Domeſtick Affairs. The Obſervation of which either raiſes or ſuppreſſes the Credit of particular Men, both among the People, and the Senates of the Towns, who, to maintain their Authority with leſs popular Envy, give much to the general Opinion of the People in the Choice of their Magiſtrates.

To this Sir *William* adds, That the Salaries of all the great Officers of this State are very ſmall, that of their Vice-Admiral not being above 500 *l. per Annum*, and that of the Penſioner of *Holland* not above 200. Thus, ſays he, this ſtomachful People, who could not endure the leaſt Exerciſe of arbitrary Power or Impoſitions, or the Sight of any Foreign Troops under the *Spaniſh* Government, have been ſince inur'd to all of 'em in the higheſt Degree under their own popular Magiſtrates, bridled with hard Laws, terrify'd with ſevere Executions, environ'd with Foreign Troops, and burthen'd with the greateſt Hardſhip, and Variety of Taxes, that was ever known under any Government; but all this, whilſt the Way to Offices and Authority lies through thoſe Qualities, which acquire the general Eſteem of the People; whilſt no Man is exempted from the Courſe of the Law; whilſt the Guard of the Inland and Trading Towns is left to the Burgers themſelves; whilſt no great Riches are ſeen to enter by publick Payments into private Purſes, either to raiſe Families, or to feed the Prodigality of luxurious Men: And while all publick Monies are applied to the Safety, Greatneſs, or Honour of the State, and the Magiſtrates bear an equal Share in all the Burthens they impoſe, the People bear it patiently.

Of their People, and Diſpoſitions.

Tacitus and other *Roman* Writers reckon'd the ancient *Batavi* or *Hollanders* to be the braveſt of the *Germans*, and the moſt ſteady Defenders of their Liberties, for which the *Romans* exempted them from Tribute, and demanded only Auxiliary Troops from them. Their Warlike Temper ſeems to have continued from that Time to the full Recovery of their Liberty from the *Spaniards*: Since which, if it has admitted of any Declenſion, it muſt be aſcrib'd to their general Application to Trade, and their Employment of Foreign Troops; but ſuch of 'em as are train'd to War, have even ſince that Time prov'd, that they ſtill retain the Bravery of their Anceſtors; and for their Love to Liberty, 'tis as prevalent as ever. Sir *Wm. Temple* divides them into 5 Claſſes, *viz.* the Boors, who cultivate the Lands; the Mariners and Watermen, who ſupply their Ships and Inland Boats; the Merchants or Traders, who fill their Towns; the Renteeners, or thoſe that live in their chief Cities upon their Rents or other Eſtates; and the Gentlemen and Officers of their Armies. The firſt, he ſays, are diligent, but dull, not to be dealt with by hard Words, but eaſily manag'd by fair Treatment, and will yield to plain

Digitized by Google

Reason, if allow'd Time to understand it. In the Country, not too near the great Towns, they are plain and honest, content with their own, and not covetous, feed most upon Herbs, Roots, and Milks, which he thinks to be the Cause why their Strength and Vigour falls short of their Bulk. Their Mariners, he says, are plain, but rough, surly, and ill-manner'd, which he ascribes to the Element they live on; to their Food, which is generally Fish and Corn; and partly to their Conversation. Their Valour, he says, is rather passive than active, which perhaps is a little strain'd; for we have felt to our Cost, that they can give Blows as well as take them. Their Merchants and Tradesmen living in great Towns, he says, are more mercurial, thô not very inventive; but so good at Imitation, that many times they exceed the Original. They are Men of Industry and Application, are apt to take Advantage of the Ignorance of those they deal with, and are great Exacters, where the Law is in their own Hand; but when they deal with Men of equal Understanding, and are under the Reach of Justice, they are the plainest and best Dealers in the World: But this he thinks proceeds more from Custom than Conscience. Those, he says, in great Cities, who live on their Patrimonies, are better bred, but like the others in Garb and Parsimony. They breed their Youth generally at Schools and Universities, but chiefly to the Study of the Civil Law, which has not the Force of Law among them, but is pleaded before their Courts, and complied with, where they have no Laws of their own to the contrary, as far as the Authority of Men esteem'd wise passes for Reason. After they have finish'd their Studies, they travel for some Years, chiefly into *England* and *France*, not much to *Italy*, and less to *Spain*, and seldom to the *North*, unless in the Train of their Publick Ministers. The chief End of their Breeding, is to fit them for the Service of their Country in the Magistracy and Government; and from these, he says, proceed most of their Civil Officers, being descended of Families who frequently have been Magistrates of their native Towns for many Years, and some for several Ages; and of such were the Chief of their Ministers and Councils when he was there, and not Mechanicks, as is commonly said among Foreigners; not but that many Merchants and Traders are frequently Magistrates, and deputed to their States: Nor do their States think it below them to apply their Stocks in carrying on some beneficial Trade by Servants, in Manufactures and otherwise; but the Generality of their States and Magistrates are of the other Sort, whose Estates consist in their Salaries, Rents of Lands, Interest of Money upon the Cantores, in Actions of the *East-India* Company, or in Shares upon the Adventures of great Merchants. Nor do those Families who are almost constantly in the Magistracy rise that Way to excessive Riches, but content themselves with the Honour and Esteem they acquire by being useful to the Publick, and a frugal Way of Living. The mighty Growth and Excess of Riches is among their Merchants and Traders, who apply themselves that Way, and are the better content with having little Share in the Government, since they are secure in what they possess. Yet when they attain to great Wealth, they frequently marry their Children into the Families of Magistrates, and by that Means pave their Way to Honour, which does not here lie in Titles, but in publick Employments.

Their Nobles are mostly employed in the Military and Civil Officers of the Provinces or State, differ from the rest in their Way of Living; and having been bred much abroad, affect rather the Garb of neighbouring Courts, than the popular Air of their own Country; value themselves more upon their Nobility, than in other Countries where 'tis more common; and think it dishonourable to match below their own Rank, even tho' they could better their Fortunes by it; and much imitate the *French* in their Mien and Way of Living, thô they copy them but sorrily, and would do better to improve the Customs and Virtues proper to their own Country; tho' otherwise, Sir *William* says, they are an honest, good-natur'd, Gentlemanly sort of Men, and generally acquit themselves with Honour in the Service of their Country. Their Military Officers, and the Sons of the rich Merchants, imitate the Gentry, and the latter affect Employments, rather in the Army than in the State; and are desirous to see a

Court

Digitized by Google

Court in their Country, that they may value themſelves at home upon the Cuſtoms they have learn'd abroad. Theſe, he ſays, are the general Diſpoſitions of the *Dutch*; and among all the ſeveral Ranks there's a great Frugality, it being reckon'd as diſhonourable here that a Man ſhould ſpend his whole Income, as 'tis to be vicious and profligate in other Parts. This enables them to bear their heavy Taxes with the more Eaſe: And they pay as willingly to the making of Canals, Bridges, Cawſeys, pleaſant Walks and Groves, near their great Cities, and to the Beauty, Conveniency, and ſometimes Magnificence, of their publick Works, in which they take as much Delight, and are as proud of them, as People in other Countries are of their private Poſſeſſions. What they have to ſpare beyond what is neceſſary for their private Maintenance, and the publick Impoſts, they lay out in the Ornament and Furniture of their Houſes. Thus, he ſays, their publick Works, as Cawſeys, Canals, *&c.* are always finiſhed in the appointed Time; and the Way they made from the *Hague* to *Skeveling* was a Work becoming the old *Romans*, conſidering how quickly 'twas diſpatched.

Their Charity, he ſays, is National, which appears by their Care to ſet their Poor at work, and to provide for ſuch as are not able in well endow'd Hoſpitals. He gives a particular Inſtance of this in one at *Enchuyſen* for aged Seamen, where, he ſays, he met with the only rich Man that ever he ſaw in his Life; for when he offer'd him a Crown for having ſhew'd him the Hoſpital, and the adjoining Church, and giving him a pleaſant Account of his Adventures by Sea, the Man refus'd it, and told Sir *William*, That he had no need of Money, being plentifully ſupplied with all Neceſſaries in the Hoſpital. He adds, That in general all Paſſions and Appetites ſeem to run lower here than in other Countries, Avarice excepted; and this they chiefly feed by Induſtry and Parſimony, which makes it ſcarce a Crime. They ſeldom quarrel, except in Drink; and both Sexes are generally chaſt, being little given to Amours. The Dulneſs of their Air diſpoſes them to ſtrange Aſſiduity, and Patience in every thing they undertake, which he thinks to be the main Reaſon of the great Progreſs they have made in Arts and Trade, and of the Fatigue they are able to endure in Arms. He thinks the ſame Quality in their Air inclines them to eating and drinking, in which they are charged with Exceſs; but they think it neceſſary for Health, conſidering their thick and foggy Climate, the Coldneſs of their Complexion, and conſtant Application to Buſineſs; but he ſeldom knew any of their Chief Miniſters or Officers guilty of drinking much; and if at any time they exceeded, it was rather in Complaiſance to their Company at publick Entertainments, than from Inclination; and their Merchants and Traders think it ſcarce lawful to drink, till after they have done their Buſineſs at the Exchange; but in the Evening, apply themſelves to their Diverſions.

For the Cruelty ſo frequently laid to their Charge, becauſe of what they barbarouſly did to ſome of our Men in the *Eaſt-Indies*, and the Murther of their Penſionary *De Wit* and his Brother. Sir *William* ſays, the latter at leaſt deſerv'd a better Return from his Country, after 18 Years ſpent in their Service, gives him a very great Character, and ſays, that whenever he was blinded, 'twas by the Paſſion he had for what he eſteem'd the Intereſt of his Country: But this Action, he ſays, is rather to be attributed to the Misfortunes they were then under, than to any Cuſtoms or Diſpoſitions he could obſerve among them; but he muſt confeſs, that Mankind is a various Creature, and not to be known, except he be ſeen in his Rage as well as in his Drink. They are generally not ſo long liv'd as in better Airs, and begin to decay early at *Amſterdam*: Yet at the *Hague*, he has known People a good deal above 70 in perfect Health and Senſe; but this is not ſo uſual in that Country, as in *England* and elſewhere. The Diſeaſes of their Climate are the Gout and Scurvy; and in hot and dry Summers, they have infectious Fevers, eſpecially at *Amſterdam* and *Leyden*, by which they either die ſuddenly, or languiſh long before they recover; but Plagues are not frequent, or at leaſt they ſuppreſs the Talk of 'em. Strangers, he ſays, are apt to complain of the Spleen among them, but the Natives ſeldom or never. In ſhort, he ſays, *Holland* is a Country where the Earth is better than the Air, and

Digitized by Google

Profit more in Requeſt than Honour; where there's more Senſe than Wit; more good Nature than good Humour; and more Wealth than Pleaſure; where a Man would chuſe rather to travel, than to live; may find more Things to obſerve, than to deſire; and more Perſons to eſteem, than to love.

Their Ancient Religion.

THE *Atlas Hiſtorique* ſays, while they were Heathens, they worſhip'd the following Idols, *viz.* 1. The *Sun*, from which they derive their *Sunday*, and repreſented it holding a burning Wheel upon a Pedeſtal. 2. The *Moon*, from whom they derive their *Monday*, and repreſented her as a Woman with large Ears, holding a Moon in her Hand, and ſtanding on a Pedeſtal. She was particularly worſhip'd by Travellers and Fiſhermen. 3. *Twiſco*, from whom they derive their *Tueſday*. He was the moſt eſteem'd, repreſented like an old Man in a looſe Robe, holding a Scepter in his Hand, and ſtanding on a Pedeſtal. 4. *Woden*, from whom they derive their *Wedneſday*. He was their God of War, and was repreſented ſtanding on a Pedeſtal, with a drawn Scimeter in his Right Hand, a Buckler in his Left, a ſort of a Crown on his Head, and a Coat of Mail girded about him. 5. *Thor*, from whom they derive their *Thurſday*. He was repreſented like an old Man on a Throne, with a Crown on his Head, a Scepter in his Right Hand, and Robes on his Body. They ſuppos'd him to preſide over Wind, Rain, and Thunder. 6. *Friga*, from whom they derive their *Friday*. They repreſented this Idol in Form of a Woman with a Helmet on her Head, a *Cornucopia* in her Right Hand, a Bow on her Left Arm, and worſhip'd her as the Goddeſs of Peace, Plenty, and Love, with Groves, Fruit-Trees, and Corn-Fields, about her, and a Perſon worſhiping before her. 7. *Seater*, from whom they derive their *Saturday*. They repreſented him as an old Man in a cloſe Habit, ſtanding on a Pedeſtal, with a Pail full of Fruit in his Right, and holding up a Wheel in his Left Hand. 8. *Ermenſeul*, the *Saxon* Idol formerly mentioned, whom they repreſented in Armour, with a Crown on his Head, a Spear in his Right Hand, and a Buckler in his Left; and him they worſhip'd after their Return from their Victories.

The ſame Author ſays, That their Converſion to Chriſtianity is aſcrib'd to St. *Willebroeck*, an *Engliſh* Biſhop, and 8 of his Companions, who about the Year 700 went from *England*, and preached to them.

Their Preſent Religion.

WE have formerly told how Popery was laid aſide, and the Reformation eſtabliſh'd; upon which they agreed on a Confeſſion of Faith, conſiſting of 37 Articles, call'd, *The Belgick Confeſſion*, in which their Church continued unanimous for a conſiderable Time, both as to Doctrine and Government, the latter being Presbytery, for which they declar'd in the 30th, 31ſt, and 32d Articles of their Confeſſion. But there happen'd Diviſions among them afterwards, of which we ſhall give a brief Account from the Preface to the Acts of the Synod of *Dort*, directed to all the Reform'd Churches, approv'd by that Synod, and publiſh'd, together with their Acts, by the Authority of the States General at *Dort* in 1620. This we judged the more neceſſary, becauſe thoſe Diviſions were fomented by that Faction of the State called *Barneveltz*, or the *Louveſtein* Faction, who made it a Handle to cover their Deſigns againſt the Family of *Orange*, in order to leſſen their Power, which they alledged was dangerous to the Republick.

The firſt that attack'd their Doctrine were 3 Popiſh Prieſts, who deceitfully pretended to embrace the Reformation, and were admitted as Miniſters, tho' ſtill Papiſts in Heart; but they were quickly ſuppreſs'd by the Care of the Church and State. The next who occaſioned their fatal Diviſions was *Jacobus Arminius*, in their Language called *Van Hermine*, one of the Miniſters of *Amſterdam*, a Man of a good, but luxuriant Genius, and fond of Novelty. He attack'd the Doctrine and the Reputation of the chief Reformers, firſt privately, but at laſt publickly, by ſpreading the *Pelagian* Errors; for which, being rebuk'd by the Church, he forbore for ſome Time in pub-

Digitized by Google

publick, but ſtill did it in private, and at laſt challeng'd *Franciſcus Junius*, Profeſſor of Divinity at *Leyden*, to a publick Diſpute on that Head. *Junius* dying in 1602, *Arminius*, contrary to the Mind of the Presbytery of *Amſterdam*, was by a Faction of the State and Church called to ſucceed him after a Conference with *Gomarus* before the Curators of the Univerſity, and the Deputies of the Synod, in which he renounc'd the *Pelagian* Errors, approv'd what St. *Auſtin* had writ againſt them, with their Condemnation by the Fathers, and upon this was admitted. In order to remove all Suſpicion at firſt, he defended the eſtabliſh'd Doctrine in the publick Diſputations againſt his own Opinion, as was ingenuouſly confeſs'd in Print by *Corvinus*, one of his Followers: But in a Year or two after he publickly maintain'd the contrary, by the Arguments of the Jeſuits and Socinians, which he gave out in Manuſcript, and his Opinions were ſpread by ſuch as he taught in the Univerſity. Upon this, the Synod ſent Deputies to confer with him, with Orders to report to them what paſs'd in the Conference; but he declin'd it. In 1605, he was admoniſh'd by the Magiſtrates of the City, and ſome of the Univerſity, to come to a friendly Conference with the Presbytery of *Leyden*; which he alſo declin'd. Upon this, the Synod of *South-Holland* laid the Matter before the Curators, and enjoin'd the Miniſters in their Diſtrict to ſubſcribe the receiv'd Confeſſion and Catechiſm, and deſired the Curators to command the Profeſſors of *Leyden* to do the like; but they refus'd, on Pretence of referring the Matter to a National Synod, which was to meet in a little Time. The *Arminians* being by this Means emboldened to preach publickly againſt the receiv'd Doctrine, and to contemn the Synod, the Deputies of the Church applied to the States in 1606 for a National Synod, which had been delay'd for many Years. This was agreed to in Appearance, on Condition of inſerting a Clauſe in the Letters for calling it, that the Confeſſion and Catechiſm ſhould be reviſed. The Church ſaid, there was no need of that Clauſe, ſince every Man had Liberty to propoſe his Objections in the Synod, and therefore deſir'd it might be called in the uſual Form: But the States of *Holland* inſiſting upon it, the Clauſe was added, and Letters were given to the ſeveral Churches of the Provinces, to ſignify the Conſent of the States for calling a National Synod. The Church rejoyc'd at this, tho' they were offended at the Clauſe, becauſe, as it happen'd afterwards, they apprehended the *Arminians* would take this as a Licence to publiſh their Doctrine. In the mean time, the Synod of *South-Holland* order'd ſuch of their Miniſters as had any Objections againſt the Confeſſion and Catechiſm, to lay them before their Presbyteries, that they might be referred to the National Synod; and they order'd the Profeſſors of Divinity to do the like: But the *Arminians* declin'd both, pretending they were not ready; and *Arminius* did the ſame, on Pretence that he would fully explain himſelf at the National Synod. In 1607, the States General called together Divines from the ſeveral Provinces, to conſult with them about the Time, Place, and Manner of holding this Synod; but *Arminius* and his Followers, who were called to this Meeting, would neither agree to be determin'd by the Synod, nor to exhibit their Opinions. This occaſion'd the National Synod to be put off, which further embolden'd the *Arminians*. Upon this, the Church preſſed for a Provincial Synod of *South* and *North Holland*, where Arminianiſm obtain'd moſt, to take Cognizance of the Matter; but the States put it off, on Pretence that they wanted Time, being then about treating with the *Spaniards*. *Arminius*, to avoid the Determination of the Synod, petition'd that he and his Adverſaries might be heard by the Sovereign Council. The Church oppos'd this, as being contrary to their Conſtitution to bring Church Controverſies in the firſt Inſtance before the Civil Magiſtrate, to whom in caſe of Neceſſity they were to be referred by the Synod; but 'twas carried againſt them by the States, who told them, The Sovereign Council would refer the Judgment of it to the Provincial Synod. When the Divines on both Sides came before the Sovereign Council in 1608, *Arminius* inſiſted, that his Adverſaries ſhould exhibit his Charge, and that he might act the Part of a Defendant. *Gomarus* oppos'd it, as a Thing not proper for Churchmen to accuſe one another in the firſt Inſtance before the Civil

Digitized by Google

Civil Magistrate; but declared, he was ready to prove before a lawful Synod, that *Arminius* had taught what was contrary to the Confession of Faith and Catechism; and that for the Satisfaction of the States, he thought it more proper that both of 'em should give a plain Declaration of their Doctrine before the Court, who would thereby be informed of the Matter of Fact, which was all they were to take Cognizance of; since the States had promis'd, that the Judgment of the Matter should be referred to the Synod. *Arminius* refus'd this, and boasted, that tho' he had been charged with Heterodox Doctrine, his Adversaries durst not accuse him. Upon this, *Gomarus* prov'd to the Court, by *Arminius*'s own Writings, that in the Point of Justification, he had taught what was contrary to the Confession. *Arminius* being thus convicted, had Recourse to another Subterfuge, and propos'd, that both of 'em should deliver their Opinion by Way of *Theses*, with their mutual Animadversions, which *Gomarus* agreed to. The Conference being ended, the Sovereign Council reported to the States, that the Difference betwixt 'em was of no great Moment, and related chiefly to Subtilties about Predestination. *Gomarus* shew'd the contrary, and said, which afterwards came to pass, that the Differences betwixt them were so many, and of such Importance, that he was afraid they would in a little Time set one Church, Province and City, against another. The States order'd however, that what passed at this Conference should be sealed up, and communicated to no body till the Meeting of a National Synod. The Church perceiving that this was done in Favour of *Arminius*, lest his Opinion should appear under his own Hand, they petition'd that a Provincial or National Synod should be called as soon as possible to determine the Matter; but instead of that, the *Arminians* prevailed to have the Provincial Synod put off, contrary to Custom, till *October* following. In the mean time the Church order'd the *Arminians* to give in their Objections to their respective Presbyteries in time, that they might be laid before the Synod, which they refus'd, and the Provincial Synod was put off for two Months longer; but they had Allowance to meet in their particular Synods. Upon this, the Synod of *South-Holland* order'd the *Arminians* in their District, and the Professors of *Leyden*, to exhibit their Objections in a Month's Time, on Pain of Church Censure. To avoid this, the *Arminians* prevail'd with the States to order those Objections to be sent to themselves, seal'd up, until the Provincial Synod should meet. *Arminius* being press'd to Obedience by the Deputies of the Church, he promis'd to give them an Answer: But in the mean time, in a General Assembly of the States, he made a large Speech, wherein he inveigh'd against the establish'd Doctrine, and endeavour'd to make it odious to the States. To which *Gomarus* gave a full and a solid Answer; and shew'd, that his Objections were the same made use of by the Jesuits and Socinians, and other Enemies of the Reformed Churches; and that his chief Design in appealing to the Civil Magistrate in the first Instance, was to pour Contempt upon the Church, before whom he knew he was not able to defend his Opinions; and therefore he labour'd all that he could to hinder the calling of a Synod. In 1609, the Deputies of the Church pressed *Arminius* to deliver them his Objections, according to his Promise; which he refused, on Pretence, that as the States had order'd the rest of the *Arminian* Preachers to deliver their Objections to them, he expected the like Order. By these Delays, the *Arminians* gain'd Ground. *Bertius*, Regent of the Divinity College at *Leyden*, did openly maintain their Doctrine; and *Adolphus Venator*, one of the Ministers of *Alcmaer*, and several others, did avowedly preach Pelagianism and Socinianism, for which they were suspended by the Church; and in *Venator*'s Censure, there was Notice taken of his lewd Life: But the *Arminians*, by Means of *Barnevelt*, *Grotius*, and others, procur'd an Order to have those Ministers restor'd, with which the Church declar'd they could not in Conscience comply, and petition'd the States for a Provincial Council, according to their Promise. *Arminius* and his Followers finding the States inclin'd to it, in order to divert them, propos'd another Conference before the States by a certain Number of Divines on both Sides, which was obtain'd. The Church desir'd that it might be manag'd in Writing,

Digitized by Google

ting, to prevent such Misrepresentations as had formerly happen'd; but the States order'd it should be *viva voce*, and afterwards writ, and laid before the Provincial Synod. They likewise appointed that *Venator*, tho' depos'd for his Lewdness, as well as his Errors, should be one of the Conference; but 'twas soon broke off, because of *Arminius*'s bad Health. The States order'd that both Sides should write what had pass'd, in order to be laid before the Provincial Synod, which was perform'd on the Part of the Church, who press'd for a Synod; and in the mean time *Arminius* died without performing what he had promis'd. The *Arminians* growing more bold by the Delay of the Synod from Time to Time, and being absolutely against one, they endeavour'd to perswade the States not to suffer one to be call'd, according to the Constitution, but to name such Persons to compose the Synod, as they themselves thought fit, and to deprive the Church of her Freedom of Election; alledging, that they design'd to set up an Ecclesiastical Jurisdiction, independant of the State. Having by this Means procur'd the Synods to be further delay'd, the *Arminians* met privately, without Authority either from Church or State, drew up their Remonstrance against the establish'd Doctrine, from whence they were called *Remonstrants*; and having subscrib'd and deliver'd it to the States, they separated from the other Ministers, and made an open Schism; but prevail'd with the States not to give out any Copy of their Remonstrance. At the same time, contrary to the Mind of the Church, and of the Chief Magistrates of the Cities of *Holland*, they procured *Vorstius*, who was Professor of Divinity at *Steinfurt* in *Westphalia*, to be called to succeed *Arminius* as Professor of Divinity at *Leyden*, tho' he was then accused by the University of *Heydelberg* of being a Socinian, and publishing a Book concerning GOD, and the Divine Attributes, wherein he asserted, That GOD was Finite, Corporeal, compos'd of Essence and Accidents; That his Will was mutable; That he was liable to Passive Power, and other Monstrous Doctrines. In the mean time another Conference was appointed betwixt the *Calvinists* and *Remonstants* before the States, to be manag'd by Writing; when the *Calvinists* having then got a Copy of the Remonstrance, prov'd that the *Arminians* had slander'd the Doctrine of the Reform'd Churches, and conceal'd their own Opinions. During this Conference, *Vorstius* came to the *Hague*, and endeavour'd to vindicate himself to the States. The Ministers charg'd him with the Book and Principles above-mention'd, and with having lately publish'd and interpolated *Socinus*'s Book concerning the Authority of the Holy Scriptures. After a Conference upon this Subject, the States asked the Ministers on both Sides, Whether he was fit to be Professor of Divinity? The *Arminians* answer'd, They had examin'd his Writings, and could find nothing in them inconsistent with Piety or Truth. The *Calvinists* maintain'd the contrary, and said, His Answers were so far from being satisfactory, that they confirmed their Suspicion of him, and humbly requested that he might not be admitted. *Vorstius* withdrawing, the Conference upon the 5 Articles was resum'd; which being continued for some Days, the States order'd both Sides to put in Writing what they had said, or had further to say, and send it to them. That in the mean time neither of them should boast of Victory; That they should be moderate in their Doctrine about the Articles, live in Peace and Charity with one another; and that the said Articles should remain as they were before; but they determin'd nothing as to *Vorstius*. Upon this, the Magistrates of *Dort* petition'd the States that he might not be called; in Compliance with which, they put a Stop to it. K. *James* I. of *Great Britain* having read *Vorstius*'s Book concerning the Divine Attributes, and marked his principal Errors with his own Hand, he admonished the States, by his Minister Sir *Ralph Winwood*, not to admit a Man to be Professor of Divinity who was guilty of such Blasphemies and Errors. But the Matter being delay'd, and *Vorstius* endeavouring to vindicate himself by Apologies and Answers, K. *James* insisted on his Demand; of which *Johnstoun*, in his *Lat. Hist. of Brit. Affairs*, Printed at *Amsterdam* in 1655, gives us this fuller Account; That the King sent *Vorstius*'s Book, with his own Remarks upon it, to Sir *Ralph*, with a Letter to the States, who had then admitted *Vorstius*, wherein he re-

pre-

preſented the Scandal they had given to the Reform'd Churches, and the Danger that would ariſe from it to the Proteſtant Religion, in which the Church of *England* and that of the *Netherlands* had hitherto agreed. The States anſwer'd, That *Vorſtius* was famous for his Learning, had writ well againſt *Bellarmin*; and upon hearing him and his Accuſers, they found no Cauſe to reject him, he having recanted his Errors. The King not being ſatisfied with this Anſwer, order'd his Book to be burnt in St. *Paul's* Church-yard; writ again to the States, quoted the blaſphemous Paſſages in *Vorſtius's* Book; and told them, he was ſo far from truly recanting his Errors, that he had maintain'd them in his Apology, and deſerv'd to be burnt as well as his Book. His Majeſty added, That he wonder'd how they could ſuffer his Apology to be publiſh'd in *Dutch*, and read by all their Subjects; That he had hop'd the Miſchiefs occaſioned by *Arminius* and his Followers to their Church and State would have made them more cautious; and told them, That one of their *Leyden* Divines had the Impudence to ſend a Book to the Archbiſhop of *Canterbury*, with a Letter, in both which he maintain'd the Apoſtacy of the Saints, and aſſerted, That this was not contrary to the Doctrine of the Church of *England*. The King inſiſted, That they ſhould baniſh *Vorſtius*, who was by his own Books convicted of Atheiſm and Blaſphemy, tho' he endeavour'd to deny it by Equivocations, to avoid the Puniſhment he deſerv'd; and adviſ'd them to chuſe another Profeſſor, who was free from Scandal. This Letter was dated the 7th of *October*, 1611. and ſent with Inſtructions to Sir *Ralph*, wherein the King took Notice, That he found *Vorſtius* had Patrons among the States, and order'd him to inſiſt on his being baniſh'd; and if he were not, to enter a Proteſtation in his Name againſt him. Sir *Ralph* obey'd his Orders, deliver'd them the King's Letter, with his Remarks on *Vorſtius's* Books and Apology; wherein, beſides what's above-mentioned, he aſſerted, That GOD was not Infinite nor Omnipreſent. Sir *Ralph* added, That 56 of the *Leiden* Students had petition'd againſt *Vorſtius's* Admiſſion; That he was condemn'd of many Errors by the Divines of *Baſle* and *Heydelberg*, and convicted by his own Books; and therefore inſiſted on his Baniſhment. The States deſired Sir *Ralph* to have Patience till they conferred about it, and anſwer'd him to this Effect, That the Curators of the Univerſity had, at their Requeſt, diſcharged him from being Profeſſor, but allow'd him to live at *Leyden* as a private Citizen, till the Matter ſhould be determined in the Meeting of the States in *February* next. Sir *Ralph* being diſſatisfied with this Anſwer, enter'd the King's Proteſt to this Effect, That their calling of *Vorſtius*, who was convicted of Blaſphemy and Hereſy, was diſhonourable to his Majeſty, who had oppos'd it, and a Scandal to all the Reform'd Churches: That inſtead of complying with his Majeſty's Requeſt, they obſtinately deny'd it: That their Anſwers were ambiguous and confus'd: That they had given *Vorſtius* Liberty to do that in private, which they were aſham'd he ſhould do in publick; therefore he proteſted againſt it, as an Injury and Reproach to the Reform'd Churches, and contrary to their League with the King, which was founded on their Communion in Religion; adding, That his Majeſty could not but expreſs his Reſentments, that *Vorſtius* was of more Account with them than their League with *Great Britain*: That he would publiſh the King's Proteſtation in Latin, that the World might ſee how much his Majeſty abhorr'd *Vorſtius*, and all the Abettors of his Blaſphemy and impious Hereſies; and that he would not ſpare the Blood of his Subjects, his Children, or himſelf, in Defence of the Purity of the Reform'd Religion. The States anſwer'd very reſpectfully, That tho' his Majeſty was partly diſappointed at preſent as to *Vorſtius*, they doubted not but the States would fully ſatisfy him at their next Meeting; which having not done, ſays *Johnſtoun*, but putting it off from Time to Time, his Majeſty publiſh'd a Book in Latin, Entitl'd, *Proteſtatio Antivorſtia*, wherein he prov'd *Vorſtius's* impious Opinions to be contrary to the Laws of GOD, Man, and Nature, and ſhew'd himſelf to be very well vers'd in Controverſial Divinity.

In the mean time, ſays the Preface to the Synod of *Dort*, ſome of *Vorſtius's* Diſciples in the Univerſity of *Franeker* publiſh'd a Book of *Fauſtus Socinus* about the Duty of Man, wherein they adviſed all ſuch as would be

Digitized by Google

be ſaved to leave the Communion of the Reform'd Churches, and to join with the *Photinians* and *Ebionites*; and this they recommended by a Preface. The States of *Frieſland* intercepted alſo ſome of their Letters, by which it appeared what Tricks they made uſe of to promote Socinianiſm with Privacy and Safety; in which Deſign, *Vorſtius*, *Utenbogardus*, and others, who appeared for the *Arminians*, were engaged. Upon this, the States of *Frieſland* order'd all thoſe Books to be burnt, baniſh'd the Students, and wrote to the States of *Holland* againſt *Vorſtius*; urging, that the Union of the Provinces, which was principally founded upon their Agreement in Religion, might not be broke for ſuch a Heretick. The States of *Zutphen* and *Guelderland* wrote to the ſame Purpoſe; upon which *Vorſtius* was order'd to remove to *Gouda*, where he might vindicate himſelf by Writing. Then the States order'd the Miniſters to draw up the State of the Controverſy about the 5 Articles, and to give their Advice how the Differences might be reconciled. The *Arminians* inſiſted on a mutual Toleration, and the *Calviniſts* urged to have the Doctrine on both Sides examin'd by the Word of GOD in a National Synod. The States were divided about it; but being informed, that they differ'd in other Things beſides the 5 Articles, they order'd that no Innovation ſhould be made in the receiv'd Doctrine.

After this, the *Arminians* ſtir'd up ſeveral Magiſtrates, by Slanders and Calumnies, to throw the *Calviniſts* out of the Churches, and put *Arminians* in their ſtead; who being forc'd upon the People in many Places, they left thoſe Preachers, and communicated with the *Calviniſts*. The firſt Violence of this Sort was done at *Alcmaer* in *Holland*, where *Venator* made the *Arminians* take Arms, throw out the *Calviniſt* Magiſtrates and Miniſters, and put *Arminians* in their Place. The like was done at *Rotterdam*, and *Epiſcopius* was forcibly impos'd on the Church of *Rhyſwick*; tho' he was ſo ſcandalous, that the Presbytery of *Amſterdam*, where he had been a Miniſter, refus'd to give him a Certificate of the Goodneſs of his Life and Doctrine. The *Arminians* rais'd a ſevere Proſecution in the Province of *Holland* againſt ſuch as ſeparated from them in 1612; and they did the like in *Guelderland*, *Utrecht*, and *Overiſſel*, where they threw out the *Calviniſts*, and ſet up a new ſort of Church Government, which was approved by the States of *Utrecht*, who gave a publick Toleration to the *Remonſtrants*; and in *Guelderland*, the *Arminians* hinder'd the Meeting of the Synod. *Epiſcopius* was, by the Intereſt of the *Arminians*, called to ſucceed *Vorſtius* as Profeſſor of Divinity at *Leiden*. The *Calviniſts*, to obviate thoſe Miſchiefs, ſent two Deputies from every Province to petition the States for a National Synod, according to Promiſe; but *Utenbogardus*, by his Intereſt with the Penſionary of *Holland*, prevented it. Upon this, the *Arminians* grew more inſolent every Day, and fill'd the Country with Tumults. Count *William Ludowick* of *Naſſau*, Governor of *Frieſland*, propoſed another Conference, in order to an Accommodation. The *Calviniſts* agreed to it, on Condition that the *Arminians* would declare their Agreement with the eſtabliſh'd Doctrine in every Thing elſe but the 5 Articles, which ſhould be referred to a National Synod. *Utenbogardus* promis'd a Compliance on the Part of the *Remonſtrants*, and a Conference was appointed in *Febr.* 1613. But by the Fraud of the *Arminians*, it came to nothing; for they would not ſubmit to the Deciſion of the Synod, nor forbear to innovate the eſtabliſh'd Doctrine, thô the States General had forbid them to do it.

About this Time, *Grotius* went over to *England* with a wrong State of the Controverſy; and by the Means of the Archbiſhop of *Canterbury* and *Caufabon*, (ſays *The Hiſtory of the United Provinces*) who had brought K. *James* to a more favourable Opinion of the *Arminians*, he obtain'd his Majeſty's Conſent for a Toleration to them. This (ſays the Preface to the Synod of *Dort*) being ſurreptitiouſly procured, and his Majeſty prevailed on to write to the States about it, according to a Copy given him by *Grotius*, made the *Arminians* more inſolent than ever; ſo that they drew up a Form of Toleration in 1614, which was pretended to be agreed to by the States, tho' oppos'd by many of 'em. However they publiſh'd it, and ſet up a new Way of calling Miniſters in 1615 by 4 Magiſtrates and 4 Preachers, in order to bring the *Arminians* into the Churches; and order'd this Method to be

Digitized by Google

obſerv'd through all the Provinces, which gave Occaſion to many new Tumults. Upon this, the Churches ſent Deputies to complain of it to the States; but when they came to the *Hague*, they were adviſed to forbear, till it was further urg'd upon them, ſince that Decree had not been confirm'd by all the States, and therefore could not have the Force of a Law. In the mean time the *Remonſtrants* prevail'd with ſome of the States to throw out ſuch Miniſters in their Juriſdiction as would not comply with it. Upon which, the ejected *Calviniſts* ſet up ſeparate Churches, which were countenanc'd and frequented by the Pr. of *Orange*, the Governor of *Frieſland*, and the Chief of the States. *Grotius* went to *Amſterdam* in 1616, to try if, with his Cunning and Eloquence, he could prevail with the Magiſtrates there to ſet up the new Form of Church Government, and eſtabliſh the Toleration; which they refus'd, and pleaded for a National Synod, in which they were ſeconded by the other chief Cities of *Holland*. The *Arminians* finding themſelves grown odious by thoſe Innovations and Tumults, they publiſh'd a ſecond Remonſtrance in 1617, wherein they endeavour'd to vindicate themſelves, and reproach'd the *Calviniſts* as Schiſmaticks, and the Cauſers of the Separation. To which they gave a ſolid Anſwer, and preſented it to the States.

In the mean time the Diſorders grew to ſuch a Height, as threaten'd the Ruin both of Church and State. Upon which, King *James* being better inform'd, he acquainted the States by Sir *Dudly Carleton*, his Miniſter, (ſays Mr. *Johnſtoun*) That they might expect his Aſſiſtance, if they would adhere to the eſtabliſh'd Religion; and Sir *Dudly*, according to his Inſtructions, repreſented to the States the Danger they were in of being either betray'd to *Spain*, or deſtroy'd by a Civil War: Therefore he adviſ'd them to make uſe of their Power and Authority againſt the impious Fury of the *Arminians*, who had tumultuouſly taken Arms, and to call a National Synod. Upon which, the States order'd the *Arminians* to forbear their diſorderly Practices, which they refus'd, ſtir'd up the People to Sedition, openly curs'd Prince *Maurice*, made the Burgers take Arms againſt their Garriſons, publiſh'd a ſcandalous Libel, call'd, *The Ballance*, againſt K. *James*, the Pr. of *Orange*, and the States, and inſulted K. *James*'s Miniſter. Upon this, the States declar'd the Author and Printer of the Libel to be guilty of High Treaſon, and promis'd a Reward to thoſe who could diſcover them. Complaints being brought to the States from all Places, of the Perſecution and Tumults raiſed by the *Arminians*, the Pr. of *Orange*, the States of *Zealand*, *Guelderland*, *Frieſland*, and *Groningen*, preſs'd for a National Synod. The *Arminians*, to prevent it, had Recourſe to their old Subterfuge of deſiring a Conference; which not being agreed to, they objected againſt a National Synod as contrary to the Union, by which every Province had a Sovereign Power in Point of Religion; and that this Right ought to be defended by Arms. To which 'twas anſwer'd, That they formerly had National Synods, which was their Conſtitution; and this being the common Cauſe of all the Provinces, and their Unanimity in Religion, the principal Cement of the Union, the Differences could not otherwiſe be determin'd. Upon this, the *Arminians* increas'd the Tumults, and enter'd into a Conſpiracy to raiſe Troops, which ſhould neither be ſubject to the States General nor the Prince of *Orange*, but obliged by Oath to defend the *Remonſtrants*, their Cauſe and Authority, as appear'd by their Letters. This oblig'd the States General at laſt to agree to a National Synod, and to invite all the Reform'd Churches to ſend Deputies to it, that it might have the greater Authority, becauſe the *Arminians*, as their laſt Shift, objected againſt a National Synod, alledging it would be partial, and appeal'd to an Oecumenical Synod. After this, particular Synods were order'd to chuſe their Deputies for the National Synod, which was perform'd in the uſual Manner in all the Provinces, except thoſe of *Holland* and *Utrecht*; where the *Arminians* being moſt numerous, and having form'd ſeparate Claſſes, both Parties choſe Deputies of their own. In the Synod of *Guelderland*, the *Arminians* were publickly convicted of ſlandering the *Calviniſts*, and ſeveral of 'em turn'd out for Immoralities and Errors.

The States General having ſeveral times ſent to thoſe of *Utrecht* to disband the Troops they

Digitized by Google

they had rais'd to defend the *Arminians*, in caſe they ſhould be condemn'd by the Synod, they refus'd to comply. Upon which, the States order'd the Prince of *Orange* with a Body of Troops to ſee it perform'd, which he did with great Prudence and Courage, and without any Effuſion of Blood, at *Nimeguen* and *Zutphen*, as well as at *Utrecht*, and ſeiz'd *Barnevelt*, *Hogerbert*, and *Grotius*, the chief Leaders of the Faction, who oppos'd the disbanding of the Troops. This great Service rais'd the Envy of the *Arminians* againſt him, ſays *Johnſtoun*, ſo that they threaten'd his Life, and put an Inſcription under his Statue, wiſhing that *Brutus* were alive again. After diſperſing their Troops, and ſeizing their Leaders, the chief of the *Arminian* Clergy, who had fomented the Tumult, ſuch as *Utenbogardius*, *Taurinus*, *Venator*, and *Grevinchovius*, fled out of the Country; and the *French* K. interpoſed by his Miniſter for *Barnevelt*, and their other Leaders, but without Effect. In the mean time the particular Synods turn'd out ſeveral of the *Arminian* Preachers for their bad Lives and groſs Errors; but cenſur'd none for their Opinion about the 5 Articles, becauſe they were referred to the National Synod, which met at *Dort* the 13th of *November*, 1618.

We have inſiſted the longer on this, becauſe thoſe Controverſies and Diſorders have made a great Noiſe in the World, and have been differently repreſented, according to the Inclinations of Writers; but this is the Subſtance of what was publiſhed by the Authority of the States, and the Synod, which we thought might be acceptable.

When the Synod met, the Foreign Divines were attended by Deputies from the State and Church to the Place appointed, received with much Honour by the Deputies of the States General, and plac'd according to their Rank; thoſe from *Great Britain* having the Preference. 'Twas agreed, that all the Proceedings ſhould be in Latin, becauſe of the Foreign Divines. 'Twas open'd by a Preface, Prayer, and Diſcourſe, in that Language, by *Balthazar Lydius*, Miniſter at *Dort*: Then one of the States Deputies, in a ſhort Speech, gave Thanks to the K. of *Great Britain* and the other Potentates for ſending their Deputies; acquainted them with the Occaſion of their Meeting, and how near both the Church and State of the United Provinces were brought to Ruin, had it not been for the Care of the States, and the Prince of *Orange*, in ſuppreſſing the Tumults, and calling the Synod. Then the reſpective Deputies exhibited their Powers; and the Articles of the States for calling the Synod, and ordering their Method of Proceeding, were read, in Subſtance as follows: 1. That there ſhould be a General Day of Prayer and Faſting for a Bleſſing on their Proceedings, and reſtoring Peace to the Church and State before they met. 2. That the 5 Controverted Articles ſhould be expreſly mentioned in the States Letter for calling it; but that other Grievances might be heard in their Place. 3. That every particular Synod ſhould ſend 6 of thoſe they thought fitteſt to the National Synod, 3 of 'em at leaſt to be Miniſters, and the other two or three Elders, or other Perſons of known Probity and Capacity. 4. That the *French* Churches in the Dominions of the States, and in the *Spaniſh* Provinces, ſhould be invited to ſend Deputies. 5. That the K. of *Great Britain*, the Proteſtant Churches of *France*, the Electors *Palatine* and *Brandenburg*, the Landgrave of *Heſſe*, and the Proteſtant Churches of *Switzerland* and *Wetteravia*, and the Republick of *Geneva*, ſhould be deſired to ſend 3 or 4 pious, peaceable, and learned Divines each. 6. That Profeſſors of Divinity ſhould be called from the Univerſities and Colleges of the United Provinces. 7. That ſome learned Divines ſhould be invited from the Churches of *Eaſt-Frieſland* and *Bremen*. 8. That any other Divines, beſides thoſe that were choſen, might have Liberty to propoſe their Difficulties, upon Leave aſk'd and given, provided they would ſubmit them to the Judgment of the Synod. 9. The 5 Controverted Articles ſhould be firſt debated. 10. That the Word of GOD ſhould be the only Rule to examine them by, and that every Member ſhould take an Oath accordingly; and that they had nothing before their Eyes but the Glory of GOD, and the Peace of the Church. 11. That what was approved by moſt Suffrages, ſhould be a Canon; but thoſe who voted otherwiſe, ſhould not be cenſured or ſuſpected on that Account. 12. That if any Thing doubtful happen'd in Debate, the Synod might have a Receſs

Digitized by Google

as long as they thought fit for Deliberation, and meet again without a new Summons. 13. That the States of each Province ſhould ſend two Delegates, to be continually preſent, and moderate in the Synod, to prevent Diſturbance and Confuſion. 14. That after the Concluſion, the whole ſhould be reported to the States General for their Approbation.

Then the Deputies of the States and the Synod agreed, that ſuch of the *Remonſtrants* as were known to be moſt learned in the Controverſy, ſhould be ſummon'd to attend in 14 Days, to give an Account of their Opinions; and that they ſhould have Liberty to explain and defend them as much as they could, and judged neceſſary, and to give in their Objections to the Confeſſion and Catechiſm. Accordingly the Deputies of the States ſummoned 14 out of the ſeveral Provinces, among whom was *Epiſcopius*; and beſides theſe, there were 3 *Arminians* choſen from the Synod of *Utrecht*. The whole Number conſiſted of 17 Deputies from the States, 56 Miniſters and Elders, 4 Profeſſors of Divinity from the *Dutch* Univerſities, and 1 from *Franeker*, 4 Deputies from the Church of *England*, 1 from *Scotland*, 3 from the *Palatinate*, 4 from *Heſſa*, 5 from *Switzerland*, 2 from *Wetteravia*, 3 from *Bremen*, 2 from *Geneva*, and 2 from *Embden*; in all, 104. Then they choſe a Præſes, 2 Aſſeſſors, 2 Clerks; and 2 of the Deputies of the States, with 4 Elders, were choſen to collect the Suffrages.

When the *Remonſtrants* came, they propos'd new Conditions and Methods of Proceeding; which the Deputies of the States and the Synod having examin'd, they unanimouſly declar'd them inſolent, unjuſt, unſeaſonable, contrary to what was preſcribed by the States their Sovereigns, and ſlanderous to the Synod and the *Belgick* Churches, whom they accuſed as Schiſmaticks. Upon this, the *Remonſtrants* proteſted againſt the Synod as their Enemies and Schiſmaticks, and by Conſequence not proper Judges. The Synod having examin'd their Proteſtation, unanimouſly condemn'd it, and told the *Arminians*, That according to their Way of Proceeding, no Hereſy or Error whatever could be cenſur'd; and that they had no Reaſon to make this Proteſtation, ſince the Foreign Divines could not be reckon'd Parties; and that their own Sovereigns the States, to avoid all Partiality, had order'd the Scriptures to be the only Rule for trying their Doctrine, and obliged all the Members to take an Oath accordingly; and therefore adviſed the *Remonſtrants* to lay aſide thoſe Tergiverſations, and exhibit their Objections againſt the Confeſſion and Catechiſm; with which they refuſed to comply, ſome of 'em pretending they were not ready; and when they were told that this could not be true, ſince they had long before given them into the States, they anſwer'd, That they had other Objections ſince ſome of the former they had alter'd; and that they had not yet agreed among themſelves about it. In ſhort, after many Delays, and much Trifling, the *Arminians* would ſtand to none of the Rules preſcrib'd, nor debate or deliver their Opinions when demanded, but as they pleas'd. Upon which, the Deputies of the States, with the Conſent of the Synod, agreed to diſmiſs them, and forbad them to come any more to the Synod, or to leave the City without the Conſent of the States, becauſe, as 'tis expreſs'd in the Decree, inſtead of giving Obedience, they contemn'd Publick Authority, and had Recourſe to all ſorts of Tergiverſations, Subterfuges, and Fallacies, in order to prevent the trying of their Opinions by the Word of GOD, and to prevent the happy Iſſue of the Synod, which the States had call'd and continu'd at ſo vaſt a Charge; and therefore 'twas unanimouſly agreed, they deſerv'd no more to be heard. When the *Remonſtrants* were called in to hear the Decree read, the Præſes told them, becauſe they had given out that the Foreign Divines favour'd their former Petition, they might now be ſatisfied, that all the Foreign Divines had declar'd, that the *Remonſtrants* had both begun and concluded with Frauds and Lies; for *Epiſcopius*, who was their Spokeſman, had been ſeveral times convicted of Falſhood by the whole Synod. *If any thing appear harſh, it is the very Words of the Acts of the Synod, not ours; for we ſhall give nothing but Matter of Fact.*

The *Remonſtrants* being thus diſmiſs'd, the Synod proceeded to examine the *Theſes* they had given in about the 5 Controverted Articles, and what appeared further from their publick Writings to be their Opinion concerning them, and condemn'd them by their Canons, *viz.* their Opinions, 1. About Pre-

Digitized by Google

Predeſtination. 2. About the Death of Chriſt, and the Redemption of Man by him. 3. and 4. Concerning the Corruption of Mankind, their Converſion to GOD, and the Manner of it. 5. Concerning the Perſeverance of the Saints; for which, with the Arguments given by the Proteſtant Divines from the ſeveral Countries abovementioned, we refer to the Book it ſelf. After this, the Canons of the Synod were approved by the States General the 2d of *July*, 1619. Then they all approved the *Belgick* Confeſſion, and the *Palatine* Catechiſm made uſe of in the *Netherlands* for the Inſtruction of Youth. They alſo condemned the horrid Confeſſions of the two *Arminian* Brothers, *J.* and *Pet. Geiſteranus*, Miniſters of *Alcmaer* and *Egmond*, as containing the execrable Errors of *Socinus*, and the Blaſphemies of the *Munſter* Anabaptiſts. They afterwards condemned *Vorſtius*'s Doctrine, and then were diſſolved, after a Speech by the Præſes, wherein he gave Thanks to the Foreign Divines, and concluded with Prayer. Then the Members took Leave of one another with mutual Embraces, Thanks, Tears, and Exhortations, to continue ſtedfaſt in the Doctrine of the Reform'd Churches, and gave one another the Right Hand of Fellowſhip the 9th of *May*, 1620.

The E. of *Brandenburg* had appointed ſome Divines to attend the Synod; but they being hinder'd from coming by Sickneſs, and other unforeſeen Accidents, he wrote to the States to excuſe it; adding, that the Confeſſion publiſh'd in his Dominions agreed with theirs, and thoſe of the other Reform'd Churches; and that his Divines ſhould approve of what the Synod did in Defence of that Doctrine. Their Confeſſion was alſo approved by a National Synod of the Proteſtant Churches of *France*, aſſembled at *Vitry*, *May* 25. 1585. where, at the Requeſt of the Deputies of the *Belgick* Churches, they teſtify'd their Agreement with them in Doctrine and Diſcipline, which was recorded in the Acts of the Synod of *Dort*, becauſe the *French* K. would not allow the Proteſtant Churches in his Dominions to ſend any Deputies to that Synod.

By all this, Sir *W. Temple* ſeems to have very good Authority for what he ſays concerning the *Arminians*, That they were rather a Party in the State, than a Sect in the Church; and that their Principles in *Barnevelt*'s Time were thought to lead them towards a Conjunction, or at leaſt a Compliance with the *Spaniſh* Religion and Government. He ſays, they are but few in Number, tho' in his Time they were conſiderable by the Perſons who were of the better Quality, and many of 'em in the Government. He adds, That the *Calviniſts* make the Body of the People, and are poſſeſs'd of all the publick Churches, as they have been ever ſince the Synod of *Dort* by the Decree of the States General. The Anabaptiſts, he ſays, are numerous, eſpecially in *North-Holland*, but of the lower Sort of People. The Jews have Synagogues in *Amſterdam* and *Rotterdam*; and in the former, there are publick Meeting-Places of moſt Sects known amongſt Chriſtians. The Papiſts are not allow'd their Worſhip publickly, but 'tis conniv'd at privately, and they have no Diſturbance on that Account; but are not admitted to publick, becauſe of their Dependance on the Pope. Upon the whole, he ſays, 'tis hardly to be imagin'd how all the Violence and Sharpneſs, which attends the Differences of Religion in other Countries, ſeems to be appeas'd or ſoften'd here, by the general Freedom which all Men enjoy, either by Allowance or Connivance; nor how Faction and Ambition are thereby diſabled, to colour their intereſſed and ſeditious Deſigns.

We ſhall add from *Pitt*'s *Atlas*, That of late ſome new Opinions in Matters of Religion have been broach'd among 'em by the Writings of *Cocceius* and his Followers, which were like to have occaſioned great Diviſions; but that they were ſuppreſſed in Time by the Pr. of *Orange* and the States. In 1676, the Curators of the Univerſity of *Leyden*, in order to prevent the ill Conſequences of thoſe Opinions, forbad the teaching or maintaining them within their Juriſdiction. By this Order it appears, that many of thoſe Opinions were vain and extravagant, and others of 'em were nearly allied to thoſe of the *Socinians* and *Pelagians*. Some of 'em were likewiſe ſuppos'd to be deriv'd from the Principles of *Des Cartes*: Upon which Account, the reading of his Metaphyſicks, either privately or publickly, were forbid in that Univerſity; and they turn'd

Digitized by Google

turn'd out *Heidanus*, Profeſſor of Divinity, for writing againſt that Order. The Pr. of *Orange* and the States of *Zealand* did likewiſe turn out a Miniſter, and ſeveral of the Magiſtrates of *Middleburg*, for favouring thoſe Opinions.

'Tis obſerv'd of the *Dutch*, that they are not ſo nice in obſerving the Lord's-Day as ſome of their Neighbours, it being uſual for the common People, eſpecially thoſe of the *Cocceian* Opinion, to buy and ſell, and to travel on that Day. They are ſaid to be more affected with ſinging of Pſalms, than any other Part of Worſhip; and being much addicted to Muſick, ſuch as are able, have Organs in their Churches, which play ſome Time after Sermon is over. The Pſalm to be ſung by the Congregation is mark'd upon Slates hung up in ſeveral Parts of the Church; and their Deacons make Collections for the Poor in the Church in a Purſe with a Bell hanging at the Bottom of it, which they reach by a long Pole to every one in their Seats.

Their TRADE.

SIR *W. Temple* ſays, there is no Inſtance to be found where ſo vaſt a Trade has been manag'd as in the narrow Compaſs of the 4 Maritime Provinces of this Commonwealth. 'Tis generally eſteem'd, that they have more Shipping than all the reſt of *Europe*; yet they have no native Commodities towards the Building or Rigging the ſmalleſt Veſſel, all which comes from abroad; as does their Wool for cloathing, and the Corn for feeding their People. They have nothing, he ſays, properly of their own Growth, conſiderable for their own Uſe or Traffick with others, beſides Butter, Cheeſe, and Earthen Ware. He adds, they have not one good Haven on their whole Coaſt. The beſt are *Helvoetſluys*, which has no Trade; and *Fluſhing*, that has little in compariſon of other Towns in *Holland*. *Amſterdam*, that triumphs in the Spoils of *Lisbon* and *Antwerp*, which before engroſſed the greateſt Trade of *Europe* in the *Indies*, is the moſt incommodious Harbour they have, being ſo ſhallow, that ordinary Ships cannot come up to it without the Advantage of Tides, nor great ones without unlading. The Entrance of the *Texel*, and the Paſſage over the *Zuyder-Sea*, is more dangerous than a Voyage thence to *Spain*, lying all in blind and narrow Channels: Upon which Sir *William* makes this Remark, That 'tis not an Haven which draws Trade, but Trade that fills a Haven, and brings it in Vogue; nor has *Holland*, ſays he, grown rich by any Native Commodities, but by Force of Induſtry; by the Improvement and Manufacture of all Foreign Growths; by being the general Magazine of *Europe*, and furniſhing all Parts with whatever they want; and by their Seamen's being the common Carriers of the World.

Since the Ground of their Trade cannot be deduc'd from Havens or Native Commodities, Sir *William* alledges the true Original and Ground of it to have been the crowding of ſuch vaſt Multitudes of People into ſo ſmall a Compaſs of Land, occaſioned, 1. By the Civil Wars, that were ſo fatal to moſt of their Neighbours ſome Time before that Republick was founded, as well as ſince. 2. By the Perſecutions in *Germany* under *Charles* V. *&c.* in *France* under *Henry* II. *&c.* in *England* under Queen *Mary*, &c. He ſuppoſes the Reaſons why thoſe People choſe rather to fix in *Holland* than in many better Countries, ſeems to have been, 1. The great Strength of their Towns, which, by their Situation, are capable of putting a Stop to the Approach of an Enemy by the opening of their Sluces; which natural Strength has been as much improv'd at *Amſterdam*, as could poſſibly be done by Money and Art. 2. The Conſtitution of their Government, by which neither the States General nor the Prince could invade any Man's Perſon or Property within their Cities; nor was it to be fear'd that the Senates of the Towns would commit any ſuch Violence, having no Soldiers in their Pay, the Burgers only being employ'd in Defence of the Towns, and the Execution of all Civil Juſtice. Theſe Circumſtances, he ſays, gave ſo great a Credit to the Bank of *Amſterdam*, that it invited People to come hither meerly for the Sake of ſecuring their Money in this Bank, which they knew not how to do at home: And many others remitted their Money hither, to provide for a Retreat againſt a Storm, becauſe it could be eaſily drawn from hence

to

Digitized by Google

to any Part of the World. 3. The general Liberty they gave in Point of Conſcience. 4. Becauſe they made it always the great Principle of their State, which runs through all their Provinces and Cities even, with Emulation, to make their Country the common Refuge of all miſerable Men, from whoſe Protection hardly any Alliance, Treaties, or Intereſt, have ever been able to remove them. And Parſimony being honourable here, thoſe who are brought low by Misfortune, may live as ſparingly at home as they pleaſe; and, without any great Charge, make as good an Appearance abroad as their chief Miniſters and richeſt Merchants. 5. The Reputation acquir'd by their Government for its ſteady and wiſe Conduct, as well as for the Succeſs in Arms and Treaties; ſo that People thought themſelves ſafe there from foreign Invaſions and civil Commotions. 6. The great Beauty their Country is arriv'd at by Improvements of Induſtry, in Spight of Nature, which draws a great many People thither on purpoſe to ſee them.

The United Provinces being thus crowded with People, they were forc'd to Induſtry and Labour, or elſe to Want. Thoſe that were vigorous, fell to Labour; and ſuch as were not, endeavour'd to ſupply that Defect by Inventions or Ingenuity; and Land growing dear, becauſe of the Multitude of the People, and Smalneſs of the Country, they were forc'd to apply themſelves chiefly to Trade by Sea.

Sir *William* mentions ſome other Circumſtances that have likewiſe advanc'd the Trade of that Country: 1. The low Intereſt for Money, which makes People venture it in Trade, or in any Projects by which Money might be gain'd, ſuch as cutting Canals, making Bridges and Cawſeys, levelling Downs, and dreining Marſhes. 2. The Uſe of their Bank, which ſecures Money, makes all Payments eaſy, and their Trade quick. 3. A publick Regiſter for Sale of Lands, which makes all Purchaſers ſafe. 4. The Severity of Juſtice againſt all Theefts, Cheats, Counterfeits of Publick Bills, which is Capital amongſt them; and againſt all common Beggars, who, if able to work, are put into Work-houſes; and if not, into Hoſpitals. 5. The good Convoys for their Merchant-Ships. 6. The Lowneſs of their Cuſtoms, and Eaſineſs of paying them; which, with the Freedom of their Ports, invites People to bring their Commodities hither, not only as to a Market, but as a Magazine, where they lodge them in caſe one Market fail, till another offers. 7. Their Order and Exactneſs in managing their Trade, which brings their Commodities into Credit abroad. This was firſt introduc'd by ſevere Laws and Penalties, but is now become habitual. Thus they had above 30 ſeveral Placaets about the Manner of Curing, Pickling, and Barrelling of Herring; and all Arms made at *Utrecht* are forfeited if ſold without a Mark, or mark'd without Tryal. 8. The Concern which the chief Perſons in the Government have in Trade by themſelves or their Friends, which makes the Traders ſure of all the Favour that the Government can give them. 9. The Cuſtom of every Town's affecting ſome particular Commerce or Staple, and valuing themſelves upon it, ſo as to improve it to the greateſt Height; as *Fluſhing* by that of the *Weſt-Indies*; *Middleburg* of *French* Wines; *Terveer* by the *Scots* Staple; *Dort* by the *Engliſh* Staple, and Rheniſh Wines; *Rotterdam* by the *Engliſh* and *Scots* Trade at large, and by *French* Wines; *Leyden* by the Manufacture of all ſorts of Stuffs, Silk, Hair, Gold and Silver; *Haerlem* by Linen, mix'd Stuffs and Flowers; *Delft* by Beer and *Dutch Porcelain*; *Surdam* by building Ships; *Enchuyſen* and *Maxlandſluys* by Herring-Fiſhing; *Frieſland* by the *Greenland* Trade; and *Amſterdam* by that of the *Eaſt-Indies*, *Spain*, and the *Streights*. 10. The great Application of the whole Provinces to the Fiſhing-Trade upon the Coaſts of *Great Britain*, which employs an incredible Number of Ships and Seamen, and ſupplies moſt of the South of *Europe* with a rich and neceſſary Commodity. 11. The mighty Advance they have made towards engroſſing the whole Commerce of the *Eaſt-Indies*, by their Succeſſes againſt the *Portugueze* and the Natives, by which they have forc'd them to Treaties of Commerce excluſive of all other Nations, and have built Forts upon the Paſſes, which command the Entrances into the Traffick of ſuch Places: But more of this Trade when we come to give an Account of their *Eaſt-India* Company. 12. The Situation of their Coun-

Country extended upon the Sea, divided by two ſuch Rivers as the *Rhine* and the *Maes*, with the Vicinity of the *Ems*, *Weſer*, and *Elve*, which gives them an eaſy Opportunity of conveying their Goods into the Continent; as their many Canals at home makes Commerce eaſy betwixt one Town and another.

Sir *William* adds, That as the only and certain Scale of Riches ariſing from Trade in a Nation, is the Proportion of what is exported for the Conſumption of others, to what is imported for their own. Never any Country traded ſo much, and conſumed ſo little, as the *Dutch*. They buy infinitely, but to ſell again, either upon improving the Commodity, or at a better Market. They are the great Maſters of the *Indian* Spices, and of the *Perſian* Silks, but wear plain Woollen, and feed upon their own Fiſh and Roots. They ſell the fineſt of their own Cloth to *France*, and buy coarſe out of *England* for their own Wear; and ſo of other Commodities. Their great Foreign Conſumption is in *French* Wine and Brandy; but what they ſpend in Wine, they ſave in Corn to make other Drinks, which is brought from Foreign Parts. Thus it happens, that much going conſtantly out, either in Commodities or in the Labour of Seafaring-Men, and little coming in to be conſumed at home, the reſt returns in Coin, and fills the Country to that degree, that more Silver is ſeen in *Holland* among the common Hands and Purſes, than Braſs either in *Spain* or in *France*; tho' the one be ſo rich in the beſt Native Commodities, and the other dreins all the Treaſuries of the *Weſt-Indies*.

Sir *William* obſerves however, That Trade ſeem'd to be declining among them, for which he aſſign'd the following Cauſes: 1. The general Application that many other Nations had made to it, eſpecially after the Peace of *Munſter*. 2. The great Import of *Eaſt-India* Commodities by their *Eaſt-India* Company, which leſſens the Rates of 'em, while the Charge of the Company is increaſed by War, Forts, Caſtles, Garriſons, Ships of War, *&c.* 3. The great Cheapneſs of Corn that had happen'd for many Years, which they us'd to purchaſe in the North with their Spices. And the laſt Cauſe he mentions, was the Increaſe of Luxury among them, and particularly in the Extent of the new Town of *Amſterdam*, and the Sumptuouſneſs of its Buildings, which had diverted a great deal of Money that had formerly been employ'd in Trade.

The 4th Volume of *Pitt's Atlas* gives this further Account of their Trade: About *Midſummer*, they begin to fiſh Herring near their own Coaſts, where they are but few, and lean, the Seas there not being reckon'd very agreeable to them. The beſt Seaſon for taking them is from the middle of *Auguſt* to *November*, when they are caught in greateſt Plenty from *Scarborough* to the Mouth of the *Thames*. After this, the firſt tempeſtuous Weather hurries them into the middle of the *Britiſh* Seas, where they continue till about *Chriſtmas*, and then return beyond *Scotland* and *Ireland* to the Northern Ocean, where they continue till *June*.

Guicciardin ſays, they are found no where but in the *Britiſh* and North Seas; and that they breed in the former, where they arrive earlier or later, according as the Winter comes on in the North Seas. The *Dutch*, to prevent Frauds to the Fiſhing Society by particular Perſons, have made an Order, That they ſhall not begin to fiſh till the 24th of *June*; and they ſuffer no Man to ſell any till they have been ſalted 10 Days at leaſt. They have alſo Searchers in every Fiſhing-Town, to ſee that their Pickling-Barrels be tight, and their Salt good; and to take Care that their Herring be ſalted anew as ſoon as they are brought home, in ſome publick Place, to prevent all Fraud. They have alſo Packers who attend the Searchers, and throw out all ſuch Herring as begin to decay: And that they may preſerve the Credit of the Herring-Trade to themſelves, they allow no Foreigners to take the like Care of their Fiſh in their Ports, but oblige them to carry them out as they brought them in. The Art of Curing Herrings was firſt found out by *Wm. Buckold*, a Native of *Bierfleet* in *Flanders*, where *Charles* V. erected a Monument for him. Sir *J. Burrows*, Garter King at Arms, in his Book, called, *The Sovereignty of the Sea*, publiſh'd in 1633, ſays, 1. That in the *Britiſh* Seas, at all Times of the Year, there may be taken Herrings, Pilchards, Cod, Ling, and other Sorts of good Fiſh: That not long before he wrote, in one Day, near *Minnegal* on the Coaſt

Digitized by Google

Coaſt of *Devonſhire*, there were taken 500 Tun of Fiſh. On another Day, there were taken to the Value of 3000 *l.* And near *St. Ives* in *Cornwall*, 20 Laſts of Herring were taken at one Draught. 2. That 10000 Foreign Ships, 1400 of which belong'd to *Embden* in *Eaſt-Frieſland*, were maintain'd by this Trade alone. 3. That the *Hollanders* employ 8000 Fiſhing-Veſſels on our Coaſts, by which they maintain 15000 Mariners by Sea, and treble the Number of People by Land in Trades that relate to the Fiſhery. 4. That this Trade occaſions Annually the building of 1000 Ships, by which they make Returns of the beſt Commodities of *Europe*, *Aſia*, and *America*, while this Trade is neglected by the *Britains*, for whom Providence ſeems chiefly to intend it. 5. That by Computation, the *Dutch* have made 5 Millions in a Year by fiſhing of Herrings; the Cuſtoms of which, and the 10th Fiſh brought into their Treaſury, make 800000 *l.* Sterling in a Year. The Curious may ſee more concerning the *Dutch* Fiſhing-Trade in a little Piece, Entitl'd, *John Keymor's Obſervations upon it*, about the Year 1601, which was Reprinted at *London* by the Order of the Lord Mayor, when a Fiſhing Company was erected here, after K. *Charles* II.'s Reſtoration, in which the D. of *York* and other great Perſons were concern'd, tho' it came to nothing, becauſe of Miſmanagement: But that Author demonſtrates in ſhort, That the *Dutch* and others raiſe more Wealth out of our Seas in one Year, than the K. of *Spain* had from the *Indies* in four; That there were 20000 Ships, and 400000 People, employ'd by their Fiſhing-Trade; and his Computation of the Advantage which the *Dutch* make by it, is as high as that of Sir *J. Burrows*. But that which puts the vaſt Advantage of this Trade beyond all Diſpute, is, the Proclamation of the States of 1624, where they call their Fiſhing-Trade the *Golden Mine* of their Provinces.

They had a *Weſt-India* Company form'd much after the Manner of that of the *Eaſt-Indies*; but 'tis very much decayed, partly by Miſmanagement, and partly by their Naval Wars formerly with *England*; for which we refer the Curious to the 4th Vol. of *Pitt's Atlas*. We cannot inſiſt on their particular Trade of Export and Import; but 'tis very conſiderable with moſt Trading Nations of the World.

Bleau's Atlas adds, That the Quantity of Raw Silk brought by their *Eaſt-India* Company out of *Perſia* is almoſt incredible, it being reported, that there's no fewer than 12000 People employ'd in ſeparating and winding the ſame up into Bottoms, of which they make ſeveral Sorts of Silk Stuffs, Ribbons, Scarfs, *&c.* They have invented a Mill for the more expeditious working of Scarfs; but the States forbad the Uſe of it, except in ſome Sorts of Ribbons, becauſe it hinder'd the employing of their Poor. They print vaſt Numbers of Books, of which they make great Profit; on which Account, the States are not very rigorous in putting their Laws for regulating the Preſs in Execution; though none ought to print any thing without a Licence from the reſpective States of the Provinces where they have Preſſes. There's greater Choice of Aſtronomical, Geometrical, and other Mathematical Inſtruments, in the United Provinces, than any where elſe in the World. They have alſo conſiderable Manufactures of Woollen Cloth, and exceed moſt other Nations in Dying, as they do in Painting. They are expert at making Muſical Inſtruments, eſpecially Organs, and very much affect Chimes of Bells. Their Bell-Founders, Letter-Founders, Jewellers, Gravers, Carvers, and Potters, are very ingenious in their ſeveral Arts. They are chiefly defective in Materials for a Trade to *Turkey*, ſuch as fine Cloth, Lead, Tin, *&c.* Their Merchants, he ſays, obſerve this general Rule, to buy Commodities where they are made and ſold cheapeſt, and vend 'em where they are bought deareſt: Nor do they think it below them to ſell by Retail, and accuſtom their Wives and Daughters to Merchandizing and Accounts, not only in their Shops, but to ſail from City to City, to manage their Trade.

Pitt's Atlas gives this further Account of their Cuſtoms and Diſpoſitions: They eat leſs Fleſh than other Nations, and moſt of that ſalt; and their freſh Meat is generally dreſs'd in Towns by common Cooks, of whom they have many; and they are obſerv'd very much to affect ſtew'd Meat. The Magiſtrates take great Care to prevent the ſelling of any bad Meat, and they keep

Digitized by Google

diſtinct Markets for the Offal. They kill their Beef in Winter, and ſalt or ſmoke it for the Summer; when they eat it with Butter and Sallet, and ſpread their Hung-Beef in Slices upon Bread and Butter. The Firſt Diſh at Entertainments is uſually a Sallet, of which they eat great Quantities. Boil'd Spinage minc'd, butter'd and mix'd with Currants, is a common Diſh. Milk is the cheapeſt of all their Proviſions. Their ſtrong Beer, which they call thick Beer, is above Threepence the *Engliſh* Quart. Meat and Drink are generally dear; which is aſcrib'd to their abounding with Money, and the Number of their Impoſts: So that their Day-workers and Labourers could hardly live, were not their Wages advanc'd in Proportion.

Their Land is commonly ſold at 30 or 40 Years Purchaſe, and Houſes let very dear, which, with the Lowneſs of Intereſt, puts them upon a Neceſſity of promoting Induſtry and Trade.

They have Aſſociations in their Towns, which are divided into ſeveral Neighbourhoods, each of which have a Maſter, Treaſurer, and Counſellors, whoſe Buſineſs is to make up Controverſies among their Neighbours, and prevent Law Suits. Theſe Societies pay to the Treaſurer certain Fines, for not waiting duly upon a Corps to the Grave when invited, for every Houſe they buy; and they are alſo paid certain Sums by the Heirs and Kindred of Perſons who die, according to their Quality, Age, or Sex; and when theſe Fines amount to a Sum, they are ſpent in a Feaſt by the Society, after reading their Laws, which are calculated to prevent Diſputes about Religion, and all other Occaſions of Quarrel. When the Maſter, Treaſurer, and Councellors are ſate, the reſt take their Places by Lots, and in the Evening they wait upon the Maſter to his Houſe, where they are entertain'd with Liquor.

In ſome of their Towns, they chuſe Commiſſaries from among their chief Burgers to take Care of Matrimonial Cauſes. They take the Names of the Perſons to be married, with a Certificate of the Conſent of the Parents or Guardians, which they deliver to the publick Preacher, who publiſhes the Banes 3 Times. The Papiſts, Remonſtrants, and Anabaptiſts, are allow'd to have Banes proclaim'd before the Town-Hall, where they are afterwards married in their own Way, in the Preſence of two Magiſtrates, and ſometimes in their own private Meetings. 'Tis look'd upon as a horrible Crime for a Man or Wife to beat one another. If a Man do it, ſays the *Atlas*, he muſt give the Neighbourhood a Gammon of Bacon, and if the Woman do it, ſhe muſt give two. They are noted for being too indulgent to their Children; for which they are frequently puniſhed by their Ingratitude and Rebellion; and this occaſions the Children frequently, either to be ſent to the *Indies*, or go thither of their own Accord.

The Times for their Burials are limited to a certain Hour, according to the different Way of the Places: But their Cuſtoms about Funeral Solemnities differ very much. In ſome Places, Men and Women are allow'd to follow the Corps together; in others, 'tis ſtrictly forbidden. In ſome Parts, the Company, after the Interment, meet to feaſt or drink; in others, 'tis prohibited under ſevere Penalties; and Perſons of the better Rank, inſtead of entertaining the Company at their own Houſes, give them a Sum of Money, which they ſpend elſewhere. In their Towns, they have Perſons on Purpoſe to invite People to their Burials, by printed Catalogues of their Names; and if the Corps be not carried out at the appointed Hour, the Friends of the Deceas'd muſt pay a conſiderable Fine, becauſe Loſs of Time is reckon'd equal to Loſs of Money, in this trading Country; and they generally wear Mourning for their deceas'd Relations above a Year. The Papiſts and Lutherans bury in conſecrated Places; which the reſt deſpiſe as ſuperſtitious. Thoſe who bury in the Church, pay a great Rate for it; and the ringing of the biggeſt Bell, coſts them uſually 20 Shillings: But moſt of them, except the Papiſts, and ſome Lutherans, look both upon this Cuſtom and the Charge as ridiculous.

Their Diverſions are Cards and Dice; but they allow no Actions for Debts contracted by Gaming. They have particular Places, for bowling with Wooden Bowls, thro an Iron Ring, for the Tennis, and for playing towards a fix'd Pale, with a Club and a Wooden Ball; and in the Winter, they

Digitized by Google

they divert themſelves upon the Ice with their Skates, or by banding a Ball with a Wooden or Leaden Club, till they bring it to the determin'd Goal. They uſe Dancings at Weddings, and on ſome other Occaſions, and have Comedies and other publick Shews, where, at the ſame time they pay Money to the Players, they pay a Tax to the States for the Uſe of the Poor, *&c.*

Their Houſes are generally cleanly and neat, their Glaſs painted, and their Floors ſtrow'd with Sand; and they are generally ſo nice, as to let none come into their Rooms without firſt cleaning their Shoes, or putting on Slippers; and thoſe of the better Sort, affect to have their Furniture ſplendid and rich. In Publick Houſes, their Beds are generally like Cabbins, ſhort and narrow; yet they generally exact 10 *d.* or 12 *d.* for every Night. There are few Thatch'd Houſes in theſe Provinces, and moſt of 'em have Gutters or Pipes to convey the Rain Water from the Roof into Ciſterns, where 'tis kept for Family Uſes.

Their Eaſt-India *Company.*

THE *Atlas Hiſtorique* gives us the following Account of it: The *Dutch* finding that ſeparate Companies were not able to defend themſelves againſt *Spain*, they form'd an *Eaſt-India* Company; towards the Capital Stock of which,

	Florins.
Amſterdam contributed	3674915
Zealand,	1333883
Delft,	470000
Rotterdam,	177400
Horn,	266868
Enchuyſen,	536775
In all,	6459840

Theſe 6 having advanc'd this Money, they ſettled a Chamber in each of the Towns, (that of *Zealand* being in *Middleburg*) from whence they chuſe the 17 Deputies who direct the Affairs of the Company. They meet 4 times a Year ſucceſſively at *Amſterdam* for the Affairs of the Company, and twice at *Middleburg* alternatively, but not at the other Towns. Thoſe Deputies are the Sovereigns of this Illuſtrious Company, but under the Authority of the States General. The *Atlas* ſays, they have had ſuch Succeſs, that they may well be eſteem'd the fineſt and greateſt Company in the World. That from the Time they were founded in 1602, to 1608, they augmented their Capital to 30000000; and ſince their Eſtabliſhment, they have paid above 15 times the Capital to thoſe concern'd; ſo that every Hundred Florins Stock is now worth above 600. They maintain in the *Indies* 15000 regular Troops, have 160 Veſſels at Sea; and in the different Countries they poſſeſs, they are able to raiſe 120000 Men.

The 17 Directors are choſen as follows; 8 by the Chamber of *Amſterdam*, 4 by that of *Zealand*; *Delft*, *Rotterdam Horn*, and *Enchuyſen*, one each; and the *Maes*, *Middleburg*, and *North-Holland*, chuſe one by Turns.

Theſe 17 Directors govern the Company, and repreſent the Sovereignty of the whole Body. By Plurality of Voices, they regulate all Affairs of Conſequence, as the making of Counſellors, Captains, Lieutenants, the Equipping of Ships, the Sale of the Goods, the Diviſion of the Profits; and all the particular Chambers muſt conform themſelves to their Orders. They likewiſe appoint the Time for the Sale of the Goods, one half of which is ſold in the Chamber of *Amſterdam*, a 4th in that of *Middleburg*, and a 16th in each of the other 4 Chambers, at the Time appointed, to the higheſt Bidder. But beſides thoſe 17 Directors, each of the Chambers have more belonging to the ſame Body. Thus *Amſterdam* has 16 more, beſides the 8 ſent to the Sovereign Court; and *Haërlem*, *Leyden*, *Utrecht*, *Dort*, and *Tergoe*, have each of 'em one there; as have the Provinces of *Guelderland* and *Frieſland*. *Zealand* likewiſe, beſides their 4 Directors, has 8 or 10 more from other Towns of the Province. All theſe Deputies are to give their Advice in their reſpective Chambers for the Good and Advantage of the Company; and when any of the Deputies die, the Towns to which they belong name three others in their ſtead, out of which

Digitized by Google

the Magiſtrates chuſe one. This Company meets twice a Week, and change their Preſident each Month; ſo that every one preſides in his Turn. There are two Advocates belonging to the Company, who make their Report of what is reſolv'd on to the *Indies*: Upon which, the Company there form their Reſolutions, and iſſue their Orders. There are 8 Deputies for the Affairs of the Marine, War, and Building of Ships; 4 to inſpect their Magazines, and the Goods that are ſent to and come from the *Indies*; 4 who take Care of the Money which the Company pays and receives; and the reſt take Care of the Accounts, and other Affairs relating to Order and Juſtice, which is done to the meaneſt Mariner, as well as to the Officers.

They have alſo a Sovereign Company at *Batavia* in the *Eaſt-Indies*, but it depends on that in *Holland*; yet they have Power to declare War and make Peace with the Kings and Princes of the *Indies*, as the Sovereign Council thinks meet, which is compoſed of a General, who maintains his Dignity with great Luſtre; of 2 Director-General, and 6 ordinary Counſellors, and ſometimes of 2 or 4 extraordinary Counſellors, as the 17 Directors think meet. They have alſo a Court of Juſtice, called the Supreme Council or Parliament, compoſed of a Preſident, a Vice-Preſident, and 12 Counſellors. They determine all Affairs Civil and Criminal, and have a Power to condemn the General to Death if he be found guilty of Treaſon. They have alſo a Council in the City, compoſed of a Bayliff and Eſchevins, in the ſame Manner almoſt as in *Holland*; and they have a Preſidial Council for determining ſmall Suits under 300 Florins. The General has his Office for 3 Years; but is often continued longer, if the Company think it for their Advantage. He has two Votes in the Council, and never goes abroad, nor gives Audience to *Indian* Ambaſſadors, without a Troop of Horſe, and a Company of Foot Guards. The 2d Perſon is the Major-General, who commands all the Troops under the General. The 3d is the Director-General, who keeps the Keys of all the Company's Magazines, and is obliged to give an Account of 'em. All thoſe Offices are conferred by the Sovereign Council of State, which the Company in *Holland* approves for moſt part; but ſometimes change them on Occaſion.

The General Governments of the Company in the *Eaſt-Indies* are on the Coaſt of *Coromandel*, the Iſlands of *Amboina*, *Banda*, *Ternate*, *Ceylan*, and the Peninſula of *Malaca*.

The Particular Governments are, the Cape of *Good Hope*, the Iſle of *Macaſſar*, at *Padam*, the Iſle of *Timort*, at *Andragery*, and at *Cochin*, &c.

The Particular Factories of the Company in ſeveral Places of the *Indies* are, at *Iſpahan*, *Gaumaron*, *Surate*, *Agra*, *Amadabat*, *Bengal*, *Palimbang*, *Bambi*, *Banka*, *Siam*, *Ligor*, *Tonquin*, and at *Japan*, &c. *New Amſterdam*, and *New Holland*.

Their Forces *and* Revenues.

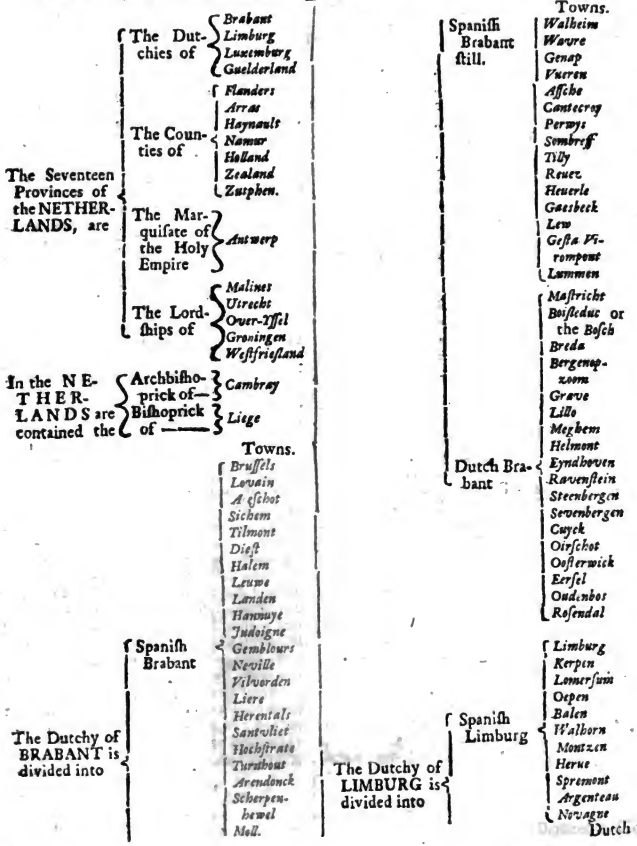
SIR *W. Temple* ſays, the Force of theſe Provinces is not to be meaſured by the Number or Diſpoſitions of their Subjects, but the Strength of their Shipping, and ſtanding Troops, which they maintain in Time of Peace; by the Numbers of both they are able to furniſh in Time of War; by their conſtant Revenue to maintain the former; and by the Temporary Charge, they have been able to ſupply for the latter.

Their ordinary Revenues conſiſt either in what is levied from the conquer'd Towns, and Countries of *Brabant*, *Flanders*, or the *Rhine*, and the ordinary Funds provided by the 7 Provinces every Year, according to their Proportions; and this Revenue, he ſays, is about 21 Millions of Gilders *per Annum*, which is 1890000 *l.* Sterling. The chief Funds out of which this is raiſed, is the Exciſe and Cuſtoms. The firſt is ſo great in general, that he has heard it obſerv'd at *Amſterdam*, that in a Tavern, a certain Diſh of Fiſh, eaten with the uſual Sauce, has paid above 30 ſeveral Exciſes; but their Cuſtoms are low and eaſy, and applied particularly to the Admiralty. By this Revenue they pay all their Troops, publick Officers, Miniſters abroad, and the Intereſt of Money owing by the States, which in his Time was about 13000000 Gilders.

Their

Digitized by Google

Their ſtanding Forces in 1670, during a general Peace, were 26200 Men, being 10 Regiments of Horſe, and 19 of Foot, which coſt them Annually 6119000 Gilders. In Time of Peace, they uſually employ betwixt 30 or 40 Men of War in Convoys, beſides ſome ready in their Harbours on all Occaſions; which, with the building of Ships of War, coſts them about 6000000 Gilders *per Annum*. He adds, that beſides what was then owing by the States General, the Commons of *Holland* ow'd 65000000 Gilders, for which they paid Intereſt at 4 *per Cent.* which is paid ſo exactly, both Principal and Intereſt, that no Man ever demands it twice; ſo that 'tis reckon'd a Favour for any one to have their Money admitted, and they generally receive it back with Grief, becauſe they know not where to diſpoſe it with ſo much Safety and Eaſe; ſo that the common Revenue of particular Men lies much in the Cantores of the States General, or the particular Provinces, which are the Regiſters of their publick Debts.



The Impoſts and Exciſes upon Houſes and Lands are collected by the Magiſtrates of the ſeveral Places, who pay them into the Receivers. The Exciſe on Conſumption is farm'd out to the higheſt Bidders for 3, 6 Months, or a Year. The Collection, Receipt, and Payment of all publick Money, is made without Fee to Officers who have certain Salaries from the State, which they dare not increaſe by private Practices or Extortions; ſo that whoever has a Bill for any publick Debt, it is as good as ready Money, being paid at Demand, without Charge or Trouble, and paſſes as readily in Payments, as the beſt Bills of Exchange.

Their extraordinary Revenue in caſe of a War, or other extraordinary Occaſions, is ſometimes rais'd by the Hundredth Part of the Eſtates of the People, Poll, or Chimney-Money, and ſometimes by Impoſts on every Man that travels in their common Roads in Coach, Waggon, or Horſeback, and in their Canals or Rivers by Boats. By this Means, during the War with *England* in 1665, they raiſed 42000000; and when the Biſhop of *Munſter* invaded them in 1666, they had above 60000 Land-men, and 100 Ships of War at Sea. And in *Oliver's* Time, about 1652, they prepared 150 Men of War to fight the *Engliſh*, as we are informed by *The Hiſtory of the United Provinces*: And beſides what they are able to do at home, their Company in the *Eaſt-Indies* is capable of putting 50 Men of War to Sea, and to raiſe at leaſt 30000 Men by Land, ſays Sir *W. Temple*; their Trade there being ſo large, that the ſame Gentleman ſays, he has known 22 Ships arrive from thence in one Year. On this Occaſion Sir *Wm.* obſerves, That the Greatneſs of the *Dutch* at that Time ſeems juſtly to have raiſed the Glory of our Nation, which, during the Years 1665 and 1666, maintain'd a War not only againſt this powerful State, but againſt *France* and *Denmark*, in Conjunction with 'em; and all at a Time when *England* ſtruggled at home with the calamitous Effects of a raging Plague, that in 3 Months of the firſt Year ſwept away incredible Numbers of People; and of a prodigious Fire, that in 3 Days of the 2d laid in Aſhes that ancient and famous City of *London*, the Heart and Center of our Commerce and Riches, conſuming the greateſt Part of its Buildings, and an immenſe Proportion of its Wealth. Yet in the midſt of theſe fatal Accidents, thoſe two Summers were renowned for 3 Battles of the mighti-eſt Fleets that ever met upon the Ocean, whereof two were determin'd by entire and unqueſtion'd Victories, and Purſuit of our Enemies into their very Havens; the 3d having begun by the unfortunate Diviſions of our Fleet, with the Odds of 90 of their Ships againſt 50 of ours; and in ſpight of ſuch Diſadvantages, having been continued or renewed for 3 Days together, wherein we were every Morning the Aggreſſors, ended at laſt by the equal and mutual Weakneſs and Wearineſs of both Sides, the Maims of Ships and Tackling, with Want of Powder and Ammunition; having left undecided the greateſt Action that perhaps is to be met with in Story. And in this Battle M. *de Wit* confeſſed to Sir *William*, that we gained more Honour to our Nation, and to the invincible Courage of our Seamen, than by the other two Victories: That he was ſure their Men could never have been brought on the two following Days, after the Diſadvantages of the firſt; and he believed no other Nation was capable of it but ours.

The GEOGRAPHY *of the* United Provinces.

SIR *Wm. Temple* obſerves, That *Holland*, *Zealand*, *Frieſland*, and *Gromingen*, lie on the Sea, and make the Strength and Greatneſs of this State: The other three, *Guelderland*, *Utrecht*, and *Overiſſel*, with the conquer'd Towns in *Brabant* and *Flanders*, ſerve as Outworks and Frontiers. No Man, he ſays, can tell what Changes have been made in the Face and Boundaries of thoſe Provinces by the Inundations of the Seas and Rivers; but by the Deſcription in the *Roman* Hiſtory, the Face of their Coaſts, and the Nature of their Soil, eſpecially in *Holland*, was much as 'tis now 1600 Years ago, allowing only for the Improvements which have been made by Riches, Time, and Induſtry; and the Names and Courſe of the Rivers are much the ſame with what they were then. Any Changes that have happen'd ſince, he ſuppoſes to have been made by the Stoppages and the Rolling of the Sands upon the Mouths of the *Rhine*, the *Maes*, and the *Scheld*, which run through thoſe Provinces into the Sea.

The Province of Holland.

AUthors differ about the Origin of its Name: Some derive it from its low Situation; ſome from the *German* Word *Holt*; *i. e.* Wood, with which 'twas formerly cover'd. But others, with more Probability, derive it from *Holland* in *Denmark*. *Lotharius*, the 3d Son of the Emperor *Ludovicus Pius*, being oblig'd to grant this Province and *Zealand* to the *Danes* about the 9th Century, as *Curingius* ſays in his Book *De Finibus Germaniæ*; which is the more probable, becauſe before that Time this Province was called *Vlaerdingen*, from *Vlaerdingen*, formerly a Town of great Note at the Mouth of the *Maes*. That Part of the Country which lies S. of the *Old Rhine*, was anciently inhabited by the *Batavi*, and after them by the *Frizans*. *Bentivoglio* obſerves, that 'tis cut through in ſo many Places by Rivers and artificial Channels, that it may be doubted whether it conſiſts moſt of Land or Water; and that they abound ſo in Ships, that it may be queſtion'd whether the Number of their Ships and other Veſſels be not equal to that of their Houſes. Sir *W. Temple* ſays, That the Soil of the whole Province is generally flat, like the Sea in a Calm, and looks as if, after a long Contention between the Land and Water, it had at length been divided betwixt them; and that if the Number of Rivers and Canals, which lead not only to every great Town, but almoſt to every Village, and the innumerable Sails that courſe every where up and down, be duly conſider'd, 'twill appear, that the People who live by Water, bear a good Proportion to thoſe who live by Land.

The Effects of the Trade of this Province are ſuch, that 'tis ſaid of 'em, tho' they have no Wood of their own, they ſpend more than any Nation: Tho' their Fields bear little Corn, they have ſometimes kept the Granary of *Europe*: Tho' they have neither Vines nor Wool, and very little Flax of their own Growth, yet there is no Place better ſtor'd with Wines: And they make more Cloth of both Sorts than any other Country of an equal, and than moſt of a larger Extent.

The Soil produces ſeveral Sorts of Fruit, and in ſome Places good Corn, but in ſmall Quantities. The N. Part of the Province is Mooriſh, and unfit for Tillage. The other, which lies next *Brabant*, is moſtly Meadows that about the End of *October* begin to be cover'd with Water; which being augmented by frequent Rains and Snows, continues all Winter; ſo that the Towns and Villages ſeem to ſtand in the Sea. This however makes their Ground fruitful for Paſturage, and occaſions their making vaſt Quantities of Butter and Cheeſe; which, beſides what they ſpend themſelves, is reckon'd to bring them in Annually a Million of Carolins, which are about 3 *l.* 4 *d.* apiece. Beſides the overflowing of the Country, the Climate it ſelf does naturally abound in Moiſture and Rain; ſo that 'tis difficult ſometimes to diſtinguiſh the Spring, Summer, and Autumn. *Bentivoglio* ſays, their Winter is rather long than ſevere; but 'twou'd be all Fog and Miſt, if it were not cleared by the Sharpneſs of their Froſts, which never fail

Digitized by Google

with every E. Wind for about 4 Months in the Year, and are much fiercer than in the ſame Latitude with us, becauſe the Wind comes to them over a mighty dry Continent; but is moiſten'd by the Vapours, or ſoften'd by the Warmth of the Motion of the Sea, before it reach us. This, ſays Sir *William*, is the greateſt Diſadvantage of Trade they receive from their Situation, tho' neceſſary to their Health, becauſe their Havens are frequently ſhut up for two or three Months with Ice. The fierce Sharpneſs of theſe Winds makes the Changes of their Weather violent and ſurprizing, ſo as a warm faint Air turns in a Night to a ſharp Froſt, with the Wind coming into the N. E. and the contrary with another Change of Wind. The Spring is much ſhorter and leſs agreeable than ours, the Winter much colder, and ſome Part of the Summer much hotter. The extream Moiſture of their Air is the Occaſion of the great Neatneſs in their Houſes, and Cleanlineſs in their Towns; for without that Care, their Country would not be habitable by ſuch Crowds of People, the Air would corrupt upon every hot Seaſon, and expoſe them to infectious Diſtempers, which they hardly eſcape 3 Summers together, eſpecially about *Leyden*, where the Waters are not ſo eaſily renew'd; and therefore that City is kept the moſt neat and clean of all their Towns. The Moiſtneſs of their Air makes all Metals apt to ruſt, and Wood to grow mouldy, which they are forc'd to prevent by continual rubbing and ſcowring; as the Deepneſs of their Soil, and Wetneſs of their Seaſon, obliges them to keep the Streets well pav'd, and to make long Cauſways between many of their Towns, and in their Roads.

Their Inundations and Dikes, and the Cauſes of their High Tides.

THE Flatneſs of their Land expoſes 'em to Danger of Inundations by the Sea, and to infinite Charge in making and repairing their Banks and Dikes, which employ Annually more Men than all the Corn of the Province of *Holland* could maintain. They have lately found the common Seaweed to be the beſt Material for thoſe Dikes; which, faſten'd with a thin Mixture of Earth, yields a little to the Force of the Sea, and returns to its Poſture when the Waves give back. Their Dikes are uſually about 7 Ells high, and 17 broad at Bottom, made of the tougheſt Clay, fenc'd on the Land-ſide with Wood and Stone, and on the other with Mats of Ruſhes and Flags, ſtak'd down as high as the Tide generally riſes, or with Sea-weed, as formerly mentioned, which hinders the Water from ſapping and undermining the Body of the Dikes: But in *North-Holland*, when the Storm is very violent, they clap Sails on the outſide of their Dikes, which they look upon to be the beſt Defence.

Guicciardin ſuppoſes, that the Height and Violence of the Tides upon their Coaſts, proceed from their being ſhop'd in their Courſe from the great W. Ocean by the Interpoſition of *Great Britain*, which at each End of the Iſland ſwell into two vaſt and violent Currents; one of which coming through St. *George*'s Channel, he judges to meet and claſh with the other, whoſe Courſe is from the N. W. much about the Coaſt of *Holland*; ſo that when a Spring Tide, ſtrong S. W. but eſpecially N. W. Wind, and a conſiderable Land-Flood, happen together, the Coaſts of the United Provinces, and ſeveral Parts of *Flanders*, are very much in Danger. The N. W. Wind makes the higheſt Tides upon the Coaſt of *Holland* and *Flanders*, and the greateſt Inundations have happen'd during ſuch Winds, the Moon being moreover in *Apogeo*: Several Inſtances of which are brought in the *Philoſophical Tranſactions*, N° 64. The Reaſon why the N. W. Wind makes the higheſt Tide, is thought to be, becauſe that Wind drives in the Flood much with an equal Force at both Ends of *Great Britain*; but the Current which comes from the N. W. is ſuppoſed to be the moſt impetuous of the two, becauſe 'tis received out of a wider into a narrower Channel: Upon which Account it muſt needs ſwell higher; whereas the Channel of the other, which comes in betwixt *England* and *France*, is much enlarged by that Time it reaches the Coaſt of *Holland* and *Zealand*. There is another Reaſon given by Dr. *Wallis*, why the N. Tide muſt needs be the ſtrongeſt; *viz.* the Waters of the Sea, becauſe they cannot follow the

Digitized by Google

the Earth faſt enough in its diurnal Motion from W. to E. are thrown back upon the *American* Shore, which muſt be done with much the greateſt Violence under the Equator, where the Motion of the Earth is quickeſt, and conſequently the Sea is more deficient in accompanying its ſaid Motion: Wherefore, if, as is alſo ſuppoſed on each Side of the Equator, the ſame Waters are returned back again in an Eddy to the S. E. and N. E. then this Return, the nearer it approaches the N. towards which the Earth's diurnal Motion is ſtill ſlower and ſlower, muſt be made with the greater Violence and Rapidity.

Hiſtory gives us frequent Accounts of the Sea's breaking in upon their Banks, deſtroying Multitudes of People and Cattle, and ſwallowing up large Tracts of Land, particularly on the 5th of *November*, 1530, when it overflowed a great Part of *Zealand*. *Strada* mentions another on *All-Saints* Eve in 1568, when the Sea ſwelled ſo high, that it broke ſome Banks, and overflowed others, with ſuch a ſudden and unheard of Inundation, that it cover'd ſome Iſlands of *Zealand*, great Part of the Coaſt of *Holland*, and almoſt all *Frieſland*, was higher by a Foot than that which happen'd in 1530, and ſwallowed up 72 Villages; and in *Frieſland* alone deſtroyed above 20000 People, whoſe Bodies, with thoſe of their Cattle, their Houſhold-Stuff, and broken Veſſels, floating upon the drown'd Country, gave thoſe that eſcap'd a lively Repreſentation of *Noah*'s Deluge. Many People getting up to the Tops of Trees and Riſing Grounds, were in Danger of being famiſh'd, till they were brought off in Boats by the Care of the Magiſtrates. They ſuffer'd likewiſe much by an Inundation in 1655; but more by one in *Nov.* 1665, which drove in the Sea with ſuch incredible Violence between the *Texel* and the *Helder*, that it carried Part of the Village of *Huyſduynen* quite away, and laid all the Country between *Wiring* and *Zyp* under Water; the Dike near *Horn* was broke in two Places; the Water came to the Gates of *Medemblick*, overflowed many Villages, and of a ſudden turn'd a large Tract of the Country into a continued Sea, which deſtroyed much People and Cattle. The Dike of *Muydenberg* was alſo broke down; ſo that all the Country round *Naerden*, *Muyden*, and *Weſop*, as far as *Loren* in *Goyland*, and *Balcorm* in the Province of *Utrecht*, was under Water. The Gates and Ramparts of *Naerden* were ruin'd; and that ſtrong Rampart of Stone called the *Aſſes-Back*, built to repel the Waves, was hurry'd away, leaving a Hole where it ſtood of 36 Foot deep. In *Amſterdam*, the *Newen* Dike, with the Street upon it, and the neighbouring Market-place, was quite overflow'd. The Dike betwixt *Amſterdam* and *Haerlem* was broke in the Middle for 30 or 40 Rods; ſo that there was about 33 Foot Water in thoſe Parts. There were many other Dikes had the ſame Fate; the Country in many Places, and particularly a great Part of Water-Land, was entirely ſwallow'd up; ſeveral Dikes in *Frieſland* had Breaches made in them of 30 and 40 Rods long; ſo that a great Part of thoſe Coaſts ſeem'd to be irrecoverably loſt: Yet after the ceaſing of the Storm, by the incredible Induſtry of the People, thoſe Dikes were repaired, and made ſtronger than before in the *February* following. The ſame Tempeſt did a great deal of Damage in *Zealand* and *Flanders*, and was obſerved to have much exceeded that in 1568. See the Cut of the *Inundations*.

Their Banks, eſpecially thoſe on the Rivers, do likewiſe ſuffer frequently by Shoals of Ice, as happen'd in 1638, when the Ice of the *Rhine* broke down the *Iſſel* Dike near *Utrecht*, and laid moſt of *Holland* under Water: But this not having the continued Fury of the Marine Inundations, the Dike was ſpeedily repaired, and the Waters were drein'd by the uſual Help of Wind-Mills, of which they have great Numbers conveniently placed for carrying off the Winter-Rain, and Snow-Waters; which about the beginning of *February*, if the Froſt do not hinder, are forced up by the Mills to vaſt Currents, and drove into particular Channels; ſo that the Earth becoming dry in a little Time, it begins to look green about *March*, when their Cattle are put out to Graſs.

Beſides thoſe Dikes which are made by Art to ſecure them againſt ſuch Inundations, Nature has afforded them ſeveral Helps, particularly 4 or 5 little Iſlands in the *Zuyder-Sea*, beſides the *Texel*, the *Vlie*, and others on the Mouth of the ſaid Sea on the Coaſt of *Frieſland*, which break the firſt Fury of thoſe Tempeſts: And from the *Hunts-Boſſe* towards the upper End of *North-Holland*,

Digitized by Google

Holland, down to the *Beer* at the Mouth of the *Maes*, which is about 24 Leagues, the Violence of the Waves is curb'd by continu'd Rows of Sandy Hills; between which and the Sea, lies the fineſt Way in the World; and all along the Water is ſo ſhallow on the Shore, that in calm Weather a Man may go in a great Way without being put to ſwim. Upon this Shore many Ships are forced to run by contrary Winds, eſpecially in Winter, when the Nights are dark and long; but when the Sea is calm, 'tis very pleaſant to ſee the great Number of Ships under Sail on that Coaſt, ſome continually diſappearing, and others immediately coming into Sight.

But as they have thoſe Diſadvantages above-mention'd by the Flatneſs of their Country, and the Softneſs of their Soil, they have this great Advantage by it, That they have cut numerous Canals, not only in this but in other Provinces, with little Trouble and Charge, which makes the Paſſage eaſy and convenient, and Carriage cheap betwixt one Town and another; and both Paſſengers and Goods are brought to their Set Stages at the appointed Time in their *Treckſchuyts*, which are drawn by Horſes, and the Paſſengers and Goods are ſecured from Rain, *&c.* the Boats being cover'd by a Deck above, and having Windows in the Sides to let in the Air, by which alſo the Paſſengers may ſee the Country as they travel. They have cut many new Canals ſince their Peace with *Spain* in 1648.

As the overflowing of their Country in the Winter fructifies their Soil, it gives them alſo the Opportunity not only of diverting themſelves on the Ice, as formerly mentioned, but likewiſe of travelling expeditiouſly about Buſineſs with their Skates, by which ſome of 'em will make above 18 Miles an Hour, if the Ice be ſmooth and even; and they have likewiſe Sledges loaden with Goods, which the Men drive before them as they ſlide on their Skates; and they uſually carry long Poles upon their Shoulders, to ſupport them in caſe the Ice ſhould break.

Their Soil, Beaſts, Birds, Fiſh, Inſects, &c.

IN order to the better dreining of their Ground, 'tis cut thro with innumerable Ditches and Channels; and the Ways thro thoſe Grounds are diſtinguiſh'd by Rows of Trees, which make them very pleaſant. Their Paſtures are mighty rich, and produce excellent Graſs, mix'd with great Quantities of ſweet Trefoil; ſo that 'tis little inferior to Oats and Barley for feeding of Cattle, which they conclude from their Hay's being much apter to take Fire than that of other Countries, if not throughly dry'd before it be ſtack'd up. By the Abundance of this choice Graſs, they feed vaſt Herds of Cattle, and eſpecially Cows, which give more Milk than in other Countries; one of 'em in ſome Parts of *Holland* giving no leſs than 3 great Pails in a Day. This, yields them vaſt Quantities of Butter and Cheeſe; in making and preſerving of which, they excel moſt Countries, the Cheeſe of *Holand* being thought not inferior to *Parmeſan*.

The Landlords and Tenants are exceeding careful to improve their Lands: The former obliges the latter to apply certain Portions of Ground to ſuch and ſuch particular Uſes; not to feed above ſo many Cattle in ſuch a Number of Acres; to ſee that the old Ditches be well ſcower'd, and kept open; to cut new ones where they are wanting; to let the plow'd Fields lie fallow one Year in ſo many, and to improve them with a ſufficient Quantity of Dung: Which makes them vie with one another who ſhall beſt cultivate their Ground.

Some Years their Corn-Fields are very much infeſted with Field-Mice, which are of ſo productive a Nature, that they engender almoſt as ſoon as brought forth. They firſt deſtroy the Roots, and afterwards carry what's left above Ground into their Holes: Nay, they purſue the Corn into the Barns; ſo that the Husbandmen ſet Pots half full of Water in the Ground to intercept and drown them. *Ubbo Emmius* ſays, there's alſo a ſmall Inſect about an Inch long, and no thicker at firſt than a ſlender Thread, which comes along with their Winter Miſts and Fogs; and upon the firſt Approach of the warm Seaſon, feeds upon the new-ſprung Blades of Corn in the Nights and Mornings, but about Sun-riſing retires again under Ground, where it conſumes the Roots; but if the Heat of the Summer come early, thoſe Inſects do all periſh by the End of *May*, otherwiſe they grow as big

Digitized by Google

big as a Man's little Finger; and at length, caſting their Shells, change their Species, and become Volatiles. About the Beginning of the Spring, or as ſoon as the Trees put forth their Leaves, upon the firſt Eaſt Winds, they have vaſt Swarms of Caterpillars, which very much annoy their Corn and Fruits.

They are fond of Orchards and Gardens in moſt of the United Provinces; but there are feweſt of them in *Holland*, becauſe they have leaſt waſte Ground there. They are ſo curious in this Matter, that there's ſcarce any Tree, Shrub, Sort of Vine, Herb, Flower, Seed or Bulbous-Root, but what they have in their Gardens. Some Years ago they doted ſo extravagantly upon Flowers, eſpecially on Tulips, that the meaneſt Mechanicks neglected their Buſineſs to trade in them; and ſome, who could ill ſpare it, would give 2 or 3000 Florins for the Root of a fine Flower; but finding the Profit did not anſwer the Pains and Expence, the ordinary Sort were ſoon cured of this Phrenzy.

Minerals they have none in *Holland*, and their chief Foſſile is a Bituminous Earth, of which they make their Turfs. As they dig it in ſome Places, they find great Numbers of Trees under Ground, whoſe Boughs and Leaves appear ſo exactly, that ſome pretend to diſtinguiſh the Species of 'em. This is an Argument, that the Country was formerly overgrown with Wood, and thoſe Trees are ſuppoſed to have been overturn'd by Tempeſts and Inundations, and in Proceſs of Time cover'd over with Earth. In ſome Places they rake up Mud from the bottom of the Water, which they carry out in Boats, ſpread it upon the Ground as equally as they can, lay Boards upon it, tread it; and when the Water is ſqueez'd out, cut it in Form of Bricks, and dry it for Fuel. It is obſerv'd, that the Earth from whence they dig their Turf fills up again in a few Years, which affords the middling Sort a conſtant Fuel; the poorer in many Places making uſe of Cow's-Dung, which they dry up in the ſame Manner; but the better Sort do generally make uſe of *Scots* Coal.

They have no native Foſſile Salt. In ſome Places they collect ſome ſmall Quantities out of the Sea-Water. They are excellent at boiling and purifying what is brought to them from *France* and other Countries. They formerly gather'd Salt out of their burnt Turfs, which were ſuppoſed to be impregnated with it by the frequent Inundations of the Sea. Yet by their Induſtry and Trade, they have not only enough of Salt for themſelves, tho they uſe more of it than any Nation in *Europe*, but to ſupply other Countries.

The uſual Grain in the United Provinces are, Summer and Winter Wheat, another reſembling Barley in the Shape of the Ear, Buck-Wheat or Beach-Wheat, very much us'd by their Brewers; but the beſt and whiteſt Wheat is in *Zealand*. They have likewiſe Barley, Oats, Peaſe, Beans, and Rye, Colewort-Seed, and Rape-Seed; out of which they make Oil, Madder, Hops, and great Quantities of *French* Beans.

The Wild-Beaſts in theſe Provinces are, ſome few Boars and Wolves, and ſuch a Number of Foxes, that the States pay a Price for every one that's taken. They have Multitudes of Hares and Rabbets, which none but the Nobles have Licence to kill or take. They have but few Deer. In ſome Parts of *Drente*, they have a Creature of middle Nature, betwixt a Hog and a Bear. They have Multitudes of Squirrels, of which they tame great Numbers. Their Hogs are but indifferent Meat, being fed with Whey, and ſuch other waſhy Nouriſhment; yet they ſalt a great deal of Pork, which they ſend Annually to the *Indies*.

They have ſtore of Horſes, and have lately mended their Breed, ſeveral Villages contributing to keep a good Stallion, to which every Man of the Neighbourhood is obliged to bring his Mare. *Contingius* commends 'em for their large Size, delicate Colour, and excellent Shapes; but their Heads being thought too great and heavy, they have corrected that, by purchaſing the choiceſt Stallions from neighbouring Countries. They have a great Trade in feeding Black Cattle, of which they purchaſe Annually many Thouſands from *Holſtein*, *Eaſt-Frieſland*, &c. and fatting them in their own rich Paſture, ſell them off in *October*. They have great Numbers of Sheep; but their beſt Mutton is in *Zealand*, where they feed upon Graſs and Herbs, that abound with Salt.

Digitized by Google

Salt. In other Provinces, they feed much upon a low Shrub called Sweet-Broom, and an excellent Cheese is made of their Milk.

They have Multitudes of Storks, which build and hatch on their Chimneys in Towns as well as Villages. They take Flight with their Young about the Beginning of *August*, and, as *Conringius* says, go to *Africk*, from whence they return Annually about the End of *February*. They have vast Numbers of Wild-Ducks from *Norway*, and the Coasts of the *Baltick*, from whence they come to feed in their Channels and Marshes about the End of Autumn, or the Beginning of Winter. They have large Flocks of Wild-Geese, Herons, which build about the Houses of their Gentry, where none are allow'd to disturb 'em, and Wild and Tame Swans, kept at the publick Charge in Moats and Ditches, with Officers to take Care of them. They have great Numbers of Partridges, Snipes, Water-Hens, Quails, Lapwings, whose Eggs they count a Dainty, Larks, Thrushes, and Pigeons, which they allow no Man to shoot. They have likewise Plenty of all the other Sorts of Domestick Fowl. About the Feast of St. *Martin*, they have particular Markets for selling Geese, when the poorest among 'em will be sure to have one for his Family; the Origine of which is ascribed to the particular Respect they paid formerly to St. *Martin* Bishop of *Tours*.

The Fish in and near their own Rivers are, Salmons, which abound most in the Mouth of the *Maes* and *Leck*; Pikes, Mullets, Perches, Trouts, Shad-Fish, and abundance of Eels, many of which they salt up. In some Places, the Right of Fishing is restrain'd to the Nobles; in others 'tis free to every one, and they have Officers to keep the People within due Limits on this Head. The Fish upon their Coasts are, Habardine, Haddocks, great Numbers of Soles, Rays, Sturgeons, Sea-Crabs, Pollards, Congars, Mackrel, excellent Sole-Fish, Smelts, and Herrings; but the latter not being good, are sold very cheap to their Poor. They have Plenty of Muscles, Cockles, Crabs, and other Shell-Fish, but no Oysters. Some of the latter were found in 1620 on the Coast of *Zealand*, which being very good, the Magistrates forbid to disturb them; but the greedy Seamen taking them by Night before they had settled, they soon removed, and have not been heard of since. They have many Sea-Dogs on some Part of their Coasts, which the Fishermen take thus; They disguise themselves in Beasts-Skins at such Times as those Fish come out of the Water; and dancing and playing Antick Tricks before them, draw them from the Shore, where they place Nets betwixt them and the Sea, and then throwing off their Disguise, pursue them till they are entangled and taken.

The Description of this Province agrees to most of the rest; but we shall take Notice of the particular Differences as they come in our way.

The Boundaries of this Province, including *North-Holland* or *West-Friesland*, which in all publick Acts is mentioned apart, are, the *German* Ocean on the W. the Province of *Utrecht* and *Betuwe* on the E. the *Zuyder-Sea* on the N. and *Brabant* and *Zealand* on the S. It lies between 51 Deg. 40 Min. and 53 Deg. of Lat. 23 Deg 10 Min. and 24 Deg. 20 Min. Long. 'Tis about 80 Miles from N. to S. besides the Islands that lie in the Mouth of the *Zuyder-Sea*, and about 40 where broadest from E. to W. but in other Places scarce 25. 'Tis divided into N. and S. The N. is subdivided into *West-Friesland*, the Islands *Texel*, *Vlie*, and *Schelling*, *Waterland*, and *Kennemerland*, *Amsteland*, *Goiland*, *Rynland*, *Delfland*, and *Schieland*. *South-Holland* is subdivided into the Bailiwick of *Dort*, the Land of *Voorn*, the Islands of *Goree* and *Overflackee*, according to modern Geographers; but according to the Archieves in their Chamber of Accounts, the Province is divided, 1. Into *North-Holland*, the Dyck-Graviat of *Rynland*, *Delfland*, *Schieland*, and the Country of *Wordem*. 2. Into *South-Holland*. 3. Into *Voorn*. 4. Into *Kennemerland* and *West-Friesland*, which, according to this Division, is very improperly called *North-Holland*. The whole Province it said to contain 23 Wall'd Towns, and 400 Villages; but M. *de Fer*, in his *Methode Abregée*, reckons 32 Cities, 5 great open Towns, 407 Villages, 6 Fortresses, and 22 Islands; of which in their proper Places.

Their

Digitized by Google

Their Ancient GOVERNMENT.

Grotius, in his Book *De Antiquitate Reipub. Batavicæ*, endeavours to prove the Freedom and Independency of this Province in all Ages, not excepting the Time when the *Franks* enlarg'd their Kingdom in thoſe Parts. There's ſufficient Ground indeed from Hiſtory to ſay, that they were rather Allies than Subjects to the *Romans*; but Authors are not agreed that they preſerv'd their Liberty after the Declenſion of the *Roman* Empire. The *Atlas Hiſtorique* gives us the Names and Chronology of 35 of their Counts; of the chief of whom we ſhall give a ſhort Hiſtory, after premiſing what *Grotius* has ſaid of their ancient Conſtitution in 12 Heads: 1. If the Principality deſcended to a Female, ſhe was not to marry without Conſent of the States. 2. None but Natives ſhould be Senators, Treaſurers, or Prætors. 3. The States ſhould meet when and where they pleaſed, without being obliged to ask Leave of the Prince. 4. That no Tax ſhould be impoſed, or any one exempted from paying them, without Conſent of the States. 5. That no War, Offenſive or Defenſive, ſhould be undertaken without their Approbation. 6. The Prince in his Letters ſhould uſe the *Dutch* Language. 7. He ſhould not coin or alter Money without Conſent of the States. 8. He ſhould not alienate any of his Dominions. 9. He ſhould not aſſemble the States out of their own Country. 10. If he ſtood in need of Money, he ſhould deſire it of the States in Perſon, and levy none but what they granted. 11. Juſtice ſhould be adminiſtred by the ordinary Judges. 12. If the Prince decreed or commanded any thing contrary to their ancient Cuſtoms and Laws, no Man ſhould be obliged to obey him.

The Counts of *Holland* were alſo Sovereigns of *Zealand*: The firſt of 'em was *Thiery* or *Theodorick*, by ſome called *Diderick*, and *Childrick*, Son to *Sigebert* D. of *Aquitain*, who they ſay was of *Trojan* Race; and that the Emperor *Charles the Bald* being informed, about 863, that *Holland* was infeſted by the *Danes*, he did, at the Requeſt of Pope *John* VIII. confer the Principality upon *Thiery*, who coming thither with an Army, ſubdued the *Frizons* and *Danes*, and took Poſſeſſion of the Country, againſt the Will of many of the People, who therefore rebelled, and drove him out; but being reſtored by the Emperor's Aſſiſtance, he puniſhed the Rebels, and married, ſays *Scriverius*, *Jenna* (as ſome will have it) Daughter to *Pepin*, with whom he lies buried at *Egmond*. His Son *Theodorick* ſucceeded in 903, defeated the *Frizons* in two Battles, rebuilt the Monaſtery of *Egmond* they had burnt down, married *Hildegard*, Daughter to *Lewis* of *France*, died in the 50th Year of his Reign, and was buried at *Egmond*.

He was ſucceeded by his Son *Arnolph*, or, as the *Atlas* ſays, *Thiery* III. about 947, who reign'd but 5 Years, being ſlain, with the greateſt Part of his Nobility, by the *Frizons*, and buried at *Egmond*. *Scriverius* makes *Thiery* III. Succeſſor to *Arnolph*, and ſays, he took *Adebold* the Biſhop of *Utrecht* in Battle, that had ſtir'd up the *Frizons* againſt him; whom having reduced, he gave *Frieſland* to his youngeſt Son *Florent*; after which he went on a Pilgrimage to the *Holy Land*, died as he return'd about 947, in the 46th Year of his Reign, and was buried at *Egmond*, where long after, the Epitaphs of the 3 *Thieries* were found in Monkiſh Rhyming Latin. The *Atlas* makes *Arnolph* his Succeſſor in 988, and ſays, he was ſucceeded by *Thiery* IV. in 993, who having in a Tournament at *Liege* kill'd the Biſhop of *Cologne*'s Brother, fled to his own Country, and was purſued by the *Germans*, who ſeiz'd *Dort*; but being ſurpris'd by the Earl, he kill'd them, with 400 Perſons of Quality, and next Morning was ſhot into the Thigh with a poiſon'd Arrow by a ſculking *German* as he paſs'd careleſly thrô the Street, which on that Account is ſtill called the *Earl's Street*, and died two Days after, in the 9th Year of his Reign. The *Atlas* makes *Thiery* V. his Succeſſor in 1039; but *Scriverius* makes it *Florent* his Brother, who ſucceeded in 1049, and by digging Pits in the Ground, cover'd with Hay and Straw, routed the Archbiſhop of *Cologne*, the Biſhop of *Liege*, and the Count of *Lorrain*. Four Years after he defeated the *Germans* again; but in his Return was ſurpris'd, defeated and ſlain, by the Earl of *Cuik*, at *Hemert*, betwixt the *Maes* and the *Waal*, in the 14th of his Reign over *Holland*, and the 21ſt over *Frieſland*,

Digitized by Google

and interr'd at *Egmond*. His Widow *Gertrude* of *Saxony* govern'd for ſome Time as Guardian to her Son *Thiery*, and afterwards married *Robert*, ſirnam'd the *Frizon*, becauſe he conquer'd that People; and in 1066 he aſſum'd the Government of *Holland*, which he manag'd with great Integrity; but was drove out by *Godfrey*, ſirnam'd the *Crookback'd*, Count of *Lorrain*, and the Biſhop of *Utrecht*.

Godfrey aſſum'd the Government in 1070, built *Delft*, and ſubdued the *Frizons*, who beſieg'd him afterwards in *Alcmaer*; but the Biſhop of *Utrecht* raiſed the Siege, and defeated the Enemy: After which, a Servant of young *Theodorick* kill'd *Godfrey*, by thruſting a Javelin up his Fundament as he was eaſing himſelf in a Room over a Ditch.

Thiery V. or, as ſome reckon him, the VIth, ſucceeded in 1075, reduced the Biſhop of *Utrecht* and the *Frizons*, whom he defeated in two Battles, and ſpar'd neither Age nor Sex.

He was ſucceeded by *Florent the Fat* in 1092, who was a peaceable and religious Prince, and died in the 3d Year of his Reign.

He was ſucceeded by his Son *Thiery* VI. or VII. in 1123. He defeated the *Frizons*, and afterwards beſieged the Biſhop of *Utrecht* in that City; but upon the Biſhop's putting on his Pontifical Habit, and appearing at the Head of his Clergy in order to excommunicate *Thiery*, that Prince beg'd his Pardon, and retir'd. In his Time a great Part of *Utrecht*, with the principal Churches, was burnt. He died in the 40th Year of his Reign.

Florence III. ſucceeded him in 1163, who married the K. of *Scotland*'s Daughter, was reconciled to the Biſhop of *Utrecht* by the Emperor *Frederick*, defeated the *Frizons*, who invaded his Country, and burnt *Alcmaer*, for which he made them pay a prodigious Sum. After this, he went to the Recovery of the *Holy Land*, and died at *Antioch* in the 27th Year of his Reign.

He was ſucceeded by his Son *Thiery* VII. or VIIIth. He had War with his Brother *William*, which was ended by granting him *Eaſt* and *Weſt Frieſland* in Fee. He had afterwards War with the Duke of *Guelder*, invaded *Brabant*, and took *Boiſleduc*, with a great many Priſoners of Quality; but in his Return was defeated and taken by the D. of *Lorrain*, who forc'd him to repair the Damages he had done to *Boiſleduc* before he ſet him at Liberty: After which he died at *Dort*, in the 13th Year of his Reign.

He was ſucceeded by his Daughter *Ada*; who dying without Iſſue in a Year after, her Uncle *William* I. ſucceeded in 1204. He had War with the Biſhop of *Utrecht*, but purchas'd a Peace by his Money, rigg'd out a Fleet, and landed in *Scotland* to poſſeſs himſelf of that Crown, upon the Death of the King his Uncle, to whom he pretended to be next Heir; but hearing that the Count of *Looz* had invaded *Holland*, he return'd, and died in 1223. The *Scots* Hiſtories make no Mention of his Expedition to that Country; therefore we leave the Reader to his own Judgment about it.

He was ſucceeded by his Son *Florent* IV. a valiant Prince. The Counteſs of *Clermont* having heard much of his Courage, and being deſirous to ſee him, ſhe prevailed with her Husband to appoint a ſolemn Tournament; to which it being uſual for all fam'd Soldiers to reſort, *Florent* came thither, and by his gallant Deportment did ſo charm the Counteſs, that ſhe could not forbear praiſing him before her Husband; who being jealous at it, enter'd the Liſts with ſome arm'd Men, and barbarouſly murder'd him in the Flower of his Age, and 12th Year of his Reign.

He was ſucceeded by his Son *William* II. in 1235, who was a Warlike Prince, and on that Account choſen K. of the *Romans*, when ſcarce 20 Years old. He appointed the Court at the *Hague* for determining the Law-Suits in *Holland* and *Zealand*. He ſent his Brother *Florent* againſt the *Flemings* that had invaded his Country, and defeated them in a bloody Battle. K. *William* ſpar'd the Lives of the Priſoners, but ſent them home naked. He went afterwards to *Italy*, where he received the Imperial Crown from Pope *Innocent*, and on his Return was received with great Reſpect in the Empire. He defeated the *Frizons* in a Battle; but as he was marching againſt them a ſecond time, the Ice broke under his Horſe, and he was ſlain by ſome of the Enemy that lay concealed among the Oziers in 1255.

He was ſucceeded by his Son *Florent* V. who obtained two Victories over the *Frizons*,

Digitized by Google

xms, and compoſed his Differences with the Earl of *Flanders*, by marrying his Daughter. He built ſtately Palaces in ſeveral Cities of *Holland*, and is ſaid to have gone over into *England*, with a Deſign to purſue his Title to *Scotland*; but returned, becauſe the *Flemings* had invaded his Country. In his old Age, he forc'd the Wife of *Gerard van Velſon*, his Favourite, who had diſoblig'd him, by refuſing to marry his Concubine; for which *Velſon*, with his Wife's Father and others, ſurpris'd and kill'd him in the 41ſt Year of his Reign. *Velſon* being afterwards taken, was put into a Hogſhead full of ſharp Nails, and roll'd up and down the Streets of *Leyden* till he died. Some others of the Conſpirators were alſo put to Death, and the reſt died miſerably in Foreign Parts.

John I. Son to *Florent*, ſucceeded in 1296. He was in *England*, where he had married the King's Daughter, when his Father died; but haſten'd over, defeated the *Frizons* in two Battles, and died without Iſſue at *Haërlem* in the 4th Year of his Reign, *Ann.* 1299.

He was ſucceeded by *John* II. of *Hainault*, who was Son to his Grandfather's Siſter. He was 5 Years Earl of *Holland*, defended his Brother, who was Biſhop of *Utrecht*, againſt his Enemies; and his Son *William* defeated the *Flemings* by Sea, where they loſt 10000 Men in one Battle. The Writers of thoſe Times ſay, there were ſtrange Apparitions of Fleets on the Sea before this Action. *John* died in 1304.

He was ſucceeded by his Son *William* III. who for his Piety, Juſtice and Mildneſs, had the Sirname of *Good*; as his Brother *John*, who was kill'd by the *Flemings*, was for his contrary Temper call'd, *John without Mercy*. In *William*'s Reign, *Holland* was afflicted with Plague and Famine, which deſtroyed many of their People. In 1328, *Philip* of *France*, by the Aſſiſtance of *William*, obtain'd a great Victory over the *Flemings*. There's a memorable Story of an Act of Juſtice done by this good Earl not long before his Death upon the Bailiff of *South-Holland*, who had taken away a poor Man's Cow, (he refuſing to ſell her, becauſe ſhe gave ſuch a prodigious Quantity of Milk, that his whole Family ſubſiſted thereby) and in Exchange ſent him another, nothing comparable to her; whom the Earl commanded in the firſt place, for the Wrong done, to pay the Countryman 100 Crowns; and afterwards, for the Injury done to himſelf and his Government, to be beheaded. He adviſed his Son *William*, upon his Death-Bed, to maintain Peace with his Neighbours, and lay no grievous Impoſitions upon his Subjects. He reign'd 33 Years. He had by his Wife *Jane* of *Valois* 3 Sons, *William*, *Lewis*, and *John*; with 4 Daughters, *Margaret* Dutcheſs of *Bavaria*, and Empreſs, *Joan* Counteſs of *Juliers*, *Philippa* Queen of *England*, and *Elizabeth*.

He was ſucceeded by *William* IV. in 1337, died without lawful Iſſue, leaving only one natural Son behind him. He was very zealous for the Propagation of the Chriſtian Religion: Upon which Account he aſſiſted the King of *Spain* in Perſon with a conſiderable Army againſt the *Moors*; and by his Valour againſt thoſe infidels, gain'd immortal Fame. When he return'd, he beſieg'd *Utrecht*; and being ready to take and ſack the Town, was perſwaded by his Nobles to agree to a Peace, or rather Truce, upon Condition that 500 of the principal Citizens ſhould come forth with their Heads and Feet bare, and upon their Knees beg his Pardon. After this he fought the *Frizons*; but engaging too boldly, was ſlain not far from *Staveren*.

He was ſucceeded by *Margaret*, Daughter to *William the Good*, and Wife to *Lewis* of *Bavaria* the Emperor. She came with a great Retinue into *Holland*, and having taken Poſſeſſion, reſign'd the Government to her Son *William*, who was to allow her an Annual Penſion; but he afterwards return'd her the Provinces: Upon which there happen'd War between *Holland* and thoſe of *Utrecht*, wherein the latter were worſted. In Revenge for her Brother's Death, ſhe confiſcated and put to publick Sale all the Goods of the *Frieſlanders* that were found in *Holland*.

Her Son *William* V. Earl of *Holland*, *Zealand*, and *Hainault*, and Lord of *Frieſland*, ſucceeded. The Biſhop of *Utrecht*, provok'd by his Hoſtilities, invaded *Holland*, and burnt two Towns. In his Time a great Part of *Haërlem* was burnt down; but the Incendiaries never diſcover'd. After he govern'd 7 Years, he fell mad, and kill'd *Gerard* of *Wateringen*, a Perſon of Noble

Digitized by Google

Extraction, for which he was ſecur'd, and the Adminiſtration taken from him.

He was ſucceeded by *Albert* I. about 1368. He was oppoſed by the *Cabillautin* Faction, who were for ſetting up the Lady *Matilda*, Wife of the diſtracted Earl. *Albert* beſieg'd the Town of *Delph* for burning ſome of his Caſtles, and ſetting at Liberty ſome Perſons he had impriſon'd, he compell'd them to make Reparation, and to diſmantle the greateſt Part of their Town. He had Wars with the *Gueldrians* and *Frizons*, govern'd 30 Years in his Brother's Name, 16 in his own, died, and was interr'd at the *Hague* in 1404.

His Son *William* VI. ſucceeded, made War with the D. of *Guelderland*, with whom he afterwards maintain'd a ſtrict Friendſhip. He got his Daughter *Jaqueline* recogniz'd Heireſs in an Aſſembly of the States, and died in 1417.

Jaqueline ſucceeded; and ſoon after *William* of *Arkel*, a powerful Lord, who had often bid Defiance to the Earls of *Holland*, ſurpris'd the Town of *Gorcum*, where the Lord of *Brederod* beſieg'd him for *Jaqueline*, and recover'd it; but both of 'em loſt their Lives in the Action. *Jaqueline* married the Dauphin of *France* for her firſt Husband; who dying in a Year after, ſhe married *John* D. of *Brabant*. *John* D. of *Bavaria*, her Father's Brother, having the Emperor's Conſent, claim'd the Province, becauſe his Brother left no Iſſue-Male: Upon which *Dort* and ſeveral other Cities revolted to him. He continued as Guardian to his Neece for 3 Years, who falling at Variance with her Husband, a Divorce enſued: But after *John* of *Bavaria*'s Death, the *Hollanders* renounc'd *Jaqueline*, and choſe her Husband the D. of *Brabant*. She afterwards married *Humphry* D. of *Glocester*; and upon his Death, *Francis* of *Borſales*, the D. of *Brabant* being ſtill alive; but finding no Hopes of Iſſue, ſhe reſign'd *Holland*, *Zealand*, *Hainault*, and *Frieſland*, to her Couſin *Philip* of *Burgundy*, and ſoon after died at the *Hague*, in the 36th Year of her Age.

Philip of *Burgundy* took Poſſeſſion, beſieg'd *Calais*, then in the Hands of the *Engliſh*; but miſcarried in his Deſign. He was the firſt that inſtituted the Order of the *Golden Fleece*; and by his Aſſiſtance, *Lewis* the Dauphin was advanc'd to the Crown of *France*. One *John* of *Kouſtein*, whom he advanc'd from the Dunghill to be his Favourite, attempted to poiſon him, which was diſcover'd by the Fellow he employ'd to buy it, becauſe he did not give him the promis'd Reward: Upon which he was beheaded; and the Fellow having own'd, that he would not have diſcover'd it had he paid him the Money, he was alſo put to Death. *Philip* died at *Bruges* in the 34th Year of his Reign.

His Son *Charles the Bold*, formerly called Count of *Charolois*, ſucceeded him in the Dukedoms of *Burgundy*, *Brabant*, *Limburg*, and *Luxemburg*, the Earldoms of *Flanders*, *Artois*, *Hainault*, *French County*, *Holland*, *Zealand*, and *Namur*, the Marquiſate of the Empire, the Lordſhips of *Frieſland*, *Salins*, and *Mechlen*. He took and almoſt ruin'd the City of *Liege*, and drove the D. of *Lorrain* out of his Country, which was recover'd by the Aſſiſtance of the *Swiſſers*, who defeated *Charles*, and kill'd 16000 of his Men near *Morat*. He afterwards laid Siege to *Nancy*, the Capital of *Lorrain*, where being betray'd by *Compobacchio*, an *Italian*, in whom he truſted ſo much, that he hanged a Gentleman who reveal'd the Conſpiracy. He was kill'd, and his Army routed. He was one of the greateſt Princes of his Time, and terrible to *Lewis* XI. of *France*, who had a Hand in his Ruin. He was ſo ſucceſsful at firſt, that his Subjects reckon'd him invincible, and would not for a long Time believe he was dead, but gone on a Penance to *Germany*, where, *Naucleras* ſays, a poor Beggar receiv'd conſiderable Alms under the Notion of being that Duke.

He was ſucceeded by *Mary* his only Child, at 14 Years of Age. She was courted by the Archduke *Maximilian*, the Dauphin of *France*, the Prince of *Wales*, and other great Princes, whom her Father kept in Suſpence. Her Inclination was to the Dauphin, afterwards *Charles* VIII. but his Father *Lewis* XI. making too much Haſt to ſeize Part of her Dominions on her Father's Death, ſhe was ſo much provok'd at it, that ſhe married the Archduke *Maximilian*, Son to the Emperor *Frederick*, with whom her Father had formerly been in Treaty about it, and procured her Conſent by a Letter to the Archduke.

Maxi-

Maximilian, as ſoon as married, defeated the *French* in *Flanders*, and took *Tournay*. He died in 1519, and was ſucceeded by his Son Archduke *Philip*: He by his Son the Emperor *Charles* V. and he by *Philip* III. who was the laſt Count of *Holland*, and the ſecond of that Name K. of *Spain*, in whoſe Time the *Dutch* revolted; of which we have already given an Account.

Their chief Towns.

1. *Amſterdam*, the Metropolis of the United Netherlands, lies in *Amſtelland*, in Long. 23. 30. Lat. 52. 23. 10 Miles E. from *Haerlem*, 18 N. E. from *Leyden*, 27 N. E. from *Rotterdam*, and 18 N. W. from *Utrecht*. It takes its Name from the Dam or Sluce on the River *Amſtel* that runs thrô it, and falls into the *Ye*, a River, or rather an Arm of the S. Sea, which lies on the N. Side of the Town, and ſerves as a Port to this City, which is one of the richeſt and greateſt Trading Towns in the World. 'Tis ſcarce mentioned in Hiſtory before 1299, it being in thoſe Days only a Village of Fiſhermen. The Ground on which it ſtands being Mooriſh, the Foundations were laid upon Maſts, and other large Pieces of Timber, drove by vaſt Force, and at a prodigious Expence, into the Earth. It has received conſiderable Additions at different Times, as the Curious may ſee by *De Witt's* Maps of it. In 1342, 'twas only a ſmall Town on the E. Side of the *Amſtel*, with one Street in the middle, and 5 or 6 acroſs. In 1400, 'twas enlarged as much more on the W. of that River. In 1482, 'twas increas'd ſo much on both Sides, that *Mary* of *Burgundy* thought fit to encompaſs it with ſtrong Brick Walls of extraordinary Workmanſhip, as appears by two of the Gates ſtill remaining, the reſt of thoſe Fortifications being demoliſh'd, to make Way for its further Enlargement. In 1585, it became the chief Seat of the Trade of thoſe Provinces, and was much enlarged. In 1601, 600 Houſes were new built by private Perſons. In 1612, 'twas reckon'd 9100 Paces in Circuit: The Butchery, Guard-Houſe, and the ſtately *Haerlem* Gate, being built about that Time; as was the New Church ſome Time before, and the W. and N. Churches ſome Time after. In 1656, they took in a very large Space of Ground, which is ſince built up, and the whole incloſ'd with new Walls of Brick, Gates of Stone, and a large Ditch all round, which gives it the Form of a Semi-circle. 'Twas above 60 Years ago reckon'd to contain 54000 Houſes; whereas *Paris* then contain'd but 46000: And about 40 Years ago, an *Engliſh* Traveller reckon'd it full as big as *Venice*, and half as big as *London*; ſince which, it has received ſuch conſiderable Additions and Improvements, that 'tis juſtly reckon'd one of the greateſt and fineſt Cities in the World. Sir *W. Temple* ſays, that called the *New Town* is ſo ſpacious for Extent, and its Buildings ſo much more ſumptuous and beautiful than thoſe of the Old Town, that it muſt needs have diverted a great Part of that Wealth which was formerly applied to Trade. The City is exceeding populous, and neatly kept; the Streets are large, with Canals of Water in the Middle, over which there are many Stone Bridges, beautify'd with Iron Rails and Ballaſters. The Houſes are all of Brick or Stone, and very beautiful, eſpecially thoſe in the Streets of the New Town, called the Lords, Kings, and Emperors Channels, where many of the Houſes are of Freeſtone, adorn'd with Columns and Chapters of the *Corinthian* Order. Theſe three, with thoſe called the *Haerlem* and *Cinghel* Street, are the chief of the City. Upon the Approach of the *French* in 1672, the Citizens willingly agreed to the ſpoiling of their fine Gardens for raiſing new Fortifications, which were made very regular and ſtrong; and at the ſame Time a Dike being cut on the Side of the Land, they had freſh Water convey'd into the Town, which they very much wanted. The particular Buildings of moſt Note are, 1. The *Old Church*, a large and majeſtick Structure of the *Gothick* Order. 'Twas founded in 1360; but the fair Steeple, now its great Ornament, was not finiſhed till 1566. In this Church was buried their famous Admiral *Haemskerck*, who defeated the *Spaniards* in the *Streights* in 1607, when he loſt his Life in the Action, for which he has a noble Monument erected by the States, with a lofty Inſcription. 2. The *New Church*, ſo called to diſtinguiſh it from the other. 'Twas founded about

bout 1414, burnt down in 1645, but ſoon rebuilt with much greater Splendour. At the ſame Time 6334 tall Trees were drove into a Plat of Ground of 100 Foot ſquare, to raiſe a Tower for it of extraordinary Height; but the Foundation not being reckon'd ſtrong enough, the Tower was not rais'd above 40 Foot high. In the Windows of this Church, the Emperor *Maximilian* is repreſented receiving a large Sum from the City, for which he gave them an Imperial Crown as a Creſt to their Arms, being 3 St. *Andrews* Croſſes, in 1490. In this Church Admiral *De Ruyter* lies buried, and has a ſumptuous Monument erected for him by the States. It has alſo a Skreen before the Chancel of caſt Braſs, which is kept very beautiful and bright; and they have an Organ (ſupported by rich Marble Pillars) of extraordinary Workmanſhip, with a vaſt Number of Pipes, which imitate melodious human Voices. 3. The *Weſt Church*, is a magnificent Structure, with a beautiful Tower, and a large Imperial Crown of Copper on the Top, 260 Foot from the Ground. 4. The *South Church*, is alſo a ſtately Building, with a Steeple 237 Foot high. They have ſeveral other Churches, which are very neat, but not comparable to theſe for Magnificence. M. *Ray* ſays, They have 24 eſtabliſh'd Miniſters belonging to the City; That the Pulpit of the *New Church* is valued at 1000*l.* Sterling; and that there's a ſumptous Monument there for Admiral *Van Gal.n*, who ſignaliz'd himſelf againſt the *Dunkirkers*, the Pirates of *Barbary*, and defeated the *Engliſh* Squadron at *Leghorn* in 1653. 5. The *STADT-HOUSE*, Dr. *Brown* ſays, is the nobleſt Structure in all this Country, and one of the fineſt in *Europe*. 'Tis built of Free-ſtone, 110 Paces in Front, which is more than St. *Peter*'s at *Rome*, 81 Paces deep, and 116 Foot high. 'Tis adorn'd with Pillaſters, Chapters, and Corniſhes, of the *Corinthian* Order. Mr. *Ray* ſays, the Foundation coſt 100000*l.* Sterling, it being built upon 13659 great Piles of Timber drove into the Ground; and ſome compute the Charge of the whole at 3000000. Dr. *Northleigh* ſays, 'tis adorned on the Outſide with Statues and Hiſtory in *Relievo*, beſides the *Corinthian* Pillars; but the *Portico* is not anſwerable to the Magnificence of the reſt. At the Entrance on the Right Hand, lies Hall where the Malefactors receive their Sentence, adorn'd with Marble Statues hanging down their Heads, as if they bewail'd the Fate of the Criminals. The Floors are cover'd with Marble, and the Roofs finely carv'd, painted and gilt. The great Hall is a noble Room, adorn'd on all Sides with fine Marble Pillars of the *Corinthian* Order; the Roof finely painted, and the Floor of Marble, of ſurprizing Workmanſhip; for the Stones, without any other Lines but the joining of 'em, repreſent both the Celeſtial and Terreſtrial Globes. The Ground-Rooms, which are us'd for the Offices belonging to the Bank, and the Priſons, *&c.* are 20 Foot high, and the firſt and ſecond Stories 30 Foot high each: The Gallery and Door-Caſes of the Offices are adorn'd with Marble, carv'd with exquiſite Art: And all the Chambers have Marble Floors, with curious Painting on the Sielings and Chimney-Pieces. Over the Middle of the Front, which is ſomewhat more advanc'd than the reſt of the Work, there's a Bevel above the Corniſh, the Face of which is Marble, with a *Baſſo-Relievo* of curious Carving, a large Statue of Braſs on the Top, and one more on each Side, repreſenting Juſtice, Fortitude, and Plenty. Behind them, there's a handſome Tower in Form of a Pavilion, ſupported by Pillars, in which there's a fine Chime of Muſical Bells. On the Back Front, there's another Bevel with *Baſſo-Relievo*; and on the Top of it, a large Atlas in Braſs, bearing on his Shoulders a Copper Globe of 10 Foot diameter, which Dr. *Brown* ſays is much larger than that of St. *Peter*'s at *Rome*, or than any of thoſe at *Florence*, *Morocco*, or any *Turkiſh* Moſque that ever he heard of. This noble Structure was begun in 1648, and is ſcarce yet finiſhed, at leaſt as to the Paintings and other Ornaments. The Magiſtrates had their firſt Meeting in it the 23d of *April*, 1655. There's in it an Image of the Bleſſed Virgin, on a Pedeſtal of Black Marble, with a Latin Inſcription, importing, that the firſt Stone was laid the 28th of *October*, 1648, when the War, which they had carried on above 80 Years for their Religion and Liberty againſt 3 *Philips* of *Spain* by Sea and Land, almoſt in all Parts of the World, was happily

Digitized by Google

pily concluded, and their Liberty asserted, such and such Persons being Consuls. In this House are kept their Courts of Judicature; and, which is an odd Custom, the Doors of such City Tenants as do not pay their Rent at the Day appointed, are brought hither, and not restored till they have made Satisfaction. In a Vault under the Stadthouse, is kept the *FAMOUS BANK OF AMSTERDAM*, supposed to be the greatest Treasure of the World. Sir *William Temple* says, That there's constantly an Appearance of infinite Riches there, such as Bars of Gold and Silver, Plate, and numberless Bags, which are said to be Gold and Silver, and may be so for ought that can be discovered by such as have only a transient Sight of them. The Burgomasters alone have the Inspection of it; and no particular Account being taken from Age to Age of what passes in and out, 'tis impossible to make any Guess at the Proportion between the real Treasure and Credit of it, which is not to be valued, being the same with that of the whole City, whose Stock and Revenue equals that of some Kingdoms; and they are bound to make good all the Money brought into it. 6. The *EXCHANGE*, a very stately and magnificent Structure, much after the Manner of the *Royal Exchange* at *London* before the Fire, but of an oblong Form. 'Tis built of Brick, with Pillars of Stone along the Walks; and in the Shops above, vast Quantities of all sorts of Goods are exposed to Sale. 'Tis exceeding large, frequented by an incredible Number of People and Merchants from all Nations. *Misson* says, 'tis 200 Foot long, and 120 broad: The Galleries above are supported by 46 Pillars, but not so spacious or many, as those of the Exchange of *London*. 7. Their *Spin-house*, for the Correction of loose young Women, and such as are taken walking in the Streets at Night, or in suspicious Places. Sometimes the Citizens send their Daughters hither for Chastisement, for which they have particular Chambers allotted. 8. Their House of Correction for idle Men, especially Youth, which was formerly the Nunnery of *Santta Clara*, but converted to this Use in 1595; as was that of St. *Ursula* for Correction of Females in 1596. At the Entrance of the House, there are two Lions bridled, with this Inscription:

Virtutis est domare quæ cuncti pavent.

A very proper Emblem, since 'tis designed for curbing of the Vices of those who refuse Obedience to their Masters or Parents, and live disorderly. Such as come hither, are forced to earn their Bread, by rasping *Brazil* Wood; and if they cannot be brought to it by Blows, are put into a Cellar, where Water is gradually let in upon them, which they must pump out or drown. Some are put into this House during Life, and others longer or shorter, according to the Nature of their Crimes. To curb that barbarous Practice among their common People of slashing one another with Knives, there's a Law, That such as draw a Knife for that End, shall either pay down 100 Livres, or work 3 Months in this House. 9. Their Hospital for Children, where 600 Orphans are educated, and well look'd after. 10. Their *Dolhuys*, for delirious People, like our *Bedlam*. They have two other Hospitals, where above 2400 Children are maintain'd, and taught to read and write. They have two more, one of which is for decrepit or old Men, and another for 300 old and decrepit Women, besides an Hospital for the Sick; their Pest-house, a large Building, founded in 1631; and another Hospital where all poor Travellers, without Distinction, are lodg'd and entertain'd for 3 Nights, and no longer. In order to defray the Expence of so many charitable Foundations, besides what's given towards them by well-dispos'd People, they impose several little Taxes, as a Penny upon every one that passes through the Gate after Candle-light, half the Money receiv'd at the Play-house; and upon Appointments at Taverns, or any other Publick House, they have Boxes to put in Forfeitures from those that do not keep their Time, for the Use of the Poor. Dr. *Northleigh* says, there's scarce a Window where you do not see a Box, with, *Remember the Poor* on it; and at every Bargain, something is reserv'd for that Use, which is collected Quarterly by the Parish-Officers, who also on every *Wednesday* of the Month collect the Charity of the Inhabi-

tants.

Digitized by Google

tants at their Doors; and the Officers of the Hoſpitals do the ſame twice a Week. He adds, That the Mountebanks, Rope-dancers, and Muſick-Booths, pay the 3d Penny; and 'tis reckon'd, that there's 80000 Gilders *per Annum* collected at the Play-houſe. By all which, with what's collected in Churches, and the appropriating of the Revenues of ſome former Monaſteries, they maintain 20000 Poor Annually; and their Hoſpitals are ſo large, that ſome contain 500, ſome 1000, and others 1500 Perſons. 10. Their publick *RAWN OFFICE* or Lumbard-Houſe, is a mighty Conveniency to this great City, for it prevents Extortions and Thefts; and as all forfeited Goods are ſold here by open Sale, the Owners may buy their Goods again. Fraudulent Bankrupts are forc'd to pay Fines, and undergo Bodily Puniſhment; and ſuch as are prov'd to be guilty of Perjury in giving an Account of their Eſtates, are put to Death. But on the other hand, Creditors are oblig'd to maintain their Debtors if they put them in Priſon; and 'tis a Capital Crime for the Debtors to defraud their Creditors. Dr. *Northleigh* ſays, the publick Licences they give to Muſick-Houſes, where Men and Women make lewd Bargains, is what's moſt blameable in the Government of that City, and exceeds what's practis'd at *Rome* it ſelf. 11. They have a *Schola Illuſtris*, where in the Summer 6 Profeſſors read Lectures in their ſeveral Faculties. It was formerly the Church of St. *Agnes*'s Monaſtery, and converted to this Uſe in 1631. They have likewiſe a ſmall Anatomical Theatre. 12. Their *EAST-INDIA HOUSE* contains an incredible Store of Spices, and other *Indian* Commodities. 13. Their *MAGAZINE* or *ADMIRALTY-HOUSE* is a ſtately large Brick Building by the Water-ſide, in the N. E. Part of the City. It is 3 Angles of a Square, in the Middle of which there's a Yard for building Men of War. The Front is 220 Foot long, and the Wings 200. The Rigging, Stores, and Arms, belonging to their Men of War, are kept in very good Order in ſeveral Chambers. 'Twas built in 1655, ſurrounded with a Ditch for its greater Security; and 72 Men of War lie near it. On the Top of this Houſe, as in moſt others of Note in this City, they have a Ciſtern to receive Rain, to ſupply the Defect of Spring-Water, which is very ſcarce here. A little E. from this Houſe, ſtands the *EAST-INDIA COMPANY*'s *MAGAZINE*, which is a ſtately Row of Brick Buildings: Behind which there's a Yard with Docks for building Ships, a Rope-Yard, and Shops for Anchor-Smiths, and others concern'd in building of Veſſels. Here they lay up their Stores and Wares, which they have not Room for in their other Warehouſes, and in the *Eaſt-India* Houſe that lies in the middle of the City. 14. Their Sluces are Works of prodigious Expence and Art, which deſerve a Traveller's View. They were built to prevent the overflowing of their Cellars and lower Stories, which frequently happen'd when a ſtrong N. E. Wind drove the Water of the *Zuyder-Sea*, and the River *Y* or *Ye*, out of their Channels. Theſe Sluces are built at the Mouth of the 4 Channels that open to the *Y*, are of ſolid Brick-work, 10 or 12 Foot thick from the Bottom of the River to the Surface of the Earth, and built croſs the Channel, leaving only a Paſſage for Ships, which are afterwards ſhut up with ſtrong Flood-Gates, that are capable at all Times to reſiſt the Force of the Water. 15. Their *Weſt-India* Houſe is a ſtately Building. 16. The *Jews* Synagogue is a very fair Structure, they having the Liberty of their Worſhip here, being allowed to live in a particular Quarter of the City, and a Walk for themſelves on the Exchange. They live richer here than any where elſe, and are reckon'd about 20000 in Number. Dr. *Brown* ſays, they had Perſons of Learning and other good Qualifications among them; and that he ſaw them perform Circumciſion thus; They thruſt a Probe betwixt the Glans and Præputium, dilating it ſo, that both the inward and outward Skin are drawn forward, and cut by a certain Inſtrument; after which the remaining Skin is immediately put back, the Blood ſtopt, and the Plaiſter applied; and thoſe preſent ſung all the while, to drown the Cries of the Infant. Dr. *Northleigh* ſays, they have two Synagogues here, the worſt of which is more ſumptuous than thoſe at *Rome* and *Venice*; and that they have Schools to educate their Youth in their Language and Religion. *Miſſon* ſays, there remains in this

Digitized by Google

this City a Convent of Nuns called *Beguines*, consisting of Maidens and Widows who have no Children, and need no other Qualification to be admitted, but a Certificate of their good Behaviour, and of having a Competency to live upon by themselves, or in Society with others of the Sisters, as they think meet. There were when he wrote about 130 of them. The Convent is built like a little Town, with a Wall and Ditch round it, and a Church within it, where they are obliged to perform their Devotions at stated Hours. They wear an odd black Habit, receive and pay Visits, and may quit the Convent when they please. He adds, That because the City is founded on Piles of Wood, they allow no Coaches there, but to some Physicians and Strangers of Note; and instead of them, use Sleds made like Coaches, but slow and uneasy. He computes the Number of Inhabitants to be 200000, and says, it may vie with any City in the World for Riches and Trade. Their standing Militia some Years ago consisted of 8250 Men. Mr. *Ray* says, That none but those of the establish'd Religion are allow'd Steeples or Bells in their Churches. Near the *Jews* Quarter, they have a Physick Garden, well stor'd with curious Herbs and Plants. This City has produc'd many famous Men in all Faculties. *Bleau* says, That in his Time the Presbytery or Consistory of *Amsterdam* consisted of 15 Ministers, 16 Elders, and 24 Deacons; one half of the two last being changed every Year. In 1685, their Bill of Mortality amounted to 6245. The Air of the City is not wholesome, and they were formerly (says Dr. *Northleigh*) much infested with the Plague; but not since 1663, that they laid aside their Wells, and made use of Rain-Water in their stead. We refer the Curious, who would know more of this City, to *Bleau*'s *Theatrum Urbium*. Their Government we have mentioned before, as a Specimen of that of the other Cities in the *United Provinces*.

Having begun with *Amsterdam*, because 'tis the principal City of the United Provinces, we come next to *Haerlem*, and from thence Southward along the Coast round the Province, according to the Course of the Map, for the Ease of such Readers as think fit to compare our Description with the Map.

2. *Haerlem*, in the District of *Rhinland*. Some derive the Name from the *Heruli*; others from the *Dutch* Words *Eere* and *Lammer*, which signify Glory purchas'd with the Sword, which is Part of its Arms. This City lies 10 Miles W. from *Amsterdam*, and 5 S. from the Sea. 'Tis large, populous, and pleasant: The Houses are of Brick, many of 'em splendid, and all of 'em neat: The Streets are large and even, and some of 'em have Canals. The Town is well fortified with strong Walls, and a broad Ditch; but the neighbouring Sand-Hills are so high, that they cannot be drown'd with its Sluces, which lessens its Strength. 'Twas burnt down in 1340, but rebuilt and enlarged beyond the River *Sparn* in 1400. 'Twas made a Bishop's See in 1559. The Cathedral, now call'd the great Church, is the most beautiful, strong and spacious, of that kind in the Province. Among others, here's the Epitaph of *Schenatus* their Schoolmaster, who, for his *Comedia Sacra*, was call'd the *Terentius Christianus*. It had formerly a strong Castle, in which they besieged the Lord of the Place for his Tyranny; which had cost him his Life, but that his Lady capitulated to surrender, on Condition that she should be allowed to bring out as much of her most valuable Goods as she could carry on her Back: Upon which she brought him out betwixt her Shoulders, sav'd him from their Fury, and left the House to their Mercy. Their chief Trade is in weaving Damasks, Velvet, Sattin, Taffety, with other Silk Stuffs, and Linen, the finest and whitest in the Province. They have also a considerable Trade in Thread, Tape, and whitening of Cloth, the Water of their Lake being the best for that Purpose of any in the Country. Some Time after the *Spaniards* became possessed of these Provinces, there were reckoned 25000 People in this City of full Age employed in Trade and Manufacture. Their Town-House and Butchery are handsome Structures. We have formerly taken Notice of their Controversy with the City of *Mentz* about the Invention of Printing, which is not without Reason ascrib'd to *Laurence Coster*, one of their Citizens; over the Door of whose House, which stood about the middle of the City, there was a Latin Inscription, importing, that he in-

Digitized by Google

vented it in 1440. There was likewiſe a Statue erected for him on that Account, ſay *Boxhornius* and *Bleau*; but they were both removed by a late Proprietor, becauſe they drew ſo many People to gaze at his Houſe.

Their Government is by 4 Conſuls, 7 Eſchevins, a Burgomaſter for Life, and a Council of 32. 'Tis famous for the Siege it held out againſt the *Spaniards* for 10 Months, ſays *Strada*, in 1573, when the Town was attacked with asmuch Violence, and defended with as great Obſtinacy, as ever was known. The Townſmen were reduc'd to eat Leather, Graſs, and the vileſt ſort of Animals. They kept a Correſpondence with the P. of *Orange* by Carrier-Pigeons; which being diſcover'd at laſt by the lighting of one of 'em upon a Tent of the *Spaniſh* Camp, the *Spaniards* ſhot all the Pigeons they ſaw about the Town, and prevented it. One *Kenava*, a Woman of the Town, commanded a Regiment of Women, who help'd in defending the Works, repairing the Breaches, and frequently ſallied upon the *Spaniards*. The latter having ſhot two Men's Heads into the City, ſignifying that one of 'em was *Philip Conte*, who came to relieve the Town with 2000 Men; and that the other was *Anthony Pointer*, who betray'd *Mons* to the *French*. The Citizens, by way of Reprifal, put the Heads of 11 *Spaniards* in a Barrel, which they threw over the Walls to the D. of *Alva*, with a Letter, ſignifying that they had paid him 10 Heads, that he might have no further Pretence of making War upon them for the Tenth Part, alluding to a Tax of the Tenth Part of every Man's Eſtate demanded by the *Spaniards*, the Refuſal of which was one of the Occaſions of the War; and to'd him, That ſince they had been long in his Debt, they had ſent him the 11th for Intereſt. Being forc'd at laſt to ſurrender, on Promiſe of being ſecure from Plunder and other Violence, the *Spaniards*, ſays *Bleau*, put 2000 of 'em to Death in cold Blood, contrary to the Capitulation. The Soldiers in Garriſon conſiſted of 4000, and were reduc'd to 1600, 900 of whom were thus barbarouſly put to Death. *Strada* would excuſe this as a Judgment of God upon them for their mocking at Holy Things, meaning Images and Relicks, *&c.* And others charge it to the Rage of the Soldiers, becauſe they were depriv'd of the Plunder, which the City redeem'd by paying 34000 *l.* Sterling. *Bleau* gives an Account of the Learned Men that have been bred in this City. Their Arms are, a Sword between 4 Stars, and a Croſs over the Point, with this Motto, *Vim vincit Virtus*; *i. e.* Valour overcomes Power. They ſay, this Atchievement was given them in the 12th Century by the Emperor *Frederick*, and the Patriarch of *Conſtantinople*, becauſe, during the Holy War, when *Damiata*, anciently *Peluſium*, was beſieg'd by the Chriſtians, and their Fleet could not approach it, by reaſon of Chains drawn acroſs the River, and faſten'd to ſtrong Towers on both Sides, the *Haërlemers* in the Service arm'd the Keels of their Ships with ſharp Saws, ſail'd up the River with a ſtrong Gale, and cut the Chains, which made Way for the reſt of the Fleet, and occaſioned the taking of the Town. In Confirmation of this, they ſay there are two Bells in the high Tower of their Church made of *Corinthian* Braſs: And as a Memorial of it, there are 3 Ships hung up in the great Church, and the Youth of the City make an Annual Proceſſion about the Streets with little Ships, whoſe Prows are ſet with Saws. Dr. *Northleigh* ſays, there are 3 or 4 Organs in their great Church, and the Stalls of many Princes and others of Quality who have been Knights of the *Golden Fleece*, with their Arms painted on the Stalls. *Miſſon* ſays, in their Town-Houſe the Magiſtrates keep the firſt Book that was printed by *Coſter*, in a Silver Caſe wrap'd up in Silk, where they have alſo his Statue. *Meyerus* and *John Gerard* of *Leyden* ſay, That in 1403, a Mermaid was caſt aſhore by a Tempeſt near this City, was brought to eat Bread and Milk, and to ſpin, and liv'd many Years. She would frequently pull off her Clothes, and run towards the Water: She could not ſpeak, but made a confus'd Noiſe; and having learn'd to make the Sign of the Croſs, was buried in the Church-yard when ſhe died. The latter ſaid he had the Relation from ſeveral who had ſeen her.

Without the Walls there's a pleaſant Wood, where the Citizens divert themſelves. Here *Florence* V. built a Palace, which is call'd the Prince's Palace, where are the

Digitized by Google

the Pictures of all the Earls of *Holland* very well done; and in the Summer-Houſe in the Garden, there's that of *Lawrence Coſter*. In the other Rooms, there are ſeveral excellent Pieces by *Heimskirk* and *Goltzius*; but the beſt are thoſe of *Cornelius* of *Haërlem*: And here alſo is the Picture of a Ship with Saws in her Poop, in Remembrance of the Exploit of the *Haërlemers* at *Damiata* abovementioned, by which they ſet at Liberty the Count of *Holland*, who was carried Priſoner into that City. They have two Hoſpitals handſomely kept for Aged and Sick. Dr. *Brown* ſays, he ſaw there ſome Malefactors puniſh'd by Whipping in this Manner; Upon a Scaffold they erect a Poſt, to which they tie the Criminals Hands ſtretch'd up as high as they can, and putting an Iron round their Middle, gave them ſo many Laſhes with Rods as the Judges had appointed. From this City, that called *Haërlem Meer* has its Name, being a Lake above 20 Miles long, and ſo ſhallow, that it might eaſily be dreined, which would make a vaſt Addition to a Country where they want Ground; but the City of *Leyden* will not conſent to it, becauſe from hence they have Water to refreſh their Canals, except the old Channel of the *Rhine* were cleanſed; and this *Amſterdam* will not agree to, becauſe it would bring *Leyden* a Trade by Sea, and injure their own Commerce. There are many old Caſtles and Gentlemen's Seats in the Neighbourhood of *Haërlem*; for which the Curious may conſult *Bleau*'s *Theatrum Urbium*.

3. *Leyden*, Lat. *Lugdunum Batavorum*, *Leyda*, and *Leydæ*, the chief Town of the Diſtrict of *Rhinland*. It lies, according to *Moll*, about 14 Miles S. W. from *Haërlem*, about 18 from *Amſterdam*, 15 N. W. from *Rotterdam*, and 8 N. E. from the *Hague*. 'Tis one of the neateſt and pleaſanteſt Cities in *Europe* for the Beautifulneſs and Statelineſs of its Buildings, the Largeneſs and Cleanlineſs of its Streets, the Commodiouſneſs of its Channels, and the agreeable Rows of Trees planted on each Side of 'em; but the Water not having a good Current, the Channels are apt to ſtink in Summer. It ſtands on the Old or Middle Channel of the *Rhine*; the Mouth of which being choak'd up, as we have formerly mentioned, occaſions the Waters to ſtagnate. 'Tis encompaſſed by a great Number of Cities and large Villages, with which it has an eaſy Communication by Canals. 'Tis called *Lugdunum Batavorum*, to diſtinguiſh it from *Lyons* in *France*; but the Etymology of *Lugdunum* is uncertain, thō ſome derive it from *Legio* and *Dunum*, as having been a Station of a *Roman* Legion; and there being a Hill in the Middle of the City which is expreſſed by the Latin Word *Dunum*. 'Tis ſuppoſed to be older than *Haërlem* or *Dort*, tho' they have the Precedency in voting. *Cellarius* takes Notice of its being mention'd by *Ptolomy* and *Antonin*, and that 'tis there called *Caput Germaniæ Magnæ*, which he takes to be meant of the old *German* Provinces in theſe Parts; tho' he owns, that it could not be then any thing ſo conſiderable as now. Some Ages ago it did not contain above 25 *Rhinlandiſh* Acres. It has been enlarged at ſeveral Times, *viz.* in 1294, 1313, 1389, 1510, and in 1644. It has 8 Gates, the chief of which, called the *White Gate*, was ſplendidly rebuilt in 1650; and the reſt, together with their Bridges, have been lately rebuilt and beautified. *Bleau* ſays, it has 23 Wards, ſubdivided into 90 leſſer Partitions, call'd Neighbourhoods, 30 Iſlands, 24 Channels, 180 Streets, 95 Bridges, and 40 Turrets on the Walls. Every Ward has 4 Magiſtrates, who take Care of Inſtruments to extinguiſh Fire. Each Neighbourhood has a Maſter and two Aſſeſſors to compoſe Differences between the People, and to ſee that Funerals be decently ſolemniz'd. The principal Church is that of *St. Peter*, a handſome Building, adorn'd formerly with a lofty Tower, which fell in 1512, and deſtroy'd their Archives that were kept in it. In this Church are the Epitaphs of many conſiderable Men. *St. Pancras*'s Church is alſo very ſtately; and by the Foundations, it appears to have been deſign'd to have exceeded that of *St. Peter*'s at *Rome* for Bulk. *St. Mary*'s, now called the *French* Church, is a neat Building, but inferior to the other two. There's a Monument erected here for the great *Joſeph Scaliger*, in the Place where he us'd to ſit and hear Sermon, with a Long Inſcription; tho' he himſelf order'd no more to be writ upon it, ſays *Hercuticus*, but *Joſephus Scaliger*. *Jul. Cæſ. Fil. hoc expoſito reſurrectionem*; and upon the Edge of the Stone, *Terra hæc ab Eccleſia empta eſt nemini Cadaver hu-*

Digitized by Google

huc inferre licent. Here is alſo the Monument of the famous Herbaliſt *Cluſius*, with a Latin Inſcription, ſignifying that he was called thither to adorn the Academy, where he lived 16 Years, and died in 1609, in the 84th Year of his Age, and this Diſtich under it:

Non potuit plures hic quærere Cluſius Herbas,
Ergo novas Campus quærit in Eliſiis.

Which may be *Engliſh'd* thus:

Since no more Herbs the Earth to Cluſius *yields,*
He's gone a ſimpling to the Elyſian *Fields.*

They have alſo lately built a new Church of a Circular Form, much admir'd for its Workmanſhip, eſpecially in the Inſide. Their Hoſpitals are, 1. That of St *Katharine*, founded about 1348, but much enlarged ſince. *Blau* ſays, it conſiſts of 7 diſtinct Buildings, with 144 Beds for the Sick and Decrepit, and a great Number of Pallets for the Cure of the Diſeas'd; a particular Apartment for thoſe who have the *French* Diſeaſe, that are look'd after by the City Surgeons; one for entertaining poor Travellers for 3 Nights; another with 68 Beds for ſuch as were diſtracted, or infected with the Plague, but now us'd for the Eaſe of the other Apartments when they are too full. Six Men and Six Women, called *Fathers* and *Mothers*, have the Charge of this Hoſpital. 2. St. *Elizabeth*'s Hoſpital, for Women, which has 65 Beds, and an Apartment to entertain poor Women Travellers for 3 Nights. To this there's annex'd another Houſe of 19 Beds, and there are 4 Men and 4 Women to look after the whole. 3 The Hoſpitals of St. *James* and St. *Barbara*, now made uſe of for Clothworkers. They have an Hoſpital for Orphans, that has been enlarged ſeveral times, where, Dr *Northleigh* ſays, there are 900 entertained, better than in any other Place in the *Low Countries*. 'Tis govern'd by a Man and a Woman, who have the abſolute Management of it, with 4 Men and 4 Women to aſſiſt them. They have likewiſe an Almshouſe, where 12 Almoners diſtribute at Times Bread, Turf, and Money, to the Poor, according to the Number and Condition of their Families. 'Tis ſaid, they diſtribute Alms to 20000 Perſons within the City. They have 13 other Tenements for the Accommodation of the poorer Sort. They have two great Annual Fairs, during which no Man can be arreſted for Debt: The firſt begins on *Aſcenſion*-Day; and during ſome Part of the Fair, the Citizens divert themſelves with Croſs-Bows, and ordinary Bows and Arrows. Their chief Trade is in Cloth and Camblets; and they make great Profit of their Gardening, their Parſnips being carried as far as *Amſterdam*, and much valued. Their Gardners have 4 or 5 Crops a Year from the ſame Ground; ſo that their Gardens are ſold for 250, and ſometimes 300 *l.* an Acre, thô Arable Land yields but 200 *l.* and Meadow or Paſture but 140. They have 3 Boats that go every Day to *Amſterdam*, 8 to the *Hague*, and as many to *Delph*, at ſet Hours; and the like Number comes hither from thoſe Places. They have likewiſe conſtant Paſſage-Boats to *Utrecht* and *Haerlem*. The great Court is a noble and large Structure; in the lower Part of which, beſides what's applied to other Uſes, there are Apartments for 3 Courts of Judicature, one belonging to the City, the other to the Univerſity, and the 3d to the Affairs of the *Rhinland*. Over theſe there are ſeveral Chambers for the Meetings of the Magiſtrates, and other Publick Offices. In that of the City there are many excellent Paintings, and the famous Siege of this Town in 1574 wrought in Tapeſtry. The Draught of the Laſt Judgment, by *Lucas Leydenſis*, was ſo much valued by the Emperor *Rodolph* II. that he offered as many *Hungarian* Ducats of Gold for it as would cover it over. That called the *Rhinland-Houſe* is alſo remarkable, where the Dyk-Grave, with his Aſſiſtants, meet about their Buſineſs, which is to take Care of the Sluces, Banks, Dikes, and Channels, in the *Rhinland*, to prevent Inundations, and to levy the Rent from the Lands which is appointed for this Uſe. That called the *Rhinland* is bounded on the W by the Coaſt of *Holland*; on the E by Part of the Dioceſe of *Utrecht* and *Amſtelland*; on the N. by Part of the *Y*, along the Courſe of the Dike that goes from *Haerlem* to *Amſterdam*, and by the Shallows and Waſhes as far as *Beverwick*; and on the S. by a Line drawn from

Mont-

Digitized by Google

Montfort to *Oudewater*, from thence to *Goude*, and afterwards to the *Hague*. It had the Name of *Rhinland* from the middle Branch of the *Rhine*: And all the Inhabitants of this Diſtrict are obliged, by Laws agreed on among themſelves, to provide for the Maintenance and Reparation of the Dikes, Channels, and Sluces, in that Country; and they have ſeveral Councils, form'd of a Dyk-Grave, and 7 Aſſiſtants called *Heemraaden*, who are all ſworn to the faithful Execution of their Office. They have alſo a Hall call'd the *Prince's*, and another for the Archers; upon the Windows of which, all the Earls of *Holland* are curiouſly painted. They have a magnificent Building for examining and ſealing of Cloth, which much exceeds our *Blackwell-Hall*, whereof they are ſaid to have made 100000 Pieces in one Year. The *Burg*, formerly built for a Defence, but now only an Ornament to the City, ſtands about the middle of it, in an Angle made by the Channels of the Old and New *Rhine*. From hence the Burgraves or Governors of *Leyden*, frequently met with in Hiſtory, had their Name. Some ſay, 'twas built by the *Romans*, as a Garriſon to one of their Legions. Others aſcribe it to *Hengiſt* the *Saxon*, as a Trophy for his Conqueſt of *England*. 'Tis a ſtrong round Fortification, built of Stone, has an Aſcent of 50 Steps, and is encompaſſed with a Wall 21 Foot high, the ſurrounding Arch being 610 Foot in Circuit. From hence there's a pleaſant Proſpect of the Town, the neighbouring Country and *Haerlem* Lake. It has a deep dry Pit in the middle, ſuppoſed to have been the Gate of a Paſſage under Ground from hence to *Catwick* on the Sea, which is about 4 Miles. Over the Gate of it ſtand the Arms of the City, being the Croſs-Keys, with a Lion Rampant Gardant, and a Sword in his Right Paw, with this Motto on one Side, *Pugno pro Patria*; *i. e.* I fight for my Country; and on the other, *Hæc Libertatis ergo*; *i. e.* Theſe are the Marks of my Liberty. The chief Streets are, *Rapinburg*, the pleaſanteſt; that which reaches from the *Hague* Gate to that of *Utrecht*, which has the beſt Trade; and the *Haerlem* Street which is the largeſt. The Canal of the Old *Rhine* has 6 Bridges, 4 of Wood, and 2 of Stone: One of the latter is their Market for Corn, and the other for Fiſh. This City was beſieged by the *Spaniards* in 1574, who knowing the Strength of it, encompaſs'd it with 60 Forts, in order to ſtarve them out. The Siege continued with great Vigour above 5 Months, which reduc'd the Inhabitants to the greateſt Extremity by Hunger and Fatigue, during which above 10000 of 'em periſhed; but conſidering the barbarous Uſage that *Haerlem* met with, they reſolved to hold out to the laſt, and gave this Anſwer to one of the Enemy's Summons, *That they would not yield ſo long as they had one Hand to eat, and another to fight.* But their Neceſſities preſs'd ſo hard upon them at laſt, that they were forc'd to have Recourſe to a deſperate Remedy, which the Prince of *Orange* had adviſ'd them to before, *viz.* to cut the main Banks of the *Maes* and *Iſſel* betwixt *Goude* and *Rotterdam*, to lay the Country under Water; which at firſt riſing but ſlowly, gave them little Help; but towards the End of *September*, all the Country about was turn'd to a Sea, and drown'd 1500 *Spaniards* before they could retire. The firſt Relief they received was on the 3d of *October*; the Anniverſary of which they ſtill obſerve as a Day of Thankſgiving, and every Year they have a Tragi Comedy to repreſent this Siege; and the Money receiv'd from the Multitudes that come to ſee it is applied to the Uſe of their Poor. They were forc'd to make Paper Money during the Siege, which was afterwards chang'd into Silver, being two Pieces of different Value. The bigger had ſtamp'd on the Face, a Lion holding up a Hat on a Spear, with this Legend round the Side, *Hæc Libertatis ergo*; and on the Reverſe the City Arms, and theſe Letters in the Middle, N. O. U. L. S. G. I. P. A. C. *i. e. Nummus obſeſſæ Urbis Lugdunenſis ſub Gubernatione Illuſtriſſimi Principis Auriaci Cuſus.* In *En liſh*; The Money of the beſieg'd T. of *Leyden*, coin'd under the Government of the moſt Illuſtrious Pr. of *Orange*. The leſſer Piece had on the Face, a Lion with a Croſs-Keys, and this Legend, *Pugno pro Patria*; and on the Reverſe, *Lugdunum Batavorum*. In 1575. the Univerſity was founded here by the States General, to reward the Inhabitants for their Bravery; in Remembrance of which, they kept a Jubile the 8th of *February*, 1675. their Stile being then 100 Years from its Foundation: And

Digitized by Google

And tho' the Country was then in great Diſtreſs becauſe of the *French* Invaſion, they gave the Pr. of *Orange*, the States, and others of the Nobility, a ſplendid Entertainment. The Schools of this Univerſity conſiſt of a large Pile of Brick Building, 3 Stories high, and 2 Rooms on a Floor. In the uppermoſt, the famous Printer *Elzevir* kept his Shop. The Students have ſometimes been 2000. Adjoining to it is the Phyſick Garden, well ſtor'd with Plants, and a long Gallery, where the Profeſſor of Botany reads his Lectures. Here there are abundance of Curioſities; among others, a Sea-Horſe as big as a Bull, whom it reſembles in Shape, brought from the Cape of *Good Hope*; and a Bird's-Neſt made of Sea-Froth, by a certain Fowl in the Kingdom of *Coramandel* in the *Eaſt-Indies*, which the *Chineſe* diſſolve in Pottage, and reckon it an excellent Diſh. There's another Building for Publick Lectures near the Garden. There are only two endow'd Colleges in this Univerſity, the reſt of the Students living where they pleaſe in the Town. The Profeſſors, when they read Lectures, or preſide in publick Diſputations, wear Gowns, but not otherwiſe; and the Students wear no diſtinct Habit. Each Profeſſor, beſides what he has from the Students, has a Salary of about 2 or 300 *l. per Annum* from the States. They confer no Degrees but that of Maſter of Arts and Doctor in each Faculty. Thoſe matriculated in the Univerſity-Regiſter have very large Privileges, and are exempted from paying Exciſe, if above 20 Years of Age, for a certain Quantity of Beer and Wine. The Rector *Magnificus*, who was formerly choſen out of three preſented to the Stadtholder, and now to the States General, is choſen Annually, and enters on his Office the 8th of *February*, the Day when the Univerſity was dedicated. Beſides him, there are 3 Curators, who have the 4 Burgomaſters for their Colleagues, and the Syndic for their Counſellor. The Univerſity-Senate conſiſts of 12 Profeſſors, being 3 of each Faculty; but the Curators may augment their Number, under certain Limitations. The Rector, with his 4 Aſſeſſors, the Burgomaſters, and ſome of the Eſchevins, determine all Cauſes Civil and Criminal; and the Rector gives Sentence without Appeal. The moſt conſiderable Thing in the Library are the MSS. which are numerous, and of great Value *Joſeph Scaliger* gave 'em 87, Dr. *Warner* 956, *Golius* brought 221 from the *Eaſt*: They have 9 that came from *Mauritania*, 370 Greek and Latin, and 6 belonging to the old Library. In the Anatomy Theatre, which is much better than that of *Padua*, or our Chirurgeon's Hall, they have vaſt Numbers of Skeletons of all Sorts and Sizes, ſeveral Mummies, Heathen Relicks and Idols, Habits of divers Countries, the Skeleton of a young Whale above 6 Yards long, taken out of an old one; a Man's Bladder, that holds two Gallons of Water; the Mummy of an *Egyptian* Prince, ſaid to be 1800 Years old; and a Toadſtool that grew in *Haërlem* Lake, ſaid to be 1000. The Curious may ſee more of this in Dr. *Northleigh*'s Deſcription of the *United Netherlands*. There have been many famous Profeſſors in all Faculties in this Univerſity, whom we have not Room to name. This City is alſo noted for the Birth of the Taylor, *John* of *Leyden*, King of the *Munſter* Anabaptiſts. The Government of this City being like that of *Amſterdam*, we paſs it over, as we do the Lordſhips, Villages, and Diſtricts, under its Juriſdiction; of which the Curious may inform themſelves from *Meurſius*'s *Athenæ Batavæ*, and *Boxhornius*'s *Theatrum*. Dr. *Northleigh* ſays, the Apothecaries and Chirurgeons, of the latter of which there's above 100, have each a Hall; and without the Walls there's a Peſt-houſe, with a ſtately Walk of tall Trees to it. The Houſe is well built, nobly endow'd, and a Revenue laid up for it every Year.

The chief Places in the Neighbourhood of *Leyden* are, 1. *Rhinsburg*, anciently a ſtrong Town, that had a Nunnery for Women of Quality, and lies 4 Miles N. W. from *Leyden*. 2. *Nortwyck*, 4 Miles further N. W. a pleaſant Place, inhabited by many Gentlemen. 3. *Valkenburg* noted for a great Annual Horſe-Fair in *September*, where Foreigners come to buy Horſes. 4 *Britain*'s Houſe or Caſtle, 5 Miles N W. from *Leyden*, and about 1 ½ N. from *Catwyck* on the Sea. 'Twas diſcovered about 300 Years ago, upon the retiring of the Ocean from the old Mouth of the *Rhine*; but more in 1550 and 1552, when the Sands were left bare for 20 Days. It has been a Square of

Digitized by Google

of 960 *Roman* Foot in Compass. At that Time many large Stones, Bricks, and old fashion'd Vessels, and *Roman* Coins of several Metals, were dug up, with this Inscription, *Ex Ger. Inf.* Some think 'twas built by *Caligula*, for a Granary of Corn brought out of *Britain*. 5. *Alphen*, about 8 Miles S. E. from *Leyden*, supposed to be *Antonin's Albiniana Castra*, or the Camp of *Alphenus Varus*, the *Batavian* General mentioned by *Tacitus*. 6. *Rombureh*, between *Alphen* and *Leyden*, called by *Velleius*, *Pretorium Agrippinæ*, where many *Roman* Coins of Silver and Brass, and old Statues, &c. have been found. The District of *Rhinland*, of which *Leyden* is the Metropolis, contains above 57 Villages and Gentlemen's Seats; which, with the numerous Canals and pleasant Walks, make a most charming Prospect from the neighbouring Sand-Hills. Many of these Villages have their Annual Fairs, where formerly the Boors us'd to play at Back-Sword, and mangle one another with as much Fury as the *Roman* Gladiators, till 'twas forbid by the States. 7. *Bodegrave*, about 11 Miles S. E. from *Leyden*, the Seat of the ancient *Bagonda*, mentioned by *Cornelius Aurelius*, supposed to have been a sort of Banditi. 'Twas a very fine Village till burnt by the *French* in 1672. 'Twas afterwards fortified by the *Dutch*, and noted for the Prince of *Orange*'s Camp to cover the Country against the *French* at that Time. 8. *Woerden* or *Voerden*, about 7 Miles E. from *Bodegrave*. 'Twas built to be a Curb on *Utrecht* by Bishop *Godfrey* about 1160, and the Cause of bloody Wars betwixt the *Hollanders* and those of *Utrecht*. *Herman* of *Woerden*, one of the Assassins of Count *Florent* V. harbour'd there; upon which the *Dutch* took it. The *French* took it in 1672, fortified and put 2000 Men in it. The Pr. of *Orange* kill'd 2000 *French* before it, but fail'd of taking it. The *French* deserted it in 1703, after destroying most of the Fortifications, and made the Town pay 16000 Gilders to be rescued from the Flames. 9. *Oudewater*, about 7 Miles S. from *Woerden*, upon the *Issel*, noted for good Hemp produced in its Soil, and for several Learned Men. The *Spaniards* burnt it in 1575, when they were forc'd from before *Leyden*, and cut off most of the Inhabitants: Since which, it has never recover'd its ancient Splendour.

In the Neighbourhood of *Leyden*, between *Rhinland*, the Ocean, the Body of *North-Holland*, the *Ye*, and Lake of *Haerlem*, lies *Kennemerland*, which *Hadrianus Junius* thinks to have been the Seat of the ancient *Caninefates*, mentioned by the *Roman* Historians. *Conringius* supposes it was called by the present Name, which signifies the King's Palace, because the ancient Counts of *Holland* resided here. The Latin Name *Caninefates* is said to come from their feeding on Conies, which abound in this Country. The Inhabitants formerly, under the Conduct of *Gysbrecht* Lord of *Amstel*, in the Reign of *Florent* V. took Arms against their Magistrates, out of a levelling Principle; but were afterwards reduced, and prosecuted the Murtherers of Count *Florent* with great Zeal, tho' their Leader *Gysbrecht* was one of 'em.

4. The *Hague*, Lat. *Haga Comitis*; in *Dutch*, *S. Gravenhaghe*; *i. e.* The Grove of the Earls. It lies about 8 Miles S. W. from *Leyden*, 6 N. W. from *Delph*, 12 N. W. from *Rotterdam*, and about two S. E. from *Scheveling*. 'Tis reckon'd the principal Village in *Europe*, is encompassed with a broad Ditch, enjoys all the Privileges of a City, except sending Deputies to the States; and is so large and populous, that it exceeds several considerable Cities: The Streets are long and large, the Buildings are stately, and it abounds with shady Walks. On the Side of *Delph*, there are lovely Meadows, through which there's a Way cut to *Scheveling* with infinite Expence. 'Tis a hollow, streight, and pav'd Road, where all Passengers, except the Fishermen of *Scheveling*, pay a certain Tax towards reimbursing the Charge, and keeping it in Repair; which Taxes are said to arise to 4000 Gilders *per Annum*. On the Side of *Leyden*, there's a large Wood, which abounds with Oaks, there being none else in the Province. 'Tis about 1500 Paces long, but nothing near so broad, well stor'd with Deer, Hares, and other Game; and is of great Use to the Inhabitants for taking the Air. In this Wood, there's a fair Structure built for a House of Mourning by *Amalia* of *Solms*, Widow to Pr. *Henry Frederick* of *Orange*, which is signified by an Inscription of Gold Letters round the Gallery. It has a spacious Garden, with many pleasant Groves adjoining to the House

A

Digitized by Google

At the Entrance on the Right, are two white Marble Statues of *William* I. and Prince *Maurice*; and on the Left, thoſe of Prince *Henry Frederick* and *William* II. and further in on the ſame Side, a Chamber floor'd with Cedar, and hung with Arras, repreſenting the glorious Actions of Prince *Henry*. In the Lantern on the Top, there's a Gallery for Muſick; and in the middle of the Sieling, the Picture of Princeſs *Amalia* in Mourning. The Prince's Palace in the Town was built in 1250 by *William* II. Count of *Holland*, and K. of the *Romans*, who removed hither the Court of *Holland* from *Grave-ſand*. Part of the old Buildings, with a large Hall fill'd with Trophies taken from their Enemies, Stationers, and Picture-ſellers, like that of *Weſtminſter*, but nothing ſo large, ſtill remain. The Palace added by Pr. *Maurice* makes it a noble and ſpacious Building: It contains the Prince's Lodgings, and the Places where the States General and Provincial, and the Supreme Court of *Holland*, meet. 'Tis fortified with good Ditches, and Guards are conſtantly kept at the Gates. On the N. Side, there's a large Pond, with ſtately Walks of Tile-Trees on its Banks. There are two Churches belonging to it, one of 'em formerly a *Jacobine* Cloyſter, and the other lately built, of a round Figure, but no Pillars within, and ſo beautiful on the Outſide, that 'tis ſcarce to be match'd in the *Netherlands*. There are two fine Piazza's, one before, and another behind the Palace, with ſtately Houſes. Here Foreign Ambaſſadors are lodg'd, and in this Part of the Town the States General have their Houſes. Every City has built Houſes for their Deputies: That of the Deputies of *Leyden* is reckon'd the fineſt. A ſumptuous Houſe for founding of Cannon was built here in one Year during their War with *England*. In 1661, a Hoſpital was built by one *Newport*, a Popiſh Woollendraper, for 60 poor Popiſh Widows; but the States oblig'd him to allow one half for Proteſtants. 'Tis built uniform, and every Widow has a Garden. The Market-place faces the great Church, which is a high ſquare Tower. In this Church Admiral *Obdam* has a ſtately Monument, with an Account of his great Actions, particularly that wherein he was killed by the *Engliſh* in 1666, and blew up his own Ship, as is ſaid in his Epitaph. The Inhabitants refuſed formerly to have the Town walled or fortified, reckoning it more glorious to be the chief Village of *Europe*, than an ordinary City, which coſt 'em dear: The D. of *Guelder*'s General having invaded the Country meerly for the Plunder of this Town, which occaſioned it afterwards to be encompaſſed with a Ditch. This Place has produc'd many Learned Men, among whom was *Joannes de Haga*, called otherwiſe *Joannes de Indagine*: But for this we refer to *Bleau* and *Guicciardin*.

Within two Miles of this Place lies the Village of *Ryſwick*, where the Prince has a noble Palace, with fine Gardens. 'Twas formerly called *Newburg-Houſe*, becauſe built by a D. of *Newburg*. 'Tis famous for the Treaty concluded there betwixt the Confederates and *France* in 1697; is adorned with a Marble Stair-Caſe, Marble Floors, and Paintings by the beſt Maſters; has a fine Terraſs, and a noble and lofty Front of Free-ſtone.

5. *Scheveling*, 2 Miles N. W. from the *Hague*, lies on the Sea: Part of it is Annually carried off by the Waves; ſo that from being a Town of good Note, 'tis now become an inconſiderable Village; yet it retains its Privileges: And 'tis ſaid, no Malefactor can be condemned at the *Hague*, except the Eſchevins of this Town pronounce Sentence. 'Tis noted for Fiſhing, and for a Sailing-Chariot belonging to Prince *Maurice* kept here. 'Twas made by *Stevinus*, a great Mathematician, and in two Hours Time would ſail from *Scheveling* to *Putten*, which is 42 Miles, with 28 Perſons in it; and thô the Wind were ſtrong, 'twas not diſcern'd by the Paſſengers, it ſail'd ſo ſwift. *Grotius* made ſeveral fine Epigrams and Copies of Verſes upon this famous Machine and its Author; for which we refer to *Bleau*. The Form of it reſembled a Boat: It mov'd upon 4 Wheels of an equal Bigneſs, and had 2 Sails, was ſteer'd by a Rudder, plac'd behind the 2 hindermoſt Wheels, and was ſtop'd by letting down the Sails, or turning it from the Wind; ſo that it ſeem'd to exceed for Art the Chariots made uſe of by the *Chineſe* in their Champion Countries. They likewiſe make uſe of a little Veſſel in this Province capable of holding two Perſons, with a Bottom like a Sledge,

Digitized by Google

Sledge, which they drive upon the Ice; and 'tis form'd so much like a Boat, that if the Ice should break, the Passengers are in no Danger. The *Atlas Historique* takes Notice, That in 1672, when *England* and *France* design'd to have invaded *Holland* by Sea, the Tide chang'd its usual Course, and was stop'd for 12 Hours, tho' very regular at other Times, to the great Astonishment of the Inhabitants; and next Morning the *French* and *English* Fleets were scattered by a dreadful Tempest. About 10 Miles S. W. from the *Hague* stands *Honstaerdyk*, a stately Palace belonging to the Pr. of *Orange*, with fine Gardens, beautiful Fountains and Statues, and among them some Antick ones, as *Roman* Gladiators, *Samson* tearing a Lion, *&c.* Dr. *Northleigh* says, 'tis superior to many noted Places in *Italy*: The lower Rooms are pav'd with Marble, and those above are very sumptuous. There are two Galleries full of excellent Paintings; and the Princess's Closet is curiously wainscotted with fine Japan-work. On the Backside there's a pleasant Grove, with several regular Plantations of Greens, which make a Square of half a Mile from each Angle to the Center; and beyond this they have a Place for Foreign Birds and Beasts, that are kept there in great Numbers.

About 6 Miles N W. from the *Hague*, is the Village of *Losdun*, in whose Church lies entomb'd *Margaret*, Wife to *Herman* Count of *Hennenberg*, Daughter to *Florence* Count of *Holland* and *Zealand*, and Sister to *William* K. of the *Romans*; who, in the 40th Year of her Age, meeting with a poor Woman that had two Twins in her Arms, upbraided her as unchast; alledging, that one Man could not get two Children at once: Upon which the Woman, being provok'd, wish'd the Countess might have as many Children at a Birth as there were Days in the Year; which they say came to pass in 1276, when she was brought to Bed of 365 Sons and Daughters, that were all baptiz'd by *Guido*, a Suffragan of *Utrecht*; all the Males being called *John*, and the Females *Elizabeth*. *Guicciardin* quotes *Erasmus* and *Ludovicus Vives* for the Story. 'Tis also mentioned by Mr. *Ray*, Mr *Misson*, and Dr *Northleigh*; but the latter suspects it as a Popish Legend: Yet in the Church there's a Table fix'd to the Wall, with an Inscription relating the Fact. This Inscription appears to be new, because that related by *Guicciardin* 100 Years ago is shorter, and of another Nature. They shew here two Brass Basons in which the Children were baptiz'd, with this Latin Distich under them:

En tibi monstrosum nimis & memorabile factum,
Quale nec a Mundi Conditione datum.

Importing, that such a Monstrous Birth was never heard of since the Creation. *Bleau* and *Johnson* do likewise relate the Inscription different from what 'tis now. From all which we may conclude, that there was certainly such a Monstrous Birth, since 'tis told by so many Authors of Credit, but aggravated with fabulous Circumstances by the Monks.

6. *Delph*, Lat. *Delphum*, and *Delphi*. It had its Name from the Ditch cut between it and the *Hague*. It lies 6 Miles S. E. from the *Hague*, 10 S. W. from *Leyden*, and 8 N. W. from *Rotterdam*. 'Tis a large, neat, and stately City, and has spacious Streets, with Currents of Water running through them. The Stadthouse is a noble Structure, with a Court of Justice, and 6 other large Apartments for the Magistrates. There's a spacious Square betwixt it and the New Church, which has a lofty Steeple. In this Church there's a noble Mohument, erected to the Memory of Pr. *William* I. of *Orange*, who was barbarously murther'd here, as we formerly mentioned, with this Inscription:

D. O. M. Et æternæ Memoriæ Gulielmi Nassovii, Suprem. Arausionensium Principis. Patr. Patr. qui Belgii Fortunis suas posthabuit & suorum, valedissimos exercitus ære plurimum privato his conscripsit, his induxit. Ordinum Auspiciis Hispaniæ Tirannidem propulit. Veræ Religionis cultum; Avitas Patriæ Leges; revocavit, restituit. Ipsam denique Libertatem tantum non asservam, Mauricio Principi, Paternæ virtutis hæredi Filio, Stabiliendam reliquit. Heroes vere pii; prudentia, invicti, quem Philip. II. Hisp. & Europæ Timor timuit; non domuit, non terruit; sed empto Percussore fraude nefanda fusulit. Fœderat. Belg. Provinc. Perenni Memor. Monum. fec.

" To the great and good GOD, and to
" the immortal Memory of *William* of *Nas-*

Digitized by Google

" *ſau*, Sovereign Pr. of *Orange*, the Father " of his Country, who preferr'd the Proſperity of the *Netherlands* to that of himſelf and his Family; did twice levy and " bring in an Army at his own Charge; " repell'd the Tyranny of *Spain* under the " Conduct of the States; recover'd and " reſtor'd the true Religion, and the ancient " Laws of his Country, and left its Liberty to be eſtabliſhed by his Son Pr. *Maurice*, the Heir of his Father's Virtues: " The States of the United *Netherlands* have " erected this Monument, to perpetuate " the Memory of that truly pious, prudent and invincible Hero, whom *Philip* II. of *Spain*, the Terror of *Europe*, " dreaded; but not being able to terrify or " conquer, he hir'd an Aſſaſſin treacherouſly " to murther.

Dr. *Northleigh* ſays, Pr. *William*'s Tomb has his Effigies upon it in Marble, and his Statue ſtanding by it in Braſs, arm'd Capa-pé, and a Fame ſounding over him, with this Motto, *Te vindice tuta Libertas*; *i.e.* You were the Champion and Preſerver of our Liberty; and another Emblem of his going on ſteadily in a Storm, with this Motto, *Sævis tranquillus in Undis*. At his Feet there lies the Repreſentation of a Dog, which they ſay dy'd of Grief when he was murther'd. The Dr. adds, That this Monument is adorn'd with as good Braſs Statues and Marble as any he ſaw in *Italy*. There are 4 other Princes and Princeſſes of his Family contain'd in this Monument. In the Old Church, which is alſo a ſtately Fabrick, but inferior to the New, are the Monuments of the great *Van Trump* and *Van Heine*, two of their Admirals, who were ſlain at Sea.

This City is two Miles in Circumference, and fortified with a Wall and Ditch, but after the ancient Manner. The chief Magazine and Armory of the States is kept here, where they have two Pieces of Ordnance caſt at *Lubeck* in 1669, which weigh 8000 Pounds each. 'Tis noted for its excellent Earthen Ware, in Imitation of Porcelain. It formerly had a great Trade in Beer, and likewiſe in Cloth; but the latter is much decay'd, (tho' they value themſelves upon it) becauſe of their Differences with our *Engliſh* Merchants, who removed from hence to *Rotterdam*. This City lies in a Plain among pleaſant Meadows, which they can overflow at Pleaſure by their Sluces. 'Twas built by *Godfrey the Crooked* of *Lorrain*, who was Count of *Holland* for ſome Years. *Albert* of *Bavaria* took it after 7 Weeks Siege, becauſe it favour'd the Faction of the *Hoecks*: Upon which he diſmantled it, and fin'd it in 10000 Crowns. In 1536, moſt of it was burnt down, when the old Storks, which build in their Chimnies, choſe rather to be burnt than to leave their Young. In 1654, the States Magazine was blown up here by an unknown Accident, which beat down about 200 Houſes, killed and wounded many People, and others were miraculouſly ſav'd under the Ruins. It has produced many Learned Men in all Faculties, for whom we refer to *Bleau*; but they are aſham'd of the blaſphemous Heretick *David George*, who was born here of mean Parentage, and perſonated our Saviour, but fled from hence, and died under a Counterfeit Name at *Baſle* in 1556, where his Corps was expoſed to publick Diſgrace, and his Eſtate confiſcated. *Delph*'s Haven belongs to this Town, and lies within half a League of *Rotterdam*, with which, and *Delph*, it has a Communication by a Canal. *Albert* of *Bavaria* allow'd thoſe of *Delph* to build this Haven, for the good Services they did him. The *Eaſt-India* Company have a ſtately Houſe here. 'Tis conveniently ſeated for a ſtrong Fortification, and ſends out Buſſes, *&c.* for Fiſhing. It has a tolerable Court and a Church, and is defended by 3 ſtrong Banks againſt Inundations and Tempeſts.

Seven Miles S.W. from *Delph* lies *Maesland-Sluce*, formerly a ſmall Village, but now become a conſiderable Town by their Fiſhery. About 3 Miles further S. lies *Vlaerdingen*, Lat. *Vlaerdinga*, now a poor Village; but once ſo conſiderable a Town, that anciently it gave Name to the whole Province. 'Twas moſtly deſtroyed by Inundations, and their Trade is now enjoy'd by *Delph* and *Rotterdam*. Near the Mouth of the *Maes*, about 7 Miles from *Delph*, lies *Graveſond*, Lat. *Comitis Arena*, formerly a well fortified Town, the Seat of the Counts of *Holland*, and of the Provincial States; but now a ſmall Village. In 1546, upon digging up ſome old Foundations, ſeveral curious Earthen Veſſels, ſuppos'd to be 1400 Years

Digitized by Google

Years old, were found here. The adjacent Country produces the beſt Wheat, and ſweeteſt Graſs, in *Holland*, which makes the *Graveſand* Cheeſes highly eſteem'd. Near this Place ſtood the ancient Palace of the Lords of *Polan*, which, with ſeveral neighbouring Caſtles, were burnt by thoſe of *Delph* in 1359. This Eſtate now belongs to the Family of *Orange*. Betwixt *Vlaerdingen* and *Delph*'s Haven, lies *Schiedam*, at the Mouth of the *Schie*, which gives Name to *Schieland*. This Town is very ancient, was made a City in 1274, and ſtill has Magiſtrates, and ſome Villages under its Juriſdiction. 'Tis chiefly noted for Herring-fiſhing, and making of Nets.

7. *Rotterdam*, lies at the Mouth of the *Rotter*, 8 Miles N. E. from *Delph*, about 3 E. from *Schiedam*, 7 S. W. from *Goude*, and 8 N. W. from *Dort*. 'Tis the chief City of *Schieland*, and, according to *Guicciardin* and *Trithemius*, was founded by one *Ruterius*, a King of the *Francs*, in the 89th Year of Chriſt: The Truth of which is doubted. 'Tis of a Triangular Figure, and ſo much increas'd of late, that, next to *Amſterdam* and *Leyden*, 'tis ſuppoſed to be the biggeſt Town in *Holland*; but in Trade, is certainly next to *Amſterdam*. It lies on the N. Side of the *Maes*, which is very broad there, and makes a good Harbour, tho' 15 Miles diſtant from the Sea. By the deep Canals which run into the Heart of the City, Ships of great Burden come into it, lade and unlade at the Merchants Doors, where they lie ſafe from all Danger. The City is large, and exceeding populous; and their Port is frequented by more Ships from *Great Britain* than that of *Amſterdam*, becauſe 'tis more commodious. The Greatneſs of their Trade has occaſioned them to enlarge the Town, and to purchaſe new Privileges. They have a conſiderable Trade in Beer, which is tranſported to *Amſterdam* and other Places; and every Hour of the Day, at the ringing of a certain Bell, a Paſſage-Boat goes off to ſome of the neighbouring Towns. The Houſes are of Brick, and many of 'em magnificent, with Door-Caſes, Window-Caſes, and Stair-Caſes, of Marble. The Streets are large and neat. The *Stadthouſe*, *Exchange*, *Eaſt-India* Houſe, and *Admiralty*, are good Structures; and their Glaſs-Houſe one of the beſt in the 7 Provinces, where they make abundance of Glaſs Toys and Enamel'd Bowls, which they ſend to the *Indies*. They have 4 Churches, of which St. *Lawrence*'s is the largeſt. From the Top of its Steeple there's a fair Proſpect of *Delph*, the *Hague*, *Leyden*, *Dort*, and the greateſt Part of *South-Holland*. This Town is noted for the Birth of ſeveral great Men, and particularly *Eraſmus*, who was born in a little Houſe near the great Church, and over the Door there's his Picture, with this Diſtich:

Ædibus hic Ortus Mundum decoravit Eraſmus,
Artibus ingenuis, Religione, Fide.

Importing, That *Eraſmus* was born here, to adorn the World with Arts, Learning and Religion. There are other Inſcriptions of the ſame Nature in *Spaniſh* and *Dutch*. On the great Bridge in the ſpacious Market-place, there's a ſtately Braſs Statue of *Eraſmus*, in a fur'd Gown and a round Cap, with a Book in one Hand, and the other upon it, as if he were turning a Leaf. There are ſeveral Latin Inſcriptions on the Pedeſtal in Commendation of this great Man, and they have likewiſe his Picture, which was ſent them from *Baſil* 4 Years before his Death. The *Engliſh* and *Scots* have two conſiderable Churches here. In the great Church are the Tombs of *Cornelius de Wit* and *de Cortenaer*, two of their Admirals, who were ſlain at Sea. Their faireſt Structure is that called the *Cheminhuys*, or Senate-Houſe, where they conſult about Publick Affairs. 'Tis a ſpacious ſquare Building, whoſe Front is of Free-ſtone, curiouſly adorn'd with Fret-work. The Air of this City is not very good; for its low Situation makes it liable to Fogs, and their Canals have not Current enough to carry off their Filth, which makes them noiſome in the Summer; but there are many curious Walks about the City, which make it very pleaſant, and its Situation is ſtrong. Their Dock for building Ships deſerves alſo a Traveller's View.

8. *Goude* or *Tergou*, is about 8 Miles N. E. from *Rotterdam*, ſtands on the Conflux of the *Iſſel* and *Gouwe*, from which 'tis named. 'Twas founded by Count *Florent* V. about 1262, who granted it many Privileges. 'Twas burnt down about 100 Years after, and likewiſe in 1420, during the War betwixt

Digitized by Google

twixt *Jaqueline* of *Bavaria* and *Philip* of *Burgundy*. 'Tis almoſt of a round Figure, ſtands in a mooriſh Soil; and by their Sluces, can drown the adjacent Country, which makes it unacceſſible, except by two Banks on each Side the *Iſſel*, which are ſo well fortified, that no Enemy can come that Way; and the Town is likewiſe encompaſſed with a broad and deep Ditch. They had formerly a Caſtle, where the Archives of *Holland* were kept; of which nothing remains now but a high Tower. The Market-place is very large; the Town-Houſe ſtands in the middle, and near it the great Church, which is ſaid to exceed the Cathedral of *Cologne* for Bulk. It had a ſtately Tower, which, together with the Church, was burnt down by Lightning in 1552. After which, 'twas rebuilt in more Splendour than before. The Painting of its Windows is ſo extraordinary, as ſcarce to be equall'd. The whole Town was burnt down in 1438, all but 5 Houſes. Their Buildings are for moſt part more neat than ſtately. The City is kept very clean by a multitude of Canals and ſmall Currents, which are cleanſed by the Tide. The Air is ſo good, that 'tis ſeldom or never troubled with the Plague. 'Tis encompaſſed with Multitudes of Gardens; and the Generality of the Citizens are obſerv'd to be ſuch as have retired from the World, to ſpend the Remainder of their Time in Quiet and Pleaſure. The Cheeſe made in its Diſtrict is much eſteemed. For the Learned Men born in this Place, we refer to *Bleau*.

Goudeſtuce, which takes its Name from this Place, lies near the old Channel of the *Rhine*, between *Bodegrave* and *Leyden*. 'Twas ſtrongly fortified by the States, to ſtop the Incurſions of the *French* in 1672 and 1673.

9. *Schoonhoven*, lies 8 Miles S. E. from *Goude*, 10 Miles W. from *Vianen*, and 13 E. from *Rotterdam*. It takes Name from its fine Gardens, and lies on the N. Side of the *Lech*. *Florent* IV. caſt up a huge Bank between *Amerongen* and this Town in 1252, which brought great Profit to it and the neighbouring Country. 'Twas almoſt quite burnt down in 1330. 'Twas taken from *John* of *Brabant*, to whom moſt of the Cities of *Holland* had ſubmitted, in 1424, by the Troops of Counteſs *Jaqueline*, when all the Garriſon, except *Albert Beyling*, one of the Governors of the Caſtle, were put to Death immediately; and he having only a Month's Time given him to viſit his Friends, and ſettle the Affairs of his Family, he return'd, ſay the *Dutch* Writers, like *Regulus* the *Roman*, and put himſelf into the Hands of his Enemies, who cruelly buried him alive. Its Trade is advanced by a Stream of the *Iſel*, which falls here into the *Lech*, and they have a conſiderable Advantage by Herring-fiſhing. 'Tis ſo well fortified, that the *French* were repulſed before it in 1672 with conſiderable Loſs. Its Fortifications have been much improved ſince that Time *John Tates*, a Man of a Gigantick Stature, was born here ſince 1660, and carried about moſt Countries of *Europe* for a Show. A Man of a middle Stature might eaſily ſtand under his Arm-Pit. From the End of his middle Finger, which was 7 Inches long, to his Elbow, were 25 Inches and an half. The Length of his Hand to his Wriſt was 11 Inches, and all his Limbs proportionable. *Oliver van Nort*, one of the firſt that ſailed round the World, is buried here in the great Church. The famous *Longolius* and other Learned Men were born in this Place.

10. The *Brill*, lies in the Iſland called *Voorn*. *Hadrianus Junius* derives its Name from *Breheel*, as being ſituated on that broad Mouth of the *Rhine* called anciently *Helius*, which ſeems confirmed by the neighbouring Town called *Helvoetſluce*, at the Bottom of the ſaid Channel. This Town is noted for being taken by the *Sea Geuſe*, as formerly mentioned, which retrieved the Affairs of the United Provinces, and ruin'd thoſe of *Spain*. 'Tis very ſtrong, and has a convenient Port, which brings it a good Trade, and makes it populous. 'Twas one of the Cautionary Towns given to Qu *Elizabeth* for aſſiſting the *Dutch*, and reſtor'd to them 30 Years after by K. *James* I. The great Sir *Francis Vere* was Governor of it for ſome Time. The City is neat and well built, lies 12 Miles below *Rotterdam* to the W. and was the uſual Place where Packet-Boats arriv'd from *England* formerly, till they found *Helvoetſluce* more convenient. The Streets are large and handſome: Their great Church is a good Structure, and the Steeple a Land-mark to Sailors. There are

plea-

Digitized by Google

pleasant Walks of Trees on the Walls. The Island in general is fruitful in Wheat and other Corn; but the Air too moist by the Neighbourhood of the Sea and the *Maes*.

11. *Helvoetsluce*, lies 3 Miles S. from the *Brill*, has a convenient Harbour, where the Packet-Boat from *England* usually arrives. 'Twill be for ever memorable for the Pr. of *Orange*'s setting out from hence with his Fleet and Army in 1688, to rescue *Great Brittain* and *Ireland* from Popery and Slavery. The Land of *Putten* makes Part of the same Island, and is only divided from the Territory of the *Brill*, and that called *Beyerland*, by some Dikes and Channels. The chief Town is *Geervliet*, seated among fruitful Fields; which, besides Corn, produces a Turf, and a prickly Herb like *Spanish* Broom, which Providence seems to have furnished on those sandy Downs, to prevent their being carried away by the Wind, and exposing the Country to Inundations. The two *Beyerlands* have likewise good Arable Land, and Pasture Grounds.

Three Miles S. W. of *Helvoetsluce* lies the small Island called *Goeree*, which signifies a good Road for Ships, by which the Town of that Name grew very rich; but the Harbour is of late choak'd up by Sand, which has lessen'd its Trade. There's a Tower here, which is a Land-mark for Sailors.

East from this Island lies *Over-Flackee*, about 13 Miles long, and 4 where broadest. It has many Villages and Towns, the chief of which is *Summersdyck*, that belongs to *Zealand*. It had formerly a good Trade, which is now decay'd. This Island has much good Corn Land, but little Pasturage. Betwixt *Voorn* and *Rotterdam*, lies the Isle of *Isselmond* or *Overmaes*, where the *Issel* empties it self into that River. 'Tis equal to any Part of the Province for Fruitfulness and Richness of Soil, is about 10 Miles long, and 4 where broadest. 'Twas recover'd from the Sea by *Charles the Warlike* of *Burgundy*.

12. *Dort*, is Capital of its Bailiwick, and the first in Dignity of the Province of *Holland*. This Bailiwick was made an Island in 1421, when a Tempest drove the Waters up the *Maes* and *Maruwe*, with such Violence, that it overflow'd the Banks, and swallow'd up a large Tract of Land between *Dort* and *Brabant*, with 72 Villages, and 100000 People. Some say, That a wicked Boor, bearing a Grudge to one of his Neighbours, made a Hole in the Bank to let in the Water to drown him and his Family by Night, designing afterwards to have made up the Breach; but the Wind being high at the same time, the Waves broke in with such Force, that the Fellow was drown'd in the Attempt, and occasioned the Desolation above-mentioned. This City is very ancient, and, according to *Scriverius*, was so considerable in 898, that it held out a Siege against one of the Counts of *Holland*. It stands on the *Maruwe*, which being made up of the *Maes*, the *Rhine*, and the *Ling*, gave Occasion for some Geographers to say, that it stood upon 4 Rivers. 'Tis so strong by Nature since its Bailiwick was made an Island, that it has little need of Art. 'Twas formerly the Seat of the Earls of *Holland*, and the Place where they and their Subjects swore mutual'y to one another upon their Inauguration. The Name of *Dordrecht* signifies a Ferry on the River *Dort*, upon which it formerly stood; but this River is now swallowed up by the Channel of the *Maes*. It lies about 9 Miles S. E. from *Rotterdam*, and 11 S. from *Goude*, is a large, rich, and populous City. The Houses are high, and of Brick, scarce inferior to those of *Antwerp*: The Streets are kept neat and clean, pav'd in the Middle with Stone, and on the Sides with Bricks set Edge-wise. The *English* Merchants keep a Court here, where they have great Privileges, and two Churches, as the *French* have one. From the Steeple of the principal Church, there is so large a Prospect, that one may see as far as *Breda*. In one of the upper Rooms of the Gunners-Hall or Guild, sate the famous Synod which condemn'd the *Arminians*. It has the Staple of Wines brought down the *Rhine*, and has close and strong arch'd Cellars for keeping it; but *Rotterdam* has now a large Share of that Trade. It has also the Staple of Corn, Wood, and other Merchandize, brought down the *Rhine*; and abundance of Salmon and other good Fish are taken near it. 'Tis called the Maiden City, because, as they say, 'twas never taken by an Enemy, tho' frequently besieged: Yet we have heard before, that the *Germans* possessed them-

selves

Digitized by Google

ſelves of it when they purſued Count *Thierry*; but perhaps that was by Surprize. It muſt be own'd however to be very ſtrong, being guarded on the W. and N. by the *Maes*, and a Channel from thence towards the Neck of the *Biesbos*, and the *Holland-Diep*; and on the S. and E. by the ſaid *Biesbos*, which is a large Bay that reaches to *Gertruydenberg*, and is ſo called from the Bulruſhes that grow in it. It has long enjoyed the Royalty of a Mint, being the Place to which the old Counts confin'd their Coinage. Dr. *Brown* ſays, the Steeple of the great Church has 312 Steps. The Apartment where the Synod was held is very fair and large, in which their Seats are ſtill preſerv'd, and ſhew'd to Strangers. The Government of this City differs much from the reſt in *Holland*; therefore we ſhall give a ſhort Account of it. 'Tis managed by a Schout, a Conſul or Burgomaſter, Senators, Eſchevins, Ex-Senators, and a Council of Eight. The Schout or Judge repreſents the Governor of the Province, by whom he is choſen out of 3 preſented to him by the other Magiſtrates, and votes after all the other Senators, his Buſineſs being chiefly for the Province. The Burgomaſter is choſen every 4 Months by the Senators, Ex-Senators, and Council of Eight. He is choſen out of the Ex-Senators, has a ſort of Supreme Authority, and 3 Halberdiers conſtantly to attend him, which is peculiar to him and the Governor of the Province. There's alſo another who is a ſort of a Proconſul, and ſupplies his Place in caſe of Abſence. Juſtice is adminiſtred by the Conſul, 9 Eſchevins, and 5 Senators, who are all changed once in two Years; in the firſt of which, 4 Eſchevins and 3 Senators; and in the 2d, 5 Eſchevins and 2 Senators, go out of Office, and theſe are called the Ex-Senators. The Eſchevins differ from the Senators only in this, that they are more concern'd in examining the Pleas of thoſe who have Law-Suits. The Council of Eight is choſen by the Governor of the Province, or the Court of *Holland*, out of 24 preſented by the 4 Guilds of Tradeſmen, each of which names 6. Their Buſineſs is to aſſiſt the Ex-Senators in the Election of a Conſul, and to inform the Magiſtrates of what's amiſs in the City. Their Learned Men are accounted for by *Blean*.

13. *Willemſtadt*, lies 10 Miles S.W. from *Dort*, on the Frontiers of *Dutch Brabant*. 'Twas built in 1583 by Prince *William* of *Orange*, after whom 'twas called. The Town is ſmall, but very ſtrong, defended by a Wall, 7 Baſtions, a double Ditch, and other Fortifications. It has a good Harbour, and lies conveniently to ſecure the Trade between *Holland* and *Zealand*, upon the Point of the Iſle of *Ruggenhil*; the Houſes are neat. They have a good Market-Place, Church, and Common Hall; but the Air is unwholeſome and moiſt, and occaſions dangerous Fevers and Agues, eſpecially to Strangers. The Iſland on which it ſtands was recovered from the Water, that had a long Time overflow'd it, in 1654. This Iſland and that of *Finart* did formerly belong to *Brabant*, the States of which gave them to Pr. *William*.

14. *Clundert*, lies about 2 Miles S. E. from *Willemſtadt*. 'Twas formerly ſo conſiderable a Harbour, that the Earls of *Holland* had one of their principal Cuſtom-Houſes here. In 1583, 'twas given to the Pr. of *Orange*, who fortified it with 8 Baſtions and ſome Ravelins. It has a fine Church, and a good Chime of Bells.

15. *Sevenbergen*, lies 2 Miles E. from *Clundert*, was formerly a Wall'd Town, but diſmantled by *Philip* of *Burgundy* in 1426, and is now only a populous Village.

16. *Gertrudenburg*, lies about 9 Miles E. from *Sevenbergen*, had its Name from *Gertrude*, a reputed Saint, who died here in 664. 'Tis in the Diſtrict of *Dort*, belong'd formerly to *Brabant*, but was added to *Holland* by Count *William* in 1213. In 1611, the States gave the Sovereignty of it to Prince *Maurice*; ſo that 'tis Part of the Patrimony of the Family. 'Tis a Place of ſuch Conſideration, that the Province of *Holland* bound their Princes by Oath to keep it; and the States of *Brabant* laid the ſame Obligation upon theirs to recover it. It lies upon the *Maes* or *Meruwe*, which is ſo broad there, that it reſembles a Sea. 'Tis very ſtrongly fortified; and beſides the Defence of the *Maes* on one Side, it has a Marſh on the other. 'Twas taken by the *Dutch* in 1573, but baſely ſurrender'd to the Pr. of *Parma* in 1588. 'Twas afterwards beſieged by Sea and Land, and forced to yield to Pr. *Maurice* in 1595, in Sight of Count

Digitized by Google

Count *Manisfeld* and the *Spaniſh* Army. The Prince, thô then but young, did fortify his Camp ſo well, that the *Spaniards* could not attack him; and he kept his Army in ſuch Diſcipline, that the Peaſants labour'd their Ground within the Circuit of his Camp without any Moleſtation. They are ſupplied by the neighbouring River with good Salmon, Sturgeon, and ſuch Plenty of Shads, that 18000 of 'em have been taken near it in one Day.

17. *Heuſden*, lies about 10 Miles E. from *Gertrudenburg*. 'Tis a very ancient Town, having had Lords of its own in 857, who held it in Fee of the Counts of *Cleve*, but at laſt it came to the Count of *Holland*, which occaſioned great Wars betwixt that Province and *Brabant*; but they were at laſt compromis'd by a Match betwixt a Son of *Holland* and a Daughter of *Brabant*, with whom 'twas quitted to the *Dutch* by way of Dowry. In 1407, the Citizens defeated the *Gueldrians*, who contended with *Holland* about the Poſſeſſion of the Town, and gave them ſuch a compleat Overthrow, that they brought home more Priſoners than they themſelves were in Number. 'Tis well fortified, and has a ſtrong Caſtle, which is the Reſidence of a Governor appointed by the States. It has ſeveral Villages, Lordſhips, and ſmall Forts, under its Juriſdiction. The Powder of their Magazine being ſet on Fire by Lightning in 1680, the Caſtle, with the greateſt Part of the neighbouring Street, were blown up, the Town extreamly ſhatter'd, and about 260 People killed. It ſtands on a Stream of the *Maes*, where it forms an Iſland, called the *Hemerder Waert*.

18. *Crevecœur*, lies 5 Miles S. E. from *Heuſden*, upon the ſame River, is a little Town, but ſtrongly fortified, which is ſuppoſed to be the Reaſon of its Name. It was taken and retaken during the *Spaniſh* War, and taken by the *French* in 1672, but abandon'd afterward.

19. *Worcum*, lies 8 Miles N. W. from *Heuſden*. 'Tis a very ancient Town, and in old Writings called *Woudrichemum*. 'Tis the Capital of the Country of *Altena*, which formerly belong'd to the Counts of *Cleve*, from whom 'twas purchaſed by Count *William* in 1333, and afterwards held in Fee by the Lords of *Horn* till 1600, when the Count of *Horn* being executed at *Bruſſels* by the D. of *Alva*, his Widow ſold it to the States of *Holland*, with the Lordſhip of *Altena*, for 90000 Florins. 'Tis well fortified by Nature and Art, being ſituated on a Point of Land near the Conflux of that Branch of the *Rhine* called the *Waal* and the *Maes*.

20. *Loevenſtein*, lies 2 Miles S E. from *Worcum*, on the Point of the Iſland called *Bommelwaert*, is one of the ſtrongeſt Caſtles in *Holland*, and noted for giving Name to the Faction, the Chiefs of whom us'd to aſſemble there, to contrive how they might leſſen the Power of the Princes of *Orange*; and 'twas afterwards made their Priſon.

21. *Gorcum*, lies about 2 Miles N. from *Worcum*, on the other Side the *Maes*, and on the Mouth of the *Ling*. 'Tis called *Gorichemum* in old Writings, is a neat well built Town, ſtrongly fortified by Nature and Art; and is, as well as *Worcum* and *Loevenſtein*, reckon'd one of the Keys of *Holland*. It formerly belong'd to the Lords of *Arkel*, who built a Caſtle here, and oblig'd their Subjects to build Houſes near it; ſo that it quickly grew from a poor Fiſher-Village to be a conſiderable Town, and was walled in. They have a daily Market for Corn, Butter, Cheeſe, *&c.* brought down the *Ling* from the fruitful Country of the *Betaw*, by which, together with the People's applying themſelves to Navigation, the Town is become exceeding rich. They have a good Church, from the Steeple of which may be ſeen 22 Wall'd Towns, with an infinite Number of Villages, which make a Proſpect that's ſcarce to be parallel'd. Their Lords formerly nam'd their Senate; but in 1651, the States gave them Power to name their own Magiſtrates. Over the Water-Gate there's this Inſcription, *Civitas in qua maxime Cives Legibus parent, & in Pace beata, Bello invicta*; *i. e.* A City happy in the Loyalty of its Inhabitants, bleſs'd in Peace, and unconquer'd in War. The *French* could not take it in 1672. Near this City, they ſhew a Place where they pretend *Hercules* of *Germany* formerly encamp'd, and gave Name to the Country of *Arkel*; the Lords of which were formerly ſo powerful, as to make War with the Counts of *Holland*; but being at laſt overpower'd, they ſold their Lands to the Dukes of *Guelder*, who afterwards ſold moſt of it to the Counts of *Holland*. *Bleau* gives an Account of the great Philoſopher *Henry* of *Gorcum*, and others of their Learned Men.

22. Hier

Digitized by Google

22. *Heuclom*, or *Hockelum*, lies 3 Miles N.E. from *Gorcum*. 'Twas anciently called *Hercules*'s Home, and said to have been the Residence of the *German Hercules*. It had formerly a ſtrong Caſtle, which is now demoliſh'd.

23. *Aſperen*, lies 2 Miles E. from *Hockelum*. 'Tis a ſmall Wall'd Town, belonging to the Family of the *Boetzlaers*, and is noted for giving Birth to ſome eminent Divines.

24. *Leerdam*, lies 5 Miles N.E. from *Gorcum*. It belongs to the Family of *Orange*, was formerly a conſiderable, but now a ſmall Town, with the Remains of an ancient Caſtle, from whence the *Gueldrians* us'd to inſeſt *Holland*.

25. *Vianen*, was built in 1190. 'Tis walled and fortified, enjoys great Privileges, and is an *Aſylum* for poor Debtors. It ſtands on the S. Side of the *Lech*, a Branch of the *Rhine*, 5 Miles N. from *Leerdam*, had formerly Lords of its own, who pretended to be independent; and one of 'em maintain'd a long Suit upon that Account with *Philip* II. of *Spain*. It lately belong'd to the Noble Family of the *Bredenrodes*, now extinguiſh'd. 'Tis a neat City, encompaſſed with pleaſant Fields, and has a ſtately high Tower adjoining to the Caſtle of *Batteſtein*, the Seat of its Lords, which has fine Gardens, Statues, Pyramids, and Paintings.

26. *Newport*, lies 9 Miles W. from *Vianen*, on the Left Side of the Lake, formerly a large and rich Town, but now only a Village.

27. *Iſſelſtein*, near 3 Miles N. from *Vianen*, on the Borders of *Utrecht*, formerly a Bone of Contention betwixt that Province and *Holland*. It belong'd to the Lords of *Egmond*; one of whom being accuſed of Treaſon againſt the Count of *Holland*, was beſieged and taken here, and forc'd to reſign it for an Annual Penſion in 1417. After which, thoſe of *Utrecht* took and burnt the Town, as the *Gueldrians* did in 1466; but it was rebuilt and fortified by *Frederick* of *Iſſelſtein* in the Time of *Charles* of *Burgundy*, and came afterwards to the Family of *Orange*, who enlarged the Fortifications, and encompaſs'd it with pleaſant Gardens and Incloſures. Their chief Trade is in Cables, Cordage, and other Materials for Shipping.

28. *Sevenhuyſen*, 4 Leagues from *Leyden*, a Village remarkable for a pleaſant Grove half a League long, and a Furlong broad, with a Channel in the Middle. Here abundance of Wild-Fowls are bred, the Profit of which, and from the Grove, is ſo conſiderable, that 'tis lett for 300 *l.* Sterling *per Annum*. The neighbouring Inhabitants flock hither in great Numbers to ſee the young Birds taken by ſhaking the Neſts down from the Trees. Our K. *James* I. is ſaid to have had two Veſſels with young Birds from hence every Year. The chief of 'em are, Shags, reſembling Cormorants, Lepelars or Spoonbills, Quacks or Night-Ravens, which make a Noiſe in the Night like one a vomiting; Herons, Wood-Pigeons, and Turtles.

29. *Naerden*, the Capital of *Goyland*, lies upon the *Zuyder-Sea*, 12 Miles S.E. from *Amſterdam*, among Marſhes, occaſioned by the River *Vecht*. The old Town is ſwallow'd up by the Sea, the Ruins of which are to be ſeen at Low Water 200 Perches from the preſent Town. 'Tis ſmall, but ſtrong. 'Twas baſely abandon'd by the Garriſon when the *French* came before it in 1672, and retaken by the *Dutch* upon Terms in 1673, tho' the Garriſon conſiſted of 3000 *French*, well furniſh'd with all Neceſſaries, and in daily Expectation of Relief, for which the Governor was degraded, condemned to perpetual Priſon, and all the Officers caſhier'd, but one who proteſted againſt the Capitulation. This Town was ſurpris'd by thoſe of *Utrecht* in 1481, who ſent Soldiers thither dreſs'd like Market-Women; but that ſame Year the *Naerdeners* defeated thoſe of *Utrecht* in Battle, kill'd 1500 of 'em on the Spot, deſtroy'd ſeveral of their Caſtles, and with the Plunder built a Tower at *Naerden*, on which they plac'd this ſhort Inſcription, *Swijcht Utrecht*; *i. e.* Brag no more *Utrecht*, but hold thy Peace. In 1572, this Town ſurrender'd to the D. of *Alva*'s Son, when he barbarouſly order'd all the Inhabitants to meet in the Market-place, and after having ſent Prieſts to confeſs them, made his Soldiers cut 'em all off. Some Writers ſay, that moſt of 'em were Papiſts; and that when the Prieſts confeſſed them, they ask'd, If they were Catholicks? And when anſwer'd, Yes, told 'em, *That was good for their Souls*. *Bentivoglio* ſays,

Digitized by Google

ſays, 'twas a Neſt of Hereticks; and *Strada*, tho' he thinks they deſerv'd Puniſhment for their Hereſy, yet ſays, this Cruelty was a Crime, and attended with ill Conſequences to the *Spaniſh* Affairs, becauſe it made the *Hollanders* deſperate, and occaſioned their obſtinate Defence of *Leyden* and other Places, being reſolved to ſuffer all Extremities rather than ſubmit to the *Spaniſh* Yoke. The States have made it very ſtrong of late with Brick-Walls, Ravelins, Half-Moons, Counterſcarps, and double Ditches; ſo that 'tis now as regular a Fortification as any in the Country, and a great Security to *Amſterdam*. The adjacent Country being high and ſandy, the Air is better than in moſt Places of *Holland*.

30. *Muyden*, lies alſo on the *Zuyder-Sea*, 5 Miles W. from *Naerden*, at the Mouth of the *Vecht*. 'Tis a pretty ſmall Town, extreamly well fortified, with a Sluce, by which they can drown the adjacent Country. 'Tis reckon'd one of the ſtrongeſt Poſts in *Holland*, and has an ancient Caſtle, whither Count *Florent* V. was carried by the Traitor *Veſſen*.

31. *Woſop*, upon the *Vecht*, 3 Miles S. from *Muyden*. 'Tis alſo well fortified, held out againſt the *French* in 1672, and is noted for good Beer, called *Flemiſh* Phyſick.

Weſtfriesland *or* North-Holland.

IT has the former Name, becauſe anciently the Seat of the *Friſii Minores*; and the latter, becauſe of its Situation. The chief Places which we ſhall take, according to the Courſe of the Map, are,

1. *Monnikendam*. It lies on the other Side the *Pampus*, 6 Miles N. E. from *Amſterdam*, and 6 N. from *Muyden*. It has its Name from the ſmall River *Monnick*, which runs through it. 'Tis an ancient City, mentioned in the *Dutch* Annals of 1236, is well fortified with a Rampart and Walls, and has a Monk for its Arms.

2. *Saerdam*, lies on the River *Saren*, 8 Miles W from *Monnikendam*; and tho' but a Village, is populous and large, and ſo remarkable for building of Ships, and well ſtor'd with Ship-Carpenters, that they commonly ſay, they can build as many in a Year's time as there are Days in it. Their chief Trade lies in this, by which the Town is grown very rich. The Old Town ſtands below the Dam of the River, to which there has been added a long Row of Houſes, called the New Town, on both Sides the River, out of which Ships are hawl'd over the Dam upon Rollers.

3. *Edam*, above 2 Miles N. from *Monnikendam*. It has its Name from a great Bank, to hinder the Inundation of the River *Ye*. It lies on the *Zuyder-Sea*, and on the other Side has a very rich Country, formerly a great Lake, about 5 Miles long, and above 2 broad, now called the *Purmer*. Their chief Trade is in building of Ships, and making excellent Cheeſe. The Mermaid, formerly mentioned in our Deſcription of *Haërlem*, is ſaid to have been caught in the Mud here by ſome Maids going to milk their Cows in the *Purmer*.

4. *Purmerend*, ſo called becauſe it ſtands at one End of the *Purmer*, 4 Miles W. from *Edam*. It had anciently a neat and ſtrong Caſtle, was fortified in 1573, and is grown very rich ſince the dreining of the *Breemſter* Lake, which has added a fruitful Tract of Land to it. It belong'd to the Family of *Egmond*, who ſold it to the States in 1590. The *Beemſter* was drein'd in 1612, after 4 Years Labour. It contains 7090 Acres, beſides the Highways and the Dikes that ſurround and croſs it in ſeveral Places, which make in all 10000 Acres. Sir *W. Temple* ſays, the *Beemſter* is ſo well planted with Gardens, Orchards, Rows of Trees, and fruitful Incloſures, that it makes the pleaſanteſt Summer-Landskip he ever ſaw.

5. *Alcmaer*, lies about 14 Miles N. W. from *Purmerend*, and took its Name from the Marſhes with which it was encompaſſed. 'Tis a very ancient City, ſuffered much by the Incurſions of the *Frizons* about 600 Years ago, which obliged Count *Wm.* to build a Caſtle for its Defence, and afterwards to fortify, and endow it with large Privileges. 'Tis one of the moſt beautiful and beſt built Towns in this Country, is ſurrounded with pleaſant Gardens and rich Paſtures; and from the Milk of their numerous Herds of Cows, make vaſt Quantities of Cheeſe and Butter, which enriches the Town. 'Tis called the Gate of the Waterland, was burnt in 1328, but afterwards rebuilt with more Splendour. This Town repulſed the

Digitized by Google

Spaniards in their firſt War with the *Netherlanders*, being then very ſtrong by its Situation among Marſhes, which are ſince drein'd. It has produc'd ſeveral Learned Men, and among others *Cornelius van Drebbel*, who pretended to the Invention of a perpetual Motion; and that he could, by Optick Glaſſes, make himſelf appear in all Shapes and Habits: For an Account of which, we refer to *Hegenitius*. The City is wall'd round; and at the End of it, there's a large Grove regularly planted, which adds much to the Pleaſantneſs of the Place.

6. *Hoorn*, lies on a Bay of the *Zuyder-Sea*, 11 Miles E. from *Alcmaer*, is a pleaſant, rich, and large Town, encompaſſed with ſo many broad Dikes and Channels, that 'tis reckon'd impregnable. The Inhabitants are alſo noted for Courage. Some derive the Name from its crooked Harbour. On the Land-ſide, there are rich Paſtures, fine Gardens, and pleaſant Walks. They have an Annual Fair in *May*, where vaſt Quantities of Butter and Cheeſe are ſold. They have alſo a conſiderable Trade by Sea, and in building of Ships, which has made it a rich and ſplendid Town. 'Twas built about 1300, and was afterwards noted for a great Trade in *Daniſh* Cattle. *Petrus Junius*, the famous Hiſtorian, and other Learned Men, were born here.

7. *Enchuyſen*, on the *Zuyder-Sea*, lies 9 Miles N. E. from *Hoorn*. 'Twas formerly built with Wood; but having ſuffered much by Fire, they build now with Brick. 'Tis very ſtrong by its Situation and Art. 'Twas much enlarged in 1591, and will take an Hour and an half to walk round it. The Steeple of their Church is admired for its extraordinary Height. 'Tis one of the beſt Harbours in this Country; but the Mouth of it being liable to be choak'd by Sand, which made it impracticable for large Veſſels, about 60 Years ago the Inhabitants cleans'd it, and made a new Harbour within the City. They build many Ships, drive a great Trade in fiſhing Herring, and ſend out large Fleets to the *Baltick* and other Places. In *Bentivoglio's* Time, it exceeded all the Towns of this Country in Number of Ships, and for Skill in Maritime Affairs. 'Twas the firſt Town in *Holland* which revolted from *Spain*, has a great Trade in *Daniſh* Cattle, and refining *French* Salt. *Toppe-rus* and other Learned Men were born here. The Cloſet of Rarities collected by *Paludanus*, a Phyſician of this Place, is much commended by *Hegenitius*, who, among other Things in it, took Notice of a Chamæleon that was kept alive ſome Days; during which Time, it appear'd of all Colours but Red and White.

8. *Medenblick*, lies about 7 Miles N. W. from *Enchuyſen*, upon the *Zuyder-Sea*. 'Tis reckon'd the moſt ancient City of *North-Holland*, was formerly its Capital, and, as ſome ſay, the Seat of *Radbodus*, the famous *Frizon* King. Their Caſtle was repaired by *Florent* V. about 1282. The Town is ſmall, but has a noble Harbour, capable of 300 large Veſſels, and the largeſt and ſtrongeſt Dikes againſt the Sea of any Town in this Country. The neighbouring Soil is very fruitful. It was formerly govern'd by a a Dykgrave; but now they chuſe their own Magiſtrates, after the Manner of other Cities in *North-Holland*.

9. *Schagen*, 10 Miles N. W. from *Medenblick*, is a rich Village, and the adjacent Country is reckon'd the richeſt Soil in *Europe*. Land is ſold here at double the Rate of any other in *Holland*; there having been Trees upon it, one of which yielded as much Fruit at once, as brought the Owner 10 *l.* And there's the Picture of a Sheep bred here, hung up in the Shambles at *Amſterdam*, where 'twas ſold for the like Sum. *Egmond*, a noble and well built Village, which gave Title to that Noble Family, lies in this Country, 3 Miles W. from *Alcmaer*. It had formerly a fine Caſtle, and a large Monaſtery. Six Miles further S. lies *Beverwick*, formerly noted for Pilgrimages to it. It has pleaſant Incloſures, and a good Harbour on the Mouth of the *Wickermer*.

The Drein'd Lands of North-Holland *are*,

The *Zype*, the *Beemſter*, and *Purmer*, formerly mentioned; the *Wormer*, and *Schermer*. The *Zype* was firſt drein'd and encompaſſed with Banks by *William* Lord of *Schagen*, and ſecur'd by ſtronger Fences in 1552; but the Sea broke 'em down in 1570. After which 'twas drein'd again, and ſecur'd by a Mole of prodigious Height and Bulk, Proof againſt all Attacks of the Sea, and is a very fruitful Soil. The Noiſe made by the

Digitized by Google

the Waves which break upon it reſemble the barking of a Pack of Hounds, from whence 'tis called the *Hounds Wood*. 'Tis ſupported by large Beams of Timber, firmly plac'd in the Ground, and ſtrongly faſten'd together, the Diſtance betwixt 'em being fill'd with large Stones that reſemble Rocks; and the Mole is ſtrengthen'd by 3 vaſt Banks caſt up againſt it. There were no leſs than 30 Mills made uſe of to drein the *Beemſter*, which is encompaſſed by a Channel from 4 to 8 Rods broad, and is join'd to *Purmerend* by a Bridge at the South End.

To North-Holland *belong the following Iſlands.*

1. The *Texel*, about 6 Miles long, and 5 broad. 'Tis defended from the Sea by Sand-Hills and ſtrong Banks. Moſt of the Soil is applied to feed Sheep, of which they have great Flocks, and the Cheeſe made of their Milk vies with *Parmeſan*. It contains beſides ſeveral fair Villages, a large Town on the E. Side called *Burch*, which enjoys the Privileges of a City. The Inhabitants apply themſelves to Agriculture and Herring-fiſhing; and the States, becauſe of the Importance of this Place, which lies at the Mouth of the *Zuyder-Sea*, have built a ſtrong Fortreſs here, where they have always a good Garriſon.

2. *Flieland*, N. of the *Texel*, about 9 Miles long, and 2 broad. It has only one ſmall Village, and is chiefly remarkable for the vaſt Quantity of Muſcles that are found here.

3. *Schelling*, lies N. from *Flieland*, about 11 Miles long, and 3 broad. It has two Villages with Churches, and three without: The chief of 'em, containing about 1000 Houſes, was burnt, with 120 Merchant-Ships, by Sir *Robert Holmes*, with an *Engliſh* Squadron, in 1666. Some reckon this Iſland to belong to *Eaſt-Frieſland*. Theſe Iſlands lying along the Mouth of the *Zuyder-Sea*, do, with ſeveral large Banks of Sand, break the Rage of the Ocean, and form two good Harbours at the *Texel* and *Vlie*; the firſt being a noted Station for Ships bound to the S. and the other for thoſe bound to the N.

4. The *Wieringe*, ſo called from the great Quantity of Sea-Weed nam'd *Ware*; is a Number of little Iſlands, which lie further in on the Coaſt of *North-Holland*. The chief of 'em is 5 Miles long, and 2 broad, has ſeveral good Villages, a rich Soil, and large Flocks of Sheep. Sir *William Temple* thinks, that the *Zuyder-Sea* was form'd by ſome great Inundation, there being no Notice taken of it in ancient Authors; which is the more probable, becauſe of the great Shoals of flat Sands that lie all over it, and of the Iſlands above-mentioned, that lie like the broken Remains of a continued Coaſt. This Sea is remarkable for a Battle betwixt the *Spaniſh* and *Dutch* Fleets in 1572. The Arms of the Province of *Holland* are, *Or*, a *Lion Gules*.

The Province of Zealand.

FRom *Weſt-Cappell* to the Frontiers of *Dutch Brabant*, taking in the Channels which divide the Iſlands, 'tis about 30 Miles long; and from the W. Mouth of the *Scheld* to the Channel betwixt it and *Goeree*, is about 17 broad. Some deriye the Name from its Situation, and others from *Zealand* in *Denmark*, from whence a Body of *Danes* invaded it, and ſettled here. The Air is ſharper and leſs healthful than that of the neighbouring Countries, and Strangers who come hither are very ſubject to Agues and Fevers; yet that of *South-Beveland* is reckoned mild, and the Air of *Walcheren* is more temperate than in former Ages. The Nightingales frequent it of late, which they did not in former Times, when it was not ſo well planted with Gardens and Orchards as now. The Soil is generally fruitful, produces excellent Wheat, abundance of Colewort, of whoſe Seed they make great Profit, and Madder for Dying. They have good Paſture for Sheep, eſpecially on the Shores; which being often overflow'd, impregnates the Earth, and gives the Graſs ſuch a Reliſh, that their Mutton is preferr'd to that of the other Provinces. The People are of a middle Stature, ſtrong and well ſet. Their Hiſtory ſpeaks of a Woman born here, and brought by the Counteſs of *Holland* to the Marriage of *Charles the Fair* of *France* about 1323, where ſhe was much admir'd for her great Bulk and Stature, the talleſt Men looking like Children

Digitized by Google

to her, tho' both her Parents were of an ordinary Size. Her Strength was such, that she could easily lift up with each Hand a Barrel full of *Hamburgh* Beer, and could carry as much Weight as 8 strong Men. The better Sort are courteous and liberal, but the meaner rough and boisterous, and chiefly employ'd in sailing. They are the best Mariners of the 7 Provinces; and during a War, make great Advantage by Privateering. They have not many Artificers, their chief Application being to Fishing and Foreign Trade; and they are very dextrous at refining of Salt. In their Customs and Humours, they come nearer the *Brabanders* and the *French* than the *Germans* and *Dutch*; and their Women are very neat in their Dress. They were formerly under the same Count with *Holland*, but had their own particular Laws. A great Part of it was subdued by the Earls of *Flanders*, but recover'd again by their own Counts. Their Islands are divided into those on the E. and W. Side of the *Scheld*, which are under the Jurisdiction of two Treasurers, that have the Power of Judges, take Care of the Peace, and punish Offenders; but the Power of him on the E. Side of the *Scheld* is much eclips'd of late by the Bailiffs of *Zirick-zee* and *Tolen*. The Treasurer of the other has his Court at *Middleburg*. The Islands are 8, 4 beyond the *East-Scheld*, viz. *Schowen*, *Duweland*, *Tolen*, and *Oresand*; and 4 between that and the *West-Scheld*, viz. *Walcheren*, *South-Beveland*, *North-Beveland*, and *Wolferdike*. Three of 'em being more expos'd to the Ocean than the rest, the Inhabitants are at great Charge to preserve themselves by Dikes. In this Province there are 8 Cities, and 100 Villages.

The chief Island is *Walcheren*, Lat. *Walachria*, of a round Form, at the Mouth of the *Scheld*, about 9 Miles long, and 8 broad. It exceeds the rest in Number of Inhabitants, Splendour of its Cities, Villages, and Trade; has the Sea on the W. *South-Beveland* on the E. *Schowen*, with the Sea, on the N. and the Mouth of the *Scheld* on the S.

The TOWNS *are*,

1. *Middleburg*, so called because it stands about the middle of the Island, and not from *Metellus*, a Roman Consul, as some would have it. 'Tis large and populous, has many wealthy Merchants, the Streets are spacious, its Churches magnificent, and 20 in Number. One of 'em has an exceeding high Tower, sumptuously built, with a fine Clock and Dial, which is said to have cost 150000 Florins. The Stadthouse is a noble Fabrick, adorn'd with Statues and Images: It had very splendid Monasteries before the Reformation, especially that of St. *Nicholas*, whose Abbot represented the Clergy in the Meeting of the States. *Philip* II. made it a Bishop's See; but the States have since converted it to the Use of their own Meeting, a Chamber of Accounts, a College of Admiralty, and a Mint. This City is much enriched by the Staple of Wine from *France*, *Spain*, and *Portugal*. They purchas'd the Town of *Armuyden* above 100 Years ago; and their old Haven being choak'd up, they have cut a deep and broad Channel from that Town, by which Vessels of great Burden are brought into the City. 'Tis strongly fortified with a Wall, encompassed by large Ditches, and those Ditches surrounded by another Wall. The Lutherans, Anabaptists, and Jews, are allowed Places of publick Worship here. Their Government is by 2 Consuls and 11 Eschevins, chosen by a Council of 24; half of which are such of Quality and Reputation, as cannot be chosen themselves. For their Learned Men, such as *Paul* of *Middleburg*, &c. we refer to *Bleau*. Dr. *Brown* says, the new Church is Octogonal, with a Cupulo, and the Piazza of the Town-House Circular. They constantly maintain at the Entrance of the Town-House 3 Eagles, in Consideration of certain Privileges granted them by the Emperor. This Town lies 32 Miles S. W. from *Rotterdam*, in Long. 22. 30. Lat 51. 45.

2. *Flushing*, 5 Miles S. from *Middleburg*, on the Mouth of the *Scheld*. About 300 Years ago, 'twas only a Ferry to *Flanders*; but increas'd so much by reason of its good Port, that 'twas wall'd by *Adolphus* of *Burgundy* about 160 Years ago. 'Tis of such Importance, that *Charles* V. order'd his Son *Philip* to take Care to preserve it. 'Tis not so large or well built as *Middleburg*, and the Streets are not so spacious; but it has several fine Structures, and particularly their Stadthouse, where they have the Pictures of all

all the Princes of the Houſe of *Naſſau*. The Houſes are generally well built, and the Town well fortified, and rich. The D of *Alva* order'd a Citadel to be built here; but the Inhabitants hang'd his Engineer; and the Town was the firſt that revolted after the *Geuſe* ſeiz'd the *Brill*. 'Twas one of the Cautionary Towns given by the States to Queen *Elizabeth*, when the great Sir *Philip Sidney* was made Governor of it. 'Tis almoſt ſurrounded by the Sea, and their Canals bear Ships of great Burthen, which makes it a Place of vaſt Trade. They built a Church for the *Engliſh* in Q. *Elizabeth*'s Time, with a new Stadthouſe, and a Palace for the Pr. of *Orange*. It belong'd formerly to the Marquiſſes of *Ter-Vere*; but was purchaſed, with the Marquiſate, by the Pr. of *Orange* in 1581. when they ſwore Allegiance to him and his Heirs, and were ever after great Lovers of the Family.

3. *Ter-Vere*, or *Camp-Vere*, about 3 Miles N. from *Middleburg*, is well fortified, with a broad Ditch and 3 Bulwarks, anſwerable to the Number of its Gates. 'Tis a good Harbour, and the beſt furniſh'd Arſenal of the Province. It has been the Staple of the *Scots* Trade ſince 1612, from which it has received great Profit. The *Scots* are allow'd the old Pariſh-Church here. It has been frequently in Danger by the Sea, which overturn'd the Tower that ſtood on the N. Side of the Harbour in 1630. 'Tis govern'd by its own Magiſtrates, who are 2 Conſuls and 9 Eſchevins, aſſiſted by a Council of 24, but ſubject to the Family of *Orange*. Our noble and ancient Family of the *Veres*, Earls of *Oxford*, lately extinguiſh'd, were ſaid to derive their Origin and Name from this Town.

4. *Arnmuyden*, ſo called from the River *Arn*, that runs from hence to *Middleburg*, lies above two Miles E from it. The old Town of this Name is long ago ruin'd, and nothing of it left but a fair Church and a Hall. The new Town above 100 Years ago exceeded *Middleburg* in Magnificence and Riches, and had a good Harbour, capable of Veſſels of 300 Tun. 'Twas purchaſed by the *Middleburgers* from *Philip* of *Burgundy*; but their Harbour being ſpoil'd by Sands, their Trade is decay'd, and their chief Subſiſtence now is from refining Salt. 'Tis encompaſſed with Walls, and has its own Magiſtrates.

5. *Ramekens*, lies 2 Miles E. from *Fluſhing*, is a ſtrong Fort, built by *Mary* Qu. of *Hungary*, when Governeſs of the *Low Countries* for *Charles* V. It ſtands pleaſantly, encompaſs'd with Villages, Meadows, and Fields; and on one Side has a Creek, which is a ſafe Harbour for Ships. 'Twas one of the Cautionary Towns given to Qu. *Elizabeth*. *Weſt-Cappel* lies on the W. Coaſt of the Iſland, was formerly a Place of great Trade, had a commodious Harbour, and is famous for the Maritime Laws us'd in the 7 Provinces, called by its Name; but was ruin'd by Inundations, and now reduc'd to a Village. Two Leagues and a half W. from *Middleburg* ſtands *Domburg*, formerly a rich and populous Town, with large Privileges, and abundance of *Roman* Antiquities, with Trunks of Trees, have been dug up in the Neighbourhood. The Palace of the Abbots of *Middleburg*, called *Weſthove*, is pleaſantly ſituated among Woods near this Place, which is now alſo reduced to a Village, being ruin'd by Inundations; yet both it and *Weſt-Cappel* enjoy their former Privileges, and are govern'd by their own Magiſtrates. At *Weſt Souburg*, between *Fluſhing* and *Weſt-Cappel*, there's a large ancient Palace where *Charles* V. reſided in 1555, when hinder'd by contrary Winds from ſailing to *Spain*.

South-Beveland lies on the E. of *Walcheren*, extended towards *Brabant* in *Flanders*. 'Twas formerly 20 *Dutch* Leagues in Compaſs; but ſo much diminiſhed by Inundations, that 'tis now but 7 Miles long, and 7 broad. In 1532, the Town and moſt of the Lordſhip of *Borſales* were ſwallowed up, and *Rommerſwael* divided from the reſt, and made an Iſland by it ſelf. *Rommerſwael* was a very ancient Town, of good Note, but ruin'd by 6 Inundations and Fire. The only Place of Note in *South-Beveland* is *Ter-Goes*, ſuppoſed to take its Name from a Goſe, which is its Arms. It had large Privileges from *William* of *Bavaria* in 1350, and was wall'd in 1417. It ſuffer'd much by Inundations in 1539, but was reſtor'd by the Care of the Magiſtrates, and the Favour of *Charles* V. 'Twas beſieged by the *Dutch* in the D. of *Alva*'s Time, but relieved by 3000 of his Men, who waded through the drown'd.

drown'd Part of the Island with Ammunition and Provision in Sacks, which oblig'd the *Dutch* to raise the Siege. They afterwards took it, and fortified it in 1585. Since which, it has increas'd in Riches and People, tho' not very large. It has 6 Gates, is neatly built, 3 Market-Places, a Grammar-School, and 3 Hospitals, all fine Structures. The chief Church was burnt down in *1618*, but is since rebuilt very stately. It has a Channel to the Sea, by which small Vessels come up to the Town. The Lordship of *Borsales* belongs to it, and they appoint Magistrates to govern it. This City chuses their own Magistrates, who are a Prætor, 2 Consuls, and 9 Eschevins. There are 31 Villages in this Island, most of which have high Towers, that are Sea-Marks for Sailors; and there are many Gentlemen's Seats here, most of which are moated about.

Wolfardike lies on the N. of *South-Beveland*, is about 6 Miles long, and 1 broad, has some Villages and good Pastures. Part of it was swallowed up by Inundations, but has since been recover'd. The Streams about it are so violent, that they seem to contend which shall first devour it.

N. from this lies *North-Beveland*, formerly so pleasant a Country, that 'twas reckoned the Garden of *Zealand*; but in 1532, 'twas overwhelm'd; and *Corrgheene*, a Town of Note, with several Villages, were destroy'd. Great Part of the Island has since been recover'd, and particularly 2000 Acres not many Years ago near the Village of *Catzkoeke*.

The Islands beyond the East-Scheld *are*,

1. *Schowen*, called in Latin *Schaldia*, from the River *Scheld*. 'Tis the largest of this Division, is 15 Miles long, and 5 or 6 broad. 'Twas formerly much larger, and divided only by a narrow Channel from *North-Beveland*, but was diminished by Inundations. It abounds with populous Villages, Gentlemen's Seats, rich Farms, and Inclosures.

The TOWNS *are*,

1. *Zirickzee*, reckon'd the oldest in *Zealand*, and to have been founded by one *Zieringus* about 849. It lies on the S. Side of the Island, 10 Miles S.E. from *Middleburg*. It has a good Trade in Salt and *Madder*, the latter abounding more here than in the other Islands. Their Harbour has suffer'd of late by Sands. 'Tis a large Town, with several good Buildings. Their Church, called the *Munster*, dedicated to St. *Levinus*, one of their Apostles, is a very beautiful Structure, and the best in the Province, but not so splendid as formerly, having suffered much by Lightning in *1466*. The Walls of the Town are old, and the Ditches but ordinary; yet 'tis so strong by Situation, and the Conveniency of laying the adjacent Grounds under Water, that 'tis not easy to be attack'd. It held out 8 Months against the *Spaniards* in 1575, when it surrender'd on Terms, which occasion'd a Mutiny in the *Spanish* Army, who expected the Plunder of the Town. 'Tis govern'd by 2 Consuls, 12 Eschevins, and a Council of 24, who have the Jurisdiction of the whole Island. 'Tis noted for the Birth of *Sufius* the Antiquary, and the Physicians *Lemnius* the Father and Son, *&c.*

2. *Brewershaven*, on the N. Side of the Island, 5 Miles from *Zirickzee*. It had its Name from their great Trade in Beer brought from *Holland*. 'Twas walled during the Civil Wars, has the Privileges of a City, but is much decreas'd, and subsists now chiefly by Husbandry and Fishing. It belong'd formerly to the Counts of *Holland*; but was annex'd by *Philip* II. in 1558 to the Province of *Zealand*.

3. *Bommenee*, about 2 Miles E. from *Brewershaven*. 'Twas fortified in the first War with *Spain*, is impregnable by Land, and may be easily relieved by Sea.

The 2d Island is *Duweland*, divided from *Schowen* by a small Channel on the E. Side, is about 7 Miles long, and 4 broad. It has its Name from the Multitude of Doves bred there. Most of it belongs to the Town of *Zirickzee*, who have divided it into several Jurisdictions. 'Tis noted for a bold Attempt of the *Spaniards* in wading hither from *Philipsland* during the War, as is mentioned by *Strada* and *Bentivoglio*. 'Tis since joined to the Isle of *Schowen* by a Bank, has no Place of Note in it, but only some Villages.

The

Digitized by Google

The 3d Island is *Tolen*. Its chief Town has the same Name, and lies on the E. Side of the Island, which is about 6 Miles long, and 5 broad, separated from *South-Beveland* by a small Channel on the S. and by a lesser from *Dutch Brabant*. 'Tis a pleasant and fruitful Place. The Town and Island had its Name from a Custom-house erected here by the Counts of *Zealand*. 'Tis very well fortified, and the whole Island is so strong, that 'tis capable to resist a great Army. It has been augmented by the Addition of a large Tract of Ground belonging to the Family of *Orange*, called St. *Martin*'s Dike. The Town is govern'd by 2 Consuls, 8 Eschevins, a Bailiff, Syndic, and Secretary.

The 4th Island is that called *Oresand* or *Moersand*, betwixt *Schowen* and *North Beveland*, but much nearer the last. 'Tis of small Extent, and has no Place of Note, but only Villages.

The Arms of the Province of *Zealand* are, *Or*, a *Lion Gules*, rising out of a Sea *Wavee*, *Argent* and *Azure*.

The Province of Utrecht.

HAS the *Zuyder-Sea* on the N. Part of *Guelderland* and *Holland* on the S. Part of *Holland* on the W. and Part of *Guelderland* on the E. 'Tis in Length from S. E. to N. W. about 30 Miles, and from S. W. to N. E. the greatest Breadth about 25. The Ground is higher, much pleasanter, and fitter for Husbandry, than *Holland*, and the Air much better. It abounds with Gardens and Orchards, except about *Arumersfort*, on the Borders of *Guelderland*, where 'tis barren and heathy. The Inhabitants appear by History to have been formerly of a very martial Disposition; but lost much of their Credit that Way by their easy Submission to the *French* in 1672, which some ascribe to Treachery, and others to the Decay of their Military Genius by a long Peace. But however that be, there was a great Alteration made in the Government of that Province in 1674, as a sort of Punishment, by which the Stadtholder had a much greater Power given him by the Provincial States in the Government of that Country than in the rest. They are said to have been converted to Christianity by the *English*, and to have been subject to Bishops of their own for 900 Years. As to their Dispositions, some reckon them to come nearer the *Germans* than the rest of the *Dutch*, and not to be so much inclin'd to Trade as the Maritime Provinces. The common People are courteous and hospitable, which is owing in part to the great Number of Gentry who have been invited to live among them by the Wholesomeness of their Air.

The Province is divided into 4 Districts, under so many Marshals, *viz.* the Upper and Lower Diocese, *Emeland*, and the Land of *Montfort*.

The chief TOWNS *are*,

1. *Utrecht*, formerly called *Antonina*, and therefore, as well as from *Roman* Coins and other Monuments of Antiquity found about it, supposed to have been a *Roman* Colony; but *Junius*, *Bleau*, and others, are not agreed whether it was so called from *Antonius* a *Roman* Senator, who is said to have fled from *Nero*, and settled here; from *Marcus Antonius*, *Cæsar*'s Legat in *Gaul*; or from *Antoninus Pius*, who is said to have rebuilt it. *Cellarius* says, the *Trajectum* in *Antonin*'s *Itinerary* appears by its Situation to be *Utrecht*, which had its Name from a Passage there over the *Rhine*; and that in *Charlemagne*'s Time, the Epithet *Vetus* was added; and hence the common *Dutch* Word *Oudt* or *Alt* being join'd to *Trecht*, form'd the present Name; which is more probable than *Junius*'s Conjecture, that it was form'd by the ignorant Vulgar from the Words, *V. TRIC. LEG. STAT.* as being the Station of the 35th Legion. 'Tis said to have been taken from the *Wilts* by *Dagobert*, Son to *Clotharius* of *France*, by whom 'twas enlarged and fortified. He is also said to have conferr'd it upon St. *Willebrod*, an *Englishman*, its first Bishop, who, *Bede* says, died in 636, and was succeeded by St. *Boniface*; after whose Martyrdom by the *Normans*, the See was translated to *Cologne*; but restor'd by *Pepin* and *Charlemagne*, and the Diocese extended to most Part of the old *Batavia*, which made the Bishop one of the most powerful in *Christendom*, and enabled his Successors to make War with the Counts of *Holland*, as we have heard before. It continued to be a considerable Principality till the

the Time of *Charles* V. to whom 'twas resign'd by their Bishop *Henry* of *Bavaria*. This City lies on the Channel of the old *Rhine*, 19 Miles S. E. from *Amsterdam*, 25 from *Leyden*, and 19 N. E. from *Rotterdam*, in Long. 23. 47. Lat. 52. 7. 'Tis a fair, large, populous City, the Houses of Brick, and many of 'em stately; but the Streets not kept so neat as those of the Towns in *Holland*. They have curious and neat Cellars, and their Churches are magnificent. The chief is that of St. *Martin*, formerly the Cathedral, where *Charles* V. in 1536 held a solemn Meeting of the Knights of the *Golden Fleece*. 'Twas formerly mean, but splendidly rebuilt by Bishop *Adelbold* in 1023. 'Tis usually called the *Dome*, and has a Tower with 460 Steps, from whence there was a fine Prospect of the adjacent Country; but a great Part of the Church was demolished by a great Tempest in 1674. Here lies buried the Baron *Van Gaunt*, with a noble Monument: The Inscription shews, that he commanded when the *Dutch* Fleet came up to *Chatham*. The Church of St. *Mary*, commonly call'd the *English* Church, was built, as they say, by the Emperor *Henry* IV. to attone for his destroying one of that Name at *Milan*. When the Workmen were about it, they found a Vorago in the Place where they were to build one of the Pillars, but knew not how to secure the Foundation upon such a Quagmire. An ignorant Fellow called *Fuso* undertook it, but ask'd an exorbitant Rate; which the Bishop not being willing to grant, he suborn'd the Man's own Son to pump out the Secret, which was, to cover the Quag with Bulls-Hides. Upon this, *Fuso* being disappointed of his Reward, stabb'd the Bishop, according to the Story. There's the following Inscription upon the Pillar, asserting it to be so founded:

Accipe Posteritas, quod post tua Secula narres,
Taurinis cutibus fundo solidata columna est.

And over it there are ancient and odd Characters, which Dr. *Northleigh* supposes to be the Date of the Year. But he observes very justly, that it was *Frederick Barbarossa* who sack'd *Milan* 100 Years after *Henry* IV. and was commanded by the Pope to build this Church: So that it must either be a Legend, or a gross Mistake as to the Founder; but the latter is more probable, for some ascribe it to *Frederick*. This Church has a small Library, with some old Books and MSS. and among others, a Bible of the old Translation in 6 Volumes, finely writ in an ancient Character, besides some Pagan Idols, and other Curiosities, as the Horns of Sea-Unicorns, and other Things given them by Emperors. Dr. *Brown* says, the great Church has 3 Steeples, one above another, from whence they have a Prospect of the adjacent Country, with 51 wall'd Towns, all within a Day's Journey of the Place. He also mentions the *English* Church and the Pillar above-mention'd, said to be founded in 1099, which can neither agree with the History of *Henry* IV. nor *Frederick* I. Before the Reformation, there were several large Monasteries and Religious Houses in and about this City, that are now turn'd to other Uses. The Streams which run through several of the Streets contribute much to the Beauty of the Town; and the Suburbs, which are large and convenient, and equal to the Number of its Gates, have likewise Channels running thro' them. The two principal Channels which run through the Length of the City are the *Vaert* and the *New Gracht*. The Buildings on each Side the latter are very splendid, and there are 35 arch'd Bridges of Brick over both. The City is surrounded with an Earthen Wall and a deep Ditch, with several Bulwarks; and Mr. *Ray* says, in his Time 'twas encompassed with a thick high Wall and a deep Trench. They were said to be out of Repair when the *French* came before it; but that can be no Apology for their Surrender, since they would not admit them to be repaired for fear of spoiling their Gardens and Walks; nor would they receive above two Regiments of the Troops offer'd them by the Prince of *Orange*: Which very much confirms the Suspicion, that they had a private Understanding with the *French* King, who made it his Head Quarter for near a Year and an half; but they had no other Reward for their Treachery, than being forced to pay him 2268000 Gilders during that Time. The *French* made it the Storehouse of the Plunder they took from the rest of the Provinces, which they were 14 Days a carrying off

Digitized by Google

off when they left the Town in 1673. They had prepared Materials to build a Citadel, of which the D. of *Luxemburg* laid the firſt Stone, with the *French* King's Arms upon it. A publick School was erected here by one of their Biſhops in 1459; and in 1634, the Provincial States turn'd it into an Univerſity, which has ſince flouriſh'd very much; tho' it has not the full Privileges of other Univerſities, being wholly ſubject to the Magiſtrates of the City. It has produc'd ſeveral great Men, and been noted for eminent Profeſſors in all Faculties. Their Library has more Printed Books, but fewer MSS. than that of *Leyden*. The Market-place or Piazza is very fair, and the Center of ſeveral long Streets: The Painters Hall abounds with fine Pieces; and the Pall-mall without the Town, with 5 Rows of tall Trees on each Side, is extraordinary pleaſant. There are likewiſe fine Walks about the old Walls, and a Phyſick Garden, but of no great Note. Pope *Adrian* VI. was born here, whoſe Epitaph, order'd by himſelf, beſpeaks his Humility; as did his Refuſal to change his Name, tho born of mean Parentage. His Epitaph is thus:

Adriano Sextus hic ſitus eſt, qui nihil ſibi infelicius in vita duxit, quam quod imperaret.
i. e.
Adrian VI. *lies here, who reckoned it his greateſt Misfortune, that he ſhould ever have been called to Government.*

But that which perpetuates its Fame, is the Union of the 7 Provinces, the Foundation of which was laid here. Their Government is manag'd by 2 Scouts and 4 Burgomaſters, 2 of whom are choſen Annually. They have likewiſe a Council of 40 Men to aſſiſt them.

2. *Amersford*, about 12 Miles N. E. from *Utrecht*, upon the River *Eems*, which runs by its Walls, and falls into the *Zuyder Sea*. 'Tis ſuppoſed to take its Name from a Ford on this ſmall River. 'Tis an ancient Town, and was the uſual Retreat of the Biſhops of *Utrecht* when drove out by the Citizens; and the Inhabitants of this Place frequently help'd to reſtore them. 'Twas formerly but ſmall, as appears by the Remains of its ancient Fortifications. 'Tis now much larger, and will take near an Hour to walk round it. 'Tis of no great Strength, being commanded by a neighbouring Hill. The Buildings, eſpecially thoſe of the old Town, are very neat. They have two Churches, one of which is a large and ſtately Fabrick. Their Hoſpitals are equal to thoſe of the greater Cities; and they have a publick School, where ſeveral eminent Perſons have had their Education. It ſuffered much formerly by the *Gueldrians*, who took it in 1543. 'Twas alſo taken by the *Spaniards* in 1629, but afterwards quitted by them, and better fortified by the States. Their Government reſembles that of *Utrecht*. They had formerly a great Trade in brewing Beer, but now ſubſiſt chiefly by feeding Cattle and Husbandry, there being good Arable and Paſture Ground on the E. and S. but on the W. and N. there's nothing but Hills, Woods, and barren Heaths.

3. *Wickt-te-Duurſtede*, the famous *Batavodurum* of the Ancients, lies 11 Miles S. E. from *Utrecht*, where the middle Branch of the *Rhine* leaves its ancient Channel, and runs into the *Lech*. 'Tis mention'd by *Tacitus* in his 5th Book, where he ſays, That a Body of *Germans* endeavour'd to break down the Bridge there. 'Twas afterwards deſtroyed by the *Normans*, but rebuilt, becauſe of the Conveniency of its Situation, and continues to be a neat and pretty rich Town. 'Twas formerly uſed as a Place of Receſs by the Biſhops of *Utrecht*.

4. *Rhonen*, a wall'd Town upon the *Rhine*, 6 Miles further E. an ancient Place, ſuppoſed to be the *Grinnes* of *Tacitus*. In the Fields, betwixt this Town and *Utrecht* are dug moſt of the Turfs that ſerve the neighbouring Country for Fuel.

5 *Montfort*, lies near the *Iſſel*, 6 Miles S W. from *Utrecht*. 'Tis a neat Town, well fortified, and was built by *Godfrey* Biſhop of *Utrecht* againſt the Incurſions of the *Hollanders*. 'Tis the Capital of a ſmall Territory, and noted for the Birth of *Lambertus Hortenſius*, a Writer of good Fame. M. *de Fer* ſays, the whole Province contains 5 Cities, 65 Villages, and 64 Gentlemen's Seats.

Digitized by Google

The Province of Guelderland, *and County of* Zutphen.

Dutch Guelderland, from *Gennep* on the *Maes* to *Campen* on the *Zuyder-Sea*, is 48 Miles from N. to S. and from the Frontiers of *Holland* to those of the Bishoprick of *Munster*, including the County of *Zutphen*, 'tis above 50. Some derive the Name from the Castle of *Guelder*, built by its first Lord *Wichardus a Ponte*; and others from the City *Geldubo*, mentioned in these Parts by *Tacitus*; but this cannot be the present *Guelder*, because that was in the Country of the *Ubii*, near *Nuys* on the *Rhine*. The ancient Inhabitants are supposed to have been the *Menapii* and *Batavi*. This Dutchy and the County of *Zutphen* have been for several Ages reckon'd one Principality, and gone by the common Name of *Guelder*. It has the *Zuyder-Sea* and Part of *Over-Issel* on the N. *Dutch Brabant* and Part of *Cleve* on the S. *Over-Issel* and Part of the Bishoprick of *Munster* on the E. *Utrecht* and Part of *Holland* on the W.

The Air is much better than that of *Holland* and the Maritime Provinces, because 'tis of a much higher Situation. The Soil is fruitful in Corn and Pasturage; and great Droves of Cattle are Annually brought from *Denmark* and *Friesland* to be fatten'd here. 'Tis not alike fruitful in all Places; for a great Part of the *Velaw* lies upon a Gravel, and is full of Heaths, Woods, and barren Hills. *Zutphen* has good Pasturage, but not much Corn, because of its low and mooriſh Situation. The Inhabitants have in all Ages been valued for their Courage above most of their Neighbours, occasioned by the continual Wars of their ancient Dukes, and the Barrenness of a great Part of their Country, which made them chiefly apply themselves to Arms. Their Cavalry was esteemed all over *Europe*; and 'tis observ'd of *Charles* V. that in order to abate their Military Genius, and secure the Possession of this Country to his Family, he excluded the *Guelderians* out of his Armies. The Commons are reckon'd courteous and industrious, and much to resemble the *Germans*. *Cominginus* says, they are more unanimous in Matters of Religion than their Neighbours, and more successful in Arms than Arts.

Their Ancient GOVERNMENT.

IN the Ages succeeding to *Charles the Great*, Authors say, they were under an Hereditary Governor, called by the Name of Advocate, Guardian, or Tutor, who was succeeded by Earls, and then by Dukes.

The first Earl mentioned is *Otho* of *Nassau*, who was invested by the Emperor *Henry* IV. in 1079, died in 1107, and was succeeded by his Son *Gerard*, who died in 1131, and was succeeded by his Son *Henry*, who marrying a Daughter of *Brabant*, had the *Velaw* for her Dowry, and died in 1162. He was succeeded by his Son *Gerard*, who died without Issue in 1180. He was succeeded by his Brother *Otho* II. who died in 1202, and succeeded by his Son *Gerard* III. who died in 1271, and was succeeded by his Brother *Reinold the Warlike*, who was imprison'd by his own Son, and died in 1325. He was succeeded by his Son *Reinold* II. who was made the first D. of *Guelder* by the Emperor *Lewis*. He was succeeded by his Son *Reinold* III. who died without Issue in 1371. He was succeeded by *William* of *Juliers*, Grandson to *Reinold* II. who died without Issue in 1402. He was succeeded by his Brother *Reinold* IV. who died without Issue in 1423. He was succeeded by *Arnold* of *Egmond*, his Nephew by his Sister, who was imprison'd by his Son *Adolph*, and rescued by *Charles the Warlike* of *Burgundy*, who would have reconciled his Son to him upon very good Terms; which *Adolph* barbarously refus'd, and said, He would rather be thrown into a Well with his Father upon him, alledging that he was unreasonable, who had been 44 Years D. of *Guelder*, not to let him have the Government now. *Adolph* being after this slain in the War, *Arnold* resign'd the Government, with the Emperor's Consent, in 1473, to *Charles* of *Burgundy*; who being kill'd before *Nancy* in 1476, was succeeded by his Daughter *Mary*; but the *Guelderians* revolted, and sent for *Katharine*, *Arnold's* Daughter, to whom they submitted during the Nonage of *Charles*, Son to *Adolph*, whom they solemnly recognizi'd. He died without Issue in 1539, and the

Digitized by Google

the Succeſſion was diſputed by *William* of *Cleve* as next Heir; but *Charles* V. came with an Army into the Country, and obliged him to reſign, thô he had been publickly inveſted by the States, and had a fair Title. To *Charles* V. ſucceeded his Son *Philip* II. of *Spain*, from whom *Guelderland* revolted with the other Provinces in 1580.

The Arms of this Province are Quarterly; 1. *Azure*, a *Lion* Or, crown'd *Gules*, for the Dukedom of *Guelder*. 2. *Azure*, a *Lion Gules*, for the Earldom of *Zuiphen*.

The States of this Province did formerly conſiſt of the Nobles, and the Knights of the Province, the Governors of the Country Diſtricts, and the Deputies of the Cities; but the 4 chief Cities of *Nimeguen*, *Ruremond*, *Zutphen*, and *Arnheim*, were, according to *de Laet*, the main Supporters of the publick Liberty againſt the Incroachments of their Princes; between whom and them 'twas agreed, That when any Subject was wrong'd by his Prince, he ſhould complain to the Magiſtrates of the chief City of his Quarter, who were to demand a Redreſs from the Prince; which if not granted in two Months, the City was to ſeize all the Revenues of the Prince in that Quarter; and if he continued obſtinate, the other Cities were to join with them. M. *de Fer* ſays, the whole Province, including *Spaniſh Guelderland*, contains 5 Counties, 16 Cities, 230 Villages, and 5 Fortreſſes.

The Quarter of Nimeguen.

THis City is, by *Adrianus Junius*, reckoned to be the *Batavorum Oppidum* mentioned by *Tacitus*, which was burnt by *Civilis* when he retir'd into the *Batavorum Inſula*, now called the *Betuwe*, juſt over againſt it, after he was defeated by the *Romans*; but *Cluverius* rather thinks it was that now called *Batenburg*, thô the other be more probable. This City and its Territories having afterwards thrown off the *Roman* Yoke, maintain'd its ancient League with the *Gauls*, or rather *France*, and was for a long Time ſubject, for Protection at leaſt, to the Kings of *Auſtraſia* or the Emperors.

Smetius, in his *Antiquitates Neomagenſes*; printed at *Nimeguen* in 1678, is of Opinion, that this City was the *Batavorum Oppidum* mentioned by the *Romans*; which ſeems to be very probable, from the vaſt Number of *Roman* Antiquities found in and about that City, of which he and his Father made the nobleſt Collection that is perhaps to be found in any private Hand. They conſiſt chiefly of Rings, Gems, Keys, Writing Inſtruments, Bells, Buckles, Lamps, Altars, Marbles, Meaſures, Weights, Statues, Seals, Pitchers and other Veſſels, 11000 Coins Idols, Inſcriptions, *&c.* For which we refer the Curious to his Book, where ſuch as love Antiquities will meet with grateful Entertainment, his learned Explications tending very much to illuſtrate the *Roman* Hiſtory in that and other Parts of the World, and eſpecially of their Emperors. Several of thoſe Inſcriptions upon Stones, *&c.* are fix'd on the Wall of their Town-Houſe; but ſince very few of 'em relate to the Antiquity of this Place, we ſhall not inſiſt upon them.

Charles the Great repair'd the Caſtle, which was built here by the ancient *Batavi*, where he and ſucceeding Emperors frequently reſided, and held Conventions of the States. *Aſchafnaburgenſis*, in the Year 1046, calls it a Princely Palace, of incomparable Workmanſhip. Some pretend that this Caſtle was firſt built by *Julius Cæſar*, and 'twas particularly aſſerted in an Inſcription upon Marble fix'd to the Wall of it, taking Notice of its being repaired by the Emperor *Frederick Barbaroſſa* in 1155; but this is controverted by the Learned, who alſo reject the Story of the Town's being firſt built by *Bato*, who is ſaid to have brought the *Catti* into this Country: But *Cluverius* owns, that 'tis mentioned by *Antonin* and the *Itinerary* Table as a famous City in their Time. It had the ſame Privileges allow'd it by *Frederick* II and *Henry* VII. that were granted to *Aix la Chapelle*, and other Cities of the Empire; and 'tis noted for the Birth of the Emperor *Henry*, Son to *Frederick Barbaroſſa*. They had a Right to determine all Cauſes without Appeal, to the Royalties within their Territory, and were not oblig'd to march out of the City but under their Conſul, and that no further than they might be able to return at Night. They were exempted from all Taxes throughout

Digitized by Google

the Empire, and to this Day they are exempted from Tolls upon the *Maes*. They have always been tenacious of their Liberty, and were ſo much inrag'd at the K. of *Spain*'s Proclamations for apprehending all Perſons ſuſpected of Hereſy, without any Regard to their Privileges, that in 1566 they demoliſhed all the Statues and Images in their Churches, and eſtabliſh'd the Proteſtant Worſhip there. This City lies on the S. Side of that Branch of the *Rhine* called the *Waal*, about 29 Miles S. E. from *Utrecht*, 10 S. from *Arnheim*, 22 E. from *Boiſleduc*, and 10 N. W. from *Cleve*. 'Tis pleaſantly ſituated on 5 little Hills in Form of a Semicircle, in Long. 24. 30. Lat. 51. 58. has a delicate Proſpect towards *Cleve*, the *Maes*, the *Waal*, the *Rhine* and *Iſſel*. From all which, thoſe that travel by Water, have a very fine View of the City, which is well built of Brick for moſt part, and the Houſes ſlated. It has been much enlarged at ſeveral Times, as appears by its old Walls. It has 5 Gates towards the Land, and as many towards the *Waal*; which, in the Opinion of ſome Learned Men, either deriv'd its Name from the *Gauls*, or gave it to them; the Tranſmutation, according to the Dialect of thoſe Countries, of G. and *W.* being very frequent. Upon a high Hill adjoining to the River, ſtands the Caſtle called *Valckhoff*, which *Blaau* ſays ſhould be *Waalhoff*; *i. e.* a Palace on a *Waal*. 'Tis encompaſſed with high Stone Walls, has 3 large Courts, and 2 Chapels, the largeſt ſupported by 8 Pillars on each Side, and abounding with ancient Inſcriptions; of which *Smetius* gives an Account, and among other Things of *Roman* Urns, with black *Calculi* found in 'em, denoting the Aſhes to be thoſe of Malefactors; and of Leaden Medals found there, which are very rare. There's as pleaſant a Proſpect from the middle Tower of this Caſtle as is to be ſeen almoſt any where in *Europe*. Here's an Arch of a prodigious Bigneſs, with the Ruins of other Arches and Pillars, which amaze the curious Beholders. About 200 Years ago, the Fortifications were enlarged ſo as to take in both the Suburbs and Caſtle. The Remainders of the old Gates ſeem to reſemble Triumphal Arches: The outer Wall is exceeding high, built with Brick, and guarded with ſtrong Towers: Some of whoſe Walls are 18 Foot thick. The chief of 'em is called the *Crown Tower*, becauſe of the Pinnacles on its Top. Near this Tower there's a deep dry Ditch, with another adjoining full of Water, which was a Harbour for their Veſſels in the Winter; but now they have built a larger on the Bank of the River, well ſecur'd with Fortifications. In the higher Part of the City, there are 3 large Ponds fed with hidden Springs; and through the whole, there are many deep Wells, which are obſerv'd to riſe and fall as does the *Maes*, thô 6 Miles diſtant from it; whereas the *Waal* runs cloſe by it, but in a Valley, towards which the Deſcent is conſiderable. Upon the Gate to the N. W. of the Caſtle, there are theſe Inſcriptions; *Pes Imperii, Hucuſque jus Stauriæ. Melior eſt Bellicoſa Libertas quam Servitus Pacifica*; *i. e.* "This is the Border of the "Empire. So far reaches the Right of *Stau*"*riæ*. 'Tis better to have Liberty with "War, than Slavery with Peace." The Reaſon of 'em is ſuppos'd to be, That this was the Limits of the *Roman* Empire on this Side, and the Impoſt called *Stauria* reached not them, becauſe, as we have heard before, they were exempted from Taxes. In 1608, a Canal for Veſſels was dug betwixt hence and *Arnheim*, croſs the *Betaw*, about 8 Miles long, at the Charge of thoſe two Cities. Before the War with *Spain*, they had many Churches and other Religious Buildings; but now they have only 10, adorn'd with ſtately Towers: The chief is that of St. *Stephen*, a ſumptuous Structure, ſupported by 35 Pillars of extraordinary Workmanſhip, with a magnificent Tower, beat down in the War, but ſince rebuilt. Their Archives are kept in a Part of this Church, inclos'd with Iron Grates; and in the Quire there's the Tomb of *Katharine* of *Bourbon*, Wife to *Adolphus* Duke of *Guelder*, with her Image in Braſs, and 16 Coats of Arms expreſſing her Lineage. Near this Church ſtands the publick School, where their Youth are inſtructed in the Languages and Liberal Arts. 'Tis a Princely Structure, has the Images of the Apoſtles, ſeveral Doctors of the Church, and a noble Repreſentation of the Laſt Judgment. They have two Hoſpitals for the Education of Orphans, two for old People, two for the Cure of Diſeas'd, one for Lepers, and another

Digitized by Google

ther for Lunaticks. The Town-Houſe is a magnificent Fabrick, with the Statues of ſeveral Emperors their Benefactors. The Seats for their Magiſtrates are beautifully adorn'd, and over the Heads of their Conſuls there hangs a naked Sword, as an Emblem of Juſtice. They have alſo the Sword here with which the Counts of *Egmond* and *Horn* were executed at *Bruſſels* by the D. of *Alva*'s Order. This City was Imperial till 1248, that 'twas given in Fee to *Otho* III. of *Naſſau*, Count of *Guelder*, by the Emperor *William* Count of *Holland*. Their Government is by two Conſuls, who have Maces born before them, a Council of 24, and 12 Eſchevins. The Conſuls are choſen Annually; and after the Expiration of their Office, are made Captains of the City Companies. Their chief Governor was formerly a Burgrave, who dwelt in the Caſtle, and extended his Juriſdiction over the City and Diſtrict. They pay to the Biſhop of *Liege*, for their Exemption from Toll on the *Maes* there, Annually on *Low-Sunday*, a Pair of Buff Gloves, and two Pounds of Pepper.

The Arms of this City are, a *Field Or*, with a *Spread-Eagle Sables*, on his Breaſt, a *Scutcheon Vert*, with a *Lion Or*, and an Imperial Crown, for their Creſt.

The Citizens are addicted to Trade, War, and Learning, and ſeldom infranchiſe Strangers, but ſuch as are like to adorn their Community. They make great Profit by brewing of Beer, and feeding of Cattle. This Town ſurrender'd to the *French* after 6 Days Siege in 1672, when the Garriſon was made Priſoners of War. This ſcandalous Surrender, conſidering the Strength of the Place, was aſcrib'd to the ſame Treachery which brought ſo much of that Country into the Hands of the *French*. They knew the Importance of it ſo well, that they began a Citadel there, employ'd 3000 Men daily on its other Fortifications, and 2000 in caſting up Lines in the Neighbourhood. They made it one of their Storehouſes for Plunder; and when they abandon'd it in 1674, they threw a Ship-load of Arms into the River, and forc'd 82000 Crowns from the City. 'Tis famous for the Treaty held here in 1678 and 1679, when a Peace was concluded betwixt the *French* and the Confederates. 'Twas well nigh ſurpris'd by the *French* in 1702, not without Suſpicion of Treachery; but was ſav'd by the happy Retreat of the Earl of *Athlone* towards it, who oblig'd the *French* to march off with Loſs. 'Twas frequently taken and retaken by the *Dutch* and *Spaniards* in the Beginning of the Civil Wars.

2. *Knodſenburg*, on the other Side the *Waal*, over againſt *Nimeguen*, ſo called, ſays *Bleau*, from a Sedition of the Inhabitants of *Nimeguen*, who appear'd there with knotty Clubs. 'Twas finiſh'd by Prince *Maurice* in 1590, to curb the *Spaniſh* Garriſon of *Nimegun*, tho' Count *Manſfeld* march'd with the *Spaniſh* Army to hinder him, but in vain. The Town was afterwards galled ſo much with the Cannon of this Fort, that the Duke of *Parma* laid Siege to it; but part of his Forces being defeated by Sir *Francis Vere* and Count *Solms*, he ſhamefully rais'd the Siege. Upon which the *Dutch* ſoon after took *Nimeguen*: The Duke pretended to excuſe this, which was one of the moſt inglorious Actions of his Life, by his Orders from K. *Philip* to march into *France* and aſſiſt the Leaguers; but his Stay in thoſe Provinces 5 Months after, diſcover'd the Weakneſs of his Apology.

3. *Battenburg*, Lat. *Arx Batavorum*, ſuppoſed by *Cluverius* to be that called their *Oppidum*, is now a ſmall Town on the *Maes*, about 10 Miles S. W. from *Nimeguen*.

4 *Mook*, or *Mouch*, higher on the *Maes*, a ſmall Village about 9 Miles S. from *Nimeguen*, famous for the Victory which the *Spaniards* obtain'd over Count *Lodowick*, Brother to *William* Pr. of *Orange*, in 1574, as he was coming to join the Prince, which was a great Diſcouragement to thoſe who had revolted from *Spain*, and endanger'd their total Deſtruction, had not Providence order'd it otherwiſe.

5. *Tolhuys*, about 10 Miles E. from *Nimeguen*, on the other Side the *Waal*, formerly a Cuſtom-Houſe belonging to the D. of *Cleve*. It has a Caſtle, with one great Tower, within Musket ſhot of the River. 'Tis noted for the Paſſage of the *French* Army in 1672, by the Treachery of *Mombas*, formerly mentioned; tho' 'twas not effected without Loſs, the Prince of *Conde*, with ſeveral other great Men, being wounded; and the D. of *Longueville*, with ſeveral others of Quality, kill'd in the Action.

6 Schen-

Digitized by Google

6. *Schenkenſchans*, 2 Miles S. from the *Tolhuys*, upon the Point of the *Betaw*, where the *Rhine* divides it ſelf into two Branches, the greater call'd the *Waal*, and the leſſer retaining the old Name. 'Twas founded by *Martin Schenck* for the *Dutch* in 1588. He had deſerted the Service of *Spain*, becauſe another was preferr'd to him in the Government of *Frieſland*. He did ſo much annoy the Places ſubject to *Spain* from this Fort, that when he was afterwards drown'd in attempting to ſurpriſe *Nimegnen*, the *Spaniards* there made publick Rejoycings for ſeveral Days; and when the Town was ſurrender'd to Prince *Maurice*, he did ſo much Honour to his Memory, that tho' he was born but of mean Parents in that City, he order'd his Corps to be buried in the Sepulchre of the Dukes of *Guelder*. This Place is ſo ſtrong by its Situation, that the D. of *Parma* would never attempt it by Force. 'Twas betray'd to the *Spaniards* in 1635, but ſoon after recover'd by the Pr. of *Orange*, after 8 Months Siege, and ſtrongly fortified. 'Twas afterwards betray'd to the *French* in 1672, but recover'd in 1674. It commands both Branches of the *Rhine*, with the Wind-Mills and Ditches that prevent the *Betuwe* from being overflowed, is fortified with a great Ditch, good Baſtions, and a ſtrong Rampart, on the Side next the Land, and by the *Rhine* and the *Waal* every where elſe; ſo that 'tis reckon'd one of the Keys of the *Netherlands*. It anciently belong'd to the Dukes of *Cleve*, and on that Account the K. of *Pruſſia* has Pretenſions to it.

7. *Tiel*, on the S. Side of the *Waal*, 13 Miles W. from *Nimeguen*, is Capital of its Diſtrict, a ſtrong Town, of a long Figure, with a Marſh on the N. The Streets are narrow and crooked, and the Air unwholſome. 'Twas attacked in vain by *Charles* V. in 1528, but yielded to the *French*, and by them diſmantled in 1672.

8. *Buren*, 5 Miles N. W. from *Tiel*: It has an ancient Caſtle, with a Wall and a deep Ditch, and is the Capital of a Lordſhip, which came to the Family of *Orange* by the Wife of *William* I. Daughter to the Count of *Buren*.

9. *Culenburg*, on the *Lech*, 4 Miles N. W. from *Buren*, Capital of a ſmall County.

10. *Bommel*, 9 Miles S. W. from *Tiel*, a pleaſant Wall'd Town, with broad and regular Streets. 'Tis very ſtrong, with good Curtains, Baſtions, and Towers, a double Wall, and double Ditches. It ſtands low, in a marſhy Ground, which they can overflow from the *Waal* and the *Maes*. 'Twas yielded to the *French* in 1672, who ſpent 14 Days in deſtroying its Fortifications, carried off the Artillery and Ammunition, and oblig'd the Town to pay 36000 Gilders to prevent being burnt. 'Twas afterwards ſtrongly fortified when recover'd by the States. 'Twas firſt walled in and made a City by *Otho* of *Naſſau*, Count of *Guelder*, in 1299. 'Twas ſurpris'd and taken from the *Spaniards* in 1572 by a ſmall Detachment, who were drove out by the Inhabitants, becauſe they broke down the Images in their Churches. 'Twas afterwards taken by the *Dutch*, and twice after attack'd by the *Spaniards* in 1589 and 1599; but they were repulſed both times with great Loſs. The Town chuſes their own Magiſtrates, under whoſe Juriſdiction are many good Villages, and all the Diſtrict called *Bommelward*, which is an Iſland about 12 Miles long, and 4 broad, betwixt the *Waal* and the *Maes*. 'Tis noted for the Birth of *Monringius* the Divine, and other Learned Men.

11. *Fort St Andrew*, 3 Miles S. from *Bommel*, was founded by Cardinal *Andrew* of *Auſtria* near the Point of the Iſle of *Bommel*, to command the *Waal* and the *Maes*, which communicate near it by a Canal. He fortified it with 5 Royal Baſtions, good Curtains, a deep Ditch, a Cover'd way, and many Redoubts; ſo that 'twas reckon'd one of the ſtrongeſt Forts in the Country. Prince *Maurice*, in 1599, took it with 3000 Men, while the *Spaniards* attempted to relieve it with 8000; the Garriſon having mutinied, and agreed to ſurrender for 125000 Florins, in Conſideration of their Arrears. 'Twas ſurrender'd to the *French* in 1672. About a Mile further W. on the Point of the Iſland lies Fort *Voorn*, ſince called Fort *Naſſau*, becauſe founded by Pr. *Maurice*, after the taking of Fort St. *Andrew*. 'Tis ſo ſtrong as to be reckon'd impregnable. 'Twas baſely ſurrender'd to the *French* in 1672.

The

The BETUWE.

HAving thus given an Account of the chief Towns and Places of Note in this Country, we think fit to give a brief Deſcription of it ſelf, becauſe 'tis the ancient *Batavia*, and the Seat of the *Batavi*, that make ſuch a Figure in the *Roman* Hiſtory. We have formerly taken Notice from *Tacitus*, that they were part of the *Catti*, who leaving their ancient Country, becauſe of inteſtine Seditions, ſettled firſt here, and afterwards extended their Limits over that Part of the Country betwixt the *Waal* and the *Maes*. 'Tis controverted amongſt Authors, whether they or the Country gave Name to one another? Some think they gave Name to it, becauſe there ſeems to be ſome Footſteps of their Name in the Towns of *Battenberg* and *Battenhauſen* in *Heſſia*, from whence they came. Others think the Country gave Name to them, and that 'twas called *Betawe*, which in the old Language of the Country ſignifies a better Soil, to diſtinguiſh it from the neighbouring *Velawe*, which ſignifies a Soil of a heathy Colour. Their Territories are ſuppoſed to have extended from *Rhinberg* in the Dutchy of *Cleve* to *Catwick* on the Sea, which is thought to have derived its Name from the *Catti*, and is not improbable, ſince *Tacitus* aſſigns them the Ocean for their Boundary on one Side. But the Curious may ſee more of this in *Cluverius's Germania Antiqua*, and *Cellarius's Notitia Orbis Antiqui*. The Country at preſent called the *Betawe* reaches from *Schenkenſchans* on the E. to *Wiricum* on the W. which is 40 Miles in Length; and the greateſt Breadth betwixt *Gravve* on the *Maes*, and *Arnheim* on the *Rhine*, is 17.

The Quarter of Arnheim,

HAS its Name from *Arnheim*, its chief City, which lies on the N. Side of the *Rhine*, about 8 Miles N. from *Nimegun*. Authors agree, that 'tis the *Arenacum* of *Tacitus*. 'Tis the Capital of the *Velawe*, and the Seat of the Supreme Council of *Guelder*. 'Tis very ſtrongly fortified, with a large Ditch fac'd with Free-ſtone, Brick Walls, and Ramparts. It has alſo 5 Gates, ſo very ſtrong, that anciently they ſerv'd as Fortreſſes. That called the *Rhine* Gate was the chief, and has a ſtrong Bulwark near it. 'Twas walled and fortified in 1233. by *Otho* Count of *Guelder*, exempted from Toll through the Dutchy, and had other great Immunities. In 1443. 'twas made one of the Hans-Towns. 'Tis overlook'd by a Hill on the Side of the *Velawe*, from whence there's a pleaſant Proſpect of the City and neighbouring Country. From this Hill there flows a large Current of Water, which turns their Mills, and fills their Ditch. Before their Revolt from the *Spaniards*, there were many Monaſteries and Religious Houſes in and about this City, but moſt of 'em now in Ruins. It ſuffered much by Fire in 1525. The Church of St. *Martin*, called alſo St. *Euſebius*, is a noble Structure, with a ſtately Tower. The Dukes of *Guelder* had a Palace here; but moſt of it was blown up by Accident in 1589. They have an Hoſpital for ancient and poor Citizens nobly endow'd, with two others of leſs Note. In the adjoining Village of *Oſterbeek* was born the Emperor *Henry* III. in 1027. The News of which being carried to the Emperor his Father by the Paſtor of the Place, he rewarded him with the Biſhoprick of *Utrecht*. 'Twas taken from the *Spaniards* by the Count of *Maurs*, who join'd with the *Dutch* in 1585, and was ſurrender'd to the *French* after one Day's Attack in 1672, when they preſently begun to enlarge its Fortifications, and erect a Magazine; but when they left it, they forc'd the City to pay 'em 170000 Gilders. Near the *Rhine* Gate, there's a Bridge of Boats into the *Betawe*. Their Government is by a Judge, who has Juriſdiction over the City, and a great Part of the *Velawe*, and two Burgomaſters, choſen out of their 12 Eſchevins. They have alſo 6 Maſters of Corporations, choſen out of a certain Number preſented to the Conſuls and Eſchevins by their Fraternities; and 48 Jurats, choſen in the ſame Manner to aſſiſt in the Management of Publick Affairs. For their Learned Men, we refer to *Bleau*.

2. *Wageningen*, on the *Rhine*, 10 Miles W. from *Arnheim*. 'Tis ſuppoſed to be the *Vada* of *Tacitus*, that was ſo ſtoutly defended

Digitized by Google

ded by *Jul. Brigantius* againſt his Uncle *Civilis*, the fam'd *Batavian* General. It ſtands on a mooriſh Ground, which adds to its Strength. On one Side, there's a large Heath above 5 Leagues broad; and on the other, good Paſtures, and Arable Land. 'Twas taken by the *French* without Reſiſtance in 1672.

3. *Harderwick*, on the *Zuyder-Sea*, 20 Miles N. from *Arnheim*. 'Twas walled by *Otho* of *Naſſau*, Earl of *Guelder*, and had a Staple of Fiſh, called *Den Aſſlagh*, granted them by D. *Arnold* in 1443. Moſt of it was burnt down in 1503, but ſince rebuilt, much after the Faſhion of *Hamburg* and *Lubeck*, the Porches being large, and the Houſes high. The Church of St. *Mary* exceeds the reſt, being a ſtately Structure, and the Roof and Arches of excellent Workmanſhip. It has an exceeding high Steeple, ſeen at a great Diſtance by Land and Sea. It alſo ſuffered much by the Civil Wars, and moſt of their Religious Houſes are now demoliſhed, or converted to other Uſes. In one of 'em is kept their Univerſity, which was founded in 1648, having been a *Schola Illuſtris* long before. They have a good Library, furniſhed with excellent Books in Latin, Greek, and the Oriental Tongues, with ſeveral Volumes printed in *Chineſe*. The Rector, who is the Supreme Magiſtrate, is Annually choſen by the 6 Curators. In the neighbouring Woods, they have ſuch Plenty of Blue-Berries in the Seaſon, which continues but 6 Weeks, that the very Freight of what they ſell to *Amſterdam*, where they are much eſteem'd as a ſecond Courſe, amounts to 400 Crowns. This City was taken by the *French* in 1672. They diſmantled and burnt moſt of it in 1673, and demanded 12000 Gilders to ſave the reſt: Since which, it has not recover'd its former State. Among other Learned Men, *Gerardus Voſſius*, the famous Lawyer, was born here. 'Twas he and *Albertus Leoninus* who are ſaid to have form'd the Model of the preſent Commonwealth of the United Provinces. The *Zuyder-Sea* has made great Incroachments on the S. Side of the Town, ſwallow'd up ſeveral Meadows, with a Church and Village, which obliges them to ſecure the City on that Side with Dikes and Fences. A little from hence lies the ſmall Iſland of *Urk*, ſuppoſed to have been the Seat of the ancient *Urii*. It has been much diminiſhed of late by Inundations, which is another Proof of Sir *William Temple*'s Aſſertion, That the *Zuyder-Sea* is much larger than what it was in former Ages. This City was formerly one of the Hans-Towns.

4. *Elburg*, lies on the S. Sea, about 10 Miles N. E. from *Harderwick*. 'Tis an ancient Town, and was walled by Count *William*, Son to *Reinold* III. about 1400, and was alſo one of the Hans-Town. 'Tis of a ſquare Figure, has 3 Gates, and a ſmall River runs through it, with 5 Stone Bridges over it, on one of which they keep their Fiſh-Market.

Theſe are the Towns of the *Velawe*, which is 34 Miles long, and near 30 where broadeſt. 'Twas firſt ſeparated from *Germany* by *Druſus*'s Ditch. It formerly belong'd to the Dutchy of *Brabant*, but came to the Duke of *Guelder* by Marriage. Some of the Country is barren; in other Places there are large Woods of Oaks and Beech. There are many Gentlemen's Seats and good Manors in it; and the whole is divided into ſeveral Diſtricts, which have their particular Courts of Judicature, from which there lies an Appeal to a Place called *Engelander Holt*, which lies 2 *German* Leagues N. E. from *Arnhtim*. In this Country lies the Palaces of *Loo* and *Dieren*, belonging to the Family of *Orange*. The firſt lies 17 Miles N. of *Arnheim*, on a riſing Ground, in the middle of a large Plain, where there's good Hunting. 'Tis a noble Structure of modern Architecture, with fine Gardens, ſhady Walks and Grotto's, with admirable Fountains, eſpecially one called the Baſon of *Venus*. It has alſo two great Caſcades, where the Water falls ſo eaſily from one Baſon into the other, that the whole reſembles a broad Mirror. *Dieren* lies near a Village of the ſame Name, about 10 Miles N. E. from *Arnheim*, is much inferior to *Loo*, but a noble Houſe, with pleaſant Avenues, and conveniently ſeated for Hunting.

The County of Zutphen,

HAS *Gualderland*, properly ſo called, on the W. the Biſhoprick of *Munſter* on the E. *Over-Iſſel* on the N. and the Dutchy of

of *Cleve* on the S. is about 24 Miles from N. to S. and 28 from E. to W.

This County came to *Otho* Count of *Guelder*, who married the Heireſs. Its Name is derived from its lying on the South Fens, ſo called with reſpect to the Situation of the *Frizons*, who formerly inhabited this Country.

The chief TOWNS *are*,

1. *Zutphen*, a rich and populous City; and ſince the Revolt from *Spain*, made one of the ſtrongeſt in the 7 Provinces. It lies on the River *Iſſel*, 15 Miles N. E. from *Arnheim*. 'Tis an ancient City, tho' of nothing ſo long ſtanding as the others we have already mentioned in *Gutlderland*. 'Tis divided by the River *Iſſel* into Old and New. The Buildings are fair and neat. Many People of Quality live in this City. The chief Church is that dedicated to St. *Peter* and St. *Walburg*. Some ſay, 'twas founded by Count *Otho* III. of *Naſſau*; but *Bleau* reckons it much older. 'Tis a ſumptuous Building, with an exceeding high Steeple, which was twice burnt by Lightning, *viz.* in 1446, and 1600; but rebuilt with more Splendor in 1635. It had a College of Canons, of which the Earls of *Guelder* were formerly Provoſts. They have a large Font of Braſs of curious Workmanſhip, and in the E. Side of the Church a good publick Library. 'Tis noted alſo for the Monument of Count *Otho* III. and his Lady. There's the Ruin of a Palace near the Fiſhers-Gate, formerly the Seat of the Count of *Zutphen*; and near it, a very high Brick Tower, built in the Manner of a four-corner'd Pyramid, which is a great Ornament to the City, and affords a pleaſant Proſpect over the neighbouring Country. Near St. *Peter*'s Church, there's a large and magnificent Structure, with 3 Fronts; in one Part of which, the Provincial States hold their Aſſemblies. The Counts of *Bronkhorſt* have alſo a Palace here. There are two Bridges over the River, which join the Old and the New Town. The Air is healthful, and the Citizens courteous, being poliſh'd by the Numbers of Gentlemen who live here. They had formerly many Monaſteries, now turn'd into Hoſpitals for Aged, Sick, Orphans, and Strangers. Thoſe without the Walls are demoliſhed. The neighbouring Country abounds with Paſture and Arable Lands. 'Twas ſack'd during the firſt War with *Spain* by the D. of *Alva*'s Army, and the Inhabitants cruelly uſed. 'Twas afterwards retaken by the *Dutch* thus: They dreſs'd a Number of Soldiers like Women going to Market, with Arms under their Clothes, who coming early in the Morning, ſeiz'd the Gate as ſoon as 'twas open'd; and being follow'd by ſome Hundreds of Men from an Ambuſh, they made themſelves Maſters of the Town. The great Sir *Philip Sidney*, who ſerv'd under Sir *Francis Vere*, died of a Wound he received in this Siege. 'Twas baſely ſurrender'd to the *French* in 1672, and the Garriſon made Priſoners of War, tho' 'twas then fortified with 9 Baſtions, 4 Half-Moons, 2 Horn-Works, 2 broad Ditches, treble Ramparts, and ſuch other Works, as 'twas reckon'd impregnable. They abandon'd it again in 1674. Their Government is by Conſuls, and 12 Eſchevins, of whom the two Seniors are call'd Conſuls. The Senators are for Life, except upon Miſdemeanor or Reſignation. They are aſſiſted by a Council of 9, choſen out of the Commons, who have no Vote, but only give their Advice. There lies an Appeal hither from the inferior Cities to this Court, who have a Power of final Deciſion: But in extraordinary Caſes, they are aſſiſted by the Nobles of the City, and the Deputies of the Towns. This City had anciently a Mint, and was one of the Hans-Towns. *Gerard* of *Zutphen*, Maſter to the famous *Thomas a Kempis*, and other Learned Men, were born here.

2. *Doesburg*, 6 Miles S. from *Zutphen*, is by ſome called *Druſiburgum*, and ſuppoſed to have been built by *Druſus*, becauſe it lies near the Place where he cut his Ditch to bring the *Rhine* into the *Iſſel*. By this Ditch, *Tacitus* ſays, *Germanicus* ſail'd into the Lake *Flevus*, as his Father *Druſus* had done before him. This Town was fortified by the States during the War with *Spain*. 'Tis defended on one Side by the *Iſſel*, and on the other by a great Marſh; ſo that 'tis only acceſſible by a Neck of Land. 'Twas ſurrender'd to the *French* in 1672, after a very feint Reſiſtance, and abandon'd by them in 1674, when they diſmantled it.

Digitized by Google

3. *Dotecom*, ſtands on the Old *Iſſel*, about 6 Miles S. E. from *Doesburg*, is a wall'd Town of no great Strength, and ſurrender'd to the Pr. of *Condé* in 1672.

4. *Groll*, 15 Miles S.E. from *Zutphen*, on the River *Slink*, where it falls into the *Berkel*. 'Twas fortified by *Charles* V. becauſe it lies on an important Paſs betwixt *Germany* and the *Netherlands*. 'Twas afterwards made ſtronger by the *Spaniards*; and when taken by Pr. *Maurice* in 1627, is ſaid by *Grotius*, in his Account of this remarkable Siege, to have then 5 Baſtions, join'd by ſtrong Curtains, a Wall under the Baſtions, a broad Ditch, and a Rampart beyond it, ſloaping in ſuch a manner, as the Shot from the Town had direct Paſſage to the Enemy; whereas theirs flew over the Town, without doing it much Hurt. In this Siege Count *William* of *Naſſau*, a young Prince of great Hopes, was ſlain. It had been formerly beſieg'd in vain by Pr. *Maurice* in 1595, but was taken by him in 1597. 'Twas retaken by *Spinola* in 1606, but recover'd by Pr *Maurice*, as we have heard, and ſo well fortified, that 'twas reckon'd one of the ſtrongeſt Towns in the Provinces. It yielded after a ſhort Reſiſtance to the Biſhop of *Munſter* in 1672, but was recover'd afterwards by the States.

5. *Breeſort*, 5 Miles S. from *Groll*. 'Twas fortified about 140 Years ago, and is ſo encompaſſed by Marſhes and Fens, that there's no Acceſs to it but by a narrow Path; and the adjacent Soil is ſo ſpungy and moiſt, that 'tis not eaſy to be drein'd. Prince *Maurice*, when he beſieg'd it in 1597, contriv'd ſwimming Machines, by which he attack'd it. He loſt ſo many Men before it, that the Soldiers, when they took it by Storm, were ſo enrag'd, that the Prince was not able to reſtrain them from the Cruelties and Diſorders that are uſual on ſuch Occaſions; ſo that they plunder'd it, and had a very rich Booty, the People of the adjacent Country having brought thither their beſt Effects.

6. *Lochem*, lies about 8 Miles E. from *Zutphen*, upon the River *Berkel*, is a Place of ſome Strength, and was taken by the Biſhop of *Munſter* in 1672; but he afterwards abandon'd it.

There are ſeveral Baronies, Præfectures, and conſiderable Villages, in this County.

The Province of Over-Iſſel,

IS from S. E. to N. W. 60 Miles long, of an unequal Breadth, but 40 where broadeſt. It has *Groningen* on the N. *Zutphen* and Part of the Biſhoprick of *Munſter* on the S. the *Zuyder-Sea* and the Quarter of *Arnheim* on the W. and *Weſtphalia* on the E. It lies more open to Incurſions from *Germany* than any of the 7 Provinces, and is but ill furniſh'd with the natural Guards of Rivers and Forreſts. The Soil in many Places is barren, being full of Sands, Heaths or Marſhes; but in ſome Parts they have good Corn and Paſturage. 'Tis the worſt inhabited of any of the Provinces, partly on the Account of the Barrenneſs of ſo great a Part of their Soil, and becauſe their Situation is not convenient for Trade. 'Twas the Seat of the ancient *Bructeri*, and after of the *Frizans* and part of the *Saxons*, of whoſe Language, Manners, and Immunities, they ſtill retain more than their Neighbours. The Biſhop of *Utrecht* did formerly ſubdue this Province, and had it confirmed to him by Grants of Emperors; but 'twas reſigned to *Charles* V. by Biſhop *Henry* of *Bavaria*. In ſome Parts of this Province, particularly the County of *Drent*, there are Stones of ſo prodigious a Bulk, which, not being the Product of the Soil, ſtrike the Spectators with Amazement to think how they could be brought hither. Some of 'em lie upon the top of others, with Room for a Man to creep through betwixt them. The Inhabitants have a Tradition, that they were Heathen Altars; and that ſuch miſerable Wretches as were ſacrific'd to their Idols, were forc'd to creep thorough betwixt thoſe Stones, where they were all bedawb'd with Humane Ordure. The Province is divided into 3 Parts, the *Iſſeland* or *Salland*, which lies next the *Iſſel*, *Twente*, and *Drent*.

The chief TOWNS *are*,

1. *Daventer*, on the E. Side of the *Iſſel*, about 6 Miles N. from *Zutphen*, a large, populous, and neat City, whoſe Inhabitants, ſays *Conringius*, are much addicted to Traffick and Learning. 'Tis an ancient City, and

Digitized by Google

and has been well fortified a long time. 'Twas formerly an Imperial and Hans Town, and made a Biſhoprick, Suffragan of *Utrecht*, in 1559; but in 1580, the Biſhoprick was aboliſhed, when the Town, with the reſt of the Province, revolted from *Spain*. 'Twas treacherouſly deliver'd up to them again in 1587 by Sir *William Stanley*, a Papiſt, who was made Governor by the Earl of *Leiceſter*: but recover'd by Pr. *Maurice* in 1591, when he very much added to its Fortifications. It ſtands in a pleaſant Country, abounding with Paſtures and Arable Lands. It has a large Market-Place, with a Guard-Houſe, where ſome of the Citizens continually keep Guard. They have a Cathedral, with two other Churches, and a ſpacious Guildhall of ancient Architecture. They had formerly 5 Monaſteries, with a Church each, 5 Hoſpitals for Strangers, and one for Orphans. They have a Power of Coinage, Weekly Markets, and 5 Annual Fairs. *Eraſmus* had part of his Education in their Free-School, which about 60 Years ago had Profeſſors of Philoſophy, Divinity, Law, and Hebrew, aſſign'd it by the States. It has 6 Gates, ſome of 'em of curious Workmanſhip, eſpecially that called the *Brink Port*, adorn'd with Statues and Inſcriptions, and particularly that of *Charles* V. ſet up in 1544, as a Monument for his defending the Town. The Tower of *Noremberg*, adjoining to the Gate of that Name, is their moſt remarkable Building for Strength and Neatneſs: The Walls are 18 Foot thick, the Fabrick exactly round, the lowermoſt and uppermoſt Part of Stone, and the middle of Brick. 'Twas betray'd to the Biſhop of *Munſter* in 1672, when there were at leaſt 10000 reſolute fighting Men in it; and deliver'd to him at Night without Conſent of the Garriſon or Burgers, by the Treachery of ſome of their Magiſtrates. 'Twas quitted again in 1674 by the Biſhop of *Cologne*, to whoſe Share it fell for 42000 Crowns, to ſave their Fortifications and Guns. *Gerard*, called the *Great*; *Hegius*, *Eraſmus*'s Schoolmaſter; and the Geographer *Jacobus Davantrius*, were born here. Their Government, ſays *Conringius*, is by Conſuls, Eſchevins, and Senators, in all 16; two of whom are Conſuls, choſen every two Months out of the Eſchevins. They are aſſiſted by a Common-Council of 48.

2. *Zwoll*, called anciently *Middelwick*, but now *Zwoll*, becauſe of a ſwelling Diſeaſe, ſays *Bleau*, that formerly infeſted their Cattle. 'Twas made a City in 1230 by the Biſhop of *Utrecht*, for the Service they did him in his War with the County of *Drent*. It lies 15 Miles N. from *Deventer*, upon a ſmall Stream from the *Vecht*; which mixing with thoſe of the black Waters, forms ſeveral Currents that run through the City, and contribute much to its Neatneſs. They fall into the *Vecht* without the Town, and make a Channel to the *Zuyder-Sea*, from whence the Tide flows up, which advances its Trade. The adjacent Country has many Orchards and Meadows, which, with the Walks of Trees within and without the Fortifications, make the City very pleaſant. It has 3 large and ſtrong Gates, which open into Suburbs, equal to good Villages. There are 24 Towers upon the old Walls, that were formerly its chief Defence; to which have ſince been added a double Ditch, 10 good Baſtions, and a Trench between the *Zwoll* and the *Iſſel*, upon which there are 4 good Fortreſſes, 3 of 'em ſo large, that they reſemble little Towns. Their Trade conſiſts chiefly in Timber, Cattle fatted in the neighbouring Paſtures, *Benthem* Stones, Wool, Corn, Butter, and Cheeſe. The Inhabitants are reckon'd courteous to Strangers, and charitable to the Poor. Their chief Buildings are, 1. St. *Michael*'s Church, in the great Market-Place, a large Structure of good Workmanſhip, noted for its fine Organ, Pulpit, harmonious Bells, and wonderful high Steeple. They have another Church called St. *Mary*'s, with ſeveral that formerly belong'd to Monaſteries. Their Guildhall is noted for its Antiquity, and the adjoining Tavern for the Image of St. *Chriſtopher*. They have ſeveral Hoſpitals, a Granary, and a good Arſenal. They have likewiſe a College, wherein, *Bleau* ſays, there were uſually 500 Students, and gives us an Account of their Learned Men. They have a Court, where all Cauſes are finally determin'd, and to which Appeals are made from the inferior Towns of the Province. The Government is much like that of *Deventer*. The Pro-

Digitized by Google

vincial States meet in this Town, *Daventer*, and *Campen*, by Turns. They have 18 large and populous Villages under their Juriſdiction. They had anciently within their Diſtrict two famous Monaſteries: The firſt was that of *Windſem*, which had 70 Convents of the ſame Order under it; the other was that of Mount *Agnie*, of which the famous *Thomas a Kempis* was Prior. This City was treacherouſly yielded to the Biſhop of *Munſter* in 1672, and, in the Name of the Provincial States, ſent Deputies to the other Cities of the Country to do the like. 'Twas quitted by the Biſhop of *Cologne*, to whoſe Share it fell in 1674, when he ſent two of their Magiſtrates to *Maaſtricht* as Hoſtages for 100000 Gilders demanded of the City. As a Puniſhment for this Treachery, the Towns of this Province were deprived of their Power to chuſe their own Magiſtrates without the Prince's Conſent. Their ancient Arms was St. *Michael* the Archangel beſtriding the Dragon, and bearing a Shield in his Hand, with a white Croſs painted upon it; but now only a *Croſs Argent* in a *Field Azure*.

3. *Campen*, lies about 7 Miles N. W. from *Zwoll*, upon the W. Side of the *Iſſel*, a little above where it falls into the *Zuyder-Sea*. It has its Name from the pleaſant Fields which ſurround it. 'Tis a large and neat City, with capacious Churches of curious Workmanſhip, and a noble Guildhall. Their Cuſtom-Houſe is admir'd by the beſt Architects, and is ſo ſtately, that Princes and others of the greateſt Quality are lodg'd and entertain'd in it. The Bridge over the *Iſſel* is of a great Length, ſtands upon vaſt Pieces of Timber drove into the Bottom of the River, and is defended at the further End by a ſtrong Fort, that has ſeveral Baſtions. The City is encompaſſed by a thick Wall, with many high Towers, after the ancient Manner; ſo that its chief Strength lies in its Situation. This City has the Privilege of a Mint, with other large Immunities. Their Trade is decay'd of late, the Harbour being ſo much choak'd up, that it does not admit large Veſſels. The Learned *Albertus Pighius*, fam'd for his Skill in Mathematicks, Coſmography, and writing againſt *Luther*, for which he was much eſteem'd and enrich'd by 3 ſucceſſive Popes, was a Senator of this Place. The Government of this City reſembles that of *Zwoll*. 'Twas ſurrender'd in 1672 to the Biſhop of *Munſter*; and being allotted to the *French*, was quitted by them in 1673, when they exacted 80000 Gilders to ſave the Town and its Fortifications; ſeveral of which they deſtroy'd notwithſtanding.

4. *Haſſelt*, lies on the *Vecht*, 7 Miles N. E. from *Campen*, was made a City by the Biſhop of *Utrecht* in 1252, and built to oppoſe the *Frizons*. 'Tis a pleaſant City, pretty rich, and govern'd in the ſame Manner as the reſt.

Ommen, 13 Miles E. from *Zwoll*, a Wall'd Town, with the neighbouring Fortreſs of *Ommer. Sconce* belongs to *Friesland* and *Groningen*; and *Hardenberg*, another Wall'd Town, 7 Miles N. E. from *Ommen*, are both in the Juriſdiction of *Salland*.

5. *Geelmuyden*, lies on the *Vecht*, 4 Miles N. E. from *Haſſelt*. 'Twas made a City by *John* of *Naſſau* Biſhop of *Utrecht*, and had formerly a ſtrong Caſtle, now in Ruins.

6. *Vollenhoven*, above 3 Miles E. from *Geelmuyden*, on the *Zuyder-Sea*, is a neat fortified Town, with a great Market for Corn from the *Baltick*, &c. and Capital of its Diſtrict of the ſame Name. 'Twas the Seat of the K. of *Spain*'s Grand Council in thoſe Parts, and there was no Appeal from the Magiſtrates of the Town, only they were to pronounce Sentence in Preſence of the Governor of the Province, who generally reſided here, as many of the Nobility of the Province do ſtill.

7. *Swartſiuys*, 5 Miles S. E. from *Vollenhoven*, is a ſtrong Fort, was taken by the Biſhop of *Munſter* in 1672, when he enlarged the Fortifications ſo much, that the *Dutch* could not take it after 3 Attempts; but they recover'd it at laſt.

8. *Steenwick*, lies 7 Miles N. E. from *Vollenhoven*. 'Tis a ſmall, but very ſtrong Town, held out a Siege of 3 Months againſt the *Spaniards* in 1581, when they were obliged to riſe from before it by the *Engliſh* under Colonel *Norris*. 'Twas afterwards taken by the *Spaniards*, and retaken by Pr. *Maurice* in 1592, after a ſharp Siege, wherein the *Spaniſh* Governor ſaid, He had been dug out like a Fox. The adjacent Country has good Paſtures and Arable Land. 'Twas ſurrender'd to the Biſhop of *Munſter*, who quitted it in 1673, and baſely ruin'd their

Digitized by Google

their Fortifications, tho' he had obtain'd 10000 Gilders to ſpare them; but 'twas ſince re-fortified.

9. *Blockzyll*, lies 6 Miles S. W. from *Steenwick*, at the Mouth of the River *Aa*, and on the Bank of the *Zuyder-Sea*, which it commands in Part. 'Tis a Place of conſiderable Trade, very populous, and well fortified.

The Diſtrict of TWENTE.

Is divided into 9 Juriſdictions, each of which have their Courts.

The chief PLACES *here are,*

1. *Oldenzyll*, ſuppoſed to have been the Capital of the ancient *Salii*, and from them to have had its Latin Name *Salia*. It has been of more Note for its frequent changing of Maſters, than for its Bulk or Strength. It lies on the Frontiers of the County of *Benthem* in *Weſtphalia*, 25 Miles N. E. from *Deventer*. 'Twas 4 times taken and retaken during the War with *Spain*, and at laſt recover'd by Prince *Henry Frederick*. 'Twas taken by the Biſhop of *Munſter* in 1672, but retaken by the *Dutch* in 1674.

2. *Gramberg*, about 3 Miles N. E. from *Hardenberg*, and 6 S. W. from *Coevorden*, is an ancient Caſtle, memorable for the brave Defence which its Garriſon of 36 Men made againſt the Troops of *Munſter* in 1672, when they ſtood out two Storms by 900 Men, and yielded at laſt upon good Terms; but the Garriſon was made Priſoners of War, contrary to Capitulation. The Biſhop fortified it ſtrongly afterwards, to diſtreſs *Coevorden*, and to facilitate his March into the Marſhes of *Drente*, by caſting up a Bank croſs the *Vecht*; but he afterwards abandon'd it.

3. *Ottmarſen*, 5 Miles N. from *Odenzyll*, ſaid to have been founded and taken its Name from *Odomarus* K. of the *Francs*, becauſe one *Vechtanus*, a Learned *Druid*, and one of his Familiars, was buried here: Or according to others, 'twas the Sepulchre of *Odomar* himſelf, and therefore called by his Name. 'Twas taken by the Biſhop of *Munſter* in 1672; but afterwards quitted by him. There are other Towns in this Diſtrict, ſuch as *Almelo*, *Homberg*, *Delden*, *Enſchede*, *Goor*, and *Diepenhem*; of which we find no Deſcription.

The County of Drente, *and Lordſhip of* Weſterwold.

THis is a large Country, has *Groningen* on the N. *Sallant*, *Twente*, and the County of *Benthem*, on the S. *Eaſt-Frieſland* on the W. *Embden* and other Parts of *Weſtphalia* on the E. A great Part of it has Marſhes and Heaths, and other Parts abound with Turf, which are carried to *Holland* and elſewhere. 'Tis a diſtinct County, and not properly one of the United Provinces, thô obliged to contribute to all their publick Taxes. They have a Right to chuſe their own Governor, an Itinerant Court, from which there's no Appeal; and alledge, that they had formerly a Stadtholder; that they ſign'd the Union with the reſt of the Provinces, and were look'd upon as a diſtinct Member of the United States, till torn from them by the Biſhop of *Munſter*'s Invaſion: But we do not find that their Plea was much regarded, or that they have been allowed to ſend Deputies to the States General.

Their chief PLACES *are,*

1. *Coevorden*, on the Frontiers of *Weſtphalia*, 22 Miles N. E. from *Zwoll*, and 6 from *Hardenberg*. 'Tis, thô a ſmall Place, as ſtrong a Fortreſs as any in *Europe*, and of great Importance by its Situation, becauſe it commands the Paſſes into both the *Frieſlands*, *Drente*, and the *Omlands*. All the publick Ways about it, except what leads to *Groningen*, are ſo narrow, that an Army cannot march in that Country without great Difficulty. 'Tis ſtrengthen'd on the N. E. and W. by unpaſſable Marſhes. It has the Village *Dalen* on the N. and a large Heath that reaches as far as *Groningen*; and on the other Sides, ſuch Fens as, together with its ſtrong Works, make it impregnable. In 1581, 'twas ſurrender'd to the *Spaniards*, after the Confederate Troops under Count *Hohenlo* were defeated near *Hardenberg*; but recover'd ſoon after by *Hohenlo*, when he was reinforc'd. The *Spaniards* having defeated him a ſecond time, it fell again

again into their Hands. In 1592, Pr. *Maurice* having defeated the *Spaniards* under *Verdugas*, who was ſent to relieve it, took it again. In 1593, *Verdugas* attack'd it once more, but was forc'd by Pr. *Maurice* to raiſe the Siege. In 1672, 'twas treacherouſly ſurrender'd to the Biſhop of *Munſter*, almoſt without Oppoſition, tho' defended by 7 good Baſtions, bearing the Name of the United Provinces, with excellent Parapets, Fauſſe-Brays, and other Outworks; their Caſtle reckon'd impregnable, a large and deep double Ditch, and exceeding high and ſtrong Ramparts; but in *December* following 'twas recover'd by the *Dutch* with very little Reſiſtance, tho' the Garriſon was ſtrong, and well provided, and had Notice of their Approach; but the *Dutch* coming ſeveral Hours later than the Garriſon was informed by Deſerters, they took it for a falſe Alarm; and relying on the Strength of the Place, moſt of 'em went to Bed, being tir'd out with watching; the *Dutch* approach'd it under a Fog, and making their Aſſault, recover'd it with the Loſs of 150 Men. In the cloſe of 1673, the Biſhop of *Munſter* block'd it up, encompaſs'd it with a high Bank, and ſo coop'd up the Waters, that they very much annoy'd the Town, and made them deſpair of Relief: But while they were contriving to cut the Banks, they were broke down by a Storm, which relieved the Town, and drown'd ſome of the Biſhop's Troops.

In the ſame Country, near *Weſterwold*, lies *Valterſchanz*, 12 Miles N. E. from *Coeverden*, ſo good a Fortreſs, that 'tis able to reſiſt the ſtrongeſt Enemy: And nearer *Coeverden*, there lies another ſtrong Fort called *Schanz-Ten-Hole*; but not ſo conſiderable as the former.

The reſt of this Country contains ſeveral neat and large Villages; the chief of which are, 1. *Meppel*, a large open Town, noted for furniſhing Turfs to the Neighbourhood. 2. *Aſſen*, towards the N. of the Province, a ſmall City, where there's a Court of Judicature. This Country is divided into 6 Diſtricts, who have each 4 Judges, choſen Annually out of the Gentry and Peaſants, that every Week diſtribute Juſtice and determine Suits in their reſpective Juriſdictions. They meet all together three times in a Year to determine Cauſes of a higher Nature; but there lies an Appeal to the Supreme Court of the Province, which finally determines the Matter. Beſides, every Village has an Officer called a *Scout*, who determines leſſer Cauſes, and has a Power to diſtrein upon Goods. *Coeverden*, and the Lordſhip of *Runen*, are exempted from all thoſe Courts; the latter being ſubject to ſome Nobles, and the other to the Governor of the Province, who generally reſides in the Caſtle of *Coeverden*. The Lordſhip of *Weſterwold* lies betwixt *Drente* and *Eaſt-Frieſland*, and is generally mooriſh, except where it lies on the Bay of *Dullart*; contains about 12 Villages, and 2 Monaſteries. It had formerly particular Lords, belong'd afterwards, with the County of *Drente*, to the Province of *Utrecht*, then to *Guelderland*; and at laſt 'twas given by the Houſe of *Burgundy* to the City of *Groningen*, on Condition they ſhould not change its Laws, nor diminiſh the Liberty of the Villagers; and under their Juriſdiction it ſtill remains.

While *Over-Iſſel* was under the Biſhop of *Utrecht*, the States of the Province had the Supreme Power, he being only Preſident, and oblig'd to put their Reſolves in Execution: Nor had he any Juriſdiction over the Clergy, or the three chief Cities of *Daventer*, *Campen*, and *Zwoll*; but he being unable to protect them, they ſubmitted to the Emperor *Charles* V. on Condition that he ſhould preſerve their ancient Liberties and Privileges. They had ſome Difficulty after the *Munſter* Invaſion to be reſtor'd to their Privilege of ſending Deputies to the States General; but at laſt they were allowed it in 1674. M. *de Fer* ſays, the whole Province contains 9 Cities, 10 large open Towns, 210 Villages, and 5 Fortreſſes.

The Province of Groningen,

HAS the Ocean on the N. *Over-Iſſel* on the S. *Frieſland* on the W. and *Embden* on the E. The greateſt Length from S. E. to N. W. is 46 Miles; but its Breadth is unequal, the greateſt being about 24; and that Part of the Province which lies betwixt *Over-Iſſel* and *Embden*, or rather Part of *Weſtphalia*, is a very narrow Tract of Ground. 'Tis debated by Authors, whether the ancient Inhabitants were the *Frizoni*?

Digitized by Google

zons? But the preſent Inhabitants are agreed to be deſcended for moſt part from *Weſtphalia* and *Drente*. The Air of this Country is ſharp, and well purified by continual Breezes; ſo that People of 70, 80, and 90 Years of Age, are frequent here. They have little Stone or Wood, but Plenty of Turf for Fuel: They have good Paſture Ground, and large Herds of great and ſmall Cattle, but few Wild-Beaſts. They have ſtore of Salt and Freſh-Water Fiſh, and are in Diſpoſition much like the *Frizons*, but more induſtrious and cautious, which is aſcribed to their Trade and frequent Commerce with Strangers. *Ubbo Emmius* ſays, That an Age before he wrote, 'twas called the *Leſſer Frieſland*; and that tho' the whole went under the Name of *Groningen*, yet in their publick Acts 'twas only called *Omland*: But the Stile at preſent is *Groningen* and the *Omlands*.

Groningen is divided into the Lordſhip of *Gorecht*, a ſmall Tract in the middle of the Country; the *Old Ampt*, lying E. from hence to the Bank of *Dollart* Bay; the *Weſterwold*, which lies S. from hence, and runs like a ſmall Wedge betwixt *Drente* and the Biſhoprick of *Munſter*.

The *Omlands* is divided into the W. Quarter betwixt *Frieſland* and the *Gorecht*; *Hunſingo*, which is the N. Part of the Province; and *Five-Linge*, which lies betwixt *Hunſingo* and the *Old Ampt*.

The chief PLACES *are*,

1. *Groningen*, 30 Miles N. W. from *Coeworden*, 21 S. W. from *Embden*, and 29 E. from *Leewarden*, in Long. 25. 12. Lat. 53. 12. Some derive the Name from *Grunius*, a *Trojan* or *Franc*. It ſtands on the Rivers *Hunniſus* and *Aha*, in a Point of Land where they join; ſo that 'tis water'd with ſeveral Channels, artificial and natural. The *Aha* is received and let out of the City by ſeveral large Arches under its Fortifications; and where it goes out, receives the *Hunniſus*, which encompaſſes the E. and N. Parts of the City, and forms a Channel capable of a great Number of Veſſels. The *Aha* has a Bridge of Brick over it within the City, which has been much enlarged at ſeveral times, particularly in 1615, when 'twas made one half larger than before. It has 17 great Baſtions, with other Fortifications in proportion, and is encompaſſed with a Ditch of 270 Foot broad. The City is large and populous, and, if well garriſon'd, reckon'd impregnable. It has a Communication with the *German* Ocean and the River *Ems*, which makes it a Place of great Trade; having likewiſe the Conveniency of Commerce with the neighbouring Country by Rivers and Canals. It had formerly 3 Pariſh Churches, beſides 5 belonging to Monaſteries, and 4 to Hoſpitals. The chief of 'em, at the End of the great Market-place, is St. *Martin's*, where there was formerly an Organ made by *Rodolphus Agricola*. St. *Walburg's* and St *Mary's* have a high Tower each; the firſt is of a round Form, is a ſtrong Building, and has a Fountain in it, which ſprings continually. Its Tower is the beſt in the Country, and has 16 Bells, one of 'em very large. It has now but 3 Pariſh Churches, to which the other Pariſhes are united. The Church and Monaſtery of the *Franciſcans* ſtands about the middle of the City, and thoſe of St. *James* and the *Dominicans* on the N. near the Walls, but now turn'd to other Uſes. The Friary near St. *Walburg's* is now the Reſidence of the Governor of the Province. They have 3 Market-Places; the largeſt of which, called the Ox-*Market*, is about 180 Paces ſquare, in which ſtands their Town-Houſe: The other, called the *Fiſh-Market*, is longer, thô not ſo broad. Into theſe two Market-Places run 17 large Streets, 6 of which are in a ſtraight Line to ſo many Gates of the City; and thoſe in the Old Town are ſo neatly pav'd, that a Man may ſafely walk them in the darkeſt Night without any Light. They have 27 ſpacious Streets in all, ſeveral of 'em adorn'd with curious Buildings; and moſt of the Houſes have Gardens and Fruit-Trees, which yield them both Profit and Pleaſure. The City has great Privileges, was formerly one of the Hans-Towns, was exempted from appearing at other Tribunals. They had alſo the Privilege of coining Gold and Silver. It had the Benefit of a Staple, and has many particular Laws: The chief of which are, 1. That the Names of Bankrupts, if the Creditors require it, are publiſh'd from an upper Window of the Town-Houſe, upon which they were formerly

out-

Digitized by Google

outlaw'd; but now 'tis only a Reproach. 2. Upon the Death of the Parents, the Son has only a double Portion to that of the Daughter; and the Husband and Wife cannot sell or mortgage one another's immoveable Estates without mutual Consent. 3. Those that are not baptiz'd according to the Church establish'd by Law, cannot inherit. 4. A 4th Part of such Estates as devolve to Persons dwelling beyond the *Ems* and the River *Laers*, comes to the publick Treasury of the City. The Emperor *Henry* III. gave to *Berthold* Bishop of *Utrecht* what he possessed in *Groningen*. The succeeding Bishops made this a Handle to lay Claim to the whole City, which occasioned many Quarrels betwixt them and the Citizens, till in 1392 the Bishop quitted his Pretensions; but in 1401, another Bishop renewing them, they submitted to the Earl of *East-Friesland*, then to the Duke of *Guelder*, and at last to *Charles* V. They revolted from *Spain* in 1579; but returning again under their Dominion, Prince *Maurice* in 1594 took the Town for the United Provinces. In 1672, they made such a brave Resistance against the Bishop of *Munster*, that he lost 10000 Men before it, and was obliged to raise the Siege; for which this City was rewarded with a double Vote in the Council of State of the United Provinces. There have always been great Controversies betwixt this City and the *Omlanders* about the Extent of their Jurisdiction, from which the latter plead Exemption; and 'twas accordingly determin'd in their Favour by the Pr. of *Orange* and the States. The Citizens are said to be haughty, great Lovers of Liberty, profuse in Diet and Habit, industrious in Trade, and tenacious of their Religion; yet they allow the Lutherans and Anabaptists a Toleration. Their Inclination to Profuseness has occasioned a Law to regulate their Expences at Weddings and other Solemnities. In 1614, an University was founded here, with Professors in all Faculties. Their first Rector was the famous *Ubbo Emmius*. There's a Settlement for 40 Scholars, who pay no more each but 45 Crowns *per Annum*; the rest of their Charge being born by the States. In their Library there's an Inscription, attested by credible Persons, giving an Account, That a Soldier liv'd there 16 Days after a Wound received in the right Ventricle of his Heart. Their University is liberally endow'd out of the Revenues of the Monasteries. They have also a publick School, with 7 Masters for the Languages, who have each of 'em a House, and a handsome Salary. At the Entrance of the School, there's this Motto:

Hoc age quo morieris facta fuisse velis.
i. e.
Live as you would die.

The Prince's Palace is on the N. Side of the City, and in one of its Chambers are the Pictures of all the Princes of *Orange* and Counts of *Nassau*. Near to this there's a very fine Garden, and the Stadthouse, with a Latin Inscription, importing, That here the Magistrates of the City, and Nobles and Rusticks of *Omland*, meet for the publick Affairs of the Province. Their Government is by 4 Consuls and 12 Senators, whose Office continues for two Years, one half of 'em going out Annually, the like Number being chosen by the 24 Jurats in their Place; who, after hearing a Sermon, meet in the Town-House, when the Consul for the Time puts 24 Silver Beans into a Hat; 5 of which being colour'd, those who draw them are the Electors, and are shut up until such time as they chuse 2 Consuls and 6 Senators, in the Room of those that go out. The Jurats are chosen in the same Manner. The Consuls and Senators have the Sovereign Power in the City; but in Matters of Peace and War, they take the Advice of the 8 Senators that went out last, and the Jurats, who represent the Corporations of the City. On extraordinary Occasions, they likewise call to their Assistance some other Citizens of the best Rank. There were formerly two Ædiles or Tribunes of the Corporations; but it having been found that they made use of their Sway to promote Faction and Sedition, they were laid aside, and the Jurats are all sworn against such Practices when admitted to their Office. They have another Council called *Hoofmen*'s, into which no Citizen is admitted but such as have been Consuls. Their Jurisdiction is over the Territory of the City and the *Omlands*, from whence 3 Members are admitted into this

Digitized by Google

this Council, where they preſide in their Turns by Lot. This City is noted for the Birth of the famous *Rodolphus Agricola*, whom *Eraſmus* calls the greateſt Scholar that any Age has produc'd; and of *Weſelius* his Cotemporary, ſo univerſally learned, that he was called, *Lux Mundi*. For the reſt, we refer to *Blaeu*.

2. *Dam*, 11 Miles N. E. from *Groningen*, and about 2 Miles from the Bay of the *Ems*. It lies in a rich and pleaſant Soil, is well built, but not fortified, becauſe of the Jealouſy of thoſe of *Groningen* againſt the *Omlanders*, in whoſe Territory this Town is ſeated.

3. *Winſchoten*, 15 Miles S. E. from *Groningen*, a Fortreſs in the *Old Ampt*, was taken and plunder'd by the Troops of *Munſter* in 1674, and is remarkable for the firſt Battle betwixt the *Spaniards* and the *Dutch* in Defence of their Liberty in 1568, when Count *Lewis* of *Naſſau* defeated the *Spaniſh* General *Arenberg*.

4. *Billingwolderſchans*, near the Bay of *Dullart*, 6 Miles S. E. from *Winſchoten*: It commands one of the moſt important Paſſes betwixt *Weſtphalia* and *Groningen*; and the Tide coming up to it, they have Sluces, by which they can drown the neighbouring Country. This Fort was taken by the Biſhop of *Munſter* in 1672; but afterwards recover'd by the *Dutch*.

5. *Bourtangerfort*, lies 7 Miles S. E. from *Billingwolderſchans*. 'Tis almoſt encompaſſed by unpaſſable Moraſſes, and was built by Prince *William* of *Naſſau* in 1593, becauſe of the Conveniency of its Situation, and repulſed *Verdugas* the *Spaniſh* General before 'twas quite finiſh'd.

6. *Langakerſchans*, lies on the Bay of *Dullart*, 20 Miles S. E. from *Groningen*. 'Twas taken by the Biſhop of *Munſter* in 1672; but retaken by the brave General *Rabenhaupt* in 1673, when he found a great Booty there, the Troops of *Munſter* having made it a Storehouſe for their Plunder. There's another Fort called the *Old* or *Bonnerſchans*, betwixt *Langaker* and *Billingwolder*; which Forts, with the Moraſſes, make a very ſtrong Frontier betwixt *Groningen*, the County of *Embden*, and *Weſtphalia*.

7. *Delfzyl*, lies on the *Dullart* Bay, 2 Miles E. from *Dam*, is a very good Harbour, which for Situation, and other Advantages, exceeds that of *Embden*. 'Tis a Place of ſuch Importance, that 'twas always well fortified by ſuch as had it in Poſſeſſion. The D. of *Alva* deſign'd to have built a good City here, but was prevented by the Wars to which his bloody Government gave Riſe. 'Twas taken in the beginning of thoſe Wars by the *Dutch*; but ſurrender'd to the *Spaniards* after the Defeat of the *Dutch* at the Battle of *Ardenburg*, and recover'd in 1591. 'Twas lately very well fortify'd by the States General, who have taken in as much Ground as makes it equal in Extent to a great Town. In 1672, their *Eaſt-India* Fleet of 14 Ships, whoſe Cargo was valu'd at 16000000 *l.* Sterling, eſcap'd hither from the *Engliſh* Fleet, which purſu'd them very cloſe.

In the *Old Ampt* ſtands the ancient Village of *Midwold*, formerly a flouriſhing Place, but moſt of it now ruin'd by the *Dullart* Sea, which above 400 Years ago ſwallowed up 33 good Villages in thoſe Parts.

The *Omlands*, as we have heard before, act in ſome Things jointly, and in others independant of the City of *Groningen*; which having occaſioned many Differences betwixt them, the States General, to prevent the like, made ſeveral new Orders relating to the Government of that Province; particularly, That none ſhould have any publick Employment unleſs a Proteſtant, having an Eſtate of ſuch a Value, and of good Reputation; with ſome other Orders relating to a more equal Diſtribution of publick Offices, and what ſort of Perſons ſhould be admitted to ſit in the Provincial Aſſemblies.

The Province of Weſtfrieſland,

HAS the *Zuyder-Sea* on the W. and Part of the S. the Province of *Groningen* and Part of *Over-Iſſel* on the E. and S. and the Ocean on the N. *Mull* makes it about 40 Miles from N. to S. and 25 from E. to W. We have formerly taken Notice from *Cluverius*, That the *Friſii* were its ancient Inhabitants; and from Sir *W. Temple*, That Part of the *Saxons* who conquer'd *England* came from hence. Some ſay, this Country was much larger formerly, and join'd to the

Digitized by Google

three Islands on the N. of it, which have been separated by Inundations: That the Districts of *Oostergo* and *Westergo* were also divided by a large Bay; at the Mouth of which, where now stands *Berlecum*, there was a Town of great Trade, the Ruins of which are still to be seen; and that the *Lawers* was formerly a deep and navigable River, but now choak'd up.

The Air of the Country being purified with frequent Winds, is better than could be expected from its low Situation; tho' in the Winter, the Fields are generally so full of Water, that there's no travelling but on Banks. In Summer, 'tis dry'd by the Season and Art, and in many Places affords good Pasturage and Arable Land, especially in *Oostergo*. *Westergo*, which is the larger Tract, is more level and fenny, but abounds with Fish and Fowl. Neither of 'em have any Woods; but they are supplied with Turf from a Bituminous Earth, which *Guicciardin* says did formerly take Fire of it self in this Province, near the *Zuyder-Sea*, and could not be stopp'd by Art or Industry, till it had burnt two Leagues in Length, and as much in Breadth, when the subterraneous Waters burst out and extinguish'd it, and form'd that Lake now call'd the *Jonkermeer*. *Becanus* says, the like happen'd in *Brabant* in 1541, and in the Province of *Utrecht* in 1567. *Ubbo Emmius* and *Guicciardin* say, the Inhabitants are fair, tall, stout, great Lovers of Liberty, frugal, affable, and modest; but when provok'd, grow outragious. Few of 'em marry young, which is thought to be the Cause of their strong and healthful Constitution, and of the Vivacity of their Children. Jealousy is rare among them, and their Women chast; but Adultery, when discover'd, severely punish'd. The Men are said to bear Cold, Hunger and Thirst, better than most other People. They are of a Martial Disposition, and not much addicted to Trade, which is ascrib'd to the Temper of their Nobility and Gentry; many of whom despise Commerce, or to match with a Citizen's Family; yet their Ladies are much addicted to Spinning, and other Parts of good Housewifry, while their Husbands follow the Court and Camp, or divert themselves by Hunting. The Food of the meaner Sort is salt and smoak'd Flesh, Bacon, Barley-Broth, Cheese, and Butter; but they affect to have good Tables on *Sundays*. They are reckon'd good Companions; and tho' not so much addicted to Drinking as some of their Neighbours, carrouse frequently in Wine and Ale, and will very much resent the Refusal of being pledg'd. They usually drink in Horn Cups tip'd with Silver, encompassed with Rings of the same Metal; and when they have drank, 'tis common with both Sexes to reach out the Cup and their Hand, to be kiss'd by the courteous Pledger. The Nobility are splendid in their Apparel, live sumptuously, keep many Servants, and are great Admirers of Coaches and Calashes. Both Sexes follow the *French* Fashion in their Dress; and the elder Women affect much Gold and Silver in their Apparel on solemn Occasions. Their Language comes nearer the old *English* than any other in *Europe*. They were formerly said to chuse their Wives more for their Beauty and good Nature, than for their Riches; but of late, they look after good Portions as well as their Neighbours. When a Bride comes home, she takes Possession of the House by drinking to the Guests, and bidding them welcome. When a Husband dies without Issue, the Widow returns to her Kindred; and 'tis reckon'd scandalous if she marry within a Year after. The Relations of the Deceas'd mourn for a Year in black Vestments down to their Ankles; but in some Places they mourn only 30 Days. The Men were formerly noted for Strength and Courage, that the *Hollanders* us'd to say, *As strong as a Frizon*, by way of Proverb.

Their Religion is that of the other Provinces establish'd by Law; but they tolerate Anabaptists, and connive at Papists. We have formerly taken Notice, That they were long subject to the *Romans*; and after they shook off their Yoke, subdued and possessed most of *Old Batavia*, till they were harrass'd by the *Normans*. They are said to have had 7 Princes, 7 Dukes, and 9 Kings, of their own, who kept their Court at *Staveren*, and were called Kings of *East-Friesland*, to distinguish them from those of *North-Holland* or *West-Friesland*, who resided at *Medenblick*. 'Twas formerly join'd to *North-Holland*, as appears by their ancient Annals, when that Part of the Country was

Digitized by Google

was poſſeſſed by one *Ivo Happer* about 1013, who ſold it off upon the finding of a live Herring in a Pool in the middle of one of his Fields, which he took as a Preſage of the Inundation that happen'd ſoon after. They were afterwards ſubdued by the *Francs* under *Charlemagne*, who allow'd them great Privileges, and to chuſe their own Governors, call'd Poteſtates, of whom they had 16. They were much troubled with Diſſentions by the Factions of the *Schyringers* and *Vetcoopers*; at the ſame time when the *Hollanders* were plagued with the *Hoecks* and *Cabillaux*; the *Italians* with the *Guelphs* and *Gibelins*; *Flanders* by thoſe who wore Hoods of different Colours; and *France* by Factions of the like Nature: As if ſome malignant Conjunction had then reign'd over all *Europe*. And tho' theſe Factions us'd to join in oppoſing Foreign Enemies, they gave Opportunity firſt to the *Saxons*, and then to the *Gueldrians*, to invade them, till they came to the Houſe of *Burgundy*; after which they revolted with the other Provinces from the Crown of *Spain*.

The Province is divided into *Ooſtergo*, *Weſtergo*, and the 7 *Wolden* or Forreſts: The firſt lies next to the River *Laars*, and the *Omlands* on the N. contains the Cities of *Leuwarden* and *Doccum*, with 12 Juriſdictions, 127 Villages, and had formerly 21 Monaſteries, beſides many ancient Caſtles and Noblemen's Houſes. *Weſtergo* is the largeſt and moſt populous Diviſion, contains the Towns of *Franeker*, *Sneek*, *Bolſwarden*, *Hatlingen*, *Slooten*, *Stavern*, *Hindelopen*, *Worcum*, and *Iſt*, 8 Juriſdictions, 127 Villages, and formerly 24 Monaſteries. It lies S. from *Ooſtergo*, and W. from *Sevenwolden*. The latter is for moſt part mooriſh, in other Places ſandy and barren; but abounds with Turf, Lakes well ſtor'd with Fiſh, and has ſeveral ſmall Woods, from whence it takes its Name. It has no Towns, but is divided into 9 Juriſdictions, containing 77 Villages, and formerly one Monaſtery. In ſome Places they have good Corn, but little Paſturage; and the Inhabitants living hard, are reckon'd the beſt Soldiers of the Province. During the *French* Invaſion in 1672, they were miſerably divided into Factions, and ſet up two different Provincial Aſſemblies, who enacted contrary Orders, and could not be brought to Reaſon by their own Stadtholder, till the Prince of *Orange* march'd thither with a conſiderable Army in 1673, when he appeas'd their Differences among themſelves, and reconcil'd them with thoſe of *Groningen*.

The chief TOWNS *are*,

1. *Franeker*, in Long. 24. 15. Lat. 53 10. 9 Miles W. from *Leuwarden*, 32 W. from *Groningen*, and 4 Miles E. from the *Zuyder-Sea*. 'Tis ſaid to have been founded in 1191, and to take its Name from the Portion of Land on which 'twas built. It abounds with Channels, two of which run through the Length of the Town; and by their Communication with others, make it very neat, and advance its Trade. 'Tis encompaſſed with a good Rampart, a broad and deep Ditch; and the Air is ſo wholeſome, that many Gentlemen have choſe it for their Place of Reſidence, and built ſtately Houſes in it. On the W. Side there's a Caſtle of Brick, ſurrounded by a deep and broad Ditch, and is ſo very ſtrong, that it commands the City, and was the Seat of their Governors, till the Time of *Charles* V. The whole Town conſiſts but of one Pariſh, with a large Church, called St. *Martin's*, adorn'd with a tall and handſome Steeple. They have an Hoſpital for 30 Orphans of both Sexes, where they are taught Reading, Writing, and Handycrafts; and the Girls, when marriageable, are provided with competent Portions. The Fields on the N. and W. lie high, and produce good Corn; but thoſe on the other Sides are low, and cover'd with Water in Winter. The Channel which comes from *Leuwarden* runs through the City, is navigable, and has high Banks for the Convenience of Paſſengers, and of the Horſes that draw their Boats when the Wind is contrary. Their Univerſity was founded in 1584, where they have 14 Profeſſors, endow'd by the Revenues of the old Monaſteries; and the Students, beſides other Immunities, are exempted from Taxes on Wine and Beer. The Rector *Magnificus* is choſen Annually out of the ſeveral Faculties by Turns, and has the Cognizance of Civil Cauſes; but the Criminal are referr'd to the Court of the Province. For their Learned Men, we refer to *Eleuſ*. They have likewiſe a Gram-

Digitized by Google

mar School of good Note. Their Government is like that of the other Cities formerly mentioned; but only this Town and *Leuwarden* in the whole Province chuſe their own Magiſtrates, the reſt being nam'd by the Stadtholder, out of a double Number preſented to him.

2. *Leuwarden*, lies 9 Miles E. from *Franeker*, is the largeſt, richeſt, beſt built, and moſt populous, of the Province, tho' not ſo ancient, as ſome others 'Twas walled in 1190, when it conſiſted but of one Pariſh. The Streets are cleanly, their Houſes ſplendid, their Bridges well pav'd, and their Gardens pleaſant. Their Churches, the Provincial Court, the Governor's Palace, and the Houſes of their Nobles, are fine Structures. The Figure of the City is a fort of a Square, encompaſſed with a ſtrong Rampart, a broad deep Ditch, 5 Bulwarks of Earth, with a Ditch each. It ſtands in a fruitful Soil; and by its navigable Canals, the largeſt of which runs to the Ocean, they have a good Trade with *Hamburg*, *Bremen*, *Embden*, and *Holland*, and are plentifully ſupplied with Neceſſaries from the neighbouring Country. One of their Canals to the Weſtward is commanded by ſtrong Sluces. They had formerly 4 Monaſteries, now turn'd to other Uſes. They have two Hoſpitals, one of 'em nobly endow'd for 100 poor People of both Sexes, and Accommodations for their Aged, Sick and Lunatick, and entertaining poor Strangers for two Nights at a time. They have ſeveral good Laws for regulating their Government, in which they admit no Military Men, nor any but thoſe of the eſtabliſh'd Religion, and of competent Eſtates. *Blau* gives an Account of their Learned Men.

3. *Dotcum*, lies 10 Miles N. E. from *Leuwarden*, in a fruitful Country, abounding with Corn and Paſture, good Villages, and Gentlemen's Seats. *Hegnitius* ſays, he ſaw a Piece of Coin here with an Inſcription, importing, That 'twas built by *Obbo* D. of *Frieſland* in 248; wall'd by King *Gondebald*, who coin'd Gold there in 739; That its Walls being demoliſhed in 1422, were rebuilt in 1516, demoliſhed again in 1531, and rebuilt in 1592: But *Emmius* ſays, the firſt time 'tis mentioned in any Record, is in the Story of the Martyrdom of St. *Boniface* about 1255; tho' ſome will have it earlier, in a Village near this Place, which, as the Legend ſays, was occaſioned by his turning the Bread of an uncharitable Woman into Stones, for refuſing to relieve him and his Companions in Extremity of Hunger. They pretended to have his Stole, Chalice, and Skull, there, which they ſhew'd to Strangers. It ſtands on the River *Ee*, by which it communicates with the Ocean and *Leuwarden*. Their Buildings are rather neat than ſtately, and their Houſes well furniſh'd. Their Guildhall is a handſome Structure: The Stone Bridge near it ſo broad, that it ſerves for a Market; and the Arches ſo large and high, that Veſſels paſs under 'em. They have two other Bridges. The Town was fortified by the States in 1582, with a large Ditch, Rampart, and Bulwarks. One of their Bridges is drawn up with Chains, to let Veſſels paſs without pulling down their Maſts. The River where it comes in and goes out of the Town is commanded by good Block-houſes, and a ſtrong Boom in the middle, left open by Day for the Paſſage of Ships, but let down by Night. On each Side of the Channel there's a fair beautiful Street, with a Bank to keep in the River, neatly pav'd with Flint, and fac'd with Stone. They have but one Pariſh-Church, and had formerly a handſome Cemetery, of which nothing remains now but a ſtately high Tower.

4. *Harlingen*, 4 Miles W. from *Franeker*, at the Mouth of the Canal, and on the Bank of the *Zuyder-Sea*. 'Twas formerly an inconſiderable Village, but now one of the moſt conſiderable Towns next to *Leuwarden* in the Country. It has been ſeveral times enlarged, and was ſtrongly fortified by *William* Prince of *Orange* about 1579. 'Twas further enlarged, together with its Harbour, in 1597, and the adjacent Country may be overflowed by the Sluces in an Hour's time, which makes it very ſtrong. Tho' the Harbour be large, and much frequented, 'tis not fit for Veſſels of great Burden, which muſt either lie off a good Diſtance at Sea, or unload Part of their Cargo before they can get in. Their chief Trade is in making Sails, in importing and exporting Corn, Pitch, Tar, Fir-Trees, and Deal. On the S. Side was formerly a ſtrong Caſtle, the Reſidence of *Albert* the *Saxon*, and

Digitized by Google

and other Tyrants, who plagu'd the Country, for which 'twas demoliſhed by the Inhabitants. It has a Grammar-School and two Hoſpitals, and is govern'd by its own Magiſtrates, appointed out of a Number preſented to the Provincial Council.

5. *Bolſwaert*, on the Sea, 6 Miles S. from *Harlingen*. 'Tis an ancient City, ſtands on a riſing Ground, encompaſſed with good Arable Lands and Paſturage. It had formerly a conſiderable Trade by Sea, but now deals chiefly with the neighbouring Towns by Canals. 'Tis one of the Hans-Towns, well Peopled, the Houſes neatly built, and it has ſeveral Channels, which run through the Town, capable of ſmaller Veſſels. It has 5 Gates, 4 Sluces on its Rivers, a ſmall Market-Place, a Town-Houſe, 1 Church with 2 Miniſters, a Grammar-School with 3 Maſters, 2 Monaſteries, now converted to other Uſes; with Hoſpitals for the Poor and Orphans. 'Tis govern'd by its own Magiſtrates, and encompaſſed by a good Ditch and Rampart.

6. *Sneek*, 5 Miles S. E. from *Bolſwaert*, is an ancient, populous, neat, and well fortified Town. They trade in Fiſhing and other Commodities, are well furniſhed with Freſh-Fiſh by neighbouring Lakes, both for Conſumption and Sale; and have a publick School, which, for the Salaries of the Maſters, and Number of Scholars, is the beſt in the Province, next to that of *Leuwarden*. *Joahimus Hopperus*, the famous Lawyer, who was Preſident to the K. of *Spain's* Council at *Madrid*, was bred here. The adjacent Country has good Paſturage; but the Ground lying low, is not fit for Corn. It has a good Trade with the neighbouring Towns by Means of Canals.

6. *Worcum*, lies on the Sea, 8 Miles S. W. from *Sneek*, in a rich Soil. The Harbour is choak'd up by Sands; but it drives a good Trade with the neighbouring Country by Means of Canals, and is well ſupplied with Fiſh from the neighbouring Lakes. 'Tis alſo govern'd by its own Magiſtrates.

8. *Hindelopen*, lies on the ſame Bank of the Sea, 3 Miles S. from *Worcum*. It has a ſmall Harbour, is govern'd by its own Magiſtrates, and ſubſiſts chiefly by Fiſhing and Husbandry.

9 *Slooten*, or *Sloot*, lies 7 Miles S. E. from *Hindelopen*, upon a navigable Current which comes from a neighbouring Lake, called the *Slooten Meer*, and falls into the Sea about a League below the Town, by which it has a Trade with *Holland* and other Parts. This Canal is ſhut up at Night by a Boom. The Streets are very neat. They have a handſome Town Houſe, 1 Church, 3 Gates, one of 'em large and ſtately; but the Fortifications not conſiderable, having been ruin'd in the *Spaniſh* Wars. Their Government is by 4 Conſuls and 4 Senators, without any Common-Council.

10. *Staveren*, lies on the Bank of the *Zuyder-Sea*, 9 Miles S. W. from *Slooten*. 'Tis by Latin Writers called *Stavia*, and *Staveridia*. *Ubbo Emmius* alledges, 'twas built and fortified in the firſt Year of Chriſt by a Prince of the Country, who appointed 3 Weekly Meetings of Sword-Players there, to inſtruct the Youth in the Art of Defence. The *Frieſland* Writers ſay, 'twas not only the Metropolis of the Country, and the Seat of their Kings, but the greateſt Emporium of both *Germanies*. That 'twas formerly a Place of great Trade, and particularly in the *Sound*, is evident from the Privilege they ſtill enjoy, of being diſpatch'd before all others by the Receivers of the K. of *Denmark*'s Cuſtoms; and 'twas the only Town in the *Netherlands* which was allowed a Trade with *France* during the War betwixt *Charles* V. and the *French* King. 'Twas prodigious rich; but their Trade is now decay'd by the choaking of their Harbour, which is aſcrib'd to the Divine Juſtice that puniſh'd the Pride and Avarice of the Inhabitants; of which they give this remarkable Inſtance, That a Merchant's Wife being enrag'd at her Husband's bringing home from the Eaſt Country a Ship full of Wheat, which was then very cheap, ſhe perſwaded him to throw it over-board; where, being quickly cover'd with Sand, the Harbour was choak'd up a little time after. The firſt of the *Frizon* Kings is ſaid to have built a Temple and Sanctuary betwixt this Place and *Medenblik* in *North-Holland* about 463; and *Rathodus*, their 6th King, is ſaid, when going to receive Baptiſm, to have return'd to his Idolatry, becauſe the Biſhop then told him, That his Anceſtors were all damn'd. *Ubbo Emmius* alledges, That this Prince extended his Dominions as far as *Nimeguen*; which he takes

takes to be imply'd by the Inſcription we have already mention'd on one of its Gates: *Hucuſque jus Stavriæ*, and, *Hic eſt Pes Imperii*. But *Scriverius* ſays, the Word *Stavria* denotes a Tribute that was paid through the *Roman* Empire, of which *Nimeguen* was then the Boundary on that Side; which is confirmed by the Chronicle of *Bohemia*, where the General Tax is called by that Name: And in ſeveral Places of *Germany*, the Tax for ſupporting the War againſt the *Turks*, and in the old Laws of the *Francs*, an Impoſt for clearing the Roads of Highwaymen, is called by the ſame Word. *Staveren* is ſaid to derive its Name from *Stavo*, a Log of Wood, which the Pagan *Frizons* worſhip'd under the Notion of *Jupiter*. 'Tis alſo recorded, That the Mouth of the River *Flevus* was anciently near this Town; and that about 1250, there was a Paſſage almoſt by Land from this City through a great Forreſt to *Enchuyſen* in *North-Holland*, which is now a Road for Ships. About a Quarter of a League from *Staveren*, into the Sea, there's ſtill to be ſeen, a little under Water, the Ruins of an old Monaſtery, which the Mariners carefully avoid. This is another Proof that the *Zuyder-Sea* has been form'd by ſucceſſive Inundations, of which *Staveren* it ſelf is an Inſtance; the greateſt Part of the Old Town being thus ſwallowed up; ſo that at preſent 'tis reduced chiefly to two Rows of Houſes on each Side of a ſmall River, over which there are ſeveral Wooden Bridges. The Streets are kept very neat, and the Water penn'd up by Sluces, to let it out or in on Occaſion. They have ſtill ſome Trade, eſpecially in Fiſhing, and Paſſage Boats over the Pools and Lakes of the neighbourhood. 'Tis fortified with a good Ditch and Rampart, and govern'd by its own Magiſtrates. 'Twas formerly the 3d of the Hans-Towns, and ſo powerful, ſays *Ubbo Emmius*, that in 1335 it wag'd War with *Hamburg* and *Lubeck*.

11. *Kuyndeſchans*, lies on the *Zuyder-Sea*, 15 Miles S E. from *Staveren*, on the Mouth of the River *Kuynder*. 'Tis an ancient Village, which enjoys the Privilege of Trade, is ſtrongly fortified with 5 good Bulwarks, and has another Fortification in the Neighbourhood called *Slykenburg*, which lies at the Conflux of two Rivers.

The Iſlands of *Ameland* and *Schiermonikoege*, on the N. of this Province, are not deſcrib'd, being inconſiderable, and having only 6 or 7 Villages upon them. M. *de Fer* reckons in the whole Province 11 Cities, 480 Villages, and 2 Iſlands.

Having finiſhed the 7 United Provinces, we come to their Conqueſts in *Flanders* and *Brabant*.

DUTCH BRABANT,

HAS the Province of *Holland* and *Dutch Guelderland* on the N. *Spaniſh Brabant* and the Biſhoprick of *Liege* on the S. *Zealand* on the W. Part of the Dutchy of *Cleve* and *Spaniſh Guelderland* on the E. *Moll* makes it 55 Miles from E. to W. and the greateſt Breadth 31 from S. to N.

The chief PLACES *are*,

1. *Breda*, 8 Miles S. from *Gertrudenberg*, about 20 Miles W. from *Boiſleduc*, and 25 N. E. from *Antwerp*. 'Tis a large, well built, populous, and very ſtrong City, encompaſſed with thick Walls and Mounts of Earth, two Trenches full of Water, one of 'em very broad and deep; ſo that 'tis reckoned one of the ſtrongeſt Towns in the *Netherlands*. Dr. *Brown* ſays, it has a large Ditch round the Counterſcarp, a Ravelin betwixt each Baſtion join'd to the Rampart on the inſide of the Ditch, beſides a good Number of Half-Moons and Horn-Works, and a Parapet, ſtrengthen'd with a double Row of Elms. 'Tis ſubject to the *Dutch* Commonwealth, but without any Share in the Government: Yet it pays its ancient Quota to the Support of the Union. The Lordſhip of it belongs to the Family of *Orange*, having been annexed to the Family of *Naſſau* by Marriage above 300 Years ago, together with the Barony, which contains 17 Villages. It ſtands on the Rivers *Had* and *Merk*, in a pleaſant Country, abounding with Arable Land, intermix'd with Meadows, Paſtures, and Copſes. The Palace, belonging to the Family of *Naſſau*, is a handſome Structure, with a pleaſant Garden between the Body of the Town and the Works. Prince *Henry* built another in the

Digitized by Google

the Citadel, in the Form of a Caſtle, after the Antick Way, with a noble Portico and handſome Gallery. It has alſo a fine Garden, where the Box-work is extreme curious. The great Church, with its Tower, are ancient and ſtately Structures. In the Side-Iſle of the Quire, there's the Tomb of Prince *Henry* I. having the Effigies of himſelf and his Princeſs at length on a Marble Baſe, and a Marble Canopy over them, ſupported by 4 ancient Heroes kneeling, and Latin Inſcriptions at the Corners, comparing him to *Julius Caſar* for Valour and Fortitude, and to *Attilius Regulus* for Magnanimity. There are ſeveral other Inſcriptions in the Church relating to the Revolutions of the Town, particularly to the taking of it by *Spinola* in 1634, and the retaking of it by Pr. *Frederick Henry* in 1637. 'Tis noted for the Treaty to reſtore King *Charles* II. of *Great Britain*, and his Declaration from thence to his Subjects. Some ſay, the Union of *Utrecht* was likewiſe concluded here. 'Twas ſurpris'd by the *Spaniards*, who had a Correſpondence with ſome Papiſts in the Town, in 1581; but retaken in 1590, 80 Soldiers being convey'd under a Load of Turf into the Caſtle. 'Twas afterwards beſieged in 1624 by *Spinola* with 30000 Men, who ſurrounded it with ſuch incredible Works, that 'twas not poſſible for Pr. *Maurice* to relieve it; ſo that almoſt after a Year's Siege 'twas forc'd to ſurrender by Famine. During the Time, the Garriſon had rais'd ſuch Fortifications, as made it one of the ſtrongeſt Cities in the World. 'Twas retaken after an obſtinate Defence by Pr. *Frederick* in 1637. The firſt Prince of the Houſe of *Orange*, who had Poſſeſſion of it about 1400, eſtabliſh'd an Academy here, with Profeſſors of the 4 Faculties, for the Inſtruction of Youth.

2. *Boiſleduc*, *S. Hertogen Boſch*, Lat. *Sylva Ducis*, and commonly *Boſch*, lies 20 Miles E. from *Breda*, on the Banks of the *Dromele*; which receiving there the *Aade* and the *Dieſe*, falls into the *Maeſe* at *Crevecaur*, about 4 Miles N. from thence. It had its Name from a neighbouring Wood, where the Dukes of *Brabant* us'd to hunt; which being cut down by D. *Godfrey* in his March againſt the *Gueldriens* in 1172, the Town was then built, and walled about 1196, having been ſince much enlarged. It ſtands on a riſing Ground in the middle of Fens, of a great Extent, in moſt Places unpaſſible, and always overflow'd in Winter, which makes it of very difficult Acceſs, there being no coming to it but by Cawſeys made on purpoſe, half a Mile long. 'Tis of a triangular Form, and has 7 large Bulwarks, which make it 7660 Paces in Compaſs. It has ſeveral Canals, which bring up Veſſels of good Burthen into the City. 'Tis encompaſſed by a ſtrong Wall and a deep Trench. The Avenues are commanded by ſeveral Forts, and the Citadel commands one Side of the Town, and the Country towards *Bommel*; ſo that 'tis reckon'd almoſt impregnable. There are 51 Stone Bridges, and 38 Wooden ones, for publick Uſe over their Canals, and as many others belonging to private Families. It has a ſpacious Market-Place, encompaſſed with fair Buildings; and there are 10 broad Streets which center in it. The Houſes in general are not ſo well built as thoſe in *Holland*; but they have a ſtately Town-Houſe, built after the Model of that of *Amſterdam*. The Church of St. *John*, formerly a Cathedral, is ſplendid and ſumptuous; in the Quire of which are the Arms of many of the Knights of the *Golden Fleece*, and over their Seats an Account of their Inſtitution, in Subſtance thus: "The moſt High and "Mighty Prince *Philip*, call'd *The Good*, by "the Grace of GOD, Duke of *Burgundy*, "*Lorrain*, and *Brabant*, did in 1429, in the "City of *Bruges*, in Imitation of *Gideon*, "inſtitute to the Honour of GOD and "the Virgin, and for the Sake of St. *An-"drew*, Patron of *Burgundy*, a Society of "Honourable Knights, into which might "be received Emperors, Kings, Dukes, "Marqueſſes, and other Perſonages, his "own Subjects or Foreigners, provided "they were of Noble Blood and good "Fame, to be called Knights of the *Golden "Fleece*; and the lawful D. of *Burgundy*, "if poſſeſſed of the *Low Countries*, to be "their perpetual Chief. They were to be "only 24 in Number, including the Chief, "with a Chancellor, a Treaſurer, a Secre-"tary, and King at Arms: And for their "Regulation, he made ſeveral Ordinances. The Town was the firſt, as appears by their Inſtrument given in to the States in 1651, for being admitted as a Governing Member

of

of the Union, that own'd their Zeal by countenancing the preaching of the Proteſtant Religion, and ſeiz'd the Chancellor of *Brabant*, and another Grandee, ſent thither by the Governeſs to hinder it; for which, in 1587, they were proſcrib'd, and the Proteſtants forc'd to leave the Country, upon the Prince of *Orange*'s Retreat. From that Time they were oppreſſed by the *Spaniards*, till reſcued by the *Germans*. In 1576, they ſign'd the *Pacification of Ghent*. In 1578, they ſwore the Peace of Religion, and in 1579 embrac'd the Union of *Utrecht*. 'Twas after taken by the Pr. of *Parma*, when the Proteſtants were again baniſh'd. Pr. *Maurice* beſieg'd it in vain in 1601; but Prince *Henry Frederick* retook it after an obſtinate Siege. The Mareſchal *Turenne* inveſted it in 1672, but ſoon after rais'd the Siege. Their Government is by two Prætors, who are generally Perſons of Noble Deſcent, the one for Civil, and the other for Criminal Affairs. They are aſſiſted by Eſchevins and a Common-Council; but there lies an Appeal from this, and all the other *Dutch* Cities in *Brabant*, to the Tribunal inſtituted for that End at the *Hague* in 1591, conſiſting of 7 Senators, a Secretary, a Treaſurer, and Attorney-General, who finally determine all Cauſes relating to *Dutch Brabant*. For Cardinal *Enckevondius*, and other Learned Men born here, we refer to *Bleau*. Their chief Trade is in making Needles, excellent Knives, and in Woollen and Linen Cloth. The Inhabitants are courteous, and of a more Martial Temper than any of their Neighbours. This City has a large Juriſdiction, comprehending *Campin*, *Peeland*, *Maefland*, the Diſtrict of *Oſterwick*, and the Towns of *Helmont*, *Eindhoven*, *Megen*, *Raveſtein*, and *Grave*.

Boxtel, 6 Miles S. from *Boiſleduc*, and of great Importance, becauſe it commands the Sluces which keep in and let out the Waters all over the neighbouring Country.

Helmont, or *Helmond*, 19 Miles S. E. from *Boiſleduc*, is a good wall'd Town, Capital of that call'd the *Peeland*, lies on the River *Aa*, and is noted for the Birth of the learned *Andreas Helwondanus*.

Eindhoven, a wall'd Town on the *Dommel*, about 9 Miles S. W. from *Helmont*, is the Capital of the Diſtrict of *Campin*, has a Church dedicated to St. *Katharine*, and a College of Canons belonging to it. 'Tis the Capital of the Diſtrict called *Campinland*.

Megen, a handſome Town on the *Maes*, 11 Miles N. E. from *Boiſleduc*, which gives Title to an Earldom, and has a Juriſdiction of good Extent.

Raveſtein, on the *Maes*, 4 Miles S. E. from *Megen*, is a neat Town with a good Caſtle, and a pretty large Juriſdiction. 'Twas formerly a Place of Strength; but the Fortifications demoliſhed by Agreement betwixt *Charles* V. and the D. of *Cleve*.

3. *Grave*, on the *Maes*, 4 Miles E. from *Raveſtein*, and 16 N. E. from *Boiſleduc*, a Town very ſtrong by Situation and Art, and of great Importance, becauſe it commands a conſiderable Paſs on the *Maes*, whoſe Waters fill the Trenches that encompaſs its Bulwarks. On the other Side, there's a great Marſh always full of Water, which makes the Town unacceſſible that Way. 'Tis beſides exceedingly well fortified with Ravelins, a Counterſcarp, Pallizado, and a great Horn-work, ſecur'd by a Cover'd-way. The Town of it ſelf is very neat and pleaſant, and eſteem'd the ſtrongeſt and eaſieſt to be defended in the *Netherlands*. It had formerly a Collegiate Body of Canons belonging to St. *Elizabeth*. The Lordſhip of it belongs to the Family of *Orange*, one of whoſe Anceſtors purchas'd the Fee-Farm of it of the Crown of *Spain*. 'Tis Capital of the Earldom of *Cuyck*, which is about 4 Miles long, and 1½ broad, and contains about 17 Villages. The Country adjacent to this Town is low, and conſiſts chiefly of Meadows and Paſturage. In 1586, 'twas by the Cowardice of the Governor ſurrender'd to the Pr. of *Parma*; and in 1602, recover'd again by Pr. *Maurice*. In 1672, 'twas treacherouſly ſurrender'd to the *French*, who fortified it ſtrongly, and made it one of their Store-houſes for Plunder. In 1674, the Pr. of *Orange* retook it after a Siege of 4 Months, the Garriſon being reduced to eat Horſe-Fleſh, and there being a great Breach made in the Cover'd-way. 'Tis ſaid, that 100000 great Shot were ſpent on both Sides; that the *French* loſt 2000 Men, and the *Dutch* 5000: Yet they reckoned the taking it of ſuch Importance, that they appointed a Day of Thankſgiving for it. Their Government is by a Judge and Scout,

Digitized by Google

Scout, 2 Conſuls, and 7 Eſchevins, that were Annually appointed by the Prince of *Orange*. They have alſo a Common-Council of 8, whoſe Advice they take in Matters of great Concernment. They enjoy great Immunities, and particularly an Exemption from moſt ſorts of Impoſts in the neighbouring Provinces.

4. *Bergenopzoom*, ſometimes called only *Bergen*, and in Latin *Berga*, or *Montes ad Zoiam*. It has its Name from its high Situation on the River *Zoom*. It lies 16 Miles S. W. from *Breda*. 'Twas formerly a Barony, but afterwards made a Marquiſate by the Emperor *Charles* V. 'Twas likewiſe a Place of good Trade, till its Commerce was engroſſed by *Antwerp*, which lies 17 Miles S. E. from it. 'Tis ſeated conveniently between *Brabant*, *Flanders*, *Holland*, and *Zealand*. The greateſt Part of the adjacent Country lies very low, and is made habitable only by Banks. It ſecures the Intercourſe betwixt *Holland* and *Zealand*, and opens the Way into *Spaniſh Brabant*. Its Harbour is pretty commodious, defended by 2 Forts and a Half-Moon, 4 Redoubts, and another Fortification; ſo that it can eaſily be relieved by Sea. The Town it ſelf is exceeding ſtrong; for beſides the Wall and Trench, it has Half-Moons, Horn-Works, and other Fortifications. The Buildings are neat and handſome. It has 3 Market-Places; and that called the Great Market is very capacious. Its principal Buildings are, St. *Lambert*'s Church, and the Marquiſſes Palace. They had formerly a Nunnery, which is now made an Hoſpital. The Town was in Poſſeſſion of the *Spaniards* at the Beginning of the Civil War; but upon a Mutiny, deliver'd to the *Dutch*. The D. of *Parma* endeavour'd to recover it in 1588, but in vain, 'twas ſo ſtoutly defended by the *Engliſh* Auxiliaries. In 1622, *Spinola* laid Siege to it, and attack'd it furiouſly; but Pr. *Maurice* oblig'd him to raiſe the Siege with the Loſs of about 12000 Men. The Garriſon fir'd 200000 great Shot at the *Spaniards*. The Arch-Dutcheſs *Iſabella* in a few Years after fortified *Santvliet*, and raiſed other Works in the Shallows near and upon the *Scheld*: Upon which the States ſuſpecting that theſe Things portended another Siege, they thought of making this Town ſo ſtrong, that it ſhould not be eaſily taken. In 1628, they made a Communication between *Steenbergen* and this Place by a Channel, which united and made paſſable the 3 Marſhes betwixt 'em. They alſo erected ſtrong Forts in ſuch Places as they found requiſite; and the Sluce near *Steenbergen* was well fortified, becauſe thereby the neighbouring Fields might be quickly overflown, and ſo the harraſſing of the Land of *Tolen*, and the laying cloſe Siege to *Bergen* on that Side, prevented; for it was ſuppoſed tenable enough on the S. Side by its own Works and Fortifications. The Marquiſate of *Bergenopzoom*, with its Appendances, was reſtored to the Count of *Auvergne*, by the Peace of *Nimeguen* in 1678.

5. *Steenbergen* lies near the Sea, about 4 M. from *Bergenopzoom*, is a ſmall Town, that was taken by the *Spaniards* without any Difficulty in 1622, in order to proſecute the Siege of *Bergenopzoom*; and after the raiſing of that Siege, was with as much Eaſe retaken by Prince *Maurice*. In 1627, it was ſtrengthen'd with new Ramparts and Bulwarks, ſeveral Redoubts and ſmall Forts in the adjoining Part of the Country, and united to *Bergen* by the Canal above mentioned for their mutual Defence. The firſt Fort ſtands in a Place called *Sanſtract*, from its ſandy Soil, is about 180 Geometrical Rods in Circuit. The 2d, which is of the ſame Compaſs, lies cloſe upon the Sand-Hills, in the middle between the other two. The 3d is the largeſt, being 220 Rods in Circumference, with a Horn-Work and Half-Moon. The *Spaniards* drew Forces together to hinder the Proceeding of this Work, but in vain, for it was cover'd by the Pr. of *Orange*.

6. *Santvliet* is 8 M. S. from *Bergenopzoom*, was begun by the *Spaniards* in 1627, with ſome other Forts in the Neighbourhood, in order to attack *Lillo*. They made it very ſtrong, and it continued in their Hands after the taking of the other neighbouring Places. It was taken in 1705 by the Confederates, when the Forces under Command of the D. of *Marlborough* forc'd the *French* Lines, by which they had made this Place very ſtrong on the Side of the Land; but 'twas diſmantled by the Confederates.

7. *Lillo* on the *Scheld*, 9 M. N. W. from *Antwerp*, and 4 S. from *Santvliet*. It was

Digitized by Google

fortified and garriſon'd by the Citizens of *Antwerp* about 1584, to ſecure the Paſſage of the River, and made ſo ſtrong during the Siege of that City, that the *Spaniards*, after they became Maſters of *Antwerp*, could not take it, but were repulſed from before it with the Loſs of 2000 Men. It has continued in Poſſeſſion of the *Dutch* ever ſince; is now enlarged to a pretty little Town, and reckon'd much ſtronger ſince its Harbour was choak'd up. It has a Right of demanding Toll upon the *Scheld*, and, with ſome other Forts in Poſſeſſion of the *Dutch*, curbs the Trade of *Antwerp*.

Theſe two Places are not properly in *Dutch Brabant*; but ſince they adjoin to it, and are under their Subjection, we chuſe to deſcribe them here, thô they be Part of the Marquiſate of the Holy Empire.

Betwixt this Town and *Santvliet*, there lies alſo a ſtrong Fort for the further Security of *Lillo*, called by the Name of *Henry Frederick*.

DUTCH FLANDERS,

Lies S. of *Zealand*, from which 'tis ſeparated by the *Scheld*. 'Tis 31 Miles long, and 13 where broadeſt.

The chief PLACES *are*,

1. *Sluys*, about 5 Miles N. E. from *Bruges*, and 13 N. E. from *Oſtend*. It has a very large Harbour, capable of containing 500 Ships. 'Tis one of the ſtrongeſt Frontier Towns belonging to the States, and was formerly a Place of good Trade, which is now much decay'd. 'Tis extremely well fortified, and has always a good Garriſon. 'Twas taken by the D. of *Parma* in 1587, but retaken by Pr. *Maurice* in 1604. After which he fortified it with great Care, becauſe of its Importance.

2. *Ardenburg*, within a League of *Sluys* to the S. E. formerly the Capital of Maritime *Flanders*; but fell to Decay after the Removal of the Trade to *Bruges*. 'Twas taken by the *Dutch* in 1604, and made ſuch a brave Defence againſt the *French* in 1672, that it repulſed them with the Loſs of 1200 Men, tho' then but ill fortified.

3. *Middleburg*, a ſmall Town 4 Miles S. E. from *Sluys*.

4. *Sas van Ghent*, a very ſtrong Place among Marſhes, 11 Miles N. from *Ghent*. It has Sluces by which they can lay the Country under Water in a little Time. It has been in Poſſeſſion of the *Dutch* ever ſince 1644.

5. *Hulſt*, in that called the Country of *Waes*, a very ſtrong Town, which was taken by the *Dutch* in 1645, and confirmed to them by the Treaty of *Munſter*. 'Tis a Place of good Trade, and lies 9 Miles E. from *Sas van Ghent*.

6. *Axel*, about a League W. from *Hulſt*, was formerly only an open Town; but afterwards fortified by thoſe of *Ghent*. *Philip the Good*, D. of *Burgundy*, diſmantled it in 1452. 'Twas fortified by the *Dutch* during the *Spaniſh* War, and has ſince continued in their Poſſeſſion.

7. *Lieſkens*, on the Bank of the *Scheld*, over againſt *Lillo*, is a Fort which was rais'd by the States to ſecure the Paſſage of the *Scheld*.

8. *Ter-Neuſe*, a Place well fortified on the Bank of the *Scheld*, about 6 Miles N. from *Axel*.

9. *Philippin*, 4 Miles N. W. from *Sas van Ghent*, was a Fortreſs built by Order of *Philip* II. of *Spain*, about the Beginning of the laſt Century.

10. *Bier Vliet*, a little Iſland in the Mouth of a Branch of the *Scheld*, with a Town of the ſame Name, 4 Miles N. W. from *Philippin*. 'Tis a very important Fortreſs, becauſe it commands the Paſſage from that Part of the Country into *Zealand*.

11. *Iſendyck*, lies above 2 Miles W. from *Bier Vliet*, on the other Side of the Canal, is a little Town well fortified.

12. *Oſburg*, on the Canal which ſeparates the Iſle of *Cadſant* from the Continent, is alſo a fortified Town.

13. *Cadſant*, an Iſland in the Mouth of the *Scheld*, over-againſt the Iſle of *Walcheren* in *Zealand*, is 9 Miles long, and 4 broad. It has a Fortreſs of the ſame Name of great Conſequence to the *Dutch*, becauſe it preſerves the Communication between *Zealand* and *Flanders*. This Iſland produces very good Wheat and Graſs.

DUTCH

Digitized by Google

DUTCH LIMBURG,

THE *Dutch* poſſeſs in this Country, which is ſeparated from *Dutch Brabant* by Part of the Biſhoprick of *Liege*, ſays *La Foreſt*, the Counties of *Falkenburg*, or *Fauquemont*, *Dalem*, and *Rolduc*. Some pretend that theſe never belong'd properly to the Dutchy of *Limburg*, but were only annex'd to it.

The chief PLACES *are*,

1. *Fauquemont*, or *Falkenburg*, on the *Gutle*, about 8 Miles N. E. from *Maeſtricht*, and 19 W. from *Juliers*. 'Tis a large and neat Town, was formerly well fortified, and had a ſtrong Caſtle. 'Twas taken by the *French* in 1672, who made it much ſtronger; but being obliged to reſtore it by the Treaty of *Nimeguen*, they diſmantled it.

2. *Dalem*, on the *Berin*, 9 Miles S. W. from *Falkenburg*, and 7 S. E. from *Maeſtricht*. 'Tis a ſmall Town, with an ancient Caſtle. It had formerly Earls of its own, who had a large Territory. It came afterwards to the Dukes of *Brabant*. The *French* took it in 1672, demoliſhed the Fortifications, and reſtored it to the *Dutch* by the Treaty of *Nimeguen*.

3. *Rolduc*, on the E. Side of the Country, lies on the Frontiers of *Juliers*, 5 Miles N. from *Aix la Chapelle*, and 10 S. E. from *Falkenburg*, is a ſmall Town, Capital of its County, and defended by an old Caſtle.

4. *Maeſtricht*, lies on the Frontiers of this Dutchy; therefore we chuſe to deſcribe it here, tho' it be commonly reckon'd Part of *Dutch Brabant*. It ſtands on the W. Side of the River *Maes*, 11 Miles N. from *Liege*, 18 N. W. from *Aix la Chapelle*, 28 W. from *Juliers*, and 33 E. from *Louvain*. It has its Name from its Paſſage over the *Maes*, which runs through one Side of it. The leſſer Part on the E. Side, called *Wiick*, belongs to the Biſhop of *Liege*; but he leaves the Military Government of it to the *Dutch*. 'Tis a very ancient City. St. *Servatius* tranſported hither the Biſhop's See from *Tongeren*. There is a Church here dedicated to that Saint, where they have many Relicks, and of which the Kings of *Spain* were formerly Canons. It has three *Dutch* Churches, and one in common to the *Engliſh* and *French*. The City is about 4 Miles in Circuit, and has two Monaſteries of both Sexes, the Papiſts being allowed the Freedom of Religion here. The Stone Bridge, which joins the two Parts of the City, conſiſts of 9 Arches, and is remarkable for its Beauty and Uſefulneſs. This City has been of late much enlarged, and advanced in its Trade. The Streets are large, the Houſes of Brick, well built, and cover'd with Slate, ſince it came into the Hands of the *Dutch*; but the old Buildings come ſhort of the modern. They have alſo a neat Stadthouſe, reſembling that of *Amſterdam*. The City is ſtrongly fortified, encompaſſed with a good Wall and a Ditch, with ſeveral Outworks, after the modern Way; and a very high Baſtion on the S. E. Side, to cover the Town from a Hill that would otherwiſe command it. On the Top of that Hill there ſtands an old Caſtle. It revolted from *Spain* with the reſt of the Provinces, and was beſieged by the Pr. of *Parma* in 1579, when it made a brave Defence, and repulſed the *Spaniards* in two bloody Attacks; but at laſt, the Garriſon being wearied out, a Detachment of *Spaniards* ſtole over the Works by Night, and having killed the Guard, which they found aſleep, they were ſoon followed by others, and became Maſters of the Town, which, tho' then under Treaty with them, they almoſt diſpeopled by their Cruelty and Rapine, ſo that 'twas a long Time before it could recover. 'Twas retaken by the Pr. of *Orange* in 1632, and continued in Poſſeſſion of the States till 1673, when 'twas taken by the *French* King in Perſon after 13 Days open Trenches; when having maſter'd all the Outworks, the Garriſon and Burgers forc'd the Governor to ſurrender upon advantagious Terms. He was much obliged for the taking of this Town to the Valour of the *Engliſh* and *Scots*, who were then in his Service under the late Duke of *Monmouth*. The *French* King put a ſtrong Garriſon into it, and added 6 Baſtions to its Fortifications. The Prince of *Orange* attempted to retake it with an Army of 30000 Men in 1676; but the *French* approaching with a

Digitized by Google

greater Army to relieve it, he was oblig'd to raiſe the Siege; ſo that 'twas not reſtored to the *Dutch* till the Treaty of *Nimeguen*. That Part called the *Wiick*, on the E. Side the River, is reckon'd ſtronger than the Town. The *French* attempted this City in 1703; but were prevented by the late Lord *Auverquerque*, who commanded part of the Confederate Army in the Neighbourhood.

Within Cannon-ſhot of the Town, there's a Quarry of ſo extraordinary a Nature, as deſerves a particular Deſcription. It lies in a Hill on the Bank of the *Maes*, where there are 25 Fathoms of Rock and Earth over Head. The Hill is ſome Miles in Length, lies along the River towards *Liege*, is in ſome Places half a Mile broad, and in others three quarters. The Quarry has an Entrance towards the River, where Carts come with great Eaſe, and unload the Stones for Tranſportation, the Quarry lying level with the Bank of the River. The whole Hill being almoſt undermin'd, affords the moſt ſurprizing Proſpect that can be imagin'd, to thoſe who enter it with Torch-light: For there are Thouſands of ſquare Pillars in large level Walks, moſt of 'em above 20 Foot high, and others much higher, all cut with ſo much Neatneſs and Regularity, that it looks more like the Contrivance of curious Architects for an Under-ground Palace, than the Work of common Quarriers, to ſupport the Earth over them while they dig out the Stone. This Quarry ſerves the People of the Neighbourhood as an impregnable Retreat for themſelves and their beſt Effects when Armies march that Way, for there is Room in it for above 40000 People; and thoſe who ſhould attempt to ſeek them out in it, run a Hazard of being knock'd on the Head, or kill'd by their Fire-Arms, from the Multitudes of the Turnings and Windings amidſt the Rows of Pillars. The Curious may ſee more of this in our *Philoſophical Tranſactions*, N° 79.

CHAP. XXIX.

The SPANISH NETHERLANDS.

FOR the Countries which make up the Dominions of this Name, we refer to *Sanſon*'s Diviſion of the 17 Provinces, *P.* 856. They are called ſo, becauſe of their continuing under that Crown.

The General Deſcription we have given of the *Netherlands*, agrees to theſe Provinces as well as to the reſt; ſo that all we have to add is, That the Air of the *Spaniſh* Provinces is cold, but very healthful; That they have no Wine of their own Growth, but excellent Beer; That their Native Fuel is Turf. They have ſome Wood of their own from the Forreſt of *Soignies*, and are ſupplied with what further they have occaſion for from the Forreſt of *Ardenne*, which belongs to *France*; from whence, and from *Germany*, they are furniſhed with Wine.

The Inhabitants are call'd *Flemmings*, from one of the Provinces, ſays *La Forreſt*; but he does not tell us which. Their Cuſtoms are a Mixture of *German* and *French*: From the latter, they have their Gaiety and Civility; and from the former, according to the ſame Author, for which his own Country is not much oblig'd to him, they have their *Sincerity*, and Inclination to good Cheer. He adds, That they are handſome and well ſhap'd; That their Women for Beauty are inferior to none in *Europe*, and they take Care to improve it. Their Religion is Popiſh, which he ſays they profeſs with greater Purity than in moſt other Places. They have a Court of Inquiſition, which is more moderate than formerly, becauſe of the Revolt it occaſioned.

Their Government is by a Vice-Roy or Governor-General, under the K. of *Spain*. The laſt appointed by that Crown was the late Elector of *Bavaria*, who ſtill has the Title under the D. of *Anjou*, to whom he betray'd them. But tho' moſt of the Provinces be reconquer'd by the Confederate Arms for King *Charles* III. there is no Governor-General as yet nam'd by that Prince.

The Governor-General is aſſiſted by three Councils: The 1ſt is that called the *Council of State*, where the Affairs of Peace and War, Leagues and Alliances, are tranſacted, and from whom, with the Governor, the Miniſters they ſend to Foreign Courts have their Diſpatches. This Council was appointed after the Revolt of the *Dutch*, thoſe Matters being formerly managed by the Privy Council. It conſiſts of a Preſident, and ſuch a Number of Counſellors as the King thinks fit. 2. The *Privy Council*, which conſiſts of a Preſident and 12 Counſellors, nam'd by the King, or the Vice-Roy by his Order. Their Preſident is Keeper of the Great Seal. Here they determine Appeals from other Courts, adminiſter Juſtice, grant Privileges, give Pardons, iſſue Edicts and Ordonnances, determine the Boundaries of Provinces, and decide all Controverſies about the Right of Lordſhip and Dominion, both with Relation to the King and Subjects. Theſe two Councils adviſe with one another upon Occaſion. 3. The *Council of Finances*, or of the Revenues, ſays *Guicciardin*, conſiſts of 3 Superintendants, a Treaſurer, a Receiver-General, 3 Commiſſaries, 2 Secretaries, and inferior Officers. They take Care of the Prince's Domain, of Taxes and Subſidies, call the ordinary Receivers to an Account, take Care of the Fortifications,

Digitized by Google

tions, adjuſt the Charges of War, and farm out the Revenues.

Subject to them is the Chamber of Accounts, conſiſting of a Preſident and 7 Members, to whom all Treaſurers and Receivers of the Revenue in the ſeveral Provinces give in their Accounts. All theſe Councils follow the Court, as does the Grand Provoſt, who carries a red Wand as an Emblem of Juſtice. There are Provoſts under him in every Province; but his Power is extended over all; and his Buſineſs is, with the Aſſiſtance of a Comptroller, to paſs Sentence upon Robbers, Murderers, and Vagabonds. There's likewiſe a great Council or Tribunal at *Melins*, which judges Affairs in the laſt Reſort upon Appeal from the other Provinces. They make uſe of the Civil and Canon Law, except where they are oppoſite to the Edicts of the Prince, and the Laws of the Country. There's a Court of the ſame Nature in every Province, with a Preſident, and 12 or 18 Counſellors, who paſs Sentence not only relating to the Officers of the Prince in their reſpective Provinces, but alſo with Matters relating to the Prince himſelf upon a legal Accuſation: But from them there lies an Appeal to the Council of *Melins*, except in *Brabant* and *Hainault*, where the Sentence of thoſe Courts is definitive.

Every Province has a Governor appointed by the King, but ſubject to the Vice-Roy. They have a limited Power with relation to the Affairs of the Countries, eſpecially in Matters of War. There are Commiſſioners Annually diſpatched to the principal Cities of each Province, to enquire into all Things relating to the Intereſt of the Prince; and in *Brabant*, their Power extends by a Privilege from the Pope to Eccleſiaſtical Perſons and Things.

They have alſo an Admiral, who commands in Chief at Sea, has a Share of all Prizes taken in War; and without his Approbation, no Licence given by the Vice-Roy or the King, to export and import prohibited Goods, is valid. In ſhort, at this Court they have all the uſual Officers that are found at the Courts of any Prince in *Europe*.

Theſe Provinces abound with Nobility, ſeveral of whom have the Title of Princes, Dukes, Marquiſſes, *&c.* which we cannot inſiſt upon. Their chief Order of Knighthood is that of the *Golden Fleece*, of which we have already given an Account. They had at firſt a Scarlet Robe; but *Charles the Hardy* chang'd it into Silk at a Chapter held at *Valenciennes*, where he aſſign'd them a Collar of Gold, with a Piece of Steel interlac'd, which ſeem'd to ſtrike Fire out of a Flint. At the End of the Collar hangs the Golden Fleece, with this Motto, *Pretium non vile Laboris*; *i. e.* A Reward ſuitable to the Merit. And the Steel and Flint have this Motto, *Ante ferit quam Flamma micet*; i. e. You muſt ſtrike before you can have Fire. The Knights at firſt were but 25; but *Charles* V. made them 50, who muſt all be Men of Quality, and ſuch as in *Spain* are called Grandees.

The chief Government is in the Convention of Eſtates, which is call'd by the Vice-Roy in the King's Name, when Money is to be levy'd, Laws enacted, or other great Matters taken into Conſideration. They uſually meet at *Bruſſels*, becauſe 'tis the Seat of the Government; and the *Brabanters* have a ſpecial Privilege, That they cannot be ſummoned out of their own Province; nor can thoſe of *Luxemburg* and *Guelders*, except on ſome extraordinary Occaſion; and therefore their States uſually meet at home. This Aſſembly, ſays *d'Avity*, is made up of the Clergy, Nobility, and the Deputies of the chief Cities. They meet not all together, but by Provinces; and ſince the Revolt under the D. of *Alva*, the Prince's Propoſals are made to them, according to their old Conſtitution, in very obliging Terms. If they refuſe to conſent, the Miniſtry make uſe of the beſt Arguments they can to bring 'em to it; which if they cannot effect, the Matter is referr'd to another Opportunity; for the Diſſent of any one City prevents the paſſing the Reſolve into a Law: And, as *Bentivoglio* ſays, the Prince had never the abſolute Diſpoſal of thoſe People's Purſes, it being the ancient Cuſtom for them to deſire only what was needful for his Occaſions; the frequent Denial of which ſhew'd, that the granting of it was in the People's free Will.

The Power of theſe Provinces was very great under the laſt Dukes of the Houſe of *Burgundy*, who were able to raiſe 100000 Men upon Occaſion, and kept *France* in awe;

Digitized by Google

awe: But 'tis much decay'd since the Revolt of the *Dutch*, as is also their Revenue and Trade. The former, before that Revolt, was reckon'd at 3000000 of Crowns *per Annum*; which was accounted more than that of any King in *Christendom*, except *France*. In 1550, the States granted to *Charles* V. an Aid called the *Noventel*, or 9th Part of their Revenues, which brought him in 150000 Crowns *per* Month; but since the Revolt under *Philip* II. the Crown of *Spain* has been obliged to send great Sums thither for the Support of the Government: so that 'twas scarce worth while for them to retain those Provinces, had it not been to divert the Arms of *France* from invading the Kingdom of *Spain*.

It appears by the *Roman* Historians, That the *Belgæ*, the chief of the ancient Inhabitants, were a very warlike People, and so savage in *Cæsar*'s Time, that they would admit no Commerce of Wine or any Thing else. Their Temper was plain and sincere; but if provok'd, fierce and untractable. They were eager in Pursuit of Honour, tenacious of their Liberty, fantastical in their Habit, insolent when victorious, and dispirited when beat. They liv'd for most part upon Milk and Flesh, especially that of Hogs, fresh and salt; and lay upon Beds spread on the Ground. They wore Trouses, much like those of the Highland *Scots* and *Irish*, and over them a Jacket with long Sleeves, and the Skirts of their Jackets reach'd to their Buttocks. Some of them had Raiment of several Colours, streak'd with Threads of Gold, and their chief Ornaments were Gold Chains and Bracelets. Their Arms were very long Swords, large Shields and Lances: Some of 'em had Bows and Arrows, and others Slings and Darts. If any one made a Disturbance in their Assemblies, or interrupted another when speaking, if they did not desist upon Admonition, the publick Executioner cut off so large a Piece of his Jacket, as made the rest useless, and himself ridiculous.

D'Avity, *Barclay*, and *Bunn*, give this Character of the modern Inhabitants, That they are for most part handsome enough, strong set, and well proportion'd. They are generally tall, surpass their Neighbours in Stature; but come short of the *Hollanders*, who are more remarkable for Men of an extraordinary Size, as has been mentioned already; to which we shall add the Instance of one *Nicholas* in 1298, of whom Writers say, the largest of his Countrymen seem'd but Dwarfs to him, his Shoe being so large, that 4 Men together could put their Feet in it. They are commonly of a lively Complexion, and their Women fair, who begin to be wrinkled about 30. They are generally chast, thô free in their Conversation, and particularly in their Cups, as well as the Men; yet they are careful in their Houshold Affairs, and many of 'em so much entrusted by their Husbands in Matters of Trade, *&c.* that they grow imperious. The People are great Talkers, Lovers of Novelty; and thô otherwise frugal, are much addicted to Feasting and Carousing, when they are apt to quarrel, which generally occasions another merry Meeting to make up the Difference.

Since the Revolt of the *Dutch*, those of Quality in the *Spanish Netherlands* have affected the *Spanish* Customs, and are more fond of pompous Titles than formerly. The common People live in greater Subjection to their Governors, seem to be fond of the *Spanish* Government, have an Aversion to that of *France*, and not much less to the *Dutch*, of whom they have a natural Jealousy, both upon the Account of their Trade and Religion; so that they do not much care for their Assistance, even when they want it. *Strada* says, they are not much taken with Gifts and kind Offices, which they are apt to forget, as well as Injuries, except they think themselves despised, and then they grow implacable. The *Walloons* do much resemble the *French* in Customs and Language; and *Grotius* says of 'em in general, That as the *Netherlanders* lie between *France* and *Germany*, they partake of the Virtues and Vices of both Nations.

Their Naval Power is much decay'd since the Revolt of the *Dutch*, their only Harbours being *Newport* and *Ostend*, which are neither of 'em extraordinary; nor are *Gravelling* and *Dunkirk*, now in the Hands of the *French*, of much Account.

For their Inventions and Arts, the *Flemings* lay Claim to the teaching of others the Way to make Cloth, Arras, Hangings, Clocks, Watches, and the Perfection of the

Ma-

Mariners Compass; the Invention of which is allow'd them by some, but deny'd them by others. They also claim the Invention of Chariots, Painting with Oil, the making of Pictures and Glass, and the working of Worsteds, Says, Tapestries, and other Stuffs, which they taught the *English* when some of them were drove hither by the D. of *Alva's* Persecution. For their particular Manufactures, we shall take Notice of 'em in the Description of their Towns, and refer the Particulars of their Soil, *&c.* to the Description of the Countries.

Their general Language is the *Low Dutch* or *Flemmish*; but in Part of *Brabant*, *French Flanders*, the Countries of *Namur*, *Artois*, *Hainault*, *Luxemburg*, and quite through the *Ardennes*, they speak a corrupt *French*, which some call *Walloon*, and others *Romant*, as being mix'd with Part of the Language which the *Romans* left in those Provinces. Most of those about Court speak *Spanish*, and the People of Fashion speak good *French*.

Having already described *Dutch Guelderland*, we come next, according to the Course of the Map, to

SPANISH GUELDERLAND,

WHich has *Dutch Brabant* and Part of the Bishoprick of *Liege* on the W. Part of the Dutchy of *Cleve* on the N. Part of the same Dutchy, and of the Electorate of *Cologne*, on the E. and Part of the Dutchy of *Juliers* on the S. The greatest Length from S. to N. is about 35 Miles. The Breadth is unequal, and about 20 where broadest.

The chief TOWNS *are*,

1. *Ruremond*, on the Mouth of the *Roer*, where it falls into the *Maes*, about 25 Miles N. E. from *Maestricht*, and 10 S. W. from *Venlo*. 'Tis a rich and populous Town, its Walls strong, its Situation important, and the Buildings neat. The principal Church is dedicated to the Holy Ghost, and was made a Cathedral by *Philip* II. Here's a large and rich Monastery of *Carthusians*, much taken Notice of by Travellers. The adjacent Country is fertile in Corn, Pasturage, and Fruit. The City was sack'd in the first War with *Spain* by the Prince of *Orange's* Army. 'Twas afterwards recover'd by the *Spaniards*, and retaken from them by the *Dutch* in 1632, when Count *Ernest Casimir* of *Nassau*, Governor of *Friesland*, was kill'd before it. 'Twas restored, together with the Country, to the Crown of *Spain* by the Treaty of *Munster*; and being seiz'd by the *French* upon the Death of *Charles* II. of *Spain*, 'twas surrender'd to the Confederates in 1702. *Bleau* gives an Account of the Learned Men that have been born here.

About 7 Miles N. lies *Kassel*, supposed to be the *Castellum* of *Ptolomy*, and the Metropolis of the *Menapii*. 'Tis now only a large Village on the top of an Hill, subject to its own Lord, and the Capital of its District.

2. *Venlo*, 10 Miles N. from *Ruremond*, on the *Maes*, a populous, trading, and well fortified Town. Their chief Commodities are, Corn, Free-stone, Marble, Brass, and Coal, brought hither from *Germany* by the *Maes*. It revolted from *Spain* during the Government of *Margaret* of *Austria*, who besieg'd it in vain; but it submitted to *Charles* V. in 1543, on Condition that they and the other Cities of *Guelderland* should enjoy their ancient Liberties. It has its Name from its Situation among Fens, and was made a City by *Reynold* D. of *Guelder* in 1343. 'Twas taken by the *Dutch* after it had surrender'd to *Charles* V. retaken by the *Spaniards* in 1636, and was recover'd from the *French* by the D. of *Marlborough* in 1702. 'Tis noted for the Birth of *Goltzius*, the famous Medalist.

3. *Geldre*, which gives Name to the Province, lies about 9 Miles N. E. from *Venlo*. It receives the River *Niers* into its Trenches, lies in the middle of Marshes, and is so well fortified, that 'tis reckon'd one of the strongest Places in the *Netherlands*. It has an ancient Castle, formerly the Seat of its Governors, supposed to have been built by *Wichard*, their first Lord, who erected this Country into a Principality, after the Death of *Charles the Bald*. The Heiress being afterwards married to *Otho* of *Nassau*, who was created Count by the Emperor *Henry* IV. about 1069, one of his Descendants was made Duke by the Emperor *Lewis* of *Bavaria* in 1339; but his Posterity failing, it came to the Count of *Egmont*, who sold it to

Digitized by Google

to *Charles* D. of *Burgundy*, as formerly mentioned; by whose Daughter it came to the House of *Austria*, to whom it continued firm after the Revolt of the other Provinces. It was taken by the *Dutch* in 1532, but retaken by the *Spaniards* in 1536, and recover'd from the *French* by the *Prussians* under General *Lottum* in 1703, after a Blockade of 15 Months. It has several Villages under its Jurisdiction, and has produc'd divers Learned Men, for whom we refer to *Bleau*.

4. *Stralen* lies 5 M. S. W. from *Geldre*, is Capital of a small Territory; and near it lies the Village of *Zant*, supposed to be *Antonin's Sablones* or *Sabulones*.

5. *Wachtendonck*, lies about 6 Miles S. from *Geldre*, on the River *Niers*, is chief of its District, and one of the strongest Towns in the Province, because of the neighbouring Marshes. It revolted from *Spain*, and was besieged 3 Months by Count *Mansfeld* in 1588; to whom 'twas surrender'd by Treachery. 'Twas surpris'd by Count *Lodowick* of *Nassau* in 1600, who marched some Troops over the Ice, which the Garrison had neglected to break. 'Twas taken again by the *Spaniards* in 1605.

6. *Stevenswaert*, 6 Miles S. from *Ruremond* on the *Maes*, a strong Fortress.

FLANDERS,

HAS *Dutch Flanders* on the N. E. the Province of *Artois* and *Picardy* on the S. W. the Sea on the N. W. and *Spanish Brabant* and *Hainault* on the S. E. The greatest Length, taking in that narrow Tract which runs in betwixt the *Artois*, the *Hainault*, and the Archbishoprick of *Cambray*, is, according to *Moll*, 76 Miles; and the greatest Breadth, from *Graveling* to the Frontiers of *Brabant*, is 65.

The ancient Inhabitants of this and the other *Spanish* Provinces, mentioned by the *Romans*, were the *Adustici*, *Nervii*, *Centrones*, *Grudii*, *Levaci*, *Pleumosii*, and *Gravii*; these 5 latter being afterwards called *Suecomi*. For all whose Boundaries, we refer to *P.* 409, and 410, in our Account of Ancient *Germany*. Authors are divided as to the Origin of the Name. Some derive it from the *Dutch* Words *Veld* and *Anderen*, which signify many others, alluding to the *Danes*, *Normans*, and other People who over-run it; as *Germany* had the Name of *Allemannia* from the several Sorts of People that possessed it; but *La Forest*, and other *French* Geographers and Historians, say, 'twas so called from *Flandrina*, Wife to *Liderick* II. Prince of *Buck*, whose Predecessor was made Great Forrester of the Country by *Clotarius* II. of *France* in 621, which is more probable.

This Country is by some reckon'd the richest Piece of Ground in *Christendom*, considering the Goodness of its Soil, the great Number of its Towns and Villages, Rivers and Canals; and is so well inhabited, that the *Spaniards*, who came thither with *Philip* II. took it for one continued Town. The Air is wholesome throughout; but that of the S. Part is reckon'd best. It lies almost upon a Level, is in few Places Hilly; but in no where can be said to be Mountainous. The Soil is generally fruitful; but that Part which lies next the Sea and *France*, exceeds in Fertility most Countries in *Europe*. They purchase great Numbers of Colts from neighbouring Countries, which in a little time are wonderfully improv'd in Shape, Size, and Swiftness, by their excellent Air and Pasture. That called *Flemmish Flanders* has no great store of Wheat, but abounds in good Fruit, Rye, Oats, Beans, Pease, Vetches, Hemp and Flax; by the latter of which they make great Profit of their most barren Ground. That called *French Flanders* produces an extraordinary Quantity of the best Wheat, Madder and Woad, and has as rich Pasturage as any in *Europe*. 'Tis reckon'd to have been for most part cover'd with Wood, till about the 9th Century, and was called the *Coal Forrest*, because of the great Quantity of Charcoal made there; which, *La Forest* says, contributed much to destroy those vast Woods. He adds, That when it came under the *French*, they appointed 6 Forresters to oversee it, and divided it into two Parts; one called *Nemorosa*, from the Woods; and the other *Æstuaria*, because of the Marshes, and frequent Inlets of the Sea by the Mouths of the Rivers, *&c.* And by the Patents granted to those Forresters, they were to secure the Woody Parts against Robbers, and the Coasts against the Northern Pirates.

Digitized by Google

Twas in after-Ages divided into the *Flemmiſh* or *Teutonick*, *French* or *Walloon*, and *Imperial Flanders*. The former was ſo called, becauſe of their Language, and that *Charlemagne* planted 4000 *Saxons* here. This is the largeſt, richeſt, and moſt populous Part, and lies betwixt the *Scheld*, the *Lis*, the *Aa*, and the Ocean. *Walloon Flanders*, ſo called becauſe they ſpoke *French*, is divided from the other by the *Lis*, and reaches to the Frontiers of *France*. *Tournay* and *Douay* were its chief Towns before *Liſle* was built. *Imperial Flanders*, ſo called becauſe it was under the Emperor's Juriſdiction, lies betwixt the *Scheld* and the *Dender*. The chief City is *Aloſt*, whoſe Earls paid Homage to the Emperor.

Their Earls having been famous in Hiſtory, we ſhall give a brief Account of them.

The firſt Forreſter, according to *French* Authors, was *Liderick*, Son to *Salvert* Pr. of *Dijon*, who was appointed by *Clotarius* II. of *France* in 621. He was ſucceeded by 6 others of that Title, till the Time of *Charles the Bald*, who made *Baldwin*, ſirnam'd *Iron-Hand*, their firſt Count about 860. The *Flemmings* ſay, they were the firſt Counts in *Europe*; but that muſt be underſtood of *French* Creation: For it appears by *Selden's Titles of Honour*, Part II. Cap. 1. That there were *Comites* before *Conſtantin's* Time. However, upon this Account the Earls of *Flanders* valued themſelves ſo much, that they deſpiſed the Title of Duke, when their neighbouring Princes aſſum'd it. The Title of Count or Counteſs deſcended to their Poſterity immediately upon the Death of their Predeceſſor, and they were ſolemnly inveſted with the Dignity by the Three Eſtates at *Ghent*, where they and their Subjects ſwore mutually to one another; and the like Ceremony was performed in all the other chief Towns and Caſtles of the Country. Before *Francis* I. of *France* renounc'd the Sovereignty of *Flanders*, they us'd to do Homage both to the Kings of *France* and the Emperor as ſoon as they took Poſſeſſion. They perform'd it to the *French* Kings ſitting on their Throne, came up to them bare Headed, without a Sword, bended their Knee to the Ground, put their Hands betwixt the King's, and ſwore Fealty, according to a Form repeated by the Chancellor of *France*: After which they were admitted to kiſs the King's Cheek, ranked among the Peers, and inveſted with the Marks of the Dignity; but when they did Homage to the Emperor for the County of *Aloſt*, and Country of *Waes*, he demanded no other Ceremony but their Oath, and then admitted them among the Counts of the Empire. When the *French* Kings were crown'd, the Earl of *Flanders*'s Office was to gird on their Sword, and carry it before them: But notwithſtanding this Homage, they had all the Rights of Sovereignty in *Flanders*, and were not obliged to appear in Judgment as other Peers, except their Succeſſion were diſputed, or when their Subjects appealed to the Court of *France* upon Denial of Juſtice by the Earls. But to come to their Hiſtory; *Liderick* I. of *Buck* was ſo called, becauſe he reſided as Forreſter in the Caſtle of *Buck*, now ſaid to be the old Caſtle of *Liſle*. *Liderick* II. one of his Succeſſors, was entruſted by *Charlemagne* to govern the *Saxon* Colony he ſettled in *Flanders*, and died in 808. His Son *Ingebram* ſucceeded, defended the Country againſt the *Huns* and *Vandals*, and died in 824. *Odoacer* his Son enlarged his Dominions, improved the Country, and died in 837. He was the laſt of the Forreſters, and ſucceeded by

1. *Baldwin*, the firſt Earl, call'd *Iron-Hand*, becauſe of his great Strength. He ſerv'd *Charles the Bald* againſt the *Saracens* and *Normans*, married his Daughter *Judith* without his Conſent, for which he was excommunicated by the Pope; but afterwards reconciled to *Charles*, who enlarged his Dominions. He had Wars with the *Normans*, built the Caſtle of *Burgh* in *Bruges* to curb them, and died in 879.

2. *Baldwin* II. his Son, ſucceeded, took Part with his Couſin *Charles the Simple* of *France* againſt the Earl of *Anjou* and other Rebels, had Wars with the *Normans*, was a Prudent and Religious Prince, and died in 918.

3. *Arnold* his Son, by a Daughter of *Elfred* K. of *England*, ſucceeded. He had the Sirname of *Great*, becauſe of his good Qualities, ſignaliz'd his Valour againſt the *Danes*, *Huns*, and *Vandals*, died in 964, and was ſucceeded by his Son

4. *Baldwin* III. to whom he had in his old Age reſign'd the Government by Conſent

Digitized by Google

ſent of the States. He was a valiant Prince, encouraged Trade, ſettled Manufactures, and died univerſally lamented in 961.

5. *Arnold* II. his Son, ſucceeded when very young. *Lotharius* K. of *France* invaded his Country during his Minority, and took from him the Counties of *Bullen*, *Teroenne*, and *St. Paul*. He took Part with *Charles* of *Lorrain* againſt *Hugh Capet*, who uſurp'd the Crown of *France*, was remarkable for his Piety and Juſtice, and died in 988.

6. *Baldwin* IV. his Son, ſirnamed *Goodly Beard*, ſucceeded. The Emperor *Henry* II. made War upon him; but was afterwards reconciled to him, and gave him *Valenciennes* and *Zealand*. He was a brave, learned, and juſt Prince. In his Reign, *Flanders* was ſo afflicted with the Plague, that the Living were ſcarce enow to bury the Dead. He married *Ogina* of *Luxemburg*, who having no Child till the 50th Year of her Age, he order'd a magnificent Tent to be erected for her in the Market-Place of *Arras*, where ſhe was brought to Bed of a Son, in the Preſence of all the Citizens Wives that pleas'd to go in, becauſe her former Barrenneſs had rais'd a Suſpicion, that ſhe deſign'd to impoſe a ſuppoſititious Prince upon 'em. This Son afterwards rebelled againſt his Father, and drove him out of his Country, which he recover'd by Help of the D. of *Normandy*, whoſe Daughter he had married upon the Death of *Ogina*. *Baldwin* died in 1036, and was ſucceeded by his unnatural Son.

7. *Baldwin* of *Liſle*, ſo call'd becauſe he lov'd and adorn'd that City more than any other in *Flanders*. He aſſiſted his Son-in-Law, *William the Baſtard* of *Normandy*, to take Poſſeſſion of that Country, and likewiſe to conquer *England*, on Condition, ſay the *Flemmiſh* Hiſtorians, that he and his Succeſſors, Kings of *England*, ſhou'd pay to him, and the ſucceeding Earls of *Flanders*, an Annual Penſion of 300 Marks in Silver, which was continued to *Baldwin* and his Son; but was afterwards with-held. *Henry* I. of *France* had ſo great an Opinion of *Baldwin*, that he left him Guardian to his Sons, and Governor of the Kingdom, till the eldeſt came of Age; which he perform'd with great Integrity. He had Wars with the Emperor *Henry* III. took from him the County of *Aloſt*, and afterwards obtain'd from him by Treaty ſeveral other Lordſhips, with all *Zealand*. He married his ſecond Son *Robert* to the Counteſs of *Holland*, and gave him the County of *Aloſt*, and Part of *Zealand*, upon taking an Oath, That he ſhould make no further Pretenſions to his Succeſſion. Upon his Death-Bed, he ſent for his eldeſt Son *Baldwin*, gave him pious Inſtructions relating to his Government and Perſonal Conduct, order'd him to keep firm to the Intereſt of *France*, from whom he had receiv'd ſuch Honour and Advantage; and that tho' he himſelf had Pretenſions to the Crown of *France*, as being of *Charlemagne*'s Lineage, that he ſhould ſubmit to the Race of *Hugh Capet*, to whom he was nearly related; and ſoon after this he dy'd in 1067, having effac'd the ill Character he had at firſt for rebelling againſt his Father; and by his after Conduct acquir'd that of a brave, wiſe, and religious Prince. He was ſucceeded by

8. *Baldwin* VI. his Son, who by his Marriage acquir'd *Hainault*, and was call'd *Baldwin* of *Mons*, becauſe he choſe that City for the Place of his Reſidence. He was a courteous, religious, and juſt Prince, dy'd in the 3d Year of his Government, *Anno* 1070, gave Part of his Dominions to his Sons by a ſecond Marriage, and recommended the Care of his Sons to the States.

9. *Arnold* III. his Son, ſirnam'd the *Unhappy*, ſucceeded, was ruin'd by the Pride and Covetouſneſs of his Mother, and the Treachery of his Uncle *Robert the Frizzled*, who making War upon him, *Arnold* was kill'd fighting valiantly at *Mont-Caſſel* in 1072; many of the *Flemmings* having revolted from him becauſe of his Mother's Hatred to them. He was ſucceeded by

10. *Robert* I. his Uncle, who making Intereſt with *Philip* of *France*, and doing him Homage, was by him ſupported in his Uſurpation. In his Reign, the Country ſuffered much by a ſharp and long Winter, tempeſtuous Weather, Earthquakes, and a Plague, which deſtroyed ſuch Multitudes of People in 1092, that 'twas called the *Fiery Diſeaſe*. The *Flemmiſh* Writers ſay, That his Ambaſſadors going to pay Homage to the Emperor, were told by an Apparition in Form of a Majeſtick Woman, That *Robert*'s Male-Iſſue ſhould fail in his Grandſon for his Wickedneſs; and that he him-

Digitized by Google

ſelf going to *Jeruſalem* in Pilgrimage to attone for his Sins, was frighten'd by Viſions in the Holy Sepulchre; and after his Return, died ſuddenly in 1093. He was ſucceeded by

11. *Robert* II his Son, ſirnam'd of *Jeruſalem*, becauſe that City was taken from the *Saracens* chiefly by his Valour. In his Reign, *Flanders* was mightily afflicted with Plague, Famine, and Inundations, and continual Rains from *October* to *April* 1109, which forc'd many of the Inhabitants to retire to *England*, where they were planted in a Colony in the E. Part of the Country by *Henry* I. *Robert* took Part with *Lewis the Groſs* of *France* againſt the *Engliſh*, by whom he was kill'd in a Sally from *Mante* on the *Seyne* in 1111. 'Tis ſaid, that his Wife *Clemence* having 3 Sons by him, and being afraid ſhe ſhould burden the Family by her Fruitfulneſs, took Medicines to make her barren; for which ſhe was puniſhed by the Death of her 3 Sons without Iſſue, and by ſeeing the Government come to another Family. *Robert* was ſucceeded by

12. *Baldwin* VII. his Son, ſirnam'd the *Hatchet*, becauſe he conſtantly carried one, with which he performed Juſtice upon Malefactors in Perſon. He was a great Juſticiary, executed ſeveral Gentlemen with his Hatchet for robbing Merchants, and order'd one of his Lords to be caſt into a Caldron of boiling Oil, which was prepar'd in the Market-Place of *Bruges* for a counterfeit Coiner, becauſe he had robb'd a poor Woman of her Cattle, which was all ſhe had to ſubſiſt on. He was very careful in appointing Judges, inſpected their Behaviour himſelf in his Progreſs through the Countries for that End, and puniſh'd ſeverely ſuch as took Bribes. By ſitting frequently in Judgment, he was Maſter of the Laws of his Country, and acquir'd the Love of his Subjects; it being his conſtant Maxim, That Princes ought to do Juſtice in Perſon as much as they could, and not leave it to Subſtitutes, ſince they demanded Perſonal Service from their People. He took Part with *Lewis the Groſs* againſt the *Engliſh*, becauſe they would not pay the Penſion promis'd by *William the Conqueror*, and died of a Wound he received from them at a Siege in *Normandy* in 1119. He died without Iſſue, and on his Death-Bed declared his Couſin *Charles*, Son to *Canutus* K. of *Denmark*, who had fled to him after the Murder of his Father, his Heir.

13. *Charles* I. ſirnam'd the *Good*, ſucceeded; but was oppos'd by *William* of *Ipres*, Nephew to *Robert* of *Jeruſalem*, aſſiſted by *Stephen* of *England*, who made him Earl of *Kent*, for having deliver'd him out of Priſon, and reſtoring him to his Scepter, ſay the *Flemmiſh* Writers; but *Charles* was too hard for him, obtain'd peaceable Poſſeſſion, and the Reputation of a valiant and religious Prince. He puniſh'd ſeverely Blaſphemers and common Swearers, Witches, Soothſayers, and Magicians; and mix'd ſo much Courteſy with his Juſtice, that he was belov'd by his Country. In his Reign, the Corn being frozen by a ſevere Winter, ſuch a Scarcity enſu'd, that he forbad the brewing of Beer, the keeping of Dogs, or giving Corn to Beaſts, and in one Day diſtributed near 8000 Loaves, beſides Money and Clothes, to the Poor of *Ipres*; and underſtanding that the *Vinſtraets*, a rich Family in *Bruges*, had hoarded up a great Quantity of Corn, which they ſold at exceſſive Rates, he condemn'd them to Death for Extortion; which he afterwards mitigated, by ordering their Houſes to be pulled down, their Corn to be ſold at moderate Rates, and the Money they had extorted to be reſtored to the Poor. One of this Family being Chancellor of *Flanders*, Provoſt of St. *Donatian* at *Bruges*, and concern'd in this Extortion, *Charles* ſent for him to a publick Hall, where he himſelf was diſtributing Bread to the Poor, rebuk'd him for his Avarice, and ſent him away without inviting him to Dinner with the reſt of the Clergy, for which this wicked Prieſt diſguis'd himſelf in the Habit of a Beggar, and murder'd the Prince at his Devotion in the Church in 1126. After which the Chancellor, with the reſt of the *Vanſtraets*, who were privy to the Deſign, invaded the Palace, kill'd the Prince's chief Officers, and fortified themſelves in the Tower of St. *Donatian*, from whence he afterwards made his Eſcape; but he and his Accomplices were all overtaken by Juſtice, thô they fled to ſeveral Countries, and were deſervedly put to Death. Twenty eight of 'em were thrown Headlong from St. *Donatian*'s Tower, their Houſes demoliſh'd, their

Eſtates

Eſtates confiſcated; and to perpetuate the Memory of their Crime and Puniſhment, an Order was made, That the whole Family ſhould be curs'd Annually on the 26th of *March* at the Gate of that Church, where at the ſame time the Praiſes of this excellent Prince were juſtly celebrated. The Hiſtory of *Flanders*, lately publiſh'd in *French*, ſays, the Conſpirators were emboldened to this execrable Fact, becauſe *Charles* being born a *Dane*, was not acceptable to many of the Nobility; but the Kings of *England* and *France*, and other neighbouring Princes, countenanc'd thoſe who took Arms to revenge the Parricide. This Hiſtory adds, That *Charles* had a Part of Scripture read and explain'd to him every Night after Supper by 3 Doctors of Divinity. *Charles* dying without Iſſue, he was ſucceeded by

14. *William the Norman*, Grandſon to *Wm. the Conqueror*, deſcended by the Mother from *Baldwin* of *Liſle*. He was put in Poſſeſſion by *Lewis the Groſs* of *France*, tho' the Kings of *Denmark* and *England*, and others, were nearer a-kin to *Charles*; but he prov'd ſuch a Tyrant, that the *Flemmings* revolted, killed him in a Siege, and he was ſucceeded by

15. *Thierry* of *Alſace*, who was reckon'd next a-kin to *Charles the Good*, and Grandſon to *Robert the Frizzled*. He was an affable, juſt, and wiſe Prince, made 4 Expeditions into the *Holy Land*, where he behav'd himſelf ſo well, that he ſtood fair to be made King of *Jeruſalem*, had not the Jealouſy of other Princes prevented it. He aſſiſted at the Coronation of *Henry* II. of *England*, and built *Graveling*, where he died in 1169. He was ſucceeded by

16. *Philip* of *Alſace*, his Son, with whom he had ſhar'd the Government. He acquir'd by Marriage the Counties of *Vermandoiſe*, *Valois*, and *Amiens*. He defeated and took *Florence* of *Holland*, ſubdued the County of *Aloſt*, and the Country of *Waes*, and was much in Favour with the Emperor *Frederick* I. who on his Account exempted the *Flemmiſh* Merchants from Tolls in the Empire. He accompanied the Emperor *Henry* VI. with a magnificent Train to *Rome* for the Election of a Pope, and had ſo great a Kindneſs for *Philip* II. of *France*, that he challeng'd *Richard* I. of *England* to a Duel, in order to determine the Quarrel betwixt them, and married his Neece to *Philip*, with whom he gave the Earldom of *Arras*, which prov'd fatal to his Succeſſors, by opening a Paſſage to the *French* into their Dominions. He died of the Plague at the Siege of *St. John d'Acres*, when he went to aſſiſt the K. of *Jeruſalem* in 1191; and having no Iſſue, on his Death-Bed he appointed for Succeſſor his Siſter

17. *Margaret*, who married *Baldwin* IV. of *Hainault*. Their Dominions were diminiſhed by *Lewis* VIII. of *France*, who ſeiz'd all *Weſt-Flanders*. Upon this the City of *Ghent* pretended to be Capital of the Country, and claim'd ſuch Privileges as intrench'd on the Prerogative of their Sovereigns, whom they would not ſuffer to publiſh any Law there without their Conſent. *Margaret*, who was much extolled for her Beauty and Piety, died in 1194, as did her Husband a few Years after.

18. *Baldwin* VIII. her Son, ſucceeded both to *Hainault* and *Flanders*. He went with other Princes on a Croiſado to the *Holy Land*, and in his Way aſſiſted the *Venetians* to take *Zara* in *Dalmatia*. While he was there, *Alexis Comnenus*, Son to *Iſaac* Emperor of *Conſtantinople*, intreated his Help againſt his Uncle *Alexis Ducas*, who had dethron'd his Brother *Iſaac*, and put out his Eyes. *Baldwin* took *Conſtantinople*, reſtor'd *Iſaac*, and defeated *Ducas*. *Iſaac* dying, his Son *Alexis Comnenus* ſucceeded; but being murther'd, and his Throne uſurp'd by *Alexis Murzupla*, *Baldwin* and the other Princes return'd from the *Holy Land*, took *Conſtantinople* by Aſſault, drove out the Uſurper; and there being no lawful Heir, *Baldwin* was choſen Emperor in 1200. He obliged the *Greek* Church to ſubmit to the *Roman*, which occaſioned the *Greeks* to revolt, and *Baldwin* was taken by an Ambuſh as he beſieg'd the Chief of the Revolters in *Adrianople*, where they cut him in Pieces, upon an Accuſation, as they pretended, by *Jane*, their Prince's Daughter, that he offer'd to marry and ſhare the Empire with her, if ſhe would deliver him out of Priſon; but the *Greek* Hiſtorians deny this, and ſay, he dy'd a natural Death in 1207. His Brother *Henry* ſucceeded in the Empire of the Eaſt, and died in the 11th Year of his Reign. He was ſucceeded in the Empire by *Peter de Courtenay*, Earl of *Auxerre*, who

Digitized by Google

who was taken by the *Greeks* in an Ambush, and afterwards put to Death. He was succeeded by his Son *Robert*, who made himself hateful by debauching a Gentleman's Wife at *Conſtantinople*, which the Gentleman reveng'd by killing his Wife, and her Mother who had betray'd her, in the Emperor's Preſence. *Robert* died in the 9th Year of his Reign, and was ſucceeded by his Son *Baldwin* II. who, after a Reign of 36 Years, was forc'd to fly from *Conſtantinople*, which was deliver'd up by Treachery to *Michael Paleologus*, who recover'd the Empire, and reſtor'd it to the *Greeks*, after it had continued in *Baldwin* VIII. and his Succeſſors for 60 Years. But his Poſterity could never regain it, becauſe of the Averſion the *Greeks* had to the *Roman* Church. To *Baldwin* VIII. ſucceeded

19. *Jane* of *Conſtantinople*, his Daughter, who being deliver'd up to the K. of *France* by her Uncle, that was left Guardian by her Father upon his Departure to the *Holy Land*, the *French* King, to prevent her Match with the K. of *England*, married her to *Ferrand* Pr. of *Portugal*; at which the *Flemmings* being angry, they refuſed to ſubmit to *Ferrand* till he brought his Wife with him; which having done, they received him joyfully, and he ſoon after enter'd into a Confederacy with *England* and others againſt the King of *France*, who took and kept him 12 Years in Priſon, and he dy'd ſoon after his Releaſe. *Jane* married for her ſecond Husband Pr. *Thomas* of *Savoy*, and died in 1244.

20. *Margaret* II. her Siſter, ſucceeded. She was married firſt to *Bochart d'Avenes*, of the Family of *Rouſſillon*, and afterwards to *William de Bourbon*, Lord of *Dampiere*. She had Children by both Marriages, who contended with one another for the Principality, becauſe the Legitimacy of the firſt was diſputed, their Father *Bochart* having been in Orders, which he conceal'd from his Wife; who, as ſoon as ſhe knew of it, got him excommunicated, for which he dy'd of Grief. *St. Lewis* of *France* eſpous'd the Cauſe of her Son *John* by her firſt Husband, who took Arms againſt her, and was made Earl of *Hainault*, and a 2d Brother was made Lord of *Beaumont*. From them proceeded the Earls of *Hainault*, *Frieſland*, and *Holland*; betwixt whom, and the Iſſue of the 2d Marriage, there was always a mortal Hatred. *Margaret* inherited the Courage of her Father, appear'd frequently in Arms, encourag'd Trade, eas'd her Subjects from the Taxes they had paid to her Predeceſſors, by way of Attonement for her Sins, founded many Hoſpitals, made many good Laws, and died in 1279. She confirmed the Earldom of *Hainault* to her Grandchild *John d'Avenes*; her own Son *John*, who took Arms againſt her, having died before her, and ſhe was ſucceeded in *Flanders* by

21. *Guido* of *Dampiere*, her Son by the 2d Marriage, who had a long and miſerable Reign. He was taken by the *Hollanders*, againſt whom he made War in *Zealand*, and not releaſed till after a long Time. He was twice invited to *France* by *Philip the Fair*, who kept him Priſoner both times, and ſuffered him at laſt to die in Confinement. The *French* attempted to reduce *Flanders* as a Province to their Crown; but the People would not ſubmit to it, nor to the Treaties that *Guido* had made with the *French* King during his Confinement, from which he was releaſed, on Condition that he ſhould return to Priſon if he could not bring them to it; in which having failed, he return'd according to Promiſe, and died a Priſoner in 1034. During theſe Tranſactions, the *Flemmings* obtain'd a great Victory over the *French* near *Courtray* in 1302; but were defeated by them two Years after, and came to an Agreement with *Philip the Fair*, on Condition of reſtoring them *Guido*'s two Sons, whom they had fraudulently ſurpris'd, with 50 of their prime Nobility.

22. *Robert* III. Son to *Guido*, ſucceeded; but was obliged for his Releaſe to promiſe 20000 Livres to the *French*, and mortgaged *Liſle*, *Douay*, and *Orchies*, to them for a Security, which the *French* afterwards claim'd as their Property. He aſſiſted *Charles* D. of *Anjou*, Brother to *St. Lewis* of *France*, in the Conqueſt of *Naples*, and married his Daughter. He died in 1322, and was ſucceeded by

23. *Lewis* I. his Grandſon, whoſe Pretenſions were oppoſed by his Uncle and Aunt, and the *French* King, who impriſon'd him in the *Louvre*; but his Title being judg'd good by the Parliament of *Paris*, he was reſtor'd, upon doing Homage to *Charles the Beautiful*

Digitized by Google

Beautiful of *France*. His Conduct made him odious to his Subjects, who took Arms againſt him, under the Conduct of *Artevel*, a Brewer, becauſe he favour'd the *French*, and hated the *Engliſh*, with whom the *Flemmings* had enter d into a Confederacy, and upon that Account were excommunicated by the Pope, till a Truce was made betwixt *Philip de Valois* of *France* and *Edward* III. of *England*, in which the *Flemmings* were included, and the Excommunication taken off by the Cunning of the Brewer. *Lewis* was kill'd in the Battle of *Creſſy* in 1346, where he fought valiantly for *Philip de Valois* againſt the *Engliſh*.

24. *Lewis* II. his Son, ſucceeded. He was in the Battle of *Creſſy* with his Father, where he behav'd himſelf valiantly, tho' but 18 Years of Age, and narrowly eſcap'd, with the *French* King. The Citizens of *Ghent* had kept him from his Father to marry him with *Edward* III.'s Daughter, for the Sake of their Woollen Trade with *England*; but when *Edward* came over with the Princeſs to ſolemnize the Nuptials, *Lewis*, on Pretence of Hunting, made his Eſcape to his Father, then at *Paris*, where he married a Daughter of *Brabant*; which provok'd the *Flemmings* ſo much, that they form'd themſelves into a Commonwealth, and refus'd to admit him, till he confirm'd their Treaty with *England*. He gave himſelf up to lewd Women, one of whom his Counteſs getting into her Hands, ſhe cut off her Noſe, by which Wound ſhe died 6 Days after, with two Male Children that ſhe brought forth before her Time. This did ſo much alienate *Lewis* from the Counteſs, that he fill'd his Houſe with Concubines and Baſtards; which, with his Prodigality, and vindictive Temper, made thoſe of *Ghent* take Arms againſt him, under the Conduct of *Artevil* the Brewer: But this Commotion being appeas'd, he recover'd *French Flanders*, by marrying his only Daughter to the *French* King's Brother; and the Earldoms of *Artois* and *Burgundy* fell to him as Heir to his Mother *Margaret* of *France*. During his Reign, an Inundation overflow'd 17 Villages in *Flanders*, *Anno* 1377. He built a Palace at *Ghent*, with a Chamber for every Day of the Year. He was very magnificent to Foreign Princes, and was viſited at *Ghent* by the Kings of *Cyprus* and *Denmark*. He deſign'd to have reveng'd himſelf on the Citizens of *Ghent* after they were defeated by *Charles* VI. of *France* at *Roſebeck*, and their General the Brewer kill'd; but he died ſuddenly in 1383.

25. *Margaret* III. his Daughter, ſucceeded, being married to *Philip the Bold* of *Burgundy*, Brother to *Charles* V. of *France*, 15 Years before her Father's Death. She had been contracted before to *Edmund*, Son to *Edward* III. of *England*; but the Marriage was prevented by her Grandmother *Margaret*, who hated the *Engliſh* ſo much, that ſhe untry'd her Robes in Preſence of her Son, threaten'd to cut off her own Breaſts, which had given him Suck, and throw them to the Dogs, if he did not break off that Match, and marry her to Philip of *Burgundy*, who obtain'd the Sirname of *Bold*, becauſe he fought ſo gallantly to prevent his Father King *John* of *France*'s being taken by the *Engliſh* at the Battle of *Poitiers*, where he was taken with him, for which his Father gave him the Dutchy of *Burgundy* by Letters Patents in 1363, which was afterwards confirmed to him and his Heirs by his Brother *Charles* V. He was a Prince of great Courage and Prudence, gain'd the Citizens of *Ghent*, by pardoning them after 7 Years Rebellion, was Govérnor to his Nephew King *Charles* VI. of *France* during his Minority, and died in 1404, ſo much in Debt, notwithſtanding the great Opportunities he had to enrich himſelf by his own large Dominions, and the Management of the Revenues of *France*, that his Widow, rather than be at the Expence of his Funeral, renounc'd her Charge in his Moveables. She died in 1406.

26. *John* of *Burgundy*, her Son, ſirnam'd the *Undaunted*, ſucceeded. He was bred in *France*, and was ſent to aſſiſt *Sigiſmund* of *Hungary* againſt the *Turks*, where he was taken, and in Danger of being cut off, as was the greateſt part of the *French* Nobility who were taken with him after the Battle, had not a Soothſayer perſwaded the Grand Seignior *Bajazet* to ſave him, by telling him, That *John* would one Day occaſion a great deal of Miſchief to *Chriſtendom*, and particularly to *France*, whither he return'd after being ranſom'd, and was received there with great Honour. His Repreſentation to the D. his Father, and to *Charles* VI. of *France* his Couſin,

Digitized by Google

Couſin, how contemptible the Schiſms betwixt the Popes and Antipopes made the Chriſtians to the *Turks*, and the Church of *Rome* to the *Greeks*, occaſioned their putting an End to it. He was a Prince of great Courage and Prudence; and notwithſtanding the War betwixt *England* and *France*, he procur'd a Freedom of Trade to his Subjects from both; but he ſtain'd his Character, by perſwading Aſſaſſins to murther the Duke of *Orleans*, his Couſin-German and mortal Enemy, in 1407. He diſſembled his Concern in it for ſome time, but at laſt openly own'd it, and got *John Petit*, a *Franciſcan*, and Doctor of Divinity in the Univerſity of *Paris*, avowedly to defend it, as an Act like that of *Phinees*; for which the Duke deſerv'd a Reward, alledging, that the Duke of *Orleans* had made uſe of Magick, and other wicked Arts, to poſſeſs himſelf of the Kingdom. There were others ſo bold as to offer to juſtify this Action before the Council of *Conſtance*. The Cauſes of this mortal Hatred were, 1. His Envy againſt the D. of *Orleans*, becauſe he had the Government of the Kingdom during the Incapacity of his Brother *Charles* VI. 2. Becauſe the D. of *Orleans* put Jeſts upon him, gave him ridiculous Names, and, as 'tis ſaid, hit him a Box on the Ear in a publick Aſſembly. 3. Becauſe the D. hinder'd him to beſiege *Calais*, then poſſeſs'd by the *Engliſh*, for which he had made great Preparations. 4. Becauſe 'twas alledg'd the D. of *Orleans* had offer'd Violence to the Dutcheſs of *Burgundy*, who was a very beautiful Princeſs. The D. thinking himſelf ſufficiently excuſed by thoſe Pretences, he had the Boldneſs to demand a Reward for this abominable Action in the Preſence of the Dauphin, the Grandees of the Kingdom, and of the Univerſity and chief Citizens of *Paris*, at a publick Aſſembly. But however that was, *Charles* VI. gave him a Pardon, and ſeemingly reconcil'd the D. of *Orleans*'s Children to him; but they quickly diſcover'd, that nothing leſs than his Blood would ſatisfy their Reſentments. The Duke of *Burgundy* had not only provok'd the Houſe of *Orleans*, but many of the Grandees of *France*, and particularly the Conſtable *d'Armagnac*; but the Citizens of *Paris* favour'd the Duke, and hated the Faction of *Orleans* or *Armagnac*, becauſe they would not ſtand to the Agreement, that the D. of *Burgundy* ſhould govern the Kingdom jointly with the Dauphin, his Son-in-Law, during the Life of *Charles* VI. And while the D. of *Burgundy* was in *Flanders*, they let 800 of his Horſe into the City, put on St. *Andrew*'s Croſs, the Device of *Burgundy* upon their Clothes, and taking Arms, murder'd the Conſtable, with ſeveral Officers of the Houſhold, 4 Biſhops, and above 3000 other Perſons of Note. The D. of *Burgundy* ſeem'd to diſapprove this, tho' 'twas ſuppoſed to be done by his Orders. All this together made the Faction of *Orleans* determine his Ruin. In order to which, they perſwaded the Dauphin, afterwards *Charles* VII. who appear'd at their Head, to invite him to a Conference, on Pretence to concert Meaſures for driving the *Engliſh* out of the Kingdom; and to prevent Suſpicion, the Dauphin took an Oath before the Legat, on the Croſs and the Goſpels, That the Duke nor his Party ſhould receive no Damage; and as a further Security, they promiſed to deliver to the Duke the Caſtle of *Montereau*, on the Bridge of which Town, that was rail'd in on purpoſe, the Interview was appointed. The D. truſting to theſe Promiſes, met the Dauphin on the Bridge, and paſſing through a Door in the Rails to ſalute him, he bow'd his Knee, and told him, He was come to receive his Orders, and to conſult how the *Engliſh* might be expell'd the Kingdom. The Dauphin charg'd him with Breach of Promiſe in not withdrawing his Garriſons; and while the Duke began to juſtify himſelf, the Dauphin gave him the Lye, and cry'd out aloud, *Now is the Time*. Upon which the Conſpirators murder'd him in Preſence of the Dauphin, which involv'd *France* in Blood and Miſery for many Years, occaſioned the Dauphin to be diſinherited by his Father and Mother, and *Henry* V. of *England* to be proclaimed Regent; ſo that *Charles* VII. would certainly have loſt the Crown, had it not been for the Aſſiſtance of the *Scots*, and the Courage his Troops were inſpired with by *Joan of Arc*, the well known Maid of *Orleans*. *John* D. of *Burgundy* being thus cut off in 1419, he was ſucceeded by

27. *Philip* III. his Son, ſirnam'd the *Good*, becauſe of his Clemency. He enter'd *France* with an Army, and join'd with the *Engliſh*

Digitized by Google

Engliſh, to revenge the Death of his Father; and prevailed with *Charles* VI. of *France*, and his Queen, whoſe Daughter he had married, to diſinherit the Dauphin, to match their Daughter *Katharine* with *Henry* V. of *England*, and to ſettle the Succeſſion on their Poſterity, as the only Means to deliver *France* from a dangerous War with *England*, and from the Stain which had been put upon the Honour of the Nation by the Dauphin. This brought on a War of 16 Years; but the Dauphin being come to the Crown, and the Duke being affronted by the Pride of ſome of the *Engliſh*, (ſays the Hiſtory of *Flanders*) and particularly by *Humphrey* D. of *Gloceſter*, who had carried away from her Husband the D. of *Brabant*, *Jaqueline* Counteſs of *Hainault* and *Holland*, and afterwards married her. He inclin'd to a Peace, partly becauſe being neareſt Relation to *Jaqueline*, who had no Iſſue, he expected to be her Heir; and partly becauſe he was troubled to ſee *France*, in which he was born, and whoſe Kings were his Anceſtors, reduced to ſuch a miſerable Condition: But chiefly, becauſe *Charles* VII. had in 1436 procur'd Ambaſſadors from ſeveral Crown'd Heads to meet at *Arras*, in order to mediate a Peace; and ſent to beg the Duke's Pardon for the Murder of his Father. The *Engliſh* refuſed to part with their Title and Poſſeſſion, and *Charles* ſent ſome of his Grandees, who falling on their Knees at Church before D. *Philip*, beg'd his Pardon in their Maſters Name for the Murder of his Father; to which he had been prompted to conſent by wicked Villains in his tender Age; with which Duke *Philip* being mov'd, he burſt out into Tears, and declar'd with a loud Voice, "That for "the Sake of our Saviour's Paſſion, out of "Pity to the People of *France*, and out of "Reſpect to the Pope and the Council of "*Baſil*, and the Interceſſion of Chriſtian "Princes, he would forgive the King of "*France*, on Condition that a Croſs ſhould "be erected on the Bridge where his Father "was murther'd; That all the Actors ſhould "be condemn'd; That the K. ſhould give "him the Towns and Counties he demanded, pay him 400000 Crowns, allow his Subjects in the Service of *France* to bear "St. *Andrew*'s Croſs, and exempt himſelf "from paying Homage." Upon this the Treaty was concluded, the Legat abſolv'd him from his Oaths and Leagues with the *Engliſh*, who reproach'd him bitterly for it, and hated him ever after. The Treaty being concluded, he order'd his Governor of *Paris* to drive the *Engliſh* from thence. Beſides theſe Additions to his Dominions from *France*, he fell Heir to the Dutchies of *Brabant* and *Limburg*, the Marquiſate of the Empire, *Hainault*, *Holland*, *Zealand*, *Frieſland*, and the Dutchy of *Luxemburg*, which made him the powerfuleſt Prince in *Europe*. He married for his 3d Wife the Daughter of *John* King of *Portugal*: She was received at *Bruges* with extraordinary Magnificence; and on the Day of his Nuptials, he inſtituted the Order of the *Golden Fleece*. He ranſom'd from the *Engliſh* for 400000 Crowns the D. of *Orleans*, Son to D. *Lewis*, whom his Father had caus'd to be murther'd, married him to his Neece, a Daughter of *Clevis*, and made him a Knight of the *Golden Fleece*. He entertain'd the Dauphin of *France*, afterwards *Lewis* XI. and his Wife, 7 Years at his Court, whither they had retir'd from the Diſpleaſure of the *French* King, who demanded him from *Philip*, and ſent to tell him, That his Son would reward him, if ever he came to the Crown; as *Æſop*'s Serpent did the Countryman, who took it up when ſtung by a bitter Froſt, and warm'd it in his Houſe, where it afterwards poiſon'd him: But *Philip* continu'd his Kindneſs to the Dauphin, and put him in Poſſeſſion of the Crown after his Father's Death; for which he rewarded him as his Father foretold he would. Duke *Philip* alſo entertain'd in her Diſtreſs *Margaret*, Wife to *Henry* IV. of *England*, and Daughter to *Rene* D. of *Anjou*, who had both been his Enemies. He likewiſe pardon'd his own Son *Charles*, whom he had confin'd for ſpeaking diſreſpectfully to him on the Account of his Favourites, and receiv'd him with Tears and Embraces when he came to make his Submiſſion. He likewiſe pardon'd the Cities of *Ghent* and *Bruges*, who had forſaken him when he beſieg'd *Calais*. For all which Actions of Clemency, he receiv'd the Sirname of *Good*, and died full of Honour and Glory at *Bruges* in 1467, the 80th Year of his Age, and the 48th of his Reign. He left behind him 40000 Lewis d'Ors, 771 Marks of uncoin'd Silver, and Moveables

Digitized by Google

to the Value of 2000000 of Gold, a vaſt Treaſure in thoſe Days. He was buried with as great Magnificence as he had liv'd. His Corps was cover'd with a Mortuary of Gold, on which there lay a Sword of the ſame Metal, and there were 17000 Torches carried before him to the Grave. He was eſteem'd by all the great Princes of the World; ſo that *Edward* IV. of *England*, when he fail'd to recover his Kingdom, truſted him with his two young Brothers, tho' *Philip* was related to the Houſe of *Lancaſter*, and *Edward* the Chief of the Houſe of *York*. *Thomas* and *Demetrius*, Emperors of the Eaſt, came to deſire his Aſſiſtance againſt the *Turks*, who had diſpoſſeſs'd them. *David* Emperor of *Trapeſond*, and the Kings of *Perſia*, *Armenia*, and *Meſopotamia*, ſent Ambaſſadors to deſire his Aſſiſtance againſt the *Ottoman* Family, and call'd him by the Title of, Great Duke of the Weſtern Regions. The Emperor *Frederick* III. deſign'd to have made him a Knight and Vicar of the Empire in *Gaul*, and courted his Grand-Daughter *Mary* for his Son *Maximilian*, which afterwards took Effect. But this great Prince was not without his Weakneſſes, for he made *David*, one of his Baſtard Sons, Biſhop of *Utrecht* by Force, and another of his Relations Biſhop of *Liege* by Bribery. He had likewiſe 7 other Baſtards by ſeveral Miſtreſſes.

28. *Charles* II. his Son, ſirnam'd the *Hardy* or *Terrible*, ſucceeded. He added the Dutchy of *Guelder* and the County of *Zutphen* to his Dominions, and was inveſted in the latter by the Emperor with great Pomp and Ceremony; when the Number of his Train, the Richneſs of their Apparel, and the Sumptuouſneſs of the Entertainment he gave to the Emperor and his Court, fill'd all that beheld it, and the Emperor himſelf, with Admiration. The Hiſtory of *Flanders* ſays, he had 6 Earls and 600 Gentlemen attending him, all clad in Brocard: His own Caſſock was embroider'd with Gold, and adorn'd with Precious Stones, valued at 200000 Ducats. At his Entertainment, his Table was cover'd with Diſhes and Veſſels of maſſy Gold, embelliſh'd with Diamonds. At the 2d Courſe, there was one Veſſel ſet before the Emperor valued at 6000 Ducats of Gold. His Chapel where he heard Maſs was adorn'd with 60 Images of Gold and Silver, and ſo full of Precious Stones, that they were valued at 200000 Ducats. The Reaſon of all this extravagant Pomp, was to induce the Emperor to make him King of *Burgundy*, and Vicar of the Empire on this Side the *Rhine*; upon which he was to give his Daughter in Marriage to *Maximilian*, the Emperor's Son. All Things were prepar'd for his Inveſtiture in the Royalty; but the Emperor of a ſudden departed from him without doing it, but on what Reaſon is not ſaid; tho' it may reaſonably be ſuppos'd, that the Emperor was offended to ſee himſelf outdone in Pomp by the Vanity of a Prince ſo much below him in Dignity, tho ſuperior in Riches. That ſame Year *Sigiſmund* of *Auſtria* came to *Flanders*, and mortgaged to him the County of *Ferrette*, in which ſtand the Cities of *Briſac* and *Rhinfeld*, with a Deſign to engage him againſt the *Swiſſers*, with whom *Sigiſmund* was then at War. He married for 3d Wife, *Margaret*, Daughter to *Richard* D. of *York*, in 1468, at *Bruges*, with extraordinary Magnificence. He fancy'd this Princeſs for her Beauty; but his politick Reaſon for the Match was to prevent *England*'s joining with *France* againſt him. In 1471, he received *Edward* IV. of *England*, his Brother-in-Law, with great Kindneſs when he was drove from his Dominions, and ſent him back with an Army, which reſtor'd him. He likewiſe entertain'd, anſwerable to their Dignity, ſeveral Princes of the Houſe of *Lancaſter*, who fled to him in their Diſtreſs. He made ſeveral advantagious Treaties with *Lewis* XI. of *France*, by which he enlarged his Dominions, exempted himſelf from paying Homage to that Crown, and his Subjects from Appeals to *France*. Upon which he erected the Sovereign Court at *Malins*, in Imitation of the Parliament of *Paris*. He rais'd a Regiment of 800 Horſe, arm'd Cap-a-pé, divided into 5 Troops, each of 'em commanded by a Knight of the *Golden Fleece*, to whom he allow'd extraordinary Salaries. He ſpent two or three Days a Week in determining Controverſies among his Grandees and Courtiers in Perſon. He had continual Wars with his Neighbours, which obliged him to levy great Taxes on his Subjects, and occaſioned the States to refuſe ſeveral of his extravagant Demands. He

Digitized by Google

He was ſo ſucceſsful in his Wars at firſt; that he became the Terror of *Europe*, obliged the Emperor to a diſadvantagious Peace, and *Lewis* XI. of *France* the like, after he defeated him at the Battle of *Montlheri*, and forc'd the Citizens of *Liege* to Submiſſion, tho' ſupported under-hand by *France*; in the Siege of which City, he had certainly been ſurpris'd in his Quarters by a Sally, if the *Scots* in the *French* Service, ſays *Commines*, had not with great Bravery repulſed the ſtrong Detachment that attack'd him and the *Fr.* K. by Night. We have already mentioned his ſevere Chaſtiſement of that City when he took it. He ſtain'd his Character, by delivering up to the *French* K. the Earl of St. *Paul*, Conſtable of *France*, who had retir'd to him for Protection, upon the *French* King's reſtoring him *St. Quintin*. He repented of it when too late, and ſent Orders to his Officers not to ſurrender the E. but his Command came 3 Hours too ſhort, ſo that the Conſtable loſt his Head; and tho' he fell unpity'd, becauſe he was a Man of no Faith, and had ſeveral times embroil'd the Courts of *France*, *England*, and *Burgundy*, yet the Duke could never wipe off the Reproach, which occaſioned a Satyrical Reflection upon him, That when he had the Fox, which was the Name ordinarily given to the Earl, he ſkinn'd him to make uſe of his Fur, and gave his Body to the *French* K. Soon after this he took *Nancy* in *Lorrain*: His Dread of miſcarrying in that Siege, by the Intrigues of the *French*, being one of the Cauſes of his Treachery to the Conſtable. But his Fortune ſoon after declin'd: He raſhly engag'd againſt the *Swiſſers*, whom having a Deſign to ſubdue, he made War upon them on the trifling Pretence of their having taken a Cart-load of Goat-ſkins from the Subjects of the Count *de Romont*, a Prince of the Houſe of *Savoy*, in whoſe Quarrel he had engag'd. He march'd into *Swiſſerland*, which he made no Doubt to conquer, and by that means to open his Paſſage into *Italy*; but was defeated by them at *Granſon*, where they took all his Baggage and rich Moveables. To revenge this, he attack'd them a 2d time at *Morat*, where they cut off moſt of his Army, and forc'd him to a ſhameful Retreat. This Diſgrace threw him into Melancholy, and impair'd his Health; but when he recover'd, being full of Revenge againſt the D. of *Lorrain*, he beſieg'd his Capital of *Nancy* a 2d time, againſt the Advice of his beſt Friends and Generals, in the Rigour of Winter, where he was betray'd by *Campo Baſſo*, an *Italian*, as formerly mentioned, who join'd the Enemy in the Time of the Battle, where the Duke was killed by a Gentleman of *Lorrain*, who being deaf, did not hear him when he deſir'd Quarter, and clove his Head with a Halbert. His Corps was found 3 Days after thrown into the Ditch, and generouſly interr'd with great Magnificence in St. *George's* Church at *Nancy* by his Enemy the Duke of *Lorrain*, from whence his Corps was removed by his Grandſon the Emperor *Charles* V. in 1553 to our Lady's Church at *Bruges*, where he erected a ſumptuous Monument for him before the great Altar. *Lewis* XI. of *France*, who dreaded him, gave an extraordinary Reward to the Meſſenger who brought him the News of his Death. The Duke was a Prince of very great Qualities, a good General, capable of all the Fatigues of War, us'd to go the Rounds of his Camp himſelf, a ſevere Juſticiary, but ſelf-conceited, and valued his own Judgment ſo much, that he would not liſten to the Advice of others, which occaſioned his Ruin; for tho' the *French* King had given him Notice, that *Campo Baſſo* had offer'd to him to murder him, and tho' one of that Traytor's Confederates had acquainted him with his Deſign to betray him, he would believe neither. He underſtood ſeveral Foreign Languages, particularly *Latin*, *Spaniſh*, *French*, *German*, and *Engliſh*, lov'd to read Hiſtory, and particularly the Lives of *Julius Cæſar* and *Alexander*, was temperate in Eating and Drinking, and puniſh'd Exceſs that Way in his Soldiers as much as Deſertion. He was particularly noted for his Chaſtity, would immediately cauſe ſuch of his Soldiers to be hang'd as offer'd Violence to Women when he took Towns by Storm, and condemn'd a Sheriff in *Zealand* to Death for refuſing to marry a young Woman that he had debauch'd. This great Prince fell thus in 1477, in the 43d Year of his Age, and 9th of his Reign.

29. *Mary*, his only Child, ſucceeded; and upon her Father's Death, was ungratefully and treacherouſly deſpoil'd of Part of her

Digitized by Google

Dominions by *Lewis* XI. of *France*, her Godfather, on Pretence of taking her under his Protection, which made many of the Governors of her Towns and Countries submit to him. This, with other Inſtances of his Treachery, verify'd the Saying of his own Father, That he would reward the Houſe of *Burgundy*, who gave him honourable Entertainment, as *Æſop*'s Serpent did the Countryman, who warm'd it when benumb'd with Cold. That which aggravated his Crime, was, that he had made a Truce of 9 Years with her Father, which he ſolemnly ſwore by all that was ſacred he would inviolably obſerve. He deprived her of *Burgundy*, and of all that had been given to her Predeceſſors by the Treaties of *Arras* and *Conflans*, demanded her to be put under his Protection, till the Dauphin, who was then but 7 Years of Age, ſhould be fit to marry her, tho' ſhe was then 20; and by his Artifices, and betraying ſome Letters to him relating to the Perſons ſhe deſign'd to entruſt with the Management of the Government, and deſiring him to direct all his Advices to them, he ſtir'd up the Citizens of *Ghent* againſt her, who hating her chief Counſellors that ſhe deſign'd to rely on, who were, the Lord of *Imbercourt*, and *Hugonet* her Chancellor, they put them in Priſon; and charging them with Treachery againſt the late Duke, and betraying the Government into the Hands of *France*, &c. they try'd and condemn'd 'em: And tho' the Princeſs came into the publick Market-place, where they were brought to Execution, in a Mourning Habit, with her Hair diſchevell'd, addreſs'd her ſelf to the People, and begg'd their Pardon with Tears, they put them to Death; which, tho' diſreſpectful in the higheſt Degree to their Sovereign, was reckon'd a juſt Judgment on them, becauſe they had adviſ'd her Father to deliver up the Earl of *St. Paul* to *Lewis* XI. as above-mentioned. That Earl's Son was one of the chief of the *French* Courtiers who ſtir'd up the People againſt them to revenge his Father's Death. In 1477, ſhe married *Maximilian* of *Auſtria*, who came to *Ghent* with ſeveral Electors and Princes of the Empire for that Purpoſe. But 5 Years after, this happy Couple were ſeparated by a fatal Accident; for as ſhe was riding a Hunting with her Husband, her Horſe ſtumbled, threw her againſt the Stump of a Tree, and being with Child, the Bruiſe caſt her into a Fever, which carried her off a few Days after in 1482, in the 25th Year of her Age, and the 5th of her Reign, univerſally lamented for her excellent Qualities. She had 4 Children, 2 of which died before her; but *Philip* and *Margaret* ſurviv'd. In 1485, *Maximilian* was proclaim'd Tutor to his Son, and took an Oath for the faithful Diſcharge of his Truſt; but when he was elected K. of the *Romans*, he carried his Son to *Malines*, where he bred him after the *German* Faſhion, which diſguſted the *Flemmings*; and having, by the Advice of his Counſellors, left out his Son's Name in the Money that he coin'd, and his *German* Garriſons having alſo diſoblig'd the *Flemmings* by their ill Diſcipline, thoſe of *Ghent* and *Bruges* impriſon'd the chief of his Counſellors, whom they try'd, condemn'd, and executed, for giving him ill Advice, particularly to levy Money contrary to Law; and ſummon'd himſelf to appear before their Deputies, where, to pacify them, he ſalured the 52 Maſters of the Companies of *Bruges*, ſpoke to them ſtanding, with his Hat in his Hand, agreed to all they deſir'd, conform'd himſelf to their Manners, and was familiar with 'em. Upon which they declar'd, They would live and die with him; that what they had done, was only to puniſh ſuch as had abus'd his Favour, and promis'd to protect his Perſon and Moveables, and not to deliver him to thoſe of *Ghent*, nor to the *French*, which he dreaded moſt. They kept him however 3 Months under a Guard, on Pretence to ſave him from the Mob; but by the Intreaties and Threats of the Pope, the Emperor his Father, and other Princes, they came to an Agreement to forgive what was paſt on both Sides, for which he gave them Hoſtages. He afterwards recover'd them by Craft, and the Emperor came with an Army and declar'd War againſt *Bruges* and *Ghent*, who enter'd into an Alliance with *France*, which filled the Country with Tumults and Seditions, till a Peace was concluded at *Tours* betwixt *France* and *Maximilian*; who being afterwards choſen Emperor, he left his Son in the *Netherlands* under Guardians, and died at *Newſtat* in *Auſtria* in 1519.

30. He

30 He was succeeded by his Son *Philip* IV. of *Flanders*, who became afterwards the first of that Name K. of *Spain*, by marrying the Heiress of that Crown. He was so much belov'd by the People, that the *Flemmings*, contrary to their Custom, put his Name in all their publick Acts at the Age of 17. He was the first that sold the publick Offices of their Government to fill his Treasury, by the Advice of his Counsellors; but had otherwise such excellent Qualities, that he was called the Delight of Mankind; and when he went to *Spain*, the *Flemmings* universally lamented his Absence, as that of a common Father. He died at *Burges*, the chief City of *Old Castile*, in 1506; from whence his Heart was brought to *Bruges*, and put in his Mother's Sepulchre.

31. He was succeeded by his Son *Charles* V. afterwards Emperor; of whom having given an Account already, we shall only add, That in 1540, he came from *Spain* through *France* to suppress the Rebellion of *Ghent*, where he put to Death 30 of their chief Burgomasters, banish'd and forfeited a great many of the chief Citizens, disarm'd the Burgers, depriv'd them of their Privileges, forc'd their Magistrates to walk in Procession with Halters about their Necks, and built a Citadel, the first of its kind in *Europe*, to prevent any future Rebellion. But his carrying his Resentments too far in this and other Instances, contributed to lay the Foundations of that Revolt in the *Netherlands*, which proved so fatal to his Posterity.

We have insisted the longer on the History of *Flanders*, because it has been a Theatre of War for so many Ages, and contains so many remarkable Passages which relate to our own History, and that of *France*, *Spain*, and the Empire.

The chief Towns of Flanders *are*,

1. GHENT, Lat. *Gandavum*, suppos'd to have at first been called *Wanda*, when possess'd by the *Vandals*. It lies on the *Lys*, *Mosrwater*, *Scheld*, and the *Lieve*, all navigable Rivers, 10 Miles S. from *Sas van Ghent* in *Dutch Flanders*, 20 S E. from *Bruges*, and 22 S. W. from *Antwerp*, in Long. 22. 37. Lat. 51. 7½. 'Tis the greatest City in the *Low Countries*, but has decay'd in Trade and otherwise since the Revolt of the *Dutch*. It has a Staple of Corn and other Grain, and has the Conveniency of Canals betwixt *Bruges*, *Sas van Ghent*, and *Antwerp*; besides the Advantage it has by the *Scheld* and other Rivers. There are 6 or 7 Forts on the Canal betwixt it and *Sas*, most of which belong to the *Dutch*, for the Security of that Passage. 'Tis reckon'd 7 Miles in Compass within the Walls, and about 10 Miles without, because of its Fortifications. There are several Corn-Fields and other wast Places within. The Body of the Town is well built, the Streets fair and clean, and the whole is well fortified with Walls and Ditches. It has 7 Churches, 55 Monasteries, of which that of the Jesuits is the fairest. There's a Cloyster here for *English* Nuns. The Cathedral is a stately Edifice. Its Tower, called *Belfort*, is between 4 and 500 Steps high, with a gilt Copper Dragon on the top as large as a Bull. From hence there's a pleasant Prospect of the City and adjacent Country, which is very fruitful; and they have a Bell in it called *Roland*, of 12000 Pounds Weight, with very fine Chimes. This Church is dedicated to St. *Bavo*, and the Abbot has a considerable Tract of Ground, with some Marks of Sovereignty, and many Villages, under his Jurisdiction. There are several noble Tombs here; and in the Lower Church, there's a Lady's Tomb of one entire Touch-stone. St. *Michael*'s Church is fam'd for its excellent Paintings, and that dedicated to St. *Peter* and St. *Paul* is a fine Structure. The Castle, formerly the Palace of their Princes, contains 300 Chambers; and in one of the least of 'em, *Charles* V. was born, on St. *Matthias*'s Day, as appears by this Inscription moulded over the Chimney in *Relievo*:

Matthiæ Luce exigua Cubili natus Carolus Quintus.

The Numerical Letters making the Year of his Nativity. In this City was also born the D. of *Lancaster*, so well known by the Name of *John* of *Gaunt*. The Town-House is of fine Stone-work in Sculpture, adorn'd with Pilasters after the modern Way. They have several large Market-Places, and in one of 'em a noble gilt Statue of *Charles* V. On a Scaffold over against that called the *Friday*'s Market, there's a great Cannon mount-

Digitized by Google

ted, with a larger Bore than any Mortar-Piece. On the Bridge called *Dagebrack*, there are two Statues in Brass, representing a Son beheading his Father, of which they tell the following Story: Being both condemn'd to die, a Pardon was offer'd to either of 'em that would be the other's Executioner; and the Son being perſwaded to it by the Father, as he was ready to give the fatal Blow, the Blade broke in his Hand; which being look'd upon as a ſingular Providence, and a Rebuke for the Barbarity of the Propoſal, they were both pardon'd. This City is pleaſantly ſituated in a good Air, and has ſo many Streams running through it, that 'tis divided into 26 Iſlands, join'd by 98 large Bridges, beſides ſeveral leſſer ones. Their chief Trade, beſides Corn, is in Cloths, Stuffs, and Silks, of which there's ſo great a Quantity made here, that a 3d of the 50 Companies of Tradeſmen in this City are employ'd about that Manufacture. The Citadel conſiſts of 4 little Baſtions, looks to the City on one Side, and to the Fields on the other. 'Tis regular, but much ſhort of the modern Fortifications of that Nature. 'Tis an Epiſcopal See, Suffragan to *Malins*, and the Seat of the Provincial Council of *Flanders*. 'Twas formerly ſo powerful, that in the Reign of *Philip de Valois*, they ſent 50000 Men to the Field. The Inhabitants have always been reckon'd Warlike, but much inclin'd to Tumults, as we have heard before. It has ſuffered much of late by the Wars; yet *La Forreſt* ſays, there are 30000 Burgers in it who live on their Rents. 'Tis ſaid to have been founded by *Julius Cæſar*, becauſe of the Conveniency of its Situation. 'Twas taken by *Lewis* XIV. of *France* in 6 Days, *Anno* 1678; but reſtored by the Treaty of *Nimeguen*. 'Twas poſſeſs'd by them again after the Death of *Charles* II. of *Spain*; but abandon'd after their Defeat at *Ramillies* in 1706. 'Twas betray'd to them in 1708, and retaken after a ſhort Siege by the Confederates that ſame Year.

2. *Bruges*, 20 Miles N. W. from *Ghent*, on the Canal of *Reye*, in a large Plain, and about 11 Miles S. E. from *Oſtend*. It had its Name from its numerous Bridges. It has a Canal to *Sluys* about 7 Miles long, cut at a vaſt Charge by the Inhabitants of *Sluys*, and ſecur'd by mighty Turn pikes from Inundations, by which Veſſels of great Burden come up to the Town. But after *Sluys* fell into the Hands of the *Dutch*, thoſe of *Bruges* dug another Canal to *Oſtend*, which brings Ships of 2 or 300 Tuns to the City, and advances its Trade. 'Twas once one of the greateſt Emporiums in *Europe*, and frequented by Merchants from all Countries, who had their Storehouſes here, and were form'd into 17 Fraternities. Beſides whom, they had 68 Companies of other Tradeſmen and Artificers, with a Guildhall for each. *Antwerp* was then ſubſervient to it; but the Merchants removed thither in 1500, becauſe of the Wars; ſo that their remaining Trade conſiſted in *Spaniſh* Wool, for which 'twas made the chief Mart by the *Engliſh* after their Loſs of *Calais* in 1558. *Spinola*, the *Spaniſh* General, cut a Canal betwixt this City and *Ghent* of 8 Leagues long, which he guarded with 200 Forts and Redoubts, as many Companies of Foot, and 6 Troops of Horſe. 'Tis the 2d Town in *Flanders*, is large, well built, moſt of the Houſes being 4 or 5, and ſome of them 6 Stories high; from the Tops of which there's a Proſpect of a Fleet of Ships, and a fruitful and pleaſant Country. The City is populous, of a round Form, and about 4 Miles in Circumference. It has 6 principal Streets, which center in the Market-place, and lead to the principal Gates. Moſt of the Streets are ſtraight and large, and their Publick Buildings ſumptuous. Near the Market-place, there's a Tower 343 Steps high, and not far from thence the Palace called *La Franche*, nobly adorn'd with the Pictures and Statues of Emperors, Kings, and Archdukes. There are 7 Pariſh-Churches here: That of *St. John* was made a Cathedral in 1559, when a Biſhop, Suffragan to *Malins*, was eſtabliſhed in this City by *Philip* II. who made him Chancellor of *Flanders*, as the Provoſt of the Church was before. The famous *Ludovicus Vives* is entomb'd here. They have 60 Monaſteries, 3 Colleges of Canons, and a College of Jeſuits, ſumptuouſly built at the Charge of the City. 'Tis well wall'd, fortified with Works of Earth, and deep Ditches. Beſides their Trade in *Spaniſh* Wool, they drive a conſiderable Commerce in Manufactures of Cloth, Fuſtians, Stuffs, Tapeſtry, *&c.* There's abundance of Ca-

nals

Digitized by Google

sals in the Town, over which there's a multitude of Bridges; and over one of those Canals, stands their publick Warehouse, where Vessels unload at the very Door. The first Decay of their Trade happen'd by the Rigour of their Magistrates, which occasioned many of their best Weavers to leave the City, and come for *England*. The *English* of Note are generally complimented here in the House where our K. *Charles* II. resided during his Exile; and several Houses have been erected with the Money given them by the Royal Family, where the Citizens exercise themselves with Bows and Guns: They are adorn'd with Pictures and other Monuments of the 3 Brothers. The Tower of our Lady's Church leaning on one Side by the Neglect of the Builder, he threw himself down from the Top of it, and was buried where he fell. The *English* have two Nunneries here; and in the Jesuit's Church there's a solid Fabrick, representing the Holy Sepulchre, the Plan of which was brought thither by a Lord, who went twice to *Jerusalem* on purpose, and is interr'd here.

3. *Damme*, on the old Canal of *Bruges*, 3 Miles N. from that City, a small Town, founded by Count *Baldwin the Couragious* in 1195, but ruin'd by those of *Bruges* in the 13th Century, because they were jealous of its Commerce, and kept by them above 60 Years; but towards the End of the 16th Century, 'twas strongly fortified by *Spinola*, the *Spanish* General.

Four Miles N. E. from *Damme*, lies Fort St. *Donat*; and about 2 Miles further N. lies Fort *Isabel*, on the Channel over against *Sluys*; and about 6 Miles W. from Fort *Isabel*, lies Fort *Blankenburg*, on the Coast; which were all taken by the Confederates in the present War.

4. *Ostend*, the Capital of the District call'd *Freeland*, or *Vryland*, because they shook off the Superiority of those of *Bruges*, lies on the Coast, 11 Miles N. W. from *Bruges*, and extends its Jurisdiction over the said Territory, which is about 7 Miles, and contains a great Number of Villages. 'Tis situated in a moorish Ground, among several Channels; two of the chief of 'em almost encompass it, and swell so high at full Tide, that the Town seems to stand in the Sea, and is so exactly fortified, that 'tis reckon'd one of the strongest Places in the *Netherlands*. It has a large and safe Harbour, capable of Ships of great Burden, and was lately enlarg'd by the *Spaniards*; and well defended by Forts. The Houses are well built, and uniform, but not high. The Streets are regular, well pav'd, strait, and neat; having been all built at once, after the Town was laid in Ruins, by the famous Siege which began in 1601 by *Spinola*, as we have formerly mentioned. We shall only add here, That it cost 100000 Men on both Sides, of which the *Dutch* and their Allies are reckon'd to have lost 30000. 'Twas so slightly fortified when the Siege began, that Princess *Isabella* is reported to have said, She would not shift her Smock 'till it was taken. Yet the Siege held out above 3 Years, and when surrender'd, 'twas reduc'd to a Heap of Rubbish. The *Spaniards* shot so many Bullets against the Sand-hill Bulwark, where they stuck, that it became a Wall of Iron, and dain'd all the fresh Bullets in Pieces when they hit it. 'Tis also remarkable for the Design form'd to surprise it by Treachery in 1658 by Cardinal *Mazarine*; when Mareschal *d'Aumont*, who had the Conduct of the Enterprize, thought himself so sure of it, that he sent the Cardinal Word, The Design was effected; and the Cardinal relying on this Intelligence, wrote confidently to *Francfort*; where the Electors were met to chuse an Emperor, that the Town was taken, which so confounded them for some time, that they suspended the Election; but when the contrary was known, and that the *French* Troops were entrapp'd, it very much expos'd his Reputation and Politicks. *Metteran* and some other Writers falsly charge Sir *Francis Vere* with the Design to have betray'd it, while he was Governor of it for some Time during the famous Siege; but they are contradicted by Authors of better Credit, and the whole Conduct of that brave Gentleman, which shew'd him to be uncapable of so much Baseness: He only gain'd Time by a Treaty with the *Spaniards* to fortify it, which sav'd it from immediate Ruin. The *French* possess'd themselves of it after the Death of *Charles* II. of *Spain*; but were obliged to surrender it in 1706, after a short Siege by the *English* and *Dutch*.

Plas-

Digitized by Google

Plaſſendal, a ſtrong Fort, with a Sluce for letting Ships paſs out and in, lies about 3 Miles E. from *Oſtend*, and commands the Canal betwixt that Place and *Bruges*, and the Entrance of the Canal from *Newport*. 'Twas taken from the *French* before they loſt *Oſtend*, and ſeiz'd by them again when they ſurpris'd *Bruges* and *Ghent*; but abandon'd after they loſt thoſe Towns in 1708.

5. *Newport*, lies about 8 Miles S. W. from *Oſtend*, and 14 from *Bruges*, near the Bank of the Sea, where a little River that runs by the Town falls into it, and makes a long and ſecure Harbour, but not capable of large Ships. The Town is well fortified with Walls, Ramparts, *&c.* the Streets broad and ſtraight; but the Houſes low built, and moſt of 'em of Timber. The Inhabitants maintain themſelves chiefly by Fiſhing, and the *Engliſh* Packet-Boat goes Weekly betwixt this Place and *Dover*. 'Twas inveſted by the *Dutch* under Prince *Maurice* in 1600, and Archduke *Albert* coming to relieve it, it occaſioned his memorable Defeat, mentioned *P.* 798. A little off of *Newport*, near the Sea, is a little Fort defended by a Wall, a Ditch, and Bulwarks. The chief Strength of this Town conſiſts in its Situation; for by their Sluces, they can in leſs than an Hour lay the adjacent Country under Water for two Leagues. By this means, the *French* not only kept it in Poſſeſſion, but interrupted the ſending of our Convoys from *Oſtend* to *Liſle* during the Siege of the latter in 1708.

6. *Deynſe*, a ſmall Town on the River *Lys*, 10 Miles S. W. from *Ghent*, was united to the County of *Flanders* in 1316 by Count *Robert*, and is famous for the glorious Retreat of the Prince of *Vaudemont* from thence in 1695, when almoſt ſurrounded with the *French*.

7. *Dendermond*, on the Mouth of the *Dender*, where it falls into the *Scheld*, about 10 Miles S. E. from *Ghent*, is a Place of Importance by its Sluces and Fortifications, is Capital of a Diſtrict of the ſame Name, and has a conſiderable Trade in Fuſtians and other Stuffs. The *French* were repulſed before it in 1667; but having poſſeſſed it after the Death of *Charles* II. of *Spain*, they ſurrender'd it to the D. of *Marlborough* on Terms in 1706.

8. *Rupelmond*, on the Mouth of the *Rupel*, where it falls into the *Scheld*, 20 Miles E. from *Ghent*, a pretty ſmall Town, the only Place of Note in the Country of *Waes*.

9. *Aloſt*, or *Aelſt*, on the River *Dender*, about 7 Miles S. from *Dendermond*, and 13 S. E. from *Ghent*, the Capital of that called *Imperial Flanders*, and of a County formerly ſubject to Lords of its own. 'Twas taken by the *Spaniards* in 1576, and by the D. of *Alençon* in 1582; after which 'twas garriſon'd by the *Engliſh*, but betray'd by the Governor to the D. of *Parma*. 'Twas taken by the *French* in 1667. Their King pretended to this Town and County in the Right of his Queen, but reſtor'd it by the Treaty of *Nimeguen*, after diſmantling it. He ſeiz'd it again after *Charles* II.'s Death; but his Troops abandon'd it after their Defeat at *Ramillies* in 1706. The Territories of this Town are large, *viz.* the County of *Aloſt*, the Country of *Waes*, and thoſe called the 4 Offices of *Hulſt*, *Axtel*, *Bouchut*, and *Aſtenede*, which comprehend above 150 Villages, and 4 Cities, which all together made up that called *Imperial Flanders*, becauſe it held in Fee of the Empire. *Aloſt* was noted formerly for its Hop-Market and Tapeſtry.

10. *Ninove*, lies 6 Miles S. from *Aloſt*, and is a pretty ſmall Town. *Grammont*, 5 Miles above it, is a ſmall Town, built by Count *Baldwin* in 1068.

11. *Audenard*, lies on the *Scheld*, about 16 Miles S. from *Ghent*. The River divides it into two Parts, and advances its Trade, which is chiefly in Tapeſtry and fine Linen. 'Tis Capital of a Caſtellany, which contains 33 Villages. 'Tis well fortified with ſtrong Walls and regular Outworks, and by the Caſtle of *Pamele*, join'd to it with a Bridge, but is commanded by a Hill on the Side of *Aloſt*. 'Twas taken by the Lord of *Ravenſtein* in 1484, by *Bimart* in 1567, by the Prince of *Parma* in 1582, and by the *French* in 1658; but reſtored by the Treaty of the *Pyrenees*. They took it again in 1667, had it confirm'd by the Peace of *Aix la Chapelle*, but reſtor'd it by the Peace of *Nimeguen*. They laid Siege to it in 1708, but were forc'd to abandon it, and receiv'd a remarkable Defeat near it, mentioned *P.* 826.

12. *Harlebeck*, on the *Lys*, 2 Miles below *Courtray*, the Capital of a ſmall Territory.

13. *Courtray*,

Digitized by Google

13. *Courtray*, on the *Lys*, 12 Miles W. from *Audenard*, and 12 E. from *Ipres*. 'Tis divided by the River, reckon'd one of the ancienteſt Towns of the *Netherlands*, and to have been conſiderable in the Days of *Cæſar*. 'Tis very ſtrong by its Situation, well fortified, and has a good Citadel, which was built by the *French* in 1646, when they took the Town. The *Spaniards* retook it in 1647, the *French* took it again in 1667, and reſtor'd it by the Treaty of *Aix la Chapelle*. They took it again once more; but 'twas retaken by the Allies in 1706. The Town is noted for making good Diaper and Cloth, in which they have a good Trade. *La Forreſt* ſays, they had an Annual Feaſt for a great Victory they obtained over the *French* in 1302, and about 80 Years after were ſurpris'd by the *French* as they celebrated that Feſtival, when the Town was burnt down, but rebuilt better than 'twas before.

14. *Menin*, lies on the ſame River, about 5 Miles above *Courtray*, is a ſmall Town, but ſo well fortified by the *French*, that 'twas reckon'd one of the ſtrongeſt and moſt regular Fortifications in *Europe*. 'Twas taken by the Allies in 1706, after 18 Days Siege. 'Tis noted for excellent Beer.

Commines, *Warwick*, and *Warneton*, are Places of Note betwixt *Menin* and *Liſle*. The former was the Birth-place and Inheritance of the famous Stateſman and Hiſtorian *Philip de Commines*.

15. *Liſle*, Lat. *Inſulæ*, and *Inſulæ*, by ſome called *Lilæ*, and by the *Dutch*, *Ryſſel*, lies about 12 Miles S. from *Courtray*, and 10 W. from *Tournay*, on the River *Deule*. It had its Name from its Situation among Marſhes, moſt of which are now drein'd. *La Forreſt* ſays, 'twas built in 1007 by Count *Baldwin* IV. and walled by *Baldwin* V. It ſuffered much in the 13th Century. *Philip Auguſtus* of *France* diſmantled it in 1213. 'Twas retaken next Year by Count *Ferrand*, and *Philip the Fair* ruin'd it in 1297. It had formerly Lords of its own, who had the Title of Caſtellans, from the 11th Century to 1234, that it came to the Family of *Peronne*, afterwards to the Family of *Luxemburg*, then to the Family of *Vendoſme*, next to the Family of *Burgundy*, and from them to the Houſe of *Auſtria*. *Lewis* XIV. took it in 1667, fortified it with a noble Citadel, flank'd with 5 Royal Baſtions, beſides many Half-Moons, and other Outworks. He fortified the Town ſo well, that 'twas one of the ſtrongeſt Places of *Europe*. He enlarg'd it alſo with a Suburb, adorn'd it with ſeveral fine new Streets, and built a good Arſenal. The Ditches are filled by the River *Deule*. 'Twas the only Town improved by his Conqueſts, and became very rich by their Trade in Linen Cloth, Camblets, Silks, *&c.* and by being in a manner the Center of Commerce betwixt *France* and the *Netherlands*, and many of the Inhabitants were concern'd in the Shipping of *Dunkirk*; and for the Conveniency of tranſporting Goods, there's a Canal cut betwixt the Town and the *Lys*. 'Twas confirmed to the *French* by the Treaty of *Aix la Chapelle*, is a Town of great Antiquity, the Metropolis of what was anciently called *French Flanders*, had a large Juriſdiction, and a Chamber of Accounts for *Flanders* eſtabliſh'd here by *Philip the Bold*. The Town is very large, populous, and well built, eſpecially the new Streets, which are of Brick and Free-ſtone; but moſt of the old of Wood. The Market-place is ſpacious; the Town-Houſe ſmall, but handſome, and a ſtately Church near it. The moſt conſiderable Church is that of St. *Peter*. The neighbouring Country abounds with Flax. The *French* laid a Cauſway near 20 Miles long betwixt this Town and *Ipres*, thro' the marſhy Grounds. For the famous Siege of the Town and Citadel, and their being taken by the Allies in 1708, we refer to *P.* 826. The Invention of Painting in Oil, and of making Says and other Worſted Stuffs, is aſcrib'd to this City. The *French* King order'd theſe blaſphemous Inſcriptions to be put on the new Caſtle in 1673; *Gentes laudabunt te, & Reges Terræ Gloriam tuam*; i. e. *The Gentiles ſhall praiſe thee, and the Kings of the Earth thy Glory*; and, *In Sole poſui Tabernaculum meum*; i. e. *I have plac'd my Tent in the Sun.*

16 *Tournay*, Lat. *Tornacum*; in *Dutch*, *Dornick*, 10 Miles S. E. from *Liſle*. It lies on the *Scheld*, over which it has ſeveral Bridges, is Capital of the fruitful and pleaſant Country of *Tourneſis*, the Seat of the chief Tribunal or Parliament for the *French* Conqueſts in the *Netherlands* ſince 1669, and a Biſhop's See, Suffragan of *Cambray*. *La Forreſt* ſays, it belong'd to the *Nervii*, and was

Digitized by Google

taken by *Cæsar* after he defeated them. 'Twas surrender'd to the Pr. of *Parma* on St. *Andrew*'s Day, 1581, after a brave Defence by the Princess of *Epinay* in her Husband's Absence. *Strada* observes, That St. *Andrew*'s Day has been fatal to it, it having been taken before on that Day by King *Henry* VII. of *England*, and the Emperors *Maximilian* and *Charles* V. *Henry* VIII. built a strong Castle here. 'Twas deliver'd to the *Fr.* in his Time by Cardinal *Wolsey*'s Intrigues. The Town and Castle were basely surrender'd to the *Fr.* K. almost without Resistance, in 1667, and continu'd in his Hands till surrender'd to the Confederates, after a sharp Siege, in 1709, upon Articles, and the Garrison of the Citadel made Prisoners of War some Time after. The City is large, populous, and has a considerable Trade, especially in a sort of Table-Linen, from hence called *Dornick*. Dr. *Northleigh* says, it has 17 Parish-Churches. The Cathedral is a noble Pile, adorn'd with 5 Towers, plac'd in Form of a St. *Andrew*'s Cross. The Buildings in general are handsome, and there are reckon'd 72 Companies of Traders in the Town, They had formerly a considerable Trade in Woollen Cloth, which is now decay'd. The Church of our Lady is a noble Fabrick, and the Quire adorn'd with excellent Marble Work. One of their ancient Structures of *Roman* Architecture is a Proof of their Antiquity. After the *French* King took it, he very much improv'd its Fortifications, which were, a double Wall, and a dry Ditch, with regular Bastions, and made many curious Mines or Vaults under Ground in the Citadel, which are very dark and deep, and so well contriv'd, that they look more like Terrass-Walks than Mines. In the Center of the Citadel there's a Well, whose Water is 50 Foot deep; and above the Brink of this Well, there are Balconies, which lead to the Vaults under Ground. *La Forrest* says, the *Scheld* begins to be navigable here, where there's a good Key; That they have still a considerable Trade in Stockings and Woollen Stuffs. 'Tis supposed to have been the Residence of *Childerick*, Father to *Clovis* of *France*, because when they were digging the Ruins in 1653, they found a Ring with that Prince's Name and Effigies engraven upon it.

17. *Orchies*, about 7 Miles S. W. from *Tournay*, Capital of its Chatellany, and noted for making Woollen Stuffs. 'Tis a small, but ancient Place on the River *Scarp*.

18. *Douay*, Lat. *Duacum*, on the *Scarp*, 20 Miles S. from *Lisle*, and 15 S. W. from *St. Amand*. 'Twas Capital of the *Catuagi* mentioned by *Cæsar*, as 'tis now of its Chatellany, is a large, strong and rich Town. 'Tis noted for the Seminary founded here for *English* Papists, under the Conduct of Jesuits, by *Philip* II. of *Spain* in 1569, from whence they removed about 20 Years after to *Rheims* in *France*, where they publish'd an *English* Translation of the Bible, well known by the Name of the *Rhemish* Version. 'Twas taken after a short Resistance by the *French* King in 1667, who has since fortified it very well. It has a Fort about a Cannon-shot below it on the *Scarp*, with Sluces, by which they can drown the adjacent Country. They have an Annual Fair in *September*, when they sell great Quantities of Worsted Camblets.

19. *St. Amand*, on the *Scarp*, above 10 Miles S. E. from *Tournay*, formerly a Place of good Strength, but dismantled by the *French* in 1667, who cut down the neighbouring Forrest. 'Tis noted for a rich Abbey dedicated to St. *Amand*, as lofty within and without as that of *Westminster*, with a double Row of Galleries or Corridores about it, both Sides excellently wrought in Stone-work and Mouldings. The Abbot has both Temporal and Spiritual Jurisdiction. 'Twas founded by *Dagobert* V. of *France* for 30 Canons, to whom there's now added 20 Jesuits. The adjacent Country is pleasant and fruitful.

20. *Mortagne*, on the Conflux of the *Scheld* and *Scarp*, 6 Miles S. E. from *Tournay* 'Twas taken and dismantled by the Emperor *Charles* V. in 1521.

21. *La Bassé*, on the *Deule*, 14 Miles S. W. from *Lisle*, on the Frontiers of *Arras*, a small Town, frequently taken and retaken by the *Spaniards* and *French*; but yielded to the latter by the Treaty of *Aix la Chapelle* in 1668.

22. *Armentiers*, 10 Miles N. W. from *Lisle*, on the *Lys*, noted for its Trade in Cloth. 'Tis a Place of considerable Strength, was frequently taken and retaken, but yielded

Digitized by Google

yielded to the *French* by the Treaty of 1668.

23. *Mont-Kaſſel*, or *Caſſel*, 20 Miles W. from *Menin*, and 14 N. W. from *Armentiers*. 'Tis ſituated on a Mountain, and ſuppoſed to be the *Caſtellum Morinorum* of the Ancients. 'Twas formerly a very large Town, but has ſuffered much by War. 'Tis noted for a great Victory gained by the *Flemmings* over *Philip the Fair* of *France*, for another over them by *Philip de Valois* in 1328, and for a 3d in 1677 by *Philip* Duke of *Orleans*, who defeated the Pr. of *Orange*, afterwards our K. *William*, when he came to relieve *St. Omers* with 30000 Men. The Prince had 3000 Men killed, and 3000 taken, and the *French* loſt 2000 Men. This Town is Capital of a Chatellany, which contains 500 Villages.

24. *Bailleul*, or *Belle*, about 8 Miles S. E. from *Mont-Kaſſel*, Capital of a ſmall Chatellany, noted for the Birth of *Meyerus*, a *Flemmiſh* Hiſtorian of good Note.

25. *Meſſine*, 4 Miles N. E. from *Armentiers*, and 5 S. W. from *Menin*, a handſome Town, where they make great Quantities of Cloth, and have a rich Nunnery, whoſe Abbeſs has both Temporal and Spiritual Juriſdiction.

26. *Ipres*, 9 Miles S. W. from *Menin*, and 11 from *Courtray*, Lat. *Ipra*; in *Dutch*, *Ypren*, from the River on which it ſtands. 'Tis Capital of its Chatellany, which is very large and fruitful, has a Vote in the Provincial States, and is honour'd with the Title of a Viſcounty. 'Tis one of the neateſt and richeſt Towns in *Flanders*, and vends a great Quantity of Says and Silks at their Annual *Lent* Fair, and would have been one of the largeſt Towns in the Country, but that it has ſeveral times been deſtroyed by Fire. 'Twas built in 960 by Count *Baldwin* III. and made a Biſhoprick in 1559, Suffragan of *Malins*. 'Twas beſieg'd and taken by the *French* in 1648, reſtored afterwards to *Spain*, but retaken by *Lewis* XIV. in 1678. Since which, it has continued in his Hands, being confirmed to him by the Treaty of *Nimeguen*. The Houſes are well built, but the Fronts of Timber, and fortified with new and regular Outworks, beſides a Wall. It lies low, and by its Sluces can lay the neighbouring Country under Water. Their chief Church is the Cathedral of St. *Martin*, where there are Monuments of ſeveral other Biſhops. Their Town-Houſe is ſtately, and has a ſpacious Front. Their Market-place is large, and has an ancient well-built Hall, the Repoſitory for their Wool. They have ſeveral Convents; and on the Altar-Piece of the Jeſuits Church, our Saviour's Reſurrection is admirably painted. In their Cloiſter, they have the Pictures of all the Jeſuits that have ſuffered in *England*, repreſented as Martyrs. The Chatellanies of *Bailleul* and *Kaſſel* belong to its Quarter.

27. *Bourburg*, 22 Miles W. from *Ipres*, and 3 S. E. from *Gravelin*, is a pleaſant little Town on the top of an Hill, Capital of its Chatellany, one of the oldeſt in *Flanders*, and very fruitful, formerly ſubject to Lords of its own. 'Tis noted for its Free Fairs, has been ſeveral times taken and retaken by the *French* and *Spaniards*, and quitted to the former by the Treaty of the *Pyrenees*.

28. *Gravelin*, Lat. *Gravelinga*, on the Mouth of the River *Aa*, 10 Miles N. E. from *Calais*, and 10 S. W. from *Dunkirk*, in a Plain, cut with ſeveral Canals, which make it inacceſſible on the Side of the Land. 'Twas ruin'd in the 11th Century by the *Normans*, but rebuilt in the 12th by Count *Thierry*. 'Twas formerly ſubject to the Chatellany of *Bourburg*, and chang'd Maſters ſeveral times, till it came to the Counteſs of *Flanders* in 1272. 'Twas ſtrongly fortified by *Charles* V. in 1528; and in 1558, Count *Egmont* gave the *French* a great Defeat near this Town, but was afterwards ungratefully beheaded by the D. of *Alva*. Sir *Philip Sidney* attempted to ſurpriſe it in 1586, but was diſappointed. The *French* took it in 1644, and the *Spaniards* retook it in 1652, with the Loſs of 2000 Men. 'Twas taken from them by the *Engliſh* and *French* in 1658, and quitted to the *French* by the Treaty of the *Pyrenees*. The Town is ſmall, and ill built, but ſtrongly fortified by 6 good Baſtions, defended with Ravelins, and other Outworks, with ſeveral Forts to defend the Approaches of the Town; and one muſt paſs 6 Draw-Bridges before they come into it. It has alſo a Citadel towards the Land, is defended by Fort *Philip* towards the Sea, and at a further Diſtance by the Forts of *Oye* and *l'Eclauſe*. When Strangers approach, the Centinels

tinels give Notice of their Numbers by ſo many Tolls of a Bell; and Wool brought from *England* or *France* pays Cuſtom here.

29. *Mardick*, a little Town and Fort about 2 Miles S. W. from *Dunkirk*, on the Bank of the Sea, noted for its Sieges. The *French* took and diſmantled it in 1645; the *Spaniards* retook it in 1652; the *Engliſh* took it in 1658; and 'twas quitted to the *French* by the Treaty of the *Pyrenees*; but there's nothing of the Fortifications now left, except a Wooden Fort with a few Guns.

30. *Winoubergen*, or *Berg St. Vinoc*, Lat. *Berga*, or *Mons Sanctæ Winocæ*, on the River *Colm*, 5 Miles S. E. from *Dunkirk*, with which it communicates by a Canal. It had its Name from a Monaſtery, built and dedicated here to St. *Vinoc*, an *Engliſhman*, by Count *Baldwin* V. in 1040. 'Tis Capital of a ſmall Chatellany, honour'd with the Title of a Viſcounty. They formerly made a great deal of Cloth; but that Trade is now much decay'd. The adjacent Country is very fruitful, feeds great Herds of Cattle, and abounds with excellent Cheeſe. 'Twas taken by the *French* in 1645, and confirmed to them by the Treaty of the *Pyrenees* in 1658.

31. *Dunkirk*, on the Bank of the Sea, and at the Mouth of the River *Colm*, lies 10 Miles N. E. from *Graveling*, 20 N. E. from *Calais*; 10 S. W. from *Furnes*, 15 from *Newport*, and 22 from *Oſtend*. It took its Name from a Church on the neighbouring Downs, and is ſaid to have been built in 966 by Count *Baldwin* III. It had particular Lords of its own, called Chatellans, about the 13th Century. It came afterwards to the Earls of *Flanders*, and was walled in 1327 by *Henry* IV. Count of *Bar*, to whom it fell by Marriage, as it did afterwards to *Lewis* of *Luxemburg*, Conſtable of *France*. It came to the Houſe of *Burgundy* with the reſt of *Flanders*, and the Emperor *Charles* V. built a ſtrong Fort here in 1535, which was made ſtronger by *Spinola*. 'Twas taken, ſack'd and burnt, by the *French* in 1558, while they were treating with it about a Surrender. 'Twas afterwards ſurpris'd by the Duke of *Alençon*'s Troops, when he attempted to make himſelf abſolute in the *Netherlands*, under the Notion of being their Governor. The Duke of *Parma* recover'd it from the *French* after a long Siege. He equipp'd part of a Fleet here to join the Invincible Armado that was to invade *England*; but the *Dutch* prevented their getting out. In 1590, Prince *Maurice* attempted it in vain by a Scalado. In 1647, the Prince of *Condé*, with the Aſſiſtance of the *Engliſh*, took it after a troubleſome Siege. In 1652, 'twas beſieged and retaken by Archduke *Leopold*, ſome *Engliſh* Frigats having block'd up the Harbour, and prevented its having any Relief by Sea. But in 1658, *Oliver* having enter'd into a League with *France*, a Body of *Engliſh* that join'd the Mareſchal *de Turenne* laid Siege to it, and after defeating Don *John* of *Auſtria*, who came with an Army to relieve it, the Town ſurrender'd, the Marquis *de Ledo*, their Governor, being kill'd in a Sally, and, according to Treaty, 'twas put into the Hands of the *Engliſh*, but ſold to *Lewis* XIV. by K. *Charles* II. in 1662. Since which, the *French* King has ſpar'd no Coſt to make it one of the ſtrongeſt Places of *Europe*. The Town is divided into the Upper and Lower, and is very much enlarged ſince it came into the Hands of the *French*. The Lower Town is the beſt fortified; but the whole is very ſtrong. On the Land-ſide, it has double Walls and Works, and very high Baſtions. Towards the Sea, it has treble Works. There are 3 great Forts at ſmall Diſtances, which command the River or Canal, the Sluces, and the neighbouring Country. It has a Canal on the S. Side, and on the N. is almoſt encompaſſed by the Sea, in Form of an Half-Moon. The Sands being very troubleſome, and frequently choaking the Harbour, the *French* King was at vaſt Expence to build two long Galleries on each Side of it, with a long Bank of Timber-work, Faggots and Faſcins, to ſecure it; and there are 4 Wooden Forts which defend the Entrance of the Port by Sea. He alſo erected two Risbanks, which are prodigious Forts, as ſtrong as Art and Labour could make 'em: They command the Canal by which Ships enter the Town, and the Baſin within, which is capable of holding 150 Men of War; and for the further Security of the Town, he erected a ſtrong Citadel, which is reckon'd one of the fineſt in *Europe*, its Baſtions reſembling Mountains, enough to fill the Beholders with Amazement, and thoſe

Digitized by Google

thoſe who attack it with Deſpair of Succeſs. The *Engliſh* begun this Citadel, which he has ſince finiſhed, and much exceeded the firſt Plan: But his principal Deſign of making this a Harbour fit for containing a ſufficient Number of Men of War to command the Channel, has been happily defeated by Providence, a great Tempeſt having ſo filled the Harbour with Sand, that it can never be able to anſwer his End, thô he had built 3 great Sluces a little above the Town upon 3 Currents, in order to ſend vaſt Flaſhes of Water into the Channel, to drive out ſuch Sands as might happen to lodge in the Mouth of it. He employ'd 14000 Men a long while on the Fortifications, Harbour, Baſin, and Dock. Dr. *Northleigh* ſays, the Town is much of the Size of *Oxford*, the Streets large and regular, and the Houſes neat. They have a large handſome Church, with a fine Altar, and a good Piece of Painting, repreſenting the Laſt Judgment; and in one of the Chapels dedicated to St. *George*, there's a Repreſentation of the Martyrdom of that pretended Saint, which is very much eſteem'd. There's an *Engliſh* Nunnery of poor *Clares* here, and another of *Benedictines*, called the *Rich Ladies*. There's a Cloiſter of *Franciſcan* Monks, and another of Nuns here; and the Tower of the great Church has 273 Steps to the top, from whence on a clear Day one may ſee *Dover* Cliffs. The Workmanſhip of the Marble Altar in this Church is ſaid to have coſt 20000 Florins. This was formerly a Town of good Trade, which is decay'd ſince 'twas ſold to the *French*; but in Time of War, the *French* Squadrons and Privateers which lie here do very much annoy the Channel.

32. *Furnes*, 10 Miles N. E. from *Dunkirk*, on the River *Colm*, is Capital of its Chatellany, and bears the Title of a Viſcounty. The Town is ſmall, but neat. 'Twas built or repaired about 870 by *Baldwin*, ſirnam'd *Iron Hand*, has been often taken and retaken by the *Spaniards* and *French*, and was quitted to the latter in 1668 by the Treaty of *Aix la Chapelle*. Their chief Trade is in Linen, and the Territory belonging to the Town is exceeding fruitful. 'Twas taken by the *Engliſh* in 1692, but retaken by the *French* next Winter.

33. *Dixmuyd*, lies about 5 Miles S. E. from *Furnes*, and belongs to that Territory call'd the Franc of *Bruges*. 'Tis noted for ſuſtaining ſeveral Sieges, its Strength, and the Importance of its Situation. 'Tis ſtill in Poſſeſſion of the *French*.

The Province of Artois *or* Arras.

HAS *Flanders* on the N. and E. Part of *Hainault* and the Biſhoprick of *Cambray* on the E. and *Picardy* on the W. and S. *Mol* makes it from S. E. to N. W. 60 Miles, and the greateſt Breadth from N. E. to S. W. about 32. The *Latins* call it *Arteſia*, and *Arthiſia*; the *French*, *Artois*; and the *Dutch*, *Atrecht*. In *Cæſar*'s Time, 'twas the Country of the *Atrebates*, and by him made Part of *Gallia Belgica*. *La Forreſt* ſays, K. *Clodion* of *France* having conquer'd it in 444, made it a Province of *France*. When that Monarchy was divided into 4 Kingdoms by the Children of *Clovis* in 511, 'twas comprehended in the Kingdom of *Auſtraſia*. *Charles the Bald* gave it with his Daughter *Judeth* in 863 to *Baldwin* I. of *Flanders*. *Iſabel* of *Flanders* brought it in Dowry to *Philip Auguſtus* of *France* in 1180. K. *Louis* VIII. gave it to his 3d Son *Robert* in 1226. It came afterwards by Marriage in 1318 to *Eudes* IV. of *Burgundy*, after the Death of *Charles the Hardy*. *Lewis* XI. ſeiz'd upon it in 1477, as a Fee-Male of the Crown of *France*. *Charles* VIII. quitted it in 1483 to the Emperor *Maximilian*; and it continued in the Houſe of *Auſtria* till 1640, that the *French* ſeiz'd it, and had it confirmed to them by the Treaty of the *Pyrenees*. The Air is mild and temperate, the Soil fruitful, particularly of excellent Wheat, with other Corn and Fruit; but has no Vines, which ſome aſcribe to the Neglect of the Inhabitants. *Guicciardin* ſays, it had 12 Wall'd Towns, 854 Villages, and was divided in his Time into 9 Chatellanies.

The chief TOWNS *are*,

1. *Arras*, Lat. *Atrebatum Civitas*, *Nemetocorna*, and *Nemetacum*. It lies on the *Scarp*, 13 Miles N. from the Frontiers of *Picardy*, 28 S. W. from *Liſle*, and 12 S. W. from *Douay*. The City is large, conſiſts of two diſtinct Towns, formerly ſeparated by a Wall,

Digitized by Google

Wall, now demoliſhed. The one was called the City, and the other the Town; the former ſubject to the Biſhop, and the latter to the Prince. The City is the leaſt, but pleaſanteſt, well fortified with good Bulwarks and Trenches; and among other fair Structures, has a Cathedral dedicated to the Bleſſed Virgin, with a Library well ſtor'd with MSS. of Divinity. 'Tis a Biſhop's See, which was founded in 531, was formerly Suffragan to the Archbiſhop of *Rheims*, but now to *Cambray*. They pretend to have a Wax-Taper drop'd from Heaven, which they ſay burns, and does not conſume; and this they keep in a particular Chapel. They have alſo a Pot of Manna, that they ſay was ſhower'd down from Heaven in St. *Jerome*'s Time; and this they expoſe in Time of Drought, to excite the People to pray for Rain. The other Part, called the Town, is very well fortified, and was reckoned ſo ſtrong, that while 'twas poſſeſs'd by the Houſe of *Auſtria*, they put an Inſcription over one of the Gates, importing, That the *French* ſhall never take *Arras*, till the Mice devour the Cats. They took it however after 7 Weeks Siege in 1640. The *Spaniards* laid Siege to it in 1654; but were defeated, and forc'd to raiſe it on St. *Lewis*'s Day. This Part of the Town has broad Streets, a ſpacious Market-place, and ſtately Churches: The Houſes are well built, with large and deep Cellars, to which the Inhabitants retire during a Siege. *La Foreſt* ſays, 'twas taken in 1427 by *Lewis* XI. and by the Emperor *Maximilian* in 1493, and quitted to the *French* by the Treaty of the *Pyrenees*, who have ſince fortified it very regularly. *Baudrand* ſays, it has alſo a ſtrong Citadel. 'Tis noted for making Says, and that rich ſort of Tapeſtry, which from thence is called *Arras*. The Abbey of St. *Vedaſtus* in this City has an Annual Revenue of 20000 Crowns. *Cluſius* the famous Herbaliſt, and other Learned Men mentioned by *Bleau* and *Guicciardin*, were born here.

2. *Bapaume*, lies on the Frontiers of *Picardy*, about 11 Miles S. E. from *Arras*, is a very ſtrong Town, and has a large Juriſdiction. 'Twas taken by the *French* in 1645, when their Commander *St. Preuil* attack'd the Garriſon after they came out upon Terms; but loſt his Head for breaking the Articles. 'Tis difficult to beſiege this Town, becauſe there are no Springs or Rivers for the Conveniency of the Beſiegers.

3. *Heſdin*, Lat. *Heſdinum*, and *Heſdina*, lies 22 Miles N. W. from *Arras*, on the River *Canche*. There was an old Town of this Name upon the ſame River, anciently the Seat of the Earls of *Flanders* and *Arras*; but not being capable of Defence ſince the Invention of Guns, *Charles* V. demoliſh'd it, and built the preſent Town on the ſame River, and ſo well fortified, that 'tis reckon'd one of the ſtrongeſt Towns in the Country, being a regular Hexagon, and ſituate in a Moraſs. 'Tis uſually called *Heſdinfort*, becauſe built by *Emanuel* D. of *Savoy*, who was General for *Charles* V. *F. E. R. T.* being the ancient Device of the Houſe of *Savoy*. The *French* took it in 1639, under the Conduct of M. *de Melleray*, for which the *French* King made him a Mareſchal next Day.

4. *St. Pol*, or *Paul*, Capital of a ſmall Chatellany in this Province, lies 9 Miles E. from *Heſdin*. This City was a long time poſſeſſed by Lords of its own; one of whom being Conſtable of *France*, and playing faſt and looſe with *Lewis* XI. *Edward* IV. of *England*, and *Charles the Warlike* D. of *Burgundy*, the two latter betray'd him at laſt to the *French* King, who cut off his Head, as *Commines* relates in his Memoirs.

5. *Lens*, Lat. *Lentium*, and *Lendum*, on the River *Souchez*, 15 Miles N. E. from *St. Pol*, is a City with a conſiderable Juriſdiction, which has been ruin'd by the Wars. 'Twas taken in 1557 by the *French*, pillag'd in 1582 by thoſe of *Cambray*, and ſack'd ſoon after by the *Spaniards*. 'Tis noted for a great Victory which the *French* under the Prince of *Conde* obtained near it over the *Spaniards* in 1648.

6. *Bethune*, on the *Biette*, 9 Miles N. W. from *Lens*, a pretty neat Town, well fortified, and noted for its Fairs. 'Twas anciently ſubject to Lords of its own, from whom the preſent Family of *Bethune* is deſcended. They make great Quantities of excellent Cheeſe here. 'Twas taken by the *French* in 1645, and confirmed to them by the Treaty of the *Pyrenees*.

7. *Aire*, or *Arien*, Lat. *Aria*, on the *Lys*, 10 Miles N. W. from *Bethune*. It ſtands in a Moraſs, which makes it almoſt inacceſſible. The *French* took it in 1641; the *Spaniards*

Digitized by Google

niards retook it ſoon after; and the *French* took it again in 1676, and had it confirmed to them by the Treaty of *Nimeguen*. 'Tis encompaſſed on 3 Sides by a Moraſs, fortified with good Ditches, Baſtions, Half-Moons, Redoubts, Horn-Works, and Counterſcarps. It can be cloſely beſieged only on one Side, where 'tis defended by the Fortreſs of St. *James*, which has 5 Baſtions, a Half-Moons, and a deep Trench.

8. *Teroüane*, or *Teroüenne*, Lat. *Teruana*, or *Civitas Morinorum*; was formerly the Capital of the *Morini*, a People of *Gallia Belgica*, in *Cæſar*'s Time. 'Twas beſieged in 1513 by K. *Henry* VIII. of *England*, when the Emperor *Maximilian*, in Honour of that Prince, fought under his Banner, and wore St. *George*'s Croſs. The Emperor *Charles* V. after having miſcarried in the Siege of *Metz*, took and demoliſhed this Place in 1553. Since which, its Dioceſe has been divided into the 3 Biſhopricks of *Boulogne*, *St. Omers*, and *Ipres*.

9. *Renty*, 5 Miles W. from *Teroüane*, is a Caſtle betwixt two Mountains, with a fair Village adjoining. 'Tis remarkable for a Victory obtain'd near it by the *French* over the *Spaniards* in 1554, when the latter loſt 3000 Men, and *Charles* V. narrowly eſcaped.

10. *St. Omers*, on the River *Aa*, 10 Miles N. W. from *Aire*, and 15 S. E. from *Calais*, Lat. *Fanum Sancti Audomari*, from *Audomarus*, a Native of *Conſtance* in *Germany*, and Biſhop of *Teroüane*, who built a Monaſtery here in 660; and the Reputation of his Sanctity occaſioned ſuch a Confluence of People to the Place, that it quickly grew a conſiderable Town, was firſt walled in 880, better fortified in 902, and at laſt became one of the ſtrongeſt and moſt important Places of the *Spaniſh Netherlands*, from whence the Garriſon infeſted the Frontiers of *France*, and laid the Country about *Calais* and *Boulogne* under Contribution. 'Twas made a Biſhop's See, Suffragan of *Cambray*, in 1559. Some are of Opinion, that 'tis the *Itcium Portus* mentioned by *Cæſar*, from whence he embarked to invade *Britain*; and by the Ruins of a Port, and the ſandy Soil in the Neighbourhood, they reckon the Sea did then come up to it; but this is rejected for very good Reaſons by *Cluverius* in his *Germania Antiqua*, *Lib.* 2. where he proves, that the *Itcium Portus* of *Cæſar* is that now called *Boulogne*. *St. Omers* is remarkable for the Riches of the Inhabitants, occaſioned by a new Canal betwixt it and *Gravelin*, for the Abbey of St. *Bertin*, and a Seminary of *Engliſh* Jeſuits. 'Tis fortified both by Nature and Art, having on one Side the River and Marſhes, and on the other is defended by a ſtrong Caſtle on a riſing Ground, ſeveral Baſtions, Half-Moons, and deep Trenches. In the Neighbourhood there's a great Lake, in which there are ſeveral floating Iſlands, that afford good Paſturage for Cattle, and Shelter for Fiſh in Extremity of Heat or Cold. *Guicciardin* ſays, theſe Iſlands are eaſily drawn from one Place to another, by tying Ropes to the Buſhes that grow upon them. On this Lake ſtands the noble and large Monaſtery of St. *Bernard*, by whom 'tis ſaid to have been built. This City was taken by the D. of *Orleans* in 1677, after the Defeat of the Pr. of *Orange*, who advanc'd as far as *Mont-Caſſel* to relieve it; and 'twas quitted to the *French* by the Treaty of *Nimeguen*.

The Archbiſhoprick of Cambray,

HAS *Hainault* on the N. and E. the *Archbiſhoprick of Tournay* on the W. and *Picardy* on the S. Its greateſt Length from E. to W. is about 25 Miles; the Breadth is unequal, being in ſome Places 12, and in others not above 4 Miles. This Country was a long time a Bone of Contention betwixt the Emperors, the Kings of *France*, and Earls of *Flanders*. *La Forreſt* ſays, *Cladius* K. of *France* took the City of *Cambray* in 441. That *Clovis* I. took it again in 504, and killed with his own Hand *Ragnacaire*, who called himſelf King of it. The Emperor *Charles* V. took it in 1544, and built a Citadel there. The Duke of *Alençon*, Brother to *Henry* III. of *France*, obliged the D. of *Parma* to raiſe the Siege of it, and afterwards gave it to *John de Monluc de Balagny*; and 'twas confirmed to him, with the Title of Prince, by *Henry* IV. but the *Spaniards* recover'd it next Year, and kept it till 1677, when 'twas taken by *Lewis* XIV. At the ſame time his Brother took *St. Omers*.

The

The chief PLACES *are,*

1. *Cambray*, Lat. *Cameracum*; in *Dutch*, *Cameriick*, from whence their Country is called *Cambresis*, and *Cameracensis Ager*. The City is large, neat, well built, and moſt of the Streets center in the great Market-place, where there's a Town-Houſe, with a famous Clock, much taken notice of. The Town is reckon'd one of the ſtrongeſt in *Europe*, being defended by 2 Citadels, 5 regular Baſtions, Ramparts, Walls, Half-Moons, and large deep Ditches, which they can fill with Water in a very little time. Its Situation is very advantagious on the *Scheld*, 9 Miles N. from the Frontiers of *Picardy*, 16 S. E. from *Arras*, and 14 S. W. from *Valenciennes*. On the W. Side, in a low Bottom, it has very large Suburbs, with fine Gardens and Meadows on the River. It has 9 Pariſhes, 3 Abbies, many Religious Houſes, Hoſpitals, and other publick Buildings. 'Twas formerly a Biſhop's See, Suffragan of *Rheims*, but made an Archbiſhoprick in 1559. 'Twas likewiſe an Imperial Town, under Protection of the County of *Aloſt*, but united to the County of *Hainault* by *Charles* V. and quitted to the *French* by the Treaty of *Nimeguen*. Dr. *Northleigh* ſays, the Chapter conſiſts of 48 Canons, and 95 other Eccleſiaſticks: That the great Church of our Lady is a handſome Structure, with many Statues and Tombs of Saints; amongſt which, thoſe of St. *Sebaſtian* and St. *Michael*, of curious Marble, are the chief. The Quire and Nave of the Church are ſeparated by Rails of Braſs of curious Workmanſhip; and they have a Clock, which upon ſtriking repreſents our Saviour's Paſſion. The Doctor adds, That in this Country he once met with a *Frenchman*, who by 15 Years Labour had made an artificial Head, which, by the Motion of certain Wire-work, Springs and Wheels, would utter whole Dialogues diſtinctly with a humane Voice, laugh, and expreſs ſome other Affections; but at laſt 'twas ſtole from him. The Ditches of the Citadel are cut out of a Rock, and they have Sluces by which they can drown the adjacent Country. This Place is noted for making the fine Linen, from hence called Cambrick. 'Twas a terrible Thorn in the Sides of the *French* while poſſeſſed by the *Spaniards*; and upon any Rupture, was able to lay the Country under Contribution as far as the *Seyne*. The Archbiſhop has both Temporal and Spiritual Juriſdiction, calls himſelf Duke of *Cambray*, and Count of *Cambresis*. The Soil of the Country is very fruitful in Corn, but has few Vines, tho' there be very good Fruit of other Sorts.

2. *Chateau Cambresis*, lies on the *Selle*, 13 Miles S. E. from *Cambray*, formerly a Town of Note, but ruin'd by the Wars. 'Tis famous for a Treaty in 1559 betwixt *Henry* II. of *France*, and *Philip* II. of *Spain*, to whom the *French* yielded up 198 conſiderable Places for *St. Quintin*, *Ham*, and *Chatelet*. 'Twas quitted to the *French* by the Treaty of *Nimeguen*, as was alſo *Cревecœur*, another walled Town in this Province, about 6 Miles S. from *Cambray*.

The County or Province of Hainault,

HAS *Flanders* and *Brabant* on the N. Part of *Picardy* and *Champaign* on the S. Part of *Flanders*, *Arras*, and *Cambray*, on the W. Part of *Brabant*, the Counties of *Namur* and *Luxemburg*, on the E. Its greateſt Length from S. E. to N. W. is about 60 Miles, and the greateſt Breadth from E. to W. about 46. Moſt of it was anciently poſſeſſed by the *Eburones*, or as ſome ſay the *Nervii*. It has frequently chang'd its Name, being firſt called *Pannonia*, becauſe the Inhabitants worſhip'd the Idol *Pan*; afterwards *Saltus Carbonarius*, becauſe of the great Quantities of Charcoal formerly made there: Then 'twas called *Lower Picardy*; and at laſt *Hainault*, from the River *Hain*. 'Tis called in Latin, *Hannonia*; in *Dutch*, *Henne-gow*. The Air is clear and ſweet, and the Soil fertile, being water'd with the *Sambre*, *Dender*, and other Rivers. It abounds with Corn and Paſture, Gardens and fruitful Orchards. Their Wheat is excellent, and they have Plenty of Lakes, Ponds, Springs, Mines of Iron, Lead, Marble, Touch-ſtone, and Coal. It has 24 wall'd Towns, 950 neat and pleaſant Villages, and is divided into three Principalities of *Chimay*, *Ligne*, and *Brabanzon*; 10 or (as ſome ſay) 16 Earldoms, and 22 Baronies. They have alſo 26 Monaſteries, 12 Seigneuries belonging

to

the higheſt Dignity, and the Magiſtrates of the City give Place to him. The Emperor *Charles* V. gave him the Right Hand at a ſolemn Proceſſion. On Holidays, and other Solemnities, he is attended by 8 Beadles, who go before him with Silver Maces, and he is followed by his Menial Servants. They have alſo a Promotor, who, by Leave from the Rector, apprehends and puniſhes Criminals, ſometimes by Death, but moſtly by Fines. The Rector has great Power elſewhere; but in the Senate, who ſhare the Supreme Authority with him, he is no more than Preſident. If a Citizen ſue a Scholar, the Cauſe is brought before the Rector; but if a Scholar ſue a Citizen, 'tis brought before the Conſervator, who is generally a Biſhop or Abbot skill'd in the Laws, and ſworn to preſerve the Privileges of the Univerſity; and his Court being Eccleſiaſtical, to which Appeals lie from any other Court of that ſort in *Brabant*, he has a Power to excommunicate upon Contumacy. They have a Chancellor, who confers Degrees, which is alſo perform'd by the Provoſt of St. *Peter*'s, who takes Place next to the Rector. For the Learned Men produc'd here, we refer to *Bleau*.

Notwithſtanding the above-mentioned Encomiums of this Univerſity, Dr. *Brown* ſays, *Oxford* may vie with it for Situation, and exceeds it in Buildings and Endowments. Mr. *Ray* ſays, the Gentlemen Students are plac'd in a peculiar Form, called *Scamnum Nobilium*: All of 'em pay Fines for Abſence from Lectures and Exerciſes; and the 12 appointed to Exhibitions above-mentioned have their Lodgings, Diet and Salary, in what College they pleaſe, chuſe what Profeſſion they think meet; and out of them the Profeſſors are uſually choſen. He adds, They give the Degrees of Batchelor Licentiate and Doctor; but can't be Licentiates in Divinity till after 11 Years Study, and ſeldom Doctors till 50 Years of Age, without extraordinary Proofs of their Ability. The Schools, he ſays, are better than thoſe of *Cambridge*, but inferior to thoſe of *Oxford*. In 1654, there were no leſs than 1600 Students here. In the chief College for Divinity, there are 120 Students maintain'd at the publick Charge; and in the 4 Pedagogies, there are 200 maintain'd in the like manner. Their Licentiate, he ſays, is a Medium betwixt a Batchelor and a Doctor.

This City has the Precedency of all the reſt in *Brabant*, becauſe of its Antiquity; and that 'tis the Place where the Prince and People do firſt take the Oaths mutually to one another. It has alſo the firſt Vote in the Provincial States, except in raiſing Money, when *Antwerp* has the Precedency, becauſe of its Wealth, and larger Proportion in its Share of the publick Taxes. 'Twas abandon'd by the *French* in 1706, after the Battle of *Ramelies*.

About half a League from this City, lies an ancient Palace belonging to the Dukes of *Arefchot*, formerly reckon'd one of the ſtatelieſt in *Europe*, but now ruinous; is ſtill noted for a noble Avenue about a Mile long, and 40 Foot broad, being cut down to an exact Level through a hilly Ground, with Rows of Linden Trees on each Side, by which 'tis ſhaded like an Arbour. The Park and Gardens are extraordinary fine.

2. *Tilmont*, *Tirlemont*, or *Tienen*, about 8 Miles S. E. from *Louvain*, on the River *Geet*. 'Twas formerly a Place of great Extent and Commerce, and one of the 4 principal Cities of the Province. 'Tis ſtill about a League in Compaſs, retains its ancient Privileges, but ſuffered much by the *French* in 1675.

3. *Leewe*, Lat. *Levia*, on the *Geet*, 5 Miles E. from *Tirlemont*, a ſmall, but ſtrong Town, having been fortified to prevent the Incurſions of the *Liegeois*, and enjoys the Privileges of the Second-Rate Cities of *Brabant*. 'Tis a neat City, and very ſtrong, by reaſon of its Forts and Sluces. 'Twas taken by the *French* in 1678, but reſtored by the Treaty of *Nimeguen*. 'Tis noted for a great Priory of *Auguſtins*, whoſe Prior is one of the 12 chief Nobles of the Province. It has a great Trade in Beer, which is much eſteem'd, and by ſome preferr'd to Wine.

4. *St. Trone*, or *Truyen*, Lat. *Centrones*, ſuppoſed to have been the Capital of that People. It lies 2 Miles S. E. from *Leewe*, 'twas ruin'd by the *French*, who diſmantled it in 1675, and carried from hence 40 Waggon-load of Arms to *Maeſtricht*.

5. *Landen*, 5 Miles S. from *Leewe*, on the ſame River, a ſmall, but ancient Town, noted for a dear-bought Victory obtain'd

League to the S. lies the Forreſt of *Soignies*, which furniſhes the City with Fuel, and the Court with good Game for Hunting. The City is encompaſſed with many Abbies and Monaſteries, and the neighbouring Country is well planted with Fruit-Trees of all Sorts, and watered with pleaſant Fountains and Streams, whoſe murmuring Noiſe, expreſſed by the *Dutch* Word *Ruyſſelen*, is by ſome thought to have given Name to the City. The River *Sinne* runs through it, from whence to the *Rupel* there was a navigable Channel, made in 1560 by *Charles* V. and *Philip* II. which coſt above 500000 Crowns. 'Tis 5 Leagues long, dug through a Mountain, which was reduced to a Level, has many Streams brought to it from the neighbouring Country, and 5 large Sluces built in convenient Places for collecting the Waters, and letting them out as Occaſion requires, for the Veſſels which trade with *Antwerp* and other Places; and 'tis obſerv'd, that the Bed of the Waters is 40 Foot higher at the Head of the Channel near *Bruſſels*, than at the Mouth of it where it falls into the *Rupel*. This City is far more populous than *Louvain*, thó the Walls be 200 Paces leſs in Circumference. 'Tis well built; the Streets are large, handſome and convenient. 'Tis the Seat of the Viceroy of the *Spaniſh Netherlands*, and of all the Courts belonging to the Government. They are fond of the Number 7 in many chief Things belonging to the City; as, 7 publick Fountains, 7 principal Streets that center in the great Market, 7 ſtately Houſes in the Market, let out by the Senate for the Uſe of the Corporation; 7 Pariſh-Churches, 7 Noble Families, eminent for their Antiquity and great Privileges; 7 Midwives, licens'd and ſworn by the Senate, who are obliged to go to the Poor as well as the Rich when call'd; 7 publick Gates of *Dorick* Work, remarkable for leading to ſo many Places of Pleaſure or different Exerciſe: The 1ſt, called the *Louvain* Gate, leads out to the beſt Fowling; the 2d, called *Algidomontana*, or Cold-Hill Gate, leads to a Place of Fiſhing; that called *Porta Obbruxellenſis*, leads to Hunting; that of *Anderlecht*, to pleaſant Fields; that of *Flanders*, to Paſture Grounds; that of *Laken*, to Springs and Vineyards; and that of *Mechlin*, to Gardens. 'Tis encompaſſed with a double high Wall, and very large Ditches On the Walls, there were formerly 74 Towers, but many of 'em now ruin'd by Age and War. The Walls are broad, and the Citizens walk on 'em as at *Antwerp*. The City is built on the Front of an Hill, and (ſays Dr. *Northleigh*) is larger than *Briſtol*. Their Houſes pretty much reſemble the *Engliſh*, and are cover'd for moſt part with Slate and Tiles. Their moſt remarkable Church is that of St. *Gudula*, formerly dedicated to St. *Michael*; but *Gudula*, a Daughter to one of their Counts, having richly endow'd it, they choſe her for their Patroneſs. It has two Towers, with 500 Steps each, and a Chapel, where they keep 3 conſecrated Hoſts, from which they alledge that Blood proceeded when they were ſtabb'd by ſome *Jews*, in Contempt of our Saviour, about 3 or 400 Years ago. They have an Annual Proceſſion in Remembrance of this ſuppos'd Miracle, when they expoſe the Hoſts as if they were ſtill bleeding. This Church is an old *Gothick* Fabrick, and has the Tombs of ſome Dukes of *Brabant*. In St. *Mary*'s Church are the Tombs of Archduke *Erneſt*, and the Count of *Iſſenburg*, with Inſcriptions, containing their Hiſtory. The Jeſuits College is very noble, and by its Front, Church and Tower, ſeems to have been the Model to that of *Antwerp*. They have a fine private Chapel, a pleaſant Garden, and a good Library; and betwixt the Windows, the Pictures of the chief Writers of their Society, with ſeveral *Roman* Antiquities brought from *Italy*. They have ſeveral Schools for Grammar, Rhetorick, and Philoſophy, and the Brothers of the Society are about 70 in Number. The *Franciſcans* and other Orders of both Sexes have Monaſteries here; and they have one for penitent Harlots, who enter into the Order of St. *Auſtin*. They have alſo an Hoſpital for the Cure of the Sick, and 4 for the Entertainment of poor Strangers for 3 Days, with a Bedlam for Lunaticks, and an Hoſpital for poor Children laid down in the Streets. The Palace where the Governor reſides is an ancient Fabrick in the Park, to which adjoins the Emperor's Palace built by *Charles* V. with a curious Groteſque and Water-works. *Blean* commends it as a ſtately and magnificent Palace, with Accommodations for the greateſt Prince in the

Digitized by Google

World; but it comes short of the Magnificence of the present Times. The adjoining Park is very pleasant, adorn'd with Water-works, Grotto's, an Aviary, fine Walks, and well stor'd with Deer. The Palace has two Galleries, one of 'em adorn'd with the Pictures of Emperors, Kings, Queens, Princes, and other great Persons: Among 'em, there's a curious Piece representing Archduke *Albert*; and upon a closer View, it likewise represents the Archdutchess *Isabella*; and there's a Picture of hers of the same Nature. The Town-House is an ancient and noble Fabrick, whose Front much exceeds that of *Amsterdam*, and Water is convey'd by Pipes to the very Top of it. The Tower is adorn'd with a Brass Statue of St *Michael*, the Guardian Angel of the City: The Statue is 15 Foot high, and so acurately pois'd, that it can easily be turn'd round. In the Hall, there's great Variety of Pictures by the best Masters; one of 'em by *Ruben*, representing *Solomon* judging the Controversy betwixt the two Harlots, valued at 3000 Florins. The Palaces of *Egmont*, *Alva*, *Orange*, and *Bournevill*, are noble Structures. The Royal Stable is also worth a Traveller's View, having Room for 127 Horses, with all Necessaries for them. Over it, there's a Magazine for Arms, belonging formerly to the Dukes of *Burgundy*, where are kept the Sword of *Charles the Bold* D. of *Burgundy*, with which *Charles* V. us'd to create the Knights of the *Golden Fleece*; Archduke *Albert's* Armour, that he wore at the Battle of *Newport*; and the Chariot in which Archdutchess *Isabella* enter'd *Brussels*, which cost 14000 Crowns. They likewise preserve here the Skins of 3 Horses, so artificially stuffed, that they resemble the Originals; one that belong'd to King *Philip* II. which they say cost 12000 Crowns; the 2d to the Archdutchess *Isabella*, when she enter'd *Brussels*; and the 3d to Archduke *Albert*, on which he escap'd from the Battle of *Newport*. They have a Custom here, and in other Towns of the *Netherlands*, to harnass 3 or 4 Mastiffs Side by Side, and make them draw Coaches, and little Carrs with Provisions and Goods; and they employ Women for Porters. This City abounds with People of Quality and Note, who take a Tour every Night in the Lower Town, but the Men and Women in different Coaches and Circles; yet they meet continually; and by their frequent Talk and Salutations, do many times interrupt the general Society. They have an Annual Custom on the 19th of *January*, says *Misson*, for the Women to undress their Husbands, and carry 'em to Bed; and the Husbands treat their Friends next Day. They assign two Reasons for it: The 1st is, That the City being once obliged to surrender to their Enemy, the Women were allowed only to carry out their Children, and what else they thought most valuable; upon which they took their Husbands on their Backs: The 2d, That having escap'd in a Battle which they undertook under St. *Lewis*, they came home in a Body, were met by their Wives out of Town, and carried home in their Arms. Some few Protestants live here; but they dare scarce own their Religion, adds *Misson*; which does not very well agree with his Assertion, That they have no Inquisition in the *Netherlands*. 'Tis observ'd, that the Houses of the Citizens are for most part stately and splendid, and well furnish'd with Springs and Gardens. They are noted for Extravagancy in adorning the latter with Flowers; so that those of a small Plat have been valued at 7 or 8000 Florins. They make use of the Filth of the City for dunging their Flower-Beds, which makes it bear a good Price. There's a Marble Pyramid erected upon the Place where stood the Palace of *Culemburg*, which was raz'd by the D. of *Alva*, because the Confederate Lords met there for Consultation at the beginning of the Revolt; and there's an Inscription upon it in 4 Languages, giving an Account of the Matter. Dr. *Brown* takes Notice, That before the Court of the Palace, there are 5 Brass Statues, and that one of the Water-works in the Park imitates the Sound of all Musical Instruments, by a kind of perpetual Motion; but the most surprizing Thing here is the Eccho in the Park, which makes 10 or 12, or, as some say, 15 distinct Replies, especially from the Gallery near the Riding-House. He adds, That about 5 Miles from this City, there's a Place called *Fontain*, where 3 Rivers cross one another, one of which is carried over a Bridge: That they have a Nunnery of *Beguins* with 800 Maids, who may quit the Convent and marry at Pleasure;

Digitized by Google

Pleasure; and that they have a new Church, which is Milk-white. There's likewise an *English* Nunnery in this City. The chief Manufactures are Lace and Tapestry. The Citizens are observ'd to be very courteous, especially to Strangers. In 1489, 33000 People died here of the Plague; and in 1529, they were grievously afflicted with the Sweating Sickness. At one time they had 2000, and some Hundreds of Houses, destroy'd by Fire, and at another time 1500 Weavers Shops. The Tradesmen of this City make 52 Companies, united into 9 larger Bodies, which they call Nations. The Armourers were formerly the most considerable, and noted, according to *Guicciardin*, for making Armour of Proof. The Townsmen have been accounted mutinous against the Nobility and Gentry, of whom the Magistrates consist; and the Weavers having been very active in some of those Mutinies, it occasioned a Law, which made it Capital for any of 'em to stay one Night in the City. When the *Netherlands* revolted, this Town was possessed for some Time by the Confederates, but reduced to Extremity, and forced to surrender to the Prince of *Parma* in 1585. Since which, it has continued under the Crown of *Spain*. Their Government is by two Consuls, one chosen out of the Nobility, and the other from the Commonalty; 7 Eschevins, chosen Annually by the Prince out of the 7 ancient and noble Families of the City; and 8 Common-Council-Men, chosen out of the chief Artificers. For their Learned Men, we refer to *Bleau*. This City suffered much in 1695, when 'twas bombarded by the *French* under M. *de Villeroy*; but the Houses which were then demolished have been since rebuilt with more Splendour. It missed narrowly of being surpris'd and taken by the Elector of *Bavaria* in 1708; of which we have given an Account, *P.* 826.

There are two Towns of Note which depend on this City; *viz.*

1. *Nivelle*, near the Head of the River *Sinne*, 15 Miles S. from *Brussels*, was formerly considerable, and well fortified, being one of the 4 Cities which constituted the Marquisate of the Empire. It still enjoys large Privileges. *Pepin*, eldest Son to *Charlemagne*, and Father to *Gertrude*, the Foundress of their chief Church and Abbey of Nuns, is said to be buried here. This Abbey entertains 42 Nuns, who must be Virgins, of Noble and Legitimate Extract by Father and Mother for 4 Generations. They chuse the Abbess by Consent of the Prince, and the Pope's Approbation. She has both Spiritual and Temporal Jurisdiction, and the Place is noted for making fine Linen, which vies with that of *Cambray*.

2. *Vilvorden*, on the Banks of the *Sinne*, 6 Miles N. from *Brussels*. 'Tis strong by Situation and Art, and has a Castle, in which the Duke of *Alva* imprison'd those whom he thought to be disaffected. The Records of the Province were formerly kept here, under the Charge of a Delegate, appointed by their Princes. In this Place the famous Mr. *William Tindal*, the first that translated the New Testament into *English*, suffered Martyrdom, contrary to the Laws of Nations, being a Subject of *England*.

The Lordship of Malins,

IS about 6 Miles long, and 6 broad. It belong'd anciently to the Family of the *Bartholds*, who being extinguish'd, the Bishop of *Liege* and the Count of *Gueldre* made War upon one another for it, and at last they agreed to divide it. They sold it in 1333 for 300000 Crowns to *Louis* Count of *Flanders*, who refused to do Homage for it to the D. of *Brabant*, as its former Possessors had done, which occasioned a War, that was at last made up by a Match betwixt the Families. *Philip the Good* of *Burgundy* erected it into a separate Jurisdiction.

The chief TOWN *is*,

Malins, or *Mechlin*, Lat. *Mechlinia*, on the *Dyle*, 12 Miles N. from *Brussels*. 'Tis one of the oldest and most considerable Towns in the *Netherlands*, lies in a healthful Air, and is divided into two Islands, which are join'd by a great Number of Bridges. The City is full of Channels and winding Currents, some form'd by Art, and others by Nature. The Tide flows up the River about a League above this City, which contributes much to its Trade. The Houses are neat and large, the Streets spacious, and very clean. The Town is fortified with good

Digitized by Google

good Walls; but its chief Strength lies in its Situation, for they can overflow the neighbouring Country with their Sluces. 'Tis divided into 7 Parishes, each of which has a magnificent Church; the chief is that of St. *Rumbold*, made an Archbishop's See in 1559, and Metropolitan of *Flanders*; their first Archbishop being Cardinal *Granvil*. The Statues of the Apostles are plac'd round the Walls. Among other Monuments, there's one containing an Inscription in *French*, but the Date worn out, importing, That there lies *Margaret*, Daughter of *Henry Stuart*, by her Royal Highness the Dutchess of *Orleans*, Daughter to *George Stuart* of the Illustrious House of *Stuart* and *Lenox* in *Scotland*, by Dame *Mary de Baqueville* of the Family of *Baqueville* in *Normandy*. The *Franciscan* Monastery is a curious, large, and stately Fabrick: The Nunnery of *Sancta Clara* is reckon'd as good as any of the Order. The Magazine was formerly stor'd to Admiration for Sea and Land Service, but not so of late; and the Palaces of the Emperor, *Hoogstraet*, *Nassau*, *Egmont*, and *Aremberg*, are now much out of Repair. On the Road to *Louvain*, near this City, there was formerly a Cherry Orchard, reckon'd the largest in *Europe*; and on the Road to *Antwerp*, stood the Nunnery of *Alexis*, where 'tis said 15000 Women liv'd by Spinning, and making of Cloth, but might leave the Convent, and marry. It was destroy'd in the late Wars with *Spain*. *Guicciardin* says, That by a Flash of Lightning during a great Tempest in *August* 1546, a Tower near the Sand-Port was blown up, with 2000 Barrels of Powder, and the Water beat out of the Town-Ditches, tho' very deep, for 600 Paces, all the Houses within 300 Paces demolished, and abundance of People killed and wounded. The Blow made the Earth to tremble as far as *Antwerp* and *Brussels*. There are 17 Companies of Tradesmen in this City, the chief of whom are the Bakers, Fishmongers, Dyers, Tanners, Brewers, and Butchers; out of which 6 Companies, 6 Eschevins are Annually chosen, who, with the like Number chosen from among the Nobility, make up their Magistracy. The Tanners are so numerous, that they formerly took up one Quarter of the Town, and still inhabit 3 entire Streets. This Company has such Privileges of Hunting and Hawking, as in other Places are allow'd only to the Nobility. They had formerly 3000 Weavers; but having taken Arms against the rest of the City, they were deprived of most of their Immunities, tho' they still take Place after the 6 other Companies above-mentioned. The chief Manufacture of this City is Lace and Point, so famous through all *Europe*, excellent Beer, Tann'd Leather, Bells, and great Guns, which are founded in this Place, Linen and Woollen Cloth. For their Learned Men, we refer to *Bleau* and *Guicciardin*. This City, and the Villages under its District, make one of the 17 Provinces. Their States consist of the Magistrates of the City, and the Representatives of the common People. Here also is held the great Council instituted by *Charles* of *Burgundy* in 1473, consisting of 35 Persons, the Prince himself being President. 'Twas new model'd by *Philip* I. of *Spain*, and reduced to 1 President, 16 Senators, 2 Graphiaries, 8 Secretaries, and some Assistants. To this Tribunal, before the Revolt, Appeals were brought from all the 17 Provinces, but now only from 10. They finally determine all Causes, tho' sometimes a Revision is allow'd. Hither also the Knights of the *Golden Fleece* are cited upon Misdemeanor.

The Marquisate of ANTWERP, *or the* Holy Empire,

IS, according to *Moll*, 35 Miles where longest from E. to W. and 25 from S. to N. 'Twas made a Marquisate by the Emperor *Otho* II. in 982, and given, with *Nether Lorrain*, to *Charles*, youngest Son to *Lewis* IV. of *France*; it came afterwards by Marriage to the Count of *Louvain*, and chang'd Masters in the same Manner as the Dutchy of *Brabant*, formerly mentioned.

The chief PLACES *are*,

1. *Antwerp*, which lies on the *Scheld*, 14 Miles N.W. from *Malins*, 22 N. from *Brussels*, 28 N.W. from *Louvain*, and 22 N.E. from *Ghent*, in Long 23. 7½. Lat. 51. 16. 'Tis

'Tis an ancient City; for St. *Willibrod* mentions a Church here committed to his Care in 656, in Lat. *Antwerpium*, and *Antwerpia*. The Origine of the Name is by ſome aſcribed to a Giant who liv'd in the Neighbourhood, and us'd to cut off the Hands of thoſe who did not pleaſe him, and throw them into the River; and to confirm this, they ſhew a Tooth which they pretend to be his, that is a Hand-breadth long, and weighs 16 Ounces; and the City has Hands cut off for part of its Arms; but this is rejected as fabulous, and the Name is derived from *Aen de Werve, i. e.* at the Wharf; part of the City near the Bank of the *Scheld* ſtill retaining this Name. It lies in Form of a Bow, on the E. Side of the *Scheld*, which is 500 of their Ells broad, and at low Water 22 Foot deep. It riſes 12 Foot more by the Tide, ſo that Ships of the largeſt Burthen can unload at their Keys. The *Scheld* runs through it by 8 Channels, ſome of them capable of holding 100 great Ships, which mightily advanc'd its Trade. *Guicciardin* ſays, in his Time it contain'd 13500 Houſes, and had waſte Ground for 3000 more. The Streets are ſtraight and large, and the Buildings magnificent. *Bocanus* ſays, in this Reſpect it exceeds all other in *Europe*; and Mr. *Ray* ſays, it excels *Florence* in Beauty. Dr. *Northleigh* thinks 'tis as large as *London* within the Walls. *Miſſon* ſays, the Houſes are built after a peculiar Way, half of Brick, and half of Wood, with Battlements at the Top, and very high Roofs, which make a handſome Appearance. Dr. *Brown* ſays, the Walls are very broad, fac'd with Brick and Free-ſtone, after the modern Way, being 110 Foot broad at Top, with ſeveral Rows of Linden Trees on them, where the Citizens divert themſelves by walking. The Baſtions are not very large, but the Ditch broad and deep; and on the whole, the Fortifications are more remarkable for their Beauty than Strength. The Citadel conſiſts of 5 Baſtions, is one of the beſt Fortifications of its kind in the *Netherlands*, and commands the City, River, and adjacent Country. 'Tis ſaid to have coſt above a Million of Crowns, and ſerv'd as a Model for moſt of the Citadels that have been built ſince. 'Twas begun by the D. of *Alva* in 1567, and finiſhed in leſs than a Year the Walls, conſiſting at firſt of Earth; but were afterwards lin'd with Brick and Stone. There's a good Space of empty Ground betwixt it and the City. 'Tis above a Mile in Compaſs, has large Storehouſes for Ammunition and Proviſion, and convenient Lodgings for above 3000 Soldiers. In 1577, a great Part of it was deſtroy'd by the Citizens in a Tumult; but it was afterwards repaired, and made much ſtronger. Formerly a Statue of Braſs of the cruel D. of *Alva* ſtood in the middle of the Place of Arms in the Citadel in compleat Armour, but without a Head-piece, extending his Right Arm towards the City, and his Hand open. He trampled under his Feet a Monſter with 2 Heads and 6 Arms, with 2 Diſhes hanging in its Ears, and a Satchel about its Neck, out of which came forth 2 Serpents. In its 6 Hands it held a Torch, a Leaf of Paper, a Purſe, a torn Cloak, a Club, and an Ax; and at the Feet of the Monſter lay a Vizor. On the Front of the Pedeſtal that fac'd the City there was an Inſcription, importing, that 'twas erected in Honour of the King's excellent and faithful Miniſter *Ferdinando Alvarez* of *Toledo*, Duke of *Alva*, General of the *Netherlands* for *Philip* II. of *Spain*, who had confirmed the Peace of the Provinces, by extinguiſhing Sedition, baniſhing the Rebels, and reſtoring Religion and Juſtice. The Monſter above-mention'd repreſented the chief of the Nobility who headed the *Geuſes*. But this inſolent Statue did not ſtand long, being demoliſhed by the People, who hated his Cruelty, and never ceaſed till he was recalled. Their moſt remarkable Structures are, 1. The Church dedicated to the Virgin, a magnificent Fabrick, which was made a Cathedral at the Deſire of *Philip* II. by Pope *Paul* IV. who aſſign'd it 7 Towns and 144 Villages for the Verge of its See, which is 50 Miles long, and 30 broad. This Church has 66 Chapels, and Altars ſo curiouſly built, and ſo ſumptuouſly adorn'd with Statues and Pictures, as cauſe Admiration in the Beholders. *Charles* V. was wont to ſay of its Steeple, That for its excellent Carving, it deſerv'd to be put in a Caſe, and only ſhewn upon Holidays. One of the two Towers adjoining to this Church is ſaid to be 420 Foot high, beſides its Cover, which is 5 Foot, and a Croſs upon that 16 Foot; ſo that *Ortelius* prefers it to the Tower of *Straſburg*.

Digitized by Google

burg. Dr. *Northleigh* says, he ascended it by 620 Steps, and then wanted 30 Foot to the Top, which is cover'd with Copper Pans; and on this they kindle a Fire when any Enemy approaches. From hence there's a Prospect of *Mechlin*, *Ghent*, *Louvain*, and other Cities, and likewise of the Isles of *Zealand*. It has 33 Bells, the largest of which, called *Charles*, from *Charles* V. is of a wonderful Bigness, and never rung but on extraordinary Occasions. They chime pleasantly every Hour, which is perform'd by one Man. Doctor *Northleigh* says, the Steeple is lower than that of *Salisbury*. The Skreen on the Side of the Church exceeds that of *Boisleduc*. The Paintings of the Altars, which are adorn'd with exquisite Workmanship of Marble, are most of 'em by *Ruben*. The Portico of this Church, with its Marble Statues, is inferior to none in *Rome*. This Church has a Dean and 24 Canons, and an Order called the *Confraternity of the Circumcision*, who pretend to have our Saviour's Fore-skin, sent by *Godfrey* of *Bouillon* K. of *Jerusalem*; and on this Account go in publick Procession every *Trinity Sunday*, which they call the Festival of the *Præputium*. They have several other Fraternities, who have their peculiar Chapels here, where they perform their Devotions on certain Festivals. 2. The Jesuits Church, which is the most magnificent on this Side the *Alps*. The Front is a noble Piece of Architecture, with the Statue of *Ignatius Loyola* on the Top; and an Inscription, importing, that it was built by the City, to the Honour of Christ, the Virgin, and St. *Ignatius*, in 1561. The Pillars that support the Galleries, and the upper Row which sustain the Roof, are of the finest Marble; and the Walls and Roofs are wainscotted with Pannels painted by *Ruben*, and other great Masters. The chief Altar is lofty and noble, of the most beautiful Marble, on which there's painted the Ascension of the Virgin by *Ruben*, and the Father represented, putting a Crown of Gold on her Head, with this Inscription, *Veni coronaberis*; *i. e.* Come, you shall be crown'd. Dr. *Northleigh* says, the Jesuits lead an idle and lazy Life here, have a very good Library, and a Chapel of their own, called that of the Society, with their Saints drawn by the best Masters, their Names in Capitals, and this Inscription under them, *Sanctus colitur*; with the Days of their respective Festivals, which fixes the Worship of Saints, and Images upon 'em, though they stifly deny it. The Doctor observes justly, that the Practice of the *Lutherans*, who have Crucifixes and Pictures in their Churches, is quite different, because they strictly forbid all Veneration to them, and keep them only as Remembrancers. 3. The Church of St. *James* is a noble Structure: Their High Altar is of the finest polish'd Marble, supported by two beautiful wreath'd Pillars of the *Corinthian* Order; and behind lies interr'd, in a by-Chapel of his own founding, the famous Painter *Ruben*, who painted the Banqueting-House at *Whitehall*; and among other noted Pieces, a Representation of the Last Judgment at *Antwerp*, valued at 500 *l.* Sterling. There's a great many Canons belong to this Church. 4. The Church of the *Praedicant Friars* is one of the largest of the City, and beautified with excellent Paintings. 5. The Abbey of St. *Michael*, belonging to the Remonstrants, is vastly rich, and has a noble Church, in which there's a Tomb of one of the Family of the *Stuarts*, and the Statues of the 12 Apostles round the Nave of the Wall. 'Tis also adorn'd with fine Paintings by *Ruben*. The Abbot has noble Apartments, in which there are 50 white Vestments. The Life of their Founder, who was Son to Count *Herebert*, a *Palatine*, in *Picardy*, is writ round the Wall in Latin Verse. 6. The Senate-House is a handsome Piece of old Architecture, built of curious speckled Marble: Being much impair'd by Time, 'twas rebuilt in 1460, burnt down soon after, but rebuilt again more splendidly in 1576. 7. The *Easterlings* House is a stately Fabrick, 97 Foot long, and 65 broad. 8. Their *Exchange* is a noble Structure, supported by 43 strong Pillars of white Marble, 180 Foot long, and 140 broad, in the Center of 4 large Streets. The *Royal Exchange* of *London* was built after its Model, but much exceeds the Original. 9. The House built by the Tapestry Merchants, which is 280 Foot long, and of a proportionable Breadth, and contains 26 Warehouses for that Commodity. 10. *Plantin's*, Printing-House, one of the noblest in its kind in the World, is a sort of a square College, with Lodgings for Officers and Work-

Digitized by Google

Workmen, who are chiefly employ'd in Printing Divinity. They had formerly almoſt 100 different Funds of Letters, 2 of which were Syriac, 10 Hebrew, 9 Greek, and 47 Roman. 11. Their Hoſpital for the Education of Children dropt in the Streets, and another for the Maintenance of 12 Perſons of Note of decay'd Fortunes, are very remarkable. 12. Their Glaſs-Houſe and Water-Houſe are extraordinary in their kind.

This City was formerly the moſt conſiderable for Trade in *Europe*. In 1550, 'twas reckon'd to amount to 33000000 of Gold, beſide the Bank, as appears by their Records, which likewiſe mentions one *John Dacnt*, a Merchant, ſo rich, that having lent a Million of Gold to *Charles* V. upon Bond, he afterwards invited that Emperor to an Entertainment, and making a Fire of Cinnamon in the Room, threw the Bond into it. *Guicciardin* ſays, That in his Time, when *Antwerp* was in its moſt flouriſhing Condition, there have been 2500 Veſſels lying together in the River; That 400 have come up with one Tide; and that 'twas uſual for 500 to go and come in a Day: That 200 Waggons arriv'd every Day with Paſſengers from the neighbouring Countries, and 1000 in a Week us'd to come from *Germany*, the Hans-Towns, *Lorrain*, and *France*: That 10000 Country Carts us'd to be employ'd *per* Week in carrying Goods to and again; and that there were then 500 Coaches for the Uſe of the better Sort: But the Perſecution by the D. of *Alva*, &c. the Revolt of the *Dutch*, and their blocking up of the *Scheld*, has ſunk their Trade; ſo that their Port is without Ships, their Exchange without Merchants, and moſt of their Trade is removed to *Amſterdam*, and other Towns in *Holland*: Yet the City retains much of its ancient Beauty, and there are ſtill many rich Families in it. About 30 Paces from the Jeſuits Church there's a Well, the Iron Branches of which, where the Pully hangs, are adorn'd with curious Foliage-work, made by a famous Smith, who falling in Love with a Painter's Daughter, her Father would not agree to the Match becauſe of his Trade, tho' he was very rich; upon which the Smith laid by his Hammer, took up the Pencil, and became ſo great a Maſter at Painting, that he carried his Miſtreſs, as appears by an Inſcription over his Tomb near the Gate of the Cathedral. The Water of the *Scheld* near this City is brackiſh; ſo that the Fountains of the City not being ſufficient to furniſh the Brewhouſes with Water, they were obliged, at vaſt Expence, to bring Water for that Uſe by a Canal of 30 Miles, which empties it ſelf into a great Ciſtern, from whence 'tis rais'd by Engines into a Baſon, and thence convey'd by Pipes to the ſeveral Brewhouſes. 'Twas formerly an Imperial City, and the Princes of *Naſſau* were its Burgraves. The famous Geographer *Ortelius*, and the great Painter *Rubens*, with other Perſons illuſtrious for Learning and Arts, were born in this City. The Particulars may be ſeen in *Bleau*. This Town join'd in the Revolt againſt *Spain*, and was well nigh being ſurpris'd by the D. of *Alençon*, Brother to *Henry* III. of *France*, who aim'd at an abſolute Power, when he was choſen Governor of the *Netherlands*. In order to this, *Bentivoglio* ſays, the *French* poſſeſſed themſelves of two Gates of the City, and let in a Body of their Troops; but having neglected to guard the Portcullis of St. *James*'s Gate, by which they were to have received further Aſſiſtance, the Citizens let it down, took Arms, and killed or made Priſoners all the *French*, while the D. was gone out on Pretence of Hunting, to wait for the Succeſs of his Plot: The miſcarrying of which loſt him the Government, and killed him with Grief, as we have formerly mentioned. This City was afterwards beſieged and taken by the Prince of *Parma*, Governor of the *Netherlands* for the K. of *Spain*, after he had lain before it a Twelvemonth. This was one of the moſt remarkable Sieges that ever was heard of, according to the Account that *Meteran* and *Strada* give of it, wherein that Prince could never have ſucceeded, had it not been for that ſtupendious Bridge which he laid over the *Scheld*, in order to carry it on. The Citizens did all that they could to ruin this Bridge, and to that End built ſeveral Fire-Boats of a very extraordinary Form: They were compos'd of large firm Planks, with Room for a Mine in the middle, which was inclos'd with Brick and Lime, leaving only a ſmall Paſſage for a Train to reach the Gun-powder, with which the Mine was filled; and over the Mine were laid great Quan-

Digitized by Google

tities of Stones, Bullets, and other Materials that were fit to do Execution. Being thus prepar'd, the Citizens let them loose above the Bridge; the *Spaniards* made a Paſſage, by which all of 'em went through but one, without Effect. This ſtopping near the End of the Bridge, while Men were ſent to take out the Powder, the Mine blew up, deſtroy'd thoſe who were on board, and many others in the Boats of the Bridge, in all about 500. The Shock was ſo dreadful, that it made the Earth to tremble for ſeveral Miles, and threw the Water of the River a great way beyond its Banks: But this Deſign of blowing up the Bridge having miſcarried, the Prince of *Parma* renewed the Siege with Vigour; and the rich Merchants being willing to ſave their Effects, they perſwaded the Garriſon to ſurrender in 1585. After which, the Prince of *Parma* re-eſtabliſh'd Popery there, and reſtored the City to the Crown of *Spain*. This City was burnt by the *Danes* in 807, and ſuffer'd much by accidental Fires in 1236, 1456, and 1461. 'Twas taken by the Confederate States in 1566, afterwards retaken by the *Spaniards*; and upon the Death of *Requeſenes* the Governor of the *Spaniſh-Netherlands*, the *Spaniards*, who mutiny'd for want of Pay, burnt down 500 Houſes, ſack'd the Town, and murder'd 7000 of the Inhabitants. The *French* hir'd one *Hoo* to betray the Citadel, and the Fort of *Montery* near *Bruſſels*, in 1674; but the Plot was diſcover'd, and diſappointed by hanging the Traitor. The *French* ſeiz'd it after the Death of *Charles* II. of *Spain*, but abandon'd it after the Battle of *Ramillies* in 1706. They attempted it again by Treachery in 1708, when *Ghent* and *Bruges* were betray'd to 'em; but were diſappointed. *Guicciardin* ſays, the Inhabitants in his Time were reckon'd 200000; that it had 13 Gates, 8 of which lie towards the River; and that they had 74 Bridges over the 8 Canals in the Town. They have 200 Streets, and 22 publick Places or Squares. Their Government is by 9 choſen out of the Nobility, 9 named by the Præfects or Maſters of the Streets, and 18 others choſen from among the Perſons of chief Note in the City; whoſe Names being all ſent to the Prince, he appoints one half of 'em for a ſtanding Senate, who afterwards chuſe two Burgomaſters, one of whom appears in behalf of the City at the Meeting of the States, and the other adminiſters Juſtice at home, having with the above-mention'd Senators a deciſive Power in all Cauſes. They have alſo a Scout, who apprehends Criminals, and executes their Sentences upon them; and they have a Solicitor, who pleads Civil Cauſes before them; and chuſe two Treaſurers nam'd by the People, and a Receiver propos'd by the Nobility, to manage the publick Revenue, according to the Order of the Senate, who likewiſe appoint a Council of 12 from among the Deans of the 28 Companies of Trades, to aſſiſt in the Government.

2. *Lire*, or *Liere*, about 10 Miles S. E. from *Antwerp*, very ſtrong by its Situation on the River *Nethe*. 'Tis a neat and pleaſant Town, inhabited by Perſons of Quality and rich Merchants, who leave off their Trade. It changed Maſters ſeveral times during the Civil Wars of the *Netherlands*, and is very well fortified. Its Market-place vies with any of the Country for Extent, and the ſtately Buildings which ſurround it; is noted for its Manufactures, and for a Fair of Cattle one Day each Week from St. *John*'s-Tide to *Martinmas*. The Collegiate Church of St. *Gummarus* is a magnificent Structure. They have alſo a fine Grammar School, and ſeveral Religious Houſes; among which, that of the *Carthuſians* is the chief.

3. *Horentals*, on the ſame River, about 8 Miles N E. from *Lire*, a pleaſant Town, and tolerably well fortified. 'Tis noted for the Birth of a Phyſician called *Peter* of *Horentals* famous for his kill in the ſecret and ſpecifick Virtues of Plants, by which he did great Cures, and communicated his Art to his two Sons *Peter* and *Theodore*, who ſucceeded him in Fame and Practice

4. *Eckeren*, a ſmall Town about 3 Miles N. from *Antwerp*, noted for a ſharp Battle betwixt the *French* and the Confederates in 1703, when both Sides pretended to the Victory.

4. *Hoogſtraten*, about 15 Miles N.E. from *Antwerp*, a large open Town, with the Title of an Earldom, and ſeveral Villages under its Juriſdiction. It belongs to the Noble Family of the *Lalaing*.

Lil

Digitized by Google

Lillo and *Sandfliet*, already deſcrib'd in *Dutch Brabant*, are reckon'd Part of this Marquiſate.

The Dutchy of Limburg,

HAS *Juliers* on the N. Part of the Biſhoprick of *Liege* on the S. Part of the ſame Biſhoprick on the W. and the Dutchy of *Juliers* on the E. is 28 Miles where longeſt from N. to S. and about 75 broad. We have already deſcrib'd the *Dutch* Part of it, *P.* 925. and come now to *Spaniſh Limburg*. *La Forreſt* ſays, 'twas anciently inhabited by the *Eburones*, poſſeſſed afterwards by particular Lords, and ſold about 1280 to the D. of *Brabant*: Since which, it has always followed the Fate of that Province, and is ſtill ſubject to the ſame Courts.

Limburg, the chief Town, lies on the River *Veſe*, upon a Rock almoſt inacceſſible, about 15 Miles S. E. from *Liege*, and 13 S. from *Aix la Chapelle*. 'Twas taken by the *Dutch* in 1633, retaken by the *Spaniards* ſome Time after, taken by the *French* in 1675, but reſtored by the Peace of *Nimeguen*. 'Twas ſeized by the *French* after the Death of *Charles* II. but recover'd by the Confederates under the D. of *Marlborough* in 1703. The Town is ſmall, conſiſts chiefly of one broad ſhort Street, and the Buildings not remarkable. 'Tis chiefly noted for its Strength, being encompaſſed with a ſtrong Wall and a Trench, and has but one Paſſage, extreme difficult, on the Edge of a Rock, commanded by the Gate of the Town, which is well fortified This is the only Place of Note in the Dutchy belonging to the *Spaniards*.

The adjacent Country abounds with all neceſſary Commodities except Wine, and is noted for excellent Wheat, ſtore of Fuel, and the beſt Iron Mines in all thoſe Parts.

The Dutchy of Luxemburg,

HAS the County of *Namur* and the Biſhoprick of *Liege* on the N. Part of *Champagne* and *Lorrain* on the S. the Electorate of *Treves* on the E. Part of *Hainault* and *Champagne* on the W. The greateſt Length from S. E. to N. W. is about 68 Miles, and the greateſt Breadth from S. W. to N. E. about 60. 'Tis commonly divided into the Diſtricts of *Arduenne* and *Moſelle*, or into the *Famenne* and *Arduenne*, and now into the *French* and *Spaniſh Luxemburg*. The Diſtrict of *Famenne* is fruitful in Corn, and yields ſome Wine, with Quarries of Stone and other Foſſils. That Part which lies towards *France* and the *Maes* is more woody and barren, has little Corn, but Plenty of all ſorts of Veniſon; and in ſome of the Mountains, there are Mines of Iron. The chief Rivers are, the *Moſelle*, *Elſe*, *Semay*, the *Ourte*, and the *Maes*, which run through *Arduenne*. The Dutchy has above 20 Wall'd Towns, and about 1200 Boroughs and Villages. 'Tis divided into 7 Earldoms, a great Number of Baronies and leſſer Seigniories, where the Lords have a greater Power over their Vaſſals than in any other Province of the *Netherlands*. The Provincial States are compoſed of the Prelates, Nobility, and Gentry, and the Deputies of the Cities. 'Tis ſaid to have had its Name from a Caſtle, which the *Treviri* built in Honour of the Sun, where *Luxemburg* now ſtands, which they call *Lucis Burgum*. *Sigefrid*, Son to *Ricuinus Arduennenſis*, famous in ancient Hiſtory, having obtained Part of this Country from the Abbot of St. *Maximus* of *Treves*, enlarged his Territory, built the City, and was the Founder of the Earldom. It came afterwards to the Count of *Namur*, and by Marriage to the Marquis of *Arlong*; one of whoſe Poſterity, called *John*, being choſen K. of *Bohemia*, divided his Dominions betwixt his two Sons. *Charles* the Eldeſt ſucceeded to the Crown of *Bohemia*, and was choſen Emperor. His younger Brother *Wenceſlaus* having *Luxemburg*, his Brother erected it into a Dutchy in 1346; and *Elizabeth*, who fell Heireſs to it afterwards, ſold it to *Philip the Good* of *Burgundy* in 1422, from whom it came to the Houſe of *Auſtria*, and continued under their Subjection till Part of it was quitted to the *French* by the Treaty of the *Pyrenees*.

The chief PLACES *under the* Spaniards *are*,

1. *Luxemburg*, Lat. *Lutzenburgum*, *Luxenburgum*, and *Lucemburgum*, is by *Guicciardin* thought to be *Ptolomy's Auguſta Romanduorum*,

Digitized by Google

and by others his *Augusta Veromanduorum*: But *Cellarius* thinks the latter to be St. *Quintin*. The City is divided into the Old and New; the former is now the Suburbs of the latter, because lying in a Bottom, and commanded by the Hill, 'twas not capable of being defended since great Guns came in Fashion. The Main of the New City stands now on that Hill, surrounded with good Walls, strong Bastions, Counter-Guards, Half-Moons, Ravelins, Ditches, two Cover'd-Ways, and other Fortifications. It lies in Long. 24. 45. Lat. 49. 43. about 20 Miles S. W. from *Treves*, 11 N. W. from *Thionville*, 44 S. from *Limburg*, and 64 S. E. from *Namur*. Dr. *Northleigh* says, it lies near the River *Alsith*, that runs under it, upon a Precipice of Rocks, which also surround it, Nature having made a Vale betwixt the Rocks on which 'tis seated and those that front it, which makes it almost impregnable by Art; and it has been so fortified since, that 'tis one of the strongest Places in *Europe*; yet there are some adjacent Rocks from whence it may be bombarded. On the W. Side of it lies a Promontory of the opposite Hill jetting out, which is join'd to the Town-Gate by a Bridge. In the New City, there are only two Springs, and those so deep in the Earth, that they are seldom us'd. They have large Cisterns for holding Rain Water; and the Maids have a great Drudgery to bring their Water from the River, which runs at the Foot of the Hill. The Jesuits have a handsome Church here, and the *Franciscans* a Cloister, said to have been founded in the Life of St. *Francis*. In the Chapel belonging to their great Church, there are the Tombs of *John* of *Luxemburg* King of *Bohemia*, Son to the Emperor *Henry* VII. and of the famous Count *Mansfeld*, Governor of the *Spanish Netherlands*, with the Effigies of himself and his two Wives in Brass. The Town is neither large nor well built, except some Houses erected by the *French* King for the Officers of the Garrison. This City was taken by the Duke of *Orleans* in 1542, and retaken by the Emperor *Charles* V. two Years after. 'Twas taken again by the *French* in 1684, but restored by the Treaty of *Ryswick*. They seiz'd it again after the Death of K. *Charles* II. of *Spain*, and still keep it. On the E. Side, there was a stately Palace belonging to the Counts of *Mansfeld*; with many noble Monuments of Antiquity; but 'twas ruin'd by the last Siege. *La Forrest* says, the *French* Family, entitl'd Dukes of *Luxemburg*, had formerly 3 Branches, but now only that of *Brienne St. Paul*, of which was the famous Mareschal *de Luxemburg*, Father to *Francis Frederick* D. of *Montmorenci*.

2. *Arlun*, or *Arlon*, about 10 Miles N. W. from *Luxemburg*, supposed to have been formerly a Place where the Moon was worship'd, and from thence called *Ara Lunæ*. 'Twas a handsome Town, but much endammag'd by the late Wars. 'Twas erected into a Marquisate in 1103.

3. *Chiny*, about 10 Miles S. W. from *Arlon*, Capital of a City of the same Name, formerly under Lords of its own, but united to the Dutchy of *Luxemburg* at the End of the 14th Century. 'Twas ruin'd by the *French* Wars, and has not recover'd its ancient Splendour. It has an independant Jurisdiction; and the supreme Administrators of Justice in both the County and Dutchy are co-ordinate in their Stiles, and call themselves the Governor, President, and Senators, of the Council of the Dutchy of *Luxemburg*, and of the E. of *Chiny*.

4. *Neufchattel*, about 6 Miles N. from *Chiny*, was formerly a Place of great Strength and Beauty, but now decay'd.

5. *Bastogne*, or *Bastonac*, about 13 Miles N. E. from *Neufchattel*, whose pleasant Situation makes it be called the Palace of *Ardennes*. 'Tis noted for its Horse-Fairs and noble Corn-Market.

6. *St. Hubert*, a famous Abbey, 9 Miles W. from *Bastogne*, so called because St. *Hubert* Bishop of *Liege* was buried there; to whom the Huntsmen address themselves in their Devotions.

7. *Rochefort*, 10 Miles N. W. from *St. Hubert*, remarkable for the Defeat of the *Spaniards* by the *French* near it in 1635.

8. *Marche-en-Famine*, Lat. *Martia*, supposed to have had its Name from the Idol *Mars*, who was worship'd there. It lies about 9 Miles N. E. from *Rochefort*. 'Tis an ancient Town, but remarkable for little else. *La Forrest* says, it has a pretty good Trade.

9. *La Roche en-Ardenne*, about 9 Miles S. E. from *Marche-en Famine*, a small Town, where the *French* Kings of the 2d Race frequently

quently diverted themſelves by Hunting, and where their chief Huntſmen reſided. It takes its Name from a Rock upon which it ſtands. 'Tis the Capital of a County of the ſame Name, which is generally barren; but the Inhabitants better the Soil by breaking it up with a ſtrong Team of Horſes, afterwards plowing it acroſs, and tearing off the Buſhes, Brambles, and Heath, with a great Harrow, which they burn with the Turfs of the Soil at convenient Diſtances. The Inhabitants ſhew a Hole in the Rock here, called K. *Pepin*'s Chair, where they ſay he us'd to reſt himſelf upon Occaſion, and gave Audience to the People that reſorted to him for Juſtice.

10. *Salm*, on a ſmall River near the Frontiers of *Limburg*, about 15 Miles N. E. from *La Roche*, Capital of a County, whoſe Lords were very famous in the 8th Century.

11. *Durbuy*, on the River *Urt*, about 10 Miles N. from *La Roche*, Capital of a County of the ſame Name, ſubject formerly to Lords of its own.

12. *St. Vit*, 15 Miles S. E. from *Durbuy*, a great open Town, chief of a Lordſhip, formerly belonging to the Counts of *Vianden*, but now to the Houſe of *Naſſau*. About a Mile from thence lies *Slude*, a neat open Town, Capital of a County, with Juriſdiction over ſeveral Villages, noted for being the Birth-place of the famous Hiſtorian *Joannes Sleidanus*.

13. *Vianden*, on a ſmall River, about 19 Miles N. E. from *Luxemburg*, a great open Town, with the Title of a County, belonging to the Houſe of *Naſſau*.

In this Country is that called the Dukedom of the *Moſelle*, which lies along that River between *Metz* and *Treves*, formerly a Principality of great Account for about 500 Years; but loſt its Name upon erecting the Caſtle of *Bar*, when *Frederick*, the Founder of it, order'd it to receive a new Appellation from that Caſtle. It has ſince been divided into ſeveral leſſer Portions, ſubject to ſeveral Princes. The Part which lies next to *Metz* fell under the Biſhops of that Town, and from thence as far as *Commerſnacheren* belong'd to the D. of *Luxemburg*, and the Remainder came to the Dukes of *Lorrain*, in Right of the Counts of *Bar*.

For the other Towns of *Echternach*, *Waſſenbillich*, *Grevenmacheren*, *Remich*, *Virton*, &c. there's nothing in them that merits a Deſcription.

Bleau mentions the Principality of *Ardenne*, which was ſuppoſed to have been erected in the Time of the firſt Race of the *French* Kings, and was govern'd by Princes deſcended from *Cladion* II. King of that Race. This Country was moſt of it barren, and cover'd with Woods, as a great Part of it is ſtill; but by conſtant Labour and Cultivation, it now produces all Neceſſaries for the Life of Man. It lies betwixt the County of *Namur*, *Hainault*, and the reſt of *Luxemburg*; and the great Forreſt of this Name was formerly worſhip'd by the idolatrous Pagans. The Women howl here at the Burials of their Relations like the *Iriſh*.

The Earldom of *Rauſſy*, formerly called that of St. *Paul*, lies about mid-way betwixt *Luxemburg* and *Thionville*, ſuppoſed to derive its Name from a *Ruſſian* Lord, who in ancient Times married the Heireſs. *Guicciardin* mentions a Town called *Marville*, Capital of a Lordſhip, 12 Leagues from *Luxemburg*, upon the River *Chier*, which is divided betwixt the King of *Spain* and the Dukes of *Lorrain*, and for that Reaſon called the Common Town. He mentions alſo the Lordſhips of *Arauxy* and *Reydefyd*, the Earldom of *Urſmont*, towards the Borders of *France*, the County of *Manderſcheid*, in which there's a ſtrong Caſtle; the Earldom of *Virneburg* near the Frontiers of *Treves*, which formerly belong'd to the Counts of *Manderſcheid*, who ſold it to the D. of *Luxemburg* in 1270, *Reacmacheren*, a neat little Town, with a good Caſtle, about 9 Miles S. E. from *Luxemburg*, and *Ren* upon the River *Chier*, formerly a conſiderable Town, but ruin'd by the War, and dismantled when reſtored by the *French*.

French Luxemburg.

Lies on that Side next to *Champagne* and *Lorrain*, and contains the following Places.

1 *Thionville*, Lat. *Theodonis Villa*; in Dutch, *Diedenhoven*, on the *Moſelle*, about 12 Miles S. E. from *Luxemburg*. This is very ſtrong by its Situation, and well fortified, but was taken by the *French* in 1643, and is one of the three Legal Places of Luxem-

Germany, and 'twas ſo ſtrong as to be thought impregnable. The *French* under the Duke of *Guiſe* took it in 1558, after a long Siege, which coſt them abundance of Men. 'Twas afterwards reſtored to the *Spaniards* by a Treaty of Peace, when they added to its Fortifications 6 Bulwarks, encompaſſed with a Wall of Brick and Stone, 4 large Hornworks, a broad and deep Ditch, ſet the ſloaping Curtain with Palliſadoes; and before the Gate of *Luxemburg*, they raiſed a vaſt Horn work. Notwithſtanding which, 'twas taken by the D. of *Bourbon* in 1643, after two Months Siege, and was quitted to the *French* by the Treaty of the *Pyrenees*. 'Tis reckon'd the Capital of *French Luxemburg*.

2. *Montmedy*, about 24 Miles S. W. from *Luxemburg*, Lat. *Mons Medius*, or *Mons Malediſtus*, ſtands upon a high Hill near the River *Chier*, is reckon'd a Place of Strength; but was frequently taken during the Wars, becauſe of its being ill provided, according to the uſual Neglect of the *Spaniards*. The *French* took it in 1657, and had it confirmed to them by the Treaty of the *Pyrenees*.

3. *Damvilliers*, Lat. *Dampvillerium*, or *Danvillerium*, about 8 Miles S. E. from *Montmedy*, in a marſhy Country. *Charles* V. fortified it as a Barrier againſt the *French*. The *French* took, plunder'd, and ras'd it, in 1542. The *Spaniards* rebuilt, and made it ſtronger than before; but the *French* retook it again in 1552. The *Spaniards* recover'd it afterwards; but the *French* took it once more in 1637, and 'twas quitted to them by the Treaty of the *Pyrenees*.

4. *Bouillon*, Lat. *Bullonium*, about 12 Miles N. W. from *Montmedy*, on the River *Semois*, a ſtrong Town, with the Title of a Dutchy, on the Frontiers of the Forreſt of *Ardenne*. 'Tis guarded with a ſtrong Caſtle, pleaſantly ſituated, and is famous for the Birth of *Godfrey* of *Bouillon*, a great and generous Prince, who, with his Brothers *Euſtace* and *Baldwin*, led the Chriſtians into the *Holy Land* againſt the *Turks* in 1096; and to enable himſelf to carry on that Expedition, mortgaged this Town and Dutchy to the Biſhop of *Liege* for a great Sum of Money. He ſucceeded ſo well in this Enterprize, that in 3 Years time he drove the *Turks* out of the *Holy Land*, and was made King of *Jeruſalem*; but refus'd to be crown'd there, ſaying, He would never wear a Crown of Gold, where our Saviour wore one of Thorns. His Succeſſors endeavour'd to recover the Town and Dutchy, by obliging the Biſhop of *Liege* to reſtore it for Money he ow'd them, but could not effect it. *William* Count of *Marck* enjoy'd it by the Treaty of *Tongres* in 1484. The Mareſchal *de la Marck* ſeiz'd it in 1552. *Charles* V. having taken it ſome Time before, and reſtor'd it to the Biſhop of *Liege*; but after ſeveral Differences, ſays *La Forreſt*, *Charlotte de la Marck*, Dutcheſs of *Bouillon*, brought it by Marriage to *Henry de la Tour d'Auvergne*, Viſcount of *Turenne*, ſo well known by the Name of the Mareſchal *de Bouillon*, and left it to him at her Death in 1594. He married for 2d Wife *Elizabeth* of *Naſſau*, by whom he had *Frederick Maurice* Duke of *Bouillon*, who in 1642 quitted to *Lewis* XIII. the Principality of *Sedan*, and the Dutchy of *Bouillon*, in Exchange for the Dutchies of *Albret* and *Chateau Thierry*, and of the County of *Evreux*. The Barons of *Sedan* and the Biſhop of *Liege* did both of 'em aſſume the Titles of Dukes of *Bouillon*.

The principal RIVERS *of the* Netherlands.

1. THE *Rhine*. To what we have ſaid of this River already, P. 784, in the Deſcription of *Germany*, we ſhall add, That at *Wiick te Duerſtede* in the Biſhoprick of *Utrecht*, it joins with a ſmall River called *Leck*, and being diverted from its ancient Courſe, paſſes not to *Utrecht* as formerly; but that City is forc'd to ſupply the Loſs of its noble Stream, ſays *Pitt*'s Atlas, by an artificial Channel cut from the *Leck*, and called by the Name of *Iſſel*. *Cluverius*, in his Book *De Tribus Rheni Alveis*, and in his *Germania Antiqua*, has many Arguments to prove, that the middle Channel of the *Rhine*, which runs by *Arnheim*, *Leyden*, &c. was its firſt Channel, according to *Tacitus*; and being derived into the *Leck* by *Civilis*, who broke down the Bank caſt up by *Druſus*, let that River almoſt into the middle of the Iſland of the *Batavi*; which, together with the ancient Branch called *Vahalis*, ſerv'd them as a double Trench againſt the *Romans*.

The

Digitized by Google

The ancient Channel of the *Rhine* being thus drein'd of its Water, and unable to carry down the Sand and Mud, he thinks might occaſion the ſtopping up of that ancient Channel. But others ſay, That about 1360, the *Rhine* being ſwell'd by a prodigious Land-Flood, and its Mouth being at the ſame time ſtop'd by a tempeſtuous Sea, the Stream forc'd it ſelf into the *Leck*, and under that Name runs by *Culenburg*, *Vianen*, &c. and falls into the *Merwe* near the Village of *Crimpen*, which is there alſo called by the Name of the *New Maes*. *Cluverius* likewiſe argues, that that Branch called the *Vahalis* cannot be the ancient Channel of the *Rhine*, becauſe the *Maes*, into which it falls, carries the Name from it; of which there's no Example, that a River of leſs Note ſhould carry away the Name from the greater. He refutes their Opinion who think, that the *Leck* was *Corbulo*'s Ditch mentioned by *Tacitus* and *Dio*; and proves it to be that Ditch which begins at *Leyden*, where 'tis commonly called the *Rhier*; runs from thence to *Delft*, *Maeſland*, &c. and falls into the *Maes* near the Village of *Sluys*. There are two Rivers called the *Iſſel*, Lat. *Iſſula*; one of 'em comes out of the *Leck* near *Vianen*, and divides it ſelf into 3 Branches: The firſt runs near *Schoenhoven* and falls again into the *Leck* near *Crimpen*; the 2d joins with the principal Stream near *Gouda*, which running from *Vianen* to *Iſſelſtein*, falls into the *Maes* between *Crimpen* and *Rotterdam*. The other *Iſſel* riſes in *Weſtphalia*, near *Raſfeld*, on the Borders of *Cleve*, and running through *Zutphen* by *Borg*, *Dotekum*, and *Doesburg*, is augmented by a Channel from the *Rhine* cut by *Druſus Nero*, and falls into the *Zuyder-Sea* at *Campen* with a large Channel.

2. The *Maes*, riſes from the Mountain *Vogeſus* near *Langres*, in the Confines of *Burgundy* and *Champagne*, begins to be navigable by ſmall Veſſels at St *Thibaut*, and runs through Part of *Lorrain*, *Champagne*, the Biſhoprick of *Liege*, Counties of *Namur* and *Brabant*, and falls into the Sea at the *Brill*, which is 250 Miles in a direct Line; but taking in all its Windings, is above 400. After receiving the *Chier*, the *Semois*, the *Sambre*, the *Mehaigne*, the *Roer*, and many other leſſer Rivers in its Way, it mixes with the *Vahalis* by two Channels betwixt *Bommel* and *Megen*; but its great Channel keeps its Name till it comes to the Village of *Beckeven*; and when it falls into the *Vahalis* at the Caſtle of *Louveſtein*, 'tis there called the *New Maes*; and below *Gorcum*, is called by its own Name, and that of the *Merwe*, from an old Caſtle, ſuppoſed to have been built by *Merovius* K. of *France*, whoſe Ruins are ſtill to be ſeen in the Water near *Dort*; and after it comes to *Vlaerdingen*, 'tis called by the Name of the *Maes*, till it falls into the Sea; but the old Channel is that called the *Old Maes*, which runs by the Village of *Hedickhuyſen*.

3. The *Scheld*, riſes in *Picardy* between *Artois* and *Hainault*, near a Town call'd *Beaurevoir*, begins to carry ſmall Veſſels at *Valenciennes*, runs through the Dioceſe of *Cambray*, *Hainault*, and *Flanders*, and falls into the Sea by ſeveral Mouths in *Zealand*, after receiving the *Scarpe*, the *Haine*, the *Lys*, the *Dender* and ſeveral other Rivers in its Courſe, which is through a Country in a direct Line of near 100 Miles; but including its Turnings, about 170 Miles; and Tide flows up as far as *Ghent*, which is above 30 Miles, if we reckon its Turnings.

The leſſer Rivers are very numerous, ſupply the Country with Fiſh, and ſeveral of 'em ſerve for a Communication with the greater; but they do not merit a particular Deſcription. The Lake *Flevum*, mentioned ſo often by the *Roman* Hiſtorians, *Cluverius* takes to be that now called the *Zuyder-Sea*.

The principal Woods and Forreſts in the Netherlands *are*,

1. *Ardenne*, Lat. *Arduenna Sylva*, frequently mentioned by *Caeſar*, as the largeſt Forreſt in *Gaul*. *Cluverius*, after a long Diſſertation to prove it, ſays, the greateſt Length of this Wood from E. to W. betwixt the Conflux of the *Moſelle*, the Borders of the *Atrebates*, and the Bank of the Ocean, was 240 Miles; and that the greateſt Breadth, from the Borders of the *Mediomatrices* to the *Vahalis*, was 150; and that the chief Remains of it in his Time were in the *Weſterraw*, the Biſhopricks of *Treves* and *Liege*, and the Dutchy of *Luxemburg*; and on this Side

Digitized by Google

Side the *Maes*, a great Part of the Country on both Sides that River ſtill retaining its Name, as we have mentioned above. On the S. 'twas joined by the great Forreſt called *Voſega* or *Voſaga*, from the Mountain *Voſego*, which reached from the Head of the *Maes* into *Lorrain*, *Alſace*, and other Parts of *Germany*; and the Tract of Mountains on which it grew does ſtill retain ſomething of the Name, being in *Lorrain* called the Country of the *Voſges*, and by the *Germans*, *Waſgaw*; and the chief Part of theſe Mountains is that which now ſeparates *Burgundy* from *Lorrain*.

2. *Mormaut*, Lat. *Mormotium*, begins in *Hainault* near *Quoſnoy*, reaches ſeveral Leagues towards *Vermandois*, contains ſome Towns and Villages, and many Hamlets. Some place it betwixt the *Sambre* and the *Maes*.

3. The Wood of St. *Amand* in the ſame Province, which begins on the Borders of *French Flanders*, and reaches near *Valenciennes*.

4. The Forreſt of *Faigne*, Lat. *Sylva Fagniacenſis*, begins near *Avesnes* in *Hainault*, and reaches to *Mezieres* in *Champagne*, above 16 Leagues, but formerly much larger.

5. The Forreſt of *Soignies* near *Bruſſels*, above 7 Leagues in Compaſs, and includes above 8000 Acres, 100 of which are cut down every Year, and replanted. 'Twas ſaid to yield the King of *Spain* 50000 Floxins *per Annum*. It contains a Caſtle, called that of the Three Fountains, ſeveral Villages, Abbies and Monaſteries, and Gentlemen's Country-Houſes.

6. *Meerdale*, *Zaventerlo*, *Grotenhout*, and *Tournhout*, between *Louvain*, *Bruſſels*, and *Vilvord*.

7. *Marlaigne*, on the Bank of the *Maes*, reaches from the Caſtle of *Namur* near *Philipville*.

8. *Niepe*, near the Borders of *Artois*, is the chief Forreſt in *Flanders*, reaches as far as the River *Lys*; and that of *Nonnen* near *Ipres*, which reaches a great way N. and comprehends a great many Abbies and Villages.

9. *Poodsberg*, on the Borders of *Flanders* and *Hainault*, between *Gramont* and *Leſſine*, a large Forreſt, almoſt of an orbicular Figure. Theſe 3 were Part of the Forreſt of *Ardenne*.

10. *Le Blois Guillaume* in *Artois*, near *Renty*.

11. *Echterwald* in the Dutchy of *Gueldreland*, near *Arnheim*.

12. *Sevenwolden* in *Frieſland*, formerly mentioned; but it muſt be obſerved, that the State of theſe Woods and Forreſts is much alter'd ſince *Guicciardin* writ, from whom we have this Acconnt. There are no Hills nor Mountains in this Country remarkable enough to merit a particular Deſcription.
